As stated above, this excludes the central portion of the Nantucket Lightship Closed Area, which is an Essential Fish Habitat closure area. The EFP would also temporarily exempt participating vessels from possession limits and minimum size requirements specified in 50 CFR part 648, sub-sections B and D through O, for sampling purposes only. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impact that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

ACTION: Notice.

SUMMARY: The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Type of Request: New.

Number of Respondents: 1292.

Responses per Respondent: 1.

Annual Responses: 1292.

Average Burden per Response: 20 minutes.

Annual Burden Hours: 431.

Needs and Uses: The Speak-Up National Survey is an annual online survey created and administered by Project Tomorrow. DoDEA will participate in the survey in order to gather information from students and parents of students attending DoDEA schools on the use of technology in education throughout the United States. The survey provides data on how these groups are using and would like to use technology for learning in and out of school. Broad areas of information gathered via the surveys include: the benefits of using technology for learning; attitudes and interest in math and science, as well as career aspirations; how respondents self-assess their 21st century skills competencies. The information gathered via the

surveys does not currently exist, especially in a format that allows comparisons between DoDEA and national trends. The data resulting from the survey will be used by DoDEA as a planning tool and needs assessment. The information from the survey as compared with national trends will be effective in assisting DoDEA in providing well-planned technology initiatives that meet the needs of our military-connected students and other stakeholders. The data will also be used to plan training and professional development for DoDEA employees, especially teachers, as it will accurately reflect the needs of teachers and other staff members alike. The data are essential to meet the President's charge in the recent technology-focused ConnectedED initiative as well as the Presidential Study Directive 9: Strengthening Military Families, which states that "The Department of Defense commits to making DOD Education Activity (DODEA) schools a leader in the use of advanced learning technologies that have the potential to significantly improve student performance."
