

2. Tips for preparing your comments. When submitting comments, remember to:

i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).

ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

3. Environmental justice. EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticide(s) discussed in this document, compared to the general population.

II. What action is the Agency taking?

Under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), at the discretion of the EPA Administrator, a Federal or State agency may be exempted from any provision of FIFRA if the EPA Administrator determines that emergency conditions exist which require the exemption. Oregon Department of Agriculture has requested the EPA Administrator to issue specific exemptions for the use of fipronil on turnip and rutabaga to control the cabbage maggot. Information in accordance with 40 CFR part 166 was submitted as part of these requests.

As part of these requests, the applicant asserts that an emergency situation exists based upon three factors:

1. A severe increase in cabbage maggot populations;
2. Apparent increasing resistance of the maggot to the registered alternative; and
3. Phytotoxicity of the registered alternative to emerging seedlings.

The applicant states that significant economic losses will be suffered without adequate control of the cabbage maggot in turnip and rutabaga production. The applicant indicates that fipronil has been shown to provide excellent crop safety, and overall provides better control than the registered alternative.

The Applicant proposes to make no more than one application at 4.16 fluid oz. of product per acre, to a maximum of 600 acres of rutabagas and turnips, for use of up to a potential maximum of 19.5 gallons of product. Applications would potentially be made through September 30, 2014, in the Oregon counties of Clackamas, Marion, Multnomah, and Umatilla.

This notice does not constitute a decision by EPA on the applications themselves. The regulations governing FIFRA section 18 require publication of a notice of receipt of an application for a specific exemption proposing a use which is supported by the Inter-Regional Project Number 4 (IR-4) program and has been requested in 5 or more previous years, and a petition for tolerance has not yet been submitted to the Agency. The notice provides an opportunity for public comment on the application.

The Agency will review and consider all comments received during the comment period in determining whether to issue the specific exemptions requested by the Oregon Department of Agriculture.
