AN) people to the highest possible level by providing comprehensive health care and preventive health services. To support the IHS mission and to provide the product/service to IHS, Tribal, and Urban (I/T/U) programs, the Office of Preventive and Clinical Services’ program divisions (i.e., Behavioral Health, Health Promotion/Disease Prevention, Nursing, and Dental) have developed a centralized program database of best practices, promising Practices and local efforts and resources. This database was previously referred as OSCAR, but the name will be changed to BPPPLE to reflect the revised name of the form. The purpose of this collection is to develop a database of BPPPLE and resources to be published on the IHS.gov Web site which will be a resource for program evaluation and for modeling examples of various health care projects occurring in AI/AN communities. All information submitted is on a voluntary basis; no legal requirement exists for collection of this information. The information collected will enable the Indian Health systems to: (a) identify evidence based approaches to preventive programs among the I/T/U when no system is currently in place, and (b) allow the program managers to review BPPPLE occurring among the I/T/U when considering program planning for their communities.
