Notice of Expansion Application

The Occupational Safety and Health Administration (OSHA) is providing notice that TUV Rheinland of North America, Inc. (TUV), applied for expansion of its current recognition as a Nationally Recognized Testing Laboratory (NRTL). OSHA’s current scope of recognition has three elements: (1) The type of products the NRTL may test, with each type specified by its applicable test standard; (2) the recognized site(s) that has/have the technical capability to perform the product testing and certification activities for test standards within the NRTL’s scope; and (3) the supplemental program(s) that the NRTL may use, each of which allows the NRTL to rely on other parties to perform activities necessary for product testing and certification.

The current address of the TUV facility (site) already recognized by OSHA is: TUV Rheinland of North America, Inc., 12 Commerce Road, Newtown, Connecticut 06470.

TUV submitted an application, dated February 24, 2006 (Ex. 1: TUV Application), to expand its recognition to include one additional facility (site) located at 2324 Ridgepoint Drive, Suite E, Austin, Texas 78754, and one additional test standard. In response to OSHA’s requests for clarification, TUV amended its application to provide additional technical details, and then provided further details in a later update (Ex. 2: TUV Amended Application dated 8/22/2007 and 2/10/2009). The NRTL Program staff determined that this standard is an “appropriate test standard” within the meaning of 29 CFR 1910.7(c). In connection with this request, NRTL Program assessment staff performed an on-site review of TUV’s testing facility in August 2010, and recommended expansion of TUV’s recognition to include the one additional facility listed above and the additional test standard.
listed below (Ex. 2). As a result, the Agency preliminarily determined that it should expand TUV’s scope of recognition to include the one additional facility and test standard.

**Standard Requested for Recognition**

TUV seeks recognition for testing and certifying products to the following test standard: ¹ UL 913: Intrinsically Safe Apparatus and Associated Apparatus for Use in Class I, II, and III, Division 1, Hazardous Locations.

OSHAs limits recognition of any NRTL for a particular test standard to equipment or materials (i.e., products) for which OSHA standards require third-party testing and certification before use in the workplace. Consequently, if a test standard also covers any product for which OSHA does not require such testing and certification, an NRTL’s scope of recognition does not include that product.

The American National Standards Institute (ANSI) may approve the test standard listed above as an American National Standard. However, for convenience, OSHA may use the designation of the standards-developing organization for the standard instead of the ANSI designation. Under the NRTL Program’s policy (see OSHA Instruction CPL 1–0.3, Appendix C, paragraph XIV),² any NRTL recognized for a particular test standard may use either the proprietary version of the test standard or the ANSI version of that standard. Contact ANSI to determine whether a test standard is currently ANSI-approved.

**Preliminary Finding on the Application**

TUV submitted an acceptable application for recognition as an NRTL. OSHA’s review of the application file, and the results of the on-site review, indicate that TUV can meet the requirements prescribed by 29 CFR 1910.7 for recognition to use the test standard and facility listed above. This preliminary finding does not constitute an interim or temporary approval of the application. TUV corrected the discrepancies noted by OSHA during the on-site review, and the on-site review report describes these corrections (Ex. 3: TUV On-site Report).

OSHA welcomes public comment as to whether TUV meets the requirements of 29 CFR 1910.7 for expansion of their recognition as an NRTL. Comments should consist of pertinent written documents and exhibits. Commenters needing more time to comment must submit a request in writing, stating the reasons for the request. OSHA must receive the written request for an extension by the due date for comments. OSHA will limit any extension to 30 days unless the requester justifies a longer period. OSHA may deny a request for an extension if it is not adequately justified. To obtain or review copies of the publicly available information in TUV’s application and other pertinent documents (including exhibits), as well as all submitted comments, contact the Docket Office, Room N–2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address; these materials also are available online at http://www.regulations.gov under Docket No. OSHA—2007–0042.

The NRTL Program staff will review all comments to the docket submitted in a timely manner, and, after addressing the issues raised by these comments, will recommend whether to grant TUV’s application for expansion. The Assistant Secretary will make the final decision on granting the application and, in making this decision, may undertake other proceedings prescribed in Appendix A to 29 CFR 1910.7. OSHA will publish a public notice of this final decision in the Federal Register.

**Authority and Signature**
