Atlantic on board a vessel for which a valid Federal charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, without regard to where such species were harvested, i.e., in state or Federal waters.

(B) If commercial landings exceed the ACL, the AA will file a notification with the Office of the Federal Register, at or near the beginning of the following fishing year to reduce the ACL for that following year by the amount of the overage in the prior fishing year.

(C) The applicable commercial ACLs, in round weight, are 284,680 lb (129,129 kg) for 2012, 315,920 lb (143,299 kg) for 2013, and 343,200 lb (155,673 kg) for 2014 and subsequent fishing years.

(ii) Recreational sector. (A) If recreational landings for red grouper, as estimated by the SRD, are projected to exceed the applicable ACL, the AA will file a notification with the Office of the Federal Register to close the recreational sector for the remainder of the fishing year. On and after the effective date of such a notification, the bag and possession limit is zero. This bag and possession limit applies in the South Atlantic on board a vessel for which a valid Federal charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, without regard to where such species were harvested, i.e., in state or Federal waters.

(B) If recreational landings for red grouper, as estimated by the SRD, exceed the applicable ACL, the AA will file a notification with the Office of the Federal Register, to reduce the recreational ACL the following fishing year by the amount of the overage in the prior fishing year.

(C) The applicable recreational ACLs, in round weight, are 362,320 lb (164,346 kg) for 2012, 402,080 lb (182,380 kg) for 2013, and 436,800 lb (198,129 kg) for 2014 and subsequent fishing years.

(iii) Without regard to overfished status, if the combined commercial and recreational sector ACL (total ACL), as estimated by the SRD, is exceeded in a fishing year, then during the following fishing year, an automatic increase will not be applied to the commercial and recreational sector ACLs during that following fishing year. The SRD will evaluate the landings data to determine whether or not an increase in the respective sector ACLs will be applied. The applicable combined commercial and recreational sector ACLs, in round weight are 647,000 lb (293,474 kg) for 2012, 718,000 lb (325,679 kg) for 2013, and 780,000 lb (353,802 kg) for 2014 and subsequent fishing years.

(A) Following an overage of the total ACL, if there is no overage the following fishing year, the SRD will evaluate the landings data to determine whether or not an increase in the respective sector ACLs will be applied.

(B)[Reserved]
has been delegated from the Secretary to the Assistant Administrator for Fisheries, NMFS.

In the proposed rule, NMFS indicated that dates and locations for public hearings on the proposed action would be specified in a separate document in the Federal Register to be published at a later date. In this document, NMFS is announcing that it will hold a public hearing in Gloucester, MA, and one in Silver Spring, MD. These hearings, in addition to written comment collected via the methods described above, will allow NMFS to collect public comments on the proposed rule, which will assist NMFS in determining the final 2012 BFT quota specifications, consistent with the 2006 Consolidated HMS FMP, the Magnuson-Stevens Act, ATCA, and other applicable law.

Dated: March 26, 2012.

Emily H. Menashes,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
