The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
(3) Enhance the quality, utility, and clarity of the information to be collected; and
(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1,996 hours per response.

Respondents: Dairy owners and operators.

Estimated annual number of respondents: 7,440.
Estimated annual number of responses per respondent: 1.
Estimated annual number of responses: 7,440.
Estimated total annual burden on respondents: 7,482 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

### SUPPLEMENTARY INFORMATION:

**Title:** National Animal Health Monitoring System; Dairy 2014 Study

**OMB Number:** 0579–0205

**Type of Request:** Reinstatement of an information collection.

**Abstract:** Under the Animal Health Protection Act (7 U.S.C. 8301 et seq.), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is authorized, among other things, to protect the health of U.S. livestock and poultry populations by preventing the introduction and interstate spread of serious diseases and pests of livestock and for eradicating such diseases from the United States when feasible. In connection with this mission, APHIS operates the National Animal Health Monitoring System (NAHMS), which collects nationally representative, statistically valid, and scientifically sound data on the prevalence and economic importance of livestock diseases and associated risk factors.

NAHMS' national studies are a collaborative industry and Government initiative to help determine the most effective means of preventing and controlling diseases of livestock. APHIS is the only agency responsible for collecting national data on livestock health. Participation in any NAHMS study is voluntary, and all data are confidential.

APHIS plans to conduct a Dairy 2014 Study as part of an ongoing series of NAHMS studies on the U.S. dairy population. This will be the fifth dairy study, and the purpose of this study is to collect information, through two on-farm questionnaires and biological sampling, to:

- Describe trends in dairy cattle health and management practices;
- Prevent the introduction and production measures related to animal welfare;
- Estimate the herd-level prevalence of lameness and identify housing and management factors associated with lameness;
- Evaluate dairy calf health from birth to weaning;
- Describe antibiotic use and residue prevention methods used to ensure milk and meat quality; and
- Estimate the prevalence and antimicrobial resistance patterns of foodborne pathogens.

The information collected will be used by APHIS to help define and evaluate current management practices and trends, help policymakers and industry make informed decisions, assist researchers and private enterprise to identify and focus on vital issues related to dairy-cattle health and productivity, and conduct economic analyses of the health and production of the U.S. dairy industry.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for 3 years.
For Further Information Contact: For information on the regulations for the importation of table eggs from regions where Newcastle disease exists, contact Dr. Magde Elshafie, Senior Staff Veterinary Medical Officer, TTS, NCIE, APHIS, 4700 River Road Unit 40, Riverdale MD 20737; (301) 851–3300. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 851–2908.

Supplementary Information:

Title: Importation of Table Eggs From Regions Where Newcastle Disease Exists.

OMB Number: 0579–0328.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 et seq.), the Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture is authorized, among other things, to prohibit or restrict the importation and interstate movement of animals and animal products to prevent the introduction into and dissemination within the United States of livestock diseases and pests. To carry out this mission, APHIS regulates the importation of animals and animal products into the United States. The regulations for the importation of animals and animal products are contained in 9 CFR parts 92 through 98.

In part 94, § 94.6 governs the importation of carcasses, meat, parts of carcasses, and eggs (other than hatching eggs) of poultry, game birds, and other birds to prevent the introduction of Newcastle disease and highly pathogenic avian influenza into the United States. Various conditions for the importation of table eggs from regions where Newcastle disease exists, including Mexico, apply and involve information collection activities, including the issuance of certificates and application of seals by foreign national or accredited veterinarians.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

1. Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
2. Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1.5 hours per response.

Respondents: Salaried veterinary officer of the national government of the region of origin or a veterinarian accredited by the National Government of Mexico.

Estimated annual number of respondents: 1.

Estimated annual number of responses per respondent: 2.

Estimated annual number of responses: 2.

Estimated total annual burden on respondents: 3.0 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 3rd day of May 2013.

Kevin Shea,
Acting Administrator, Animal and Plant Health Inspection Service.

Notice of Reopening of Public Comment Period—Proposed Directives for Forest Service Land Management Planning

AGENCY: Forest Service, USDA.

ACTION: Notice of reopening of public comment period.

SUMMARY: The Forest Service is reopening the public comment period for the proposed directive regarding land management planning for an additional 15 days. The original notice called for comments to be submitted by April 29, 2013.

DATES: Comments must be received, in writing, on or before May 24, 2013.
