

inapplicability of Section 1605 in the context of such systems. (See also **Federal Register** Volume 75, Number 119 (Tuesday, June 22, 2010), 35447–35449.)

Perkins+Will concluded that no VRF systems of the required scale were manufactured in the U.S.

In the absence of a domestic supplier that could provide a VRF system that meets or exceeds the design requirements of the SAFL renovation, the University of Minnesota requested that NSF issue a Section 1605 exemption determination with respect to the purchase of a foreign-supplied VRF that will meet the specific design and technical requirements that are necessary for the renovation of SAFL.

NSF's Division of Grants and Agreements (DGA) and other NSF program staff reviewed the University of Minnesota exemption request submittal and determined that sufficient technical information was provided in order for NSF to evaluate the exemption request and to conclude that an exemption is needed and should be granted.

III. Exemption

On March 15, 2013, based on the finding that no domestically produced variable refrigerant flow system meets all of the technical specifications and requirements of the St. Anthony Fall Laboratory renovation project and pursuant to section 1605(b), the NSF Chief Financial Officer, in accordance with a delegation order from the Director of the agency signed on May 27, 2010, granted a limited project exemption of the Recovery Act's Buy American requirements with respect to the procurement of the variable refrigerant flow system.

[Docket No. 04008502; NRC–2009–0036]

Notice of Issuance of Materials License Renewal, Operating License SUA–1341, Uranium One USA, Inc., Willow Creek Uranium In Situ Recovery Project

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is providing notice of issuance of a license renewal for Materials License No. SUA–1341 to Uranium One USA, Inc. (Uranium One) for its Willow Creek Uranium *In Situ* Recovery (ISR) Project in Johnson and Campbell Counties, Wyoming.

ADDRESSES: Please refer to Docket ID NRC–2009–0036 when contacting the NRC about the availability of information regarding this document. You may access information related to this document, which the NRC possesses and are publicly-available, using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC–2009–0036. Address questions about NRC dockets to Carol Gallagher; telephone: 301–492–3668; email: Carol.Gallagher@nrc.gov.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may access publicly-available documents online in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. U.S. Nuclear Regulatory Commission, Washington, DC 20555; telephone: 301-415-7777; email: ron.linton@nrc.gov.

I. Further Information

The license renewal authorizes Uranium One to continue operations of its project as proposed in its license renewal application, as amended, and to continue to possess uranium source and byproduct material at the Willow Creek ISR Project. Uranium One will be required to operate under the conditions listed in Materials License SUA-1341.

The licensee's request for renewal of its license was previously noticed in the **Federal Register** on February 9, 2009 (74 FR 6436), with a notice of an opportunity to request a hearing. The NRC received two requests for a hearing on the license application. After an initial hearing, the Atomic Safety and Licensing Board found that the applicants did not have standing to intervene. In accordance with part 51 of Title 10 of the *Code of Federal Regulations* (10 CFR), an environmental assessment of this action was completed

and a finding of no significant impact was published in the **Federal Register** on July 15, 2011 (76 FR 41528); and on January 25, 2013, a supplemental environmental assessment and finding of no significant impact relating to this action was also published in the **Federal Register** (78 FR 5514).

The NRC has found that the renewal application for the source materials license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the NRC's rules and regulations as set forth in 10 CFR Chapter 1. As required by the Act and 10 CFR 40.32(a)-(e), the NRC staff has found that: (1) The renewal application is for a purpose authorized by the Act; (2) Uranium One is qualified by reason of training and experience to use source material for the purpose it requested; (3) Uranium One's proposed equipment and procedures for use at its Willow Creek Project are adequate to protect public health and minimize danger to life or property; (4) renewal and issuance of Materials License SUA-

1341 to Uranium One will not be inimical to the common defense and security or to the health and safety of the public; and (5) after weighing the environmental, economic, technical and other benefits against environmental costs, that the action called for is the renewal of Materials License SUA-1341. The NRC prepared a safety evaluation report (SER) that documents the information that was reviewed and the NRC's conclusions.

II. Availability of Documents

In accordance with 10 CFR 2.390 of the NRC's "Agency Rules of Practice and Procedure," the details with respect to this action, including the SER and accompanying documentation and license, are available electronically in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>.
