3. *Environmental justice*. EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticide(s) discussed in this document, compared to the general population.

II. What action is the Agency taking?

Under section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136c, EPA can allow manufacturers to field test pesticides under development. Manufacturers are required to obtain an EUP before testing new pesticides or new uses of pesticides if they conduct experimental field tests on 10 acres or more of land or one acre or more of water. Following the review of the application and any comments and data received in response to this solicitation, EPA will decide whether to issue or deny the EUP request, and if issued, the conditions under which it is to be conducted. Any issuance of an EUP will be announced in the **Federal Register**. Therefore, pursuant to 40 CFR 172.11(a), the Agency has determined that the following EUP application may be of regional and national significance, and therefore is seeking public comment on the following EUP application:

264-EUP-RUI. (EPA-HQ-OPP-2013-0732). *Submitter*: Bayer CropScience, 2 T.W. Alexander Drive, Research Triangle Park, NC 27709. *Pesticide chemical*: Fluoxastrobin. *Type of*

chemical: Fungicide. *Summary of request*: For use as a seed treatment on corn for efficacy against seedling infections of soilborne plant pathogenic fungi *Fusarium*, *Rhizoctonia*, *Pythium* and *Colletotrichum*, and to aid in suppression of late season stalk rot. This is a crop-destruct EUP. *Amount of product to be used*: maximum of 0.162 milligram (mg) fluoxastrobin per seed with a seed/pound (lb) average of 1,681 for field corn. Final planting no later than March 1, 2014, with field testing complete within 2 years.
