Nutrition Assistance Program (SNAP). Historically, elderly individuals who are eligible for SNAP have the lowest participation rate among all demographic groups. The pilot projects will attempt to increase participation in SNAP among beneficiaries of Medicare’s Extra Help by using data from Extra Help applications that are forwarded to State Medicaid offices. Because Extra Help and SNAP eligibility requirements do not directly correspond, these pilot projects will evaluate methods of using these Medicaid data to improve access to SNAP among Extra Help beneficiaries.

Need and Use of the Information: FNS will collect information to understand how the pilot projects operated, who they served, and the extent to which they generated any measureable effects on participation cost, and SNAP benefits. The study will provide federal and state policymakers, as well as program administrators at these levels, with information on whether and to what extent the pilot projects have reduced the barriers to SNAP participation experienced by Extra Help applicants.
