issuance of a new license for the project or other disposition under the FPA, whichever comes first. If issuance of a new license (or other disposition) does not take place on or before March 31, 2013, notice is hereby given that, pursuant to 18 CFR 16.18(c), an annual license under section 15(a)(1) of the FPA is renewed automatically without further order or notice by the Commission, unless the Commission orders otherwise. If the project is not subject to section 15 of the FPA, notice is hereby given that the Madison Paper Industries, FFL Energy Maine Hydro, LLC, and Merimil Limited Partnership are authorized to continue operation of the Brasua Hydroelectric Project, until such time as the Commission acts on its application for a subsequent license.

Dated: April 9, 2012.
Kimberly D. Bose, Secretary.

DEPARTMENT OF ENERGY
Federal Energy Regulatory Commission
[Docket No. PR12–20–000]
NorthWestern Corporation; Notice of Petition for Rate Approval

Take notice that on April 2, 2012, NorthWestern Corporation (NorthWestern) filed a Rate Election pursuant to 284.123(b)(1) of the Commissions regulations and to revise its Statement of Operating Conditions. NorthWestern proposes to utilize rates that are the same as those contained in NorthWestern’s transportation rate schedules for comparable intrastate service on file with the South Dakota Public Utilities Commission as more fully detailed in the petition.

Any person desiring to participate in this rate filing must file in accordance with Rules 211 and 214 of the Commission’s Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestors parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the date as indicated below. Anyone filing an intervention or protest must serve a copy of that document on the Applicant. Anyone filing an intervention or protest on or before the intervention or protest date need not serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the “eFiling” link at http://www.ferc.gov. Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at http://www.ferc.gov, using the “eLibrary” link and is available for review in the Commission’s Public Reference Room in Washington, DC. There is an “eSubscription” link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email FERCOnlineSupport@ferc.gov, or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5 p.m. Eastern Time on Monday, April 16, 2012.

Kimberly D. Bose, Secretary.

DEPARTMENT OF ENERGY
Western Area Power Administration
Interconnection of the Grande Prairie Wind Farm, Holt County, NE

AGENCY: Western Area Power Administration, Department of Energy.

ACTION: Notice of intent to prepare an environmental impact statement and conduct scoping meetings; Notice of potential floodplain and wetlands involvement.

SUMMARY: The Western Area Power Administration (Western), an agency of the Department of Energy (DOE), intends to prepare an environmental impact statement (EIS) on the proposed interconnection of the Grande Prairie Wind Farm (Project) in Holt County, near the city of O’Neill, Nebraska. Grande Prairie Wind, LLC (Grande Prairie Wind), a majority-owned subsidiary of Midwest Wind Energy, LLC, has applied to Western to interconnect their proposed wind energy generation project to Western’s power transmission system. Western’s Federal action would be to execute an interconnection agreement with Grande Prairie Wind and make any necessary modifications to the transmission system to accommodate the interconnection at Grande Prairie Wind’s expense. Western is issuing this notice to inform the public and interested parties about Western’s intent to prepare an EIS, conduct a public scoping process, and invite the public to comment on the scope, proposed action, alternatives, and other issues to be addressed in the EIS.

Construction activities proposed by Grande Prairie Wind may affect floodplains and wetlands, so this Notice of Intent (NOI) also serves as a notice of proposed floodplain or wetland action in accordance with DOE floodplain and wetland environmental review requirements.

DATES: The public scoping period begins with the publication of this notice and closes on May 16, 2012. To provide the public an opportunity to review the proposal and project information, Western will hold one public meeting in O’Neill, Nebraska. Western will announce the date and location of the public scoping meeting through local news media, and posting on the Western Web site at http://www.wapa.gov/ugp/Environment/default.htm at least 15 days prior to the meeting. While comments will be accepted at any time during the EIS process, submission of comments by the end of the scoping comment period will ensure full consideration in the Draft EIS.

ADDRESSES: Written comments on the scope of the EIS should be addressed to Mr. Matt Marsh, Western Area Power Administration, P.O. Box 35800, 2900 4th Avenue, North, Billings, MT 59107, fax (406) 255–2900 or email at grandeprairie@wapa.gov.

FOR FURTHER INFORMATION CONTACT: Mr. Matt Marsh, Western Area Power Administration, P.O. Box 35800, 2900 4th Avenue, North, Billings, MT 59107, telephone (406) 255–2811, or email grandeprairie@wapa.gov. For general information on DOE’s National Environmental Policy Act (NEPA) review procedures or status of a NEPA review, contact Ms. Carol M. Borgstrom, Director, Office of NEPA Policy and Compliance, GC–54, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, telephone (202) 586–4600 or (800) 472–2756, fax (202) 586–7031.

SUPPLEMENTARY INFORMATION: Western, an agency within DOE, markets Federal hydroelectric power to preference customers, as specified by law. These customers include municipalities, cooperatives, irrigation districts, Federal and State agencies, and Native
American tribes. Western’s service territory covers 15 western states, including Nebraska. Western owns and operates more than 17,000 miles of high-voltage transmission lines. Western offers capacity to deliver electricity on its transmission system, when such capacity is available, under Western’s Open Access Transmission Service Tariff.

Grande Prairie Wind has applied to Western to interconnect their proposed wind energy generation Project to Western’s Fort Thompson–Grand Island transmission line. The proposed Project is subject to county and local approvals prior to Project construction.

Grand Prairie Project Description

Grande Prairie Wind proposes to construct and operate a 400-megawatt (MW) wind energy generation facility in Holt County in northern Nebraska. The Project area would occupy approximately 45,000 acres in portions of Willowdale, Antelope, Grattan, Iowa, Scott, and Steel Creek Townships.

Grande Prairie Wind proposes to build up to 266 wind turbines. Permanent disturbance for each wind turbine generator location would be approximately 0.25 acres. Grande Prairie Wind is considering a variety of wind turbine generator types, with capacities ranging from 1.5 to 2.4 MW. Each wind turbine generator would be mounted on a single steel tower between 263 and 329 feet tall and have blade sweep diameter ranging from 271 to 385 feet, depending on the wind turbine generator model selected. Approximate total height at the rotor apex would be between 398 and 521 feet.

Approximately 60 to 80 miles of underground electrical collector cable would be required to carry generated power from each wind turbine generator to a single Project collection substation. The underground collector cables would be buried to a depth that would not interfere with farming operations. The collection substation would occupy about 7 to 15 acres of land. A 6-mile tie-line would be built from the collector substation to a point adjacent to Western’s existing Fort Thompson–Grand Island transmission line.

Grande Prairie Wind proposes to build about 45 to 60 miles of new roads and upgrade 30 to 50 miles of existing roads for construction and maintenance access to all turbines and Project facilities. Other Project facilities may include two or more permanent meteorological towers, a SODAR unit, and an operations and maintenance building.

Grande Prairie Wind would site wind turbine generators and supporting infrastructure to optimize wind and land resources in the area while minimizing environmental impacts to the extent practicable. The proposed Project would be located on publicly and privately owned lands consisting of a mix of rural cropland and grazing land. The publicly owned land is owned by the State of Nebraska Board of Education Lands and Funds. Grande Prairie Wind would comply with local zoning requirements, including setbacks from residences, roads, and existing transmission and distribution lines. Grande Prairie Wind proposes to begin construction as early as spring 2014. The life of the Project is anticipated to be a minimum of 20 years.

Western’s Federal involvement is related to consideration of the interconnection request, and any resultant impact to the transmission system. However, the EIS will also identify and review the environmental impacts of constructing, operating, maintaining, and decommissioning Grande Prairie Wind’s proposed Project. Western will consult with affected Federal, State, and local agencies to prepare an EIS on the interconnection of the proposed Project. Western is the lead Federal agency for preparing the EIS, as defined at 40 CFR 1501.5. Western invites other Federal, State, local, and tribal agencies with jurisdiction by law or special expertise with respect to environmental issues to be cooperating agencies on the EIS, as defined at 40 CFR 1501.6. Such agencies may also make a request to Western to be a cooperating agency by contacting Mr. Marsh at the address listed above in the ADDRESSES section.

Western will consult with affected tribes to jointly evaluate and address the potential effects on cultural resources, traditional cultural properties, or other resources important to the tribes. These consultations will be conducted in accordance with Executive Order 13175, Consultation and Coordination with Indian Tribal Governments (65 FR 67249), the President’s memorandum of April 29, 1994, Government-to-Government Relations with Native American Tribal Governments (59 FR 22951), DOE-specific guidance on tribal interactions, and applicable natural and cultural resources laws and regulations.

Floodplain or Wetland Involvement

Western’s proposed action may affect floodplains or wetlands. This notice also serves as notice of proposed floodplain or wetland action, in accordance with 10 CFR part 1022. The EIS will include an assessment of impacts to floodplains and wetlands, and if required, a statement of findings following DOE regulations for compliance with floodplain and wetlands environmental review (10 CFR part 1022).

Environmental Issues

This notice is to inform agencies and the public of Western’s intent to prepare an EIS and solicit comments and suggestions for consideration in the EIS. To help the public frame its comments, the following list contains potential environmental issues preliminarily identified for analysis in the EIS:

- Impacts on protected, threatened, endangered, or sensitive species of animals or plants
- Impacts on migratory birds
- Impacts from noxious weeds, invasive, and non-native species
- Impacts on recreation and transportation
- Impacts on land use and farmland
- Impacts on cultural or historic resources and tribal values
- Impacts on human health and safety

On November 16, 2011, DOE’s Acting General Counsel delegated to Western’s Administrator all EIS authorities.
• Impacts on air, soil, and water resources (including air quality and surface water impacts)
• Visual impacts
• Socio-economic impacts and disproportionately high and adverse impacts to minority and low-income populations

This list is not intended to be all-inclusive or to imply any predetermination of impacts. Western invites interested parties to suggest specific issues within these general categories, or other issues not included above, to be considered in the EIS.

Public Participation

Interested parties are invited to participate in the scoping process to help define the scope of the EIS, significant resources, and issues to be analyzed in depth, and to eliminate from detailed study issues that are not pertinent. The EIS scoping process will involve all interested agencies (Federal, State, county, and local), Native American tribes, public interest groups, businesses, affected landowners, and individual members of the public.

Western will hold one public meeting in O’Neill, Nebraska, and will announce the EIS scoping meeting details through local news media, direct mailings, and by posting on the Western Web site at http://www.wapa.gov/usg/Environment/default.htm at least 15 days prior to the meeting. Attendees will be able to speak directly with Western and Grand Prairie Wind representatives at the EIS scoping meetings about the proposed Project. Attendees are welcome to come and go at their convenience throughout the meeting. If inclement weather should prohibit hosting the scoping meeting, an alternate meeting date and location will be publicized locally. The meeting location is handicapped-accessible. Anyone needing special accommodations should contact Mr. Marsh to make arrangements.

The public is encouraged to provide information and comments on issues it believes Western should address in the EIS. Comments may be broad in nature of the information collection and Budget (OMB) for review and approval according to the procedures prescribed in 5 CFR 1320.12. On December 6, 2011 (76 FR 76158), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments. Any additional comments on this ICR should be submitted to EPA and OMB within 30 days of this notice.

EPA has established a public docket for this ICR under Docket ID No EPA–HQ–RCRA–2011–0890, which is available for online viewing at www.regulations.gov, or in person at the Resource Conservation and Recovery Act (RCRA) Docket at the EPA Docket Center (EPA/DC), EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The EPA/DC Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566–1744, and the telephone number for the RCRA Docket is (202) 566–0270.

Use EPA’s electronic docket and comment system at www.regulations.gov to submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the docket that are available electronically. Once in the system, select “docket search,” then key in the docket ID number identified above. Please note that EPA’s policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at www.regulations.gov as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose public disclosure is restricted by statute. For further information about the electronic docket, go to www.regulations.gov.

Title: RCRA Expanded Public Participation (Renewal)

ICR Numbers: EPA ICR No. 1688.07, OMB Control No. 2500–0149.

ICR Status: This ICR is scheduled to expire on April 30, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a
