POLICY JUSTIFICATION

The Republic of Korea—Patriot Anti-Tactical Missiles

The Republic of Korea (ROK) has requested a possible sale to procure 112 Patriot Anti-Tactical Missiles (ATM), which will be upgraded to the Guided Enhanced Missile-Tactical (GEM–T) configuration via a Direct Commercial Sale, test equipment, spare and repair parts, personnel training, publications and technical data, U.S. Government and contractor technical and logistics support services, and other related elements of logistics support. The estimated cost is $404 million.

This proposed sale will contribute to the foreign policy goals and national security objectives of the United States by meeting the legitimate security and defense needs of an ally and partner nation. The ROK continues to be an important force for peace, political stability, and economic progress in North East Asia. These upgraded missiles will provide the ROK with an enhanced capability to defend against ballistic missile, aircraft and cruise missile threats.

The proposed sale of ATMs (and subsequent upgrade to GEM–T) contributes to the ROK’s goal to develop a more capable defense force and enhance interoperability with U.S. forces. The ROK will have no difficulty absorbing and maintaining these additional missiles in its inventory.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor for the procurement and upgrade will be Raytheon Company in Andover, Massachusetts.

Implementation of this proposed sale will not require the permanent assignment of any U.S. Government or contractor representatives to Korea. Support teams will travel to the country on a temporary basis for logistics support.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 13–55

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as Amended

Annex

Item No. vii

(vii) Sensitivity of Technology:

1. The Patriot Anti-Tactical Missiles (ATM) (which will be upgraded to Guided Enhanced Missile-Tactical (GEM–T)) contains classified components and critical/sensitive technology. The ATM hardware is unclassified. The ATM will continue to hold a significant technology lead over other surface-to-air missile systems in the world.

2. The ATM sensitive/critical technology is primarily in the area of design and production know-how and primarily inherent in the design, development and/or manufacturing data related to the ATM Fuze.

3. Information on vulnerability to electronic countermeasures and counter-counter measures, system performance capabilities and effectiveness, survivability and vulnerability data, non-cooperative target recognition, low observable technologies, select software/software documentation and test data are classified up to and including Secret.

4. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures, which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

This proposed effort is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification. It is believed the Republic of Korea can provide adequate protection of the technology being released.

36(b)(1) Arms Sales Notification

AGENCY: Department of Defense, Defense Security Cooperation Agency.

ACTION: Notice.

SUMMARY: The Department of Defense is publishing the unclassified text of a section 36(b)(1) arms sales notification. This is published to fulfill the requirements of section 155 of Public Law 104–164 dated July 21, 1996.

FOR FURTHER INFORMATION CONTACT: Ms. B. English, DSCA/DBO/CFM, (703) 601–3740.

The following is a copy of a letter to the Speaker of the House of Representatives, Transmittals 13–54 with attached transmittal, policy justification, and Sensitivity of Technology.

Dated: October 31, 2013.

Aaron Siegel,
Alternate OSD Federal Register Liaison Officer, Department of Defense.
DEFENSE SECURITY COOPERATION AGENCY
201 12TH STREET SOUTH, STE 203
ARLINGTON, VA 22202-5408

OCT 25 2013

The Honorable John A. Boehner
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 13-54, concerning the Department of the Army’s proposed Letter(s) of Offer and Acceptance to Singapore for defense articles and services estimated to cost $96 million. After this letter is delivered to your office, we plan to issue a press statement to notify the public of this proposed sale.

Sincerely,

[Signature]

J.W. Hicks
Vice Admiral, USN
Director

Transmittal No. 13–54

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) Prospective Purchaser: Republic of Singapore
(ii) Total Estimated Value:

| Major Defense Equipment | $95 million |
| Other | $1 million |
| **Total** | **$96 million** |

(iii) Description and Quantity or Quantities of Articles or Services under Consideration for Purchase: 88 Unitary High Explosive (HE) Guided Multiple Launch Rocket System (GMLRS) Pods with Tri-mode Fuse, and, containers, spare and repair parts, support equipment, tools and test equipment, publications and technical documentation, personnel training and training equipment, U.S. Government and contractor engineering, logistics, and technical support services, and other related elements of logistics and program support.

(iv) Military Department: Army (VFM)

POLICY JUSTIFICATION
Singapore—Guided Multiple Launch Rocket System

The Government of Singapore has requested a possible sale of 88 Unitary High Explosive (HE) Guided Multiple Launch Rocket System (GMLRS) Pods with Tri-mode Fuse, and, containers, spare and repair parts, support equipment, tools and test equipment, publications and technical documentation, personnel training and training equipment, U.S. Government and contractor engineering, logistics, and technical support services, and other related elements of logistics and program support. The estimated cost is $96 million.

This proposed sale will contribute to the foreign policy and national security of the United States by increasing the ability of the Republic of Singapore to contribute to regional security. The proposed sale will improve the security of a strategic partner which has been, and continues to be, an important force for political stability and economic progress in the Asia Pacific region.

This proposed sale provides the Republic of Singapore with additional assets critical to maintaining its defensive capabilities to protect its territory and deter regional aggression. The GMLRS pods strengthen the Republic of Singapore Army’s ability to defeat long-range artillery, air defense platforms, and light-armed vehicles in a precise, low-collateral damage strike. The Republic of Singapore will have no difficulty absorbing these additional GMLRS pods into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin Missile and Fire Control in Grand Prairie, Texas. There are no known offset agreements proposed in connection with the potential sale.

Implementation of this proposed sale will require U.S. Government or contractor representatives to travel to Singapore for a period of one week to provide equipment deprocessing/fielding and Quality Assurance Team acceptance testing.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 13–54
Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended
Annex
Item No. vii
(vii) Sensitivity of Technology:
1. The GMLRS are the U.S. Army’s primary munitions for organic Joint Expeditionary, all-weather, 24/7 tactical precision guided rockets employed by modular Fire Brigade Combat Teams, Division, Joint Special Operations Forces, and Joint Forces combatant commanders and are also a key component of the Marine Corps Future Fighting Effort. The GMLRS is the primary munition for units fielded with the High Mobility Artillery Rocket System (HIMARS) and Multiple Launch Rocket System (MLRS) M270A1 rocket and missile launcher platforms. The GMLRS provides close, medium, and long-range precision and area fires to destroy, suppress, and shape threat forces, including the following: cannon, mortar, rocket and artillery, light material armor, personnel, command and control, and air defense surface targets. The GMLRS integrates guidance and control packages with an improved rocket motor achieving greater range and precision accuracy, requiring fewer rockets to defeat targets, thereby reducing the logistics burden. The GMLRS-Unitary expands the MLRS target set into urban and complex environments by adding point, proximity and delay fusing modes. With over 2,500 rockets of its type fired in support of Overseas Contingency Operations (OCO), the GMLRS-Unitary rocket has demonstrated high effectiveness and low collateral damage while supporting Troops in Contact (TIC).
2. A determination has been made that the Government of Singapore can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. The overall classification of the assembled GMLRS and components is Secret.
3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, primarily performance characteristics, engagement algorithms and transmitter specific frequencies, the information could be used to develop countermeasures that might reduce weapon system effectiveness.

DEPARTMENT OF DEFENSE
Department of the Army
Advisory Committee on Arlington National Cemetery (ACANC)

AGENCY: Department of the Army, DoD.
ACTION: Notice of open committee meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act of 1972 (5 U.S. C. 552b, as amended), the Sunshine in the Government Act of 1976 (U. S. C. 552b, as amended) and 41 Code of the Federal Regulations (CFR 102–3. 140 through 160), the Department of the Army announces the following committee meeting:

Name of Committee: Advisory Committee on Arlington National Cemetery.
Date of Meeting: Tuesday, November 19, 2013.
Time of Meeting: 9:30 a.m.–3:30 p.m.
Place of Meeting: Women in Military Service for America Memorial, Conference Room, Arlington National Cemetery, Arlington, VA.

Proposed Agenda: Review and discuss the Section 60 Mementos Pilot Program, highlights of upcoming events for the 50th Commemoration of the interment of John F. Kennedy and 150th anniversary of Arlington National Cemetery, and the status of expansion projects.

Public’s Accessibility to the Meeting: Pursuant to 5 U.S.C. 552b and 41 CFR 102–3.140 through 102–3.165, and the availability of space, this meeting is open to the public. Seating is on a first-come basis.

FOR FURTHER INFORMATION CONTACT: Ms. Renea C. Yates; Designated Federal Officer; renea.c.yates.civ@mail.mil or 703–614–1248.

SUPPLEMENTARY INFORMATION: The following topics are on the agenda for discussion:
• Army National Cemeteries operational update
• Memorial requests consultation IAW PL 112–154
• Subcommittee Activities:
  • “Honor” Subcommittee: independent recommendations of methods to address the long-term future of Arlington National Cemetery, including how best to extend the active burials and on what ANC should focus once all available space has been used.
  • “Remember” Subcommittee: recommendations on preserving the marble components of the Tomb of the Unknown Soldier, including the cracks in the large marble
