matching grants on a competitive basis to enable States to explore new market opportunities for U.S. food and agricultural products and to encourage research and innovation aimed at improving the efficiency and performance of the U.S. marketing system. Eligible applicants include State departments of agriculture, State agricultural experiment stations, and other appropriate State Agencies. Other organizations interested in participating in this program should contact their State Department of Agriculture’s Marketing Division. State agencies specifically named under the authorizing legislation should assume the lead role in FSMIP projects, and use cooperative or contractual agreements with other agencies, universities, institutions, and producer, industry or community-based organizations as appropriate. Multi-State projects are encouraged. In such projects, one State agency assumes the coordinating role, using appropriate cooperative arrangements with the other State agencies and entities involved in the project.

Proposals must be accompanied by completed Standard Forms (SF) 424 and 424B. AMS will not approve the use of FSMIP funds for advertising or, with limited exceptions, for the purchase of equipment. Detailed program guidelines may be obtained from the contact listed above, and are available at the FSMIP Web site: http://www.ams.usda.gov/FSMIP.

Background

FSMIP funds a wide range of applied research projects that address barriers, challenges, and opportunities in marketing, transportation, and distribution of U.S. food and agricultural products domestically and internationally.

Eligible agricultural categories include livestock, livestock products, food and feed crops, fish and shellfish, horticulture, viticulture, apiary, and forest products and processed or manufactured products derived from such commodities. Reflecting the growing diversity of U.S. agriculture, in recent years, FSMIP accepts proposals dealing with nutraceuticals, bioenergy, compost, agroforestry products, and products made from agricultural residue.

Proposals may deal with barriers, challenges, or opportunities manifesting at any stage of the marketing chain including direct, wholesale, and retail. Proposals may involve small, medium, or large scale agricultural entities but should potentially benefit multiple producers or agribusinesses. Proprietary proposals that benefit one business or individual will not be considered.

Proposals that address issues of importance at the State, Multi-State or national level are appropriate for FSMIP. FSMIP also seeks unique proposals on a smaller scale that may serve as pilot projects or case studies useful as a model for other States. Of particular interest are proposals that reflect a collaborative approach among the States, academia, the farm sector and other appropriate entities and stakeholders. FSMIP’s enabling legislation authorizes projects to:

- Determine the best methods for processing, preparing for market, packing, handling, transporting, storing, distributing, and marketing agricultural products.
- Determine the costs of marketing agricultural products in their various forms and through various channels.
- Assist in the development of more efficient marketing methods, practices, and facilities to bring about more efficient and orderly marketing, and reduce the price spread between the producer and the consumer.
- Develop and improve standards of quality, condition, quantity, grade, and packaging in order to encourage uniformity and consistency in commercial practices.
- Eliminate artificial barriers to the free movement of agricultural products in commercial channels.
- Foster new/expanding domestic/foreign markets and new/expanding uses of agricultural products.
- Collect and disseminate marketing information to anticipate and meet consumer requirements, maintain farm income, and balance production and utilization.

All proposals which fall within the FSMIP guidelines will be considered. FSMIP encourages States to submit proposals that address the following objectives:

- Creating wealth in rural communities through the development of local and regional food systems and value-added agriculture.
- Developing direct marketing opportunities for producers, or producer groups.
- Assessing challenges and developing methods or practices that could assist local and regional producers in marketing agricultural products that meet the mandates of the Food and Drug Administration’s new Food Safety Modernization Act.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995, the FSMIP information collection requirements were previously approved by the Office of Management and Budget (OMB) and were assigned OMB control number 0581–0240.

AMS is committed to compliance with the Government Paperwork Elimination Act (GPEA), which requires Government agencies in general to provide the public with the option of submitting information or transacting business electronically to the maximum extent possible.

How To Submit Proposals and Applications

Applications must be submitted electronically through the Federal grants Web site, http://www.grants.gov. Hard copy and emailed applications will not be accepted. Applicants are strongly urged to familiarize themselves with the Federal grants Web site well before the application deadline and to begin the application process before the deadline.

FSMIP is listed in the “Catalog of Federal Domestic Assistance” under number 10.156 and subject agencies must adhere to Title VI of the Civil Rights Act of 1964, which bars discrimination in all Federally assisted programs.

David R. Shipman,
Administrator, Agricultural Marketing Service.

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2013–0015]

Notice of Request for Extension of Approval of an Information Collection; Importation of Seed and Screenings From Canada Into the United States

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service’s intention to request an extension of approval of an information collection associated with the regulations for the importation of seed and screenings from Canada into the United States.
The regulations in 7 CFR part 361, "Importation of Seed and Screenings From Canada into the United States," allow U.S. companies that import seed and screenings to enter into compliance agreements with APHIS. These agreements eliminate the need for sampling shipments of Canadian-origin seed at the U.S.-Canadian border and allow certain seed importers to clean the seed without direct supervision of an APHIS inspector. The program provides a safe and expedited process for the importation of seed and screenings into the United States without posing a plant pest or noxious weed risk.

The seed analysis program involves the use of information collection activities, including a declaration for importation, container labeling, notification of seed location, a seed return request, seed identity maintenance, documentation for U.S. origin exported seed returned to the United States, written appeal for cancellation of a compliance agreement and request for a hearing, and associated recordkeeping. In addition, two forms that are required are the Seed Analysis Certificate (Federal Seed Act, 7 U.S.C. 1551 et seq.) and the USDA, APHIS, PPQ Compliance Agreement.

We are seeking comments on the Paperwork Reduction Act of 1995, the Federal Seed Act, and the regulations implementing the provisions of title III of the FSA, “Foreign Commerce,” that are required are the Seed Analysis Certificate (Federal Seed Act, 7 U.S.C. 1551 et seq.) and the USDA, APHIS, PPQ Compliance Agreement.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

1. Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
2. Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

In accordance with the Paperwork Reduction Act of 1995, the Forest Service is seeking comments from all interested individuals and organizations on the extension of a currently approved information collection, Disposal of Mineral Materials.
