

such as: how far offshore turbines should be placed to minimize the visual impact from the coastline, specific locations or areas to avoid development altogether, or any other strategies to help reduce the visual footprint (for example, the color of the turbines [towers, nacelle, blades], the arrangement or pattern of the turbine array, the dimension of the turbines (e.g., height and blade span), visual navigational lighting requirements, the maximum number of turbines that should be allowed in a specific area, etc.);

6. The type of transmission system (e.g., AC, HVDC, etc.) a prospective developer would likely utilize for a wind facility offshore North Carolina. If AC, please state and explain the maximum distance you would be willing to run an AC transmission system to deliver power from an offshore wind facility to an onshore substation;

7. General interest by a developer(s) in constructing a backbone transmission system that would transport electricity generated by wind projects located offshore North Carolina, including a general description of the transmission's proposed path and potential interconnection points;

8. Available and pertinent data and information concerning renewable energy resources and environmental conditions in the area identified in this notice. Where applicable, spatial information should be submitted in a format compatible with ArcGIS 10.0 in a geographic coordinate system (NAD 83);

9. Habitats that may require special attention during siting and construction; and

10. Other relevant socioeconomic, biological, and environmental information.

Protection of Privileged or Confidential Information

Freedom of Information Act

BOEM will protect privileged or confidential information that you submit, as required by the Freedom of Information Act (FOIA). Exemption 4 of FOIA applies to trade secrets and

commercial or financial information that you submit that is privileged or confidential. If you wish to protect the confidentiality of such information, clearly mark it and request that BOEM treat it as confidential. BOEM will not disclose such information, subject to the requirements of FOIA. Please label privileged or confidential information "Contains Confidential Information" and consider submitting such information as a separate attachment.

However, BOEM will not treat as confidential any aggregate summaries of such information or comments not containing such information. Additionally, BOEM will not treat as confidential (1) the legal title of the nominating entity (for example, the name of your company), or (2) the list of whole or partial blocks that you are nominating. Information that is not labeled as privileged or confidential will be regarded by BOEM as suitable for public release.

Section 304 of the National Historic Preservation Act (16 U.S.C. 470w-3(a))

BOEM is required, after consultation with the Secretary, to withhold the location, character, or ownership of historic resources if it determines that disclosure may, among other things, risk harm to the historic resources or impede the use of a traditional religious site by practitioners. Tribal entities should designate information that falls under Section 304 of NHPA as confidential.

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

Environmental Documents Prepared for Oil, Gas, and Mineral Operations by the Gulf of Mexico Outer Continental Shelf (OCS) Region

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.

ACTION: Notice of the availability of environmental documents prepared for OCS mineral proposals by the Gulf of Mexico OCS region.

SUMMARY: BOEM, in accordance with Federal regulations that implement the National Environmental Policy Act (NEPA), announces the availability of NEPA-related Site-Specific Environmental Assessments (SEAs) and Findings of No Significant Impact (FONSIs). These documents were prepared during the period July 1, 2012, through September 30, 2012, for oil, gas, and mineral-related activities that were proposed in the Gulf of Mexico, and are more specifically described in the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Bureau of Ocean Energy Management, Gulf of Mexico OCS Region, Attention: Public Information Office (GM 250E), 1201 Elmwood Park Boulevard, Room 250, New Orleans, Louisiana 70123-2394, or by calling 1-800-200-GULF.

SUPPLEMENTARY INFORMATION: BOEM prepares SEAs and FONSIs for certain proposals that relate to exploration, development, production, and transport of oil, gas, and mineral resources on the Federal OCS. These SEAs examine the potential environmental effects of proposed activities and present BOEM conclusions regarding the significance of those effects. The SEAs are used as a basis for determining whether or not approval of a proposal constitutes a major Federal action that significantly affects the quality of the human environment in accordance with NEPA Section 102(2)(C). A FONSI is prepared in those instances when BOEM finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the SEA.

This notice constitutes the public notice of availability of environmental documents required under the NEPA regulations.

[Docket No. BOEM-2012-0090]

Commercial Wind Leasing and Site Assessment Activities on the Atlantic Outer Continental Shelf (OCS) Offshore North Carolina

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.

ACTION: Notice of Intent To Prepare an Environmental Assessment.

SUMMARY: BOEM is publishing this Notice of Intent To Prepare an Environmental Assessment (EA) for the purpose of involving Federal agencies, states, tribes, local governments, offshore wind energy developers, and the public in the Department of the Interior's (DOI) "Smart from the Start" wind energy initiative offshore North Carolina. The "Smart from the Start" wind energy initiative is designed to identify areas that appear to be suitable for wind energy leasing on the OCS, known as Wind Energy Areas (WEAs) and to obtain public and expert input that will inform DOI's decisionmaking with regard to issuing leases and approving site assessment activities in these areas, in accordance with applicable DOI regulations and the Council on Environmental Quality (CEQ) regulations implementing the provisions of the National Environmental Policy Act (NEPA) of 1969 as amended (42 U.S.C. 4321 *et seq.*).

The "Smart from the Start" initiative involves coordinated environmental studies, large-scale planning processes, and expedited review procedures within these areas to achieve an efficient and responsible renewable energy leasing process. More information on the "Smart from the Start" initiative can be found at: <http://boem.gov/Renewable-Energy-Program/Smart-from-the-Start/Index.aspx>.

In consultation with other Federal agencies and the BOEM North Carolina Intergovernmental Renewable Energy Task Force, BOEM has identified three areas under consideration for potential future wind energy leasing offshore North Carolina (Call Areas). These Call Areas are identified in the document entitled, *Commercial Leasing for Wind Power on the Outer Continental Shelf Offshore North Carolina-Call for Information and Nominations (Call)*, which is being published concurrently with this Notice. The publication of a Call is the first public step in BOEM's offshore wind planning process for North Carolina, and additional opportunities for public involvement are required before any commercial wind leases would be issued. A commercial lease gives the lessee the exclusive right to subsequently seek BOEM approval for the development of the leasehold. The lease does not grant the lessee the right to construct any facilities; rather, the lease grants the lessee the right to use the leased area to develop its plans, which BOEM must approve before the lessee can move on to the next stage of the process. See 30 CFR 585.600 and 585.601.

BOEM intends to prepare an EA, which is the subject of this Notice, that will consider the environmental consequences associated with the possible future issuance of commercial wind leases and approving site assessment activities on those leases (within all or some of these Call Areas). BOEM is seeking public input regarding the identification of the alternatives to be considered in the EA, as well as the environmental and/or socioeconomic issues to be analyzed.

Furthermore, section 106 of the National Historic Preservation Act (16 U.S.C. 470f) and its implementing regulations at 36 CFR 800 require Federal agencies to consider the effects of their actions on historic properties, and afford the Advisory Council on Historic Properties an opportunity to comment (36 CFR 800.1). Therefore, BOEM will conduct Section 106 review for the issuance of leases and approval of site assessment activities within some or all of the Call Areas, in coordination with its environmental review. As part of this Section 106 review, BOEM will initiate consultation with state historic preservation officer, tribal officials, and others. With the publication of this Notice, BOEM is reaching out to the general public for comments regarding the identification of historic properties or potential effects to historic properties from leasing and site assessment activities in the Call Areas. Submitted information will allow BOEM to

consider the views of the public and document historic preservation concerns early in the Section 106 process.

Authority: This Notice of Intent to prepare an EA is published pursuant to 43 CFR 46.305.

SUPPLEMENTARY INFORMATION:

1. The OCS Wind Energy Planning, Leasing and Development Process

There are four key phases in the wind energy planning, leasing and development process on the OCS: (1) Planning and siting; (2) lease issuance; (3) approval of a site assessment plan (SAP); and (4) approval of a construction and operations plan (COP). Publication of the Call and this NOI are steps in the first phase of this process. The second phase, issuance of a commercial renewable energy lease, gives the lessee an exclusive right to submit plans, the approval of which is necessary for a lessee to advance to the next stage of the renewable energy development process. The third phase is the applicant's submission and BOEM's subsequent review and approval of a SAP. Approval of a SAP allows the lessee to construct and install equipment on the leasehold, such as a meteorological tower and/or buoys, to perform site assessment functions. See 30 CFR 585.600-585.601; 585.605-585.618. Site characterization activities are necessary to support a lessee's proposed site assessment activities (*e.g.*, geological and geophysical surveys and core samples) and the lessee must submit the results of such surveys with the supporting data in its SAP. See 30 CFR 585.610. The submission of a SAP is separate from the submission of a COP. After the lessee has collected the additional site characterization and assessment data necessary for a COP, the lessee may submit its COP. The COP would be subject to additional project specific environmental review. The approval of the COP would authorize the construction and operation of a renewable energy generation facility on the lease. See 30 CFR 585.620-585.629.

2. Proposed Action and Scope of Analysis

The proposed action that will be the subject of the EA is the issuance of renewable energy leases within all or some of the Call Areas described in this Notice, and the approval of site
