Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: DOL–OSHA.
Title of Collection: Additional Information Collection Requirements for Special Dipping and Coating Operations.
OMB Control Number: 1218–0237.
Affected Public: Private Sector—businesses or other for-profits.
Total Estimated Number of Respondents: 10.
Total Estimated Number of Responses: 10.
Total Estimated Annual Burden Hours: 1.
Total Estimated Annual Other Costs Burden: $0.

Michel Smyth,
Departmental Clearance Officer.

FOR FURTHER INFORMATION CONTACT:
Adrian Dahood, ACA Permit Officer, at the above address or ACApermits@nsf.gov or (703) 292–7149.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas a requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Application Details

Activity for Which Permit Is Requested
ASPA Entry: The National Science Foundation, as U.S. taxpayer supported government agency, routinely selects members of the U.S. news media to visit Antarctica and report on the science the foundation facilitates there. The newsgathering process requires journalists to visit specific sites and to speak with the researchers conducting science there. Any interviews, photographs or video gathered during visits to ASPAs would be used to inform the general public about the importance of the science conducted on the continent. Visits to the ASPAs listed in this application would take place in conjunction with valid scientific activities, for the express purposes of gathering images, footage, or information on scientific research, general scenic locations, and interviews with scientists working in the field. Journalists visiting Antarctica will be accompanied at all times by an NSF staff “escort”. The escort will be a person who has years of experience working with field parties, with scientists and with journalists. The escort is cognizant of—and will follow the requirements contained in—the ASPA management plans and the Antarctic Conservation Act. They will insure that every effort is made to practice “low impact” documentary procedures with regard to the natural environment as well as to adhere to all USAP operations and procedures.

Location
ASPA 121: Cape Royds. Ross Island.
ASPA 122: Arrival Heights, Ross Island.
ASPA 124: Cape Crozier, Ross Island.
ASPA 157: Backdoor Bay, Cape Royds (Shackleton’s Hut), Ross Island.
ASPA 158: Cape Evans (Scott’s Hut), Ross Island.

Dates
October 1, 2013 to September 30 2018.

Nadene G. Kennedy,
Polar Coordination Specialist, Division of Polar Programs.

SUPPLEMENTARY INFORMATION:

I. Accessing Information and Submitting Comments

A. Accessing Information

Please refer to Docket ID NRC–2013–0089 when contacting the NRC about the availability of information regarding this document. You may access publicly-available information related to this action by the following methods:

- NRC’s Agencywide Documents Access and Management System (ADAMS): You may access publicly-available documents online in the NRC Library at http://www.nrc.gov/reading-rm/adams.html. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this notice (if that document is available in ADAMS) is provided in the first time that a document is referenced and also in the table included in this notice. The DSRS sections are available in ADAMS under the corresponding accession number as described in Section II. "Further Information," of this notice.
- NRC’s PDR: You may examine and purchase copies of public documents at the NRC’s PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2013–0089 in the subject line of your comment submission, in order to ensure that the NRC is able to make your comment submission available to the public in this docket.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at http://www.regulations.gov as well as entering the comment submissions into ADAMS.

C. Re-Opening of Comment Period

On May 14, 2013 (78 FR 28258), the NRC published a request for public comment on the mPower™ DSRS. The public comment period was originally scheduled to close on August 16, 2013. Generation mPower submitted a letter on August 8, 2013 (ADAMS Accession No. ML13224A163), requesting an extension of the public comment period until September 16, 2013, on specific sections of the mPower™ DSRS. The NRC has decided to re-open the public comment period on those specific sections of the mPower™ DSRS to allow more time for members of the public to assemble their comments on those sections. The NRC did not receive a request to extend the comment period on the additional sections in the May 14, 2013, request for public comment; and believes the original 90-day public comment period afforded for those sections is sufficient.

Specifically, we request comment on the sufficiency of the proposed technical content of the individual mPower™ DSRS sections, identified in the following table, that were revised or developed to incorporate design-specific review guidance based on features of the mPower™ reactor design.

I. Introduction
II. Proposals
III. Notice and Comment
IV. Ordering Paragraphs

I. Introduction

On August 16, 2013, the Postal Service filed a petition pursuant to 39 CFR 3050.11 requesting that the Commission initiate an informal rulemaking proceeding to consider changes in four analytical methods for use in periodic reporting. The Petition labels the proposed analytical method changes filed in this docket as Proposals One through Four. In addition, the Petition requests clarification concerning the status of a proposal that the Postal Service filed to the Commission directive in Docket No. ACR2012 regarding distribution of settlement costs within certain Global Plus Negotiated Service Agreement (NSA) products. This request for clarification will be treated as a petition pursuant to 39 CFR 3050.11 requesting that the Commission initiate an informal rulemaking proceeding to consider the changes identified in response to the Commission directive in Docket No. ACR2012, Item 3. Id. This request will be labeled as Proposal Five and reviewed as part of this docket.

II. Proposals
A. Proposal One: New Formula and Location for Alaska Air Adjustment Factor

The Postal Service proposes a simpler method for calculating the Alaska Air Adjustment Factor. In addition, the Postal Service proposes to implement the Alaska Air Adjustment Factor within the Cost Segment 14 model, rather than with the Cost and Revenue Analysis (CRA) model. It asserts that the current method for calculating the Alaska Air Adjustment Factor is unnecessarily complex, and since the current method was established, postal operational data have improved significantly. Thus, it contends, that the proposal is a more accurate and more easily updateable ratio of highway to air costs. It also believes that implementing the proposed change in the Cost Segment 14 workbook, rather than in the CRA model where it is currently located, would help increase transparency. See Petition at 2–3.

The Postal Service proposes a single set of distribution factors to assign relevant costs from the Non-Preferential
