UNFUNDED MANDATES

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year. This proposed rule would have no such effect on State, local, and tribal governments, or on the private sector.

40 CFR Part 52

Approval and Promulgation of Air Quality Implementation Plans; New Hampshire; Reasonably Available Control Technology for the 1997 8-Hour Ozone Standard

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA is proposing to approve State Implementation Plan revisions submitted by the State of New Hampshire. These SIP revisions consist of a demonstration that New Hampshire meets the requirements of reasonably available control technology for oxides of nitrogen and volatile organic compounds set forth by the Clean Air Act with respect to the 1997 8-hour ozone standard, revisions to existing rules controlling these pollutants, and source-specific orders for fifteen individual sources. This action is being taken in accordance with the Clean Air Act.

SUPPLEMENTARY INFORMATION: In the Final Rules Section of this Federal Register, EPA is approving the State’s SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this action rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.

40 CFR Part 52

Approval and Promulgation of Implementation Plans; Arizona; Motor Vehicle Inspection and Maintenance Programs

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve three revisions to the Arizona State Implementation Plan submitted by the Arizona Department of Environmental Quality. Two of these revisions relate to an amendment to Arizona’s Basic and Enhanced Vehicle Emissions Inspection Programs that would exempt motorcycles in the Phoenix metropolitan area from emissions testing requirements. The third revision would expand the geographic area in which various air quality control measures, including the vehicle emissions inspection program but also including other control measures, apply in the Phoenix metropolitan area. EPA is proposing approval of these SIP revisions because we have found that they meet all applicable requirements and would not interfere with reasonable further progress or attainment of any of the national ambient air quality standards. EPA is proposing this action under the Clean Air Act obligation to take action on State submittals of revisions to state implementation plans.

DATES: Written comments must be received on or before December 5, 2012.

I. Introduction and Background

In May 1995, EPA approved Arizona’s Basic and Enhanced Vehicle Emissions Inspection/Maintenance (VEI) Programs as a revision to the Arizona State Implementation Plan (SIP) under the Clean Air Act, as amended in 1990 (CAA or “Act”) and EPA’s motor vehicle inspection and maintenance rule (“EPA’s I/M rule” or “federal I/M rule”) as amended. See 60 FR 22518 (May 8, 1995). A “basic” I/M program was required in the Phoenix metropolitan area (referred to as “Area A”) due to the area’s designation as a “moderate” nonattainment area for the carbon monoxide (CO) and the 1-hour ozone national ambient air quality standards (NAAQS or “standard”). The VEI program was designed to reduce emissions of CO, volatile organic compounds (VOC) and oxides of nitrogen (NOX). At that time, although

1. The Phoenix metropolitan area is also a nonattainment area for respirable particulate matter (PM10); however, the VEI program plays a very minor role in the control strategy for this pollutant. There is no CAA requirement for I/M programs in PM10 nonattainment areas and no PM10 reduction credited from EPA’s emission models, MOBILE 6.2 or MOVES.

2. VOC and NOX are precursors to ozone formation in the atmosphere under the influence of sunlight and meteorology.
