A. Background

The STDF is a unique global partnership established by the Food and Agriculture Organization, World Organization for Animal Health, World Bank, World Health Organization (WHO) and the WTO. The STDF supports developing countries in building their capacity to implement international sanitary and phytosanitary (SPS) standards, guidelines, and recommendations as a means to improve their human, animal, and plant health status and ability to gain or maintain access to markets. In achieving its aims, the STDF acts as both a coordinating and a financing mechanism.

The STDF is a widely established knowledge platform for information exchange, sharing experiences and the identification and dissemination of good practice on SPS-related technical cooperation. Since 2004, over 60 projects and 52 project preparation grants have assisted developing countries to overcome SPS constraints, and gain and maintain market access. Over 50% have benefited least developed and other low-income countries.

The STDF utilizes a key decision-support tool, Multi-Criteria Decision Analysis (MCDA), to help establish SPS priorities and ensure resources are used as efficiently as possible. The use of the MCDA tool is unique within the STDF and is a highly-valued attribute; the MCDA tool facilitates an open and transparent discussion among public and private stakeholders about capacity-building needs and resources. The STDF is committed to the Paris Principles on Aid Effectiveness and to achieving the Millennium Development Goals.

With an increasingly diverse and complex global food supply, FDA’s interest is to strengthen food safety systems globally to prevent food safety
