mg/l total dissolved solids. The modification also adds WET testing requirements using freshwater species for produced waters which discharge to freshwater receiving waters. To determine whether your facility, company, business, organization, etc. is regulated by this action, you should carefully examine the applicability criteria in Part I, Section A.1 of this permit. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the preceding FOR FURTHER INFORMATION CONTACT section. (Note that previous permit was noticed in the Federal Register at 77 FR 47380 on August 8, 2012.)

Other Legal Requirements

A. State Certification

Under section 401(a)(1) of the CWA, EPA may not issue an NPDES permit until the State in which the discharge will occur grants or waives certification to ensure compliance with appropriate requirements of the CWA and State law. EPA will seek certification from the Railroad Commission of Texas prior to issuing a final permit.

B. Other Regulatory Requirements

When EPA issued the general permit in 2012, EPA had conducted evaluations required by Coastal Zone Management Act, National Environmental Policy Act, Endangered Species Act, Magnuson-Stevens Fishery Conservation and Management Act, Historic Preservation Act, Paperwork Reduction Act, and Regulatory Flexibility Act. The scope of Today’s permit modification action does not trigger requirements for new evaluations for compliance with those regulatory requirements. These requirements were discussed in the fact sheet dated March 7, 2012, when EPA proposed the permit.

Dated: November 20, 2013.

William K. Honker,
Director, Water Quality Protection Division,
EPA Region 6.

ACTION: Notice.

SUMMARY: This document announces the auction of certain AM broadcast construction permits. Auction 84 will be a \"closed\" auction; only those entities listed in Attachment A to the Auction 84 Comment Public Notice will be eligible to participate in this auction. This document also seeks comment on competitive bidding procedures for Auction 84.

DATES: Comments are due on or before December 6, 2013, and reply comments are due on or before December 20, 2013.

ADDRESSES: All filings in response to this notice must refer to AU Docket No. 13–268. The Wireless Telecommunications and Media Bureaus strongly encourage interested parties to file comments electronically, and request that an additional copy of all comments and reply comments be submitted electronically to the following address: auction84@fcc.gov. Comments may be submitted by any of the following methods:
- Paper Filers: Parties who choose to file by paper must file an original and four copies of each filing. Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission’s Secretary. Attn: WTB/ASAD, Office of the Secretary, Federal Communications Commission.
- All hand-delivered or messenger-delivered paper filings for the Commission’s Secretary must be delivered to FCC Headquarters at 445 12th Street SW., Room TW–A325, Washington, DC 20554. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes must be disposed of before entering the building.
- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743.
- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 445 12th Street SW., Washington, DC 20554.
- People with Disabilities: Contact the FCC to request reasonable accommodations ( accessible format documents, sign language interpreters, CART, etc.) by email: FCC504@fcc.gov or phone: 202–418–0530 or TTY: 202–418–0432.

SUPPLEMENTARY INFORMATION: This is a summary of the Auction 84 Comment Public Notice released on November 18, 2013. The complete text of the Auction 84 Comment Public Notice, including all attachments and related Commission documents, is available for public inspection and copying from 8:00 a.m. to 4:30 p.m. Eastern Time (ET) Monday through Thursday or from 8:00 a.m. to 11:30 a.m. ET on Fridays in the FCC Reference Information Center, 445 12th Street SW., Room CY–A257, Washington, DC 20554. The Auction 84 Comment Public Notice and its attachments, as well as related Commission documents, also may be purchased from the Commission’s duplicating contractor, Best Copy and Printing, Inc. (BCPI), 445 12th Street SW., Room CY–B402, Washington, DC 20554, telephone 202–488–5300, fax 202–488–5563, or you may contact BCPI at its Web site: http://www.BCPIWEB.com. When ordering documents from BCPI, please provide the appropriate FCC document number, for example, DA 13–2168. The Auction 84 Comment Public Notice and related documents also are available on the Internet at the Commission’s Web site: http://wireless.fcc.gov/auctions/84/, or by using the search function for AU Docket No. 13–268 on the Commission’s Electronic Comment Filing System (ECFS) Web page at http://www.fcc.gov/cgb/ecfs/.

I. Background

1. On November 6, 2003, the Bureaus announced an auction filing window for applications for new AM stations and major modifications to authorized AM stations. By Public Notice dated June 15, 2005, the Bureaus provided a list of all applications received during that filing window that were mutually exclusive with other applications submitted in the filing window from January 26 through January 30, 2004. In the AM Auction 84 MX Public Notice, applicants in several of the listed groups of mutually exclusive applications (“MX groups”) were given the opportunity to eliminate their mutual exclusivity with other
applicants by means of settlement or technical modification to their proposals. In addition, for each MX group in which applicants proposed to serve different communities, an analysis under Section 307(b) of the Communications Act of 1934, as amended, was required. Any MX group consisting of only new commercial AM station applications for the same community did not require a section 307(b) analysis and was deemed ready to proceed to auction. On August 30, 2007, the Bureaus announced a limited, supplemental auction filing window to permit the filing of applications for a new AM station on 1700 kHz in a community located in Rockland County, New York.

II. Construction Permits In Auction 84

2. The Bureaus will proceed to auction for 22 new commercial AM station permits for the pending groups of mutually exclusive applications identified in Attachment A of the Auction 84 Comment Public Notice. A list of the locations and frequencies of these stations is included as Attachment A of the Auction 84 Comment Public Notice. Attachment A also lists proposed minimum opening bids and upfront payments for permits being offered in this auction.

3. An applicant listed in Attachment A may become qualified to bid only if it meets the additional filing, qualification and payment requirements. Each qualified bidder will be eligible to bid on only those construction permits specified for that qualified bidder in Attachment A to the Auction 84 Comment Public Notice. All applicants within each MX group are directly mutually exclusive with one another; therefore, no more than one construction permit will be awarded for each MX group identified in Attachment A.

III. Due Diligence

4. Each potential bidder is solely responsible for investigating and evaluating all technical and marketplace factors that may have a bearing on the value of the construction permits for AM broadcast facilities that it is seeking in this auction. Each bidder is responsible for assuring that, if it wins a construction permit, it will be able to build and operate facilities in accordance with the Commission’s rules. The FCC makes no representations or warranties about the use of this spectrum for particular services. Each applicant should be aware that the auction represents an opportunity to become an FCC permittee in the broadcast service, subject to certain conditions and regulations. An FCC auction does not constitute an endorsement by the FCC of any particular service, technology, or product, nor does an FCC construction permit or license constitute a guarantee of business success.

5. An applicant should perform its due diligence research and analysis before proceeding, as it would with any new business venture. Each potential bidder should perform technical analyses and/or refresh any previous analyses to assure itself that, should it become a winning bidder for any Auction 84 construction permit, it will be able to build and operate facilities that will fully comply with all applicable technical and legal requirements. The Bureaus strongly encourage each applicant to inspect any prospective transmitter sites located in, or near, the service area for which it plans to bid; confirm the availability of such sites; and familiarize itself with the Commission’s rules regarding the National Environmental Policy Act.

6. The Bureaus also strongly encourage each applicant to conduct its own research prior to Auction 84 in order to determine the existence of pending administrative or judicial proceedings that might affect its decisions regarding participation in the auction.

7. The Bureaus strongly encourage participants in Auction 84 to continue such research throughout the auction. The due diligence considerations mentioned in the Auction 84 Comment Public Notice does not comprise an exhaustive list of steps that should be undertaken prior to participating in this auction. As always, the burden is on the potential bidder to determine how much research to undertake, depending upon the specific facts and circumstances related to its interests.

IV. Short-Form Application Requirements

8. After evaluating any comments received in response to the Auction 84 Comment Public Notice, the Bureaus will release a public notice that will specify procedures pursuant to which the listed applicants may qualify to participate and bid in Auction 84. Those procedures will include instructions on how an applicant can submit any new or updated information in the Commission’s Integrated Spectrum Auction System (ISAS) to comply with current short-form application (FCC Form 175) requirements, including any changes to be reported pursuant to 47 CFR §35. An applicant is reminded that certain changes may be considered a “major modification” and could result in dismissal of its application and its disqualification from participation in Auction 84.

V. Bureaus Seek Comment On Auction 84 Procedures

A. Auction Structure

9. Simultaneous Multiple-Round Auction Design. The Bureaus propose to auction all construction permits included in Auction 84 using the Commission’s standard simultaneous multiple-round auction format. This type of auction offers every construction permit for bid at the same time and consists of successive bidding rounds in which eligible bidders may place bids on individual construction permits. Typically, bidding remains open on all construction permits until bidding stops on every construction permit. The Bureaus seek comment on this proposal.

10. Bidding Rounds. Auction 84 will consist of sequential bidding rounds, each followed by the release of round results. The initial bidding schedule will be announced in a public notice to be released at least one week before the start of the auction. Details on viewing round results, including the location and format of downloadable round results files, will be included in the same public notice.

11. The Commission will conduct Auction 84 over the Internet using the FCC Auction System. Bidders will also have the option of placing bids by telephone through a dedicated Auction Bidder Line. The toll-free telephone number for the Auction Bidder Line will be provided to qualified bidders prior to the start of the auction.

12. The Bureaus propose to retain the discretion to change the bidding schedule in order to foster an auction pace that reasonably balances speed with the bidders’ need to study round results and adjust their bidding strategies. Under this proposal, the Bureaus may change the amount of time for the bidding rounds, the amount of time between rounds, or the number of rounds per day, depending upon bidding activity and other factors. The Bureaus seek comment on this proposal. Commenters on this issue should address the role of the bidding schedule in managing the pace of the auction, specifically discussing the tradeoffs in managing auction pace by bidding schedule changes, by changing the activity requirements or bid amount parameters, or by using other means.

13. Stopping Rule. The Bureaus have discretion to establish stopping rules before or during multiple round auctions in order to complete the auction within a reasonable time. The
Bureaus propose to employ a simultaneous stopping rule approach, which means all construction permits remain available for bidding until bidding stops on every construction permit. More specifically, bidding will close on all construction permits after the first round in which no bidder submits any new bids, applies a proactive waiver, or withdraws any provisionally winning bids (if bid withdrawals are permitted in this auction). Thus, unless the Bureaus announce alternative procedures, the simultaneous stopping rule will be used in this auction, and bidding will remain open on all construction permits until bidding stops on every construction permit. Consequently, it is not possible to determine in advance how long the bidding in this auction will last.

14. The Bureaus propose to retain the discretion to exercise any of the following options during Auction 84: (1) Use a modified version of the simultaneous stopping rule that would close the auction for all construction permits after the first round in which no bidder applies a waiver, withdraws a provisionally winning bid (if withdrawals are permitted in this auction), or places any new bids on a construction permit for which it is not the provisionally winning bidder. Thus, absent any other bidding activity, a bidder placing a new bid on a construction permit for which it is the provisionally winning bidder would not keep the auction open under this modified stopping rule; (2) Use a modified version of the simultaneous stopping rule that would close the auction for all construction permits after the first round in which no bidder applies a waiver, withdraws a provisionally winning bid (if withdrawals are permitted in this auction), or places any new bids on a construction permit that is not FCC held. Thus, absent any other bidding activity, a bidder placing a new bid on a construction permit that does not already have a provisionally winning bid (an FCC-held construction permit) would not keep the auction open under this modified stopping rule; (3) Use a modified version of the simultaneous stopping rule that combines (1) and (2); (4) Declare that the auction will end after a specified number of additional rounds (special stopping rule). If the Bureaus invoke this special stopping rule, they will accept bids in the specified final round(s), after which the auction will close; and (5) Keep the auction open even if no bidder places any new bids, applies a waiver, or withdraws any provisionally winning bids (if withdrawals are permitted in this auction). In this event, the effect will be the same as if a bidder had applied a waiver. The activity rule will apply as usual, and a bidder with insufficient activity will either lose bidding eligibility or use a waiver.

15. The Bureaus propose to exercise these options only in certain circumstances, for example, where the auction is proceeding unusually slowly or quickly, there is minimal overall bidding activity, or it appears likely that the auction will not close within a reasonable period of time or will close prematurely. Before exercising these options, the Bureaus are likely to attempt to change the pace of the auction. For example, the Bureaus may adjust the pace of bidding by changing the number of bidding rounds per day and/or the minimum acceptable bids. The Bureaus propose to retain the discretion to exercise any of these options with or without prior announcement during the auction. The Bureaus seek comment on these proposals.

16. Information Relating to Auction Delay, Suspension, or Cancellation. For Auction 84, the Bureaus may delay, suspend, or cancel the auction in the event of a natural disaster, technical obstacle, administrative or weather necessity, evidence of an auction security breach or unlawful bidding activity, or for any other reason that affects the fair and efficient conduct of competitive bidding. The Bureaus will notify participants of any such delay, suspension or cancellation by public notice and/or through the FCC Auction System’s announcement function. If the auction is delayed or suspended they may, in their sole discretion, elect to resume the auction starting from the beginning of the current round or from some previous round, or cancel the auction in its entirety. Network interruption may cause the Bureaus to delay or suspend the auction. The Bureaus emphasize that they will exercise this authority solely at their discretion, and not as a substitute for situations in which the Bureaus may wish to apply their activity rule waivers. The Bureaus seek comment on this proposal.

B. Auction Procedures

17. Upfront Payments and Bidding Eligibility. The Bureaus have delegated authority and discretion to determine an appropriate upfront payment for each construction permit being auctioned, taking into account such factors as the efficiency of the auction process and the potential value of the construction permits. The upfront payment is a refundable deposit made by each bidder to establish eligibility to bid on construction permits. Upfront payments that are related to the specific construction permits being auctioned protect against frivolous or insincere bidding and provide the Commission with a source of funds from which to collect payments owed at the close of the auction. With these considerations in mind, the Bureaus propose the upfront payments set forth in Attachment A of the Auction 84 Comment Public Notice. The Bureaus seek comment on the upfront payments specified in Attachment A.

18. The Bureaus further propose that the amount of the upfront payment submitted by a bidder will determine its initial bidding eligibility in bidding units. The Bureaus propose to assign each construction permit a specific number of bidding units, equal to one bidding unit per dollar of the upfront payment listed in Attachment A. The number of bidding units for a given construction permit is fixed and does not change during the auction as prices change. A bidder may place bids on multiple construction permits, provided that (1) each such construction permit is designated for that bidder in Attachment A to the Auction 84 Comment Public Notice, and (2) the total number of bidding units associated with those construction permits does not exceed its current eligibility. A bidder cannot increase its eligibility during the auction; it can only maintain its eligibility or decrease its eligibility. Thus, in calculating its upfront payment amount and hence bidding eligibility, an applicant must determine the maximum number of bidding units on which it may wish to bid (or hold provisionally winning bids) in any single round, and submit an upfront payment amount covering that total number of bidding units. The Bureaus request comment on these proposals.

19. Activity Rule. In order to ensure that the auction closes within a reasonable period of time, an activity rule requires bidders to bid actively throughout the auction, rather than wait until late in the auction before participating. The Bureaus propose a single stage auction with the following activity requirement: In each round of the auction, a bidder desiring to maintain its current bidding eligibility is required to be active on 100 percent of its bidding eligibility. A bidder’s activity in a round will be the sum of the bidding units associated with any construction permits upon which it places bids during the current round and the bidding units associated with any construction permits for which it holds provisionally winning bids.
withdrawn (if bid withdrawals are permitted in this auction), the auction will remain open and the bidder's eligibility will be preserved. An automatic waiver applied by the FCC Auction System in a round in which there are no new bids, withdrawals (if bid withdrawals are permitted in this auction), or proactive waivers will not keep the auction open. A bidder cannot apply a proactive waiver after bidding in a round, and applying a proactive waiver will preclude it from placing any bids in that round. Applying a waiver is irreversible; once a proactive waiver is submitted, it cannot be unsubmitted, even if the round has not yet closed.

24. Consistent with recent FCC spectrum auctions, the Bureaus propose that each bidder in Auction 84 be provided with three activity rule waivers that may be used at the bidder's discretion during the course of the auction. The Bureaus seek comment on this proposal.

25. Reserve Price or Minimum Opening Bids. The Bureaus seek comment on the use of a minimum opening bid amount and/or reserve price for Auction 84. Normally, a reserve price is an absolute minimum price below which an item will not be sold in a given auction. A minimum opening bid, on the other hand, is the minimum bid price set at the beginning of the auction below which no bids are accepted. It is generally used to accelerate the competitive bidding process.

26. The Bureaus propose to establish minimum opening bid amounts for Auction 84. The Bureaus believe that a minimum opening bid amount, which has been used in other broadcast auctions, is an effective bidding tool for accelerating the competitive bidding process. The Bureaus do not propose to establish separate reserve prices for the construction permits to be offered in Auction 84.

27. For Auction 84, the Bureaus propose minimum opening bid amounts determined by taking into account the type of service and class of facility offered, market size, population covered by the proposed broadcast facility, and recent broadcast transaction data. Attachment A of the Auction 84 Comment Public Notice lists a proposed minimum opening bid amount for each construction permit available in Auction 84. The Bureaus seek comment on the minimum opening bid amounts specified in Attachment A.

28. If commenters believe that these minimum opening bid amounts will result in construction permits, are not reasonable amounts, or should instead operate as reserve prices, they should explain why this is so and comment on the desirability of an alternative approach. The Bureaus ask commenters to support their claims with valuation analyses and suggested amounts or formulas for reserve prices or minimum opening bids. In establishing the minimum opening bid amounts, the Bureaus particularly seek comment on factors that could reasonably have an impact on valuation of the broadcast spectrum, including the type of service and class of facility offered, market size, population covered by the proposed AM broadcast facility and any other relevant factors.

29. Bid Amounts. The Bureaus propose that, if the bidder has sufficient eligibility, an eligible bidder will be able to place a bid on a given construction permit in each round in any of up to nine different amounts. Under this proposal, the FCC Auction System interface will list the acceptable bid amounts for each construction permit. In the event of duplicate bid amounts due to rounding, however, the FCC Auction System will omit the duplicates and will list fewer than nine acceptable bid amounts for the construction permit.

30. The first of the acceptable bid amounts is called the minimum acceptable bid amount. The minimum acceptable bid amount for a construction permit will be equal to its minimum opening bid amount until there is a provisionally winning bid for the construction permit. After there is a provisionally winning bid for a construction permit, the minimum acceptable bid amount will be a certain percentage higher. That is, the FCC will calculate the minimum acceptable bid amount by multiplying the provisionally winning bid amount times one plus the minimum acceptable bid percentage. If, for example, the minimum acceptable bid percentage is 10 percent, the minimum acceptable bid amount will equal (provisionally winning bid amount) \* (1.10), rounded. If bid withdrawals are permitted in this auction, in the case of a construction permit for which the provisionally winning bid has been withdrawn, the minimum acceptable bid amount will equal the second highest bid received for the construction permit.

31. The FCC will calculate the eight additional bid amounts using the minimum acceptable bid amount and a bid increment percentage, which need not be the same as the percentage used to calculate the minimum acceptable bid amount. The first additional acceptable bid amount equals the minimum acceptable bid amount times one plus the bid increment percentage, rounded. If, for example, the bid...
increment percentage is 5 percent, the calculation is (minimum acceptable bid amount) * (1 + 0.05), rounded, or (minimum acceptable bid amount) * 1.05, rounded; the second additional acceptable bid amount equals the minimum acceptable bid amount times one plus two times the bid increment percentage, rounded, or (minimum acceptable bid amount) * 1.10, rounded; etc. The Bureaus will round the results using the Commission’s standard rounding procedures for auctions.

32. For Auction 84, the Bureaus propose to use a minimum acceptable bid percentage of 10 percent. This means that the minimum acceptable bid amount for a construction permit will be approximately 10 percent greater than the provisionally winning bid amount for the construction permit. To calculate the additional acceptable bid amounts, the Bureaus propose to use a bid increment percentage of 5 percent. The Bureaus seek comment on these proposals.

The Bureaus retain the discretion to change the minimum acceptable bid amounts, the minimum acceptable bid percentage, the bid increment percentage, and the number of acceptable bid amounts if the Bureaus determine that circumstances so dictate. Further, the Bureaus retain the discretion to do so on a construction permit-by-construction permit basis. The Bureaus also retain the discretion to limit (a) the amount by which a minimum acceptable bid for a construction permit may increase compared with the corresponding provisionally winning bid, and (b) the amount by which an additional bid may increase compared with the immediately preceding acceptable bid amount. For example, the Bureaus could set a $10,000 limit on increases in minimum acceptable bid amounts over provisionally winning bids. Thus, if calculating a minimum acceptable bid using the minimum acceptable bid percentage results in a minimum acceptable bid amount that is $12,000 higher than the provisionally winning bid on a construction permit, the minimum acceptable bid amount would instead be capped at $10,000 above the provisionally winning bid. The Bureaus seek comment on the circumstances under which to employ such a limit, factors to consider when determining the dollar amount of the limit, and the tradeoffs in setting such a limit or changing other parameters, such as changing the minimum acceptable bid percentage, the bid increment percentage, or the number of acceptable bid amounts. If the Bureaus exercise this discretion, they will alert bidders by announcement in the FCC Auction System during the auction.

34. Provisionally Winning Bids. Provisionally winning bids are bids that would become final winning bids if the auction were to close in that given round. At the end of a bidding round, the FCC Auction System determines a provisionally winning bid for each construction permit based on the highest bid amount received. If identical high bid amounts are submitted on a construction permit in any given round (i.e., tied bids), the FCC Auction System will use a random number generator to select a single provisionally winning bid from among the tied bids. (The Auction System assigns a random number to each bid when the bid is entered. The tied bid with the highest random number wins the tiebreaker.) The remaining bidders, as well as the provisionally winning bidder, can submit higher bids in subsequent rounds. However, if the auction were to end with no other bids being placed, the winning bidder would be the one that placed the provisionally winning bid. If the construction permit receives any bids in a subsequent round, the provisionally winning bid again will be determined by the highest bid amount received for the construction permit.

35. A provisionally winning bid will be retained until there is a higher bid on the construction permit at the close of a subsequent round, unless the provisionally winning bid is withdrawn (if bid withdrawals are permitted in this auction). The Bureaus remind bidders that provisionally winning bids count toward activity for purposes of the activity rule.

36. Bid Removal and Bid Withdrawal. For Auction 84, the Bureaus propose the following bid removal procedures. Before the close of a bidding round, a bidder has the option of removing any bid placed in that round. By removing a selected bid in the FCC Auction System, a bidder may effectively “unsubmit” any bid placed within that round. In contrast to the bid withdrawal provisions, a bidder removing a bid placed in the same round is not subject to a withdrawal payment. Once a round closes, a bidder may no longer remove a bid. The Bureaus seek comment on this bid removal proposal.

37. The Bureaus also seek comment on whether bid withdrawals should be permitted in Auction 84. When permitted in an auction, bid withdrawals provide a bidder with the option of withdrawing bids placed in prior rounds that have become provisionally winning bids. If permitted, a bidder may withdraw its provisionally winning bids using the “withdraw bids” function in the FCC Auction System. A bidder that withdraws its provisionally winning bid(s), if permitted, is subject to the bid withdrawal payment provisions of the Commission rules.

38. The Commission has recognized that bid withdrawals may be a helpful tool for bidders seeking to efficiently aggregate licenses or implement backup strategies in certain auctions. The stand-alone nature of AM facilities, however, suggests that it is not necessary for bidders to aggregate facilities being offered in the same auction in order to realize full value from those facilities, or to put the spectrum to effective and efficient use.

39. Based on the nature of the permits being offered and on experience with past auctions of broadcast construction permits, the Bureaus propose to prohibit bidders from withdrawing any bids after the close of the round in which bids were placed. The Bureaus make this proposal in light of the site- and applicant-specific nature and wide geographic dispersion of the permits available in this closed auction, which suggests that potential applicants for this auction will have limited opportunity to aggregate construction permits through the auction process (as compared with bidders in many auctions of wireless licenses) because of the pre-established closed MX groups. Thus, the Bureaus believe that it is unlikely that bidders will have a need to withdraw bids in this auction. The Bureaus also remain mindful that bid withdrawals, particularly those made late in this auction, could result in delays in licensing new AM stations and attendant delays in the offering of new broadcast service to the public. The Bureaus seek comment on their proposal to prohibit bid withdrawals.

C. Post-Auction Payments

40. Interim Withdrawal Payment Percentage. In the event the Bureaus allow bid withdrawals in Auction 84, they propose the interim bid withdrawal payment be 20 percent of the withdrawn bid. A bidder that withdraws a bid during an auction is subject to a withdrawal payment equal to the difference between the amount of the withdrawn bid and the amount of the winning bid in the same or a subsequent auction. However, if a construction permit for which a bid has been withdrawn does not receive a subsequent higher bid or winning bid in the same auction, the FCC cannot calculate the final withdrawal payment until that construction permit receives a higher bid or winning bid in a subsequent auction. In such cases, when
that final withdrawal payment cannot
yet be calculated, the FCC imposes on
the bidder responsible for the
withdrawn bid an interim bid
withdrawal payment, which will be
applied toward any final bid withdrawal
payment that is ultimately assessed.

41. The amount of the interim bid
withdrawal payment may range from
three percent to twenty percent of the
withdrawn bid amount, with the
percentage generally being higher where
there is greater risk of bid withdrawals
being used for anti-competitive
purposes, such as in Auction 84 when
there is little need for bidders to
aggregate permits. In light of these
considerations, the Bureaus propose to
use the maximum interim bid
withdrawal payment percentage
allowed by 47 CFR 1.2104(g)(1) in the
event bid withdrawals are allowed. The
Bureaus request comment on using
twenty percent for calculating an
interim bid withdrawal payment
amount in Auction 84. Commenters
advocating the use of bid withdrawals
should also address the percentage of the
interim bid withdrawal payment.

42. Additional Default Payment
Percentage. Any winning bidder that
defaults or is disqualified after the close
of an auction (i.e., fails to remit the
required down payment within the
prescribed period of time, fails to
submit a timely long-form application,
fails to make full and timely final
payment, or is otherwise disqualified) is
liable for a default payment under 47
CFR 1.2104(g)(2). This payment consists
of a deficiency payment, equal to the
difference between the amount of the
Auction 84 bidder’s winning bid and
the amount of the winning bid the next
time a construction permit covering the
same spectrum is won in an auction,
plus an additional payment equal to a
percentage of the defaulter’s bid or of
the subsequent winning bid, whichever
is less.

43. The Commission’s rules provide
that, in advance of each auction, it will
establish a percentage between three
percent and twenty percent of the
applicable bid to be assessed as an
additional default payment. As the
Commission has indicated, the level of
this additional payment in each auction
will be based on the nature of the
service and the construction permits
being offered.

44. For Auction 84, the Bureaus
propose to establish an additional
default payment of twenty percent.
Defaults weaken the integrity of the
auction process and may impede the
deployment of service to the public,
and an additional twenty percent default
payment will be more effective in
dettering defaults than the three percent
used in some earlier auctions. In light of
these considerations, the Bureaus
propose for Auction 84 an additional
default payment of twenty percent of
the relevant bid. Moreover, a twenty
percent additional default payment
amount is consistent with the
percentage used in recent auctions of
FM permits. The Bureaus seek comment
on this proposal.

Deputy Chief, Auctions and Spectrum Access
Division, WTB.

FEDERAL ELECTION COMMISSION
Sunshine Act Meetings

AGENCY: Federal Election Commission.

DATE & TIME: Thursday, December 5,
2013 at 10:00 a.m.

PLACE: 999 E Street NW., Washington,
DC (Ninth Floor).

STATUS: This meeting will be open to the
public.

ITEMS TO BE DISCUSSED:
Correction and Approval of Minutes for
October 31, 2013
Draft Interpretive Rule Regarding Date
of Political Party Nominations of
Candidates for Special Primary
Elections in New York
Draft Advisory Opinion 2013–19:
Yamaha Motor Corporation, U.S.A.
Audit Division Recommendation
Memorandum on the Caesars
Entertainment Corporation
Political Action Committee (A12–01)
Management and Administrative
Matters
Individuals who plan to attend and
require special assistance, such as sign
language interpretation or other
reasonable accommodations, should
contact Shawn Woodhead Werth,
Secretary and Clerk, at (202)694–1040,
at least 72 hours prior to the meeting
date.

PERSON TO CONTACT FOR INFORMATION:
Judit Ingram, Press Officer, Telephone:
(202) 694–1220.

Shawn Woodhead Werth,
Secretary and Clerk of the Commission.

FEDERAL RESERVE SYSTEM
Formations of, Acquisitions by, and
Mergers of Bank Holding Companies

The companies listed in this notice
have applied to the Board for approval,
pursuant to the Bank Holding Company
(BHC Act), Regulation Y (12 CFR part
225), and all other applicable statutes
and regulations to become a bank
holding company and/or to acquire the
assets or the ownership of, control of, or
the power to vote shares of a bank or
bank holding company and all of the
banks and nonbanking companies
owned by the bank holding company,
including the companies listed below.

The applications listed below, as well as
other related filings required by the
Board, are available for immediate
inspection at the Federal Reserve Bank
indicated. The applications will also be
available for inspection at the offices of
the Board of Governors. Interested
persons may express their views in
writing on the standards enumerated in
the BHC Act (12 U.S.C. 1842(c)). If the
proposal also involves the acquisition of
a nonbanking company, the review also
includes whether the acquisition of the
nonbanking company complies with the
standards in section 4 of the BHC Act
noted, nonbanking activities will be
conducted throughout the United States.

Unless otherwise noted, comments
regarding each of these applications
must be received at the Reserve Bank
indicated or the offices of the Board of
Governors not later than December 26,
2013.
