Beginning Farmers and Ranchers Program at the Property. TAMUS would assume responsibility and maintenance of the constructed facilities and land to be conveyed from USDA.

In addition, one alternative was considered in the Draft EA but eliminated from detailed study. In this alternative, USDA would retain possession of the land and it would be transferred to the General Services Administration for disposal. Since it cannot reasonably be determined who would ultimately take possession of the property and how it would be utilized, it was not analyzed in detail in the EA.

The USDA used and coordinated the NEPA commenting process to satisfy the public involvement process for Section 106 of the National Historic Preservation Act (16 U.S.C. 470(f) as provided for in 36 CFR 800.2(d)(3)). No comments were received during the public comment period. Based on its analysis of the Final EA for the property transfer, ARS has found that transferring the land and buildings to TAMUS would have no significant impact on the quality of the human environment. Therefore, ARS will not prepare an Environmental Impact Statement for this proposed action.
