

Respondents: Business or other for-profit, not-for-profit institutions, Federal Government and state, local or tribal government.

Number of Respondents: 979 respondents; 1,625 responses.

Estimated Time per Response: .25 hours to 5 hours.

Frequency of Response: Annual, on occasion, one time and every 10 reporting requirements, recordkeeping requirements, and third party disclosure requirements.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. sections 151, 152, 154(i), 201, 301, 302, 303(f), 303(g), 303(r), 307, 308, 309, 310, 316, 319, 34, 332, and 333 of the Communications Act of 1934, as amended, and the Commercial Spectrum Enhancement Act (CSEA), Pub. L. 108-494, 118 Stat 3896, 3992 (2004).

Total Annual Burden: 32,386 hours.

Total Annual Cost: \$581,800.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: There is no need for confidentiality except as follows: some relocators that seek reimbursement through the FCC cost-sharing plan administered by the clearinghouses will be required to retain records for more than three years, as will the clearinghouses themselves.

Needs and Uses: The Commission will submit this information collection during this comment period to obtain the full, three year clearance from the Office of Management and Budget (OMB). The Commission is requesting approval for a revision. There is a change to the Commission's previous burden estimates. The Commission is now reporting a seven hour adjustment in the total annual burden which is due to an increase in the estimated number of AWS licensees based on the grant of additional initial licenses (FCC Auction 78) and partitions and disaggregations of existing licenses to new licensees (765 incumbent FS licensees, 200 AWS licensees, 10 incumbent BRS licensees, 2 AWS-4 operators and 2 clearinghouses) = 979 respondents.

The Commission in the revisions proposed in the *AWS-4 NPRM*, FCC 12-32, which was submitted for OMB approval, proposed terrestrial service, technical, assignment and licensing rules for the 2000-2020 MHz and 2180-2200 MHz spectrum bands. These proposed rules were designed to provide for flexible use of this spectrum, to encourage innovation and investment in mobile broadband, and to provide a stable regulatory environment in which broadband deployment could develop. The *AWS-4 NPRM* proposed terrestrial

service rules for these spectrum bands that would generally follow the Commission's Part 27 rules, which apply to flexible use services (such as AWS-1), modified as necessary to account for issues unique to the 2000-2020 MHz and 2180-2200 MHz bands. The proposals in the *AWS-4 NPRM* included band-specific buildout, renewal, and discontinuance of service criteria. Given the proximity of these spectrum bands to spectrum bands previously identified as Advanced Wireless Services (AWS), the *AWS-4 NPRM* referred to these spectrum bands as "AWS-4" or "AWS-4 spectrum". The *AWS-4 NPRM* proposed to expand spectrum available for AWS, which the Commission first adopted in the *AWS-1 Report and Order*.

For this revision, subject to OMB approval, the Commission in the *AWS-4 Report and Order*, FCC 12-151, adopts flexible use rules for 40 megahertz of spectrum in the 2 GHz band (2000-2020 MHz and 2180-2200 MHz) that would increase the nation's supply of spectrum for mobile broadband. We adopt *AWS-4* terrestrial service, technical, and licensing rules that generally follow the Commission's Part 27 flexible use rules, modified as necessary to account for issues unique to the *AWS-4* bands.

Recordkeeping, reporting and third party disclosure requirements associated with the items listed in paragraph one of the supporting statement that is submitted to OMB for approval, will be used by incumbent licensees and new entrants to negotiate relocation agreements and to coordinate operations to avoid interference. The information will also be used by the clearinghouses to maintain a national database, determine reimbursement obligations of entrants pursuant to the Commission's rules, and notify such entrants of their reimbursement obligations. Additionally, the information will be used to facilitate dispute resolution and for FCC oversight of the clearinghouses and the cost-sharing plan.

FCC Technology Transitions Policy Task Force Seeks Comment on Potential Trials

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: In this document, the Technology Transitions Policy Task Force (Task Force) seeks comment on several potential trials relating to the ongoing transitions from copper to fiber, from wireline to wireless, and from time-division multiplexing (TDM) to Internet Protocol (IP). The goal of these trials would be to gather a factual record to help determine what policies are appropriate to promote investment and innovation while protecting consumers, promoting competition, and ensuring that emerging all-IP networks remain resilient and reliable. Towards this end, the public notice seeks comment on a set of potential trials, including targeted trials on Voice over Internet Protocol (VoIP) interconnection, Next Generation 911 (NG911) and the transition from wireline to wireless service in certain geographic areas. The public notice also invites parties in favor of conducting a trial in which one or more providers make a general switch to all-IP traffic in a geographic area to submit a detailed and comprehensive plan laying out how such a trial would work. It also seeks comment on whether other trials should be considered, such as additional numbering trials, trials to facilitate better access for persons with disabilities, and whether there are additional trials concerning the TDM to IP or copper to fiber transitions that should be evaluated. Finally, it seeks comment on how best to work with state, local and Tribal governments and how to ensure successful trials while also avoiding potential harmful impacts to consumers.
