the main aisle? How does the slope of the ramp, the location of the fare collection device, and the configuration of the handrail affect the availability of this space?

4. If level space were required at the top of the ramp to permit access to fare collection devices and to facilitate turning into main aisles, how would such a requirement affect bus designs, manufacturers, transit operators, and transit users, including those with disabilities?

Bus and ramp manufacturers, transit operators, researchers, disability organizations, and interested individuals are invited to participate in the public information meetings. Transcripts of the meetings will be placed in the docket and will be available on the Access Board’s Web site at http://www.access-board.gov/transit/.

The information meetings will be accessible to persons with disabilities. An assistive listening system, computer assisted real-time transcription (CART), and sign language interpreters will be provided. Persons attending the information meetings are requested to refrain from using perfume, cologne, and other fragrances for the comfort of other participants (see www.access-board.gov/about/policies/fragrance.htm for more information).

The Access Board is reopening the comment period to allow interested persons to respond to the recent correspondence from Lane Transit District, Santa Clara Valley Transportation Authority, and Douglas Cross Transportation Consulting and information presented at the public information meetings, or to submit other comments on the rulemaking.

David M. Capozzi, Executive Director.
