The U.S. Nuclear Regulatory Commission (NRC) is announcing the availability of the model safety evaluation for plant-specific adoption of Technical Specifications Task Force Traveler TSTF–505, Revision 1, “Provide Risk-Informed Extended Completion Times—RITSTF Initiative 4B.” The proposed change revises the Improved Standard Technical Specification, NUREG–1430. The NRC staff has reviewed the model SE and the applicable information is acceptable for use by licensees. Licensees opting to apply for this TS change are responsible for reviewing the NRC staff SE and the applicable technical bases, providing any necessary plant-specific information, and assessing the completeness and accuracy of their license amendment request (LAR). The NRC will process each amendment application responding to the Notice of Availability according to applicable NRC rules and procedures.

The proposed changes do not prevent licensees from requesting an alternate approach or proposing changes other than those proposed in TSTF–505, Revision 1. However, significant deviations from the approach recommended in this notice or the inclusion of additional changes to the license will require additional NRC staff review. This may increase the time and resources needed for the review or result in NRC staff rejection of the LAR. Licensees desiring significant deviations or additional changes should instead submit an LAR that does not claim to adopt TSTF–505, Revision 1.

Dated at Rockville, Maryland, this 6th day of March 2012.

For the Nuclear Regulatory Commission.

John R. Jolicoeur,
Chief, Licensing Processes Branch, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation.

**SUPPLEMENTARY INFORMATION:** TSTF–505, Revision 1, is applicable to all nuclear powered reactors. TSTF–505 revises the TS to (1) add a new RICT program to the Administrative Controls of TS, (2) modify selected Required Actions to permit extending the CTs, provided risk is assessed and managed within an acceptable configuration risk management program (CRMP), (3) add new Conditions, Required Actions, and CTs to address conditions not currently addressed in TS, and (4) add a new example in TS Section 1.3, to describe application of the RICT Program. The model SE will facilitate approval of plant-specific adoption of TSTF–505, Revision 1.
