The Proposal

The FAA is proposing an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to modify RNAV route T-266 in Alaska. T-266 is currently defined by the Coghland Island, AK, NDB; the Fredericks Point, AK, NDB; and the Annette Island, AK, VOR/DME. The Annette Island VOR/DME would remain as one end point of the route, but the two NDBs would be removed from the route description and replaced by the addition of eight RNAV waypoints (WP). The existing RADKY, AK, fix (near the Coghland Island NDB) would be relocated to the southeast of its current position and would serve as the other endpoint of the route. These changes would enhance safety by providing lower IFR minimum en route altitudes (MEA) on T-266, which would allow aircraft to fly at lower altitudes when inflight icing conditions are encountered. Additionally, the changes support the expanded use of RNAV within the NAS by reducing the reliance on ground-based NDBs for navigation guidance.

RNAV routes are published in paragraph 6011 of FAA Order 7400.9W dated August 8, 2012, and effective September 15, 2012, which is incorporated by reference in 14 CFR 71.1. The RNAV routes listed in this document would be subsequently published in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when

promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as

it modifies the route structure in Alaska as required to preserve the safe and efficient flow of air traffic.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures," prior to any FAA final regulatory action.

Proposed Establishment of Area Navigation (RNAV) Routes; OR

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to establish two new low-altitude RNAV routes in the state of Oregon, designated T-302 and T-304. The routes would replace segments of an existing VHF Omnidirectional Range (VOR) Federal airway that will be removed due to the

planned decommissioning of the Portland, OR, VOR/DME in 2013. This action would advance the implementation of RNAV and provide continued en route navigation guidance in the affected airspace.
