

trial would result in the incidental take of small numbers of marine mammals, by Level B harassment only, and that the total taking would have a negligible impact on the affected species or stocks.

#### **Impact on Availability of Affected Species or Stock for Taking for Subsistence Uses**

There are no relevant subsistence uses of marine mammals implicated by this action.

#### **Endangered Species Act (ESA)**

The only marine mammal species listed as endangered under the ESA with confirmed or possible occurrence in the study area is the eastern DPS of Steller sea lion. On April 18, 2012 (77 FR 23209), NMFS published a proposed rule to delist the eastern DPS. A public comment period was open through June 18, 2012. No final determination has been made. Under section 7 of the ESA, the USFWS has begun consultation with NMFS on the proposed bird mitigation research trial. NMFS also initiated consultation internally on the issuance of an IHA under section 101(a)(5)(D) of the MMPA for this activity. Consultation will be concluded prior to

a determination on the issuance of an IHA.

#### **National Environmental Policy Act (NEPA)**

NMFS is currently conducting an analysis, pursuant to NEPA, to determine whether or not this proposed activity may have a significant effect on the human environment. This analysis will be completed prior to the issuance or denial of this proposed IHA.

#### **Proposed Authorization**

As a result of these preliminary determinations, NMFS proposes to authorize the take of marine mammals incidental to the bird mitigation research trial, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

The Government of Iraq has requested a proposed sale of commercially available Federal Aviation Administration Air Traffic Control and Landing System/Navigational Aids. The system will include an ASR-11 Radar, Autotrac II simulator, Instrument Landing System, and Airfield Lighting System, spare and repair parts, support equipment, personnel training and training equipment, publications and technical documentation, site survey, installation, U.S. Government and contractor engineering and logistics support services, and other related elements of logistics and program support. This equipment aids Iraq's continuing reconstruction effort that directly improves Iraq's ability to control its own airspace.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor is unknown and will be selected through competitive process. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Iraq.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
