practical utility; (b) the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Background and Brief Description
The National Institute for Occupational Safety and Health (NIOSH), under Section 20(a)(1), (a)(4), (a)(7)(c), and Section 22(d), (e)(5)(7) of the Occupational Safety and Health Act (29 U.S.C. 669), has the responsibility to conduct research relating to occupational safety and health relating to innovative methods, techniques, and approaches for dealing with occupational safety and health problems.

Since the Right to Know movement in the late 1970s, NIOSH has been developing methods and materials to notify subjects of its epidemiological studies. Within NIOSH, notifying workers of past exposures is done to inform surviving cohort members of results from NIOSH studies. Current NIOSH policy dictates how and when worker notification should occur. The extent of the notification effort depends upon the level of excess mortality or the extent of the disease or illness found in the study population. Current notification efforts range from posting results at the facilities studied to mailing individual letters to surviving members of the study population and other stakeholders. Each year, the NIOSH Industrywide Studies Branch (IWSB), Division of Surveillance, Hazard Evaluation, and Field Studies (DSHEFS) typically prepares materials for two to three completed studies. This often requires individual letters to be mailed to study populations ranging in size from 200–20,000 workers each. An evaluation instrument would gauge the effectiveness of notification materials and improve future communication of risk information.

The purpose of the proposed evaluation tool is to obtain feedback from workers that would improve the quality and usefulness of the Institute’s worker notification activities. Researchers from NIOSH propose to routinely include a Reader Response postcard with notification materials to assess the value and usefulness of said materials. We are requesting approval for three years. Participation is voluntary. There are no costs to respondents other than their time.

### ESTIMATED ANNUALIZED BURDEN HOURS

Centers for Disease Control and Prevention

Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP): Initial Review

The meeting announced below concerns Epidemiology, Prevention and Treatment of Influenza and Other Respiratory Infections in Ghana, IP12–001; Studies at the Animal-Human Interface of Influenza and Other Zoonotic Diseases in Vietnam, IP12–002; The Incidence of Community Associated Influenza and Other Respiratory Infections in the United States, IP12–003, and Epidemiology, Prevention and Treatment of Influenza and Other Respiratory Infections in Panama and Central America Region, IP12–006, initial review.

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the aforementioned meeting:

**Time and Date:** 8 a.m.–5 p.m., March 16, 2012 (Closed).

**Place:** Sheraton Gateway Hotel Atlanta Airport, 1900 Sullivan Road, Atlanta, Georgia 30337, Telephone: (770) 997–1100.

**Status:** The meeting will be closed to the public in accordance with provisions set forth in Section 552b(c)(4) and (6), Title 5 U.S.C., and the Determination of the Director, Management Analysis and Services Office, CDC, pursuant to Public Law 92–463.

**Matters To Be Discussed:** The meeting will include the initial review, discussion, and evaluation of applications received in response to “Epidemiology, Prevention and Treatment of Influenza and Other Respiratory Infections in Ghana, FOA IP12–001; Studies at the Animal-Human Interface of Influenza and Other Zoonotic Diseases in Vietnam, FOA IP12–002; The Incidence of Community Associated Influenza and Other Respiratory Infections in the United States, FOA IP12–003; and Epidemiology, Prevention and Treatment of Influenza and Other Respiratory Infections in Panama and Central America Region, FOA IP12–006.”

**Contact Person For More Information:**
Gregory Anderson, M.S., M.P.H., Scientific Review Officer, CDC, 1600 Clifton Road NE, Mailstop E60, Atlanta, Georgia 30333, Telephone: (404) 718–8833.

Elaine L. Baker,
Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.
