BILLING CODE 4910–HY–P

DEPARTMENT OF THE TREASURY

Bureau of the Fiscal Service

Proposed Collection: Information Collection Surrounding the Sale and Issue of Marketable Book-Entry Securities

AFFECTED PUBLIC: Individuals, business or other for profit, or not-for-profit institutions.

ESTIMATED TOTAL ANNUAL BURDEN HOURS: 1.

REQUEST FOR COMMENTS: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:
(a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: September 27, 2013.

Bruce A. Sharp,
Bureau Clearance Officer.

For acceleration of the testing and adoption of pay for success (PFS) financing models

AGENCY: Office of Domestic Finance, Department of the Treasury.

ACTION: Request for Information.

SUMMARY: The President’s FY 2014 budget included a request for a $300 million one-time mandatory appropriation for a new Incentive Fund to help state and local governments implement PFS programs. In order to inform the Administration’s development of this legislative initiative, this request for information (RFI) seeks information on options for financing models and the most promising programmatic areas that could be served by the Incentive Fund. The input we receive will inform the Treasury Department and an interagency working group on PFS.

1THE BUDGET FOR FISCAL YEAR 2014—See page 978 of the President’s FY 2014 Budget Appendix (see http://www.whitehouse.gov/omb/budget/Appendix).

2See www.payforsuccess.org for general information on PFS and social impact bonds.

SUPPLEMENTARY INFORMATION:
Purpose

This request for information offers states, tribal governments, localities, community based and other non-profit organizations, private sector donors, researchers, and other interested individuals and entities the opportunity to provide information on effective approaches for improving outcomes for social services and other program areas by employing financing mechanisms that pay for results.

Background

What is pay for success?

PFS is an innovative financing model that offers new ways for the government to partner with philanthropic and other lenders to provide capital to test promising practices and scale programs that work, significantly enhancing the return on taxpayer investments. PFS maximizes taxpayer dollars by paying for demonstrated results, and allows effective and evidence-based solutions to be identified and implemented.

Administration Activities to Date (FY 2011–2013)

The President’s 2012 and 2013 Budget Proposals sought authority from Congressional appropriators to use limited funding across select program areas in agencies including the Department of Education, the Department of Labor, the Department of Justice, the Social Security Administration and the Corporation for National and Community Service, and to extend the availability of funds for PFS beyond a single fiscal year, to enable longer term projects to achieve the desired outcomes.

Under existing statutory authority, the Administration implemented several PFS initiatives in 2012: The Department of Justice announced three awards in September 2012 under the Second Chance Act, and the Department of Labor announced the availability of up to $20 million within the Workforce Innovation Fund for PFS projects.

Strengthening the Commitment in FY 2014

The Administration is reinforcing its commitment to advancing the use of PFS in the federal government by proposing $495 million in mandatory and discretionary programs in the President’s FY 2014 Budget. This includes $195 million in discretionary programming across three agencies (Education, Justice, and Labor).

The Pay for Success Incentive Fund

In addition, the President proposes to establish a $300 million Incentive Fund, as a one-time mandatory appropriation, to strengthen the achievement of program outcomes by accelerating adoption of PFS to improve program outcomes.

What is the purpose of the new PFS Incentive Fund?

Over the past three years, multiple states and local communities have embraced PFS because it offers the potential to bring significant new capital to scale programs that work. It does this by harnessing the savings that are generated by providing services that mitigate the need for more costly remedial interventions in the future. Successful outcomes may generate savings at multiple levels of government including local, state and federal. However, in many cases, state and local jurisdictions investigating potential Pay for Success projects find that the savings they capture are not sufficient to justify the investment and have difficulty accessing savings that occur at the state or federal level.

The first purpose of the Incentive Fund is to help states and local communities partner with the federal government to realize savings when PFS projects achieve the agreed-upon outcomes. These early projects will provide substantive evidence of these savings and inform future policy decisions to enable sustainable investment.

Lenders and investors are becoming interested in financing PFS programs, but this market is still new. If this market develops, private financing may expand the potential for PFS and the positive outcomes it generates.

The second purpose of the Incentive Fund is to better allocate program performance and other risk to catalyze testing of PFS models where there is a federal financial interest.

The Fund would be managed by the Department of the Treasury in consultation with a Federal Interagency Council on PFS. To support the cross-cutting nature of PFS, the Incentive Fund would help state, local, and tribal governments advance projects that achieve savings across programs and across levels of government and provide limited credit enhancement to build investor confidence in this emerging model. In some cases, promising PFS projects are likely to result in savings in other governmental programs or activities. Projects may also have savings and cost implications that cut across levels of government, e.g., for a program with both federal and state funds the fund might support projects that yield savings at the federal level as well as the state and local level.

A Federal Interagency Council on PFS would advise Treasury on specific programmatic and policy matters related to the use of the fund. The Council also would:

1. Coordinate Federal Pay for Success efforts by:
   • Aligning evidence standards used to determine and measure PFS outcomes across federal agencies and programs;
   • Sharing best practices for effectively coordinating PFS programs at the federal, state, and local levels.

2. Understand and respond to needs in the field by:
   • Soliciting ideas from a broad array of stakeholders on strategies for accelerating PFS adoption and learning, including facilitation of comprehensive, multi-systems approaches and leveraging existing resources;
   • Disseminating tools for defining, measuring, and evaluating outcomes in PFS projects, especially where cost and savings implications cut across multiple funding streams.

3. Foster partnerships across stakeholders by:
   • Assessing the potential for the development of public-private partnerships to support promising pilot projects;
   • Working with states and localities to align authorities necessary to support implementation of PFS projects and achieve better outcomes.

Request for Information

Through this RFI, Treasury and the interagency working group on PFS are soliciting ideas and information from a broad array of stakeholders on the Incentive Fund. We are also seeking input on how the Incentive Fund could be linked to existing federal, state and local resources in more coordinated and comprehensive ways to leverage private and philanthropic investment. Responses to this RFI will inform work on the design, logistics, and implementation of the Incentive Fund.

This RFI is for information and planning purposes only and should not be construed as a solicitation or an obligation on the part of the Treasury or other participating federal agencies.

In general, we are interested in receiving information on current challenges in implementing PFS, and essential elements for development of a robust PFS market. Additionally, we are seeking information on the potential impact of the Incentive Fund on market

development and the potential advantages to taxpayers.

We also ask respondents to address the following questions where possible, in the context of the discussion in this document. You do not need to address every question and should focus on those where you have relevant expertise. You may also address the questions in the context of a detailed pilot proposal outlining how a state, local, or tribal government could use the Incentive Fund to implement PFS projects that achieve better outcomes across a variety of programs and levels of government.

To the extent possible, please clearly indicate which question(s) you address in your response.

Key Questions:
1. Instead of focusing on particular programs, the budget language proposing the Fund is broad in scope. What agencies and/or program areas are best suited for the Fund and why? What level of evidence exists in these areas about interventions that work? What is the threshold of evidence that a program should have in order to merit consideration for a PFS approach? What other factors should be considered in setting resource priorities for the Fund?
2. The budget proposal encourages maximizing the leverage of Federal funds by engaging intermediaries, including state, local and tribal governments. What other kinds of groups should be considered as intermediaries? Are there other organizational constructs that should be considered? The ability to demonstrate whether a PFS intervention produces the desired results is the backbone of the model. How can the Federal government encourage the adoption of low-cost yet rigorous outcome measures? What are some of the barriers to using administrative data in a PFS scenario, and how might they be addressed?
3. Outcome payments and financing support (e.g., credit enhancements, loans or advances) are two forms of assistance meant to complement one another in stimulating PFS approaches. What criteria should be used to decide how to split the Fund between these two forms of assistance? Should a certain proportion of the fund go toward outcome payments versus financing support, such as 50/50, 30/70, etc.? Is there an optimal structure for both the timing and tiering of outcome payments? For example, should the projects allow for some degree of “progress payments” based upon achievement of early outcomes? Should the projects allow for “bonus payments” for extraordinary performance? What are the trade-offs of adapting different structures to different projects versus supporting a standardized approach?
5. Among the possible forms of financing support, would credit enhancements, loans or advances be most helpful? What role would financing support play in the overall structure of a PFS structure?
6. Please suggest one or more examples of promising PFS projects or programs. For each example, what are its characteristics or features that make it a good candidate for PFS? Who would be the key partners and what would be their roles? How would the activity be funded? How would risks be shared and interests aligned among the partners? What might be appropriate outcomes and metrics? Over what timeframe would outcomes be determined?
7. What process would be most helpful to states, local governments and tribes to apply for either outcome payments or financing supports? What do states and localities need in order to be ready to participate in a competitive process and resulting projects?
8. The ability to ensure that outcome payments are available for successful projects, either directly or via credit enhancement has been a significant risk that the Fund would help to address. Are there other functions that the Fund should serve in order to accelerate adoption and testing of the PFS model? You may also provide examples to illustrate how the Fund could be used to accelerate or enhance implementation of PFS.

Guidance for Submitting Documents

We ask that each respondent include the name and address of his or her institution or affiliation, and the name, title, mailing and email addresses, and telephone number of a contact person for his or her institution or affiliation, if any.

Dated:

Donet Graves,
Deputy Assistant Secretary for Small Business, Community Development and Housing Policy.

SUMMARY: The U.S. Department of the Treasury’s Office of Foreign Assets Control (“OFAC”) is publishing the names of five individuals and six entities whose property and interests in property have been blocked pursuant to the Foreign Narcotics Kingpin Designation Act (“Kingpin Act”) (21 U.S.C. 1901–1908, 8 U.S.C. 1182).

DATES: The designation by the Director of OFAC of the five individuals and six entities identified in this notice pursuant to section 805(b) of the Kingpin Act is effective on September 24, 2013.

SUPPLEMENTARY INFORMATION:

Electronic and Facsimile Availability

This document and additional information concerning OFAC are available on OFAC’s Web site at http://www.treasury.gov/ofac or via facsimile through a 24-hour fax-on-demand service at (202) 622–0077.

Background

The Kingpin Act became law on December 3, 1999. The Kingpin Act establishes a program targeting the activities of significant foreign narcotics traffickers and their organizations on a worldwide basis. It provides a statutory framework for the imposition of sanctions against significant foreign narcotics traffickers and their organizations on a worldwide basis, with the objective of denying their businesses and agents access to the U.S. financial system and the benefits of trade and transactions involving U.S. companies and individuals.

The Kingpin Act blocks all property and interests in property, subject to U.S. jurisdiction, owned or controlled by significant foreign narcotics traffickers as identified by the President. In addition, the Secretary of the Treasury, in consultation with the Attorney General, the Director of the Central Intelligence Agency, the Director of the Federal Bureau of Investigation, the Administrator of the Drug Enforcement Administration, the Secretary of Defense, the Secretary of State, and the Secretary of Homeland Security may designate and block the property and interests in property, subject to U.S. jurisdiction, of persons who are found to be: (1) Materially assisting in, or providing financial or technological support for or to, or providing goods or...
