Residential Fuelwood and Post Questionnaire

Forest Service personnel use this questionnaire to collect and evaluate information from residential households and logging contractors in order to monitor the volume, types, species, sources of fuelwood and posts harvested for residential use, as well as the types of burning facilities in the State. The collected information will enable land managers to determine what timber to sell for use as fuelwood or fence posts, how well the local forested land will meet the demand for these timber products, and how to project future demands on these renewable natural resources.

Comment Is Invited

Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the Agency, including whether the information will have practical or scientific utility; (2) the accuracy of the Agency’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission request toward Office of Management and Budget approval.

Dated: June 28, 2012.
Deanna J. Stouder, Associate Deputy Chief, Research and Development.

DEPARTMENT OF AGRICULTURE

Forest Service

Information Collection; Health Screening Questionnaire

AGENCY: Forest Service, USDA.

ACTION: Notice; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Forest Service is seeking comments from all interested individuals and organizations on the extension of a currently approved information collection, Health Screening Questionnaire.

DATES: Comments must be received in writing on or before September 4, 2012 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

ADDRESSES: Comments concerning this notice should be addressed to Washington Office—Fire and Aviation Management, National Interagency Fire Center, 3833 S. Development Ave., Boise, ID 83705, Attention: Larry Sutton.

Comments also may be submitted via facsimile to 208–387–5735 or by email to: lsutton@fs.fed.us.

The public may inspect comments received at the National Safety Office, National Interagency Fire Center, Forest Service, USDA, 3833 Development Avenue, Boise, ID, from 8 a.m. to 4:30 p.m. Monday through Friday (Mountain Standard Time). Visitors are encouraged to call ahead to 208–387–5970 to facilitate entry to the building.

FOR FURTHER INFORMATION CONTACT: Larry Sutton, Forest Service Fire Operations Risk Management Specialist, 208–387–5970. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339. The information collected pertains to an individual’s health status and health history in an effort to determine if any physical conditions exist that might result in injury or death during fitness testing or when fighting a wildfire. If Federal agency officials determine, based on the collected information, that an individual may not be physically able to train for or take a Work Capacity Test, the agency will require the individual to undergo a physical examination by a physician.

Form FS–5100–30, Work Capacity Test: Informed Consent, is signed by those deemed to be in sufficient health conditions required.
to undergo a Work Capacity Test. The Work Capacity Test determines the level of an individual’s aerobic fitness, level of muscular strength, and muscle endurance. The consent form is necessary to ensure the individual taking the test is aware of the various testing levels (arduous, moderate, and light) and the risks involved. The individual indicates the following:

- They have read the information on the form, the brochure “Work Capacity Test” and understand the purpose, instructions, and risks of the test.
- They have read the information, understood, and truthfully answered the HSQ.
- Test to be taken—pack test (arduous), field test (moderate), or walk test (light)

Failure to collect this data could result in injuries or deaths during the “Work Capacity Test” and while working on wildland fires. The information provided by an applicant working on wildland fires. The “Work Capacity Test” and while result in injuries or deaths during the test (light).

**FURTHER INFORMATION CONTACT:**

Additional information related to the proposed project can be obtained from the scoping notice and map can be reviewed/downloaded at www.EldoraEIS.com.

**Proposed Action:** The project area includes approximately 615 acres of National Forest System (NFS) lands and 435 acres of private lands. The Forest Service only maintains jurisdiction over the NFS lands; however, to fulfill its obligations under the National Environmental Policy Act (NEPA) the Forest Service will analyze the entire project area for direct, indirect and cumulative effects. The proposed projects would add approximately 105 acres of traditional terrain and include approximately 80 acres of gladed terrain projects. Much of the traditional terrain construction will require tree removal for the area of the trails, approximating 105 acres of removal, although a more accurate quantity of tree removal will be disclosed in the EIS as all proposed trails may not necessitate complete tree removal. Each project component is discussed below. Additional detail can be viewed at www.EldoraEIS.com.

1. Placer Express Lift and Trails—Install a new six-person chairlift and create approximately 30 acres of traditional terrain and approximately 30 acres of gladed terrain projects. A Forest Plan amendment would be required to adjust the Special Use Permit (SUP) boundary to include approximately 70 acres.
