BOEM’s Atlantic Geological and Geophysical Programmatic EIS. The Council will respond to a proposal to remove Individual Transferable Quotas (ITQs) from Monkfish Amendment 6. During the Listening Session a presentation on the effects of climate on fisheries resources of the Mid-Atlantic region will be presented by Jon Hare of NMFS.

On Wednesday, June 13—Discussion on the background and context of the Visioning project, review the objectives and methods for stakeholder data gathering presentation and discussion of stakeholder data report, and the proposal for the next phase of the visioning and strategic plan. The Mackerel, Squid, and Butterfish Committee will meet as a Committee of the Whole to select Amendment 14 alternatives to recommend to NMFS for implementation. The Surfclam and Ocean Quahog Committee will meet as a Committee of the Whole to review and consider changes to the 2013 quota specifications for surfclams and ocean quahogs and update PSP, data collection, 2012 survey, and stock assessment. There will be a presentation by Tom Warren of NMFS on HMS and subpart A (VACAPES), subpart B (JAX), and subpart C (CHPT). These regulations include mitigation, monitoring, and reporting requirements for the incidental taking of marine mammals by the Navy’s range complex training exercises. For detailed information on these actions, please refer to the June 15, 2009 Federal Register Notices and 50 CFR part 218 subparts A, B, and C. An interim final rule was issued on May 26, 2011 (76 FR 30552) to allow certain flexibilities concerning Navy’s training activities at VACAPES and JAX, and LOAs were issued to the Navy on June 1, 2011 (76 FR 33266; June 8, 2011). These LOAs were subsequently modified on January 6, 2012, to allow takes of marine mammals by using time-delayed firing devices (i.e., detonation is controlled by a time-delaying devices instead of being promptly executed) with improved monitoring and mitigation measures (77 FR 2040; January 13, 2012). On February 12, 2012, NMFS published a final rule (77 FR 4917) that allows for the issuance of multi-year LOAs, as long as the regulations governing such LOAs are valid, and finalized the May 26, 2011 interim rule.

Summary of LOA Request
On January 19, 2012, the Navy submitted an application to take marine mammals incidental to training activities at VACAPES, JAX, and CHPT Range Complexes under the regulations issued on June 15, 2009 (VACAPES: 74 FR 28332; JAX: 74 FR 28349; CHPT: 74 FR 28370) and modified on February 12, 2012 (77 FR 4917). The application requested authorization for two years, to also take marine mammals by harassment, incidental to proposed training activities that involve the use of proposed authorization is provided to the public for review.
exercises and 3 AGM–65 (Maverick missile) exercises; and 6 FIREX with IMPASS. No MINEX and no Small Arms Training was conducted during the reporting period.

At the CHPT Range Complex, the Navy conducted only one FIREX with IMPASS. No other exercise (MINEX and MISSIEX) was conducted.

Monitoring and Annual Monitoring Report

The Navy submitted their 2011 annual marine mammal monitoring reports covering the period from January 2, 2011, through January 1, 2012, and the reports are posted on NMFS Web site: http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications. The Navy conducted the monitoring required by the 2011 LOAs and described in the Monitoring Reports.

For training exercises at the VACAPES Range Complex, the Navy implemented vessel and aerial surveys and deployed passive acoustic monitoring (PAM) devices. The monitoring efforts for 2011 were conducted within the mine neutralization exercise (MINEX) W–50 box in conjunction with a MINEX event, and the Firing Exercise (FIREX) 7C/7D training boxes in junction with a FIREX event.

A vessel survey was conducted on July 14, 2011, in association with a FIREX training event off the coast of Virginia. Four marine mammal observers (MMOs) were stationed aboard a Navy vessel. No marine mammal species were sighted. Vessel surveys were also conducted in association with a MINEX training event off the coast of Virginia Beach, Virginia. Seven MMOs were stationed aboard a Navy vessel. Surveys were conducted on August 7–9, 2011, before, during, and after the training event. During the 3-day monitoring trip, a total of 19 bottlenose dolphin sightings including approximately 91–149 individuals were recorded by the Navy MMOs. No injuries or mortalities of marine mammals were observed during the MINEX training. No marine mammal was sighted between 30 minutes pre-detonation and 30 minutes post-detonation. In addition, aerial surveys were conducted in association with a FIREX training event with IMPASS off the coast of Virginia. Line-transect surveys were conducted on July 13–15, 2011, before, during, and after the training event. Three sightings of marine mammals were made during the 1-day FIREX survey; two sightings of marine mammals were recorded throughout the 1-day during FIREX survey period; and four sightings of marine mammals were recorded during the 1-day post-FIREX survey. No injuries or mortalities of marine mammals were observed during the FIREX training event on July 14. No live explosive rounds were used during the FIREX training. Therefore, no animals were exposed during this VACAPES FIREX with IMPASS training event. Finally, acoustic buoys were deployed on August 7 and 8, 2011, to monitor marine mammal vocalization activity before, during, and after the MINEX event. Six buoys were deployed on both days. Total successful recording time was approximately 38.3 hours, which included 22.75 hours on August 7 and 15.5 hours on August 8. A preliminary analysis of the acoustic recordings was performed on the August 8 data using 1-minute spectrogram window, which showed some odontocete whistles. Based on earlier sightings from that day, the Navy stated that the vocalizations are most likely from bottlenose dolphins.

For training exercises at the JAX Range Complex, aerial surveys were conducted in association with a FIREX training event with IMPASS off the coast of Georgia and Florida. Line-transect surveys were conducted on September 19–21, 2011, before, during, and after the training event. No sightings of marine mammals were recorded during these surveys.

For training exercises at the CHPT Range Complex, aerial surveys were conducted in association with a FIREX with IMPASS training event off the coast of North Carolina. The pre-FIREX line-transect survey on November 29, 2011, was cancelled due to poor weather and low ceiling conditions. No sightings of marine mammals were recorded during the 1.4 hours of total survey flight time (includes on-effort and off-effort intervals) within the survey area covering a 1-day period (November 30, 2011). One large unidentified whale was briefly seen approximately 18 km south of Lookout Bight, North Carolina (approximately 100 km outside of the survey area) on the transit back to the airport.

Adaptive Management

In general, adaptive management allows NMFS to consider new information from different sources to determine (with input from the Navy regarding practicability) if monitoring efforts should be modified if new information suggests that such modifications are appropriate. All of the 5-year rules and LOAs issued to the Navy include an adaptive management component, which includes an annual meeting between NMFS and the Navy.
NMFS and the Navy conducted an adaptive management meeting in October, 2011, which representatives from the Marine Mammal Commission participated in, wherein we reviewed the Navy monitoring results through August 1, 2011, discussed other Navy research and development efforts, and discussed other new information that could potentially inform decisions regarding Navy mitigation and monitoring.

No changes were requested from the Navy for the 2012–2014 LOAs for VACAPES, JAX, and CHPT Range Complexes.

Authorization
Since there are no changes in the Navy’s proposed training activities at the VACAPES, JAX, and CHPT Range Complexes, NMFS’ determination that the Navy’s training activities at these Range Complexes will have no more than a negligible impact on the affected species or stocks of marine mammals in the action area, as described in the original regulations and the interim regulations, is still valid. There is no subsistence use of marine mammals that could potentially be impacted by the Navy’s training activities at the VACAPES, JAX, and CHPT Range Complexes. Further, the level of taking authorized in June 2012 through June 2014 for the Navy’s VACAPES, JAX, and CHPT Range Complexes training activities is consistent with our previous determination that the Navy’s training activities at these Range Complexes will have no more than a negligible impact on the affected species or stocks of marine mammals in the action area, as described in the original regulations and the interim regulations, is still valid. There is no subsistence use of marine mammals that could potentially be impacted by the Navy’s training activities at the VACAPES, JAX, and CHPT Range Complexes. Further, the level of taking authorized in June 2012 through June 2014 for the Navy’s VACAPES, JAX, and CHPT Range Complexes training activities is consistent with our previous determinations that the Navy’s training activities at these Range Complexes will have no more than a negligible impact on the affected species or stocks of marine mammals in the action area, as described in the original regulations and the interim regulations, is still valid.

Navy’s proposed training activities at the VACAPES, JAX, and CHPT Range Complexes.

End of Certification
Accordingly, the following products and service are added to the Procurement List:

**Products**

**Product Name/NSN:** Parts Kit, Soft Top Troop Area Enclosure, Humvee, Tan/2540–01–329–8073

**NPA:** Montgomery County Chapter, NYSARC, Inc., Amsterdam, NY.

**Contracting Activity:** Defense Logistics Agency Land and Maritime, Columbus, OH.

**Primary Contact:**

Patricia Briscoe, Telephone: (703) 603–7740, Fax: (703) 603–0655, or email CMTFEFedReg@AbilityOne.gov.

**SUPPLEMENTARY INFORMATION:**

**Additions**

On March 16, 2012 (77 FR 15736) and March 23, 2012 (77 FR 17035), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the products and service and impact of the additions on the current or most recent contractors, the Committee has determined that the products and service listed below are suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

**Regulatory Flexibility Act Certification**

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products and service to the Government.

2. The action will result in authorizing small entities to furnish the products and service to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O’Day Act (41 U.S.C. 8501–8506) in connection with the products and service proposed for addition to the Procurement List.

**Coverage:**

Service

**Service Type/Locations:** Facilities

4465 Indian Head Highway, Ely Building, Indian Head, MD. 20647.

6910 Cooper Avenue, Fort Meade, MD. 20755.

4465 Indian Head Highway, Ely Building, Indian Head, MD. 20647.

910 Cooper Avenue, Fort Meade, MD. 20755.

The Centers for Habilitation/TCH, Tempe, AZ (Subcontractor).

Contracting Activity: defense information systems agency (DISA), DITCO–FT HUACHUCA PL65, Fort Huachuca, AZ.
