SUPPLEMENTARY INFORMATION: In the “Rules and Regulations” section of this Federal Register notice, EPA is authorizing the changes by a direct final rule. EPA did not make a proposal prior to the direct final rule because we believe this action is not controversial and do not expect comments that oppose it. We have explained the reasons for this authorization in the preamble to the direct final rule. Unless we receive adverse written comments which oppose this authorization during the comment period, the direct final rule will become effective on the date it establishes, and we will not take further action on this proposal. If we receive comments that oppose this action, we will either withdraw the direct final rule or the portion of the direct final rule that is the subject of the comments. Only the remaining portion of the rule will take effect. We will then respond to those public comments opposing this authorization in a later final authorization notice based on this proposal. This final authorization notice may or may not include changes based on comments received during the public notice comment period. You may not have another opportunity for comment. If you want to comment on this action, you should do so at this time.
