

Meeting) (Contact: George Wilson, 301-415-1711)

This meeting will be webcast live at the Web address—<http://www.nrc.gov/>.

Friday, October 18, 2013

9:00 a.m. Meeting with the Advisory Committee on the Medical Uses of Isotopes (Public Meeting) (Contact: Sophie Holiday, 301-415-7865)

This meeting will be webcast live at the Web address—<http://www.nrc.gov/>.

1:00 p.m. Briefing on Proposed Rulemaking Concerning the Medical Use of Byproduct Material (Public Meeting) (Contact: Ashley Cockerham, 240-888-7129)

This meeting will be webcast live at the Web address—<http://www.nrc.gov/>.

#### Week of October 21, 2013—Tentative

There are no meetings scheduled for the week of October 21, 2013.

#### Week of October 28, 2013—Tentative

Thursday, October 31, 2013

10:00 a.m. NRC All Employees Meeting (Public Meeting) Marriott Bethesda North Hotel 5701 Marinelli Road, Rockville, MD 20852

\* \* \* \* \*

The schedule for Commission meetings is subject to change on short notice. To verify the status of meetings, call (recording)—301-415-1292. Contact person for more information: Rochelle Baval, 301-415-1651.

\* \* \* \* \*

The NRC Commission Meeting Schedule can be found on the Internet at: <http://www.nrc.gov/public-involve/public-meetings-schedule.html>.

\* \* \* \* \*

The NRC provides reasonable accommodation to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in these public meetings, or need this meeting notice or the transcript or other information from the public meetings in another format (e.g. braille, large print), please notify Kimberly Meyer, NRC Disability Program Manager, at 301-287-0727, or by email at [Kimberly.Meyer-Chambers@nrc.gov](mailto:Kimberly.Meyer-Chambers@nrc.gov). Determinations on requests for reasonable accommodation will be made on a case-by-case basis.

\* \* \* \* \*

Members of the public may request to receive this information electronically. If you would like to be added to the distribution, please contact the Office of the Secretary, Washington, DC 20555 (301-415-1969), or send an email to [Darlene.Wright@nrc.gov](mailto:Darlene.Wright@nrc.gov).

September 19, 2013.

## NUCLEAR REGULATORY COMMISSION

[NRC-2013-0048]

### Maintenance, Testing, and Replacement of Vented Lead-Acid Storage Batteries for Nuclear Power Plants

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Regulatory guide; issuance.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is issuing Revision 3 of Regulatory Guide (RG) 1.129, "Maintenance, Testing, and Replacement of Vented Lead-Acid Storage Batteries for Nuclear Power Plants." The guide describes methods that the NRC staff considers acceptable for use in complying with the agency's regulations with regard to the maintenance, testing, and replacement of vented lead-acid storage batteries in nuclear power plants.

**ADDRESSES:** Please refer to Docket ID NRC-2013-0048 when contacting the NRC about the availability of information regarding this document. You may access publicly-available information related to this action by the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2013-0048. Address questions about NRC dockets to Carol Gallagher; telephone: 301-287-3422; email: [Carol.Gallagher@nrc.gov](mailto:Carol.Gallagher@nrc.gov). For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may access publicly available documents online in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to [pdr.resource@nrc.gov](mailto:pdr.resource@nrc.gov). The ADAMS accession number for each document referenced in this notice (if that document is available in ADAMS) is provided the first time that a document is referenced. Revision 3 of

Regulatory Guide 1.129 is available in ADAMS under Accession No. ML13170A112. The regulatory analysis may be found in ADAMS under Accession No. ML13170A116.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

Regulatory guides are not copyrighted, and NRC approval is not required to reproduce them.

#### FOR FURTHER INFORMATION CONTACT:

Liliana Ramadan, telephone: 301-251-7642; email: [Liliana.Ramadan@nrc.gov](mailto:Liliana.Ramadan@nrc.gov); or Edward O'Donnell, telephone: 301-251-7455; email: [Edward.Odonnell@nrc.gov](mailto:Edward.Odonnell@nrc.gov). Both of the Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

#### SUPPLEMENTARY INFORMATION:

#### I. Introduction

The NRC is issuing a revision to an existing guide in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The NRC developed RG 1.129 to describe a method that the NRC staff considers acceptable for use in complying with the agency's regulations with regard to the maintenance, testing, and replacement of vented lead-acid storage batteries in nuclear power plants. Specifically, the method described in this regulatory guide relates to General Design Criteria (GDC) 1, 17, and 18 as set forth in appendix A, "General Design Criteria for Nuclear Power Plants," to part 50 of Title 10 of the *Code of Federal Regulations* (10 CFR), "Domestic Licensing of Production and Utilization Facilities."

The NRC issued Revision 3 of RG 1.129 with a temporary identification as Draft Regulatory Guide, DG-1269, in the **Federal Register** on March 12, 2013 (78 FR 15753), for a 60-day public comment period. The public comment period closed on May 13, 2013, and the NRC staff's response to the comments can be found in ADAMS under Accession No. ML13170A114.

RG 1.129, Revision 3 endorses (with certain clarifying regulatory positions) the Institute of Electrical and Electronics Engineers (IEEE) Std 450-

2010, "IEEE Recommended Practice for Maintenance, Testing, and Replacement of Vented Lead-Acid Batteries for Stationary Applications." That standard is an update of IEEE Std 450–2002, which formed the basis for RG 1.129, Revision 2. The revised IEEE Std 450–2010 refines the condition monitoring guidance and the use of rate-adjusted test methods for acceptance testing to ensure consistent performance of vented lead-acid batteries. Among the changes in RG 1.129, Revision 3 from the prior version is the deletion of clarifying regulatory positions 6 and 8. The former is addressed by IEEE 450–2010 and is not needed. The latter provides information on optional test methods and, unless otherwise stated in a regulatory position, this endorsement of IEEE–450–2010 does not apply to them. Therefore it is superfluous.

Revision 3 of RG 1.129 represents the NRC staff's current guidance for future users and applications. Earlier versions of this regulatory guide, however, continue to be acceptable for those licensees whose licensing basis includes earlier versions of this regulatory guide, absent a licensee-initiated change to its licensing basis. Additional information on the NRC staff's use of this revised regulatory guide with respect to both current and future users and applications is set forth in the "Implementation" section of the revised regulatory guide.

## II. Congressional Review Act

This regulatory guide is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

## III. Backfitting and Issue Finality

Regulatory Guide 1.129, Revision 3, does not constitute backfitting as defined in 10 CFR 50.109 (the Backfit Rule) and is not otherwise inconsistent with the issue finality provisions in 10 CFR part 52, "Licenses, Certifications and Approvals for Nuclear Power Plants." Revision 3 of this regulatory guide provides guidance on one possible means for meeting NRC's regulatory requirements with regard to the maintenance, testing, and replacement of vented lead-acid storage batteries in nuclear power plants in GDCs 1, 17 and 18, and the qualification testing requirements of Criterion III of 10 CFR Part 50, Appendix B. Existing licensees and applicants of final design certification rules will not be required to comply with the positions set forth in Revision 3 of this regulatory guide,

unless the licensee or design certification rule applicant seeks a voluntary change to its licensing basis with respect to safety-related power operated valve actuators, and where the NRC determines that the safety review must include consideration of the qualification of the valve actuators. Further information on the staff's use of the Regulatory Guide 1.129, Revision 3, is contained in the regulatory guide under section D. Implementation.

Dated at Rockville, Maryland, this 16th day of September, 2013.

For the Nuclear Regulatory Commission.

**Thomas H. Boyce,**

*Chief, Regulatory Guide Development Branch,  
Division of Engineering, Office of Nuclear  
Regulatory Research.*

## NUCLEAR REGULATORY COMMISSION

[NRC–2013–0219]

### Review of Experiments for Research Reactors

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Regulatory guide; withdrawal.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is withdrawing Regulatory Guide (RG) 2.4, "Review of Experiments for Research Reactors." The guide is being withdrawn because the industry standard which it referred to has been withdrawn, and corresponding information is available in other NRC guidance. **ADDRESSES:** Please refer to Docket ID NRC–2013–0219 when contacting the NRC about the availability of information regarding this document. You may access publicly-available information related to this action by the following methods:

- *NRC's Agencywide Documents Access and Management System (ADAMS):* Publicly available documents created or received at the NRC are available online in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. To begin search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, or 301–415–4737, or by email at [PDR.Resource@nrc.gov](mailto:PDR.Resource@nrc.gov). The ADAMS accession number for each document referenced in this notice (if that document is available in ADAMS) is provided the first time that a document is referenced. The review for the withdrawal of RG 2.4 is available in

ADAMS under Accession No. ML13143A453.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852.

The documents are not copyrighted and NRC approval is not required to reproduce them. **FOR FURTHER INFORMATION CONTACT:** Alexander Adams Jr., telephone: 301–415–1127, by email at [Alexander.Adams@nrc.gov](mailto:Alexander.Adams@nrc.gov), Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington DC 20555–0001; or Richard Jervey, telephone: 301–251–7404, by email at [Richard.Jervej@nrc.gov](mailto:Richard.Jervej@nrc.gov), Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

## SUPPLEMENTARY INFORMATION:

### I. Introduction

The NRC is withdrawing RG 2.4, "Review of Experiments for Research Reactors," (ADAMS Accession No. ML003740131) because its guidance no longer provides useful information. RG 2.4 was published in July 1976 to provide clarification on meeting the requirements in part 50 of Title 10 of the *Code of Federal Regulations* (10 CFR), "Domestic Licensing of Production and Utilization Facilities," for procedures acceptable to the NRC staff for a licensee's review and approval of experiments performed at research reactor facilities. The NRC published RG 2.4 to endorse American National Standards Institute (ANSI) N401–1974 (American Nuclear Society (ANS) 15.6), "Review of Experiments for Research Reactors," with exceptions and additional considerations, concerning performance of experiments which could be undertaken without affecting conditions of the facility license and thus could be performed without prior NRC approval. In 1982, ANS replaced the N401 (ANS 15.6) standard with ANS 15.1, "American National Standard for the Development of Technical Specifications for Research Reactors."

ANS 15.6 is no longer supported by ANS or available in print. RG 2.4 was written using the text of ANS 15.6 for reference, and because the standard no longer exists, the text within the RG no longer provides useful information.

### II. Further Information

The withdrawal of RG 2.4 does not alter any prior or existing licensing commitments based on its use. Regulatory guides may be withdrawn when their guidance no longer provides useful information, or is superseded by technological innovations,
