

under test, an alternate procedure may be used provided prior Commission approval is obtained.

(e) * * *

(4) The reference level for showing compliance with the emission mask shall be established using a resolution bandwidth sufficiently wide (usually two or three times the channel bandwidth) to capture the true peak emission of the equipment under test. In order to show compliance with the emission mask up to and including 50 kHz removed from the edge of the authorized bandwidth, adjust the resolution bandwidth to 100 Hz with the measuring instrument in a peak hold mode. A sufficient number of sweeps must be measured to insure that the emission profile is developed. If video filtering is used, its bandwidth must not be less than the instrument resolution bandwidth. For emissions beyond 50 kHz from the edge of the authorized bandwidth, see paragraph (o) of this section. If it can be shown that use of the above instrumentation settings do not accurately represent the true interference potential of the equipment under test, an alternate procedure may be used provided prior Commission approval is obtained.

■ 5. Section 90.238 is amended by revising paragraph (e) to read as follows:

§ 90.238 Telemetry operations.

* * * * *

(e) In the 450–470 MHz band, telemetry operations will be authorized on a secondary basis with a transmitter output power not to exceed 2 watts on frequencies subject to § 90.20(d)(27) or § 90.35(c)(30), except that telemetry operations used by Railroad licensees may be authorized on frequency pair 452/457.9375 MHz with a transmitter output power not to exceed 8 watts.

■ 6. Section 90.425 is amended by revising paragraph (e)(3) and adding paragraph (f) to read as follows:

§ 90.425 Station identification.

* * * * *

(e) * * *

(3) CMRS stations granted exclusive channels may transmit their call signs digitally. A licensee that identifies its call sign in this manner must provide the Commission, upon request, information sufficient to decode the digital transmission and ascertain the call sign transmitted.

(f) Special provisions for stations licensed under this part that are not classified as CMRS providers under part 20 of this chapter.

(1) Stations subject to a station identification requirement will be permitted to use a single call sign for commonly owned facilities that are operated as part of a single system.

(2) Stations licensed on an exclusive basis in the bands between 150 and 512 MHz that normally employ digital signals for the transmission of data, text, control codes, or digitized voice may be identified by digital transmission of the call sign. A licensee that identifies its call sign in this manner must provide the Commission, upon request, information sufficient to decode the digital transmission and ascertain the call sign transmitted.

■ 7. Section 90.631 is amended by revising paragraph (d) to read as follows:

§ 90.631 Trunked systems loading, construction and authorization requirements.

* * * * *

(d) In rural areas, a licensee of a trunked system may request to increase its system capacity by five more channels than it has constructed without meeting the loading requirements specified in paragraphs (b) and (c) of this section. A rural area is defined for purposes of this section as being beyond a 100-mile radius of the following designated centers of the following urban areas: New York, NY; Los Angeles, CA; Chicago, IL; Philadelphia, PA; San Francisco, CA; Detroit, MI; Boston, MA; Houston, TX; Washington, DC; Dallas-Fort Worth, TX; Miami, FL; Cleveland, OH; St. Louis, MO; Atlanta, GA; Pittsburgh, PA; Baltimore, MD; Minneapolis-St. Paul, MN; Seattle, WA; San Diego, CA; and Tampa-St. Petersburg, FL. The coordinates for the centers of these areas are those referenced in § 90.741, except that the coordinates (referenced to North American Datum 1983 (NAD83)) for Tampa-St. Petersburg are latitude 28°00'1.1" N, longitude 82°26'59.3" W.

Defense Federal Acquisition Regulation Supplement: System for Award Management Name Changes, Phase 1 Implementation (DFARS Case 2012-D053)

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD is issuing a final rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to reflect the joining of the Central Contractor Registration (CCR), Online Representations and Certification Application (ORCA), and Excluded Parties Listing System (EPLS) databases into the System for Award Management (SAM) database.

DATES: *Effective Date:* May 16, 2013.

FOR FURTHER INFORMATION CONTACT: Lee Renna, telephone 571-372-6095.

SUPPLEMENTARY INFORMATION:

I. Background

The E-Government Act of 2002 (Pub. L. 107-347, 44 U.S.C. 101) was enacted in an effort to improve the management and promotion of electronic Government services and processes. The Act established a framework of measures that require using Internet-based information technology to improve citizen access to Government information and services. The General Services Administration (GSA) has embraced the intent of the Act by consolidating the Government-wide acquisition and award support systems into SAM. SAM is a procurement system that streamlines the Federal acquisition business processes by acting as a single authoritative data source for vendor, contract award, and reporting information, thereby eliminating the need to enter multiple sites and perform duplicative data entry. SAM consolidates hosting to improve the efficiency of doing business with the Government.

The General Services Administration (GSA) began implementation of Phase 1 of SAM on July 29, 2012. Phase 1 combined the functional capabilities of the CCR, ORCA, and EPLS procurement systems into the SAM database. Upon implementation, the pre-existing

procurement systems were retired, and all requirements for entity registration, representations and certifications, and exclusions are now accomplished via SAM. This final rule amends DFARS subparts 204, 209, 217, 252, and Appendix F by updating references and names to conform to the SAM designation. This final rule also makes a number of minor additional conforming changes, such as updates to definitions. A Federal Acquisition Regulation (FAR) case, 2012-033, is also being processed to effect similar conforming updates.

II. Publication of This Final Rule for Public Comment Is Not Required by Statute

Publication of proposed regulations, 41 U.S.C. 1707, is the statute which applies to the publication of the Federal Acquisition Regulation. Paragraph (a)(1) of the statute requires that a procurement policy, regulation, procedure or form (including an amendment or modification thereof) must be published for public comment if it relates to the expenditure of appropriated funds, and has either a significant effect beyond the internal operating procedures of the agency issuing the policy, regulation, procedure or form, or has a significant cost or administrative impact on contractors or offerors. This final rule is not required to be published for public comment, because it only serves to ensure that the procurement systems that are referenced in the DFARS reflect those that are currently being utilized by the acquisition workforce in the performance of those functions relating to entity registration, representations and certifications, and exclusions. Therefore, this rule has no significant effect beyond the internal operating procedures of the Government, nor does the rule create a significant cost or administrative impact on contractors or offerors.

III. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of

E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

IV. Regulatory Flexibility Act

The Regulatory Flexibility Act does not apply to this rule because this final rule does not constitute a significant DFARS revision within the meaning of FAR 1.501-1 and 41 U.S.C. 1707 and does not require publication for public comment.

V. Paperwork Reduction Act

The rule does not contain any information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35).
