Notice of adjustment of Nationwide Significant Risk Threshold.

SUMMARY: In accordance with appendix D to title 49 Code of Federal Regulations (CFR) part 222, Use of Locomotive Horns at Public Highway-Rail Grade Crossings, FRA is updating the Nationwide Significant Risk Threshold (NSRT). This action is needed to ensure that the public has the proper threshold of permissible risk for calculating quiet zones established in relationship to the NSRT. This is the sixth update to the NSRT, which is increasing from 13,722 to 14,347.

DATES: The effective date of this notice is November 26, 2013.

SUPPLEMENTARY INFORMATION:

Background

The NSRT is an average of the risk indexes for gated public crossings nationwide where train horns are routinely sounded. FRA developed this risk index to serve as one threshold of permissible risk for quiet zones established across the nation under 49 CFR part 222. In 2006, when it was calculated to be 13,722 (71 FR 47614, August 17, 2006). In 2007, FRA recalculated the NSRT to be 17,030 (71 FR 47614, August 17, 2006). In 2008, FRA recalculated the NSRT to be 18,775 (74 FR 45270, September 1, 2009). In 2010, FRA recalculated the NSRT to be 14,007 (75 FR 82136, December 29, 2010). FRA’s last update to the NSRT was made in 2012, when it was calculated to be 13,722 (77 FR 546, January 5, 2012).

New NSRT

Using collision data over a five-year period from 2008 to 2012, FRA has recalculated the NSRT based on formulas identified in appendix D to 49 CFR part 222. In making this recalculation, FRA noted that the total number of gated crossings nationwide where train horns are routinely sounded was 42,544.

Applying the fatality rate and injury rate to the probable number of fatalities and casualties predicted to occur at each of the 42,544 identified crossings and the predicted cost of the associated injuries and fatalities, FRA calculates the NSRT to be 14,347. Accordingly, this updated NSRT value will serve as one threshold of permissible risk for quiet zones established across the nation pursuant to 49 CFR part 222.

Both committees were established under the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. App. 1) and the pipeline safety law (49 U.S.C. Chap. 601). Each committee consists of 15 members—with membership evenly divided among the Federal and state government, the regulated industry, and the public. The committees advise PHMSA on the technical feasibility, practicability, and cost-effectiveness of each proposed pipeline safety standard.
