

use in the usual and customary ordinary course of their business. It is expected that the required disclosure will be performed using automated data systems that FCMs maintain and use in the usual and customary ordinary course of their business but that certain additional functionality will need to be added to these systems to perform the required disclosure. Because of the novel character of proposed section 22.11, it is not possible to make a precise estimate of the paperwork burden. The necessary modifications to, and maintenance of, systems may require a range of between 20 and 40 hours of work annually.

The recordkeeping required by section 22.12 involves information that Collecting FCMs and DCOs will receive pursuant to section 22.11 or that they generate and use in the usual and customary ordinary course of their business. It is expected that the required recordkeeping will be performed using automated data systems that Collecting FCMs and DCOs maintain and use in the usual and customary ordinary course of their business but that certain additional functionality will need to be added to these systems to perform the required disclosure. Because of the novel character of section 22.12, it is not possible to make a precise estimate of the paperwork burden. The necessary modifications to, and maintenance of, systems may require a range of between 20 and 40 hours of work annually. It is expected that the required recordkeeping will be performed by approximately 100 entities. The total annual burden for section 22.11 therefore is estimated at 2,000 to 4,000 hours.

Section 22.16 would apply to the same estimated 100 entities as sections 22.2(g), 22.5(a), and 22.11. The required disclosure would have to be made once each time a swaps customer begins to be cleared through a particular DCO or collecting FCM and each time a DCO or collecting FCM through which a customer's swaps are cleared changes it polices on the matters covered by the disclosure. It is expected that each disclosure would require about 0.2 hours of staff time by staff. It is uncertain what average number of swaps customers FCMs will have, and what average number of disclosures will be required for each customer annually. Assuming an average of 500 customers per FCM and two disclosures per customer per year, the estimated total annual burden would be 200 hours.

There are estimated to be no capital costs or operating and maintenance costs associated with this collection.

Dated September 26, 2012.

Sauntia S. Warfield,

Assistant Secretary of the Commission.
