Southwestern Power Administration

Sam Rayburn Dam Project Power Rate Repayment Studies

AGENCY: Southwestern Power Administration, DOE.

ACTION: Notice of proposed extension.

SUMMARY: The current Sam Rayburn Dam Project rate was approved by the Federal Energy Regulatory Commission (FERC) on March 30, 2009, Docket No. EF09–4021–000. These rates became effective for the period January 1, 2009, through September 30, 2012. The Administrator, Southwestern Power Administration (Southwestern), has prepared Current and Revised 2012 Power Repayment Studies which show the need for an increase in annual revenues of $193,896 (4.9 percent) to meet cost recovery criteria. In accordance with Southwestern’s isolated project rate adjustment threshold, signed September 8, 2003, the Administrator, Southwestern, may determine, on a case by case basis, that for a revenue decrease or increase in the magnitude of five percent or less, deferral of a formal rate filing is in the best interest of the Government. The Deputy Secretary of Energy has the authority to extend rates, previously confirmed and approved by FERC, on an interim basis, pursuant to title 10, part 903, subpart A of the Code of Federal Regulations (10 CFR part 903), sections 903.22(h) and 903.23(a)(3). In accordance with these authorities, Southwestern proposes to defer the rate adjustment and proposes that the current rates be extended for a one-year period effective through September 30, 2013.

DATES: The comment period for the proposed extension ends on September 20, 2012.

FOR FURTHER INFORMATION CONTACT: Mr. James K. McDonald, Assistant Administrator, Southwestern Power Administration, U.S. Department of Energy, One West Third Street, Tulsa, Oklahoma 74103, (918) 595–6690, jim.mcdonald@swpa.gov.

Southwestern markets power from 24 multi-purpose reservoir projects with hydroelectric power facilities constructed and operated by the U.S. Army Corps of Engineers (Corps). These projects are located in the states of Arkansas, Missouri, Oklahoma, and Texas. Southwestern’s marketing area includes these States plus Kansas and Louisiana. The costs associated with the hydropower facilities of 22 of the 24 projects are repaid via revenues received under the Integrated System rates, as are those of Southwestern’s transmission facilities, which consist of 1,380 miles of high-voltage transmission lines, 25 substations, and 46 microwave and VHF radio sites.
