**Abstract:** The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 et seq. and 43 U.S.C. 1801 et seq.), authorizes the Secretary of the Interior to prescribe rules and regulations to administer leasing of mineral resources on the OCS. An amendment to the OCS Lands Act (Pub. L. 103–426) authorizes the Secretary to negotiate agreements (in lieu of the previously required competitive bidding process) for the use of OCS sand, gravel, and shell resources for specified types of public uses. Such specified uses will support construction of governmental projects for beach nourishment, shore protection, and wetlands enhancement or constitute a project authorized by the Federal Government.

Section 1340 states that: “... any person authorized by the Secretary may conduct geological and geophysical (G&G) explorations in the Outer Continental Shelf, which do not interfere with or endanger actual operations under any lease maintained or granted pursuant to this Act, and which are not unduly harmful to aquatic life in such area.” Section 1352 further requires that certain costs be reimbursed to the parties submitting required G&G information and data. Regulations implementing these requirements are in 30 CFR Part 580 and are the responsibility of the Bureau of Ocean Energy Management (BOEM).

The Independent Offices Appropriations Act (31 U.S.C. 9701), the Omnibus Appropriations Bill (Pub. L. 104–133, 110 Stat. 1321, April 26, 1996), and the OMB Circular A–25, authorize Federal agencies to recover the full cost of services that confer special benefits. Prospecting permits are subject to cost recovery under Department of the Interior’s implementing policy, and BOEM regulations specify service fees for these requests.

We use the information collected under these regulations to: (1) Ensure there is no environmental degradation, personal harm or unsafe operations and conditions; (2) ensure activities do not damage historical or archaeological sites or interfere with other uses; (3) analyze and evaluate preliminary or planned drilling activities; (4) monitor progress and activities in the OCS; (5) acquire G&G data and information collected under a Federal permit offshore; (6) determine eligibility for reimbursement from the Government for certain costs; and (7) determine the qualifications of applicants. BOEM also uses the information collected to understand the G&G characteristics of hard mineral-bearing physiographic regions of the OCS.

We will protect information considered proprietary according to 30 CFR 580.70, “What data and information will be protected from public disclosure?” 30 CFR 550.197, “Data and information to be made available to the public or for limited inspection,” 30 CFR part 552, “OCS Oil and Gas Information Program,” and the Freedom of Information Act (5 U.S.C. 552) and its implementing regulations (43 CFR 2). No items of a sensitive nature are collected. Responses are mandatory.

**Frequency:** On occasion; and as required in the permit.

**Description of Respondents:** Permittee(s)

**Estimated Reporting and Recordkeeping Hour Burden:** The estimated annual hour burden for this collection is 128 hours. The following table details the individual components and estimated hour burdens. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.
