waiver.9 The Agency decided, therefore, to look at corrosion inhibitors on a case-
by-case basis to establish whether each formulation would be acceptable as an alternative to the formulation of the original corrosion inhibitor used in the
OCTAMIX waiver.10

Therefore, pursuant to section 211(f)(4), EPA will examine the data submitted by Baker Hughes, along with all comments received from interested parties, to determine whether use of the corrosion inhibitor, TOLAD™ MFA–10A, in place of the original corrosion inhibitor TOLAD MFA–10, would cause or contribute to vehicles or engines failing to meet their emissions standards when using OCTAMIX. If use of TXCeed does not cause or contribute to such failures, EPA will modify the OCTAMIX waiver to allow the use of TOLAD™ MFA–10A as an alternative corrosion inhibitor to TOLAD MFA–10.
