

FEDERAL REGISTER

Vol. 79 Friday,
No. 133 July 11, 2014

Pages 39953–40618

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.ofr.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.fdsys.gov, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Printing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Printing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 77 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 79, No. 133

Friday, July 11, 2014

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF JUSTICE

Executive Office for Immigration Review

8 CFR Part 1003

[EOIR Docket No. 177; AG Order No. 3447–2014]

RIN 1125–AA77

Designation of Temporary Immigration Judges

AGENCY: Executive Office for Immigration Review, Department of Justice.

ACTION: Interim rule with request for comments.

SUMMARY: This rule amends the Executive Office for Immigration Review (EOIR) regulations relating to the organization of the Office of the Chief Immigration Judge (OCIJ) to allow the Director of EOIR to designate or select, with the approval of the Attorney General, temporary immigration judges.

DATES: *Effective Date:* This rule is effective July 11, 2014. Written comments must be submitted on or before September 9, 2014. Comments received by mail will be considered timely if they are postmarked on or before that date. The electronic Federal Docket Management System (FDMS) will accept comments until midnight eastern time at the end of that day.

ADDRESSES: Please submit written comments to Jeff Rosenblum, General Counsel, Executive Office for Immigration Review, 5107 Leesburg Pike, Suite 2600, Falls Church, Virginia 20530. To ensure proper handling, please reference RIN No. 1125–AA77 or EOIR docket No. 177 on your correspondence. You may submit comments electronically or view an electronic version of this interim rule at www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Jeff Rosenblum, General Counsel, Executive Office for Immigration Review, 5107 Leesburg Pike, Suite 2600, Falls Church, Virginia 20530; telephone (703) 305–0470 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

I. Posting of Public Comments

Please note that all comments received are considered part of the public record and made available for public inspection online at www.regulations.gov. Such information includes personally identifiable information (such as your name, address, etc.) voluntarily submitted by the commenter.

If you want to submit personally identifiable information (such as your name, address, etc.) as part of your comment, but do not want it to be posted online, you must include the phrase “PERSONALLY IDENTIFIABLE INFORMATION” in the first paragraph of your comment. You must also locate all the personally identifiable information you do not want posted online in the first paragraph of your comment and identify what information you want redacted.

If you want to submit confidential business information as part of your comment but do not want it to be posted online, you must include the phrase “CONFIDENTIAL BUSINESS INFORMATION” in the first paragraph of your comment. You must also prominently identify confidential business information to be redacted within the comment. If a comment has so much confidential business information that it cannot be effectively redacted, all or part of that comment may not be posted on <http://www.regulations.gov>.

Personally identifiable information identified and located as set forth above will be placed in the agency’s public docket file, but not posted online. Confidential business information identified and located as set forth above will not be placed in the public docket file. If you wish to inspect the agency’s public docket file in person by appointment, please see the “For Further Information Contact” paragraph.

II. Background

The Executive Office for Immigration Review (EOIR) administers the nation’s immigration court system. EOIR

primarily decides whether foreign-born individuals who are charged by the Department of Homeland Security (DHS) with violating immigration law pursuant to the Immigration and Nationality Act (INA) should be ordered removed from the United States, or should be granted relief or protection from removal and be permitted to remain in the United States.¹ EOIR is also responsible for conducting other immigration-related adjudications, including hearings regarding custody or bond determinations made by DHS.

To make these critical determinations, EOIR’s Office of the Chief Immigration Judge (OCIJ) has approximately 250 immigration judges who conduct administrative court proceedings, in 59 immigration courts nationwide. EOIR’s appellate component, the Board of Immigration Appeals (Board), primarily decides appeals of immigration judge decisions. The Board is the highest administrative tribunal for interpreting and applying U.S. immigration law. EOIR is a component of the Department of Justice (DOJ) or Department.

The immigration judges are attorneys appointed by the Attorney General as administrative judges qualified to conduct the cases assigned to them. They are subject to the supervision of the Attorney General in performing their prescribed duties, but, subject to the applicable governing standards, exercise independent judgment and discretion in considering and determining the cases before them. See INA sec. 101(b)(4) (8 U.S.C. 1101(b)(4)); 8 CFR 1003.10(b), (d). Decisions of the immigration judges are subject to review by the Board pursuant to 8 CFR 1003.1(a)(1) and (d)(1); in turn, the Board’s decisions can be reviewed by the Attorney General, as provided in 8 CFR 1003.1(g) and (h). Decisions of the Board and the Attorney General are subject to judicial review.

III. Proposal for Designation of Temporary Immigration Judges

EOIR’s mission is to adjudicate immigration cases by fairly, expeditiously, and uniformly interpreting and administering the Nation’s immigration laws. In order to more efficiently accomplish the agency’s commitment to promptly

¹ Generally, cases commence before an immigration judge when DHS files a charging document against an alien with the immigration court. See 8 CFR 1003.14(a).

decide the large volume of immigration cases, this rule amends the agency's regulations relating to the organization of OCIJ to allow the Director of EOIR to designate or select, with the approval of the Attorney General, one or more temporary immigration judges.

EOIR is currently managing the largest caseload the immigration court system has ever seen. Due to attrition in the immigration judge corps and continuing budgetary restrictions, the Department believes that the designation of temporary immigration judges will provide an appropriate means of flexibility in responding to the increased challenges facing the immigration courts.

An issue of continuing concern to the Department is EOIR's pending caseload in the immigration courts. At the end of FY 2013, there were 350,330 cases pending at the immigration courts, marking an increase of 22,901 cases pending above those at the end of FY 2012. *See* 2013 EOIR Stat. Y.B. W1.² Of those, 38 percent were received prior to FY 2012. *Id.* As DHS continues its obligation to enforce the immigration laws of the United States, EOIR anticipates that its caseload will continue to increase, especially as DHS continues to use new technologies to increase efficiencies in the identification, apprehension, detention, and removal of aliens.

Even without a continually increasing caseload, the dockets currently handled by the immigration judge corps are substantial. At the end of FY 2013, 350,330 pending cases were being handled by approximately 250 immigration judges, averaging 1,401 matters per immigration judge.³ By comparison, a recent study indicated that judges for the Board of Veterans' Appeals hear approximately 700 cases each year per judge and Social Security Administration administrative law judges decide approximately 500 cases each year per judge.⁴ There is a particular need to assist EOIR's larger courts, namely New York, NY; Los Angeles, CA; San Antonio, TX; San Francisco, CA; Pearsall, TX, which received 43 percent of all asylum

applications (15,661) filed with the immigration courts in FY 2013. *See* 2013 EOIR Stat. Y.B. J3. EOIR must be poised to handle not only its routine workload, but also emergency or special situations, such as a sudden influx of asylum seekers.

In response to increases in immigration court workload and DOJ priorities, EOIR undertook a major initiative that resulted in the hiring of more than 50 new immigration judges during FY 2010 and through the second quarter of FY 2011. However, as of June 2014, attrition and budgetary restrictions resulted in a net increase of only 13 immigration judges since FY 2009. The Department believes that the designation of temporary immigration judges will provide an appropriate means of responding to the increasing pending caseload in the immigration courts. While the designation of temporary immigration judges is not a substitute for the ongoing need to hire additional permanent immigration judges, designation of temporary immigration judges should improve EOIR's ability to adjudicate cases in a timely manner.

OCIJ provides overall program direction, articulates policies and procedures, and establishes priorities for the immigration courts. The Chief Immigration Judge will continue to monitor caseload volume, trends, and geographic concentration and will adjust resources accordingly. Where appropriate, temporary immigration judges could be assigned to a discrete category of cases, such as motions and bond proceedings, freeing up permanent immigration judge time to adjudicate more complicated removal cases and increase the number of matters EOIR could bring to a final disposition. From FY 2009 to FY 2013, approximately 70 percent of the cases before the immigration courts were completed without the alien applying for relief from removal. Bond-related matters, however, have increased by 12 percent from FY 2009 (51,584) to FY 2013 (57,699), along with a 104 percent increase in motions for change of venue and a 161 percent increase in case transfers over the same period. *See* 2013 EOIR Stat. Y.B. 11, A7.

However, to ensure the flexibility necessary to address record caseloads and to handle exigent circumstances, this rule would not limit the assignment of temporary immigration judges in the type of cases they may adjudicate, except as otherwise provided by the Chief Immigration Judge, per the authority granted in 8 CFR 1003.9 and in this interim rule. As discussed below, the Chief Immigration Judge will be

responsible for ensuring that each temporary immigration judge has the necessary training, experience, and skills to properly adjudicate the matters assigned.

This rule amends EOIR's regulations at 8 CFR 1003.10 by adding a new paragraph (e). The amendments will allow the Director of EOIR to designate or select, with the approval of the Attorney General, former Board members, former immigration judges, administrative law judges employed within or retired from EOIR, and administrative law judges from other Executive Branch agencies to act as temporary immigration judges for renewable six-month terms. Administrative law judges from other agencies must have the consent of their agencies to be designated as temporary immigration judges. In addition, the Director of EOIR will be able to designate, with the approval of the Attorney General, attorneys who have at least 10 years of legal experience in the field of immigration law and are currently employed by the Department of Justice to act as temporary immigration judges for renewable six-month terms. The 10 years of experience must be gained after admission to the bar and may be gained through employment by the federal, state, or local government, the private sector, universities, non-governmental organizations, or a combination of such experience. In order to allow greater flexibility, the rule does not specify particular titles or job descriptions for Department attorneys with 10 years of immigration law experience. Accordingly, attorneys at the Department with 10 years of immigration law experience may qualify for designation as temporary immigration judges.

In evaluating candidates for designation as a temporary immigration judge, EOIR anticipates that it will generally employ the same selection criteria and process it applies with respect to the hiring of permanent immigration judges. Characteristics that would qualify a candidate for designation as a temporary immigration judge include the ability to demonstrate the appropriate temperament to serve as a judge; knowledge of immigration laws and procedures; substantial litigation experience, preferably in a high-volume context; experience handling complex legal issues; experience conducting administrative hearings; and knowledge of practices and procedures. Designation of such individuals will help ensure efficiency in the adjudication of removal cases and preserve the integrity of the overall process, without sacrificing

² EOIR's FY2013 Statistical Year Book, prepared by EOIR's Office of Planning and Technology, is available at <http://www.justice.gov/eoir/statspub/fy13syb.pdf>.

³ This average does not take into account attrition in the immigration judge corps during FY 2013 or the difference in docket size geographically or by docket type (*i.e.*, detained, non-detained, juvenile, and institutional hearing program).

⁴ *See* American Bar Association Commission on Immigration, *Reforming the Immigration System: Proposals to Promote Independence, Fairness, Efficiency, and Professionalism in Adjudication*, at 2-37 (February 2010).

fairness and due process. As is the case for all immigration judges, EOIR provides a process for the filing and consideration of complaints.

IV. Training for Temporary Immigration Judges

Among EOIR's 2008–2013 strategic goals and objectives was the goal to provide for a workforce that is skilled, diverse, and committed to excellence, and that exhibits the highest standards of integrity. It is important that those who appear before EOIR's tribunals have trust in the agency and in the work that it does. EOIR is committed to providing training to new and experienced immigration judges, including temporary immigration judges.

EOIR will provide the training necessary for temporary immigration judges to perform the assigned duties. The Chief Immigration Judge may choose to specify particular types of matters for which each temporary immigration judge will be assigned, consistent with the individual's training and experience. Each judge will be supervised by the Assistant Chief Immigration Judge assigned to the local immigration court where the temporary immigration judge will be assigned. The Assistant Chief Immigration Judge will be available as an additional source of assistance and guidance, and will be responsible for conducting periodic reviews of the temporary immigration judge's performance and reporting his or her findings to the Chief Immigration Judge.

EOIR also ensures that immigration judges receive continuing education. For instance, in addition to new immigration judge training, EOIR held mandatory Immigration Judge Legal Training Conferences in 2009 and 2010 and Immigration Judge Legal Training Programs in 2011, 2012, and 2013. This training covered many substantive immigration legal issues, including those relating to asylum, criminal matters, bond, adjustment of status, and a variety of other topics. The training also provided information on subjects ranging from immigration cases involving unaccompanied alien children and respondents with mental competency issues to immigration fraud and courtroom management. Immigration Judge Legal Training Programs were recorded and will be available to temporary immigration judges.

OCIJ maintains an Immigration Judge Benchbook. The Benchbook includes scripts, introductory guides, checklists, worksheets, and sample orders as well as links to a number of immigration-

related legal resources. OCIJ also maintains an Immigration Court Practice Manual, a comprehensive guide that sets forth uniform procedures, recommendations, and requirements for practice before the immigration courts. Additional resources for immigration judges are available through EOIR's virtual law library, which includes BIA decisions, circuit court decisions, regulations, and country-specific information.

Given the many training options and resources available to immigration judges, EOIR will provide training as necessary for the performance of each temporary immigration judge's assigned duties.

V. Public Comments

This rule is exempt from the usual requirements of prior notice and comment and a 30-day delay in effective date because, as an internal delegation of authority, it relates to a matter of agency organization, procedure, or practice. *See* 5 U.S.C. 553(b). The Department is nonetheless promulgating this rule as an interim rule with opportunity for post-promulgation comment. This will provide the public with an opportunity for comment before the Department issues a final rule on these matters.

VI. Regulatory Requirements

A. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (RFA), “[w]henver an agency is required by section 553 of [the RFA], or any other law, to publish general notice of proposed rulemaking for any proposed rule . . . the agency shall prepare and make available for public comment an initial regulatory flexibility analysis.” 8 U.S.C. 603(a). Such analysis is not required when a rule is exempt from notice and comment rulemaking under 5 U.S.C. 553(b). Because this is a rule of internal agency organization and therefore is exempt from notice and comment rulemaking, no RFA analysis under 5 U.S.C. 603 is required for this rule.

B. Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

C. Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by section 251 of the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), 5 U.S.C. 804. This rule will not result in an annual effect on the economy of \$100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.

D. Executive Order 12866 and Executive Order 13563 (Regulatory Planning and Review)

The Department has determined that this rule is not a “significant regulatory action” under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and the Office of Management and Budget has concurred in this determination. Nevertheless, the Department certifies that this regulation has been drafted in accordance with the principles of Executive Order 12866, section 1(b), and Executive Order 13563. Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits, including consideration of potential economic, environmental, public health, and safety effects, distributive impacts, and equity. The benefits of this interim rule include providing the Department with an appropriate means of responding to current and future increases or surges in the number, size, or type of immigration court matters. The public will benefit from the designation of temporary immigration judges because such designations will help EOIR better accomplish its mission of adjudicating cases in a timely manner. Temporary immigration judges will receive appropriate training and supervision for this role. This rule will not have a substantial economic impact on Department functions to the extent that individuals who may act as temporary immigration judges are already employed by the Department. The Department does not foresee any burdens to the public or the Department.

E. Executive Order 13132 (Federalism)

This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the

distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive Order 13132, the Department has determined that this rule does not have sufficient federalism implications to warrant preparation of a federalism summary impact statement.

F. Executive Order 12988 (Civil Justice Reform)

This rule has been prepared in accordance with the standards in sections 3(a) and 3(b)(2) of Executive Order 12988.

G. Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1995, Public Law 104–13, 44 U.S.C. chapter 35, and its implementing regulations, 5 CFR part 1320, do not apply to this interim rule because there are no new or revised recordkeeping or reporting requirements.

H. Congressional Review Act

This action pertains to agency management and personnel and, accordingly, is not a “rule” as that term is used by the Congressional Review Act (CRA) (Subtitle E of the Small Business Regulatory Enforcement Fairness Act (SBREFA)), 5 U.S.C. 804(3). Therefore, the reports to Congress and the Government Accountability Office specified by 5 U.S.C. 801 are not required.

List of Subjects in 8 CFR Part 1003

Administrative practice and procedure, Aliens, Immigration, Legal services, Organization and functions (Government agencies).

Accordingly, for the reasons stated in the preamble, the Attorney General amends part 1003 of chapter V of title 8 of the Code of Federal Regulations as follows:

PART 1003—EXECUTIVE OFFICE FOR IMMIGRATION REVIEW

- 1. The authority citation for part 1003 continues to read as follows:

Authority: 5 U.S.C. 301; 6 U.S.C. 521; 8 U.S.C. 1101, 1103, 1154, 1155, 1158, 1182, 1226, 1229, 1229a, 1229b, 1229c, 1231, 1254a, 1255, 1324d, 1330, 1361, 1362; 28 U.S.C. 509, 510, 1746; sec. 2 Reorg. Plan No. 2 of 1950; 3 CFR, 1949–1953 Comp., p. 1002; section 203 of Pub. L. 105–100, 111 Stat. 2196–200; sections 1506 and 1510 of Pub. L. 106–386, 114 Stat. 1527–29, 1531–32; section 1505 of Pub. L. 106–554, 114 Stat. 2763A–326 to –328.

- 2. Revise § 1003.10 by adding a new paragraph (e), to read as follows:

§ 1003.10 Immigration judges.

* * * * *

(e) *Temporary immigration judges.* (1) *Designation.* The Director is authorized to designate or select temporary immigration judges as provided in this paragraph (e).

(i) The Director may designate or select, with the approval of the Attorney General, former Board members, former immigration judges, administrative law judges employed within or retired from EOIR, and administrative law judges from other Executive Branch agencies to serve as temporary immigration judges for renewable terms not to exceed six months. Administrative law judges from other Executive Branch agencies must have the consent of their agencies to be designated as temporary immigration judges.

(ii) In addition, the Director may designate, with the approval of the Attorney General, Department of Justice attorneys with at least 10 years of legal experience in the field of immigration law to serve as temporary immigration judges for renewable terms not to exceed six months.

(2) *Authority.* A temporary immigration judge shall have the authority of an immigration judge to adjudicate assigned cases and administer immigration court matters, as provided in the immigration laws and regulations, subject to paragraph (e)(3) of this section.

(3) *Assignment of temporary immigration judges.* The Chief Immigration Judge is responsible for the overall oversight and management of the utilization of temporary immigration judges and for evaluating the results of the process. The Chief Immigration Judge shall ensure that each temporary immigration judge has received a suitable level of training to enable the temporary immigration judge to carry out the duties assigned.

Dated: July 8, 2014.

James M. Cole,

Deputy Attorney General.

[FR Doc. 2014–16279 Filed 7–10–14; 8:45 am]

BILLING CODE 4410–30–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2013–0876; Directorate Identifier 2013–NE–27–AD; Amendment 39–17895; AD 2014–14–01]

RIN 2120–AA64

Airworthiness Directives; Rolls-Royce plc Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Rolls-Royce plc (RR) RB211 Trent 768–60, 772–60, and 772B–60 turbofan engines. This AD requires modification of the engine by removing an electronic engine control (EEC) incorporating EEC software standard A14 or earlier and installing an EEC eligible for installation. This AD was prompted by an uncontained multiple turbine blade failure on an RR RB211 Trent 772B turbofan engine. We are issuing this AD to prevent failure of the intermediate-pressure (IP) turbine disk drive arm or burst of the high-pressure turbine disk, which could lead to uncontained engine failure and damage to the airplane.

DATES: This AD becomes effective August 15, 2014.

ADDRESSES: For service information identified in this AD, contact Rolls-Royce plc, Corporate Communications, P.O. Box 31, Derby, England, DE248BJ; phone: 011–44–1332–242424; fax: 011–44–1332–249936; email: http://www.rolls-royce.com/contact/civil_team.jsp; or Web site: <https://www.aeromanager.com>. You may view this service information at the FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7125.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2013–0876; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the mandatory continuing airworthiness information (MCAI), the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is

Document Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT:

Kenneth Steeves, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; phone: (781) 238-7765; fax: (781) 238-7199; email: *Kenneth.Steeves@faa.gov*.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to the specified products. The NPRM was published in the **Federal Register** on March 3, 2014 (79 FR 11722). The NPRM proposed to correct an unsafe condition for the specified products. The MCAI states:

An operator of an A330 aeroplane fitted with RR Trent 772B engines experienced an engine uncontained multiple turbine blade failure. Investigation results showed that High-Pressure/Intermediate-Pressure (HP/IP) oil vent tubes may be affected by carbon deposit and may also be damaged by their outer heat shields, which in this case led to combustion inside the tube. The consequent chain of events resulted in an engine internal fire which caused the failure of the IP turbine disc drive arm.

This condition, if not corrected, could lead to uncontained multiple turbine blade failures or an HP/IP turbine disc burst, possibly resulting in damage to, and reduced control of, the aeroplane.

Comments

We gave the public the opportunity to participate in developing this AD. We considered the comments received.

Request To Modify Description of Failure Mode

RR requested that we define the failure mode as IP turbine disc drive arm failure and multiple IP turbine blade release to be consistent with descriptions in the RR service bulletin and the European Aviation Safety Agency (EASA) AD.

We disagree. EASA AD 2013-0190, dated August 20, 2013, states that the failure mode is multiple turbine blade failures or HP/IP turbine disc burst. We did not change this AD.

Request That FAA Require the Same Compliance Date as the EASA AD

RR requested that we modify the compliance date to be consistent with the compliance date required in EASA AD 2013-0190, dated August 20, 2013.

We disagree. EASA AD 2013-0190, dated August 20, 2013 required compliance by December 31, 2018. We proposed compliance at next shop visit or December 31, 2018, whichever comes first, to achieve more timely mitigation of the unsafe condition. We did not change this AD.

Conclusion

We reviewed the available data, including the comments received, and determined that air safety and the public interest require adopting the AD as proposed.

Costs of Compliance

We estimate that this AD affects about 72 engines installed on airplanes of U.S. registry. We also estimate that it will take about 1 hour per engine to comply with this AD. The average labor rate is \$85 per hour. There are no required parts. Based on these figures, we estimate the cost of this AD on U.S. operators to be \$6,120.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Is not a "significant rule" under the DOT Regulatory Policies and

Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2014-14-01 Rolls-Royce plc: Amendment 39-17895; Docket No. FAA-2013-0876; Directorate Identifier 2013-NE-27-AD.

(a) Effective Date

This AD becomes effective August 15, 2014.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Rolls-Royce plc (RR) RB211 Trent 768-60, 772-60, and 772B-60 turbofan engines prior to engine serial number 42066.

(d) Reason

This AD was prompted by an uncontained multiple turbine blade failure on an RR RB211 Trent 772B turbofan engine. We are issuing this AD to prevent failure of the intermediate-pressure turbine disc drive arm or burst of the high-pressure turbine disk, which could lead to uncontained engine failure and damage to the airplane.

(e) Actions and Compliance

After the effective date of this AD, at the next engine shop visit or by December 31, 2018, whichever occurs first, modify the engine by removing any electronic engine control (EEC) that incorporates EEC software standard A14 or earlier and installing an EEC eligible for installation.

(f) Installation Prohibition

After modification of an engine as required by paragraph (e) of this AD, do not install an EEC with software standard A14 or earlier into that engine.

(g) Definitions

(1) For the purpose of this AD, an “engine shop visit” is the induction of an engine into the shop for maintenance involving the separation of pairs of major mating engine flanges, except that the separation of engine flanges solely for the purposes of transportation without subsequent engine maintenance does not constitute an engine shop visit.

(2) For the purpose of this AD, an EEC “eligible for installation” is any EEC that does not contain software standard A14 or earlier.

(h) Credit for Previous Actions

If before the effective date of this AD you removed from an engine any EEC that had EEC software standard A14 or earlier and your engine no longer has an EEC with software standard A14 or earlier, you have met the requirements of this AD.

(i) Alternative Methods of Compliance (AMOCs)

The Manager, Engine Certification Office, FAA, may approve AMOCs to this AD. Use the procedures found in 14 CFR 39.19 to make your request.

(j) Related Information

(1) For more information about this AD, contact Kenneth Steeves, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; phone: (781) 238-7765; fax: (781) 238-7199; email: Kenneth.Steeves@faa.gov.

(2) Refer to MCAI European Aviation Safety Agency AD 2013-0190, dated August 20, 2013, for more information. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov/#!docketDetail;D=FAA-2013-0876>.

(3) RR Alert Service Bulletin No. RB.211-73-AG829, dated April 18, 2012, which is not incorporated by reference in this AD, can be obtained from Rolls-Royce plc, using the contact information in paragraph (j)(4) of this AD.

(4) For service information identified in this AD, contact Rolls-Royce plc, Corporate Communications, P.O. Box 31, Derby, England, DE248BJ; phone: 011-44-1332-242424; fax: 011-44-1332-249936; email: http://www.rolls-royce.com/contact/civil_team.jsp; or Web site: <https://www.aeromanager.com>.

(5) You may view this service information at the FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA. For information on the availability of this material at the FAA, call 781-238-7125.

(k) Material Incorporated by Reference

None.

Issued in Burlington, Massachusetts, on June 30, 2014.

Colleen M. D'Alessandro,

Assistant Directorate Manager, Engine & Propeller Directorate, Aircraft Certification Service.

RIN 2120-AA64

Airworthiness Directives; Pratt & Whitney Canada Corp. Turboprop Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Pratt & Whitney Canada Corp. (P&WC) PW120, PW121, PW121A, PW124B, PW127, PW127E, PW127F, PW127G, and PW127M turboprop engines. This AD requires removal of the O-ring seal from the fuel manifold fitting. This AD was prompted by reports of fuel leaks at the interface between the fuel manifold and the fuel nozzle that resulted in engine fire. We are issuing this AD to prevent in-flight fuel leakage, which could lead to engine fire, damage to the engine, and damage to the airplane.

DATES: This AD becomes effective August 15, 2014.

ADDRESSES: For service information identified in this AD, contact Pratt & Whitney Canada Corp., 1000 Marie-Victorin, Longueuil, Quebec, Canada, J4G 1A1; phone: 800-268-8000; fax: 450-647-2888; Web site: www.pwc.ca. You may view this service information at the FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA. SUPPLEMENTARY INFORMATION:**Discussion**

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to the specified products. The NPRM was published in the **Federal Register** on March 21, 2014 (79 FR 15707). The NPRM proposed to correct an unsafe condition for the specified products. The MCAI states:

There have been reported incidences of fuel leaks at the interface between the flexible fuel manifold and the fuel nozzle. On occasion, these events resulted in an engine fire on PW100 series engine installations. The data indicates that nearly all of the subject manifold fuel leaks were caused by inadequate B-nut torque application during installation, after maintenance work was performed on the fuel nozzle/manifold.

Sealing of the fitting connections between the fuel manifolds and the fuel nozzle adapters is achieved through conical metal-to-metal surface seating. An additional O-ring seal on the fitting was installed to arrest any fuel leak past the conical sealing surfaces. In-service experience has indicated that leakage past the sealing surfaces, as a result of improper torquing during installation of the manifold, may not be immediately evident until the failure of the O-ring seal allows the fuel to leak into the nacelle area.

Comments

We gave the public the opportunity to participate in developing this AD. We considered the comment received.

Request To Mandate Incorporation of Service Bulletins

UTair Aviation JSC requested that we mandate incorporation of P&WC Service Bulletins (SBs) PW100-72-21841, Revision No. 1, dated November 29, 2013; and PW100-72-21848, Revision No. 1, dated November 15, 2013, in the AD. The commenter suggested that incorporation by reference of these SBs would improve safety compared to the compliance proposed in the NPRM (79 FR 15707, March 21, 2014).

We disagree. We note that prior to implementation of these SBs, an operator would need to remove the affected O-ring seals, which would fulfill the requirements of this AD. We do not find that requiring accomplishing these service bulletins through incorporation by reference in this AD is necessary. We did not change this AD.

Conclusion

We reviewed the available data, including the comment received, and determined that air safety and the public interest require adopting the AD as proposed.

Costs of Compliance

We estimate that this AD affects about 150 engines installed on airplanes of U.S. registry. We also estimate that it would take about 2.5 hours per engine to perform the inspection or replacement required by this AD. The average labor rate is \$85 per hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be \$31,875.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction, and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2014-14-02 Pratt & Whitney Canada Corp.:
Amendment 39-17896; Docket No. FAA-2013-1059; Directorate Identifier 2013-NE-36-AD.

(a) Effective Date

This AD becomes effective August 15, 2014.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Pratt & Whitney Canada Corp. (P&WC) PW120, PW121, and PW121A turboprop engines with Post SB21610 configuration; PW124B, PW127, PW127E, and PW127F turboprop engines with either Post SB21607 or Post SB21705 configuration, or both; and PW127G and PW127M turboprop engines.

(d) Reason

This AD was prompted by reports of fuel leaks at the interface between the fuel manifold and the fuel nozzle that resulted in engine fire. We are issuing this AD to prevent in-flight fuel leakage, which could lead to engine fire, damage to the engine, and damage to the airplane.

(e) Actions and Compliance

Unless already done, during the next opportunity when the affected subassembly is accessible, but no later than 18 months after the effective date of this AD, remove the O-ring seal from the fuel manifold fitting.

(f) Alternative Methods of Compliance (AMOCs)

The Manager, Engine Certification Office, FAA, may approve AMOCs to this AD. Use the procedures found in 14 CFR 39.19 to make your request.

(g) Related Information

(1) For more information about this AD, contact Kevin Dickert, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; phone: (781) 238-7117; fax: (781) 238-7199; email: kevin.dickert@faa.gov.

(2) Refer to MCAI Transport Canada AD CF-2013-29, dated October 4, 2013, for related information. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating it in Docket No. FAA-2013-1059.

(3) P&WC Service Bulletin PW100-72-21803, Revision No. 4, dated February 8, 2012, which is not incorporated by reference in this AD, can be obtained from Pratt & Whitney Canada, using the contact information in paragraph (g)(4) of this AD.

(4) For service information identified in this AD, contact Pratt & Whitney Canada Corp., 1000 Marie-Victorin Blvd., Longueuil, Quebec, Canada, J4G 1A1; phone: 800-268-8000; fax: 450-647-2888; Web site: www.pwc.ca.

(5) You may view this service information at the FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA. For information on the availability of this material at the FAA, call 781-238-7125.

(h) Material Incorporated by Reference

None.

Issued in Burlington, Massachusetts, on June 30, 2014.

Colleen M. D'Alessandro,

Assistant Directorate Manager, Engine & Propeller Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2013-0939; Directorate Identifier 2013-CE-043-AD; Amendment 39-17881; AD 2013-22-23 R1]

RIN 2120-AA64

Airworthiness Directives; AERMACCHI S.p.A. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are rescinding Airworthiness Directive (AD) 2013-22-23 for AERMACCHI S.p.A. Models F.260, F.260B, F.260C, F.260D, F.260E, F.260F, S.208, and S.208A airplanes equipped with a Lycoming O-540, IO-540, or AEIO-540 (depending on the airplane model) wide cylinder flange engine with a front crankcase mounted propeller governor. AD 2013-22-23 resulted from mandatory continuing airworthiness information (MCAI) issued by the aviation authority of another country to identify and correct an unsafe condition on an aviation product. We issued the AD to detect and

correct improper position of the set screw, which could lead to complete loss of engine oil pressure and result in emergency landing. Since we issued AD 2013–22–23, we have determined the unsafe condition does not exist specific to the airplane design features.

DATES: This AD is effective July 11, 2014. We must receive comments on this AD by August 25, 2014.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2013–0939; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Mike Kiesov, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4144; fax: (816) 329–4090; email: mike.kiesov@faa.gov.

SUPPLEMENTARY INFORMATION:

Discussion

On October 31, 2013, we issued AD 2013–22–23, Amendment 39–17655 (78 FR 68357; November 14, 2013). That AD required actions intended to address an unsafe condition on AERMACCHI S.p.A. Models F.260, F.260B, F.260C, F.260D, F.260E, F.260F, S.208, and S.208A airplanes equipped with a Lycoming O–540, IO–540, or AEIO–540 (depending on the airplane configuration) wide cylinder flange

engine with a front crankcase mounted propeller.

AD 2013–22–23 (78 FR 68357; November 14, 2013) was based on mandatory continuing airworthiness action (MCAA) by the State of Design of these products. The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued EASA AD No.: 2012–0228R1, dated November 13, 2012, to address the above situation. You may examine the MCAI on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2013–0939.

Since we issued AD 2013–22–23 (78 FR 68357; November 14, 2013), we determined the unsafe condition does not exist specific to the airplane design features. We will evaluate this condition at the engine level, and we may take rulemaking action in the future.

FAA’s Determination

We are issuing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is specific to the engine design feature rather than the specific airplane design feature. We will evaluate this condition further and may take rulemaking action in the future.

AD Requirements

This AD rescinds AD 2013–22–23, Amendment 39–17655 (78 FR 68357; November 14, 2013).

FAA’s Determination of the Effective Date

Since we issued AD 2013–22–23 (78 FR 68357; November 14, 2013), we determined the unsafe condition does not exist specific to the airplane design features. We will evaluate this condition at the engine level, and we may take rulemaking action in the future. Therefore, we find that notice and opportunity to comment prior to adoption of this rule are unnecessary and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this is a final rule that was not preceded by notice and an opportunity for public comment, we invite you to send any written data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include the docket number FAA–2013–0939 and Directorate Identifier 2013–CE–043–AD at the beginning of your comments. We specifically invite comments on the overall regulatory,

economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD because of those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. “Subtitle VII: Aviation Programs” describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: “General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2013–22–23, Amendment 39–17655 (78 FR 68357; November 14, 2013) and adding the following new AD:

2013–22–23 R1 AERMACCHI S.p.A.:
Amendment 39–17881; Docket No. FAA–2013–0939; Directorate Identifier 2013–CE–043–AD.

(a) Effective Date

This AD is effective July 11, 2014.

(b) Affected ADs

This AD rescinds AD 2013–22–23, Amendment 39–17655 (78 FR 68357; November 14, 2013).

(c) Applicability

This AD applies to the following AERMACCHI S.p.A. airplanes that are certificated in any category:

(1) Models F.260, F.260B, F.260C, F.260D, F.260E, and F.260F airplanes, all serial numbers, that are equipped with either a Lycoming O–540, IO–540, or AEIO–540 wide cylinder flange engine (identified by the suffix “A” or “E” in the serial number) with a front crankcase mounted propeller governor; and

(2) Models S.208 and S.208A airplanes, all serial numbers, that are equipped with a Lycoming O–540 wide cylinder flange engine (identified by the suffix “A” or “E” in the serial number) with a front crankcase mounted propeller governor.

(d) Subject

Joint Aircraft System Component (JASC)/ Air Transport Association (ATA) of America Code 71: Powerplant.

Issued in Kansas City, Missouri, on June 19, 2014.

Timothy Smyth,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

Airworthiness Directives; Honeywell International Inc. (Type Certificate Previously Held by AlliedSignal Inc., Garrett Turbine Engine Company) Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are superseding emergency airworthiness directive (AD) 2014–12–52 for all Honeywell International Inc. TFE731–4, –4R, –5AR, –5BR, –5R, –20R, –20AR, –20BR, –40, –40AR, –40R, –40BR, –50R, and –60 turbofan engines. Emergency AD 2014–12–52 was sent previously to all known U.S. owners and operators of these engines. AD 2014–12–52 required, before further flight, a review of the engine logbook maintenance records to determine if any affected engines are installed. AD 2014–12–52 also prohibited operation of an airplane with two or more affected engines that have 2nd stage low-pressure turbine (LPT2) blades with less than 250 operating hours since new. This AD retains the requirements of AD 2014–12–52 and clarifies the intent of the mandatory requirements. This AD was prompted by reports of LPT2 blade separations. We are issuing this AD to prevent LPT2 blade failure, multiple engine in-flight shutdowns, and damage to the airplane.

DATES: This AD is effective July 28, 2014.

We must receive comments on this AD by August 25, 2014.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* 202–493–2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this AD, contact Honeywell International Inc., 111 S. 34th Street, Phoenix, AZ 85034–2802; phone: (800) 601–3099; Internet: <http://www.myaerospace.com>. You may view this service information at the FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA. For information on the availability of this material at the FAA, call (781) 238–7125.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2014–0386; or in person at the Docket Operations Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT:

Joseph Costa, Aerospace Engineer, Los Angeles Aircraft Certification Office, FAA, Transport Airplane Directorate, 3960 Paramount Blvd., Lakewood, CA 90712–4137; phone: 562–627–5246; fax: 562–627–5210; email: joseph.costa@faa.gov.

SUPPLEMENTARY INFORMATION:**Discussion**

On June 10, 2014, we issued Emergency AD 2014–12–52, which requires, before further flight, a review of the engine logbook maintenance records to determine if any affected engines are installed. Emergency AD 2014–12–52 also required for two-engine airplanes or for three-engine airplanes, that have two or more engines installed with LPT2 blades installed that have less than 250 operating hours since new, remove all affected engines before further flight. Emergency AD 2014–12–52 was sent previously to all known U.S. owners and operators of these TFE731–4, –4R, –5AR, –5BR, –5R, –20R, –20AR, –20BR, –40, –40AR, –40R, –40BR, –50R, and –60 turbofan engines. This action was prompted by reports of LPT2 blade separations. Analysis indicates the presence of casting anomalies at or near the root of the LPT2 blade. This condition, if not corrected, could result in LPT2 blade failure, multiple engine in-flight shutdowns, and damage to the airplane. We are superseding Emergency AD

2014–12–52 to clarify the intent of paragraphs (e) and (f) of this AD.

Relevant Service Information

We reviewed Honeywell Alert Service Bulletin (ASB) No. TFE731–72–A3792, dated June 5, 2014; ASB No. TFE731–72–A5242, dated June 5, 2014; and ASB No. TFE731–72–A5243, dated June 5, 2014. The service information describes procedures for identifying affected engines and follow-on actions.

FAA's Determination

We are issuing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

AD Requirements

This AD requires, before further flight, a review of the engine logbook maintenance records to determine if any affected engines are installed. If any affected engines are installed, then this AD prohibits operation of an airplane with two or more affected engines that have LPT2 blades with less than 250 operating hours since new.

Differences Between This AD and the Service Information

Paragraphs (e)(2) and (e)(3) of this AD require that certain affected engines be removed before further flight. Honeywell ASB No. TFE731–72–A3792, dated June 5, 2014; ASB No. TFE731–72–A5242, dated June 5, 2014; and ASB No. TFE731–72–A5243, dated June 5, 2014, for airplanes having only one affected engine installed, require no action at this time and may continue operation.

Interim Action

We consider this AD to be an interim action. We anticipate that further AD action will follow.

FAA's Determination of the Effective Date

An unsafe condition exists that requires the immediate adoption of this AD. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to adoption of this rule because of compliance requirement before further flight. Therefore, we find that notice and opportunity for prior public comment are impracticable and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety and

was not preceded by notice and an opportunity for public comment. However, we invite you to send any written data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA–2014–0386; Directorate Identifier 2014–NE–09–AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD because of those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Costs of Compliance

We estimate that this AD affects 50 engines installed on airplanes of U.S. registry. We also estimate that it will take about 18 hours per engine to comply with this AD. The average labor rate is \$85 per hour. Required parts cost about \$0 per engine. Based on these figures, we estimate the cost of this AD on U.S. operators to be \$76,500.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and

responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction, and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2014–12–52 Honeywell International Inc. (Type Certificate previously held by AlliedSignal Inc., Garrett Turbine Engine Company): Amendment 39–17897; Docket No. FAA–2014–0386; Directorate Identifier 2014–NE–09–AD.

(a) Effective Date

This AD is effective July 28, 2014.

(b) Affected ADs

This AD supersedes Emergency AD 2014–12–52, Directorate Identifier 2014–NE–09–AD, dated June 10, 2014.

(c) Applicability

This AD applies to all Honeywell International Inc. TFE731–4, –4R, –5AR, –5BR, –5R, –20R, –20AR, –20BR, –40, –40AR, –40R, –40BR, –50R, and –60 turbofan engines with 2nd stage low-pressure turbine (LPT2) blades, part number (P/N) 3075424–1, –2, or –3, installed.

(d) Unsafe Condition

This AD was prompted by reports of LPT2 blade separations. Analysis indicates the presence of casting anomalies at or near the root of the LPT2 blade. We are issuing this AD to prevent LPT2 blade failure, multiple engine in-flight shutdowns, and damage to the airplane.

(e) Compliance

Comply with this AD within the compliance times specified, unless already done.

(1) Before further flight, review engine logbook maintenance records to determine if any engine is installed that has LPT2 blade, P/N 3075424-1, -2, or -3, installed with less than 250 operating hours since new on the blade.

(2) For two-engine airplanes that have two engines with LPT2 blades installed that have less than 250 operating hours since new, remove all affected engines before further flight.

(3) For three-engine airplanes that have two or more engines with LPT2 blades installed that have less than 250 operating hours since new, remove all affected engines before further flight.

(4) After the effective date of this AD, do not install any engine that has installed in it LPT2 blades, P/N 3075424-1, -2, or -3, that have less than 250 operating hours since new.

(f) Special Flight Permit

Special flight permits are permitted for one over-land ferry flight to a maintenance facility where engines can be removed.

(g) Alternative Methods of Compliance (AMOCs)

The Manager, Los Angeles Aircraft Certification Office, FAA, may approve AMOCs for this AD. Use the procedures found in 14 CFR 39.19 to make your request.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 97**

[Docket No. 30964; Amdt. No. 3596]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective July 11, 2014. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of July 11, 2014.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located;

3. The National Flight Procedures Office, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

*Availability—*All SIAPs are available online free of charge. Visit nfdc.faa.gov to register. Additionally, individual

SIAP and Takeoff Minimums and ODP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT:

Richard A. Dunham III, Flight Procedure Standards Branch (AFS-420) Flight Technologies and Programs Division, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) telephone: (405) 954-4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) by amending the referenced SIAPs. The complete regulatory description of each SIAP is listed on the appropriate FAA Form 8260, as modified by the National Flight Data Center (FDC)/Permanent Notice to Airmen (P-NOTAM), and is incorporated by reference in the amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of Title 14 of the Code of Federal Regulations.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAP and the corresponding effective dates. This amendment also identifies the airport and its location, the procedure and the amendment number.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP as amended in the transmittal. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained for each SIAP as modified by FDC/P-NOTAMs.

The SIAPs, as modified by FDC P-NOTAM, and contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures

(TERPS). In developing these changes to SIAPs, the TERPS criteria were applied only to specific conditions existing at the affected airports. All SIAP amendments in this rule have been previously issued by the FAA in a FDC NOTAM as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for all these SIAP amendments requires making them effective in less than 30 days.

Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are impracticable and contrary to the public interest and, where applicable, that good cause exists for making these SIAPs effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are

necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air Traffic Control, Airports, Incorporation by reference, and Navigation (Air).

Issued in Washington, DC, on June 6, 2014.

John Duncan,
Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal regulations, Part 97, 14

CFR part 97, is amended by amending Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

■ 2. Part 97 is amended to read as follows:

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, Identified as follows:

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 30963 Amdt. No. 3595]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures for operations at certain airports. These regulatory actions are needed because of the adoption of new

or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective July 11, 2014. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of July 11, 2014.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located;

3. The National Flight Procedures Office, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

Availability—All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit <http://www.nfdc.faa.gov> to register.

Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800

Independence Avenue SW.,
Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT:

Richard A. Dunham III, Flight Procedure Standards Branch (AFS-420), Flight Technologies and Programs Divisions, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd. Oklahoma City, OK. 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) Telephone: (405) 954-4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14 of the Code of Federal Regulations, Part 97 (14 CFR part 97), by establishing, amending, suspending, or revoking SIAPS, Takeoff Minimums and/or ODPS. The complete regulators description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR 97.20. The applicable FAA Forms are FAA Forms 8260-3, 8260-4, 8260-5, 8260-15A, and 8260-15B when required by an entry on 8260-15A.

The large number of SIAPs, Takeoff Minimums and ODPs, in addition to their complex nature and the need for a special format make publication in the **Federal Register** expensive and impractical. Furthermore, airmen do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their depiction on charts printed by publishers of aeronautical materials. The advantages of incorporation by reference are realized and publication of the complete description of each SIAP, Takeoff Minimums and ODP listed on FAA forms is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAPs and the effective dates of the, associated Takeoff Minimums and ODPs. This amendment also identifies the airport and its location, the procedure, and the amendment number.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as contained in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which

created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPS and Takeoff Minimums and ODPS, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPS contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPS and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedures before adopting these SIAPS, Takeoff Minimums and ODPs are impracticable and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR part 97

Air Traffic Control, Airports, Incorporation by reference, and Navigation (Air).

Issued in Washington, DC, on June 6, 2014.

John Duncan,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures and/or Takeoff Minimums and/or Obstacle Departure Procedures

effective at 0902 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

BILLING CODE 4910-13-P

DEPARTMENT OF STATE

22 CFR Part 34

[Public Notice: 8791]

RIN 1400-AD60

Debt Collection

AGENCY: Department of State.

ACTION: Final rule; correction.

SUMMARY: The Department of State (hereinafter, “State” or “the Department”) is publishing a correction to a final rule that amended State’s debt collection regulations.

DATES: This rule will become effective on July 11, 2014.

FOR FURTHER INFORMATION CONTACT: Alice Kottmyer, Office of the Legal Adviser, United States Department of State; phone: (202) 647-2199; email: KottmyerAM@state.gov.

SUPPLEMENTARY INFORMATION: As part of the June 20, 2014 *Federal Register* (79 FR 35282) final rule amendatory text, the Department erroneously removed “22 CFR 34.7(a)(7)”, which does not exist. The Department’s intent, however, was to remove 22 CFR 34.10(a)(7), for the reasons explained in the prior document. This document corrects that error.

List of Subjects in 22 CFR Part 34

Administrative practice and procedure, Claims, Debts, Garnishment of wages, Government employee, Hearing and appeal procedures, Pay administration, Salaries, Wages.

For the reasons stated in the preamble, 22 CFR part 34 is amended as follows:

PART 34—DEBT COLLECTION

■ 1. The authority citation for part 34 continues to read as follows:

Authority: 31 U.S.C. 3701-3719; 5 U.S.C. 5514; 31 CFR part 285; 31 CFR parts 900-904; 5 CFR part 550, subpart K.

§ 34.10 [Amended]

■ 2. Remove paragraph (a)(7) from § 34.10.

Dated: July 3, 2014.

Janet M. Freer,

Director, Office of Directives Management, Department of State.

Coast Guard

33 CFR Part 100

[USCG-2014-0277]

RIN 1625-AA08

Special Local Regulation, Tennessee River, Mile 256.0 to 257.5; Florence, TN

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary special local regulation for the waters of the Tennessee River beginning at mile marker 256.0 and ending at mile marker 257.5, extending bank to bank. This zone is necessary to protect participants of the Renaissance Man Triathlon during the swim portion of the event. Entry into this area is prohibited unless specifically authorized by the Captain of the Port (COTP) Ohio Valley or designated representative.

DATES: This rule is effective from 5:00 a.m. to 10:30 a.m. July 13, 2014.

ADDRESSES: Documents mentioned in this preamble are part of docket [USCG-2014-0277]. To view documents mentioned in this preamble as being available in the docket, go to <http://www.regulations.gov>, type the docket number in the “SEARCH” box and click “SEARCH.” Click on Open Docket Folder on the line associated with this rulemaking. You may also visit the Docket Management Facility in Room W12-140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary rule, call Petty Officer Chad Phillips, Marine Safety Detachment Nashville, at (615) 736-5421 or email at chad.e.phillips@uscg.mil. If you have questions on viewing or submitting material to the docket, call Cheryl Collins, Program Manager, Docket Operations, telephone (202) 366-9826.

A. Regulatory History and Information

The Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under 5 U.S.C. 553(b)(3)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule. The Coast Guard received notice on April 7, 2014 that the Renaissance Man Triathlon is planned to take place on July 13, 2014. The swimming portion of this event will take place on the Tennessee River from mile 256.0 to mile 257.5. Upon reviewing the details of this event, the Coast Guard determined that a special local regulation is necessary during the event’s swimming portion, taking place on the Tennessee River. Completing the full NPRM process is contrary to the public interest as it would delay the additional safety measures necessary to protect participants and event personnel

from the possible marine hazards present during the swimming portion of this event. The event has been advertised and is planned by the local community. Delaying the special local regulation would also unnecessarily interfere with the planned event and with the potential to affect contractual obligations of the event sponsors.

For the same reasons, under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Providing a full 30 days' notice and delaying the effective date for this special local regulation would be impracticable because immediate action is necessary to protect event participants from the possible marine hazards present during this swimming event.

B. Basis and Purpose

The swim portion of the Renaissance Man Triathlon takes place on the Tennessee River from mile markers 256.0 to 257.5. The Coast Guard determined that a temporary special local regulation is needed to protect the 300 participants in the Renaissance Man Triathlon during the swimming portion. The legal basis and authorities for this rulemaking establishing a special local regulation are found in 33 U.S.C. 1233, which authorizes the Coast Guard to establish and define special local regulations. The COTP Ohio Valley is establishing a special local regulation for the waters of the Tennessee River, beginning at mile marker 256.0 and ending at 257.5 to protect the participants in the swimming portion of the Renaissance Man Triathlon. Entry into this area is prohibited unless specifically authorized by the COTP Ohio Valley or designated representative.

C. Discussion of the Final Rule

The COTP Ohio Valley is establishing a special local regulation for the waters of the Tennessee River, beginning at mile marker 256.0 and ending at 257.5, during the swimming portion of the Renaissance Man Triathlon. During this event, vessels shall not enter into, depart from, or move within the regulated area without permission from the COTP Ohio Valley or his authorized representative. Persons or vessels requiring entry into or passage through the regulated area must request permission from the COTP Ohio Valley, or a designated representative. Sector Ohio Valley may be contacted on VHF-FM Channel 13 or 16, or 1-800-253-7465. This rule is effective from 5:00 a.m. to 10:30 a.m. July 13, 2014. The

COTP Ohio Valley will inform the public through Broadcast Notices to Mariners (BNM) of the enforcement period for the special local regulation as well as any changes in the planned schedule.

D. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes or executive orders.

1. Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of Executive Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under that Order.

This special local regulation restricts transit on the Tennessee River from mile marker 256.0 through 257.5 and covers a period of five and one half hours, from 5:00 a.m. to 10:30 a.m. on July 13, 2014. Due to its short duration and limited scope, it does not pose a significant regulatory impact. BNMs will also inform the community of this special local regulation so that they may plan accordingly for this short restriction on transit. Vessel traffic may request permission from the COTP Ohio Valley or a designated representative to enter the restricted area or deviated from this regulation. Requests to deviate from this regulation will be considered on a case-by-case basis.

2. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601-612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

This rule will affect the following entities, some of which may be small entities: The owners or operators of vessels intending to transit mile marker 256.0 to 257.5 on the Tennessee River, from 5:00 a.m. to 10:30 a.m. on July 13, 2014. The special local regulation will not have a significant economic impact on a substantial number of small entities because this rule will be in effect for a short period of time. BNMs will also

inform the community of this special local regulation so that they may plan accordingly for this short restriction on transit. Vessel traffic may request permission from the COTP Ohio Valley or a designated representative to enter the restricted area.

3. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104-121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1-888-REG-FAIR (1-888-734-3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

4. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520).

5. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and determined that this rule does not have implications for federalism.

6. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

7. *Unfunded Mandates Reform Act*

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. *Taking of Private Property*

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. *Civil Justice Reform*

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. *Protection of Children*

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

11. *Indian Tribal Governments*

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. *Energy Effects*

This action is not a “significant energy action” under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. *Technical Standards*

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. *Environment*

We have analyzed this rule under Department of Homeland Security

Management Directive 023–01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule is categorically excluded, under figure 2–1, paragraph (34)(h), of the Instruction. This rule involves establishing a temporary special local regulation to protect the participants in the swimming portion of the Renaissance Man Triathlon on the Tennessee River from mile markers 256.0 to 257.5 for five and one half hour period on one day.

An environmental analysis was performed during the marine event permit process for the swimming event and a checklist and a categorical exclusion determination are not required for this special local regulation.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the U.S. Coast Guard amends 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

■ 1. The authority citation for Part 100 continues to read as follows:

Authority: 33 U.S.C. 1233.

■ 2. A new temporary § 100.T08–0277 is added to read as follows:

§ 100.T08–0277 *Special Local Regulation; Tennessee River, Miles 256.0 to 257.5, Florence, TN.*

(a) *Location.* The following area is a regulated area: All waters of the Tennessee River, beginning at mile marker 256.0 and ending at mile marker 257.5.

(b) *Effective date.* This section is effective from 5:00 a.m. to 10:30 a.m. on July 13, 2014.

(c) *Regulations.* (1) In accordance with the general regulations in § 100.35 of this part, entry into this area is prohibited unless authorized by the Captain of the Port Ohio Valley or a designated representative.

(2) Persons or vessels requiring entry into or passage through the area must request permission from the Captain of the Port Ohio Valley or a designated representative. U.S. Coast Guard Sector Ohio Valley may be contacted on VHF Channel 13 or 16, or at 1–800–253–7465.

(3) All persons and vessels shall comply with the instructions of the Captain of the Port Ohio Valley and designated U.S. Coast Guard patrol personnel. On-scene U.S. Coast Guard patrol personnel include commissioned, warrant, and petty officers of the U.S. Coast Guard.

(d) *Informational broadcasts.* The Captain of the Port Ohio Valley or a designated representative will inform the public through broadcast notice to mariners when the special local regulation is being enforced and if there are changes to the planned schedule and enforcement period for this special local regulation.

Dated: June 18, 2014.

R. V. Timme,

Captain, U.S. Coast Guard, Captain of the Port Ohio Valley.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2014–0331]

RIN 1625–AA08

Eighth Coast Guard District Annual Special Local Regulation; Music City Triathlon; Cumberland River 190.0–192.0; Nashville, TN

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce a Special Local Regulation for the “Music City Triathlon” on the Cumberland River mile marker 190.0 to mile marker 192.0 from 6:00 a.m. until 9:30 a.m. on July 27, 2014. This action is necessary for the safeguard of participants and spectators, including all crews, vessels, and persons on navigable waters during the “Music City Triathlon.” During the enforcement period, entry into, transiting or anchoring in the Regulated Area is prohibited to all vessels not registered with the sponsor as participants or official patrol vessels, unless specifically authorized by the Captain of the Port (COTP) Ohio Valley or a designated representative.

DATES: The regulations in 33 CFR 100.801 will be enforced from 6:00 a.m. until 9:30 a.m. on July 27, 2014.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice of enforcement, call Petty Officer Chad

Phillips, Coast Guard Marine Safety Detachment Nashville at 615-736-5421, or *Chad.e.phillips@uscg.mil*.

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the Special Local Regulation for the annual "Music City Triathlon" listed in 33 CFR 100.801 Table 1, Sector Ohio Valley, No. 16 on July 27, 2014 from 6:00 a.m. until 9:30 a.m.

Under the provisions of 33 CFR 100.801, entry into the regulated area listed in Table 1, Sector Ohio Valley, No. 16 is prohibited unless authorized by the Captain of the Port or a designated representative. Persons or vessels desiring to enter into or passage through the Special Local Regulation must request permission from the Captain of the Port or a designated representative. If permission is granted, all persons and vessels shall comply with the instructions of the Captain of the Port or designated representative.

This notice is issued under authority of 5 U.S.C. 552(a), and 33 U.S.C. 1233. In addition to this notice in the **Federal Register**, the Coast Guard will provide the maritime community with advance notification of this enforcement period via Local Notice to Mariners and Marine Information Broadcasts.

If the Captain of the Port Ohio Valley or Patrol Commander determines that the Special Local Regulation need not be enforced for the full duration stated in this notice of enforcement, he or she may use a Broadcast Notice to Mariners to grant general permission to enter the regulated area.

Dated: June 6, 2014.

R. V. Timme,
Captain, U.S. Coast Guard, Captain of the Port Ohio Valley.

[FR Doc. 2014-16157 Filed 7-10-14; 8:45 am]

BILLING CODE 9110-04-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG-2014-0525]

Drawbridge Operation Regulation; Lake Washington Ship Canal, Seattle, WA

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the University Bridge, mile 4.3, across Lake

Washington Ship Canal at Seattle, WA. The deviation is necessary to allow King County Metro Transit to perform essential maintenance on the University Bridge. This deviation allows the bridges to remain in the closed position and need not open to marine traffic.

DATES: This deviation is effective from 10 p.m. on July 11, 2014 to 8 a.m. on July 20, 2014.

ADDRESSES: The docket for this deviation, [USCG-2014-0525] is available at <http://www.regulations.gov>. Type the docket number in the "SEARCH" box and click "SEARCH." Click on Open Docket Folder on the line associated with this deviation. You may also visit the Docket Management Facility in Room W12-140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Mr. Steven Fischer, Bridge Administrator, Thirteenth Coast Guard District; telephone 206-220-7282, email *Steven.M.Fischer3@uscg.mil*. If you have questions on viewing the docket, call Cheryl Collins, Program Manager, Docket Operations, telephone 202-366-9826.

SUPPLEMENTARY INFORMATION: The Seattle Department of Transportation has requested a temporary deviation from the operating schedule for the University Bridge, mile 4.3, across the Lake Washington Ship Canal at Seattle, WA. The requested deviation is to allow King County Metro Transit to perform essential maintenance on the University Bridge. The plan is to re-cable all the metro trolley lines on the bridge. To facilitate this maintenance period, the draws of the bridge will be maintained in the closed-to-navigation position on July 11th, 12th, and 13th, 2014 from 10 p.m. to 8 a.m. the following morning, then again on the 18th, 19th, and 20th, 2014 from 10 p.m. to 8 a.m. the following morning. Vessels which do not require bridge openings may continue to transit beneath the bridge during the closure periods. The University Bridge, mile 4.3, provides a vertical clearance of 30 feet in the closed position; clearances are referenced to the mean water elevation of Lake Washington. The current operating schedule for the bridge is set out in 33 CFR 117.1051. The normal operating schedule for the University Bridge states that the bridge need not open from 7 a.m. to 9 a.m. and from 4

p.m. to 6 p.m. Monday through Friday for vessels less than 1000 tons. The normal operating schedule for the bridge also requires one hour advance notification for bridge openings between 11 p.m. and 7 a.m. daily. Waterway usage on the Lake Washington Ship Canal ranges from commercial tug and barge to small pleasure craft. Vessels able to pass through the bridge in the closed positions may do so at anytime. The bridge will not be able to open for emergencies and there is no immediate alternate route for vessels to pass. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessels can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the designated time period. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: June 25, 2014.

Steven M. Fischer,
Bridge Administrator, Thirteenth Coast Guard District.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 168

[EPA-HQ-OPP-2009-0607; FRL-9913-18]

RIN 2070-AJ53

Withdrawal of Labeling of Pesticide Products and Devices for Export

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of direct final rule.

SUMMARY: In the **Federal Register** of April 30, 2014, EPA published a direct final rule amending the regulations that pertain to the labeling of pesticide products and devices intended solely for export. In accordance with the procedures described in the April 30, 2014 **Federal Register** document, EPA is withdrawing the direct final rule, because the Agency received adverse comments.

DATES: Effective July 11, 2014 the rule published in the **Federal Register** of April 30, 2014 (79 FR 24347) (FRL-9909-82) is withdrawn.

FOR FURTHER INFORMATION CONTACT: Kathryn Boyle, Field and External Affairs Division (7506P), Office of

Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (703) 305-6304; email address: boyle.kathryn@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Does this action apply to me?

A list of potentially affected entities is provided in the April 30, 2014 **Federal Register** document. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

II. What rule is being withdrawn?

In the April 30, 2014 **Federal Register** document, EPA amended the labeling regulations for pesticide products and devices intended solely for export to allow placement of required information on collateral labeling attached to a shipping container of such products rather than on the label of each individual product in such a shipment by direct final rule. In accordance with the procedures described in the April 30, 2014 **Federal Register** document, EPA is withdrawing the direct final rule, because the Agency received adverse comments, copies of which are available in the docket. Elsewhere in this **Federal Register**, EPA is proposing a rule to seek public comment on the labeling regulations and the issues raised by the adverse comments received.

III. How do I access the docket?

To access the docket, please go to <http://www.regulations.gov> and follow the online instructions using the docket ID number EPA-HQ-OPP-2009-0607. Additional information about the Docket Facility is also provided under **ADDRESSES** in the April 30, 2014 **Federal Register** document. If you have questions, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

IV. Good Cause Finding

EPA finds that there is “good cause” under the Administrative Procedure Act (APA) (5 U.S.C. 553(b)(3)(B)) to withdraw the rule discussed in this document without prior notice and comment. For this document, notice and comment is impracticable and unnecessary because EPA is under a time limit to publish this withdrawal. It was determined that this document is not subject to the 30-day delay of effective date generally required by 5 U.S.C. 553(d). This withdrawal must become effective prior to the effective date of the rule being withdrawn.

V. Statutory and Executive Order Reviews

This document withdraws regulatory requirements that have not gone into effect. As such, the Agency has determined that this withdrawal will not have any adverse impacts, economic or otherwise. The statutory and Executive Order review requirements applicable to the rule being withdrawn were discussed in the April 30, 2014 **Federal Register** document. Those review requirements do not apply to this action because it is a withdrawal and does not contain any new or amended requirements.

VI. Congressional Review Act (CRA)

Pursuant to the CRA (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2). Section 808 of the CRA allows the issuing agency to make a rule effective sooner than otherwise provided by CRA if the agency makes a good cause finding that notice and public procedure is impracticable, unnecessary, or contrary to the public interest. As required by 5 U.S.C. 808(2), this determination is supported by a brief statement in Unit IV.

List of Subjects in 40 CFR Part 168

Environmental protection, Administrative practice and procedure, Advertising, Labeling, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: July 3, 2014.

James Jones,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 2

[ET Docket Nos. 10-236 and 06-155; FCC 13-15]

Radio Experimentation and Market Trials—Streamlining Rules

AGENCY: Federal Communications Commission.

ACTION: Final rules; announcement of effective date.

SUMMARY: In this document, the Commission announces that the Office of Management and Budget (OMB) has approved, for a period of three years, the information collection requirements contained in the regulations in the Radio Experimentation and Market Trials—Streamlining Rules. The information collection requirements were approved on June 9, 2014 by OMB.

DATES: The amendments to 47 CFR 2.803(c)(2), published at 78 FR 25138, April 29, 2013, are effective July 11, 2014.

FOR FURTHER INFORMATION CONTACT: For additional information contact Nancy Brooks on (202) 418-2454 or via email to: Nancy.Brooks@fcc.gov.

SUPPLEMENTARY INFORMATION: This document announces that on June 9, 2014, OMB approved, for a period of three years, the information collection requirements contained in 47 CFR 2.803(c)(2). The Commission publishes this document to announce the effective date of this rule section. See, In the Matter of Promoting Expanded Opportunities for Radio Experimentation and Market Trials under Part 5 of the Commission’s Rules and Streamlining Other Related Rules, ET Docket No. 10-236; and 2006 Biennial Review of Telecommunications Regulations—Part 2 Administered by the Office of Engineering and Technology ET Docket Nos. 06-155, FCC 13-15, 78 FR 25138, April 29, 2013.

Synopsis

As required by the Paperwork Reduction Act of 1995, (44 U.S.C. 3507), the Commission is notifying the public that it received OMB approval on June 9, 2014, for the information collection requirement contained in 47 CFR 2.803(c)(2). Under 5 CFR 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a valid OMB Control Number.

The OMB Control Number is 3060-0773 and the total annual reporting burdens for respondents for this information collection are as follows:

OMB Control Number: 3060-0773.

OMB Approval Date: 6/9/2014.

OMB Expiration Date: 6/30/2017.

Title: Section 2.803 Marketing of RF Devices Prior to Equipment Authorization.

Form Number: Not applicable.

Type of Review: Revision of a currently approved collection.

Respondents: Businesses or other for-profit.

Number of Respondents: 10,000 respondents; 10,000 responses.

Estimated Time per Response: 0.5 hours.

Frequency of Response: One time reporting requirement and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 154(i), 302, 303, 303(r), and 307.

Total Annual Burden: 5,000 hours.

Total Annual Costs: N/A.

Nature and Extent of Confidentiality: There is no need for confidentiality.

Privacy Act Impact Assessment: N/A.

Needs and Uses: On January 31, 2013, the Commission adopted a Report and Order, ET Docket Nos. 10–236 and 06–155, FCC 13–15, which revised the rules in § 2.803(c)(2) to include limited marketing activities prior to equipment authorization.

The Commission has established rules for the marketing of radio frequency (RF) devices prior to equipment authorization under guidelines in 47 CFR 2.803. The general guidelines in § 2.803 prohibit the marketing or sale of such equipment prior to a demonstration of compliance with the applicable equipment authorization and technical requirements in the case of a device subject to verification or Declaration of Conformity without special notification. Section 2.803(c)(2) permits limited marketing activities prior to equipment authorization, for devices that could be authorized under the current rules; could be authorized under waivers of such rules that are in effect at the time of marketing; or could be authorized under rules that have been adopted by the Commission but that have not yet become effective. These devices may be not operated unless permitted by § 2.805.

The following general guidelines apply for third party notifications: (a) A RF device may be advertised and displayed at a trade show or exhibition prior to a demonstration of compliance with the applicable technical standards and compliance with the applicable equipment authorization procedure provided the advertising and display is accompanied by a conspicuous notice specified in §§ 2.803(c)(2)(iii)(A) or 2.803(c)(2)(iii)(B).

(b) An offer for sale solely to business, commercial, industrial, scientific, or medical users of an RF device in the conceptual, developmental, design or pre-production stage prior to demonstration of compliance with the equipment authorization regulations

may be permitted provided that the prospective buyer is advised in writing at the time of the offer for sale that the equipment is subject to FCC rules and that the equipment will comply with the appropriate rules before delivery to the buyer or centers of distribution.

(c) Equipment sold as evaluation kit may be sold to specific users with notice specified in § 2.803(c)(2)(iv)(B).

The information to be disclosed about marketing of the RF device is intended:

(1) To ensure the compliance of the proposed equipment with Commission rules; and

(2) To assist industry efforts to introduce new products to the marketplace more promptly.

The information disclosure applies to a variety of RF devices that:

(1) Is pending equipment authorization or verification of compliance;

(2) May be manufactured in the future;

(3) May be sold as kits; and

(4) Operates under varying technical standards.

The information disclosed is essential to ensuring that interference to radio communications is controlled.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order (*R&O*), WT Docket No. 12–269; Docket No. 12–268; FCC 14–63, adopted May 15, 2014 and released June 2, 2014. The full text of this document is available for inspection and copying during business hours in the FCC Reference Information Center, Portals II, 445 12th Street SW., Room CY–A257, Washington, DC 20554. Also, it may be purchased from the Commission's duplicating contractor at Portals II, 445 12th Street SW., Room CY–B402, Washington, DC 20554; the contractor's Web site, <http://www.bcpiweb.com>; or by calling (800) 378–3160, facsimile (202) 488–5563, or email FCC@BCPIWEB.com. Copies of the *R&O* also may be obtained via the Commission's Electronic Comment Filing System (ECFS) by entering the docket number WT Docket No. 12–269. Additionally, the complete item is available on the Federal Communications Commission's Web site at <http://www.fcc.gov>.

1. In the *R&O* the Commission updates its spectrum screen for its competitive review of proposed secondary market transactions to reflect current suitability and availability of spectrum for mobile wireless services. It adds to its spectrum screen: 40 megahertz of AWS–4; 10 megahertz of H Block; 65 megahertz of AWS–3 (when it becomes available on a market-by-market basis); 12 megahertz of BRS; 89 megahertz of EBS; and the total amount of 600 MHz spectrum auctioned in the Incentive Auction. It subtracts from its spectrum screen: 12.5 megahertz of SMR; and 10 megahertz that was the Upper 700 MHz D Block. The Commission establishes a market-based spectrum reserve of up to 30 megahertz in the Incentive Auction in each license area to ensure against excessive concentration in holdings of low-band spectrum and ensuring that all bidders bear a fair share of the cost of the Incentive Auction. It adopts limits on secondary market transactions of 600 MHz spectrum licenses for six years post-auction. It declines to adopt auction-specific limits for AWS–3. It treats certain further concentrations of below-1-GHz spectrum as an enhanced factor in its case-by-case analysis of the potential competitive harms posed by individual transactions.

I. Preserving and Promoting Competition in the Mobile Wireless Marketplace

2. The Commission has long recognized that “spectrum is an input in CMRS markets,” and that “the state of control over the spectrum input is a relevant factor” in its competitive analysis. Ensuring that sufficient spectrum is available for multiple existing mobile service providers as well as potential entrants is crucial to promoting consumer choice and competition throughout the country, including in rural areas, and is similarly crucial to fostering innovation in the marketplace. For these reasons, Congress directed the Commission to proactively “include safeguards to protect the public interest” when specifying the classes and characteristics of licenses and permits to be issued by competitive bidding, and to “promot[e] economic opportunity and competition and ensur[e] that new and innovative technologies are readily accessible to the American people by avoiding excessive concentration of licenses[.]” In order for there to be robust competition, multiple competing service providers must have access to or hold sufficient spectrum to be able to enter a marketplace or expand output rapidly in response to any price increase or reduction in quality, or other change that would harm consumer welfare. Consistent with the Commission’s statutory mandate, the fundamental goal that has guided its policies regarding mobile spectrum holdings has been the preservation and promotion of competition, which in turn, enables consumers to make choices among numerous service providers and leads to lower prices, improved quality, and increased innovation.

3. Since the Commission’s last comprehensive review of its mobile spectrum holdings policies more than a decade ago, the marketplace for mobile wireless services has evolved significantly—both in consumer demand for services and market structure—as has the role of low-band spectrum for coverage purposes and high-band spectrum for capacity purposes in the deployment of providers’ networks. As providers deploy next-generation mobile networks, the engineering properties and deployment capabilities of the mix of particular spectrum bands in providers’ holdings have become increasingly important, particularly as multi-band phones allow users to take advantage of the different properties of different spectrum bands. Moreover, while the mobile wireless marketplace a

decade ago consisted of six near-nationwide providers and a substantial number of regional and small providers, since then, there has been a significant degree of consolidation resulting in a market with four nationwide providers and a smaller number of regional and more local service providers.

4. Reflecting this evolution in the mobile wireless marketplace, the Commission, in recent years, has considered in more detail the technical distinctions among spectrum bands used to deploy next-generation mobile networks. The Commission adopted mobile spectrum holdings policies in this rulemaking that address how the differences among spectrum bands may affect its overall competitive analysis of spectrum acquisitions and therefore its decision making for both auctions and secondary market transactions.

5. In adopting these policies, the Commission is mindful that the statutory framework established by Congress for mobile wireless services and implemented by the Commission, with its reliance on competition as the primary driver of consumer benefits, has fostered substantial economic growth and consumer benefits for its nation. Among other goals, Congress has directed us as well to promote the “efficient and intensive use of the electromagnetic spectrum” and avoid an “excessive concentration of licenses” in the design of systems of competitive bidding, as well as to review transactions to ensure that they serve the public interest.

6. Consistent with the evolution of the marketplace and the Commission’s statutory directives and policy goals, and in light of the evolution of wireless services demanded by consumers, the Commission must ensure that multiple service providers have access to spectrum in the foreseeable future. Existing marketplace conditions, including concerns about the potential for anticompetitive behavior, inform its predictive judgment but are not determinative as to whether the Commission needs to act. The mobile spectrum holdings policies the Commission adopted are necessary to preserve and promote consumer choice and competition among multiple service providers, promote the efficient and intensive use of spectrum, maximize economic opportunity, and foster the deployment of innovative technologies.

A. Evolution of the Mobile Wireless Marketplace

7. During the past decade, provider supply and consumer demand for wireless services has exploded, moving from the provision of mobile voice

services to the provision of mobile broadband services. The rapid adoption of smartphones, tablet computers, mobile applications, and increasing deployment of high-speed 3G and now 4G technologies, is driving significantly more intensive use of mobile networks. In 2013, a single smartphone generated 48 times more mobile data traffic than a feature phone, and average smartphone usage grew 50 percent in 2013. The adoption of smartphones increased from 27 percent to 54 percent of U.S. subscribers from December 2010 to December 2012. Consequently, service providers generally need access to more spectrum to meet the increasing demand for mobile broadband, which consumes far greater amounts of bandwidth than did mobile phones just a short time ago.

8. The wireless industry has also undergone significant consolidation during the past decade. In 2003, there were six nationwide facilities-based wireless service providers: AT&T Wireless, Sprint PCS, Verizon Wireless, T-Mobile, Cingular Wireless, and Nextel. Now there are four—Verizon Wireless, AT&T, Sprint, and T-Mobile. In addition, there have been several significant spectrum-only transactions, such as *AT&T-Qualcomm* (2011), *Verizon Wireless-SpectrumCo* (2012), and *AT&T WCS* (2012) that have resulted in increased spectrum aggregation among the remaining providers.

9. Concentration in the market share of the major providers has also increased during that time period. As of December 2003, the top six facilities-based nationwide providers accounted for approximately 79 percent of total mobile wireless subscribers in the country. By December 2013, the top four facilities-based nationwide providers had increased their combined market share to 97 percent of all subscribers. Verizon Wireless and AT&T together accounted for 68 percent of the nation’s subscribers as of year-end 2013, compared to 51 percent in 2004. Some regional and local service providers have achieved significant market shares within particular local markets, often the most rural markets, but they typically rely on roaming agreements with nationwide facilities-based providers to extend the geographic reach of their networks.

10. The Commission has “ample latitude to adapt its rules and policies to the demands of changing circumstances.” In light of these trends and current spectrum aggregations, the Commission must examine whether changes in its mobile spectrum holdings policies are necessary to facilitate the

robust competition that leads to lower prices, improved quality, and greater innovation. The following are some of the benefits of competition: Service providers have offered various pricing plans, ranging from tiered usage-based data pricing with overage charges (Verizon Wireless, AT&T) to unlimited data pricing (Sprint), and in 2012, both Verizon Wireless and AT&T launched shared data plans for smartphones and other mobile data devices, and T-Mobile reintroduced an unlimited smartphone data pricing option.

B. Ensuring That All Americans Benefit From Mobile Wireless Competition

11. Based upon the record before us, the Commission finds that the spectrum aggregation limits the Commission adopted is needed to advance its statutory objectives under section 309(j), to promote competition, and to avoid competitive harms. The Commission's competition-related decision making is designed to advance the public interest by preserving and promoting competition that benefits consumers and the Commission must consider the totality of the circumstances and choose policies that are most likely to allow competition to flourish for the public benefit. Accordingly, the Commission recognizes the important tradeoffs in the policy decision at hand. Policies that would limit the ability of major providers to acquire additional spectrum licenses may limit their ability to provide new services or serve new customers. At the same time, policies that would allow these service providers to acquire all or substantially all of the spectrum licenses to be auctioned in the near future, particularly spectrum licenses being auctioned in the Incentive Auction, or that would allow further concentration in below-1-GHz spectrum in secondary market transactions without enhanced scrutiny, would raise significant competitive issues.

12. *Raising Rivals' Costs and Foreclosure.* In 2001, the Commission recognized that "it is at least a threshold possibility that because the supply of suitable spectrum is limited, firms in CMRS markets might choose to overinvest in spectrum in order to deter entry, depending on the costs of doing so." In certain situations, a dominant firm may raise rivals' costs by a variety of means, including input monopolization. As rivals' costs are raised, the competitiveness of the marketplace is likely to diminish. Foreclosure can occur when competitors have an incentive and ability to acquire an input not only to put it to their own

use, but also to withhold it from their rivals.

13. Discussion. In its review of the evolution of the mobile wireless marketplace, its current state, and the potential future effects on consumers, the Commission is required to consider a number of concerns to advance the public interest. Section 309(j) requires the Commission to balance a number of specific statutory objectives including competition, diversity and the avoidance of excessive concentration in designing its rules regarding spectrum licenses and the competitive bidding assignment process. The Commission finds that, under the totality of circumstances, the public interest will be advanced by: Reaffirming the current case-by-case review of proposed transactions, with continued use of a spectrum screen triggered at aggregations of approximately one third or more of the spectrum suitable and available for mobile telephony/broadband; updating the spectrum screen to include spectrum currently suitable and available for mobile telephony/broadband; treating certain levels of increased aggregations of below-1-GHz spectrum as an enhanced factor during case-by-case review of secondary market transactions involving below-1-GHz spectrum; and establishing a market-based spectrum reserve in the upcoming 600 MHz auction.

14. There are three independent bases for its conclusion, each of which the Commission finds warrants the policies the Commission adopted: (1) The importance of access to low-band spectrum to promote variety in licensees and the advancement of rural deployment as directed by Section 309(j), (2) the benefits to consumers associated with robust competition among multiple providers having access to low-band spectrum, and (3) the potential for competitive harm if the Commission does not provide safeguards to mitigate against the possibility of providers raising rivals' costs or foreclosing competition by denying competitors access to low-band spectrum.

15. Its findings are compelled by the changing circumstances posed by the marketplace today: Increased consolidation, the growth in demand for mobile broadband, and the significance of the upcoming 600 MHz auction. First, the Commission recognizes that the mobile wireless marketplace has undergone considerable consolidation, both in terms of number of firms and relative market shares, as well as increased concentration of low-band spectrum. Recent acquisitions have exacerbated this concentration. While

limited amounts of low-band spectrum might theoretically be acquired in secondary market transactions, the vast bulk of that spectrum has already been acquired. There is also significantly less low-band spectrum than there is high-band spectrum: after its decisions, there will be 134 megahertz of spectrum below 1 GHz suitable and available for the provision of mobile broadband services and 446.5 megahertz of suitable and available spectrum above 1 GHz. Concentration in spectrum holdings by service providers of low-band spectrum has become particularly pronounced, with Verizon Wireless and AT&T together having aggregated more than 90 percent of all cellular spectrum. In addition, these two service providers together currently hold approximately 72 percent of 700 MHz spectrum. By comparison, variation in spectrum holdings of higher-frequency spectrum in the range of 1 to 2 GHz is more evenly distributed: Of the PCS spectrum, Verizon Wireless holds 16 percent, AT&T holds 29 percent, Sprint holds 28 percent and T-Mobile holds 22 percent; of the AWS-1 spectrum, Verizon Wireless holds 37 percent, AT&T holds 13 percent, and T-Mobile holds 42 percent.

16. Second, its findings are informed by the skyrocketing consumer demand for mobile broadband. Today, consumers are demanding more data at higher speeds, while at home, at work, and in transit. The Commission finds that to provide sufficient level of service in the marketplace to the benefit of consumers, providers will need to deploy more spectrum that can provide both coverage and in-building penetration, as well as spectrum that can provide the increased throughput for mobile broadband applications

17. Third, its findings are based on the recognition that the 600 MHz spectrum that will be made available in the Incentive Auction will be the last offering of a significant amount of nationwide greenfield low-band spectrum for the foreseeable future. This is particularly important because of the very different characteristics of low-band spectrum. There is a large frequency gap between the below-1-GHz spectrum (in the 700 and 800 MHz bands now largely held by the leading providers and the 600 MHz Incentive Auction spectrum) and the remaining spectrum currently suitable and available for mobile broadband use, beginning with the AWS-1 band at 1710 MHz. Low-band spectrum possesses distinct propagation advantages for network deployment, particularly in rural areas and indoors. As a result, the auction of spectrum below 1 GHz

presents a once-in-a-generation opportunity to promote competition as specifically required by section 309(j). Based upon current trends in consumer demand for mobile broadband services, the Commission concludes that the decisions the Commission makes here will have a significant impact on the extent to which competition may flourish for years to come.

18. Though there is substantial support in the record for distinguishing between low-band and high-band spectrum based on propagation characteristics, as discussed above, the Commission finds that the record does not support such categorical distinctions between three different spectrum groupings—below-1-GHz, 1–2.2 GHz, and 2.3–2.7 GHz—as recently advocated by Sprint.

19. *Variety of Licensees and Rural Deployment.* Under Section 309(j), Congress mandated that the Commission designs auctions to “include safeguards to protect the public interest in the use of the spectrum,” including the objectives to disseminate licenses “among a wide variety of applicants” and to promote deployment of new technologies, products, and services to “those residing in rural areas.” The limited restrictions the Commission imposes on spectrum holdings will promote both of these statutory policies. A variety of licensees is particularly important in light of the lack of competitive offerings in rural America today.

20. Increasing the number of providers who have access to low-band spectrum can increase the competitive offerings of mobile wireless service for consumers, particularly in rural areas. Two nationwide providers control the vast majority of low-band spectrum, and this disparity makes it difficult for rural consumers to have access to the competition and choice that would be available if more wireless competitors also had access to low-band spectrum. Low-band spectrum, given its unique propagation characteristics, can serve as a foundation for expansion of an existing network or a new or upcoming service providers’ network deployment as it builds a customer base to support further growth. The Commission finds that its spectrum holdings policies will promote variety in licensees and deployment of new technologies to those residing in rural areas.

21. The Commission believes that holding a mix of spectrum bands is advantageous to providers and that consumer’s benefit when multiple providers have access to a mix of spectrum bands which in turn can increase competition, drive down

prices, and ensure continued innovation and investment. Accordingly, the Commission finds its public interest goal of promoting consumer welfare would be advanced by the policies the Commission adopted.

22. *Potential for Competitive Harm From Increased Aggregation of Spectrum.* The Commission also finds that in the absence of additional below-1-GHz spectrum on a nationwide basis, there is a substantial likelihood of competitive harm if providers that currently lack sufficient access to such spectrum cannot acquire it. Under section 309(j), the Commission has mandates to promote competition, promote efficient use of spectrum, and avoid the excessive concentration of licenses. Low-band spectrum is less costly to deploy and provides higher coverage quality and the leading providers have most of the low-band spectrum available today. If they were to acquire all or substantially all of the remaining low-band spectrum, they would benefit independently of any deployment of this newly acquired spectrum to the extent that their rivals are denied its use. Without access to this low-band spectrum, their rivals would be less able to provide a competitive alternative.

23. Along with an attenuated ability to increase output or service quality in response to price increases, providers that lack access to low-band spectrum may lack the ability quickly to expand coverage or provide new or innovative services, which would have a significant impact on competition in the mobile wireless marketplace. The Commission agrees that a service provider that is limited to high-band spectrum holdings would face challenges to provide services as robust as those offered by providers holding a mix of low- and high-band spectrum. The consumer harms from the raising of rivals’ costs from increased concentration of low-band spectrum outweigh the potential benefits of unlimited spectrum aggregation. Accordingly, the Commission finds that the limited restrictions the Commission adopted will reasonably balance its goals of promoting competition, ensuring the efficient use of spectrum, and avoiding an excessive concentration of licenses in accord with section 309(j).

24. *Foreclosure.* The Commission agrees with DOJ, today’s mobile wireless marketplace is characterized by factors that, according to DOJ, increase the potential for anticompetitive conduct, including high market concentration, highly concentrated holdings of low-band spectrum, high margins, and high barriers to entry. These risk factors

increase the incentive and ability for a provider with low-band spectrum to bid for the spectrum in an attempt to stifle competition that may arise if multiple licensees were to hold low frequency spectrum. As a result, such a provider might be the highest bidder in a spectrum auction, not because it will put the spectrum to its highest use, but because it is motivated to engage in a foreclosure strategy. In light of this risk and balancing the inherent tradeoffs, the Commission finds that the limited restrictions the Commission enacted is a reasonable balance of the Section 309(j) and public interest factors that form its statutory mandate, including the goals to promote competition, disseminate licenses among a wide variety of applicants, ensure high quality service to those in rural areas and avoid the excessive concentration of licenses, while also promoting the efficient and intensive use of the spectrum.

C. Conclusion

25. For the reasons set forth above, spectrum is a limited and essential input for the provision of mobile wireless telephony and broadband services, and ensuring access to, and the availability of, sufficient spectrum is critical to promoting the competition that drives innovation and investment. The Communications Act has long required the Commission to examine closely the impact of spectrum aggregation on competition, innovation, and the efficient use of spectrum to ensure that spectrum is allocated and assigned in a manner that serves the public interest, convenience and necessity, and avoids the excessive concentration of licenses. In recent years, the Commission has considered in more detail and largely in the context of its case-by-case analysis of secondary market transactions how distinctions among spectrum bands affect competition in the provision of next-generation mobile broadband services.

26. In today’s marketplace, in many service areas currently suitable and available below-1-GHz spectrum is disproportionately concentrated in the hands of larger nationwide service providers: The two largest providers hold 73 percent of the low-band spectrum. Particularly in the context of the once-in-a-generation Incentive Auction, the Commission finds that there is a reasonably foreseeable risk of not achieving its various section 309(j) goals whether or not leading providers are motivated by foreclosure strategies. The Commission concludes that if the Commission do not act at this time to ensure the highest use of low-band spectrum, the competitive choices

available to wireless consumers will likely be substantially less attractive. The Commission therefore finds it essential to establish clear and transparent policies that will preserve and promote competition in the future, promote the efficient use of spectrum, ensure competitive mobile broadband service in rural areas, and avoid an excessive concentration of licenses. The Commission finds that excessive concentration in the allocation of relatively scarce below-1-GHz spectrum, given ever increasing consumer demand for more bandwidth-intensive services, would substantially harm the public interest and indeed, would create a significant risk in the future of an insufficient number of service providers with a network capable of satisfying consumer demand.

27. The Commission finds that the promotion of competition, variety of licensees, rural coverage, and consumer choice in the mobile marketplace, as well as in the future, crucially depends upon multiple providers having access to the low-band spectrum they need to operate and vigorously compete. The Commission also finds that the Commission must consider the potential for anticompetitive results if the concentrated holdings of below-1-GHz spectrum are not addressed. The Commission cannot ignore the possibility of diminished competition in the future, both from rivals' costs being raised and from foreclosure. Further, the Commission finds that the burden that some providers may experience by limits on their ability to acquire increasing amounts of below-1-GHz spectrum, when tailored to the minimum the Commission believed necessary to promote competition, will be outweighed by the public interest benefits that will flow from the preservation and promotion of robust and sustainable competition. By adopting clear and transparent spectrum aggregation limits, the Commission aims to ensure that American consumers have meaningful choices among multiple service providers in the future.

II. Changes to the Spectrum Screen

28. The Commission retains the current standard for whether particular bands should be included in the spectrum screen—"suitable" and "available" in the near term for the provision of mobile telephony/broadband services. The Commission determines that the following spectrum should be added to the spectrum screen: The 600 MHz band (at the conclusion of the Incentive Auction), Advanced Wireless Services in the 2000–2020 MHz and 2180–2200 MHz spectrum

bands (AWS–4), H Block, additional BRS spectrum, the majority of the EBS spectrum, and the AWS–3 band (on a market-by-market basis as it becomes "available"). The Commission also determines that it should not include the Upper 700 MHz D Block and a certain amount of the SMR spectrum, both of which previously have been included.

A. Standard for Inclusion of Bands

29. When assessing spectrum aggregation in its review of wireless transactions, the Commission evaluates the current spectrum holdings of the acquiring firm that are "suitable" and "available" in the near term for the provision of mobile telephony/broadband services. Suitability is determined by whether the spectrum is capable of supporting mobile service given its physical properties and the state of equipment technology, whether the spectrum is licensed with a mobile allocation and corresponding service rules, and whether the spectrum is committed to another use that effectively precludes its uses for mobile services. Spectrum is considered "available" if it is "fairly certain that it will meet the criteria for suitable spectrum in the near term, an assessment that can be made at the time the spectrum is licensed or at later times after changes in technology or regulation that affect the consideration."

30. In the *Mobile Spectrum Holdings NPRM*, 77 FR 61330, October 9, 2012, the Commission sought comment on whether to continue to consider spectrum based on the suitability and availability standard or whether to consider other factors and asked for any legal, economic, and engineering justifications to support existing or modified criteria to determine the suitability and availability standard. The Commission also sought comment on the application of the relevant factors to particular spectrum bands and which spectrum bands should be included in the Commission's spectrum analysis.

31. The Commission retains the current definition. The Commission finds that the current suitable and available standard has worked well to identify new spectrum to be included in the spectrum screen, and the record does not provide persuasive evidence to support modifying the current suitability and availability standard. Any narrower definition such as "actually" or "imminently" available would preclude relevant spectrum from being accounted for in its analysis of spectrum aggregation as the Commission review secondary market wireless transactions.

B. 600 MHz Band

32. The Commission finds that the 600 MHz Band is suitable for the provision of mobile telephony/mobile broadband services. In the *Incentive Auction Report and Order*, the Commission establishes rules to implement the Incentive Auction and to govern the use of the 600 MHz Band for the provision of mobile wireless services and adopts a band plan that facilitates wireless broadband deployment operations. The Commission also finds that the 600 MHz Band is available for the provision of mobile telephony/mobile broadband services, citing the framework for transitioning incumbent broadcasters from the 600 MHz Band within 39 months of the close of the auction set forth in the *Incentive Auction Report and Order*. Given this concrete transition framework, the relative clarity regarding the availability of this spectrum, and the importance of this band to the mobile wireless marketplace going forward, the Commission anticipates that the spectrum cleared at auction is likely to begin having a competitive impact very shortly after the auction ends. As a result, the Commission will consider the 600 MHz Band to be available upon the release of the *Channel Reassignment PN* after conclusion of the Incentive Auction. The amount of repurposed 600 MHz Band spectrum added to the spectrum screen will be equal to the total megahertz amount of spectrum repurposed for flexible use wireless licenses.

C. Advanced Wireless Service

1. AWS–4 Spectrum

33. The Commission finds that the 40 megahertz of spectrum in the AWS–4 band is suitable and available for the provision of mobile/telephony broadband services, and therefore should be included in the spectrum screen. In the *AWS–4 Report and Order*, the Commission adopted licensing, operating, and technical rules for stand-alone terrestrial mobile wireless operations in the AWS–4 band, which already included an allocation for mobile use, and took other actions to remove regulatory barriers to mobile broadband use of the AWS–4 band, as described above. The Commission also determined that it would assign AWS–4 licenses to DISH, as the incumbent MSS operator in that spectrum, and established a concrete, proven process for efficient relocation of incumbent operations from 2180–2200 MHz. In light of these Commission actions, the Commission finds that the 40 megahertz

in the AWS-4 band should be included in the spectrum screen going forward.

34. The Commission rejects argument that it should include only 35 out of the 40 megahertz of AWS-4 spectrum because of the stringent technical restrictions placed on AWS-4 operations in 2000–2005 MHz to protect adjacent operations in the upper portion of the H Block (1995–2000 MHz). Given the flexibility provided in the *AWS-4 Report and Order* allowing these technical restrictions on AWS-4 operations in 2000–2005 MHz to be modified by commercial agreements between licensees of the AWS-4 band and the H Block, and the fact that DISH now holds all AWS-4 and H Block licenses, the Commission concludes that any potential interference issues between 2000–2005 MHz and 1995–2000 MHz should be sufficiently resolved so that the Commission should count 2000–2005 MHz in the spectrum screen along with the other 35 megahertz of AWS-4 spectrum.

2. H Block

35. The Commission finds that the H Block spectrum is suitable and available for the provision of mobile/telephony broadband services, and therefore should be counted in the spectrum screen. In the *H Block Report and Order* (78 FR 50214, August 16, 2013), the Commission explained that through the adoption of service rules for this band, the Commission increased the nation's supply of spectrum for flexible-use services, including mobile broadband, and in particular would extend the widely deployed broadband PCS band used by numerous providers to offer mobile service across the United States. The Commission also found that, consistent with the technical rules it adopted, the use of both the 1915–1920 MHz band and the 1995–2000 MHz band can occur without causing harmful interference to broadband PCS downlink operations at 1930–1995 MHz. In light of these conclusions, along with the recent completion of the H Block auction and the fact that incumbent licensees in these bands previously were cleared by UTAM, Inc. and by Sprint, the Commission finds that the H Block should be included in the spectrum screen going forward.

3. AWS-3 Bands

36. The Commission finds that the AWS-3 bands (1695–1710 MHz, 1755–1780 MHz, and 2155–2180 MHz) are suitable for the provision of mobile telephony/mobile broadband services. In the recent *AWS-3 Report and Order*, the Commission amended the Allocation Table to include a mobile,

non-Federal allocation for the 1695–1710 MHz and 1755–1780 MHz bands, which already applied to the 2155–2180 MHz band and found that licensing AWS-3 bands in a combination of 5 and 10 megahertz blocks aligns well with a variety of wireless broadband technologies, including LTE, Wideband Code Division Multiple Access (WCDMA), HSPA, and LTE-advanced. The Commission concluded that pairing uplink/mobile transmit operations in the 1755–1780 MHz band with downlink operations in the 2155–2180 MHz band would be compatible with similar operations in the adjacent AWS-1 band, effectively creating a combined 140 megahertz band. Further, the Commission observed that no regulation would prohibit licensees from pairing the unpaired 1695–1710 MHz uplink band with another present or future licensed downlink band. Given the anticipated use of the AWS-3 bands for mobile broadband service, either as an extension of the AWS-1 band or potentially in combination with other AWS bands, the Commission concludes that the AWS-3 bands are suitable for the provision of mobile telephony/mobile broadband service.

37. The Commission also finds that the AWS-3 bands should be considered available for mobile telephony/mobile broadband services on a market-by-market basis in the future, given that the timing of that access will depend on the nature of the Federal operations affecting each particular market. Commercial operators will have access to the 1755–1780 MHz and 1695–1710 MHz bands outside of areas where federal operations are protected during their transition, inside areas where federal operations are protected during their transition if successfully coordinated with the Federal incumbent, in areas in which the Federal incumbents have relocated pursuant to their Transition Plan, and inside areas in which Federal incumbents are protected indefinitely if successfully coordinated with the Federal incumbent. Accordingly, given that the effect of Federal incumbent operations on the timing and scope of commercial operations will vary from market to market, the Commission determines that the 1755–1780 MHz and 1695–1710 MHz bands will become available on a market-by-market basis in the future. In addition, consistent with the paired offering of the 2155–2180 MHz band with the 1755–1780 MHz band, the Commission will count the 2155–2180 MHz band as available for purposes of the spectrum screen at the same time the Commission counts the

1755–1780 MHz band in the particular market, consistent with its approach to the paired AWS-1 band.

38. The Commission notes that the timing and the extent of access by commercial licensees to the 1755–1780 MHz and 1695–1710 MHz bands in particular markets will depend, in part, on the timelines to be set in the Transition Plans for relocating Federal incumbents, which will be made publicly available. In light of the importance of this band in adding capacity spectrum for mobile wireless providers to deploy next-generation networks, and the timelines to be set in the Transition Plans for different systems in different markets, the Commission will count the 1755–1780 MHz and 1695–1710 MHz bands in the spectrum screen in a particular market once all relocating Federal incumbent systems in that market are within three years of completing relocation, according to the Transition Plans. The Commission notes that the timing and the extent of access by commercial licensees to these AWS-3 bands also will depend on successful coordination with federal systems during the transition process and the Federal systems that will not be relocating from these bands. However, given that the nature and timing of the coordination will be the subject of two-party private discussions between commercial licensees and Federal incumbents and will vary from market to market, from licensee to licensee, and from system to system, the Commission will not base the timing of when the Commission count AWS-3 spectrum to be available in a particular market on the status of coordination with non-relocating Federal incumbents. The Commission notes that the Commission will count the 2155–2180 MHz band in the spectrum screen for a particular market at the same time the Commission counts the 1755–1780 MHz and 1695–1710 MHz bands in that market, for the reasons indicated above.

D. Big LEO Bands

39. The Commission declines to add to the spectrum screen Big LEO MSS spectrum in the 2483.5–2495 MHz and 1610–1617.775 MHz ranges, noting that Globalstar's ATC authority to operate terrestrial base stations and mobile terminals using this spectrum under the authority of a waiver granted in 2008 was suspended in 2010 and none of these proposed changes have been acted on by the Commission. Thus, the Commission declines to add this Big LEO MSS spectrum to the spectrum screen at this time. The Commission distinguishes this decision from its

determination to add to the spectrum screen the AWS-4 band (2000–2020 MHz and 2180–2200 MHz), for which the Commission has taken a number of actions to make the band suitable and available for mobile telephony/mobile broadband. Specifically, for the AWS-4 band, the Commission has added a mobile allocation, adopted licensing rules for stand-alone terrestrial mobile wireless operations, and assigned the spectrum to the incumbent MSS operator, DISH.

E. BRS/EBS Bands

40. Background. The 194 megahertz in the 2496–2690 MHz band (2.5 GHz) comprises (1) 73.5 megahertz licensed to commercial operators in the BRS band; (2) 112.5 megahertz licensed to eligible educational institutions or non-profit educational organizations in the EBS band; and (3) 8 megahertz licensed to BRS or EBS as guard bands dividing the lower, middle, and upper band segments of the 2.5 GHz.

41. In 2008, in the *Sprint-Clearwire Order*, the Commission decided to include in the spectrum screen 55.5 megahertz of BRS spectrum in the upper band segment, in those markets in which the transition to the new band plan was complete. The Commission observed that 2.5 GHz licensees had made substantial progress in the prior few years in transitioning to the new band plan, finalizing the WiMAX standards, developing equipment, and formulating their plans for using the 2.5 GHz band to provide service. The Commission declined to include in the spectrum screen the 12 megahertz of BRS spectrum in the middle band segment (“MBS”) due to concerns of interference from legacy high-power video operations, stating it lacked sufficient information “to determine the extent to which MBS is in fact available for mobile telephony/broadband services.” The Commission also declined to include in the spectrum screen the BRS Channel-1 (2496–2502 MHz), which is not contiguous to the 55.5 megahertz of BRS spectrum that was included, finding that the Channel does not fit into the contemplated WiMAX deployment plans. Further, the Commission excluded from the screen the 8 megahertz of guard bands because they are secondary to adjacent-channel operations and they are too narrow to be used unless they were all aggregated in a market.

42. The Commission currently does not include in the screen any EBS spectrum, which is licensed to eligible educational entities who can lease spectrum to commercial operators subject to the requirement, *inter alia*, to

reserve at least five percent of digital transmission capacity for educational purposes. In the *Sprint-Clearwire Order*, it declined to include EBS spectrum in the screen, observing that “the primary purpose of EBS is to further the educational mission of accredited public and private schools, colleges and universities providing a formal educational and cultural development to enrolled students through video, data, or voice transmissions.” The Commission noted that, while educational licensees are allowed to lease their excess capacity to commercial operators, leasing is subject to various special requirements designed to maintain the primary educational character of services provided using EBS spectrum. In addition, the Commission recognized that other elements of the EBS licensing regime, such as its solely site-specific character, with the absence of any licensee in various unassigned EBS “white spaces,” complicate use of this spectrum for commercial purposes. Further, the Commission indicated that it was sensitive to the concerns raised by EBS licensees that potential divestitures, in response to spectrum aggregation concerns relating to competition among commercial services, could disproportionately harm EBS licensees.

43. In subsequent transaction reviews, the Commission declined to add EBS or additional BRS spectrum to the spectrum screen, finding either that the circumstances had not sufficiently changed from *Sprint-Clearwire Order* or that the instant rulemaking proceeding is a more appropriate place to evaluate this issue. In the context of reviewing the *SoftBank-Sprint-Clearwire* transaction, however, the Commission did consider arguments on the record regarding the competitive effect of Sprint obtaining 100 percent stock ownership in and *de facto* control of Clearwire’s BRS and EBS spectrum holdings, finding competitive harm unlikely.

44. Discussion. The Commission finds that it is necessary to modify the amount of 2.5 GHz spectrum the Commission currently includes in the screen to reflect today’s marketplace realities. The Commission will update the spectrum screen to increase the amount of 2.5 GHz spectrum from 55.5 megahertz to 156.5 megahertz. The Commission will add the 12 megahertz in the two MBS BRS channels, as well as 89 megahertz of EBS spectrum, which represents most of the EBS spectrum, adjusted to reflect white space and education use elements. The Commission will continue to exclude

the six megahertz in BRS Channel 1 and the guard bands.

45. As an initial matter, the Commission observes that Sprint announced its intent to integrate its 2.5 GHz spectrum throughout its network to provide mobile broadband service. Sprint recently announced its next generation service “Sprint Spark,” an enhanced LTE network, which it plans to deploy over the next three years using its SMR, PCS, and 2.5 GHz spectrum. The Commission finds that based upon how the 2.5 GHz band is being used today, and will be used in the near term; the majority of the band is suitable and available for mobile telephony/mobile broadband services.

46. With respect to BRS spectrum, the Commission finds that, in addition to the 55.5 megahertz currently counted in the screen, the Commission should include 12 megahertz of BRS MBS spectrum. The Commission recognizes that legacy video operations in the MBS, once considered a significant impediment to the deployment of cellularized operations in the MBS, are now no longer a barrier to deploying mobile broadband service in the vast majority of markets. The Commission notes that Sprint recently has acknowledged that BRS MBS channels are “more routinely available” for mobile broadband use. Accordingly, the Commission includes the 12 megahertz of BRS MBS spectrum in the screen.

47. However, the Commission will continue to exclude the 6 megahertz BRS Channel 1 (2496–2502 MHz). The proponents of including BRS Channel 1 in the screen have not demonstrated any material change in circumstances since 2008 with respect to that channel and the Commission acknowledges Sprint’s concern that BRS Channel 1 is not contiguous with the other BRS channels and therefore is not conducive to the provision of mobile telephony/mobile broadband service.

48. With respect to EBS spectrum, the Commission declines to continue its policy of excluding all EBS spectrum. Leasing in and of itself does not preclude the spectrum from meeting the suitable and available standard. The Commission does not find that the differences in propagation characteristics between the 2.5 GHz band and lower frequency spectrum should result in its continued exclusion of the 2.5 GHz band from the spectrum screen for purposes of its competitive review. Nor does the Commission agree with Sprint that the aggregation of 20 megahertz of this band is a necessary precursor to counting EBS in the screen. The benefit of contiguous holdings in a band is not a factor unique to EBS

spectrum that warrants excluding EBS holdings from the screen in cases where such contiguity is not achieved.

49. Although the Commission finds that EBS spectrum generally is suitable and available for mobile telephony/mobile broadband services, the Commission agrees with Sprint that there are certain factors unique to EBS that warrant not including all of the EBS spectrum in the screen. The Commission will continue to exclude the five percent of the EBS capacity that is reserved for educational uses. The Commission remains committed to EBS spectrum serving educational purposes. Originally, the 2500–2690 MHz band was allocated for ITFS service and “established to provide formal education and cultural development in aural and visual form to students enrolled in accredited public and private schools, colleges and universities.” The Commission continues to support the education mission of accredited public and private schools, colleges, and universities providing a formal educational and cultural development to enrolled students through video, data, or voice transmissions. Therefore, as a starting point, the Commission will include 95 percent, or approximately 107 megahertz, of EBS spectrum in the screen.

50. With EBS spectrum licensed on a site-specific basis, certain areas exist where the Commission has not assigned a license to an educational entity. And no educational entity has been able to apply for a license for an EBS white space since 1995. Therefore, no commercial wireless provider has ever had the opportunity to lease EBS spectrum in that area. Therefore, white spaces can present certain obstacles for providing reliable, wide-area coverage. The Commission finds it reasonable to discount for white space when including EBS spectrum in the screen.

51. Given the complexity of calculating a white space discount on a market-by-market basis, Sprint proposes a uniform, nationwide EBS white space discount for administrative practicability and regulatory certainty. Sprint calculated that across all EBS channels, an average of approximately 16.5 percent of the population is located in EBS white space and therefore proposes to use a 16.5 percent discount. The Commission agrees that a nationwide discount is the best option for applying a white space discount for EBS spectrum and find Sprint’s proposal reasonable. While as Verizon Wireless notes, using a nationwide average may in some instances undercount EBS white space in some

markets and overcount EBS white space in other markets, the Commission finds that using an average across all markets is a reasonable method, which balances administrative efficiency with the complexity of a precise market-by-market calculation. Thus, after taking the discount into consideration, of the initial 107 megahertz of EBS spectrum, the Commission will include 89 megahertz of EBS spectrum in the screen. As discussed in Section VI.G below, the Commission declines to further weight EBS spectrum, or other spectrum bands, based on propagation characteristics.

F. Upper 700 MHz D Block

52. In light of Congress’ reallocation of the Upper 700 MHz D Block spectrum (758–763 MHz, 788–793 MHz) for public safety use—and the subsequent steps taken by the Commission and the Public Safety and Homeland Security Bureau to effectuate the reallocation and licensing of this spectrum for public safety—the Commission finds that the 10 megahertz previously designated as the Upper 700 MHz D Block is no longer suitable and available for the provision of mobile telephony/mobile broadband services. Therefore, going forward, the Commission will exclude from the spectrum screen that 10 megahertz (758–763 MHz, 788–793 MHz) that currently is part of the screen, along with the adjacent public safety broadband spectrum that is also now licensed to FirstNet (763–768 MHz, 793–798 MHz), which was not previously counted in the initial spectrum screen.

53. The Commission notes that, under the Spectrum Act, FirstNet is permitted to provide access to the 20 megahertz of Public Safety Broadband spectrum to commercial entities through certain “covered leasing agreements.” The Commission will not add to the screen any of this spectrum merely because FirstNet has entered into leasing arrangements contemplated by the Act. Deployment of this spectrum is essential to the critical statutory goal of deploying a nationwide interoperable public safety broadband network, and the Commission wants to provide equal incentives to all commercial operators to partner with FirstNet to make this goal a reality.

G. SMR Bands

54. In 2004, the Commission adopted a new band plan for the 800 MHz band to “address the [then] ongoing and growing problem of interference to public safety communications in the 800 MHz band.” The interference problem was caused “by a

fundamentally incompatible mix of two types of communications systems: Cellular-architecture multi-cell systems . . . and high-site non-cellular systems.” To provide immediate relief, the Commission implemented technical standards that defined unacceptable interference in the 800 MHz band, while also reconfiguring the band to separate commercial wireless systems from public safety and other high site systems. Pursuant to the band reconfiguration, the Commission eliminated the interleaving of public safety and commercial channels in the 800 MHz band and separated cellularized multi-cell and non-cellularized high-site systems within the band.

55. Under the reconfiguration plan, Nextel (now Sprint) was required to vacate the 806–817 MHz and the 851–862 MHz band segments and relocate to 817–824/862–869 MHz. The Commission had designated the upper portion of the 800 MHz band (817–824 MHz/862–869 MHz) for Enhanced Specialized Mobile Radio (ESMR) systems and designated the lower portion of the 800 MHz band (806–815 MHz/851–860 MHz) for use by public safety, Critical Infrastructure Industries (CII), and other non-cellular systems.

56. The Commission eliminates from inclusion in the screen 7.5 megahertz in the 800 MHz Band because, after the Commission reconfigured the band, that spectrum is no longer licensed for commercial, cellularized operations. The Commission also eliminates the remaining 5 megahertz in the 900 MHz band that is narrowly-channelized in 125 kHz blocks and not adjacent to the remaining 14 megahertz of SMR spectrum that is licensed for and considered suitable and available for the provision of mobile telephony/mobile broadband services. Therefore, going forward, the Commission finds only 14 megahertz of SMR spectrum is suitable and available for the provision of mobile telephony/mobile broadband services and will be included in the screen.

III. Licensing Through Competitive Bidding

57. The Commission concludes that it is in the public interest, for auctions, to replace the current case-by-case approach of evaluating long form applications of winning bidders with a determination of whether a band-specific spectrum holding limit should apply *ex ante* to the licensing of particular bands through competitive bidding. In the *R&O*, the Commission finds that the Commission should determine what if any spectrum holding limitations should affect the licensing of

particular bands through competitive bidding before the relevant competitive bidding process begins for that band. The Commission determines certain guidelines that the Commission will consider in making such determinations prior to the beginning of the competitive bidding process for a particular band, which generally will be made in the service rulemakings for those bands, enabling the Commission to take into account all relevant objectives specific to the bands in question and competitive bidding process. Given the proximity of the AWS-3 auction and Incentive Auction, the Commission makes determinations regarding whether to adopt, in the context of this rulemaking, any mobile spectrum holdings limits for the licensing of these bands through competitive bidding. In particular, based on the record in this proceeding and in the two service rulemakings, as well as the statutory goals set forth in the Communications Act and the Spectrum Act, the Commission reserves spectrum in the forward auction for the 600 MHz Band licenses in order to ensure against excessive concentration in holdings of below-1-GHz spectrum, and the Commission declines to adopt any mobile spectrum holding limits for the licensing of the AWS-3 bands through competitive bidding.

A. Ex Ante Application of Mobile Spectrum Holding Limits to the Licensing of Spectrum Bands Through Competitive Bidding

58. In the *Mobile Spectrum Holdings NPRM*, the Commission sought comment on general approaches to address mobile spectrum policies at auction, including whether to retain its current case-by-case approach or adopt a bright-line limit. The Commission also sought comment on the costs and benefits of applying a case-by-case approach to initial licenses acquired at auction and whether it affords participants sufficient certainty to determine whether they would be allowed to hold a given license post-auction.

59. The Commission concludes that it is in the public interest to replace its post-auction case-by-case analysis of the licensing of spectrum bands through competitive bidding with a determination of whether a band-specific mobile spectrum holding limit is necessary to carry out the duties under the Communications Act and, if so, to establish an *ex ante* application of that limit to the competitive bidding for

that band.¹ The Commission finds that upfront, clear determination, instead of case-by-case analysis post-auction, would provide potential bidders with greater certainty in the auction process regarding how much spectrum they would be permitted to acquire at auction. Providing such certainty is consistent with Section 309(j)(3)(E) of the Communications Act, which emphasizes the need for clear bidding rules “to ensure that interested parties have a sufficient time to develop business plans, assess marketplace conditions, and evaluate the availability of equipment for the relevant services.”

60. To the extent that the Commission adopts a mobile spectrum holding limit for the licensing of a particular band through competitive bidding, applying the limit *ex ante* would provide greater certainty and efficiency in the process of licensing through competitive bidding, which would be particularly important for complex auctions like the Incentive Auction. Upfront, bright-line determinations would streamline the post-auction review of license applications, which should allow winning bidders to receive their licenses more quickly and proceed to deploy service using the acquired spectrum. The application of a mobile spectrum holding limit *ex ante* would avoid certain challenges in trying to remedy concerns after post-auction competitive review. If the Commission were to make a finding post-auction that the acquisition of spectrum by a winning bidder would be likely to cause competitive harm, it could compel abandonment of the license application or divestiture of the license won at auction, which could create incentives for bidder behavior that would undermine the goals of the auction. Alternatively, divestiture of another license from the bidder’s pre-auction spectrum holdings might not address the Commission’s competitive concerns with aggregation of the spectrum made available at auction, especially if the spectrum the winning bidder would propose to divest does not have similar characteristics of the spectrum acquired in the auction.

61. The Commission finds that, for competitive review of spectrum licenses acquired through competitive bidding, the benefits of a bright-line *ex ante* application of a mobile spectrum holding limit to the competitive bidding for those licenses outweigh any costs associated with any perceived loss of

¹ In subsequent secondary market transactions, the licenses acquired at auction will be included in the application of our revised spectrum screen when the spectrum is deemed suitable and available for inclusion in the screen.

flexibility that the existing post-auction review might afford. The Commission notes that a case-by-case review of spectrum licenses acquired through secondary markets continues to be appropriate, as discussed below.

62. The Commission finds that the determination of whether to apply any mobile spectrum holding limits to the licensing of a particular band through competitive bidding, and if so the scope of such limits and policies, should be clearly specified sufficiently in advance of the auction. This approach would afford a prospective bidder sufficient time to develop a bidding strategy based on the mobile spectrum holdings determination adopted for an upcoming auction, while allowing the Commission to consider the unique circumstances of each spectrum band auction when making its determination.

63. The Commission would evaluate a number of factors in considering whether to adopt a mobile spectrum holdings limit for the licensing of a particular band through competitive bidding and, if so, what type of limit to apply. As an initial matter, its evaluation will encompass the “broad aims of the Communications Act,” which include, among other things, preserving and enhancing competition in relevant markets, accelerating private sector deployment of advanced services, and generally managing the spectrum in the public interest. Its determination will help carry out its duties under the Communications Act, serving the public interest. Its public interest analysis in this context also may entail assessing whether a particular auction specific policy will affect the quality of communications services or result in the provision of new or additional services to consumers. Moreover, the Commission must consider any other statutory goals and directives applicable to a particular spectrum band being licensed by competitive bidding.

64. The Commission will consider whether the acquisition at auction of licenses to use a significant portion of spectrum by one or more providers would potentially harm the public interest by reducing the likelihood that multiple service providers would have access to sufficient spectrum to compete robustly in the provision of mobile telephony/mobile broadband service. This determination will be based on several factors, including total amount of spectrum to be assigned, characteristics of the spectrum to be assigned, timing of when the spectrum could be used for mobile telephony/mobile broadband services, the specific rights being granted to licensees of the spectrum, and the extent to which

competitors have opportunities to gain access to alternative bands that would serve the same purpose as the spectrum licenses at issue.

B. 600 MHz Band Incentive Auction

65. For the Incentive Auction, the Commission establishes a market-based spectrum reserve of up to 30 megahertz in each license area designed to ensure against excessive concentration in holdings of low-band spectrum—a reserve that includes safeguards to ensure that all bidders bear a fair share of the cost of the Incentive Auction. The market-based reserve balances the need to meet the requirements for concluding the Incentive Auction with the competition goals discussed above.

66. In the *Mobile Spectrum Holdings NPRM*, the Commission sought comment on whether to adopt limits on the amount of spectrum that entities could acquire in the context of spectrum auctions mandated by the Spectrum Act. In the *Incentive Auction NPRM*, the Commission sought comment on what, if anything, it should do to meet the statutory requirements of section 309(j)(3)(B) and promote the goals of the Incentive Auction. For instance, the Commission noted that “section 309(j)(3)(B)’s directive to avoid excessive concentration of licenses might militate in favor of a rule that permits any single participant in the auction to acquire no more than one-third of all 600 MHz Band spectrum being auctioned in a given licensed area.”

67. The amount of repurposed spectrum depends on the outcome of the reverse and forward auction components of the Incentive Auction. The reverse and forward auctions will be integrated in a series of stages. Each stage will consist of a reverse auction and a forward auction bidding process. Prior to the first stage, the initial spectrum clearing target will be determined based on broadcasters’ collective willingness to relinquish spectrum usage rights at the opening prices offered to them. The first stage reverse auction bidding rounds will determine the total amount of incentive payments necessary in connection with the initial clearing target. The forward auction bidding process will follow. If the final stage rule described below is satisfied, the forward auction bidding will continue until there is no excess demand for 600 MHz Band licenses. If the final stage rule is not satisfied, additional stages will be run, with progressively lower spectrum targets in the reverse auction and less spectrum available in the forward auction until the rule is satisfied.

68. The final stage rule is a reserve price with two components, both of which must be satisfied. The first component requires that the prices for licenses in the forward auction meet or exceed a certain price benchmark to assure that prices generally reflect competitive market values for comparable spectrum licenses. The first component consists of alternative conditions, depending on the clearing target for the particular stage in which it is being applied. The alternative formulations recognize that per-unit market prices for spectrum licenses may decline consistent with an increase in supply. The price and spectrum clearing benchmarks will be established by the Commission in the *Incentive Auction Procedures PN*, after an opportunity for additional comment. The second component of the final stage rule requires that the proceeds of the forward auction be sufficient to meet expenses set forth in the Spectrum Act and any Public Safety Trust Fund amounts needed for FirstNet. If the requirements of both components of the reserve price are met, then the final stage rule is satisfied.

69. In the *Incentive Auction Report and Order*, the Commission indicates that, in the coming months, the Commission will solicit public input on final auction procedures by Public Notice (“*Incentive Auction Comment PN*”). This Public Notice will include specific proposals on crucial auction design issues such as opening prices, television channel assignment optimization, how much market variation to accommodate in the 600 MHz Band Plan, and benchmarks for implementing the final stage rule. Well in advance of the auction, also by public notice, the Commission will resolve these implementation issues and provide detailed explanations and instructions for potential auction participants (“*Incentive Auction Procedures PN*”).

1. The Need for a Market-Based Spectrum Reserve

70. Given the importance of multiple providers, including rural and regional providers, having access to below-1-GHz spectrum for deployment and competition, the Commission concludes that a clear mobile spectrum holdings policy for the Incentive Auction is necessary to increase access opportunities to the 600 MHz Band. The Commission finds that it is appropriate to adopt a market-based spectrum reserve for entities that do not currently hold a significant amount of below-1-GHz spectrum.

71. The Commission will reserve on a contingent basis, licenses covering up to 30 megahertz of spectrum for bidders with spectrum holdings, at the deadline for filing a short-form application to participate in the forward auction, of less than 45 megahertz, on a population-weighted basis, of suitable and available below-1-GHz spectrum in a PEA. All bidders, including those unable to bid on reserved licenses, will be able to bid on the unreserved licenses. The Commission specifies the maximum amount of spectrum that will be reserved in each market for eligible entities (“reserve-eligible” entities) in the forward auction under the various band plan scenarios identified in the *Incentive Auction Report and Order*, but the actual amount of spectrum reserved will depend on the demand by reserve-eligible bidders when the auction reaches a trigger (the “spectrum reserve trigger”). The Commission finds that this approach balances a number of the key statutory directives, including promoting competition, facilitating the deployment of advanced services by making spectrum available for flexible use, and sharing the costs of the Incentive Auction on a fair and equitable basis.

72. In reaching its decisions, the Commission must consider a number of statutory directives applicable to the Incentive Auction, including promoting competition, making spectrum available for flexible use, meeting proceeds requirements, and facilitating deployment of advanced services. With respect to promoting competition in the mobile wireless marketplace, the Commission observes that any of the types of limits discussed on the record—spectrum caps based on a provider’s existing below-1-GHz holdings, equal spectrum caps for all bidders, or reserved spectrum—have the potential to promote competition by ensuring that in the near future, more providers would hold a sufficient mix of spectrum to compete robustly. The Commission finds that its market-based spectrum reserve for the Incentive Auction has distinct advantages over the other approaches with respect to the other statutory directives.

73. First, the spectrum reserve gives mobile service providers significant latitude to bid on spectrum licenses they need in each area to meet their network requirements, including providers who are unable to bid for reserved spectrum in a particular PEA. Rules that would restrict the larger providers to no more than a 5 x 5 megahertz block of 600 MHz Band spectrum do not adequately consider the needs of those providers for

additional spectrum to meet the demand of their subscribers in the longer term. Nor do such rules adequately consider that efficient deployment of services using the 600 MHz Band spectrum would likely rely on ensuring that the larger as well as smaller nationwide providers having a stake in the development of equipment for the band. Spectrum caps also could affect to a certain extent mobile broadband providers' flexibility to expand services to meet increasing consumer needs.

74. Second, proposals that would set an individual spectrum cap on the amount of 600 MHz Band spectrum for which each provider could acquire licenses have greater risk of decreasing forward auction proceeds, and thus endangering its ability to repurpose spectrum, because it likely would lessen competition between the largest wireless providers for spectrum in amounts greater than the cap would permit.

75. The Commission concludes that its market-based spectrum reserve, particularly in the amounts and under the rules the Commission adopts is unlikely to reduce competition among bidders and in fact, will encourage competition among bidders wanting at least 20 megahertz of spectrum, as compared to other potential approaches to mobile spectrum holdings limits that could be applied to the Incentive Auction. Under the market-based spectrum reserve, every bidder will have the opportunity to bid for, and win, at least half of the 600 MHz Band spectrum in each market, and at some levels of spectrum made available in the forward auction, significantly more than half.

76. Third, the Commission concludes that its approach would not reduce participation in the auction by large providers to a level that would reduce the amount of spectrum that can be repurposed by the Incentive Auction. The reserved spectrum amount would be contingent upon (and subject to a reduction based on) the demand expressed in the forward auction by reserve-eligible bidders. If there is insufficient demand for reserved spectrum licenses, the amount of reserved spectrum would be reduced.

77. The Commission also finds that its market-based spectrum reserve is more likely to achieve its purposes more effectively than bidding credits based on the level of spectrum holdings. On balance, applying bidding credits based on spectrum holdings as opposed to reserving licenses for providers without significant below-1-GHz spectrum would not address the Commission's competitive concerns with aggregation

of the spectrum made available at auction. The Commission notes that in the *Incentive Auctions Report and Order* the Commission adopted the bidding credits for the forward auction applicable to small businesses. The Commission also stated it will initiate a separate proceeding to examine its designated entity ("DE") rules generally.

78. The Commission notes that its decision to adopt a 600 MHz Band spectrum reserve and to establish the amounts of reserved spectrum specified below is based on the current marketplace structure of the mobile wireless service industry. If significant changes in the marketplace structure occur or a proposed transaction is filed with the Commission in the future affecting the top four nationwide providers and their spectrum holdings, the Commission will revisit its decisions here regarding the reserved spectrum provisions for the 600 MHz Band that the Commission adopted. The Commission will review as well whether changes should be made to any other decisions in the *R&O*. The Commission also plans to consider in a Further Notice of Proposed Rulemaking possible change to certain auction rules relating to joint bidding arrangements and strategies in the Incentive Auction. In order to allow the Commission to evaluate how certain bidding arrangements might affect the Incentive Auction, potential bidders will need to file well before the normal deadlines some of the information currently required in auction and license application forms.

2. Qualification To Bid on Reserved Licenses

79. The Commission needs to facilitate access by multiple providers to below-1-GHz spectrum is the basis for its adoption of a market-based spectrum reserve for the Incentive Auction and, accordingly, the Commission finds that a provider's existing below-1-GHz holdings in a particular PEA should be the threshold basis for determining whether the provider qualifies to bid on reserved spectrum. To qualify to bid on reserved licenses in a PEA, an entity must not have an attributable interest in 45 megahertz or more, on a population-weighted basis, of below-1-GHz spectrum that is suitable and available for the provision of mobile telephony/mobile broadband services in that PEA, at the deadline for filing a short-form application to participate in the Incentive Auction. In its calculation of below-1-GHz spectrum holdings, the Commission includes not only the entity's licensed spectrum, on a county-by-county basis, but also all long-term

spectrum leasing arrangements, with spectrum being attributed to both the lessee and lessor. Further, it includes in the calculations only the below-1-GHz spectrum that the Commission currently considers to be "suitable" and "available," in the modified spectrum screen adopted today, and thus, no 600 MHz Band spectrum is included, as although it is suitable, it is not considered available until the conclusion of the Incentive Auction. The 45 megahertz of below-1-GHz spectrum approximates one-third of the 134 megahertz of below-1-GHz spectrum that the Commission counts in the modified total spectrum screen the Commission adopted. The Commission will measure an entity's spectrum holdings on a county-by-county basis within a PEA,² and then construct a total county-population-weighted below-1-GHz spectrum holding for each entity within the PEA.³ As discussed below, even if a non-nationwide provider holds approximately one-third or more of the suitable and available below-1-GHz spectrum in a given market, it will not be precluded from bidding on reserved spectrum licenses in any market.

80. The Commission observes that the 45 megahertz threshold (approximately one-third of total below-1-GHz spectrum) to identify those who can bid on reserved licenses is consistent with the approximately one-third threshold for total spectrum that the Commission uses to identify those holdings in local markets that may raise particular competitive concerns in the context of

² In the context of secondary market transactions review, the Commission typically measures a provider's holdings in a particular CMA based on the maximum spectrum holdings in any one county within that CMA. Unlike the screen the Commission uses for reviewing transactions, the qualification for bidding on reserved spectrum is a bright-line test, and PEAs are generally larger in geographic scope than the CMAs it uses for competitive review of transactions. Given those distinctions, the Commission finds that measuring a bidder's below-1-GHz spectrum holdings amount in a given PEA, based on the highest below-1-GHz holding amount in any one county within a PEA, would not be appropriate.

³ To determine whether an entity is qualified to bid on reserved spectrum, its below-1-GHz spectrum holdings are calculated by summing (PEA county spectrum holdings × PEA county population (using U.S. Census 2010 population data)), and then dividing that sum by the total population of the PEA. In its calculations, the Commission includes licensed spectrum, on a county-by-county basis, as well as all long-term spectrum leasing arrangements, with leased spectrum being attributed to both the lessee and lessor. In those PEAs where there are existing long-term commercial leases, as the Commission attributes the leased spectrum to both the lessee and lessor, it increases the total below-1-GHz spectrum amount included by the (population-weighted) amount of the lease so that service providers' holdings are not overstated.

secondary market transactions, as discussed below. The approximately one-third threshold is, based on its experience in numerous transactions over the last decade, an effective analytical tool in the secondary market context. Similarly, the Commission concludes that a threshold of approximately one-third is an effective line of demarcation to identify those entities that currently lack significant below-1-GHz spectrum holdings and would likely benefit from access to the reserved spectrum. In particular, the Commission finds that this threshold would help to ensure that multiple providers are able to access a sufficient amount of low-band spectrum, which would facilitate the extension and improvement of service in both rural and urban areas, to the benefit of consumers.

81. *Non-Nationwide Providers.* The 45 megahertz holding threshold may have substantial effects on non-nationwide providers that could outweigh the intended benefits.⁴ In many areas, regional and local service providers offer consumers additional choices in the areas they serve and provide some constraint on the ability of nationwide providers to act in anticompetitive ways to the detriment of consumers. Although nationwide providers generally set prices on a national basis, there can be significant variation in discounts, service quality, and extent of coverage at the local level. Non-nationwide providers are also important sources of competition in rural areas, where multiple nationwide service providers may have less incentive to offer high quality services. Today, 92 percent of non-rural consumers, but only 37 percent of rural consumers are covered by at least four 3G or 4G mobile wireless providers' networks and more than 1.3 million people in rural areas have no mobile broadband access. Smaller providers in such areas are likely to be more dependent upon the efficiencies gained from the unique propagation benefits of 600 MHz spectrum because they are less able to subsidize their deployment costs by revenues accrued

⁴ In the 16th *Mobile Wireless Competition Report*, the Commission observed that there are four nationwide providers in the U.S. with networks that cover a majority of the population and land area of the country—Verizon Wireless, AT&T, Sprint, and T-Mobile. For purposes of this R&O, the Commission refers to other providers—with networks that are limited to regional and local areas—as “non-nationwide providers.”

in more densely populated areas where a nationwide subscriber base provides them with greater scale economies. Promoting competition by non-nationwide providers also advances the statutory goals of avoiding excessive concentration of licenses, disseminating licenses among a wide variety of applicants, and encouraging rapid deployment of new wireless broadband technologies to all Americans, including those residing in rural areas.

82. The Commission will permit bidding on 600 MHz reserve spectrum by regional and local service providers in all PEAs, including those where such a provider holds more spectrum than its 45 megahertz holding threshold of the available low-band spectrum. The Commission establishes a bright-line rule to address these issues for the same reasons set forth above for generally adopting bright line rules on spectrum aggregation issues for its 600 MHz Incentive Auction. Non-nationwide service providers enhance competitive choices for consumers in the mobile wireless marketplace, and help promote deployment in rural areas. They also present a significantly lower risk of effectively denying access of low band spectrum to competitors in order to foreclose competition or to raise rivals' costs because of their relative lack of resources. Accordingly, the Commission concludes that non-nationwide service providers should be eligible to bid on reserved spectrum in all markets nationwide.

83. In sum, to qualify to bid on reserved licenses in a PEA, an entity must not hold an attributable interest in 45 megahertz or more of below-1-GHz spectrum in a PEA, as described above, or must be a non-nationwide provider. The Commission will revise the short-form application to provide for a certification by an applicant intending to bid on reserved spectrum that it meets the qualification criteria. If any entity plans to file a pre-auction divestiture application to come into compliance with the below-1-GHz holdings threshold, it will have to file in sufficient time to qualify by the short-form application deadline.

3. Market-Based Amount of Reserved Spectrum

84. Because the Commission will not know the exact number of blocks licensed or their frequencies until the Incentive Auction concludes, the 600 MHz Band Plan in the *Incentive Auction*

Report and Order adopted a set of band plan scenarios that comprise the 600 MHz Band Plan, one of which will serve as the ultimate Band Plan for the 600 MHz Band. Consistent with this approach, the Commission specifies in the chart below the maximum amount of licensed spectrum that will be reserved in each market for eligible entities (“reserve-eligible” entities) in a forward auction for each indicated amount of licensed spectrum at initial stage spectrum clearing targets. A spectrum clearing target will include licensed spectrum and guard bands; the chart refers only to the amount of licensed spectrum included in each target because only licensed spectrum is relevant to determination of the reserve. Each stage of the Incentive Auction will consist of a reverse auction and a forward auction bidding process. Prior to the first stage, the Commission will determine the initial spectrum clearing target and will run additional stages if necessary. If the auction does not close in the initial stage, the maximum amount of reserved licensed spectrum in each individual market in subsequent stages will be the smaller of: (1) The maximum amount of reserved spectrum in the previous stage, or (2) the amount that the reserve-eligible bidders demand at the end of the previous stage. For example, if the initial clearing target is 100 megahertz, the maximum reserve will be 30 megahertz in the initial and subsequent stages. By contrast, if the initial spectrum clearing target is 60 megahertz, the maximum reserve in the initial and subsequent stages will be 20 megahertz. In either case, if the auction fails to close at the initial stage, the maximum reserved spectrum in each PEA at the second stage will be the smaller of the maximum reserve or the amount that reserve-eligible bidders demand at the end of the first stage in that market. Correspondingly, the amount of spectrum that an unreserved bidder may acquire in subsequent stages will depend on the amount that the bidder demanded at the end of the previous stage. The actual amount of spectrum reserved will depend on the demand by reserve-eligible bidders when the auction reaches a trigger (the “spectrum reserve trigger”). Because the actual amount of reserved spectrum depends on auction participation, the Commission calls this a “market-based spectrum reserve.”

Licensed Spectrum In the Initial Clearing Target (in megahertz)	* 100	90	70	60	50	40
Minimum Unreserved Spectrum	70	60	40	40	40	30
Maximum Reserved Spectrum	30	30	30	20	10	10

* The maximum amount of reserved licensed spectrum is 30 megahertz for initial clearing targets with more than 100 megahertz of licensed spectrum.

85. In determining how much reserved and unreserved spectrum will be available, the Commission balances a number of the key statutory directives, including promoting competition, facilitating the deployment of advanced services by making spectrum available for flexible use, and sharing the costs of the Incentive Auction on a fair and equitable basis. For the reasons explained above, the Commission finds that access to licenses for sufficient spectrum in the 600 MHz Band by providers that do not already hold licenses for significant amounts of below-1-GHz spectrum is important to the preservation and promotion of competition in the mobile wireless marketplace now and in the future. At the same time, however, the Commission recognizes that the structure of the Incentive Auction presents unique challenges to the adoption of a spectrum reserve for reserve-eligible bidders. In particular, because the Incentive Auction will rely on market forces to determine the amount of spectrum licenses that will be made available in the forward auction, the Commission needs to ensure that all bidders in the forward auction bear a fair share of the clearing costs identified in the reverse auction and the other costs specified in the Incentive Auction final stage rule.

86. The amount of reserved spectrum in the Incentive Auction will depend upon bidding in the forward auction. The Commission specifies a maximum amount of reserved spectrum in the chart above, but the actual amount of spectrum available only to reserve-eligible bidders will be determined at a spectrum reserve trigger that fairly distributes the responsibility for satisfying the costs of the Incentive Auction among all bidders.

87. The Commission will set the spectrum reserve trigger at the point when the final stage rule is satisfied, so that the actual amount of reserved spectrum will be based on the quantity demanded by reserve-eligible bidders in each individual market at that point in the forward auction. The amount of reserved spectrum will be the smaller of: (1) The maximum amount of reserved spectrum for that stage, or (2) the amount demanded by reserve-eligible bidders at the trigger. The

Commission intends, after opportunity for comment in the Incentive Auction Comment PN, to clarify that reserve-eligible bidders will not be able to acquire more than 20 megahertz of reserved spectrum in a market unless there is another bidder for reserved spectrum in that market. Until the spectrum reserve trigger is met, bidding for licenses in the forward auction will not distinguish between licenses for reserved and unreserved spectrum. Accordingly, all bidders will compete for generic licenses in each area—with a single price applying in each area to all the licenses in a category of generic licenses—up to the point at which the spectrum reserve trigger is reached.

88. *Maximum Amount of Reserved Spectrum.* The Commission sets the maximum amount of reserved spectrum at 30 megahertz for most of the potential amounts of total licensed spectrum made available in the forward auction. Setting the maximum amount of reserved spectrum at a consistent amount across most levels of total licensed spectrum will, among other things, facilitate the repurposing of more spectrum in the 600 MHz Band, because it provides the opportunity, and creates incentives, for all auction participants to bid aggressively to acquire more spectrum licenses as the total amount of available spectrum increases.

89. A 30 megahertz maximum spectrum reserve at most band clearing scenarios also benefits competition and consumers by giving reserve-eligible bidders the assurance that, after the spectrum reserve trigger is reached, they will have a greater opportunity to purchase licenses in the 600 MHz Band. At the same time, its initial maximum reserve amounts ensure that a majority of licenses at the beginning of the forward auction will be available for bidding by all participants under all circumstances. In the *Incentive Auction Report and Order*, the Commission determined that the 600 MHz Band will be licensed in 10 megahertz (5x5 paired) blocks. Some providers have advocated that 20 megahertz of contiguous spectrum is particularly valuable for the deployment of next-generation networks. A maximum of 30 megahertz of reserved spectrum could permit at least two reserve-eligible bidders to

acquire 600 MHz spectrum licenses for deployment of next-generation networks, with one of the bidders potentially acquiring 20 megahertz of reserved spectrum for such deployment. Moreover, a maximum of 30 megahertz of reserved spectrum, an odd number of 10-megahertz blocks, will facilitate competition among bidders seeking to acquire 20 megahertz. In addition, at most levels of total licensed spectrum made available in the forward auction, a maximum of 30 megahertz of reserved spectrum will leave a significant amount of unreserved spectrum available, for which all bidders will have the opportunity to compete.

90. Accordingly, a maximum spectrum reserve of 30 megahertz for most levels of total available spectrum licenses, on balance, will make additional low-band spectrum available to multiple providers; ensure that all bidders have an opportunity to acquire a stake in the 600 MHz ecosystem that will be critical in the future; and facilitate competitive bidding. However, if the amount of licensed spectrum at the initial stage target is less than 70 megahertz, maintaining a maximum of 30 megahertz of reserved spectrum would not be in the public interest. Maintaining that amount of reserved spectrum would potentially reduce the amount of unreserved spectrum to 20 or even 10 megahertz, which the Commission deemed to be too low to provide all bidders with an adequate opportunity to acquire licenses in the 600 MHz Band.

91. *Market-Based Spectrum Reserve.* Under the market-based spectrum reserve rule, the amount of reserved spectrum in each individual PEA will be set at the level demanded by reserve-eligible entities at the time the spectrum reserve trigger is satisfied, up to the maximum amount of reserved spectrum at the beginning of the stage. Once the spectrum reserve is established, bidders will bid separately for generic reserved and unreserved spectrum licenses, with reserve-eligible bidders able to bid for spectrum in either category, and the other bidders able to bid only for the unreserved spectrum. For instance, if the spectrum reserve trigger is met in a stage with a maximum of 30 megahertz of reserved spectrum, if reserve-eligible bidders demand only 20 megahertz in a

given PEA at those prices when the trigger is met, then 20 megahertz will be reserved.

92. The market-based reserve rule would not prevent unreserved bidders from acquiring the minimum initial stage amount of unreserved spectrum specified in the chart above in subsequent stages of the auction, provided they bid actively on that amount of spectrum throughout the auction, beginning in the first stage. For example, if an unreserved bidder demands 20 megahertz throughout the initial stage (including the extended round) but the stage fails, that bidder will be eligible to bid for 20 megahertz in the next stage. The Commission anticipates that bidding in the most urban areas is likely to be the most intense, with the highest bids, and thus that the spectrum reserve trigger mechanism the Commission ultimately adopted will mean that reserved spectrum in those areas will sell only at substantial prices.

93. The market-based reserve rule the Commission adopts balances the need to meet the requirements for concluding the Incentive Auction with the competition goals discussed above. Setting an appropriate spectrum reserve trigger for determining how much spectrum will be allotted for reserve-eligible bidders will ensure that all bidders, those eligible to bid on reserved spectrum and other bidders, contribute a fair share to the clearing costs identified in the reverse auction and the other costs specified in the Incentive Auction final stage rule. The market-based spectrum reserve leverages competition across both reserved and unreserved spectrum to provide all bidders with the incentive to bid aggressively and repurpose larger rather than smaller amounts of spectrum. Further, the contingent nature of the reserve will create reserves only in PEAs where there is sufficient demand at the point where the spectrum reserve trigger is reached. This will ensure spectrum is reserved only where there is demand at market-based prices and increase the likelihood that the auction will close at a higher spectrum target.

94. In the coming months, the Commission will solicit public input in the *Incentive Auction Comment PN* on procedures for implementing certain auction-related decisions made in the *Incentive Auction Report and Order*. Among other things, the *Comment PN* will seek comment on how to establish the details of a spectrum reserve trigger based on the final stage rule, in order to fairly distribute the responsibility for satisfying the costs of the reverse auction among all bidders. Among other

things, the Commission will consider whether the trigger should be based solely on prices or revenues in the “major markets” and, if so, how to identify such markets. The *Procedures PN* will adopt the details of its spectrum reserve trigger at the same time that the Commission establishes final auction procedures and resolves crucial auction design issues, including the benchmarks required to implement the final stage rule, opening prices, and how much market variation to accommodate in the 600 MHz Band Plan.

4. Holding Period for 600 MHz Band Licenses

95. The Commission finds that certain restrictions on secondary market transactions of 600 MHz Band licenses are necessary in certain circumstances. These secondary market restrictions for 600 MHz Band licenses will not apply to exchanges of equal amounts of 600 MHz Band spectrum in the same market.

96. First, the Commission recognizes that its goal in adopting the spectrum reserve—facilitating access to 600 MHz Band licenses in order to ensure against excessive concentration in holdings of low-band spectrum—could be undermined if entities that would not be permitted to acquire reserved 600 MHz Band licenses in the auction are permitted to acquire them after the auction through secondary markets. The risk of undermining its goals for competition and the Incentive Auction must be balanced, however, against the Commission’s general policy of promoting flexibility in secondary markets transactions. The Commission finds that precluding secondary market transactions of 600 MHz Band licenses for six years, which represents the interim buildout period for 600 MHz licenses, strikes the appropriate balance to preserve the integrity of its market-based spectrum reserve while still permitting some flexibility in secondary markets transactions. Accordingly, the Commission concludes that, for a period of six years, entities that acquired reserved spectrum licenses in the Incentive Auction cannot assign or transfer those licenses to, or enter into long-term leases regarding those licenses with, entities that would not have been in compliance with the reserve-eligible entity requirements on the date the short form application was due for the Incentive Auction.

97. In addition, the Commission notes that its decision to adopt a holding period reflects its continuing efforts to avoid excessive concentration of licenses not only as a result of the Incentive Auction, but also to ensure

that secondary market transactions do not frustrate the underlying public interest goals of its mobile spectrum holdings policies for this band. Aggregation of 600 MHz Band spectrum by means of secondary market transactions has the potential to further exacerbate its concerns about below-1-GHz spectrum license concentration, which must be balanced against the Commission’s general policy of promoting flexibility in secondary market transactions. Accordingly, the Commission will prohibit any transfer, assignment, or long-term leasing of any 600 MHz Band licenses (including unreserved 600 MHz Band licenses) for a period of six years post-auction that would result in the acquiring entity holding approximately one-third or more of suitable and available below-1-GHz spectrum post-transaction. Given that this limit is a bright-line prohibition, the acquiring entity’s below-1-GHz spectrum holdings will be determined by a population-weighted methodology.

5. Further Implementation Issues

98. The Commission will seek comment in the *Incentive Auction Comment PN* on any further implementation issues that may affect its market-based spectrum reserve, and whether and if so how the policies and rules the Commission adopted should apply or be adjusted based on any auction details that might be relevant to the process (e.g., auctioning impaired spectrum blocks). The Commission will resolve any relevant further implementation in the *Incentive Auction Procedures PN*.

6. Legal Authority

99. Section 6404 of the Spectrum Act, codified at 47 U.S.C. 309(j)(17), provides that the Commission may not “prevent” a person who is otherwise qualified from “participating in a system of competitive bidding” under Section 309(j). However, Section 6404 further provides that “[n]othing in [the foregoing restriction] affects any authority the Commission has to adopt and enforce rules of general applicability,” including without limitation “rules concerning spectrum aggregation that promote competition.”

100. The Commission finds that its adoption of reserved spectrum for the Incentive Auction is fully consistent with its authority under Title III and the Spectrum Act. The market-based spectrum reserve that the Commission adopted are “rules of general applicability” that fall under the Spectrum Act’s savings clause codified at 47 U.S.C. 309(j)(17)(B). The term

“rule of general applicability” is a term of art; it has an established meaning under the Administrative Procedure Act. “In the absence of contrary indication, the Commission assumes that when a statute uses . . . a term [of art], Congress intended it to have its established meaning.” The established meaning of the term “rule of general applicability” is a rule that is not party-specific, that is, not a “rule of particular applicability.” It is to be contrasted with, for example, a named telephone company’s rate of return. The rule that the Commission adopted would be triggered by the amount of an entity’s below-1-GHz spectrum holdings; depending upon the particular geographic market, eligibility to bid for the reserved spectrum may vary. And the mere fact that, in a particular PEA, a specific person would not be so eligible does not render the rule one of particular applicability. Even a general rule must have potential particular effect—otherwise every rule would be ineffective. For similar reasons, it need not apply on an industry-wide basis, or apply to all Commission auctions. Because the rule that the Commission adopted applies to any entity that has the general characteristics identified in the rule, the rule is not party-specific.

101. In addition, by expressly stating that “[n]othing in subparagraph (A) affects any authority the Commission has to adopt and enforce . . . rules concerning spectrum aggregation that promote competition[.]” Section 309(j)(17)(B) preserves the Commission’s long-standing authority under Title III of the Communications Act to adopt “rules concerning spectrum aggregation that promote competition.” Over the past three decades that the Commission has licensed mobile wireless spectrum, Title III authority has been the basis for several restrictions that the Commission has adopted regarding spectrum aggregation, including *ex ante* limitations. The Court of Appeals for the District of Columbia Circuit has affirmed that Title III grants the Commission “expansive authority” to regulate mobile wireless licenses, and that authority includes its power to regulate spectrum concentration in mobile wireless markets.

102. Because the rules the Commission adopted today fall squarely under the historical authority of the Commission under Title III as preserved by subparagraph (B), the new prohibition created in subparagraph (A) is not applicable. In other words, the Commission interprets Section 6404 to preserve the Commission’s authority to adopt rules of general applicability

regarding spectrum aggregation, without regard to whether such rules prevent participation in a system of competitive bidding.

103. Even if subparagraph (A) were to apply to an *ex ante* reservation of spectrum, the market-based spectrum reserve that the Commission adopted does not violate that provision because it would not “prevent” any entity “from participating” in a “system of competitive bidding.” Supreme Court precedent compels us to interpret these terms according to their ordinary meaning. The ordinary meaning of “prevent” is “to stop someone from doing something,” and the ordinary meaning of “participate” is “to take part” or “to have a part or a share in something.” Thus, the ordinary meaning of the phrase “prevent . . . from participating,” in context, is that the Commission may not stop a person who is otherwise qualified from taking part in a system of competitive bidding.

104. The term “a system of competitive bidding” is also a term of art that refers broadly to the process for granting licenses through competitive bidding, including, identifying classes of licenses to be assigned by auction, specifying eligibility and other characteristics of such licenses, and designing the methodologies to be used for competitive bidding for particular licenses. Thus, participation in a “system of competitive bidding” does not mean that every entity must be able to participate in the bidding for every single license or spectrum block that may be available in an auction.

105. The market-based spectrum reserve the Commission adopted will permit all bidders to bid for some spectrum licenses in every market, while reserving certain spectrum blocks for providers with existing holdings of below-1-GHz spectrum of less than 45 megahertz. In a single PEA, under every band scenario there will be at least as much unreserved as reserved spectrum, and in some scenarios from two to three times as much. Its action will satisfy its statutory mandate to promote very broad participation in its systems of competitive bidding by current providers of mobile services and potential entrants into the wireless data and telephony marketplace.

106. Finally, the Commission determined that it is clear from the plain text of Section 309(j)(B)(17) that the Commission has the authority to adopt the market-based spectrum reserve in its design of a system of competitive bidding. Accordingly, the Commission concluded that the market-based spectrum reserve that the Commission adopted does not prevent any person

from participating in its system of competitive bidding in a manner contrary to the Spectrum Act.

107. The Commission disagrees with arguments that it did not provide adequate notice under the APA. First, the Commission inquired about an *ex ante* restriction in the *Incentive Auctions NPRM*, observing that “section 309(j)(3)(B)’s direction to avoid excessive concentration of licenses might militate in favor of a rule that permits any single participant in the auction to acquire no more than one-third of all 600 MHz spectrum being auctioned in a given license area.” The rule that the Commission adopted is a “variatio[n] of that approach,” on which the Commission also sought comment. It would prevent providers in certain circumstances from bidding on reserved 600 MHz spectrum in some PEAs in the Incentive Auction. However, all providers will be permitted to bid on more than one-third of the available spectrum in any PEA. In addition, the Commission specifically asked about adoption of a bright-line limits approach in the *Mobile Spectrum Holdings NPRM*, including limits on holdings below 1 GHz and band-specific limits. Applying a 600 MHz limit applicable only to bidders with significant holdings below 1 MHz also is a logical outgrowth of issues identified in the NPRM. Where the Commission asked about a one-third limit, it did so “[a]s [an] example.” The Commission finds that the market-based spectrum reserve the Commission adopted is consistent with the Spectrum Act and with its general authority under Title III and was adequately noticed under the APA.

C. AWS-3 Auction

108. In the *Mobile Spectrum Holdings NPRM*, the Commission sought comment on whether to adopt limits on the amount of spectrum that entities could acquire in the context of spectrum auctions mandated by the Spectrum Act. In the *AWS-3 NPRM*, the Commission sought comment on whether and how to address the mobile spectrum holdings issues to meet its statutory requirements pursuant to section 309(j)(3)(B) and its goals for the AWS-3 bands.

109. The Commission finds that, on balance, it is not in the public interest to adopt a band-specific mobile spectrum holdings limit for the AWS-3 auction. Nothing in the record indicates that without such a limitation, opportunities for access to spectrum with similar characteristics would be significantly constrained. In particular, the Commission emphasizes the availability of a substantial amount of

comparable high-band spectrum to competitors and the significant existing holdings of multiple providers of comparable spectrum. In addition, with rising demand for mobile broadband services, increasing network capacity is important to all providers, and above-1-GHz spectrum is particularly suitable for such needs. The 65 megahertz of AWS-3 spectrum that the Commission plans to auction have the potential to allow for greater network capacity for all providers to meet this demand.

110. The Commission notes that multiple providers currently have access to bands comparable to AWS-3. Moreover, each of the four nationwide providers holds a significant amount of this spectrum. This is unlike the case with the 600 MHz Band, which has fewer "coverage band" substitutes (700 MHz and 800 MHz). Moreover, in contrast to bands comparable to AWS-3, the bands comparable to the 600 MHz Band are held by a limited number of service providers. Accordingly, while it is necessary to adopt a 600 MHz Band specific spectrum holding policy, such an approach is not necessary for the AWS-3 auction.

IV. Secondary Market Transactions

111. The Commission articulated its framework for a case-by-case review for the first time in analyzing the *Cingular-AT&T Wireless* transaction in 2004. In particular, in that context and in its analysis of subsequent proposed transactions, the Commission used an initial screen to help identify for case-by-case review local markets where changes in spectrum holdings resulting from the transaction may be of particular concern. For transactions that result in the acquisition of wireless business units and customers or change the number of firms in any market, the Commission also applies an initial screen based on the size of the post-transaction HHI of market concentration and the change in the HHI. As set out in various transactions orders, however, the Commission has not limited its consideration of potential competitive harms solely to markets identified by its initial screen, if it encounters other factors, such as increased aggregation of below-1-GHz spectrum that may bear on the public interest inquiry.

112. The Commission finds that it is in the public interest to retain its current case-by-case review for secondary market transactions. The Commission will also retain its current product and geographic market definitions. The Commission will continue to apply the spectrum screen on a county-by-county basis to identify

those CMAs where an entity would hold approximately one-third or more of the total spectrum that is suitable and available for the provision of mobile telephony/broadband services post-transaction, and will evaluate these markets for any competitive harm. Further, the Commission will continue to evaluate the likely competitive effects of increased aggregation of below-1-GHz spectrum, and in particular, will pay specific attention to those markets in which a proposed transaction would result in a service provider holding approximately one-third or more of suitable and available below-1-GHz spectrum post-transaction. Moreover, the Commission finds that it is in the public interest not to limit its analysis of potential competitive harms to solely those markets identified by the initial screen, if the Commission encounters other factors that may bear on the public interest inquiry.

A. Case-by-Case Review vs. Bright Line Limits

113. In the *Mobile Spectrum Holdings NPRM*, the Commission observed that the case-by-case approach to proposed transactions review affords the Commission flexibility to consider the unique circumstances of a proposed transaction and the changing needs of the mobile wireless marketplace generally, and to tailor remedies to the specific harm and circumstances. At the same time, however, the Commission noted that case-by-case review is both time- and resource-intensive, and has been criticized for creating uncertainty as to whether a particular transaction will be approved. The Commission sought comment on the costs and benefits of its case-by-case review and whether the review of proposed transactions could be more transparent, predictable, or better tailored to promote its goals. The Commission asked if bright-line limits, similar to the CMRS spectrum cap eliminated in 2003, would better serve the public interest.

114. The Commission finds that it is in the public interest to continue to use its initial spectrum screen and case-by-case analysis to evaluate the likely competitive effects of increased spectrum aggregation through secondary market transactions, rather than to adopt a bright-line limit. It observes that the fundamental principles that the Commission articulated in eliminating the spectrum cap in favor of a case-by-case approach to transactions review continue to apply today. Moreover, in the context of transactions review, the Commission is concerned that *ex ante* limits on spectrum aggregation may prevent transactions that are in the

public interest. The Commission has found that in reviewing secondary market transactions, the complex technical, strategic, and economic factors that determine the likely competitive effects of increased spectrum aggregation require a case-by-case assessment.

115. The Commission distinguishes its decision to retain case-by-case review for spectrum acquisitions through transactions from its determination above that any mobile spectrum holding limit applied to auctions should be a bright-line rule. The unique circumstances typically associated with spectrum auctions, particularly the time constraints and the need for certainty for each bidder regarding which licenses it would be permitted to acquire at the auction, make case-by-case analysis challenging in the auction context.

B. Market Definitions

116. The Commission considers whether to modify the current market definitions that the Commission uses in its competitive analysis for proposed secondary market transactions. The Commission concludes that it is in the public interest to retain the current product market definition and the current geographic market definition.

1. Relevant Product Market

117. *Background.* In its recent transaction orders, the Commission has determined that the relevant product market is a combined "mobile telephony/broadband services" product market that comprises mobile voice and data services, including mobile voice and data services provided over advanced broadband wireless network (mobile broadband services).

118. In the *Mobile Spectrum Holdings NPRM*, the Commission sought comment on whether the product market definition should be modified to reflect differentiated service offerings, devices and contract features, for instance, or whether smaller sub-markets should be defined within a larger market. The Commission also sought comment on the costs and benefits of any potential modifications.

119. The Commission retains the current product market definition. The Commission does not find sufficient evidence in the record to support a change in the current product market definition. The Commission finds that the current product market definition, "mobile telephony/broadband services," continues to encompass the mobile voice and data services that are provided today, and is sufficiently flexible to reflect emerging, next-

generation wireless services. The Commission did not find evidence in the record to convince us that the current definition has been defined too broadly or too narrowly for purposes of its competitive analysis. As set out in prior transactions, the product market the Commission defined encompasses differentiated services (e.g., voice-centric or data-centric), devices (e.g., feature phone, smartphone, tablet, etc.), and contract features (e.g., prepaid vs. postpaid). While such distinctions may suggest the possibility of smaller markets nested within that larger product market, the Commission finds it unnecessary to define such smaller product markets in order to analyze the potential competitive effects of secondary market transactions. The Commission will continue to consider these aspects of product differentiation, as appropriate, when the Commission analyzes the competitive effects of the proposed secondary market transaction within the markets the Commission defined. Therefore, the Commission finds it is in the public interest to retain the current product market definition.

2. Relevant Geographic Market

120. In its recent transactions orders, the Commission has found that the relevant geographic markets for certain wireless transactions generally are local, while also evaluating a transaction's competitive effects at the national level where a transaction exhibits certain national characteristics that provide cause for concern. In the *Mobile Spectrum Holdings NPRM*, the Commission sought comment on the appropriate geographic market definition to use when evaluating a licensee's mobile spectrum holdings, under either its current case-by-case analysis or if bright-line limits were adopted.

121. The Commission finds for purposes of evaluating the competitive effects of proposed transactions it will continue to use local geographic markets, but also will analyze potential national effects as appropriate. The Commission continues to find that most consumers use their mobile telephony/broadband services at or close to where they live, work, and shop, in support of its decision that local markets are the relevant geographic markets in which to analyze the potential for competitive harms as a result of certain wireless transactions. Certain elements of the provision of mobile wireless services are national in scope, including key variables such as pricing, development of equipment, and service plan offerings, and nothing in the record suggests that the basis for this finding

has changed. The Commission also will continue therefore to analyze the potential competitive effects of those wireless transactions that exhibit national characteristics, such as increased spectrum aggregation in many local markets across the country with the implication that harms that may occur at the local level collectively could have nationwide competitive effects.

C. Applicable Spectrum Holdings Threshold

122. In 2004 the Commission established a spectrum screen threshold of approximately one-third of suitable and available spectrum that would be held by the acquiring entity post-transaction. In the *Mobile Spectrum Holdings NPRM*, the Commission sought comment on whether one-third is still the appropriate threshold generally, and whether a higher threshold should apply in rural areas.

123. The Commission will retain the approximately one-third threshold for applying its initial spectrum screen. Based on its experience in applying this threshold in numerous transactions over the last decade, the Commission has found it to be an effective analytical tool in helping to identify individual markets where a proposed transaction may raise particular competitive concerns. In its application of the screen, the Commission includes not only the entity's licensed spectrum, on a county-by-county basis, but also all long term spectrum leasing arrangements, with spectrum being attributed to both the lessee and lessor.

124. The Commission finds that even where one entity holds approximately one-third of suitable and available spectrum, a market may contain more than three viable competitors. Its goal is not to equalize the amount of spectrum held by each competitor in each market. Increasing the threshold, would not be in the public interest.

125. The Commission also disagrees with AT&T's assertion that the Commission can increase the spectrum screen threshold because the costs of "false positive" errors—chilling innovation and investment, and an inefficient use of the Commission's resources—outweigh the costs of "false negative" errors because spectrum acquisitions that would harm competition would be remedied by other Federal agencies (e.g., DOJ). As the Commission previously has stated in the context of orders addressing proposed transactions, its competitive analysis, which forms an important part of the public interest evaluation, is informed

by, but not limited to, traditional antitrust principles.

126. In addition, the Commission declines to adopt a spectrum screen threshold based on spectrum share HHIs finding that to do so would mark a substantial departure from its traditional approach that is not supported by the record. The Commission does not believe the record demonstrates the efficacy of applying an HHI analysis to an input market, and believes establishing such a requirement would be burdensome and create substantial uncertainty.

127. The Commission declines to establish a higher spectrum screen threshold for rural markets. In rural areas there are significant benefits to consumers of facilitating access by multiple providers to sufficient spectrum, such that they are able to provide an effective competitive constraint. To the extent there are unique considerations in a particular rural market such that spectrum aggregation above the spectrum screen is in the public interest; its case-by-case analysis provides the Commission the flexibility to approve such a transaction.

128. Accordingly, the Commission will continue to apply an approximately one-third spectrum screen threshold in its review of secondary market spectrum acquisitions. Specifically, the modified spectrum screen the Commission adopted would include 580.5 megahertz of spectrum, with a trigger of 194 megahertz, or approximately one-third of the suitable and available spectrum. The spectrum screen is triggered where the Applicants would have, on a county-by-county basis, an attributable interest in 194 megahertz or more of spectrum where both AWS-1 and BRS/EBS spectrum are available in the particular market. If AWS-1 and/or BRS/EBS spectrum are not available in that market, these bands are not counted for purposes of applying the spectrum screen trigger in that market.

D. Operation of the Spectrum Screen

129. As set out in various transactions orders, the Commission has not limited its consideration of potential competitive harms solely to markets identified by its initial screen, if it encounters other factors that may bear on the public interest inquiry. For example, the Commission has considered below-1-GHz concentration, and concentration within a particular spectrum band, including a band that was not at the time included in the spectrum screen. In the *Mobile Spectrum Holdings NPRM*, the Commission sought comment on establishing a higher burden of proof for

the approval of proposed transactions that would exceed the relevant spectrum threshold.

130. The Commission will continue to review on a case-by-case basis those markets in which an entity would exceed the initial spectrum screen if the transaction as proposed were approved. The Commission declines to establish a rebuttable presumption, finding it would unnecessarily limit the Commission's flexibility. Further, the Commission affirms the Commission's conclusions that its consideration of potential competitive harms resulting from a proposed spectrum acquisition in the secondary market should not be limited solely to markets identified by the initial screen, if the Commission encounters other factors that may bear on its public interest inquiry. For instance, the Commission has specifically analyzed the potential competitive effects of aggregation of spectrum below 1 GHz. The Commission finds, in light of current marketplace conditions, that access by multiple service providers to sufficient spectrum below 1 GHz will preserve and promote competition in the mobile wireless marketplace to the benefit of American consumers, and therefore find that further significant aggregation of below-1-GHz spectrum holdings in secondary market transactions will be subject to enhanced review in its case-by-case competitive evaluation, as discussed below.

131. While the Commission recognizes that a safe harbor would provide greater certainty to applicants, just as a bright-line limit would provide greater certainty, the Commission finds that in the context of secondary market transactions, it is in the public interest to maintain flexibility to consider any factors presented that may bear on our review. Moreover, in the absence of such flexibility, the Commission's review of future proposed transactions would be limited by its understanding of technology and industry practices at the time it adopted the specific thresholds. The Commission finds that its articulation of factors it will consider in its case-by-case analysis as set forth below provides sufficient clarity to potential applicants, while maintaining flexibility to consider changes in technology and industry practices in the rapidly-evolving mobile wireless marketplace.

132. The Commission distinguishes its decision not to adopt a safe harbor for case-by-case review of spectrum acquisitions through transactions from its determination above that any mobile spectrum holdings limit applied to auctions should be a bright-line rule.

The unique circumstances typically associated with spectrum auctions, particularly the time constraints and the need for certainty for each bidder regarding which licenses it would be permitted to acquire at the auction, make case-by-case analysis challenging in the auction context.

E. Nationwide Screen

133. In the *Mobile Spectrum Holdings NPRM*, the Commission sought comment on whether, in addition to the spectrum screen applied on a county-by-county basis in helping to identify local markets of particular competitive concern, it should also adopt a separate screen that would be applied on a nationwide basis.

134. The Commission declines to establish a separate screen as a means to evaluate spectrum holdings at the nationwide level. The Commission finds it would either be redundant or create irrational incentives for providers to divest or to forego acquisition of spectrum in markets in which there would be a net public benefit from such an acquisition. However, as certain elements of the provision of mobile wireless services are national in scope, including key variables such as pricing, development of equipment, and service plan offerings, the Commission will continue to analyze the potential competitive effects of those secondary market transactions that exhibit national characteristics. Increased spectrum aggregation in many local markets across the country may imply that harms that occur at the local level collectively could have nationwide competitive effects. The Commission finds that it is in the public interest to continue to define local geographic markets but also to analyze potential national effects as appropriate.

F. Distinguishing among Spectrum Bands for Transactions Review

135. In recent years, the Commission has considered below-1-GHz spectrum concentration as a factor in its review of spectrum acquisitions in the secondary market. In the *Mobile Spectrum Holdings NPRM*, the Commission sought comment on whether it should adopt a separate screen for below-1-GHz spectrum under which an entity that would hold, post-transaction, approximately one-third or more of the relevant spectrum below 1 GHz in a geographic market would be subject to a more detailed competitive review in that market. The Commission also sought comment on whether, alternatively, it should establish a bright-line limit for spectrum holdings below 1 GHz, whether it should assign

different weights to each of the spectrum bands as part of its case-by-case review, or whether it should take any other action to recognize distinctions between spectrum bands in its competitive review of proposed transactions.

136. The Commission declines to adopt a separate screen or bright-line limit for below-1-GHz spectrum holdings, or a set of weighting factors for each spectrum band included in its initial spectrum screen. Post-transaction below-1-GHz spectrum holdings will be an enhanced factor under its case-by-case review.

1. Below-1-GHz Limit

137. Several commenters assert that the Commission should supplement the total spectrum screen applied to transactions with a screen or a bright-line limit for below-1-GHz spectrum, ranging from 25 percent to 40 percent.

138. The Commission adopts a market-based spectrum reserve for the Incentive Auction and to set limitations on the assignment or transfer of 600 MHz licenses after the Incentive Auction. These actions will help to ensure that multiple providers are able to access a sufficient amount of low-band spectrum, which will facilitate the extension and improvement of service in both rural and urban areas, to the benefit of consumers. In light of these actions, the Commission concludes that it is not necessary at this time to adopt a separate screen or cap applicable to its evaluation of the assignment or transfer of below-1-GHz spectrum. Nonetheless, the Commission will continue to evaluate below-1-GHz holdings as a factor in its case-by-case review of such transactions, consistent with the Commission's precedent in the past few years. Moving forward, post-transaction below-1-GHz spectrum holdings will become an enhanced factor in its competitive evaluation, as discussed below, and therefore, the Commission will apply particular focus to its review of this factor as the Commission evaluated the likelihood of potential competitive harms.

2. Spectrum Weighting

139. *Background.* Several commenters, including Sprint, assert that the Commission should weight spectrum bands to reflect the extent to which spectrum at that frequency yields lower costs for the deployment and operation of equipment. Other approaches to weighting raised on the record include using price data from spectrum auctions and secondary market transactions. Others contend that spectrum weighting would distort the

Commission's analysis of the competitive effect of proposed transactions and is otherwise impractical to implement. Sprint argues that weight spectrum should be based on the cost to deploy and operate using a particular band, arguing that low-band spectrum is typically significantly more cost-effective to deploy than higher-frequency spectrum.

140. The Commission finds that, in principle, spectrum weighting has the potential to enhance its competitive analysis of proposed spectrum acquisitions. However, the Commission concludes that, at this time, it cannot justify, on the basis of the record, adopting specific weighting factors for each spectrum band. Nonetheless, the Commission observes that the data submitted on the record does demonstrate that there are significant differences in deployment costs between low-band and high-band spectrum, and it is able to consider those differences as a key factor in its case-by-case analysis moving forward.

141. The Commission finds that to establish specific weighting factors for each spectrum band based on band-specific signal propagation characteristics raises certain issues, including the underlying assumptions that are appropriate to make. Further, the Commission finds that establishing specific weighting factors based on other factors, such as the "value" of the spectrum, also raises certain issues as prices paid at auction vary significantly over time based on a variety of factors not necessarily related to the characteristics of the spectrum being auctioned. The Commission finds that treating below-1-GHz spectrum concentration as an enhanced factor in its case-by-case analysis is a better approach at this time because it is able to distinguish between the characteristics of different frequency bands without imposing a weighting schema that may fail to accurately reflect their competitive significance. Based upon the record in this proceeding, the Commission concludes that adopting a spectrum weighting schema would not be in the public interest at this time.

G. Factors Considered in Competitive Analysis

142. *Background.* In its evaluation of proposed secondary market transactions, the Commission broadly assesses whether and to what extent proposed acquisitions of wireless spectrum could affect downstream competition in the mobile telephony/broadband services marketplace. In particular, the Commission's

competitive analysis of wireless transactions focuses initially on those markets identified by the screen where the acquisition of customers and/or spectrum would result in significant concentration of either or both, and thereby could lead to competitive harm. As discussed above, however, the Commission has not limited its consideration of potential competitive harms solely to markets identified by its initial screen if it encounters other factors that may bear on the public interest inquiry. Specifically, the Commission has considered concentration of below-1-GHz holdings, and concentration of spectrum within a specific band.

143. In its transactions analyses, the Commission has considered various other factors that help to predict the likelihood of competitive harm post-transaction. These competitive variables include, but are not limited to: The total number of rival service providers; the number of rival firms that can offer competitive nationwide service plans; the coverage by technology of the firms' respective networks; the rival firms' market shares; the combined entity's post-transaction market share and how that share changes as a result of the transaction; the amount of spectrum suitable for the provision of mobile telephony/broadband services controlled by the combined entity; and the spectrum holdings of each of the rival service providers. The Commission notes that it is important to recognize that many transactions are more than spectrum transfers; they involve the disappearance of a separate business enterprise as an ongoing potential competitive constraint and source of innovations in services and marketing.

144. In the *Mobile Spectrum Holdings NPRM*, the Commission asked if it should adopt guidelines setting forth the factors that will be considered during any review of a licensee's mobile spectrum holdings or delegate authority to the Wireless Telecommunications Bureau to do so.

145. *Discussion.* The Commission retains the authority to consider all factors that could affect the likely competitive impact of proposed transactions, and declines to adopt a formal set of guidelines at this time. It does not find sufficient evidence in the record to support the adoption of the specific standards advocated by commenters regarding spectrum utilization or spectrum weighting. Nonetheless, the Commission retains the right to consider such factors in specific future transactions. In addition, parties are free to bring such matters to the Commission's attention. It affirms its

continued use of the factors considered in the Commission's case-by-case analyses to date of the potential competitive impacts of further concentration of spectrum in particular markets. The Commission continues to hold the view that band concentration may be a relevant factor to consider in its case-by-case analysis, and recognize that changes in technology and the marketplace may result in band-specific concentrations warranting increased scrutiny.

146. Certain frequencies possess distinct characteristics for the provision of mobile wireless services, and a service provider is best positioned if it holds spectrum licenses for both low- and high-band spectrum. The Commission finds that spectrum holdings by service provider in the limited low- (i.e., below-1-GHz) bands have become particularly concentrated. The Commission has concerns about the potential effects of further concentration of below-1-GHz spectrum on competition and innovation in the mobile wireless services marketplace. The Commission decided not to adopt a separate below-1-GHz screen or cap at this time. Building on the Commission precedent in the past few years, however, it will treat certain further concentration of below-1-GHz spectrum as an enhanced factor in its case-by-case analysis of the potential competitive harms posed by individual transactions.

147. The Commission currently considers a variety of factors in its case-by-case analysis of spectrum acquisition through transactions—including, but not limited to the total number of rival service providers; the number of rival firms that can offer competitive service plans; the coverage by technology of the firms' respective networks; the rival firms' market shares; the amount of spectrum suitable for the provision of mobile telephony/broadband services controlled by the combined entity; the spectrum holdings of each of the rival service providers; the acquisition of below-1-GHz spectrum nationwide; and concentration in a particular band with an important ecosystem. In analyzing spectrum acquisitions based on these factors, the Commission generally determines, based on the totality of the circumstances, whether there is an increased ability or incentive for the acquiring firm to successfully raise prices or otherwise engage in anti-competitive behavior. The Commission then employs a balancing test weighing any potential public interest harms against any potential public interest benefits, and the applicants bear the burden of proving, by a preponderance of the evidence, that the proposed

transaction, on balance, will serve the public interest.

148. In implementing this approach going forward, the Commission anticipates that any entity that would end up with more than one third of below-1-GHz spectrum as a result of a proposed transaction would facilitate its case-by-case review with a detailed demonstration regarding why the public interest benefits outweigh harms. When the other factors the Commission ordinarily considers indicate a low potential for competitive or other public interest harm, the acquisition of below-1-GHz spectrum resulting in holdings of approximately one-third or more of such spectrum will not preclude a conclusion that a proposed transaction, on balance, furthers the public interest. Absent that, however, any transaction that would result in an entity holding approximately one-third or more of suitable and available below-1-GHz spectrum will more likely be found to cause competitive harm in its case-by-case review.

149. Consistent with its overall concerns about the potential public interest harms regarding the concentration of below-1-GHz spectrum, the Commission anticipates it likely would have even greater concerns where the proposed transaction would result in an assignee or transferee that already holds approximately one-third or more of below-1-GHz spectrum in a market acquiring additional below-1-GHz spectrum in that market, especially with regard to paired low-band spectrum. In these cases, the demonstration of the public interest benefits of the proposed transaction would need to clearly outweigh the potential public interest harms associated with such additional concentration of below-1-GHz spectrum, irrespective of other factors. For instance, applicants could provide a particularly detailed showing in such cases that they currently are maximizing the use of their spectrum and how the proposed transaction is necessary to maintain, enhance, or expand services provided to consumers. The Commission believes such a showing would be required to achieve its goal of ensuring that the ability of rival service providers to offer a competitive response to any price increase or to offer new innovative services is not eliminated or significantly lessened.

150. The Commission finds that considering additional below-1-GHz spectrum concentration as an enhanced factor in its review of secondary market transactions will help ensure that further concentration of such spectrum will not have adverse competitive

effects either in particular local markets or on a broader regional or national level.

151. In addition, although the Commission declines to adopt specific weighting factors for each band, or for groups of bands, it recognizes that differences between spectrum bands can be relevant to a determination of the public interest in the context of reviewing transactions. It will consider such differences in its case-by-case review of specific transactions. For example, applications involving small amounts of high-band spectrum, particularly EBS spectrum, likely would present limited potential for public interest harms.

H. Remedies

152. In the *Mobile Spectrum Holdings NPRM*, the Commission sought comment on the remedies, including divestitures that would be appropriate for it to prevent competitive harm resulting from spectrum acquisitions. In particular, it sought comment on whether different approaches or types of divestitures would best serve the Commission's goals, and whether the Commission should adopt different criteria for divestiture based on whether the spectrum to be divested is from lower or upper frequency bands or is immediately "useable" by another licensee. It sought comment on the extent to which the Commission should remedy the potential harms posed by a transaction by placing other conditions, such as, for example, requirements to offer leasing, roaming or collocation, in conjunction with, or in lieu of, requiring divestitures.

153. Based upon the record in this proceeding, the Commission believes it is unnecessary to change its existing approach to protecting and promoting the public interest, including competition, through the application of transaction-specific remedies. Its case-by-case analysis allows the Commission to carefully tailor remedies that address and ameliorate public interest harms or alternatively ensure that proposed public interest benefits are realized by consumers. The Commission does not believe, and the record does not indicate, that the narrowly-tailored, fact-specific remedies it has required in recent transactions have discouraged transactions that generally are in the public interest, and it does not conclude that any greater specificity with regard to remedies would significantly affect parties' willingness to enter into transactions. The Commission finds that the public interest benefits and public interest harms often are specific to each transaction, and that limiting possible

remedies *ex ante* would undercut the benefits of case-by-case review, that is, the tailoring of the review, and remedies, to the specific circumstances of any given transaction. The Commission does not see any evidence in the record that the use of tailored remedies has inhibited competitiveness-enhancing transactions, and it finds that there are the pro-competitive effects of the Commission's policies on remediation. The Commission declines to limit possible remedial action as AT&T suggests. The Commission's public interest analysis, which considers the near and long-term competitive effects of spectrum aggregation, and which may have an impact beyond the local markets involved should not be limited to a particular geographic location or spectrum band in proposing remedies to protect the public interest.

V. Attribution of Interests in License Holdings

154. In the *Mobile Spectrum Holdings NPRM*, the Commission proposed to codify the attribution threshold and sought comment on proposed section 20.21 of the Commission's Rules, which would apply to mobile spectrum holdings. Pursuant to the proposal, all controlling interest and non-controlling interests of ten percent or more would be attributable. In addition, non-controlling interests of less than ten percent would be attributable if the Commission determined that the interest confers *de facto* control, including but not limited to partnership and other ownership interests and any stock interest in a licensee. The Commission also sought comment on whether to include a specific waiver provision if it codified the rule. In addition, consistent with its current practice, the Commission proposed to attribute long-term *de facto* transfer leasing arrangements and long-term spectrum manager leasing arrangements to the lessees, lessors, sublessees, and sublessors.

155. The Commission finds insufficient evidence in the record to support any modifications to its current practices for attribution. The Commission has developed its current practices over the years through its case-by-case review of secondary market transactions and related transfer of control applications. Therefore, the Commission finds that retaining the current ten percent attribution threshold will serve the public interest. Accordingly, all controlling interests and non-controlling interests of ten percent or more would be attributable. In addition, interests of less than ten

percent would be attributable if the interest confers *de facto* control, including but not limited to partnership and other ownership interests and any stock interest in a licensee. The Commission also codifies these rules for purposes of determining spectrum holdings amounts before an auction. The Commission finds that codifying the rules will provide additional transparency and clarity for applicants and prospective auction participants. The Commission also concludes that the general waiver standard provided in Section 1.925 of the Commission's rules provides sufficient guidance for applicants seeking to waive of these attribution rules.

156. Consistent with its current practice, the Commission also attributed long-term *de facto* transfer leasing arrangements and long-term spectrum manager leasing arrangements to the lessor and the lessee, including sublessors and sublessees. Spectrum leasing arrangements are arrangements between a licensed entity and a third-party entity in which the licensee leases certain of its spectrum usage rights in the licensed spectrum to the third-party entity, the spectrum lessee. Leasing provides lessees the flexibility to lease a small or large quantity of spectrum for short or longer time periods depending on their business needs. The Commission will attribute only the long-term spectrum leasing arrangements, with limited exceptions, to both lessee and lessor. The attribution rule will apply to determine partial ownership and other interests in spectrum holdings for purposes of: (1) Applying a mobile spectrum holding limit to the licensing of spectrum through competitive bidding; and (2) applying the initial spectrum screen to secondary market transactions. Consistent with current practices, if, after applying the initial screen, the Commission's analysis of a particular market reveals concerns with respect to attribution due to a particular organizational or financial relationship, it may evaluate such relationships in the context of the relevant secondary market transaction.

VI. Procedural Matters

A. Final Regulatory Flexibility Analysis

157. The Regulatory Flexibility Act (RFA) requires that agencies prepare a regulatory flexibility analysis for notice-and-comment rulemaking proceedings, unless the agency certifies that "the rule will not have a significant economic impact on a substantial number of small entities." Accordingly, the Commission has prepared a Final Regulatory Flexibility Analysis (FRFA) concerning

the possible impact of the rule changes contained in the *R&O* on small entities.

158. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), an Initial Regulatory Flexibility Analysis (IRFA) was incorporated in the *Notice of Proposed Rulemaking*. The Wireless Telecommunications Bureau (WTB) sought written public comment on the proposals in the *Notice*, including comment on the IRFA. This present Final Regulatory Flexibility Analysis (FRFA) conforms to the RFA.

159. The Commission believes that it would serve the public interest to analyze the possible significant economic impact on small entities of the policy and rule changes in the *R&O*. Accordingly, this FRFA contains an analysis of this impact in connection with the adoption in the *R&O* of mobile spectrum holdings rule changes meant to protect and promote competition for the benefit of consumers, while facilitating greater transparency and predictability to better allow service providers to make investment and transactional decisions.

B. Need for, and Objectives of, the Report and Order

160. The Commission is under a Congressional mandate to manage spectrum to promote economic opportunity, competition, innovation, and service accessibility. In the wake of recent industry trends, both in service evolution and marketplace structure, the Commission has revisited its mobile spectrum holdings rules and policies. The Commission adopts several mobile spectrum holdings policies today: Entering the spectrum screen into FCC rules; specifying which spectrum blocks are included in the spectrum screen; replacing case-by-case, post-auction spectrum screen analysis with consideration of auction specific spectrum limits; and reserving a certain amount of 600 MHz spectrum in order to ensure against excessive concentration in holdings of below-1-GHz spectrum. These policies will promote consumer choice and competition among multiple service providers, and consistent with its statutory mandate, will promote the efficient and intensive use of scarce spectrum as well as maximizing economic opportunity and the deployment of innovative technologies. The Commission seeks to minimize the risk of the lessening of competition in the future due to the likelihood that an insufficient number of service providers would have access to the mix of low- and high-band spectrum needed to ensure robust competition in the mobile wireless marketplace.

B. Summary of Significant Issues Raised by Public Comments in Response to the IRFA

161. There were no comments filed that specifically addressed the rules and policies proposed in the IRFA.

C. Description and Estimate of the Number of Small Entities to Which the Proposed Rules Would Apply

162. The RFA directs agencies to provide a description of, and, where feasible, an estimate of, the number of small entities that may be affected by the rules adopted herein. The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction." In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act. A "small business concern" is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).

163. Small Businesses, Small Organizations, and Small Governmental Jurisdictions. Its action may, over time, affect small entities that are not easily categorized at present. The Commission therefore describes here, at the outset, three comprehensive, statutory small entity size standards. First, nationwide, there are a total of approximately 27.5 million small businesses, according to the SBA. In addition, a "small organization" is generally "any not-for-profit enterprise which is independently owned and operated and is not dominant in its field." Nationwide, as of 2007, there were approximately 1,621,315 small organizations. Finally, the term "small governmental jurisdiction" is defined generally as "governments of cities, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand." Census Bureau data for 2011 indicate that there were 89,476 local governmental jurisdictions in the United States. The Commission estimates that, of this total, as many as 88,506 entities may qualify as "small governmental jurisdictions." Thus, the Commission estimates that most governmental jurisdictions are small.

164. Cellular Licensees. The SBA has developed a small business size standard for small businesses in the category "Wireless Telecommunications Carriers (except satellite)." Under that SBA category, a business is small if it has 1,500 or fewer employees. The

census category of "Cellular and Other Wireless Telecommunications" is no longer used and has been superseded by the larger category "Wireless Telecommunications Carriers (except satellite)." The Census Bureau defines this larger category to include "establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular phone services, paging services, wireless Internet access, and wireless video services."

165. In this category, the SBA has deemed a wireless telecommunications carrier to be small if it has fewer than 1,500 employees. For this category of carriers, Census data for 2007, which supersedes similar data from the 2002 Census, shows 1,383 firms in this category. Of these 1,383 firms, only 15 (approximately 1%) had 1,000 or more employees. While there is no precise Census data on the number of firms in the group with fewer than 1,500 employees, it is clear that at least the 1,368 firms with fewer than 1,000 employees would be found in that group. Thus, at least 1,368 of these 1,383 firms (approximately 99%) had fewer than 1,500 employees. Accordingly, the Commission estimates that at least 1,368 (approximately 99%) had fewer than 1,500 employees and, thus, would be considered small under the applicable SBA size standard.

166. Wireless Telecommunications Carriers (except satellite). This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular phone services, paging services, wireless Internet access, and wireless video services. The appropriate size standard under SBA rules is for the category Wireless Telecommunications Carriers. The size standard for that category is that a business is small if it has 1,500 or fewer employees. For this category, census data for 2007 show that there were 11,163 establishments that operated for the entire year. Of this total, 10,791 establishments had employment of 999 or fewer employees and 372 had employment of 1,000 employees or more. Thus under this category and the associated small business size standard, the Commission estimates that the majority of wireless telecommunications carriers (except

satellite) are small entities that may be affected by its proposed action.

167. 2.3 GHz Wireless Communications Services. This service can be used for fixed, mobile, radiolocation, and digital audio broadcasting satellite uses. The Commission defined "small business" for the wireless communications services ("WCS") auction as an entity with average gross revenues of \$40 million for each of the three preceding years, and a "very small business" as an entity with average gross revenues of \$15 million for each of the three preceding years. The SBA approved these definitions. The Commission conducted an auction of geographic area licenses in the WCS service in 1997. In the auction, seven bidders that qualified as very small business entities won 31 licenses, and one bidder that qualified as a small business entity won a license.

168. 1670–1675 MHz Services. This service can be used for fixed and mobile uses, except aeronautical mobile. An auction for one license in the 1670–1675 MHz band was conducted in 2003. The Commission defined a "small business" as an entity with attributable average annual gross revenues of not more than \$40 million for the preceding three years, which would thus be eligible for a 15 percent discount on its winning bid for the 1670–1675 MHz band license. Further, the Commission defined a "very small business" as an entity with attributable average annual gross revenues of not more than \$15 million for the preceding three years, which would thus be eligible to receive a 25 percent discount on its winning bid for the 1670–1675 MHz band license. The winning bidder was not a small entity.

169. 3650–3700 MHz Band Licensees. In March 2005, the Commission released an order providing for the nationwide, non-exclusive licensing of terrestrial operations, utilizing contention-based technologies, in the 3650 MHz band (i.e., 3650–3700 MHz). As of April 2010, more than 1270 licenses have been granted and more than 7433 sites have been registered. The Commission has not developed a definition of small entities applicable to 3650–3700 MHz band nationwide, non-exclusive licensees. However, the Commission estimated that the majority of these licensees are Internet Access Service Providers (ISPs) and that most of those licensees are small businesses.

170. Wireless Telephony. Wireless telephony includes cellular, personal communications services, and specialized mobile radio telephony carriers. As noted, the SBA has developed a small business size standard for Wireless

Telecommunications Carriers (except Satellite). Under the SBA small business size standard, a business is small if it has 1,500 or fewer employees. Census data for 2007 shows that there were 1,383 firms in the Wireless Telecommunications Carriers (except Satellite) category that operated that year. Of those 1,383, 1,368 had fewer than 100 employees, and 15 firms had more than 100 employees. Thus under this category and the associated small business size standard, the majority of firms can be considered small. According to Trends in Telephone Service data, 434 carriers reported that they were engaged in wireless telephony. Of these, an estimated 222 have 1,500 or fewer employees and 212 have more than 1,500 employees. Therefore, approximately half of these entities can be considered small. Similarly, according to Commission data, 413 carriers reported that they were engaged in the provision of wireless telephony, including cellular service, Personal Communications Service (PCS), and Specialized Mobile Radio (SMR) Telephony services. Of these, an estimated 261 have 1,500 or fewer employees and 152 have more than 1,500 employees. Consequently, the Commission estimates that approximately half or more of these firms can be considered small. Thus, using available data, the Commission estimates that the majority of wireless firms can be considered small.

171. Broadband Personal Communications Service. The broadband PCS spectrum is divided into six frequency blocks designated A through F, and the Commission has held auctions for each block. The Commission initially defined a "small business" for C- and F-Block licenses as an entity that has average gross revenues of \$40 million or less in the three previous years. For F-Block licenses, an additional small business size standard for "very small business" was added and is defined as an entity that, together with its affiliates, has average gross revenues of not more than \$15 million for the preceding three years. These small business size standards, in the context of broadband PCS auctions, have been approved by the SBA. No small businesses within the SBA-approved small business size standards bid successfully for licenses in Blocks A and B. There were 90 winning bidders that claimed small business status in the first two C-Block auctions. A total of 93 bidders that claimed small and very small business status won approximately 40 percent of the 1,479 licenses in the first auction for the D, E,

and F Blocks. On April 15, 1999, the Commission completed the re-auction of 347 C-, D-, E-, and F-Block licenses in Auction No. 22. Of the 57 winning bidders in that auction, 48 claimed small business status and won 277 licenses.

172. On January 26, 2001, the Commission completed the auction of 422 C and F Block Broadband PCS licenses in Auction No. 35. Of the 35 winning bidders in that auction, 29 claimed small business status. Subsequent events concerning Auction 35, including judicial and agency determinations, resulted in a total of 163 C and F Block licenses being available for grant. On February 15, 2005, the Commission completed an auction of 242 C-, D-, E-, and F-Block licenses in Auction No. 58. Of the 24 winning bidders in that auction, 16 claimed small business status and won 156 licenses. On May 21, 2007, the Commission completed an auction of 33 licenses in the A, C, and F Blocks in Auction No. 71. Of the 14 winning bidders in that auction, six claimed small business status and won 18 licenses. On August 20, 2008, the Commission completed the auction of 20 C-, D-, E-, and F-Block Broadband PCS licenses in Auction No. 78. Of the eight winning bidders for Broadband PCS licenses in that auction, six claimed small business status and won 14 licenses.

173. AWS Services (1710–1755 MHz and 2110–2155 MHz bands (AWS–1); 1915–1920 MHz, 1995–2000 MHz, 2020–2025 MHz and 2175–2180 MHz bands (AWS–2); 2155–2175 MHz band (AWS–3)). For the AWS–1 bands, the Commission has defined a “small business” as an entity with average annual gross revenues for the preceding three years not exceeding \$40 million, and a “very small business” as an entity with average annual gross revenues for the preceding three years not exceeding \$15 million. In 2006, the Commission conducted its first auction of AWS–1 licenses. In that initial AWS–1 auction, 31 winning bidders identified themselves as very small businesses. Twenty-six of the winning bidders identified themselves as small businesses. In a subsequent 2008 auction, the Commission offered 35 AWS–1 licenses. Four winning bidders identified themselves as very small businesses, and three of the winning bidders identified themselves as a small business. For AWS–2 and AWS–3, although the Commission does not know for certain which entities are likely to apply for these frequencies, the Commission noted that the AWS–1 bands are comparable to those used for

cellular service and personal communications service. The Commission has not yet adopted size standards for the AWS–2 bands but has proposed to treat both AWS–2 similarly to broadband PCS service and AWS–1 service due to the comparable capital requirements and other factors, such as issues involved in relocating incumbents and developing markets, technologies, and services.

174. On March 31, 2014, the Commission adopted rules for spectrum in the 1695–1710 MHz, 1755–1780 MHz, and 2155–2180 MHz bands (collectively, “AWS–3”) that make available an additional sixty-five megahertz of commercial spectrum for the provision of mobile broadband services. The Commission indicated that the Commission will assign AWS–3 licenses by competitive bidding, offering five megahertz and ten megahertz blocks. The Spectrum Act states that the Commission shall grant new initial licenses for these bands by February 23, 2015.

175. In December 2012, the Commission adopted licensing, operating, and technical rules for stand-alone terrestrial mobile wireless operations in the AWS–4 spectrum. The Commission concluded that it would assign the AWS–4 spectrum to the incumbent Mobile Satellite Service (MSS) operators in order to make this spectrum available efficiently and quickly for flexible, terrestrial use, such as mobile broadband. The Commission also determined that it would assign AWS–4 licenses to DISH, as the incumbent MSS operator in that spectrum, and established a concrete, proven process for efficient relocation of incumbent operations from 2180–2200 MHz.

176. In June 2013, the Commission implemented the Spectrum Act provisions pertaining to the H Block by adopting service rules for the band, including pairing the two 5 megahertz blocks establishing EAs as the license area, and generally adopting Part 27 flexible use rules. On February 27, 2014 the Commission concluded its auction of H Block licenses, with DISH placing the winning bids on all 176 licenses across the nation.

177. Lower 700 MHz Band Licenses. The Commission previously adopted criteria for defining three groups of small businesses for purposes of determining their eligibility for special provisions such as bidding credits. The Commission defined a “small business” as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$40 million for the preceding three

years. A “very small business” is defined as an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than \$15 million for the preceding three years. Additionally, the Lower 700 MHz Service had a third category of small business status for Metropolitan/Rural Service Area (“MSA/RSA”) licenses — “entrepreneur” — which is defined as an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than \$3 million for the preceding three years. The SBA approved these small size standards. An auction of 740 licenses was conducted in 2002 (one license in each of the 734 MSAs/RSAs and one license in each of the six Economic Area Groupings (EAGs)). Of the 740 licenses available for auction, 484 licenses were won by 102 winning bidders. Seventy-two of the winning bidders claimed small business, very small business, or entrepreneur status and won a total of 329 licenses. A second auction commenced on May 28, 2003, closed on June 13, 2003, and included 256 licenses. Seventeen winning bidders claimed small or very small business status and won 60 licenses, and nine winning bidders claimed entrepreneur status and won 154 licenses. In 2005, the Commission completed an auction of 5 licenses in the lower 700 MHz band (Auction 60). All three winning bidders claimed small business status.

178. In 2007, the Commission reexamined its rules governing the 700 MHz band in the *700 MHz Second Report and Order*. An auction of A, B and E block licenses in the Lower 700 MHz band was held in 2008. Twenty winning bidders claimed small business status (those with attributable average annual gross revenues that exceed \$15 million and do not exceed \$40 million for the preceding three years). Thirty three winning bidders claimed very small business status (those with attributable average annual gross revenues that do not exceed \$15 million for the preceding three years). In 2011, the Commission conducted Auction 92, which offered 16 lower 700 MHz band licenses that had been made available in Auction 73 but either remained unsold or were licenses on which a winning bidder defaulted. Two of the seven winning bidders in Auction 92 claimed very small business status, winning a total of four licenses.

179. Upper 700 MHz Band Licenses. In the *700 MHz Second Report and Order*, the Commission revised its rules regarding Upper 700 MHz licenses. On January 24, 2008, the Commission commenced Auction 73 in which

several licenses in the Upper 700 MHz band were available for licensing: 12 Regional Economic Area Grouping licenses in the C Block, and one nationwide license in the D Block. The auction concluded on March 18, 2008, with three winning bidders claiming very small business status (those with attributable average annual gross revenues that do not exceed \$15 million for the preceding three years) and winning five licenses.

180. Pursuant to the Spectrum Act, Congress provided for the deployment of a nationwide public safety broadband network in the 700 MHz band, including reallocating the Upper 700 MHz D Block from a commercial spectrum block to public safety use. On September 7, 2012, the Public Safety and Homeland Security Bureau adopted a *Report and Order* to reallocate the D Block for “public safety services.” Congress established FirstNet as an independent authority within the National Telecommunications and Information Administration (NTIA), and required the Commission to grant a license to FirstNet for the use of both the existing public safety broadband spectrum (763–768/793–798 MHz) and the Upper D Block. On November 15, 2012, the Public Safety and Homeland Security Bureau granted FirstNet the license prescribed by statute, under call sign WQQE234.

181. 700 MHz Guard Band Licenses. In 2000, the Commission adopted the *700 MHz Guard Band Report and Order*, in which it established rules for the A and B block licenses in the Upper 700 MHz band, including size standards for “small businesses” and “very small businesses” for purposes of determining their eligibility for special provisions such as bidding credits. A small business in this service is an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$40 million for the preceding three years. Additionally, a very small business is an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than \$15 million for the preceding three years. SBA approval of these definitions is not required. An auction of these licenses was conducted in 2000. Of the 104 licenses auctioned, 96 licenses were won by nine bidders. Five of these bidders were small businesses that won a total of 26 licenses. A second auction of 700 MHz Guard Band licenses was held in 2001. All eight of the licenses auctioned were sold to three bidders. One of these bidders was a small business that won a total of two licenses.

182. Specialized Mobile Radio. The Commission adopted small business size standards for the purpose of determining eligibility for bidding credits in auctions of SMR geographic area licenses in the 800 MHz and 900 MHz bands. The Commission defined a “small business” as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$15 million for the preceding three years. The Commission defined a “very small business” as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$3 million for the preceding three years. The SBA has approved these small business size standards for both the 800 MHz and 900 MHz SMR Service. The first 900 MHz SMR auction was completed in 1996. Sixty bidders claiming that they qualified as small businesses under the \$15 million size standard won 263 licenses in the 900 MHz SMR band. In 2004, the Commission held a second auction of 900 MHz SMR licenses and three winning bidders identifying themselves as very small businesses won 7 licenses. The auction of 800 MHz SMR licenses for the upper 200 channels was conducted in 1997. Ten bidders claiming that they qualified as small or very small businesses under the \$15 million size standard won 38 licenses for the upper 200 channels. A second auction of 800 MHz SMR licenses was conducted in 2002 and included 23 Basic Economic Area (“BEA”) licenses. One bidder claiming small business status won five licenses.

183. The auction of the 1,053 800 MHz SMR licenses for the General Category channels was conducted in 2000. Eleven bidders who won 108 licenses for the General Category channels in the 800 MHz SMR band qualified as small or very small businesses. In an auction completed in 2000, a total of 2,800 Economic Area licenses in the lower 80 channels of the 800 MHz SMR service were awarded. Of the 22 winning bidders, 19 claimed small or very small business status and won 129 licenses. Thus, combining all four auctions, 41 winning bidders for geographic licenses in the 800 MHz SMR band claimed to be small businesses.

184. In addition, there are numerous incumbent site-by-site SMR licensees and licensees with extended implementation authorizations in the 800 and 900 MHz bands. The Commission does not know how many firms provide 800 MHz or 900 MHz geographic area SMR pursuant to extended implementation

authorizations, nor how many of these providers have annual revenues not exceeding \$15 million. One firm has over \$15 million in revenues. In addition, the Commission does not know how many of these firms have 1,500 or fewer employees. The Commission assumes, for purposes of this analysis, that all of the remaining existing extended implementation authorizations are held by small entities, as that small business size standard is approved by the SBA.

185. 1.4 GHz Band Licensees. The Commission conducted an auction of 64 1.4 GHz band licenses in the paired 1392–1395 MHz and 1432–1435 MHz bands, and in the unpaired 1390–1392 MHz band in 2007. For these licenses, the Commission defined “small business” as an entity that, together with its affiliates and controlling interests, had average gross revenues not exceeding \$40 million for the preceding three years, and a “very small business” as an entity that, together with its affiliates and controlling interests, has had average annual gross revenues not exceeding \$15 million for the preceding three years. Neither of the two winning bidders claimed small business status.

186. Broadband Radio Service and Educational Broadband Service. Broadband Radio Service systems, previously referred to as Multipoint Distribution Service (“MDS”) and Multichannel Multipoint Distribution Service (“MMDS”) systems, and “wireless cable,” transmit video programming to subscribers and provide two-way high speed data operations using the microwave frequencies of the Broadband Radio Service (“BRS”) and Educational Broadband Service (“EBS”) (previously referred to as the Instructional Television Fixed Service (“ITFS”). In connection with the 1996 BRS auction, the Commission established a “small business” as an entity that had annual average gross revenues of no more than \$40 million in the previous three years. The BRS auctions resulted in 67 successful bidders obtaining licensing opportunities for 493 Basic Trading Areas (“BTAs”). Of the 67 auction winners, 61 met the definition of a small business. BRS also includes licensees of stations authorized prior to the auction. At this time, the Commission estimated that of the 61 small business BRS auction winners, 48 remain small business licensees. In addition to the 48 small businesses that hold BTA authorizations, there are approximately 392 incumbent BRS licensees that are considered small entities. After adding the number of small business auction licensees to the number of incumbent

licensees not already counted, the Commission finds that there are currently approximately 440 BRS licensees that are defined as small businesses under either the SBA or the Commission's rules. In 2009, the Commission conducted Auction 86, which resulted in the licensing of 78 authorizations in the BRS areas. The Commission offered three levels of bidding credits: (i) A bidder with attributed average annual gross revenues that exceed \$15 million and do not exceed \$40 million for the preceding three years (small business) will receive a 15 percent discount on its winning bid; (ii) a bidder with attributed average annual gross revenues that exceed \$3 million and do not exceed \$15 million for the preceding three years (very small business) will receive a 25 percent discount on its winning bid; and (iii) a bidder with attributed average annual gross revenues that do not exceed \$3 million for the preceding three years (entrepreneur) will receive a 35 percent discount on its winning bid. Auction 86 concluded in 2009 with the sale of 61 licenses. Of the ten winning bidders, two bidders that claimed small business status won four licenses; one bidder that claimed very small business status won three licenses; and two bidders that claimed entrepreneur status won six licenses.

187. In addition, the SBA's Cable Television Distribution Services small business size standard is applicable to EBS. There are presently 2,032 EBS licensees. All but 100 of these licenses are held by educational institutions. Educational institutions are included in this analysis as small entities. Thus, the Commission estimated that at least 1,932 licensees are small businesses. Since 2007, Cable Television Distribution Services have been defined within the broad economic census category of Wired Telecommunications Carriers; that category is defined as follows: "This industry comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or a combination of technologies." For these services, the Commission uses the SBA small business size standard for the category "Wireless Telecommunications Carriers (except satellite)," which is 1,500 or fewer employees. To gauge small business prevalence for these cable services the Commission must,

however, use the most current census data. According to Census Bureau data for 2007, there were a total of 955 firms in this previous category that operated for the entire year. Of this total, 939 firms employed 999 or fewer employees, and 16 firms employed 1,000 employees or more. Thus, the majority of these firms can be considered small.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

188. The *R&O* implements several rule and policy modifications: (1) Codifying the Commission's policies for attributing spectrum holdings for certain purposes; (2) including in the initial spectrum screen applied to the Commission's review of transactions the AWS-4 band, AWS H Block, additional BRS spectrum, most of the EBS spectrum and the AWS-3 band (on a market-by-market basis); (3) replacing the current application of the mobile spectrum screen in case-by-case analysis of post-auction applications with a determination for each auction of whether to apply mobile spectrum holding limits to that auction; and (4) reserving a certain amount of 600 MHz spectrum (to be determined by a market-based mechanism during the Incentive Auction) for qualified bidders. These modifications should have minimal, if any reporting, recordkeeping or compliance impact on small entities, which tend to have relatively small spectrum holdings and rarely engage in the sort of large mergers and spectrum acquisitions that would trigger the spectrum screen and competitive scrutiny. All four rule modifications are intended to provide a clear framework for the Commission's competitive review of spectrum acquisitions in auctions and secondary markets—a framework that focuses, among other things, on facilitating access by multiple providers, including small entities, to a mix of low-band and high-band spectrum. Rule modification 3 is intended to facilitate access to 600 MHz spectrum for the entry and expansion of multiple providers, including small entities.

E. Steps Taken To Minimize Significant Economic Impact on Small Entities and Significant Alternatives Considered

189. The rule modifications the Commission implements in the *R&O* are intended to promote competition in the provision of mobile services by, among other measures, facilitating access to spectrum by multiple providers, including small entities. The Commission has done so by imposing a minor new regulatory requirement on

small firms, namely that such firms (and others) certify their qualification to bid on the reserved 600 MHz spectrum. After careful review, the Commission has determined that imposing this qualification to bid on reserved spectrum is necessary to help preserve spectrum for small entities. This certification process saves time and resources for small entities, making them better equipped to compete in spectrum auctions.

F. Report to Congress

190. The Commission will send a copy of the *R&O*, including this FRFA, in a report to be sent to Congress pursuant to the Congressional Review Act. In addition, the Commission will send a copy of the *R&O*, including this FRFA, to the Chief Counsel for Advocacy of the SBA. A copy of the *R&O* and FRFA (or summaries thereof) will also be published in the **Federal Register**.

G. Paperwork Reduction Act Analysis

191. The Report and Order contains new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104-13. It will be submitted to the Office of Management and Budget (OMB) for review under section 3507(d) of the PRA. OMB, the general public, and other Federal agencies will be invited to comment on the new or modified information collection requirements contained in this proceeding in a separate **Federal Register** notice. In addition, the Commission notes that pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, *see* 44 U.S.C. 3506(c)(4), the Commission previously sought specific comment on how the Commission might further reduce the information collection burden for small business concerns with fewer than 25 employees.

192. In this present document, the Commission has assessed the effects of modifying reporting rules, and finds that doing so does not change the burden on small businesses with fewer than 25 employees.

VII. Ordering Clauses

193. Accordingly, it is ordered, pursuant to sections 1, 4(i), 201, 301, 303, 307, 308, 309, 310, 316, and 332 of the Communications Act of 1934, as amended, and sections 6003, 6401, 6402, 6403, and 6404 of the Middle Class Tax Relief Act of 2012, Public Law 112-96, 126 Stat. 156, 47 U.S.C. 151, 154(i), 201, 301, 303, 307, 308, 309, 310, 316, 332, 1403, 451, and 1452, that this Report and Order *is hereby adopted*.

194. *It is further ordered* that the rules adopted herein *will become effective* September 9, 2014.

195. *It is further ordered* that, pursuant to section 801(a)(1)(A) of the Congressional Review Act, 5 U.S.C. 801(a)(1)(A), the Commission *shall send* a copy of the *R&O* to Congress and to the Government Accountability Office.

196. *It is further ordered* that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, *shall send* a copy of this *R&O*, including the Final Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

List of Subjects in Part 20

Communications common carriers, Communications equipment, Radio.

Federal Communications Commission.

Marlene H. Dortch,
Secretary.

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 20 as follows:

PART 20—COMMERCIAL MOBILE SERVICES

■ 1. The authority citation for part 20 continues to read as follows:

Authority: 47 U.S.C. 154, 160, 201, 251–254, 301, 303, 316, and 332 unless otherwise noted.

Section 20.12 is also issued under 47 U.S.C. 1302.

■ 2. Add § 20.22 to read as follows:

§ 20.22 Rules Governing Mobile Spectrum Holdings

(a) Applicants for mobile wireless licenses for commercial use, for assignment or transfer of control of such licenses, or for long-term *de facto* transfer leasing arrangements as defined in § 1.9003 of this chapter and long-term spectrum manager leasing arrangements as identified in § 1.9020(e)(1)(ii) must demonstrate that the public interest, convenience, and necessity will be served thereby. The Commission will evaluate any such license application consistent with the policies set forth in Policies Regarding Mobile Spectrum Holdings, *Report and Order*, FCC 14–63, WT Docket No. 12–269, adopted May 15, 2014.

(b) *Attribution of interests.* (1) The following criteria will apply to attribute partial ownership and other interests in spectrum holdings for purposes of:

(i) Applying a mobile spectrum holding limit to the licensing of spectrum through competitive bidding; and

(ii) Applying the initial spectrum screen to secondary market transactions.

(2) *Controlling interests shall be attributable.* Controlling interest means majority voting equity ownership, any general partnership interest, or any means of actual working control (including negative control) over the operation of the licensee, in whatever manner exercised.

(3) *Non-controlling interests of 10 percent or more in spectrum shall be attributable.* Interests of less than 10 percent in spectrum shall be attributable if such interest confers *de facto* control, including but not limited to partnership and other ownership interests and any stock interest in a licensee.

(4) The following interests in spectrum shall also be attributable to holders:

(i) Officers and directors of a licensee shall be considered to have an attributable interest in the entity with which they are so associated. The officers and directors of an entity that controls a licensee or applicant shall be considered to have an attributable interest in the licensee.

(ii) Ownership interests that are held indirectly by any party through one or more intervening corporations will be determined by successive multiplication of the ownership percentages for each link in the vertical ownership chain and application of the relevant attribution benchmark to the resulting product, except that if the ownership percentage for an interest in any link in the chain exceeds 50 percent or represents actual control, it shall be treated as if it were a 100 percent interest. (For example, if A owns 20% of B, and B owns 40% of licensee C, then A's interest in licensee C would be 8%. If A owns 20% of B, and B owns 51% of licensee C, then A's interest in licensee C would be 20% because B's ownership of C exceeds 50%.)

(iii) Any person who manages the operations of a licensee pursuant to a management agreement shall be considered to have an attributable interest in such licensee if such person, or its affiliate, has authority to make decisions or otherwise engage in practices or activities that determine, or significantly influence, the nature or types of services offered by such licensee, the terms upon which such services are offered, or the prices charged for such services.

(iv) Any licensee or its affiliate who enters into a joint marketing arrangement with another licensee or its affiliate shall be considered to have an attributable interest in the other licensee's holdings if it has authority to make decisions or otherwise engage in

practices or activities that determine or significantly influence the nature or types of services offered by the other licensee, the terms upon which such services are offered, or the prices charged for such services.

(v) Limited partnership interests shall be attributed to limited partners and shall be calculated according to both the percentage of equity paid in and the percentage of distribution of profits and losses.

(vi) Debt and instruments such as warrants, convertible debentures, options, or other interests (except non-voting stock) with rights of conversion to voting interests shall not be attributed unless and until converted or unless the Commission determines that these interests confer *de facto* control.

(vii) Long-term *de facto* transfer leasing arrangements as defined in § 1.9003 of this chapter and long-term spectrum manager leasing arrangements as identified in § 1.9020(e)(1)(ii) that enable commercial use shall be attributable to lessees, lessors, sublessees, and sublessors for purposes of this section.

(c) *600 MHz Band holdings.* (1) The Commission will reserve licenses for up to 30 megahertz of the 600 MHz Band, offered in the Incentive Auction authorized by Congress pursuant to 47 U.S.C. 309(j)(8)(G), for otherwise qualified bidders who do not hold an attributable interest in 45 megahertz or more of the total 134 megahertz of below-1-GHz spectrum which consists of the cellular (50 megahertz), the 700 MHz (70 megahertz), and the SMR (14 megahertz) spectrum in a Partial Economic Area (PEA), as calculated on a county by county population-weighted basis, utilizing 2010 U.S. Census data. The amount of reserved and unreserved 600 MHz Band licenses will be determined based on the market-based spectrum reserve set forth in Policies Regarding Mobile Spectrum Holdings, *Report and Order*, FCC 14–63, WT Docket No. 12–269, adopted May 15, 2014, as well as subsequent Public Notices. Nothing in this paragraph will limit, or may be construed to limit, an otherwise qualified bidder that is a non-nationwide provider of mobile wireless services from bidding on any reserved or unreserved license offered in the Incentive Auction.

(2) For a period of six years, after initial licensing, no 600 MHz Band license, regardless of whether it is reserved or unreserved, may be transferred, assigned, partitioned, disaggregated, or long term leased to any entity that, after consummation of the transfer, assignment, or leased on a long term basis, would hold an attributable

interest in one-third or more of the total suitable and available below-1-GHz spectrum as calculated on a county by county population-weighted basis in the relevant license area, utilizing 2010 U.S. Census data.

(3) For a period of six years, after initial licensing, no 600 MHz Band reserved license may be transferred, assigned, partitioned, disaggregated, or leased on a long term basis to an entity that was not qualified to bid on that reserved spectrum license under paragraph (c)(1) of this section at the time of the Incentive Auction short-form application deadline.

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[CG Docket Nos. 13-24 and 03-123; FCC 13-118]

Misuse of Internet Protocol (IP) Captioned Telephone Service; Telecommunications Relay Services and Speech-to-Speech Services for Individuals With Hearing and Speech Disabilities

AGENCY: Federal Communications Commission.

ACTION: Final rule; announcement of effective date.

SUMMARY: In this document, the Commission announces that the Office of Management and Budget (OMB) has approved, for a period of three years, the information collection associated with the Commission's document Misuse of Internet Protocol (IP) Captioned Telephone Service; Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities (*Report and Order*). This announcement is consistent with the *Report and Order*, which stated that the Commission would publish a document in the **Federal Register** announcing the effective date of those rules.

DATES: 47 CFR 64.604(c)(10)(iv), (c)(11)(iii) and (iv), and 64.606(a)(2)(ii)(F), published at 78 FR 53684, August 30, 2013, are effective July 11, 2014.

FOR FURTHER INFORMATION CONTACT: Eliot Greenwald, Disability Rights Office, Consumer and Governmental Affairs Bureau, at (202) 418-2235, or email Eliot.Greenwald@fcc.gov.

SUPPLEMENTARY INFORMATION: This document announces that, on June 18,

2014, OMB approved, for a period of three years, the information collection requirements contained in the Commission's *Report and Order*, FCC 13-118, published at 78 FR 53684, August 30, 2013. The OMB Control Number is 3060-1053. The Commission publishes this document as an announcement of the effective date of the rules. If you have any comments on the burden estimates listed below, or how the Commission can improve the collections and reduce any burdens caused thereby, please contact Cathy Williams, Federal Communications Commission, Room 1-C823, 445 12th Street SW., Washington, DC 20554. Please include the OMB Control Number, 3060-1053, in your correspondence. The Commission will also accept your comments via the Internet if you send them to PRA@fcc.gov.

To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to fcc504@fcc.gov or call the Consumer and Governmental Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (TTY).

Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that it received OMB approval on June 18, 2014, for the information collection requirements contained in the Commission's rules at 47 CFR 64.604(c)(10)(iv), (c)(11)(iii) and (iv), and 64.606(a)(2)(F). Under 5 CFR 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Number is 3060-1053.

The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104-13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

OMB Control Number: 3060-1053.

OMB Approval Date: June 18, 2014.

OMB Expiration Date: June 30, 2017.

Title: Two-Line Captioned Telephone Order and IP Captioned Telephone Service Declaratory Ruling; and Internet Protocol Captioned Telephone Service Reform Order, CG Docket Nos. 13-24 and 03-123.

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 153,605 respondents; 373,280 responses.

Estimated Time per Response: .25 hours (15 minutes) to 20 hours.

Frequency of Response: Annual, every five years, on-going, and one-time reporting requirement; Recordkeeping requirement; Third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for the information collection requirements is found at Sec. 225 [47 U.S.C. 225] Telecommunications Services for Hearing-Impaired Individuals; The Americans with Disabilities Act of 1990 (ADA), Public Law 101-336, 104 Stat. 327, 366-69, was enacted on July 26, 1990.

Total Annual Burden: 113,252 hours.

Total Annual Cost: \$558,000.

Nature and Extent of Confidentiality:

An assurance of confidentiality is not offered because this information collection does not require the collection of personally identifiable information by the Commission from individuals.

Privacy Impact Assessment: No impact(s).

Needs and Uses: On August 1, 2003, the Commission released the *Declaratory Ruling*, In the Matter of Telecommunication Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities, CC Docket No. 98-67, published at 68 FR 55898, September 28, 2003. In the *Declaratory Ruling*, the Commission clarified that one-line captioned telephone voice carry over (VCO) service is a type of telecommunications relay service (TRS) and that eligible providers of such services are eligible to recover their costs in accordance with section 225 of the Communications Act. The Commission also clarified that certain TRS mandatory minimum standards do not apply to one-line captioned telephone VCO service and waived 47 CFR 64.604(a)(1) and (a)(3) for all current and future captioned telephone VCO service providers, for the same period of time beginning August 1, 2003. The waivers were contingent on the filing of annual reports, for a period of three years, with the Commission. Sections 64.604(a)(1) and (a)(3) of the Commission's rules, which contained information collection requirements under the PRA, became effective on March 26, 2004.

On July 19, 2005, the Commission released an *Order*, In the Matter of Telecommunication Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities, CC Docket No. 98–67 and CG Docket No. 03–123, published at 70 FR 54294, September 14, 2005, clarifying that two-line captioned telephone VCO service, like one-line captioned telephone VCO service, is a type of TRS eligible for compensation from the Interstate TRS Fund. Also, the Commission clarified that certain TRS mandatory minimum standards do not apply to two-line captioned VCO service and waived 47 CFR 64.604(a)(1) and (a)(3) for providers who offer two-line captioned VCO service. This clarification increased the number of providers who will be providing one-line and two-line captioned telephone VCO services.

On January 11, 2007, the Commission released a *Declaratory Ruling*, In the Matter of Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities, CG Docket No. 03–123, published at 72 FR 6960, February 14, 2007, granting a request for clarification that Internet Protocol (IP) captioned telephone relay service (IP CTS) is a type of TRS eligible for compensation from the Interstate TRS Fund (Fund) when offered in compliance with the applicable TRS mandatory minimum standards.

On August 26, 2013, the Commission issued a *Report and Order*, In the Matter of Misuse of Internet Protocol (IP) Captioned Telephone Service; Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities, CG Docket Nos. 13–24 and 03–123, published at 78 FR 53684, August 30, 2013, to regulate practices relating to the marketing of IP CTS, impose certain requirements for the provision of this service, and mandate registration and certification of IP CTS users. The Commission published a notice in the **Federal Register** pursuant to 5 CFR 1320.8(d) on September 25, 2013 (78 FR 59025), seeking comments from the public on the information collection requirements contained in the initial supporting statement. Sorenson Communications, Inc., and its subsidiary CaptionCall, LLC (together, CaptionCall), filed comments on November 25, 2013, regarding the user registration and certification requirements adopted in the *Report and Order* as well as the certification, recordkeeping, and reporting requirements for hardship exemptions to the captions-off default setting

requirement, also adopted in the *Report and Order*. CaptionCall did not comment on the other collections adopted in the *Report and Order*.

Subsequently, on December 6, 2013, the United States Court of Appeals for the District of Columbia Circuit stayed “the rule adopted by the Commission [in the *Report and Order*] prohibiting compensation to providers for minutes of use generated by equipment consumers received from providers for free or for less than \$75.” *Sorenson Communications, Inc. and CaptionCall, LLC v. FCC*, Order, D.C. Cir., No. 13–1246, December 6, 2013, at 1–2. (For convenience, this notice refers to the requirement subject to the stay as “the \$75 equipment charge rule.”) In the revised supporting statement, the Commission sought OMB approval of the following requirements adopted in the *Report and Order*: (1) The requirements regarding the labeling of equipment, software and mobile applications; (2) the certification, recordkeeping, and reporting requirements for the hardship exemption to the captions default-off requirement; and (3) an additional information reporting requirement for IP CTS applicants that seek Commission certification to provide IP CTS and for IP CTS providers, requiring applicants to provide assurance that they will not request or collect payment from the TRS Fund for service to consumers who do not satisfy the Commission’s IP CTS registration and certification requirements. Because the registration and certification requirements adopted in the *Report and Order* are related to the \$75 equipment charge rule that was stayed by the court of appeals, the Commission did not seek OMB approval of those requirements at that time. *See* 79 FR 23354, April 28, 2014.

On June 18, 2014, OMB approved, for a period of three years, the information collection requirements specified above that are contained in the Commission’s *Report and Order*, FCC 13–118, published at 78 FR 53684, August 30, 2013. The OMB Control Number is 3060–1053.

On June 20, 2014, the DC Circuit vacated the \$75 equipment charge rule and the rule requiring providers to maintain captions-off as the default setting for IP CTS equipment. *Sorenson Communications, Inc. and CaptionCall, LLC v. FCC* (D.C. Cir., Nos. 13–1122 and 13–1246, June 20, 2014). Because the court has not yet issued its mandate, the captions-off default requirement, 47 CFR 64.604(c)(10)(i), (ii), (iii), and (v), remains in effect, and the certification, recordkeeping, and reporting requirements for the hardship

exemption to the captions default-off requirement, 47 CFR 64.604(c)(10)(iv), will become effective at this time.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 223

[Docket No. 130716626–4522–02]

RIN 0648–BD51

Endangered and Threatened Species: Designation of a Nonessential Experimental Population of Upper Columbia River Spring-run Chinook Salmon in the Okanogan River Subbasin, Washington, and Protective Regulations

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule and notice of availability of a final environmental assessment.

SUMMARY: We, the National Marine Fisheries Service (NMFS), designate and authorize the release of a nonessential experimental population of Upper Columbia River (UCR) spring-run Chinook salmon (*Oncorhynchus tshawytscha*) under section 10(j) of the Endangered Species Act (ESA) in the Okanogan River subbasin, and establish a limited set of take prohibitions for the nonessential experimental population under section 4(d) of the ESA. Successful reintroduction of a population within the species’ historic range would contribute to its viability and further its conservation. The issuance of limited protective regulations will provide for the conservation of the species while providing assurances to people in the Okanogan River subbasin. The geographic boundary for the NEP is the main stem and all tributaries of the Okanogan River between the Canada-United States border and to the confluence of the Okanogan River with the Columbia River, Washington (hereafter “Okanogan River NEP Area”). We have prepared a Final Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) on the proposed action under

the National Environmental Policy Act (NEPA) (see **ADDRESSES**: section below). **DATES**: The final rule is effective August 11, 2014.

ADDRESSES: The Final Environmental Assessment and other reference materials regarding this final rule can be obtained via the Internet at <http://www.westcoast.fisheries.noaa.gov> or by submitting a request to the Branch Chief, Protected Resources Division, West Coast Region, NMFS, 1201 NE Lloyd Blvd., Portland, OR 97232.

FOR FURTHER INFORMATION CONTACT: Scott Rumsey, NMFS, 1201 NE Lloyd Blvd., Portland, OR 97232 (503-872-2791) or Dwayne Meadows, NMFS, 1315 East-West Highway, Silver Spring, MD 20910 (301-427-8403).

SUPPLEMENTARY INFORMATION:

Background

The UCR spring-run Chinook Salmon evolutionarily significant unit (ESU) is listed as an endangered species under the ESA (16 USC 1531 *et seq.*). We first designated the UCR spring-run Chinook Salmon ESU as endangered on March 24, 1999 (64 FR 14308), reaffirmed this status on June 28, 2005 (70 FR 37160), and maintained its endangered status after the ESU's 5-year review (76 FR 50448, August 15, 2011). Section 9 of the ESA prohibits the "take" of UCR spring-run Chinook salmon unless otherwise authorized.

The listed ESU currently includes all naturally spawned populations of spring-run Chinook salmon in accessible reaches of Columbia River tributaries between Rock Island and Chief Joseph Dams, excluding the Okanogan River. The Okanogan River is a major tributary of the upper Columbia River, entering the Columbia River between Wells and Chief Joseph Dams. The majority of the Okanogan River subbasin is in Canada (74 percent) with the remainder in Washington State (26 percent). Listed UCR spring-run Chinook salmon from this ESU currently spawn in three river subbasins in eastern Washington: the Methow, Entiat, and Wenatchee. A fourth population historically inhabited the Okanogan River subbasin, but was extirpated in the 1930s because of overfishing, hydropower development, and habitat degradation (NMFS, 2007). The listed UCR Spring-run Chinook Salmon ESU also includes six artificial propagation programs: the Twisp River, Chewuch River, Methow Composite, Winthrop National Fish Hatchery, Chiwawa River, and White River spring Chinook salmon hatchery programs.

On November 22, 2010, we received a letter from the Confederated Tribes of

the Colville Reservation (CTCR), a federally recognized Native American tribe, requesting that we authorize the release of an experimental population of spring-run Chinook salmon in the Okanogan River subbasin under section 10(j) of the ESA. The CTCR also initiated discussions on this topic with the United States Fish and Wildlife Service (USFWS), the Bonneville Power Administration, the Army Corps of Engineers, the Bureau of Reclamation, the Washington Department of Fish and Wildlife, and the Okanogan Nations Alliance of Canada. The CTCR's request included a large amount of information on the biology of UCR spring-run Chinook salmon, the possible management implications of releasing an experimental population in the Okanogan River subbasin, and the expected benefits to the recovery of the listed UCR Spring-run Chinook Salmon ESU. On October 24, 2013 we published a proposed rule to designate a nonessential experimental population of spring-run Chinook salmon in the Okanogan River subbasin (78 FR 63439).

Under section 10(j) of the ESA, the Secretary of Commerce (Secretary) may authorize the release of an "experimental" population of a listed species outside its current range when the release of the experimental population will further the conservation of the listed species. The population is experimental under section 10(j) at times when it is wholly separate geographically from nonexperimental populations. In order to authorize the release of an experimental population, section 10(j) also requires that the Secretary determine, using the best available information, whether the experimental population is "essential" or "nonessential" to the continued existence of the listed species. Section 10(j) allows that an experimental population deemed "nonessential" is treated as a species proposed for listing during interagency consultations under section 7 of the Act, requiring federal agencies to confer (rather than consult) with NMFS on actions that are likely to adversely affect the experimental population (except when the population occurs in an area within the National Wildlife Refuge System or the National Park System, where the ESA requires the population be treated as a threatened species). With respect to the ESA's take prohibitions, section 10(j) treats experimental populations as threatened species, authorizing NMFS to issue regulations governing the application of the ESA's prohibition against take of listed species.

This action involves the designation of a NEP of UCR spring-run Chinook

salmon in the Okanogan River subbasin. The release of this NEP of UCR spring-run Chinook salmon in the Okanogan River NEP Area would further the conservation of UCR spring-run Chinook salmon by potentially establishing a fourth population in the species' historic range, contributing to the viability of the ESU. Fish used for the reintroduction would come from the Methow Composite hatchery program located at Winthrop National Fish Hatchery. The Methow River population of these fish is included in the UCR Spring-run Chinook Salmon ESU and has the best chance to survive and adapt to conditions in the Okanogan River subbasin because they most closely resemble the genetic and life-history characteristics of the UCR spring-run Chinook salmon population that historically inhabited the Okanogan River subbasin (Jones *et al.*, 2011). Fish from the NEP are expected to remain geographically separate from the UCR Spring-run Chinook Salmon ESU during the life stages in which they remain in, or return to, the Okanogan River; the experimental designation will not apply at any time when members of the NEP are downstream of the confluence of the Okanogan River with the Columbia River. This experimental population release is being implemented as recommended in the Upper Columbia Spring Chinook Salmon and Steelhead Recovery Plan (NMFS, 2007), while at the same time ensuring that the reintroduction does not impose undue regulatory restrictions on landowners and third parties.

The geographic boundary defining the Okanogan River NEP Area for UCR spring-run Chinook salmon is the mainstem and all tributaries of the Okanogan River between the Canada-United States border to the confluence of the Okanogan River with the Columbia River. All UCR spring-run Chinook salmon in this defined Okanogan River NEP Area are considered part of the NEP, irrespective of their origin. Conversely, when UCR spring-run Chinook salmon are located outside this defined Okanogan River NEP Area, they are not considered part of the NEP.

In this action, we are designating an experimental population that is geographically separate from the nonexperimental ESA-listed UCR population, as spring-run Chinook salmon are currently extirpated in the Okanogan River subbasin. This designation is expected to reduce the species' overall extinction risk from natural and anthropogenic factors by increasing its abundance, productivity, spatial structure, and diversity within

the Upper Columbia River. These expected improvements in the overall viability of UCR spring-run Chinook salmon, in addition to other actions being implemented throughout the Columbia River migration corridor, will contribute to the species near-term viability and recovery, either minimally if an Okanogan population does not establish itself, or significantly if it does. The NEP will be geographically separated from the larger ESU of UCR spring-run Chinook salmon while in the Okanogan River subbasin, but will intermingle with other Chinook salmon populations as they travel downstream of the NEP area, while in the ocean, and on part of their upstream spawning migration. The “experimental” population designation is geographically based and does not travel with the fish outside the Okanogan River NEP Area.

This final rule establishes legal authority under section 10(j) of the ESA for an experimental population of UCR spring-run Chinook salmon in the Okanogan River basin. The rule also provides protective regulations under section 4(d) deemed necessary and advisable to conserve the experimental population. We, in close coordination with tribal, state and federal comanagers, are committed to completing review of the Hatchery Genetic Management Plans associated with the broodstock-collection, fish-transfer, and fish-release activities required to support this reintroduction effort.

To assist in the development of the Upper Columbia Spring Chinook Salmon and Steelhead Recovery Plan (hereinafter called the recovery plan), we assembled the Interior Columbia Technical Recovery Team (ICTRT) to identify population structure and recovery goals. The recovery plan subsequently adopted the ICTRT recovery goals as delisting criteria for the UCR spring-run Chinook Salmon ESU.

The ICTRT recommended specific abundance and productivity goals for each population in the UCR Spring-run Chinook Salmon ESU. The team also identified the current risk level of each population based on the gap between recent abundance and productivity and the desired recovery goals. The ICTRT (2008) considered all three extant natural populations (Methow, Entiat, and Wenatchee) to be at high risk of extinction based on their current abundance and productivity levels. The ICTRT also recommended spatial structure and diversity metrics for these populations (ICTRT, 2007). Spatial structure refers to the geographic

distribution of a population and the processes that affect the distribution. Populations with restricted distribution and few spawning areas are at a higher risk of extinction from catastrophic environmental events (e.g., a single landslide) than are populations with more widespread and complex spatial structure. A population with complex spatial structure typically has multiple spawning areas containing the expression of diverse life-history characteristics. Diversity is the phenotypic (morphology, behavior, and life-history traits) and genotypic (DNA) characteristics within and between populations. Phenotypic diversity allows more diverse populations to use a wider array of environments and protects populations against short-term temporal and spatial environmental changes. Genotypic diversity, on the other hand, provides populations with the ability to survive long-term changes in the environment by providing genetic variations that may prove successful under different situations. It is the combination of phenotypic and genotypic diversity expressed in a natural setting that provides populations with the ability to utilize the full range of habitat and environmental conditions and to have the resiliency to survive and adapt to long-term changes in the environment. The mixing of hatchery fish (or excessive numbers of out-of-basin stocks) with naturally produced fish on spawning grounds can decrease genetic diversity within a population (NMFS, 2007). The ICTRT (2008) also determined that all three extant populations of this ESU are at high risk of extinction based on their current lack of spatial structure and diversity.

The recovery plan identifies re-establishment of a population in the Okanogan River subbasin as a recovery action (NMFS, 2007). More specifically, the recovery plan explains that re-establishment of a spring-run Chinook salmon population in the Okanogan River subbasin would aid recovery of this ESU by increasing abundance, productivity, spatial structure, and diversity, thereby reducing the risk of extinction to the ESU as a whole. The recovery plan establishes a framework for accomplishing restoration goals for the Okanogan River subbasin including restoring connectivity throughout their historic range where feasible and practical. Short- and long-term actions will protect riparian habitat along spawning and rearing streams and establish, restore, and protect stream flows suitable for spawning, rearing, and migration. In addition, water

quality will be protected and restored where feasible and practical. In the mainstem Columbia River, implementation of the Federal Columbia River Power System (FCRPS) ESA section 7 Biological Opinion (NMFS, 2008a; NMFS, 2010) provides a number of new actions and continuation of existing programs that will likely continue to increase passage survival through the Columbia River mainstem passage corridor.

Statutory and Regulatory Framework

The ESA provides that species listed as endangered or threatened are afforded protection primarily through the prohibitions of section 9 (16 U.S.C. 1538) and the consultation requirements of section 7 (16 U.S.C. 1536). Section 9 of the ESA prohibits the take of an endangered species. The term “take” is defined by the ESA as “to harass, harm, pursue, hunt, shoot, wound, trap, capture, or collect, or attempt to engage in any such conduct” (16 U.S.C. 1532(19)). Section 7 of the ESA provides procedures for federal interagency cooperation and consultation to conserve federally listed species, ensure their survival, help in recovery of these species, and protect designated critical habitat necessary for the survival of the listed species. It also mandates that all federal agencies determine how to use their existing authorities to further the purposes of the ESA to aid in recovering listed species. In addition, ESA section 7 requires that federal agencies will, in consultation with NMFS, ensure that any action they authorize, fund, or carry out is not likely to jeopardize the continued existence of a listed species, or result in the destruction or adverse modification of designated critical habitat. Section 7 of the ESA does not apply to activities undertaken on private land unless they are authorized, funded, or carried out by a federal agency.

As noted above, for the purposes of section 7 of the ESA, section 10(j) requires that we treat NEPs as a species proposed to be listed, unless they are located within a National Wildlife Refuge or National Park, in which case they are treated as threatened, and section 7 consultation requirements apply. When NEPs are located outside a National Wildlife Refuge or National Park, only two provisions of section 7 apply—section 7(a)(1) and section 7(a)(4). In these instances, NEP designations provide additional flexibility in developing conservation and management measures by allowing us to work with the action agency early to develop conservation measures, instead of analyzing an already well-developed proposed action provided by

the agency under the framework of a section 7(a)(2) consultation. Additionally, for populations of listed species that are designated as nonessential, section 7(a)(4) of the ESA only requires that federal agencies confer (rather than consult) with us on actions that are likely to jeopardize the continued existence of a species proposed to be listed. These conferences are advisory in nature, and their findings do not restrict agencies from carrying out, funding, or authorizing activities.

For endangered species, section 9 of the ESA automatically prohibits take. For threatened species, the ESA does not automatically extend the Section 9 take prohibitions, but instead authorizes the agency to adopt regulations it deems necessary and advisable for species conservation, including prohibiting take under section 4(d). Where we designate an experimental population of an endangered species, the automatic take prohibition no longer applies; however, because the experimental population is treated as a separate threatened species, we can issue protective 4(d) regulations for that population as we deem necessary and advisable for the conservation of the population. Such regulations may include take prohibitions.

The USFWS has regulations for experimental population designation, 50 CFR 17.80 through 17.84, that provide definitions, considerations in finding that the designation would further the conservation of the species and information to be included in the designation. These regulations state that, in making the determination that the designation would further the conservation of the species, the Secretary must consider the effect of taking the eggs or young from another population, the likelihood that the experimental population will become established, the effect the designation would have on the species' overall recovery, and the extent to which the experimental population would be affected by activities in the area. Under the USFWS regulations, a regulation designating the experimental population must include: A clear means to identify the experimental population; a finding based on the best available science indicating whether the population is essential to the continued existence of the species; management restrictions, protective measures, or other management concerns; and a periodic review of the success of the release and its effect on the conservation and recovery of the species. The USFWS regulations also state that any experimental population shall be treated

as threatened for purposes of establishing protective regulations under ESA section 4(d), and the protective regulations for the experimental population will contain applicable prohibitions and exceptions for that population.

The USFWS implementing regulations contain the following specific provisions:

The USFWS regulations define an essential experimental population as one "whose loss would be likely to appreciably reduce the likelihood of the survival of the species in the wild" (50 CFR 17.80(b)). All other experimental populations are classified as nonessential (50 CFR 17.81(f)). This definition was directly derived from the legislative history to the ESA amendments that created section 10(j).

In determining whether the experimental population will further the conservation of the species, the USFWS regulations require the agency to consider: (1) Any possible adverse effects on extant populations of a species as a result of removal of individuals, eggs, or propagules for introduction elsewhere, (2) the likelihood that any such experimental population will become established and survive in the foreseeable future, (3) the relative effects that establishment of an experimental population will have on the recovery of the species, and (4) the extent to which the introduced population may be affected by existing or anticipated federal or state actions or private activities within or adjacent to the experimental population area (50 CFR 17.81(b)).

USFWS regulations at 50 CFR 17.81(c) also describe four components that will be provided in any regulations promulgated with regard to an experimental population under section 10(j). The components are: (1) Appropriate means to identify the experimental population, including, but not limited to, its actual or proposed location, actual or anticipated migration, number of specimens released or to be released, and other criteria appropriate to identify the experimental population(s), (2) a finding of whether the experimental population is, or is not, essential to the continued existence of the species in the wild, (3) management restrictions, protective measures, or other special management concerns of that population, which may include but are not limited to, measures to isolate and/or contain the experimental population designated in the regulation from natural populations, and (4) a process for periodic review and evaluation of the success or failure of the release and the effect of the

release on the conservation and recovery of the species.

We have not promulgated regulations implementing section 10(j) of the ESA, and have authorized only two experimental populations to date (78 FR 2893, January 15, 2013; 78 FR 79622, December 31, 2013). The USFWS has authorized many experimental populations. While USFWS' regulations do not apply to NMFS' 10(j) authorizations, they can help inform our authorization process and we use them to do so. We considered the factors identified in the USFWS regulations in the course of making the statutorily mandated determinations found in ESA section 10(j). To summarize, the statute requires that we determine: (1) Whether the release will further the conservation of the species, and (2) whether the population is essential or nonessential. In addition, because section 10(j) provides that the population will only be experimental when and at such times as it is wholly separate geographically from nonexperimental populations of the same species, we must establish that there are such times and places when the experimental population is wholly geographically separate. Similarly, the regulations require that we identify the experimental population; the legislative history indicates that the purpose of this requirement is to provide notice as to which populations of listed species are experimental (See, Joint Explanatory Statement of the Committee of Conference, H.R. Conf. Rep No. 97-835, at 15 (1982)).

Biological Information and Current Status

UCR spring-run Chinook salmon are anadromous fish that migrate as adults from the ocean in the spring to spawn in freshwater streams where their offspring hatch and rear prior to migrating back to the ocean to forage until maturity. At spawning, adults pair to lay and fertilize thousands of eggs in freshwater gravel nests or "redds" excavated by females. Depending on temperatures, eggs incubate for several weeks to months before hatching as "alevins" (a larval life stage dependent on food stored in a yolk sac). Following yolk sac absorption, alevins emerge from the gravel as young juveniles called "fry" and begin actively feeding. UCR spring-run Chinook salmon juveniles spend a year in freshwater areas before migrating to the ocean. The physiological and behavioral changes required for the transition to salt water result in a distinct "smolt" stage. On their journey juveniles migrate downstream through a riverine and

estuarine corridor between their natal lake or stream and the ocean.

After two to three years in the ocean, adult UCR spring-run Chinook salmon begin returning from the ocean in the early spring, with the run into the Columbia River peaking in mid-May (NMFS, 2007). Spring-run Chinook salmon enter the upper Columbia River tributaries from April through July. After migration, they hold in these tributaries until spawning occurs in the late summer, peaking in mid-to-late August.

On March 18, 2010, we announced the initiation of 5-year status reviews for 16 ESUs of Pacific salmon including the UCR Spring-run Chinook Salmon ESU (75 FR 13082). As part of this review, our Northwest Fisheries Science Center compiled and issued a report on the newest scientific information on the viability of this ESU. The report states,

“The Upper Columbia Spring-run Chinook salmon ESU is not currently meeting the viability criteria (adapted from the ICTRT) in the Upper Columbia Recovery Plan. Increases in natural origin abundance relative to the extremely low spawning levels observed in the mid-1990s are encouraging; however, average productivity levels remain extremely low. Large-scale directed supplementation programs are underway in two of the three extant populations in the ESU. These programs are intended to mitigate short-term demographic risks while actions to improve natural productivity and capacity are implemented. While these programs may provide short-term demographic benefits, there are significant uncertainties regarding the long-term risks of relying on high levels of hatchery influence to maintain natural populations (Ford *et al.* 2011).”

All extant populations are still considered to be at high risk of extinction based on the abundance/productivity and spatial structure/diversity metrics. When the risk levels for these attributes are integrated, the overall risk of extinction for this ESU is high (Ford *et al.*, 2011).

Analysis of the Statutory Requirements

1. Will authorizing release of a UCR spring-run Chinook salmon experimental population in the Okanogan River subbasin further the conservation of the species?

The ESA defines “conservation” as “the use of all methods and procedures which are necessary to bring any endangered species or threatened species to the point at which the measures provide pursuant to this [Act] are no longer necessary.” The factors we considered in determining if release of an experimental population in the Okanogan River NEP Area would “further the conservation” of UCR

spring-run Chinook salmon included the potential impacts to the ESU posed by the release, the likelihood that the experimental population would become established and self-sustaining, and the extent to which a self-sustaining experimental population would reduce the threats to the ESU’s viability. The USFWS regulations suggest considering whether the experimental population would be affected by other state- or federally-approved actions in the area. This last factor may not be subject to precise evaluation, but, where possible, we took into account all factors such as other approved actions that affect whether a population could become established and self-sustaining.

The Upper Columbia Spring Chinook Salmon and Steelhead Recovery Plan contains specific management strategies for recovering UCR spring-run Chinook salmon that include securing existing populations and reintroducing spring-run Chinook salmon into historically occupied habitats in the Okanogan River subbasin. The plan concludes, and we continue to agree, that establishing an experimental population of UCR spring-run Chinook salmon in the Okanogan River subbasin is expected to reduce the species’ overall extinction risk from natural and anthropogenic factors by increasing its abundance, productivity, spatial structure, and diversity within the Upper Columbia River. These expected improvements in the overall viability of UCR spring-run Chinook salmon, in addition to other actions being implemented throughout the Columbia River migration corridor, will contribute to the species near-term viability and recovery.

To ensure the best chance for a successful reintroduction, we first determined the most appropriate source of broodstock within the UCR Spring-run Chinook Salmon ESU and the availability of that source. Reintroduction efforts have the best chance for success when the donor population has life history characteristics and genetic diversity compatible with the anticipated environmental conditions of the habitat into which fish will be reintroduced (Araki *et al.*, 2008). Populations found in watersheds closest to the reintroduction area are most likely to have adaptive traits that will lead to a successful reintroduction, and therefore only spring-run Chinook salmon populations found in the Upper Columbia River subbasin were considered for establishing the experimental population in the Okanogan River NEP Area.

The listed UCR Spring-run Chinook Salmon ESU includes six artificial

propagation programs: The Twisp River, Chewuch River, Methow Composite, Winthrop National Fish Hatchery, Chiwawa River, and White River. We evaluated the fish propagated by each of these programs for their potential to support a re-introduced population in the Okanogan River subbasin. We concluded that fish produced from the Methow Composite stock of UCR spring-run Chinook salmon at Winthrop National Fish Hatchery are likely the most similar to the extirpated Okanogan spring-run Chinook salmon and represent the best initial source of individuals to establish an experimental population of UCR spring-run Chinook salmon in the Okanogan River. Because the Methow Composite stock of UCR spring-run Chinook salmon are from the neighboring Methow River subbasin and have evolved in an environment similar to that of the Okanogan River subbasin, they are likely to be more genetically similar to the extirpated Okanogan spring-run Chinook salmon population than spring-run Chinook salmon populations from the more distant Entiat and Wenatchee River subbasins. For the past several years, enough adult salmon from the Methow Composite hatchery program have returned to the Methow subbasin to provide enough excess eggs and sperm to begin raising fish for reintroduction into the Okanogan River NEP Area.

We also considered the suitability of available habitat in the Okanogan River subbasin to support the experimental population in the foreseeable future. The Columbia basin as a whole is estimated to have supported pre-development spring-run Chinook salmon returns as large as 588,000 fish (Chapman, 1986). Historically, the UCR Spring-run Chinook Salmon ESU component of the Columbia basin is estimated to have comprised up to 68,900 fish (Mullan, 1987; UCSRB, 2007). It is estimated that before the 1930s, the Okanogan population of the UCR Spring-run Chinook Salmon ESU contained at least 500 spring-run Chinook salmon (NMFS, 2007).

While the historical population of spring-run Chinook salmon in the Okanogan River subbasin has been extirpated, the potential remains to reestablish a population in this area. Over the past century, overfishing, hydropower development, and local habitat degradation have severely impacted ecosystem features and processes in the Okanogan and other subbasins, creating a fragmented mixture of altered or barren fish and wildlife habitats and eradicating UCR spring-run Chinook salmon from the Okanogan River subbasin. Disruptions

in the hydrologic system have resulted in widespread loss of migratory corridors and access to productive habitat (CTCR, 2007). Low base stream flow and warm summer water temperatures have limited salmonid production both currently and historically. Stream flow and fish passage within the Okanogan River subbasin are affected by a series of dams and water diversions. However, the Upper Columbia Spring Chinook Salmon and Steelhead Recovery Plan estimates that the Okanogan River subbasin continues to have the capacity for at least 500 spring-run Chinook salmon (NMFS, 2007).

The recovery plan establishes a framework for accomplishing restoration goals for the Okanogan River subbasin including restoring connectivity throughout their historic range where feasible and practical. Short- and long-term actions will protect riparian habitat along spawning and rearing streams and establish, restore, and protect stream flows suitable for spawning, rearing, and migration. In addition, water quality will be protected and restored where feasible and practical. In the mainstem Columbia River, implementation of the FCRPS ESA section 7 Biological Opinion (NMFS, 2008a; NMFS, 2010) provides a number of new actions and continuation of existing programs that will likely continue to increase passage survival through the Columbia River mainstem passage corridor. The implementation of these actions continues to improve habitat conditions in the Okanogan River NEP Area to support reestablishing a potential fourth independent population of UCR spring-run Chinook salmon. Salmon Creek and Omak Creek offer the best habitat conditions for spawning and rearing in the subbasin, and major efforts by the CTCR are underway to restore tributary habitat for spring-run Chinook salmon in both the United States and Canadian portions of the Okanogan River subbasin.

In addition to actions taken under the recovery plan, there are many federal and state laws and regulations that will also help ensure the establishment and survival of the experimental population by protecting aquatic and riparian habitat. Section 404 of the Clean Water Act (CWA) (33 U.S.C. 1344) requires permits from the United States Army Corps of Engineers (Corps) before dredge or fill material can be discharged into waters of the United States. The dredge and fill permit program provides avoidance, minimization, and mitigation for the potential adverse effects of dredge and fill activities

within the nation's waterways (40 CFR 100–149). Section 404(b) of the CWA requires that section 404 permits be granted only in the absence of practicable alternatives to the proposed project, which would have a less adverse impact on the aquatic ecosystem. CWA section 401 provides protection of water quality by requiring dischargers to navigable waters to comply with applicable water quality standards. In addition, construction and operational storm water runoff is subject to restrictions under CWA section 402 and state water quality laws. Also the Magnuson-Stevens Fishery Conservation and Management Act, as amended (16 U.S.C. 1801 *et seq.*), requires that Essential Fish Habitat (EFH) be identified and federal action agencies consult with NMFS on any activity which they fund, permit, or carry out that may adversely affect EFH. Freshwater EFH for spring-run Chinook salmon in the Upper Columbia River subbasin includes the Okanogan River NEP Area. For each of these authorities, we do not assume complete implementation and compliance for all actions potentially affecting the experimental population or the listed ESU. However, we expect compliance and assume, at a minimum, that these authorities provide a regulatory regime that tends to encourage actions consistent with that regime.

The habitat improvement actions called for in the recovery plan, the protective measures in this final rule, and compliance with existing federal, state and local laws, statutes, and regulations, are expected to contribute to the survival of the experimental population in the Okanogan River subbasin into the foreseeable future. Although any reintroduction effort is likely to require supplementation with hatchery-origin fish for several years, we conclude there is the potential for a population of spring-run Chinook salmon to become established. Furthermore, we conclude that such a self-sustaining population of genetically compatible individuals is likely to further the conservation of the species as discussed above.

2. Is the experimental population separate geographically from the nonexperimental populations of the same species?

Section 10(j) of the ESA requires that we identify the population by regulation to provide notice of which populations are experimental. The statute also provides that the population is only considered experimental “when, and at such times as, [it] is wholly separate geographically from the

nonexperimental populations of the same species.” In this case, the analysis and information that identifies the population also demonstrates when and where it will be wholly geographically separate from other UCR spring-run Chinook salmon. Under this rule, the experimental population is defined as the UCR spring-run Chinook salmon population released in the Okanogan River subbasin, and their subsequent progeny, when geographically located within the Okanogan River NEP Area. When the juvenile experimental UCR spring-run Chinook salmon leave the mouth of the Okanogan River and pass into the Columbia River mainstem and proceed to the Pacific Ocean, they are no longer geographically separated from the other extant, listed UCR spring-run Chinook salmon populations, and the “experimental” designation does not apply, unless and until they return as adults to spawn in the Okanogan River NEP Area.

The Okanogan River NEP Area provides the requisite level of geographic separation because UCR spring-run Chinook salmon are currently extirpated from this area, and straying of other UCR spring-run Chinook populations into this area is extremely low (Colville Business Council, 2010). The UCR Spring-run Chinook Salmon ESU does not include the Okanogan River, and the status of the ESU does not rely on the Okanogan River subbasin for recovery. If any extant UCR spring-run Chinook salmon stray into the Okanogan River subbasin, they would acquire experimental status while within that area, and therefore no longer be covered by the “endangered” listing, nor by the full range of section 9 prohibitions. The “experimental” designation is geographically based and does not travel with the fish outside the Okanogan River subbasin.

Hatchery-origin fish used for the reintroduction will be marked, for example, with specific fin clips and/or coded-wire tags to evaluate the stray rate and allow for broodstock collection of returning NEP adults. It may be possible to mark NEP juvenile fish released into the Okanogan River NEP Area in an alternative manner (other than coded-wire tags) that would distinguish them from other Chief Joseph Hatchery-raised Chinook salmon, and we will consider this during the Chief Joseph Hatchery annual review. During the Chief Joseph Hatchery annual review process, information on fish interactions and stray rates, productivity rates of hatchery-origin and natural-origin populations, and harvest effects are analyzed and evaluated for consistency with best management

practices for artificial production as developed by the Hatchery Scientific Review Group (HSRG) and other science groups in the Pacific Northwest. Any such clips or tags would not, however, be for the purpose of identifying the NEP since, as discussed above, the experimental population is identified based on the geographic location of the fish. Indeed, if the reintroduction is successful, and fish begin reproducing naturally, their offspring would not be distinguishable from fish from other natural-origin UCR spring-run Chinook salmon populations. Outside of the experimental population area, e.g., in the Columbia River below the mouth of the Okanogan River or in the ocean, any such unmarked fish (juveniles and adults alike) will not be considered members of experimental population. They will be considered part of the ESU currently listed as endangered. Likewise, any fish that were marked before release in the NEP Okanogan River Area will not be considered part of the experimental population once they leave the Okanogan River NEP Area; rather, they will be considered part of the ESU currently listed as endangered.

3. Is the experimental population essential to the continued existence of the species?

The ESA requires the Secretary, in authorizing the release of an experimental population, to determine whether the population would be “essential to the continued existence” of the ESU. The statute does not elaborate on how this determination is to be made. However, as noted above, Congress gave some further definition to the term when it described an essential experimental population as one whose loss “would be likely to appreciably reduce the likelihood of the survival of the species in the wild” (see, Joint Explanatory Statement of the Committee of Conference, H.R. Conf. Rep. No. 97–835, at 15 (1982)). The USFWS incorporated this concept into its regulatory definition of an essential population.

Based on the best available information as required by ESA section 10(j)(2)(B), we conclude that the proposed experimental population will not be one “whose loss would be likely to appreciably reduce the likelihood of survival” of the UCR Chinook Spring-run Salmon ESU for the reasons described below.

The recovery plan states that recovery of spring-run Chinook salmon in the Okanogan subbasin is not a requirement for delisting. Based on the recovery plan’s recovery criteria and proposed

management strategies, the UCR Spring-run Chinook Salmon ESU could recover to the point where listing under the ESA is no longer necessary solely with contributions from the three extant populations. Specifically, if the Wenatchee and Methow populations could achieve a 12-year geometric mean abundance of 2,000 natural-origin fish, and if the Entiat population reaches a 12-year geometric mean abundance of 500 natural-origin fish, the UCR Spring-run Chinook Salmon ESU would meet the recovery criteria for abundance. This would require a minimum productivity of between 1.2 and 1.4 recruits per spawner for the 12-year time period (NMFS, 2007). The extant populations would also need to meet specific criteria, identified in the recovery plan, which would result in a moderate or lower risk for spatial structure and diversity. The Upper Columbia Salmon and Steelhead Recovery Plan identifies several harvest, hatchery management, hydropower and habitat related actions that could be taken to improve viability of the three extant UCR spring-run Chinook salmon populations.

The recovery plan estimates recovery of the UCR Spring-run Chinook Salmon ESU would take 10 to 30 years without the addition of the Okanogan population. Based on the best available current evidence and information, we conclude that recovery of the UCR Spring-run Chinook Salmon ESU would still be likely under the above-discussed conditions.

NOAA’s 2011 5-year status review concluded that, despite an increase in abundance and a decrease in productivity of the UCR Spring-run Chinook Salmon ESU, information considered in the review did not change the biological extinction risk category since the previous 2005 status review. Neither status review considered the potential for UCR spring-run Chinook salmon in the Okanogan River subbasin to alter this risk, because UCR spring-run Chinook salmon were extirpated from the Okanogan River subbasin in the 1930s and no UCR spring-run Chinook salmon currently exist in the Okanogan River subbasin.

In summary, even without the establishment of a fourth (Okanogan) population, the UCR Spring-run Chinook Salmon ESU could possibly be delisted if all threats were addressed and all three populations recovered. Because we conclude that a population of UCR spring-run Chinook salmon in the Okanogan River NEP Area is not essential for conservation of the ESU, we conclude that the proper designation is as an NEP. Under Section

10(j)(2)(C)(ii) of the ESA we cannot designate critical habitat for a NEP.

Location of the NEP

ESA section 10(j) requires that the experimental population be designated “only when, and at such times, as it is geographically separate from nonexperimental populations of the same species.” The geographic boundary defining the Okanogan River NEP Area for UCR spring-run Chinook salmon is the mainstem and all tributaries of the Okanogan River between the Canada-United States border to the confluence of the Okanogan River with the Columbia River. All UCR spring-run Chinook salmon in this defined Okanogan River NEP Area are considered part of the NEP, irrespective of their origin. Conversely, when UCR spring-run Chinook salmon are located outside this defined Okanogan River NEP Area, they are not considered part of the NEP.

Additional Management Restrictions, Protective Measures, and Other Special Management Considerations

As indicated above, section 10(j) requires that experimental populations are treated as threatened species, except for certain portions of section 7. Congress intended that this provision would authorize us to issue regulations we deemed necessary and advisable to provide for the conservation of the experimental population, just as it does, under section 4(d), for any threatened species (Joint Explanatory Statement, *supra*, at 15). In addition, when amending the ESA to add section 10(j), Congress specifically intended to provide broad discretion and flexibility to the Secretary in managing experimental populations so as to reduce opposition to release of listed species outside their current range (H.R. Rep. No. 567, 97th Cong. 2d Sess. 34 (1982)). Therefore, we are exercising the authority to issue protective regulations under section 4(d) for the proposed NEP to identify take prohibitions necessary to provide for the conservation of the species and otherwise provide assurances to people in the Okanogan River NEP Area.

The ESA defines “take” to mean: Harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to engage in any such conduct. Concurrent with the ESA section 10(j) authorization, we adopt protective regulations under ESA section 4(d) for the experimental population that prohibit take of UCR spring-run Chinook salmon that are part of the experimental population except in the

following circumstances in the Okanogan River NEP Area:

1. Any activity taken pursuant to a valid permit issued by us under § 223.203(b)(1) and § 223.203(b)(7) for scientific research activities.
2. Aid, disposal, or salvage of fish by authorized agency personnel acting in compliance with 50 CFR 223.203(b)(3).
3. Activities associated with artificial propagation of the experimental population under an approved Hatchery Genetic Management Plan that complies with the requirements of § 223.203(b)(5).
4. Any harvest-related activity undertaken by a tribe, tribal member, tribal permittee, tribal employee, or tribal agent consistent with tribal harvest regulations and an approved Tribal Resource Management Plan that complies with the requirements of § 223.204.
5. Any harvest-related activity consistent with state harvest regulations and an approved Fishery Management Evaluation Plan that complies with the requirements of § 223.203(b)(4).

6. Any take that is incidental¹ to an otherwise lawful activity. Otherwise lawful activities include, but are not limited to, agricultural, water management, construction, recreation, navigation, or forestry practices, when such activities are in full compliance with all applicable laws and regulations.

Outside the Okanogan River NEP Area, UCR spring-run Chinook salmon are not considered to be part of the NEP (even if they originated there), and the take prohibitions applicable for endangered UCR spring-run Chinook salmon will apply.

Summary of Comments and Responses

The proposed rule and draft EA established a public comment period from October 24 until December 9, 2013 (78 FR 63439, October 24, 2013). In addition to welcoming comments in general, we also requested comments on seven specific questions regarding: (1) Whether the Methow Composite stock of UCR spring-run Chinook salmon is the best fish to use in establishing an experimental population and the scientific basis for the comment; (2) the proposed geographical boundary of the experimental population; (3) the extent to which the experimental population would be affected by current or future federal, state, tribal, or private actions within or adjacent to the experimental population area; (4) any necessary

management restrictions, protective measures, or other management measures that we may not have considered; (5) the likelihood that the experimental population would become established in the Okanogan River NEP Area; (6) whether the proposed experimental population is essential or nonessential; and (7) whether the proposed designation furthers the conservation of the species and whether we have used the best available science in making this determination. We also contacted other Federal agencies and tribes and invited them to comment on the proposed rule. On November 5, 2013, we also held a public meeting within the geographic area affected by the proposed rule.

We received comments from a total of 8 individuals or organizations on the proposed rule and draft EA representing the opinions of various natural resource agencies, county officials, non-governmental organizations, and private entities. Six of the commenters expressed support for the proposal. One of the commenters in support of the proposal also suggested a few specific technical edits and clarifications be made to the draft EA, which we incorporated. The remaining two commenters provided comments expressing concerns about the proposal. Below we summarize our responses to all of the substantive issues raised regarding the proposed rule and draft EA.

Comments and Responses

Comment 1: One commenter noted disappointment in the short comment period, and felt that there was inadequate coordination with elected officials in developing the proposed introduction of endangered UCR spring-run Chinook salmon into the Okanogan River and tributaries.

Response: We provided a 45-day comment period starting on October 24, 2013, and ending on December 9, 2013. We did not receive requests from commenters for a review period extension.

We believe that there was adequate coordination with elected officials and the public in the development of the proposed NEP. The reintroduction of spring-run Chinook salmon into the Okanogan River subbasin was included as a recommended action in the 2007 Upper Columbia Spring Chinook Salmon and Steelhead Recovery Plan. The Recovery Plan was developed in close collaboration with the Upper Columbia Salmon Recovery Board with extensive involvement of elected officials, state and tribal co-managers, and other stakeholders throughout the

region. In 2011, we published an Advance Notice of Proposed Rulemaking in the **Federal Register** (76 FR 42658; July 16, 2011) notifying the public of our intention to develop a proposal for reintroduction, and describing opportunities for public engagement. Additional opportunities for input and engagement were highlighted in the proposed rule (78 FR 63439; October 24, 2013). We met with the Okanogan County Commissioners on December 5, 2011, and on November 5, 2013. On those same dates we also convened public meetings in Omak, Washington on the proposed reintroduction. These meetings were noticed in advance in local newspapers.

Comment 2: One commenter contended that there is a lack of credible historical evidence that the Okanogan Basin ever supported a viable population of spring-run Chinook salmon.

Response: We believe there is credible evidence that the Okanogan River subbasin historically supported a viable population of spring-run Chinook salmon (see section 3.2.1.1 of the EA for more detailed discussion). UCR spring-run Chinook salmon historically occurred in at least four systems in the Okanogan River subbasin: (1) Salmon Creek (Craig and Suomela, 1941), (2) tributaries upstream of Lake Osoyoos (Gartrell, 1936; Chapman *et al.*, 1995; NPCC, 2004a), (3) Omak Creek (Fulton, 1968), and (4) the Similkameen River (Fulton, 1968).

Comment 3: One commenter expressed concern that there is inadequate habitat to support the reintroduction of UCR spring-run Chinook salmon.

Response: In the EA we evaluated whether the current water conditions would allow for a reintroduction program to succeed, and which areas of the Okanogan River subbasin currently have potential for year round rearing of UCR spring-run Chinook salmon (Section 3.5.4). We concluded that there is adequate tributary habitat to support UCR spring-run Chinook salmon in the United States portion of the Okanogan River subbasin.

Comment 4: One commenter expressed concern that the reintroduction of spring-run Chinook salmon will negatively impact other ESA listed and non-listed species.

Response: The reintroduction will not negatively impact other populations of UCR spring run Chinook salmon. The reintroduction effort will effectively reduce releases of Methow Composite hatchery smolts in the Methow subbasin by 200,000 out of a program goal of 600,000 smolts, and release them into

¹ Incidental take refers to takings that result from, but are not the purpose of, carrying out an otherwise lawful activity conducted by the Federal agency or applicant. 50 CFR 402.02

the Okanogan River subbasin instead. Consequently the number of naturally spawning hatchery fish in the Methow subbasin is expected to be greatly reduced, by approximately one third, providing a large benefit to the endangered wild UCR spring-run Chinook salmon in the Methow subbasin. Apart from this benefit, life-history strategies for UCR spring-run Chinook salmon will not be affected by this action. The reintroduction effort into the Okanogan River subbasin is not expected to alter fisheries management outside of the action area and not expected to result in an increase in harvest impacts for UCR spring-run Chinook salmon or other listed species.

The proposed reintroduction is unlikely to negatively affect UCR summer/fall-run Chinook salmon populations. Spring-run Chinook salmon typically spawn prior to, and in different habitat than, summer/fall-run Chinook salmon habitat. Competition for spawning sites or redd superimposition is typically rare and in this case is not expected between the two species.

The reintroduction effort will not negatively impact UCR steelhead. Given the life-history differences between UCR spring-run Chinook salmon and steelhead (e.g., discrete run, spawn, and emergence timing), adverse ecological interactions between the experimental spring-run Chinook salmon population and steelhead are expected to be minimal. There is the possibility of some incidental take of UCR steelhead by activities directed at the experimental population (e.g., handling of steelhead that is incidental to the collection of spring-run Chinook broodstock). However, the level of incidental take of UCR steelhead is expected to be minimal, and non-lethal. Additionally, while the limited protective regulations in this final rule will apply to the nonessential experimental population of UCR spring-run Chinook salmon, any actions that might directly or indirectly take steelhead in the Okanogan River subbasin must comply with the 4(d) protective regulations for West Coast steelhead (71 FR 5178; February 1, 2006).

Comment 5: One commenter was concerned about the genetic risks to the Methow population of spring-run Chinook salmon posed by “alien” stocks straying into the Methow subbasin from the reintroduction effort in the Okanogan River subbasin.

Response: No “alien” stocks of spring-run Chinook salmon would be used in the reintroduction program. The reintroduction effort will use Methow

Composite hatchery stock, a stock originating in the Methow subbasin that is currently propagated at the Winthrop National Fish Hatchery. This stock is considered the most closely related to the historical spring Chinook salmon run in the Okanogan River subbasin and determined to be the best for the reintroduction program (see EA Subsection 2.5.3, Authorize the Reintroduction Using a Different Hatchery Stock). As previously mentioned, the proposed reintroduction program will likely reduce the impact of the Methow Composite stock on wild UCR spring-run Chinook salmon in the Methow subbasin by relocating the release of 200,000 smolts from the Methow River to the Okanogan River subbasin.

Comment 6: One commenter was concerned that harvest targeting reintroduced UCR spring-run Chinook salmon stocks would impede recovery by resulting in the over-harvest of co-mingled Methow subbasin salmon and steelhead.

Response: Although the wild Methow and the reintroduced UCR spring-run Chinook salmon populations would co-mingle in the ocean and mainstem Columbia River during adult migration, neither population will be marked with an adipose-fin clip and thereby be subjected to higher sport-harvest rates (see EA Subsection 1.7.1.2, Spring-run Chinook Salmon Reintroduction Program (Methow Composite Stock)). Successful reintroduction of an experimental UCR spring-run Chinook salmon population will expand the spatial distribution of the UCR Spring-run Chinook Salmon ESU in the Upper Columbia River Basin, thus aiding in recovery.

Comment 7: One commenter requested information regarding the effectiveness of a previous reintroduction effort by the CTCR in the Okanogan River subbasin using the Carson stock of hatchery spring-run Chinook salmon.

Response: CTCR staff informed us that Chinook smolts were released in the Okanogan River subbasin from 2002 through 2006 to evaluate the potential for a reintroduction program (see EA Subsection 2.5.3, Authorize the Reintroduction Using a Different Hatchery Stock). The Carson stock releases were terminated in 2006 in favor of obtaining a broodstock source more genetically similar to the historical Okanogan subbasin stock that would better support a long-term reintroduction program. We could not find any published literature on the effectiveness of the Carson spring-run Chinook salmon reintroduction efforts.

According to CTCR staff, the 2002–2006 Carson stock reintroduction effort demonstrated that spring-run Chinook salmon could successfully rear in Omak Creek and emigrate out of the Okanogan River subbasin. The study was short-term and limited in scope. Additional information may be obtained from CTCR staff.

Comment 8: One commenter requested information regarding the designation of other nonessential experimental populations, and whether they had been successful.

Response: To date, NMFS has designated two nonessential experimental populations under section 10(j) of the ESA.

On January 15, 2013, NMFS designated Middle Columbia River steelhead reintroduced above the Pelton Round Butte Hydroelectric Project (Oregon) as a non-essential experimental population under section 10(j) of the ESA. For additional information see: <http://www.gpo.gov/fdsys/pkg/FR-2013-01-15/html/2013-00700.html>.

On December 31, 2013, NMFS issued a final rule establishing a nonessential experimental population of Central Valley spring-run Chinook salmon and associated protective regulations under section 4(d) of the ESA. For additional information see: http://www.westcoast.fisheries.noaa.gov/central_valley/san_joaquin/san_joaquin_reint.html.

NMFS has not had sufficient time yet to determine the effectiveness of these NMFS 10(j) reintroduction efforts.

The USFWS has used Section 10(j) of the ESA to reintroduce scores of threatened and endangered species throughout the U.S. For additional information see: <http://ecos.fws.gov/ecos/home.action>.

Comment 9: One commenter questioned whether the proposed reintroduction would divert resources away from recovery efforts targeting extant spring-run Chinook salmon populations, and expressed concerns that the reintroduction would impose a financial burden on Okanogan County ratepayers.

Response: Funds allocated to salmon recovery and habitat restoration by Public Utility Districts, the Bonneville Power Administration and other federal agencies are already established and would not change as a result of the reintroduction program. Because there would be no change or redirection of these allocated funds with, or without, the designation of UCR spring-run Chinook salmon as a NEP in the Okanogan River subbasin, the reintroduction program would not

impose any additional financial burden on Okanogan County ratepayers.

Comment 10: Two commenters expressed concern that the introduction of spring-run Chinook salmon would bring additional regulatory burdens, and that the “threatened” status accompanying a nonessential experimental population might lead to an upgraded endangered status in the future.

Response: This is a concern that we have specifically sought to address throughout the rulemaking process, and as a result, no additional regulatory burdens would occur as a result of this designation. The underlying intent of the nonessential experimental population is to utilize the flexibility and discretion afforded under section 10(j) of the ESA to manage the introduced population in a manner that minimizes regulatory burdens and the potential risk of ESA liability to the local community. Section 10(j) allows us to promulgate tailored protective regulations to ensure that the potential implication(s) of the introduced population are minimized for private stakeholders. An exception to the take prohibitions was included in the proposed rule to address this specific concern by allowing take of spring-run Chinook in the NEP area that is incidental to an otherwise lawful activity (see section CFR 223.301(c)(3)(vi) in this final rule). In this final rule, we have included additional language in this exception to further protect individuals acting lawfully from the take prohibitions by clarifying that “any fish that is incidentally taken in a manner allowed by this paragraph may not be collected and must be immediately returned to its habitat.” This clarifying language will help ensure that an individual does not errantly retain, transport, or possess a fish outside of the Okanogan River NEP Area where the take prohibitions for endangered UCR spring-run Chinook salmon would apply.

The nonessential experimental population designation also minimizes the regulatory burden under section 7 of the ESA for federal actions. Section 10(j) allows that an experimental population deemed “nonessential” is treated as a species proposed for listing during interagency consultations under section 7 of the Act, requiring federal agencies to confer (rather than consult) with NMFS on actions that are likely to adversely affect the experimental population. Any recommendations that result from the conference are advisory in nature only, further minimizing any regulatory burden associated with the

designation of the experimental population.

There is no risk that the reintroduced population will be upgraded to “endangered” status. The “threatened” status that accompanies the reintroduced nonessential experimental population designation will remain unchanged “in perpetuity” (see EA Subsection 4.1.1.5, Short-term and Long-term Timeframes Used for Analyses of the EA).

Comment 11: One commenter was concerned that the reintroduction will only serve to justify future acquisition of private lands for the purposes of habitat restoration and protection.

Response: We respectfully disagree that the reintroduction program will serve as justification for, or provide an incentive for, enhanced land acquisition for habitat conservation. The reintroduction program does not encourage nor require additional land acquisition to be successful. There is adequate potential spring-run Chinook salmon habitat available in the Okanogan River subbasin to support the reintroduction effort (see EA Subsection 3.5.4, Okanogan Subbasin Habitat Availability). Although the 10(j) designation is not a justification to acquire land for habitat conservation purposes, the CTCR and any other entity retain the legal rights to pursue land acquisitions in the Okanogan River subbasin to protect salmon and steelhead habitat. Similarly, landowners retain the legal right to pursue, accept and reject proposed property transactions as they see fit.

Comment 12: One commenter asked whether non-tribal members would be afforded equal harvest opportunities as tribal members on hatchery-origin UCR spring-run Chinook salmon from the Okanogan River subbasin.

Response: The CTCR is developing a fishery management plan to harvest returns to the Okanogan River subbasin if such harvest is required to reduce the proportion of naturally spawning hatchery-origin spring-run Chinook salmon. Washington Department of Fish and Wildlife has not submitted a harvest plan that would include recreational fishing for spring-run Chinook salmon in the Okanogan River subbasin. However, Washington Department of Fish and Wildlife may desire to coordinate with co-managers to set recreational fishing seasons in addition to regulations already established by the CTCR for tribal fisheries in the mainstem Columbia River above Wells Dam for Leavenworth spring-run Chinook salmon returning to the Chief Joseph Hatchery.

After review of the comments and further consideration, we have decided to adopt the proposed rule that was published in the **Federal Register** (78 FR 63439) on October 24, 2013, with only non-substantive editorial changes. Minor modifications were made to remove unnecessary regulatory language and provide clarity. The modifications make no change to the substance of the rule.

Findings

Based on the best available information, we determine that the release of a NEP of UCR spring-run Chinook salmon in the Okanogan River NEP Area will further the conservation of UCR spring-run Chinook salmon. Fish used for the reintroduction will come from the Methow Composite hatchery program located at Winthrop National Fish Hatchery. These fish are included in the UCR spring-run Chinook salmon ESU and have the best chance to survive and adapt to conditions in the Okanogan River subbasin (Jones *et al.*, 2011). They are expected to remain geographically separate from the existing three extant populations of the UCR spring-run Chinook Salmon ESU during the life stages in which the NEP remains in, or returns to, the Okanogan River; at all times when members of the NEP are downstream of the confluence of the Okanogan and Columbia Rivers, the experimental designation will not apply. Establishment of a fourth population of UCR spring-run Chinook salmon in the Okanogan River subbasin will likely contribute to the viability of the ESU as a whole. This experimental population release is being implemented as recommended in the 2007 Upper Columbia Spring Chinook Salmon and Steelhead Recovery Plan, while at the same time ensuring that the reintroduction will not impose undue regulatory restrictions on landowners and third parties.

We further determine, based on the best available information, that the designated experimental population is not essential to the ESU, because absence of the experimental population will not reduce the likelihood of survival of the ESU. An Okanogan spring-run Chinook salmon population is not a requirement for delisting because the population is extirpated. Implementation of habitat actions in the recovery plan are expected to increase the viability of the Methow, Wenatchee, and Entiat populations to meet ESU recovery criteria without establishment of an Okanogan population. We therefore designate the released

population as a Nonessential Experimental Population.

Information Quality Act and Peer Review

In December 2004, the Office of Management and Budget (OMB) issued a Final Information Quality Bulletin for Peer Review pursuant to the Information Quality Act (Section 515 of Pub. L. 106–554) in the **Federal Register** on January 14, 2005 (70 FR 2664). The Bulletin established minimum peer review standards, a transparent process for public disclosure of peer review planning, and opportunities for public participation with regard to certain types of information disseminated by the Federal Government. The peer review requirements of the OMB Bulletin apply to influential or highly influential scientific information disseminated on or after June 16, 2005. There are no documents supporting this final rule that meet these criteria.

Classification

Executive Order 12866

This final rule has been determined to be not significant under Executive Order (E.O.) 12866.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

Under the Regulatory Flexibility Act (as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996; 5 U.S.C. 801 *et seq.*), whenever a Federal agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare, and make available for public comment, a regulatory flexibility analysis that describes the effect of the rule on small entities (i.e., small businesses, small organizations, and small government jurisdictions). However, no regulatory flexibility analysis is required if the head of an agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. The SBREFA amended the Regulatory Flexibility Act to require Federal agencies to provide a statement of the factual basis for certifying that a rule will not have a significant economic impact on a substantial number of small entities.

The Chief Counsel for Regulation, Department of Commerce, certified to the Chief Counsel for Advocacy at the Small Business Administration at the proposed rule stage that this rule will not have a significant economic effect on a substantial number of small entities. No comments were received regarding the economic impact of this

final rule on small entities. The factual basis for this certification was published with the proposed rule and is not repeated here. Because this rule requires no additional regulations on small entities and would impose little to no regulatory requirements for activities within the affected area, a final regulatory flexibility analysis is not required and one was not prepared.

Executive Order 12630

In accordance with E.O. 12630, the final rule does not have significant takings implications. A takings implication assessment is not required because this rule: (1) would not effectively compel a property owner to have the government physically invade their property, and (2) would not deny all economically beneficial or productive use of the land or aquatic resources. This rule would substantially advance a legitimate government interest (conservation and recovery of a listed fish species) and would not present a barrier to all reasonable and expected beneficial use of private property.

Executive Order 13132

In accordance with E.O. 13132, we have determined that this final rule does not have federalism implications as that termed is defined in E.O. 13132.

Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.)

OMB regulations at 5 CFR 1320, which implement provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), require that Federal agencies obtain approval from OMB before collecting information from the public. A Federal agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. This final rule does not include any new collections of information that require approval by OMB under the Paperwork Reduction Act.

National Environmental Policy Act

In compliance with all provisions of the National Environmental Policy Act of 1969, we have analyzed the impact on the human environment and considered a reasonable range of alternatives for this final rule. We made the draft EA available for public comment along with the proposed rule, received one set of comments, and responded to those comments in an Appendix to the EA. We have prepared a final EA and FONSI on this action and have made these documents available

for public inspection (see **ADDRESSES** section).

Government-to-Government Relationship With Tribes (E.O. 13175)

E.O. 13175, Consultation and Coordination with Indian Tribal Governments, outlines the responsibilities of the federal government in matters affecting tribal interests. If we issue a regulation with tribal implications (defined as having a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes) we must consult with those governments or the Federal Government must provide funds necessary to pay direct compliance costs incurred by tribal governments.

The CTCR Reservation lies within the experimental population area. In 2010 staff members of CTCR met with NMFS staff. They discussed the Tribe's developing proposal to reintroduce UCR spring-run Chinook salmon in the Okanogan River subbasin and designate it as an ESA 10(j) experimental population.

Since that meeting CTCR and NMFS staffs have been in frequent contact, including explaining the rule-making process and evaluations involved in reviewing any proposal from the Tribes. These contacts and conversations included working together on public meetings held in Okanogan and Omak, WA (December 5, 2011, and November 5, 2013) and monthly status/update calls describing activity associated with the NEPA and ESA reviews associated with the proposal and final rules.

In addition to frequent contact and coordination among CTCR and senior NMFS technical and policy staff, we also discussed hatchery production changes affected by the Chief Joseph Hatchery and the associated aspects of the 10(j) proposal with the Parties to *United States v. Oregon* (Confederated Tribes and Bands of the Yakama Nation, Confederated Tribes of the Umatilla Indian Reservation, Confederated Tribes of the Warm Springs Reservation of Oregon, Nez Perce Tribe, and the Shoshone-Bannock Tribes of the Fort Hall Reservation; the States of Washington, Oregon, and Idaho; and the United States (NMFS, USFWS, Bureau of Indian Affairs, and the Department of Justice)). The current *2008–2017 United States v. Oregon Management Agreement* (2008) anticipated the development of the Chief Joseph Hatchery. Footnote #5 to *Table B–1 Spring Chinook Production for Brood*

Years 2008–2017 states that the parties to the Agreement “anticipate that the proposed Chief Joseph Hatchery is likely to begin operations during the term of this Agreement. The Parties agree to develop options for providing . . . spring Chinook salmon eggs to initiate the Chief Joseph program when it comes online.” (p. 99). This will include coordinating with the “Production Advisory Committee” (PAC) which is responsible to “coordinate information, review and analyze . . . future natural and artificial production programs . . . and to submit recommendations to the management entities.” (p. 14) The *U.S. v Oregon Policy Committee*, in February 2012, approved changes to the Agreement that identified the marking and transfer of 200,000 UCR spring-run Chinook salmon pre-smolts to Okanogan River acclimation ponds, and the prioritization of this production, in relation to other hatchery programs in the Methow River subbasin. The footnote has been modified to reflect these changes. The PAC includes technical representatives from “ . . . the Warm Springs Tribe, the Umatilla

Tribes, the Nez Perce Tribe, the Yakama Nation, and the Shoshone-Bannock Tribes.” (p.14). It is these technical representatives who will review adult management proposals associated with this final rule. Those representatives are senior staff from the identified tribes and will be in communication with their respective governments. We invite meetings with tribes to have detailed discussions that could lead to government-to-government consultation meetings with tribal governments. We will continue to coordinate with the affected tribes.

References Cited

A complete list of all references cited in this final rule is available upon request (see **FOR FURTHER INFORMATION CONTACT**).

Dated: July 7, 2014.
Samuel D. Rauch III,
Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

List of Subjects in 50 CFR Part 223

Endangered and threatened species, Exports, Imports.

For the reasons set out in the preamble, part 223 of chapter II, title 50 of the Code of Federal Regulations, is amended as follows.

PART 223—THREATENED MARINE AND ANADROMOUS SPECIES

■ 1. The authority citation for part 223 continues to read as follows:

Authority: 16 U.S.C. 1531 et seq.; subpart B, §§ 223.201 and 223.202 also issued under 16 U.S.C. 1361 et seq.; 16 U.S.C. 5503(d) for § 223.206(d)(9).

■ 2. In § 223.102, in the table in paragraph (e) under “Fishes,” add an entry for “Salmon, Chinook (Upper Columbia River spring-run ESU–XN)” after the entry for “Salmon, Chinook (Upper Willamette River ESU)” and before the entry for “Salmon, Chum (Columbia River ESU)” to read as follows:

§ 223.102 Enumeration of threatened marine and anadromous species.

* * * * *
 (e) * * *

Species ¹			Citation(s) for listing determination(s)	Critical habitat	ESA rules
Common name	Scientific name	Description of listed entity			
*	*	*	*	*	*
FISHES					
*	*	*	*	*	*
Salmon, Chinook (Upper Columbia River spring-run ESU–XN).	<i>Oncorhynchus tshawytscha</i> .	Upper Columbia River spring-run Chinook salmon only when, and at such times, as they are found in the mainstem or tributaries of the Okanogan River from the Canada-United States border to the confluence of the Okanogan River with the Columbia River, Washington.	[Insert Federal Register citation] 7/11/14.	NA	223.301
*	*	*	*	*	*

¹ Species includes taxonomic species, subspecies, distinct population segments (DPSs) (for a policy statement, see 61 FR 4722, February 7, 1996), and evolutionarily significant units (ESUs) (for a policy statement, see 56 FR 58612, November 20, 1991).

* * * * *
 ■ 3. In § 223.301, add paragraph (c) to read as follows:

§ 223.301 Special rules—marine and anadromous fishes.

* * * * *
 (c) Okanogan River UCR spring-run Chinook Salmon Experimental Population (*Oncorhynchus tshawytscha*). (1) The Upper Columbia River (UCR) spring-run Chinook salmon population located in the geographic area identified in paragraph (c)(5) of this section shall comprise the Okanogan River nonessential experimental population (NEP), and shall be treated

as a “threatened species” pursuant to 16 U.S.C. 1539(j)(2)(C).

(2) *Prohibitions.* Except as provided in paragraph (c)(3) of this section, the prohibitions of section 9(a)(1) of the ESA (16 U.S.C. 1538(a)(1)) relating to endangered species apply to UCR spring-run Chinook salmon in the Okanogan River NEP Area, defined in paragraph (c)(5) of this section.

(3) *Exceptions to the Application of Section 9 Take Prohibitions in the Experimental Population Area.* Take of UCR spring-run Chinook salmon that is otherwise prohibited by paragraph (c)(2) of this section and 50 CFR 223.203(a) in the Okanogan River NEP Area is

allowed, except as otherwise noted, provided it falls within one of the following categories:

(i) Any activity taken pursuant to a valid permit issued by NMFS under § 223.203(b)(1) and (7) for scientific research activities;

(ii) Aid, disposal, or salvage of fish by authorized agency personnel acting in compliance with 50 CFR 223.203(b)(3);

(iii) Activities associated with artificial propagation of the experimental population under an approved Hatchery Genetic Management Plan (HGMP) that complies with the requirements of 50 CFR 223.203(b)(5);

(iv) Any harvest-related activity undertaken by a tribe, tribal member, tribal permittee, tribal employee, or tribal agent consistent with tribal harvest regulations and an approved Tribal Resource Management Plan (TRMP) that complies with the requirements of 50 CFR 223.204;

(v) Any harvest-related activity consistent with state harvest regulations and an approved Fishery Management Evaluation Plan (FMEP) that complies with the requirements of 50 CFR 223.203(b)(4); or

(vi) Any take that is incidental to an otherwise lawful activity, provided that the taking is unintentional; not due to negligent conduct; and incidental to, and not the purpose of, the carrying out of the otherwise lawful activity. Otherwise lawful activities include, but are not limited to, agricultural, water management, construction, recreation, navigation, or forestry practices, when such activities are in full compliance with all applicable laws and regulations. Any fish that is incidentally taken in a manner allowed by this paragraph may not be collected and must be immediately returned to its habitat.

(4) *Prohibited take outside the NEP area.* Outside the Okanogan River NEP Area, UCR spring-run Chinook salmon are not considered to be part of the NEP, irrespective of their origin, and therefore the take prohibitions for endangered UCR spring-run Chinook salmon apply.

(5) *Geographic extent of the Okanogan River NEP Area.* The geographic boundary defining the Okanogan River NEP Area for UCR spring-run Chinook salmon is the mainstem and all tributaries of the Okanogan River between the Canada-United States border to the confluence of the Okanogan River with the Columbia River. All UCR spring-run Chinook salmon in this defined Okanogan River NEP Area are considered part of the NEP, irrespective of where they originated.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 131021878-4158-02]

RIN 0648-XD372

Fisheries of the Exclusive Economic Zone Off Alaska; "Other Flatfish" in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; apportionment of reserves; request for comments.

SUMMARY: NMFS apportions amounts of the non-specified reserve to the initial total allowable catch (TAC) and TAC of "other flatfish" in the Bering Sea and Aleutian Islands (BSAI) management area. This action is necessary to allow the fisheries to continue operating. It is intended to promote the goals and objectives of the fishery management plan for the BSAI management area.

DATES: Effective July 8, 2014, through 2400 hrs, Alaska local time, December 31, 2014. Comments must be received at the following address no later than 4:30 p.m., Alaska local time, July 23, 2014.

ADDRESSES: You may submit comments on this document, identified by NOAA-NMFS-2013-0152, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov/

- *#!docketDetail;D=NOAA-NMFS-2013-0152,* click the "Comment Now!" icon, complete the required fields, and enter or attach your comments.

- *Mail:* Submit written comments to Glenn Merrill, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS, Attn: Ellen Sebastian. Mail comments to P.O. Box 21668, Juneau, AK 99802-1668.

- *Fax:* 907-586-7557; Attn: Ellen Sebastian.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address), confidential business information, or otherwise sensitive information

submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT:

Steve Whitney, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the (BSAI) exclusive economic zone according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2014 initial TAC and TAC of "other flatfish" in the BSAI were established as 2,253 metric tons (mt) and 2,650 mt, respectively, by the final 2014 and 2015 harvest specifications for groundfish of the BSAI (79 FR 12108, March 4, 2014). In accordance with § 679.20(a)(3) the Regional Administrator, Alaska Region, NMFS, has reviewed the most current available data and finds that the ITAC and TAC for "other flatfish" in the BSAI needs to be supplemented from the non-specified reserve to promote efficiency in the utilization of fishery resources in the BSAI and allow fishing operations to continue.

Therefore, in accordance with § 679.20(b)(3), NMFS apportions from the non-specified reserve of groundfish 2,247 mt to the ITAC and 1,850 mt to the TAC for "other flatfish" in the BSAI. These apportionments are consistent with § 679.20(b)(1)(i) and do not result in overfishing of any target species because the revised TAC is equal to or less than the specifications of the acceptable biological catch of 12,400 mt in the final 2014 and 2015 harvest specifications for groundfish in the BSAI (79 FR 12108, March 4, 2014).

The harvest specification for the 2014 TAC included in the harvest specifications for groundfish in the BSAI is revised to 4,500 mt for "other flatfish."

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA, (AA) finds good cause to waive the requirement to provide prior notice and

opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) and § 679.20(b)(3)(iii)(A) as such a requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the apportionment of the non-specified reserves of groundfish to the “other flatfish” fishery in the BSAI. Immediate notification is necessary to allow for the orderly conduct and efficient operation

of this fishery, to allow the industry to plan for the fishing season, and to avoid potential disruption to the fishing fleet and processors. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of June 26, 2014.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Under § 679.20(b)(3)(iii), interested persons are invited to submit written comments on this action (see **ADDRESSES**) until July 23, 2014.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: July 8, 2014.

Emily H. Menashes,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
[FR Doc. 2014-16254 Filed 7-8-14; 4:15 pm]

BILLING CODE 3510-22-P

Proposed Rules

Federal Register

Vol. 79, No. 133

Friday, July 11, 2014

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2014-0328; Directorate Identifier 2014-NE-07-AD]

RIN 2120-AA64

Airworthiness Directives; Rolls-Royce plc Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for all Rolls-Royce plc (RR) RB211 Trent 875-17, 877-17, 884-17, 884B-17, 892-17, 892B-17, and 895-17 turbofan engines. This proposed AD was prompted by failure of the intermediate pressure (IP) turbine disk drive arm on an RR RB211 Trent turbofan engine. This proposed AD would require modification of the engine by removing any electronic engine control (EEC) that incorporates EEC software standard prior to version B7.2 and installing an EEC eligible for installation. We are proposing this AD to prevent overspeed failure of the turbine blades or the IP turbine disk, which could lead to uncontained blade or disk release, damage to the engine, and damage to the airplane.

DATES: We must receive comments on this proposed AD by September 9, 2014.

ADDRESSES: You may send comments by any of the following methods:

- Federal eRulemaking Portal: Go to <http://www.regulations.gov> and follow the instructions for sending your comments electronically.
- Mail: Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12-140, Washington, DC 20590-0001.
- Hand Delivery: Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- Fax: 202-493-2251.

For service information identified in this proposed AD, contact Rolls-Royce plc, Corporate Communications, P.O. Box 31, Derby, England, DE248BJ; phone: 011-44-1332-242424; fax: 011-44-1332-249936; email: http://www.rolls-royce.com/contact/civil_team.jsp; or Web site: <https://www.aeromanager.com>. You may view this service information at the FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA. For information on the availability of this material at the FAA, call 781-238-7125.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2014-0328; or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the mandatory continuing airworthiness information (MCAI), the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800-647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT:

Wego Wang, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; phone: 781-238-7134; fax: 781-238-7199; email: wego.wang@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA-2014-0328; Directorate Identifier 2014-NE-07-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any

personal information you provide. We will also post a report summarizing each substantive verbal contact with FAA personnel concerning this proposed AD.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued EASA AD 2014-0051, dated March 6, 2014 (referred to hereinafter as "the MCAI"), to correct an unsafe condition for the specified products. The MCAI states:

A Trent engine experienced an engine internal fire, caused by combustion of carbon deposits inside the high/intermediate (HP/IP) oil vent tubes. The consequent chain of events resulted in the failure of the IP turbine disk drive arm. Similar engine architecture exists on Trent 800 series engines.

This condition, if not corrected, could lead to uncontained multiple turbine blade failures or an IP turbine disk burst, possibly resulting in damage to, and reduced control of, the aeroplane.

This AD requires incorporating a revised EEC software standard that can prevent an unsafe chain of events that occur subsequent to an internal engine fire. The revised EEC software standard can properly adjust fuel flow, shut down the engine, prevent an overspeed condition, and indirectly extinguish the fire.

You may obtain further information by examining the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2014-0328.

Relevant Service Information

RR has issued Alert Service Bulletin No. RB.211-73-AH001, dated July 17, 2013. The ASB provides guidance for removal and replacement of the affected EEC.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of the United Kingdom, and is approved for operation in the United States. Pursuant to our bilateral agreement with the European Community, EASA has notified us of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all information provided by EASA and determined the unsafe condition exists

and is likely to exist or develop on other products of the same type design. This proposed AD would require modification of the engine by removing any EEC that incorporates EEC software standard prior to version B7.2 and installing an EEC eligible for installation.

Costs of Compliance

We estimate that this proposed AD would affect about 140 engines installed on airplanes of U.S. registry. We also estimate that it would take about 2 hours per product to comply with this proposed AD. The average labor rate is \$85 per hour. Required parts cost about \$170. Based on these figures, we estimate the cost of this proposed AD on U.S. operators to be \$23,800.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Rolls-Royce plc: Docket No. FAA-2014-0328; Directorate Identifier 2014-NE-07-AD.

(a) Comments Due Date

We must receive comments by September 9, 2014.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Rolls-Royce plc (RR) RB211 Trent 875-17, 877-17, 884-17, 884B-17, 892-17, 892B-17, and 895-17 turbofan engines.

(d) Reason

This AD was prompted by failure of the intermediate pressure (IP) turbine disk drive arm on an RR RB211 Trent turbofan engine. We are issuing this AD to prevent overspeed failure of the turbine blades or the IP turbine disk, which could lead to uncontained blade or disk release, damage to the engine, and damage to the airplane.

(e) Actions and Compliance

Unless already done, within 12 months after the effective date of this AD, remove any electronic engine control (EEC) that incorporates EEC software standard prior to version B7.2 and install an EEC eligible for installation.

(f) Installation Prohibition

After modification of an engine as required by paragraph (e) of this AD, do not install an EEC that incorporates a software standard prior to version B7.2 onto any engine.

(g) Alternative Methods of Compliance (AMOCs)

The Manager, Engine Certification Office, FAA, may approve AMOCs to this AD. Use the procedures found in 14 CFR 39.19 to make your request.

(h) Related Information

(1) For more information about this AD, contact Wego Wang, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; phone: 781-238-7134; fax: 781-238-7199; email: wego.wang@faa.gov.

(2) Refer to MCAI European Aviation Safety Agency AD 2014-0051, dated March 6, 2014, for more information. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating it in Docket No. FAA-2014-0328.

(3) RR Alert Service Bulletin No. RB.211-73-AH001, dated July 17, 2013, pertains to the subject of this AD and can be obtained from Rolls-Royce plc using the contact information in paragraph (h)(4) of this AD.

[Docket No. FR-5578-P-01]

RIN 2577-AC89

Streamlining Requirements Applicable to Formation of Consortia by Public Housing Agencies

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise HUD's public housing agency (PHA) consortium regulations. These regulations provide the procedures by which PHAs may choose to administer their public housing and Section 8 programs. The changes proposed are intended to increase administrative efficiencies associated with forming a consortium and to help ensure maximum family choice in locating suitable housing. The proposed rule

focuses mainly on establishing a new category of consortia for administration of the Section 8 Housing Choice Voucher (HCV) program. This type of consortium would be comprised of multiple PHAs that would become a single PHA, with a single jurisdiction and a single set of reporting and audit requirements, for purposes of administering the Section 8 HCV program. This type of consortium would be in addition to the consortium structure established in current consortium regulations which the Department is referring to as multiple-ACC consortium in this proposed rule. The proposed rule would also revise the categories of Section 8 programs eligible to be administered under a consortium, and establish new requirements regarding the timeframes for the establishment and dissolution of a consortium. Further, HUD has taken the opportunity afforded by this proposed rule to make several technical, nonsubstantive changes to improve the clarity and organization of the consortia regulations. HUD has also taken the opportunity afforded by this proposed rule to amend the definition of “public housing agency” to be consistent with amendments to the United States Housing Act of 1937 (1937 Act), as provided for in the Consolidated Appropriations Act of 2014.

DATES: *Comments Due Date:* September 9, 2014.

ADDRESSES: Interested persons are invited to submit comments regarding this proposed rule to the Regulations Division, Office of General Counsel, 451 7th Street SW., Room 10276, Department of Housing and Urban Development, Washington, DC 20410–0500. Communications must refer to the above docket number and title. There are two methods for submitting public comments. All submissions must refer to the above docket number and title.

1. Submission of Comments by Mail. Comments may be submitted by mail to the Regulations Division, Office of the General Counsel, Department of Housing and Urban Development, 451 7th Street SW., Room 10276, Washington, DC 20410–0001.

2. Electronic Submission of Comments. Interested persons may submit comments electronically through the Federal eRulemaking Portal at www.regulations.gov. HUD strongly encourages commenters to submit comments electronically. Electronic submission of comments allows the commenter maximum time to prepare and submit a comment, ensures timely receipt by HUD, and enables HUD to make them immediately available to the

public. Comments submitted electronically through the www.regulations.gov Web site can be viewed by other commenters and interested members of the public. Commenters should follow the instructions provided on that site to submit comments electronically.

Note: To receive consideration as public comments, comments must be submitted through one of the two methods specified above. Again, all submissions must refer to the docket number and title of the rule. *No Facsimile Comments.* Facsimile (fax) comments are not acceptable.

Public Inspection of Public Comments. All properly submitted comments and communications submitted to HUD will be available for public inspection and copying between 8 a.m. and 5 p.m. weekdays at the above address. Due to security measures at the HUD Headquarters building, an advance appointment to review the public comments must be scheduled by calling the Regulations Division at 202–708–3055 (this is not a toll-free number). Individuals with speech or hearing impairments may access this number via TTY by calling the Federal Relay Service at 800–877–8339 (this is a toll-free number). Copies of all comments submitted are available for inspection and download at www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Michael Dennis, Director, Office of Housing Voucher Programs, Office of Public and Indian Housing, Department of Housing and Urban Development, 451 7th Street SW., Room 4228, Washington, DC 20410–5000; telephone number 202–402–3882 (this is not a toll-free number). Persons with hearing or speech impairments may access these numbers through TTY by calling the Federal Relay Service at 800–877–8339 (this is a toll-free number).

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Purpose of Regulatory Action

HUD’s current public housing consortium regulation poses hurdles to forming consortia. Through this proposed rulemaking, HUD is modifying its regulations to encourage PHAs to form consortia, as doing so enables PHAs to combine administrative functions to increase efficiency and effectiveness, may benefit smaller PHAs with economies-of-scale, and improves opportunities for housing choices. In particular, this rule seeks to increase administrative efficiencies associated with forming a consortium by improving the process for how consortia are formed, structured and dissolved. In addition, this rule supports PHAs

mission to provide more suitable housing options for participants by allowing PHAs to operate as one entity throughout a region, as an incentive to PHAs to form consortia.

B. Summary of the Major Provisions of the Regulatory Action in Question

This rule would establish a new category of consortia for administration of the Section 8 HCV program, called the single-Annual Contributions Contract (ACC) consortium. The proposed rule clarifies that PHAs are not precluded from joining a consortium solely because the PHA is the owner of a unit or project receiving rental assistance under section 8(o) of the 1937 Act (42 U.S.C. 1437f). The proposed rule describes how and when consortia can be formed and dissolved, the requirement that a single 5-Year Plan and Annual Plan must be submitted as a condition for formation of the consortium, and fiscal year end requirements that would be applicable to single-ACC and multiple-ACC consortia.

Although the proposed rule is designed to encourage formation of consortia, the proposed rule would impose certain limitations. For example, Moving-to-Work (MTW) agencies may not form or join single-ACC or multiple-ACC consortia because MTW agencies operate under a different set of statutory and regulatory requirements.

II. Background

The 1937 Act (42 U.S.C. 1437 *et seq.*) authorizes HUD’s public housing and assisted housing programs, including the Section 8 HCV program. Section 13 of the 1937 Act (42 U.S.C. 1437k)¹ authorizes “any 2 or more” public housing agencies (PHAs) to form consortia “for the purpose of administering any or all of the housing programs” of those PHAs. HUD’s regulations implementing section 13 of the 1937 Act are codified at 24 CFR part 943.² The part 943 regulations describe the programs—specifically, public housing and the Section 8 programs—for which the housing providers participating in those programs are eligible to form consortia. The regulations also establish the minimum requirements relating to the formation and operation of a consortium and the

¹ As amended by section 515 of the Quality Housing and Work Responsibility Act of 1998 (Pub. L. 105–276, 112 Stat. 2549, approved January 27, 1998).

² HUD’s final rule establishing 24 CFR part 943 was published on November 29, 2000 (65 FR 71204).

minimum requirements of consortium agreements.

A consortium enables PHAs to combine administrative functions to increase efficiency and effectiveness, may benefit smaller PHAs with economies-of-scale, and improves opportunities for greater resident housing choice in the same region.

Through this proposed rule, HUD is seeking to improve the process on how consortia are formed, structured, and dissolved. This proposed rule is also intended to encourage more PHAs to form consortia, which allows ultimately HUD and PHAs to provide more effective and efficient housing assistance to low-income families. This proposed rule has two primary goals: (1) Increase administrative efficiencies associated with forming a consortium; and (2) facilitate maximum resident choice in locating suitable housing within a region through consortia, without the administrative burden associated with the portability process and other policies.

III. Summary of Proposed Changes to the Consortia of Public Housing Agencies

This section of the preamble highlights key features of the proposed revisions to the consortium regulations.

1. *Change in definition of "public housing agency."* Section 212 of the Consolidated Appropriations Act of 2014 (Pub. L. 113–76, 128 Stat. 5, approved January 17, 2014) amends the definition of "public housing agency" at subparagraph (A) of section 3(b)(6) of the 1937 Act (42 U.S.C. 1437a(b)(6)(A)) to include in its general definition "a consortium of such entities or bodies as approved by the Secretary."³ As a result, HUD is taking the opportunity afforded by this proposed rule to amend the definition of "public housing agency" in its regulations at 24 CFR 5.100 to be consistent with the statutory definition of "public housing agency."

2. *Single-Annual Contributions Contract consortium for the Section 8 HCV program.* Section 3(b)(6)(B) of the 1937 Act (42 U.S.C. 1437a(b)(6)(B)) defines the term "public housing agency" to include a consortium of PHAs that HUD "determines has the capacity and capability to administer" the Section 8

HCV program (including project-based vouchers and project-based certificates). Under the statutory language, such a consortium is a separate legal entity and a single PHA for purposes of administering the Section 8 HCV program. HUD is proposing to implement the statutory authority granted under section 3(b)(6)(B) of the 1937 Act by establishing a new category of consortium for the administration of the Section 8 HCV program, to be known as a single-ACC consortium.

While enactment of Section 212 of the Consolidated Appropriations Act of 2014 (as described in Section III.1 above) affords the opportunity to extend single-ACC consortia beyond the Section 8 HCV program, the Department has determined to move forward with publication of this proposed rule, which applies single-ACC consortia formation only to the Section 8 HCV program, so as to not further delay the opportunity for PHAs that desire to enter into this consortia type for their Section 8 HCV programs. However, in the future, the Department plans to further revise consortia regulations to allow single-ACC consortia formations, where applicable, beyond the section 8 HCV program. The decision on whether to form a single-ACC consortium is voluntary and PHAs may elect to form a multiple-ACC or a single-ACC consortium for administration of their Section 8 HCV programs.

The jurisdiction for the single-ACC consortium includes all member PHA jurisdictions. For purposes of Section 8 HCV program administration, jurisdictional boundaries between individual consortium members will cease to exist during the term of the single-ACC consortium. Accordingly, the state and local law of each of the participating PHAs must authorize the operation of the HCV program across established jurisdictional boundaries.

HUD anticipates that PHAs that form a single-ACC consortium for the purposes of voucher administration will see increased administrative efficiencies through one set of reporting and audit requirements, consolidated operations, a centralized waiting list, and a single set of policies and procedures. Families are also better served through the pooling of assets that occurs when forming a single-ACC consortium. Specifically, when resources are consolidated, the combined Section 8 HCV program resources of all member agencies may assist in serving more families in the community.

While the benefits of a single-ACC consortium are realized through an actual consolidation of different PHA Section 8 HCV programs, the single-

ACC consortium could allow greater autonomy for consortium members that may still want to retain their own public housing or other housing assistance programs. Additionally, PHAs may choose to form a consortium advisory board or other mechanisms for retaining a greater level of local control in the consortium. Consortium members may also subsequently withdraw from a consortium and return to operating as a single PHA (within regulations and any contractual obligations to the consortium) for purposes of Section 8 HCV program administration.

3. *Eligibility of PHA owners of units or projects receiving rental assistance under section 8(o) of the 1937 Act.* Under the proposed rule, PHAs that are owners of units receiving tenant-based rental assistance, or projects receiving project-based rental assistance, under section 8(o) of the 1937 Act (42 U.S.C. 1437f(o)) would not be precluded from joining either a single-ACC or multiple-ACC consortium, provided that such Section 8 projects and units are administered in accordance with applicable regulations. Section 943.115(b)(3) of the current consortia regulations provides that formation of consortia does not apply to "a PHA in its capacity as owner of a Section 8 project." The proposed rule would clarify that PHAs are not precluded from joining a consortium solely because the PHA is the owner of a unit or project receiving rental assistance under section 8(o) of the 1937 Act. Instead, the consortium would be required to administer such units or projects in accordance with applicable regulations.

4. *Consortium effective date and advance written notice to HUD.* The proposed rule specifies that formation of a consortium will be effective as of January 1 of the following year, and that HUD must be notified of the intent to form a consortium at least 120 days in advance, in writing. HUD may approve an exception to this requirement.

5. *Consortia must exist for 5 years before they may dissolve.* The proposed rule would require a consortium to exist for 5 years before any withdrawal from, or dissolution of, the consortium is allowed. HUD may (based upon a showing of good cause from the consortium) allow dissolution of, or withdrawal from, a consortium prior to completion of the 5-year term. The 5-year term represents the minimum amount of time a consortium must exist before it may dissolve or before members may withdraw from the consortium; however, the consortium may continue to exist beyond the 5-year term, unless dissolved. HUD proposes

³ Section 3(b)(6)(B)(i) of the 1937 Act already included "a consortia of public housing agencies that the Secretary determines has the capacity and capability to administer a program for assistance under such section in an efficient manner" in the definition of "public housing agency" for the Section 8 program. As a result of section 212 of the Consolidated Appropriations Act of 2014, inclusion of consortia in the definition of a public housing agency will no longer be limited solely to the Section 8 program.

requirement of an initial 5-year term to prevent premature dissolutions or withdrawals from a consortium, to encourage consortium formations that are carefully planned and executed, and in consideration of the time and resources involved in the PHAs' and HUD's processing of a consortium. Moreover, the dissolution of a consortium must be consistent with any actions to resolve outstanding civil rights actions of the consortium.

6. *Submission of a single PHA Plan.* The proposed rule specifies that a single 5-Year Plan and Annual Plan must be submitted for the consortium. The PHA Plan for the consortium shall establish a single set of policies for the consortium as a whole; therefore, consortium members will be bound by the single PHA Plan and will not need to submit individual PHA Plans to HUD for the duration of their inclusion in the consortium. In establishing a single PHA Plan for the consortium, PHAs must evaluate the different set of policies in the existing PHA Plan for each individual PHA wishing to join the consortium and agree on a single set of policies most appropriate for the administration of the consortium.

7. *Fiscal Year End Requirement.* The proposed rule specifies that, upon formation, PHAs joining a single-ACC consortium must adopt a new fiscal year end for the consortium. PHAs forming a multiple-ACC consortium must all adopt the same fiscal year end. Although the rule requires consortium formation to become effective on January 1, a consortium's fiscal year end does not necessarily have to coincide with that date.

8. *MTW PHAs not eligible to join a consortium.* The proposed rule specifies that MTW agencies may not form or join single-ACC or multiple-ACC consortia. MTW agencies are not eligible to form or join a consortium because MTW agencies operate under a different set of statutory and regulatory requirements. MTW flexibilities accrue to an individual PHA; therefore, an MTW agency could not transfer its unique flexibilities to other PHAs by way of forming a consortium. Also, an MTW PHA's ability to use program funds interchangeably ("fungibility") would create an administrative burden to other consortium members in terms of tracking, monitoring, and reporting the use of program funds and would directly conflict with the nature of the single-ACC consortium (which is considered a single PHA, and applies only for administration of the Section 8 HCV program). Lastly, the establishment of a single-ACC consortium by MTW PHAs would require execution of a new

MTW agreement with the new single-ACC consortium entity, which is not allowed under current law.

9. *Other nonsubstantive changes.* In addition to the changes proposed above, HUD would take the opportunity afforded by this proposed rule to make several technical, nonsubstantive, revisions to the part 943 regulations. These proposed amendments do not alter existing regulatory requirements; rather, they are intended to improve the organization and clarity of the regulations. For example, HUD proposes to remove the existing "question and answer" format of the section headings, and to renumber the sections comprising part 943.

IV. Specific Issues for Comment

Although HUD invites comment on all aspects of this proposed rule, HUD specifically seeks comment on the following issues. All public comments received on the proposed rule will be considered in the development of the final rule.

1. *Organizational costs for a consortium.* HUD is interested in addressing the costs that PHAs may incur in forming a consortium and ensuring a fair and equitable administrative fee structure for a consortium. For instance, there may be organizational costs associated with negotiating a consortium agreement and consolidating PHA operations, databases, and documents. HUD is seeking comment on whether the proposed rule addresses these costs effectively.

2. *Administrative fees for single- and multiple-ACC consortia.* HUD proposes to calculate administrative fees for a single-ACC consortium using the same criteria that is now used for calculating administrative fees for any other PHA that covers more than one Fair Market Rent (FMR) area. Administrative fees for the single-ACC consortium will be calculated based on the published administrative fee rates covering the FMR area in which the single-ACC consortium has the greatest proportion of its participants on a date in time, as per PIH Information Center data, and the total number of vouchers under lease for the single-ACC consortium as of the first of each month, up to the baseline number of vouchers under the consortium's ACC. However, a consortium may apply to HUD for blended rates, based proportionately on all FMR areas in which program participants are located within the single-ACC consortium instead of only the FMR area where the preponderance of participants are located.

To determine blended rates, HUD considers the published administrative fee rates for all single-ACC consortium FMR areas and all participants under lease in each of the areas on a date in time to calculate weighted averages. If the weighted averages result in higher administrative fee rates for the consortium, then the blended rates will be applied. If the result is lower, then the original administrative fee rates will be used. The blended rates will be based on the published administrative fee rate for each consortium member effective for the year in which the blended rate is requested. Blended rates apply only to the year for which requested. All consortium members are subject to the same proration regardless of a single-ACC consortium's approval for a blended rate. HUD seeks comment on whether use of a blended rate at the onset for calculating administrative fees is a preferable alternative. Also, the proposed rule allows a single-ACC consortium to request higher administrative fees if it operates over a large geographic area. HUD defines "large geographic area" as an area covering multiple counties. Is HUD's definition of a large geographic area appropriate?

Administrative fees for a multiple-ACC consortium's Section 8 HCV program will be calculated individually for each consortium member. The administrative fee calculation under a multiple-ACC consortium differs from that under a single-ACC consortium because the multiple-ACC consortium is structured differently than the single-ACC consortium. Under a multiple-ACC consortium each PHA retains its own ACC and program payments are made to the lead agency, on behalf of other consortium members, and then distributed by the lead agency based on the consortium agreement and HUD regulations.

3. *January 1 consortium effective date and consortium fiscal year end.* HUD proposes to restrict the formation of a consortium to January 1 of any given year and to require PHAs forming a single-ACC consortium to adopt a new fiscal year end for the consortium. In addition, PHAs forming a multiple-ACC consortium must all adopt the same fiscal year end. However, HUD recognizes that these requirements may delay or discourage potential consortium formations and invites comment specifically on this issue.

4. *5-year consortium term.* HUD also proposes to require a consortium to exist for 5 years before any withdrawal or dissolution from a consortium can take place, with the possibility for withdrawals or dissolutions prior to

completion of the 5-year term with a showing of good cause. HUD recognizes that this requirement may discourage potential consortium formations, and invites comment specifically on whether the requirement is overly restrictive.

5. *Withdrawals from or additions to a consortium.* The proposed rule provides that the withdrawal from single-ACC and multiple-ACC consortia by member PHAs must take place on the last day of the consortium's fiscal year. In addition, HUD proposes that all additions of PHAs to single-ACC and multiple-ACC consortia must take place on the first day of the consortium's fiscal year. However, HUD recognizes that these requirements may place undue burden on member PHAs and consortia, and invites comment specifically on these requirements.

6. *Voucher and funding distribution in the case of withdrawals from or dissolution of a single-ACC consortium.* The proposed rule specifies how vouchers and funding would be distributed upon withdrawal from or dissolution of a single-ACC consortium. Upon dissolution or withdrawal, consortium members would leave the consortium with at least the same number of authorized baseline units they had under their ACC prior to joining the consortium (that is, the number of baseline units contributed by each member to the consortium upon its formation). HUD would therefore calculate the contract renewal funding allocation based on the number of leased vouchers located within their original jurisdiction at the time of withdrawal or dissolution, up to their original baseline number. HUD may, for good cause, allow for an alternative distribution of baseline units and leased vouchers. Funding is proposed to be distributed as follows: Budget authority for the year would be divided proportionately, based on the percentage of all leased units in the consortium that each consortium member would receive upon dissolution or withdrawal. Administrative fees would be paid to the withdrawing PHA and the remaining consortium per the current appropriations requirements. Net Restricted Assets and Unrestricted Net Assets would be distributed based on the percentage of the initial balance that was contributed by each PHA.

The proposed rule also specifies how new incremental vouchers under a tenant protection action and under a special purpose voucher program would be distributed upon dissolution or withdrawal of a single-ACC consortium. New incremental vouchers under a special purpose voucher program (such

as the Family Unification Program, HUD's Veterans Affairs Supportive Housing program, and the Non-elderly Disabled voucher program) would be distributed upon dissolution or withdrawal as specified by consortium members in the consortium agreement, provided that such voucher distribution is made in accordance with program requirements under each respective special purpose voucher. Tenant protection vouchers allocated to cover a public housing demolition, disposition, or conversion action would remain with the PHA that has ownership over the property upon dissolution or withdrawal. Tenant protection vouchers allocated to cover a multifamily housing conversion action would remain with the PHA that has jurisdiction over the converted project upon dissolution or withdrawal. If a converted project has overlapping jurisdictions, the consortium agreement would be required to specify which PHA will have jurisdiction over the converted project and therefore retain administration of the tenant protection vouchers associated with such project upon dissolution or withdrawal.

With this background, HUD seeks comment specifically on whether the method of voucher and funding distribution as proposed in this rule equitably divides vouchers and funding among consortium members upon dissolution or withdrawal. Are there alternate methods of voucher and funding distribution that more equitably divide vouchers and funding when a consortium member withdraws or the single-ACC consortium dissolves? Should PHAs be given more discretion to set terms and conditions on dissolution or withdrawal?

7. *Partial coverage of a program.* In the proposed rule, as in current part 943 of the regulations, a PHA is not authorized to enter a consortium for only part of its eligible program. For example, a PHA may not enter only part of its Section 8 HCV program into a single-ACC consortium or part of its public housing program into a multiple-ACC consortium. This provision is designed to increase administrative efficiencies. Allowing a PHA to enter a consortium for only part of its Section 8 or public housing program would result in as many or more PHA plans and reporting submissions, rather than fewer, and overlapping PHA plans and reports for the same program. On the other hand, allowing a PHA to enter a consortium for only part of its program may allow greater PHA choice in formation of a consortium, and may result in more PHAs choosing to form consortia. HUD invites comments

specifically on whether the proposed rule's provision on partial coverage of a program is overly restrictive and whether PHAs will be less inclined to form consortia as a result of this provision.

8. *Single-ACC consortium.* This proposed rule would authorize the formation of a single-ACC consortium for the administration of the Section 8 HCV program. As more fully described above in this preamble, such a consortium would be a single PHA, with a single jurisdiction, for purposes of administering the Section 8 HCV program. HUD anticipates that PHAs that form a single-ACC consortium for the purposes of voucher administration will see increased administrative efficiencies through one set of reporting and audit requirements, consolidated operations, a centralized waiting list, and a single set of policies and procedures. Moreover, HUD believes that families are also better served through the pooling of assets that occurs when forming a single-ACC consortium.

HUD seeks comments from PHAs, tenant organizations, and other interested members of the public on the benefits of, and the potential administrative and statutory barriers to, forming a single-ACC consortium as provided for in this proposed rule. In particular, HUD is interested in comments regarding the following:

(1) Because the state and local law of each participating PHA in a single-ACC consortium must authorize the operation of the HCV program across established jurisdictional boundaries, to what extent would current state and local laws limit a PHA from joining, or allow a PHA to join, a single-ACC consortia? If allowed by current state and local law, to what extent would PHAs use such authority to form single-jurisdiction consortia?

(2) What changes to the proposed regulatory requirements for single-ACC consortia may be needed to make the formation of such consortia a more valuable and attractive option, in terms of cost-reduction benefits, administrative efficiencies, and housing choices for participants?

(3) How should individual PHAs converting into a single-ACC consortium be held accountable for taking corrective action to resolve prior violations of civil rights, environmental, labor, or other requirements?

V. Findings and Certifications

Regulatory Review—Executive Order 13563

Executive Order 13563 (Improving Regulations and Regulatory Review)

directs executive agencies to analyze regulations that are “outmoded, ineffective, insufficient, or excessively burdensome, and to modify, streamline, expand, or repeal them in accordance with what has been learned.” Executive Order 13563 also directs that, where relevant, feasible, and consistent with regulatory objectives, and to the extent permitted by law, agencies are to identify and consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public.

The broader purpose of the reform to HUD’s PHA consortia regulations is to create a regulatory environment in which more PHAs are able to form consortia, without undue or unnecessary regulatory burden. This rule proposes to improve the process on how consortia are formed, structured, and dissolved, by increasing administrative efficiencies associated with forming a consortium and facilitating resident choice in locating suitable housing within a region. Today, there are at least 8 formal consortia encompassing a total of 35 PHAs in states including Alabama, Arizona, Ohio, Georgia, Illinois, Kansas, Kentucky, Texas, Oregon, and Washington. Current consortia typically are small PHAs that form consortia in order to spread the administrative costs of interacting with HUD. HUD anticipates that more consortia will form under the proposed regulations, which remove hurdles experienced by PHAs, thus amplifying the benefits of consortia.

Paperwork Reduction Act

The information collection requirements contained in this proposed rule have been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) and assigned OMB Control Number 2577–0235. In accordance with the Paperwork Reduction Act, HUD may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection displays a currently valid OMB control number.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule will enable PHAs to establish cross-jurisdictional consortia that would be

treated as a single PHA, with a single jurisdiction and a single set of reporting and audit requirements, for purposes of administering the HCV program in a more streamlined and less burdensome fashion. The regulatory streamlining provided by this rule should make it easier for PHAs, including small PHAs, to form consortia and achieve greater benefits. Although there may be some costs associated with the formation and operation of consortia, these are expected to be more than offset by the operational flexibilities afforded by the rule. Moreover, the formation of consortia is a voluntary action and, therefore, to the extent that the proposed rule would result in PHAs incurring any costs, it would be as a result of their own discretion. Accordingly, the undersigned certifies that this rule would not have a significant economic impact on a substantial number of small entities.

Notwithstanding HUD’s determination that this rule would not have a significant economic impact on a substantial number of small entities, HUD invites comments specifically regarding less burdensome alternatives to this rule that will meet HUD’s objectives as described in this preamble.

Environmental Impact

A Finding of No Significant Impact (FONSI) with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332 *et seq.*). The FONSI is available for public inspection between the hours of 8 a.m. and 5 p.m. weekdays in the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street, SW., Room 10276 Washington, DC 20410–0500. Due to security measures at the HUD Headquarters building, please schedule an appointment to review the FONSI by calling the Regulations Division at 202–708–3055 (this is not a toll-free number). Individuals with speech or hearing impairments may access this number via TTY by calling the Federal Relay Service at 800–877–8339 (this is a toll-free number).

Federalism

Executive Order 13132 (entitled “Federalism”) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial direct compliance costs on state and local governments and is not required by statute or the rule preempts state law, unless the agency meets the consultation and funding requirements

of section 6 of the Executive order. This rule would not have federalism implications and would not impose substantial direct compliance costs on state and local governments or preempt state law within the meaning of the Executive order.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) (UMRA) establishes requirements for Federal agencies to assess the effects of their regulatory actions on state, local, and tribal governments, and on the private sector. This proposed rule would not impose any Federal mandates on any state, local, or tribal government, or on the private sector, within the meaning of UMRA.

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance number for the Housing Choice Voucher Program is 14.871.

Lists of Subjects

24 CFR Part 5

Administrative practice and procedure, Aged, Claims, Crime, Government contracts, Grant programs—housing and community development, Individuals with disabilities, Intergovernmental relations, Loan programs—housing and community development, Low and moderate income housing, Mortgage insurance, Penalties, Pets, Public housing, Rent subsidies, Reporting and recordkeeping requirements, Social security, Unemployment compensation, Wages.

24 CFR Part 943

Public housing, Reporting and recordkeeping requirements.

Accordingly, for the reasons stated in the preamble, HUD proposes to amend 24 CFR parts 5 and 943 as follows:

PART 5—GENERAL HUD PROGRAM REQUIREMENTS; WAIVERS

- 1. The authority citation for 24 CFR part 5 continues to read as follows:

Authority: 42 U.S.C. 1437a, 1437c, 1437d, 1437f, 1437n, 3535(d), Sec. 327, Pub.L. 109–115, 119 Stat. 2936, and Sec. 607, Pub.L. 109–162, 119 Stat. 3051.

- 2. Amend § 5.100 by revising the definition of “Public Housing Agency (PHA)” to read as follows:

§ 5.100 Definitions.

* * * * *

Public Housing Agency (PHA) means any state, county, municipality, or other governmental entity or public body, or agency or instrumentality of these entities, that is authorized to engage or

assist in the development or operation of low-income housing under the 1937 Act, or a consortium of such entities or bodies as approved by the Secretary.

* * * * *

■ 3. Revise part 943 to read as follows:

**PART 943—PUBLIC HOUSING
AGENCY CONSORTIA AND JOINT
VENTURES**

Subpart A—General

Sec.

943.101 Purpose of this part.

943.103 Consortium.

943.105 Joint ventures and other business arrangements.

Subpart B—Single-ACC Consortium

943.201 Programs covered under this subpart.

943.203 Organization of a single-ACC consortium.

943.205 Jurisdiction of a single-ACC consortium.

943.207 Elements of a single-ACC consortium agreement.

943.209 Withdrawals from or additions to a single-ACC consortium.

943.211 Dissolution of a single-ACC consortium.

943.213 Voucher and funding distribution upon dissolution or withdrawal.

943.215 The relationship between HUD and a single-ACC consortium.

943.217 Organizational costs and administrative fees.

943.219 Planning, reporting, and financial accountability.

943.221 Responsibilities of a single-ACC consortium.

Subpart C—Multiple-ACC Consortium

943.301 Programs covered under this subpart.

943.303 Organization of a multiple-ACC consortium.

943.305 Jurisdiction of a multiple-ACC consortium.

943.307 Elements of a multiple-ACC consortium agreement.

943.309 Withdrawals from or additions to a multiple-ACC consortium.

943.311 Dissolution of a multiple-ACC consortium.

943.313 The relationship between HUD and a multiple-ACC consortium.

943.315 Organizational costs and administrative fees.

943.317 Planning, reporting, and financial accountability.

943.319 Responsibilities of member PHAs.

Subpart D—Subsidiaries, Affiliates, Joint Ventures in Public Housing

943.401 Programs and activities covered under this subpart.

943.403 Types of operating organizations for a participating PHA.

943.405 Financial impact of a subsidiary, affiliate, or joint venture on a PHA.

943.407 Financial accountability of a subsidiary, affiliate, or joint venture to HUD and the Federal Government.

943.409 Procurement standards for PHAs selecting partners for a joint venture.

943.411 Procurement standards apply for a PHA's joint venture partner.

943.413 Procurement standards for a joint venture.

Authority: 42 U.S.C. 1437k, and 3535(d).

Subpart A—General

§ 943.101 Purpose of this part.

This part authorizes public housing agencies (PHAs), consistent with state and local law, to form consortia, joint ventures, affiliates, subsidiaries, partnerships, and other business arrangements under section 13 of the United States Housing Act of 1937 (42 U.S.C. 1437k) (1937 Act). This part does not preclude a PHA from entering cooperative arrangements to operate its programs under other authority, as long as they are consistent with other program regulations and requirements.

§ 943.103 Consortium.

(a) *Consortium.* Under the authority of section 13 of the 1937 Act, a PHA participating in a consortium shall enter into a consortium agreement under one of two forms: Single-Annual Contributions Contract (ACC) consortium or multiple-ACC consortium.

(b) *Single-ACC consortium.* A single-ACC consortium consists of two or more PHAs that join together to perform planning, reporting, and other administrative and management functions of the Section 8 Housing Choice Voucher (HCV) program, as specified in a consortium agreement. Under a single-ACC consortium, the consortium becomes a separate legal entity and is considered a single PHA for purposes of the Section 8 HCV program. A single-ACC consortium must operate the Section 8 HCV program in accordance with all applicable program regulations. HUD funds the consortium as one PHA, and applies all reporting and audit requirements accordingly. The requirements for single-ACC consortia are contained in subpart B of this part.

(c) *Multiple-ACC Consortium.* A multiple-ACC consortium consists of two or more PHAs that join together to perform planning, reporting, and other administrative functions for member PHAs, as specified in a consortium agreement. A multiple-ACC consortium submits a joint PHA plan, as applicable, and designates a lead PHA. The lead agency collects the assistance funds from HUD that would be paid to the member PHAs for the elements of their operations that are administered by the consortium and allocates them according to the consortium agreement. The lead agency also maintains the

consortium's records and submits reports to HUD. Each member PHA in a multiple-ACC consortium retains its own ACC with HUD. The requirements for a multiple-ACC consortium are contained in subpart C of this part.

§ 943.105 Joint ventures and other business arrangements.

Under section 13 of the 1937 Act, PHAs may form joint ventures, affiliates, subsidiaries, partnerships, and other business arrangements. The requirements for such arrangements are contained in subpart D of this part.

Subpart B—Single-ACC Consortium

§ 943.201 Programs covered under this subpart.

(a) A PHA may enter a single-ACC consortium under this subpart solely for administration of the following programs:

(1) The Section 8 HCV program (including project-based vouchers; project-based certificates; the Family Self-Sufficiency program; and special voucher housing types, including the HCV Homeownership Option);

(2) Mainstream 5 vouchers, except that entities which are only authorized to administer Mainstream 5 vouchers may not join or form single-ACC consortia; and

(3) Grants to consortium members in connection with the Section 8 HCV program, to the extent not inconsistent with the terms of the governing documents for the grant program's funding source.

(b) A PHA that is the owner of units receiving tenant-based rental assistance, or a project receiving project-based rental assistance, under section 8(o) of the 1937 Act, is not precluded from joining a single-ACC consortium, provided that such units or Section 8 projects are administered in accordance with 24 CFR 982.352(b) (for tenant-based vouchers) and 24 CFR 983.59 (for project-based vouchers). A PHA participating in the consortium may not serve as an independent entity for units or projects owned by a PHA within the consortium for purposes of 24 CFR 982.352(b) or 24 CFR 983.59.

(c) Moving-To-Work (MTW) PHAs may not form or join a single-ACC consortium.

(d) The single-ACC consortium must cover the PHA's whole HCV program under the ACC with HUD, including all authorized unit months and all funding.

§ 943.203 Organization of a single-ACC consortium.

(a) A PHA that elects to form a single-ACC consortium may do so upon HUD approval, and in accordance with HUD

established guidelines and instructions. HUD approval of a single-ACC consortium will be based on the following:

(1) That advance written notice of at least 120 days of the intent to form a single-ACC consortium has been given to HUD. HUD may, upon a showing of good cause, provide an exception to this requirement;

(2) That all required documentation has been submitted including:

(i) The Consortium Agreement;

(ii) The 5-Year Plan and the Annual Plan, as applicable, in accordance with 24 CFR part 903 and any other statutory or HUD requirements (See § 943.219, Planning, reporting, and financial accountability);

(iii) A letter of intent signed by the executive director of every PHA wishing to join the single-ACC consortium, with an accompanying board resolution of each PHA;

(iv) Supporting legal opinions satisfactory to HUD that the single-ACC consortium's jurisdiction is consistent with the state and local laws of each consortium member;

(v) Financial documentation for each PHA wishing to join the single-ACC consortium, including a final close-out audit for every PHA joining the single-ACC consortium, up to the effective date of the consortium;

(vi) Certification that no PHA wishing to join the single-ACC consortium fails the civil rights compliance threshold for new funding, or, if applicable, that joining the consortium is consistent with the action(s) to resolve outstanding civil rights matters. HUD will not approve a PHA's conversion into a single-ACC consortium until either:

(A) The PHA wishing to join takes corrective action to the satisfaction of HUD or another entity with authority to enforce a corrective action agreement or order; or

(B) The single-ACC consortium demonstrates to HUD's satisfaction that it has assumed liability for taking the corrective action; and

(vii) Any other form of documentation that HUD deems necessary and appropriate for approval of the single-ACC consortium;

(3) The PHA's performance rating under the Section 8 Management and Assessment Program (SEMAP), and whether there are any open findings from an Office of Inspector General (OIG) audit, HUD Field Office (FO) monitoring review, financial audit, and/or any other HUD or HUD-required review;

(4) That the financial documentation submitted by each PHA in support of single-ACC consortium formation

demonstrates that the single-ACC consortium will have the financial capability, as determined by HUD, to administer the programs and activities of the single-ACC consortium;

(5) Any other factors that may indicate appropriateness of single-ACC consortium formation, such as the PHA's capacity to administer its Section 8 HCV program, and the existing market conditions in the jurisdiction of each PHA joining the single-ACC consortium; and

(6) That all other consortium requirements are met.

(b) Upon HUD approval, the single-ACC consortium will become effective as of January 1 of the following year. HUD may, upon showing of good cause, provide an exception to this requirement.

(c) A PHA that elects to form a single-ACC consortium must enter into a consortium agreement, which shall meet the minimum requirements established in § 943.207 (Elements of a single-ACC consortium agreement) of this subpart. The executed consortium agreement must be submitted to HUD, and HUD may require modification to the consortium agreement before approving the formation of the single-ACC consortium.

(d) PHAs joining a single-ACC consortium must adopt a new fiscal year end for the consortium.

(e) The single-ACC consortium must be administered in accordance with the applicable provisions of this part; the consortium agreement; the PHA Plan, as applicable; other applicable HUD regulations and requirements; and state and local law.

§ 943.205 Jurisdiction of a single-ACC consortium.

(a) A single-ACC consortium shall operate in a single consortium-wide jurisdiction composed of the combined jurisdictions of all consortium members. Jurisdictional boundaries between individual consortium members will cease to exist for purposes of HCV program administration during the term of the consortium.

(b) The single-ACC consortium jurisdiction must be consistent with the state and local law of each consortium member.

§ 943.207 Elements of a single-ACC consortium agreement.

(a) The single-ACC consortium agreement governs the formation and operation of the consortium and must specify the following:

(1) The name of each consortium member under the consortium agreement;

(2) The functions to be performed by each consortium member during the term of the consortium;

(3) The structure of the single-ACC consortium, which shall address, at a minimum, the establishment of a board of directors or similar governing body and designated officials;

(4) The process for merging the consortium members' waiting lists upon formation of the single-ACC consortium, including the adoption of waiting list preferences (e.g., homeless) by the single-ACC consortium. This process must not have the purpose or effect of delaying or otherwise denying admission to the program based on race, color, national origin, sex, religion, disability, or familial status of any member of the applicant family;

(5) The terms under which a PHA may join or withdraw from the single-ACC consortium. The consortium agreement shall conform to § 943.209 (Withdrawals from or additions to a single-ACC consortium) of this subpart;

(6) How new incremental vouchers under a special purpose voucher program will be distributed among consortium members upon dissolution or withdrawal from the consortium; and

(7) Which consortium member, upon dissolution or withdrawal, shall have jurisdiction over converted projects with overlapping jurisdictions under a multifamily housing tenant protection action.

(b) The agreement must acknowledge that all consortium members are subject to the single-ACC PHA Plan.

(c) The agreement must be signed by an authorized representative of each consortium member.

§ 943.209 Withdrawals from or additions to a single-ACC consortium.

(a) Withdrawal refers to one or more consortium members leaving the single-ACC consortium without resulting in dissolution of the single-ACC consortium.

(b) Withdrawals from a single-ACC consortium may not occur until the initial 5-year consortium term has expired. HUD may, upon showing of good cause, allow withdrawals from a single-ACC consortium before completion of the initial 5-year term.

(c) If the consortium has any outstanding civil rights matters, withdrawals from a single-ACC consortium may not occur unless the withdrawal is consistent with the action(s) to resolve such matters.

(d) To provide for orderly transition, withdrawal of a PHA must take effect on the last day of the consortium's fiscal year, and addition of a PHA must take effect on the first day of the

consortium's fiscal year. The single-ACC consortium must notify HUD in writing of any additions or withdrawals at least 120 days in advance. This notification must include submission of the withdrawing member's replacement 5-Year Plan and Annual Plan, as applicable, in accordance with 24 CFR part 903 and any other statutory or HUD requirements.

(e) Upon withdrawal from the single-ACC consortium, the withdrawing member must offer to each applicant currently on the single-ACC consortium's waiting list the opportunity to be placed on the withdrawing member's waiting list, with the date and time of their original application to the single-ACC consortium's waiting list. These applicants must not be considered nonresident applicants (for the purposes of restriction of portability under 982.353(c)) if the applicant was a resident applicant at the time of application to the single-ACC consortium's waiting list.

(f) Upon a member's withdrawal from the single-ACC consortium, vouchers and funding, including net restricted assets and unrestricted net assets, will be distributed to the withdrawing member as specified in § 943.213 (Voucher and funding distribution upon dissolution or withdrawal) of this subpart.

§ 943.211 Dissolution of a single-ACC consortium.

(a) A single-ACC consortium may not be dissolved prior to the expiration of the initial 5-year consortium term. HUD may, upon showing of good cause, allow dissolution of a consortium prior to completion of the initial 5-year term. A single-ACC consortium will continue to exist beyond the initial 5-year consortium term, unless dissolved.

(b) If the consortium has any outstanding civil rights matters, dissolution of a single-ACC consortium may not occur unless the dissolution is consistent with the action(s) to resolve such matters.

(c) To provide for orderly transition, dissolution of the single-ACC consortium must take effect on the last day of the consortium's fiscal year. The single-ACC consortium must notify HUD in writing of dissolution at least 120 days in advance of the dissolution effective date. This notification must include submission of all members' replacement 5-Year Plans and Annual Plans, as applicable, in accordance with 24 CFR part 903 and any other statutory or HUD requirements.

(d) Upon dissolution, all withdrawing members must offer to each applicant

currently on the single-ACC consortium's waiting list the opportunity to be placed on all of the withdrawing members' waiting lists, with the date and time of their original application to the single-ACC consortium's waiting list. These applicants must not be considered nonresident applicants (for the purposes of restriction of portability under § 982.353(c)) if the applicant was a resident applicant at the time of application to the single-ACC consortium's waiting list.

(e) Upon dissolution, vouchers and funding, including net restricted assets and unrestricted net assets, will be distributed among consortium members as specified in § 943.213 (Voucher and funding distribution upon dissolution or withdrawal) of this subpart.

§ 943.213 Voucher and funding distribution upon dissolution or withdrawal.

(a) Vouchers will be distributed in the following manner upon dissolution or withdrawal:

(1) Each consortium member will leave the consortium upon dissolution or withdrawal with at least the same number of authorized baseline units that the consortium member brought into the consortium at the time of its formation. HUD may, for good cause, allow for an alternative distribution of baseline units.

(2) Each consortium member shall receive contract renewal funding allocations based on the number of leased vouchers located within their original jurisdiction at the time of withdrawal or dissolution, up to their original baseline number. HUD may, for good cause, allow for an alternative distribution of leased vouchers.

(3) Tenant protection vouchers allocated to cover a public housing demolition, disposition, or conversion action will remain with the PHA that has ownership over the property. Tenant protection vouchers allocated to cover a multifamily housing conversion action shall remain with the PHA that has jurisdiction over the converted project. Administration of tenant protection vouchers under converted projects with overlapping jurisdictions shall remain with the PHA that has jurisdiction over the converted project as specified in the consortium agreement.

(4) New incremental vouchers under a special purpose voucher program will be distributed as specified in the consortium agreement, provided that such voucher distribution is made in accordance with program requirements under each respective special purpose voucher program.

(b) Funding will be distributed in the following manner upon dissolution or withdrawal:

(1) Budget authority will be divided proportionately, based on the percentage of all leased units in the consortium that each consortium member will receive.

(2) Administrative fees will be paid to the withdrawing PHA and the remaining consortium per the current appropriations requirements.

(3) Net Restricted Assets and Unrestricted Net Assets will be distributed based upon the percentage of the initial balance that was contributed by each consortium member.

§ 943.215 The relationship between HUD and a single-ACC consortium.

(a) HUD has a direct relationship with the single-ACC consortium, the same as it would have with any other PHA. Program funds will be disbursed to the single-ACC consortium in accordance with the consortium's ACC. Funding must be used in accordance with the consortium agreement, the PHA Plan, and HUD regulations and requirements.

(b) HUD may take any of the remedies described in the ACC against an individual member in a single-ACC consortium, or against the single-ACC consortium as a whole, if it determines that either has substantially violated—or is improperly administering—the requirements of the HCV program.

§ 943.217 Organizational costs and administrative fees.

(a) The administrative fee for a single-ACC consortium will be determined based on the published administrative fee rates for the area in which the single-ACC consortium has the greatest proportion of its participants on a date in time and the total number of vouchers under lease for the single-ACC consortium as of the first of the month, up to the baseline number of vouchers under the single-ACC consortium's ACC.

(b) A single-ACC consortium may apply to HUD for blended rates, which are determined based on a weighted average of the published administrative fee rates for all areas in which program participants are located within the single-ACC consortium and all participants under lease in each of the areas on a date in time. The blended rates will be based on the published administrative fee rate for each consortium member, effective for the year for which the blended rate is requested. Blended rates will only be applied if they result in a higher administrative fee rate for the single-

ACC consortium. Blended rates apply only to the year for which requested.

(c) If appropriations are available, a single-ACC consortium may be eligible for a higher administrative fee in accordance with 24 CFR 982.152(b)(2) if it operates over a large geographic area.

(d) If appropriations are available, a single-ACC consortium may be eligible for administrative fees to cover extraordinary costs determined necessary by HUD, in accordance with 24 CFR 982.152(a)(1)(iii)(C), during the initial year of operation of the consortium to provide for the organization and implementation of the single-ACC consortium.

§ 943.219 Planning, reporting, and financial accountability.

(a) A single-ACC consortium is considered one PHA for purposes of Section 8 HCV program administration, including but not limited to, program accounts and records, audit requirements, and all PHA responsibilities under the ACC, the PHA administrative plan, and HUD regulations and other requirements.

(b) Planning, reporting, and financial accountability apply to a single-ACC consortium as follows:

(1) Upon creation of the single-ACC consortium, each member's assets, liabilities, and equity accounts, as related to the HCV program, are consolidated and reported on a consolidated balance sheet for purposes of single reporting in the Financial Assessment Subsystem for Public Housing Agencies (FASS-PH) and the Voucher Management System (VMS).

(2) Prior to entering a single-ACC consortium, each PHA must agree to the completion of a final audit to close-out program accounts for all HCV programs, up to the effective date of the consortium. The final audit must be completed in accordance with 24 CFR 982.159. Once the audit is completed, remaining funds from all the PHAs' accounts must be transferred to the consortium.

(3) During the term of the consortium agreement, the single-ACC consortium must submit a 5-Year Plan and Annual Plan, as applicable, for the consortium, in accordance with 24 CFR part 903 and any other statutory or HUD requirements. For any programs not covered by the single-ACC consortium (e.g., a consortium member administers a public housing program separately from the single-ACC consortium), consortium members must submit a separate 5-Year Plan and Annual Plan to HUD for those programs, as applicable, in accordance with 24 CFR part 903 and

any other statutory or HUD requirements.

(4) During the term of the consortium agreement, the single-ACC consortium must have a single Section 8 HCV administrative plan for the consortium, in accordance with 24 CFR 982.54 (Administrative plan).

(5) The single-ACC consortium must maintain records and submit reports to HUD as a single PHA for purposes of Section 8 HCV program administration, in accordance with HUD regulations and requirements that account for all activities of the consortium. All consortium members will be bound by the 5-Year and Annual Plans and reports submitted to HUD by the single-ACC consortium for programs covered by the consortium.

(6) Financial accountability rests with the single-ACC consortium and, thus, HUD will apply independent audit and performance assessment requirements on a consortium-wide basis.

(7) A single-ACC consortium must keep a copy of the consortium agreement on file for inspection. The consortium agreement must also be a supporting statement to the PHA plan.

§ 943.221 Responsibilities of a single-ACC consortium.

Each consortium member is responsible for the performance of the consortium and has an obligation to assure that all program funds are used in accordance with HUD regulations and requirements, and that the programs under the consortium are administered in accordance with HUD regulations and requirements. Any breach of program requirements is a breach of the consortium ACC, so each consortium member is responsible for the performance of the consortium as a whole.

Subpart C—Multiple-ACC Consortium

§ 943.301 Programs covered under this subpart.

(a) PHAs may enter a multiple-ACC consortium under this subpart for administration of:

- (1) The public housing program;
- (2) The Section 8 HCV (including project-based vouchers; project-based certificates; the Family Self-Sufficiency program; and special voucher housing types, including the HCV Homeownership Option);
- (3) The Section 8 Moderate Rehabilitation program, including the Single Room Occupancy program; and
- (4) Grants to consortium members in connection with Section 8 and public housing programs, to the extent not inconsistent with the terms of the

governing documents for the grant program's funding source.

(b) A PHA that is the owner of units receiving tenant-based rental assistance, or a project receiving project-based rental assistance, under section 8(o) of the 1937 Act, is not precluded from joining a multiple-ACC consortium, provided that such units or Section 8 projects are administered in accordance with 24 CFR 982.352(b) (for tenant-based vouchers) and 24 CFR 983.59 (for project-based vouchers). A PHA participating in the consortium may not serve as an independent entity for units or projects owned by PHAs within the consortium for purposes of 24 CFR 982.352(b) or 24 CFR 983.59.

(c) MTW agencies may not form or join a multiple-ACC consortium.

(d) If a PHA elects to enter a multiple-ACC consortium with respect to a category specified in paragraph (a) of this section, the consortium must cover the PHA's whole program under the ACC with HUD for that category, including all dwelling units and all funding.

§ 943.303 Organization of a multiple-ACC consortium.

(a) A PHA that elects to form a multiple-ACC consortium may do so upon HUD approval, and in accordance with HUD established guidelines and instructions. HUD approval of a multiple-ACC consortium will be based on the following:

(1) That written notice of the intent to form a multiple-ACC consortium has been given to HUD at least 20 days in advance. HUD may, upon a showing of good cause, provide an exception to this requirement;

(2) That all required documentation has been submitted including:

- (i) The Consortium Agreement;
- (ii) The 5-Year Plan and the Annual Plan, as applicable, in accordance with 24 CFR part 903 and any other statutory or HUD requirements (see § 943.317, Planning, reporting, and financial accountability);
- (iii) A letter of intent signed by the executive director of every PHA wishing to join the multiple-ACC consortium, with the accompanying board resolution of each PHA;
- (iv) Any memoranda of understanding (MOUs) and/or other agreements to operate within the jurisdiction of other consortium members, including supporting legal opinions, satisfactory to HUD, that such agreements are in compliance with the applicable state and local laws of each consortium member;
- (v) Financial documentation for each PHA wishing to join the multiple-ACC

consortium, including a final close-out audit for every PHA joining the multiple-ACC consortium, up to the effective date of the consortium; and

(vi) Any other form of documentation that HUD deems necessary and appropriate for approval of the multiple-ACC consortium;

(3) That the lead agency is not designated as a “troubled PHA” by HUD under the Public Housing Assessment System (PHAS) or by the PHA’s performance rating under Section 8 Management Assessment Program (SEMAP), and whether there are any open findings from an OIG audit, HUD FO monitoring review, financial audit, or any other HUD or HUD-required review;

(4) That the financial documentation submitted by each PHA in support of multiple-ACC consortium formation demonstrates that the multiple-ACC consortium will have the financial capability to administer the programs and activities of the multiple-ACC consortium;

(5) Any other factors that may indicate the appropriateness of a multiple-ACC consortium formation, such as the PHA’s capacity to administer its programs, and the existing market conditions in the jurisdiction of each PHA joining the multiple-ACC consortium; and

(6) That all other consortium requirements are met.

(b) Upon HUD approval, the multiple-ACC consortium will become effective as of January 1 of the following year. HUD may, upon showing of good cause, provide an exception to this requirement.

(c) A PHA that elects to form a multiple-ACC consortium must enter into a consortium agreement among the member PHAs, specifying a lead agency (see § 943.307, Elements of a multiple-ACC consortium agreement). The executed consortium agreement must be submitted to HUD, and HUD may require modification to the consortium agreement before approving the formation of the multiple-ACC consortium. HUD enters into any necessary payment agreements with the lead agency and the other member PHAs (see § 943.313, The relationship between HUD and a multiple-ACC consortium) to provide that HUD funding to the member PHAs for program categories covered by the consortium will be paid to the lead agency.

(d) The lead agency must not be:

(i) Designated as a “troubled PHA” by HUD under PHAS or by the PHA’s performance rating under SEMAP, or

(ii) Determined by HUD to fail the civil rights compliance threshold for

new funding, or an agency that has had a PHAS designation withheld for civil rights or other reasons.

(e) The lead agency is designated to receive HUD program payments on behalf of member PHAs, to administer HUD requirements for administration of the funds, and to apply the funds in accordance with the consortium agreement and HUD regulations and requirements.

(f) The multiple-ACC consortium must submit a joint PHA Plan, as applicable, to HUD (see § 943.317, Planning, reporting, and financial accountability).

(g) The member PHAs must adopt the same fiscal year end so that the applicable periods for submission and review of the joint PHA plan, reporting, and audits are the same.

(h) The multiple-ACC consortium must be administered in accordance with the applicable provisions of this part, the consortium agreement, the joint PHA Plan, as applicable, and other applicable HUD regulations and requirements.

§ 943.305 Jurisdiction of a multiple-ACC consortium.

Each member PHA has its own jurisdiction, and will continue to operate in that jurisdiction. However, member PHAs may enter into memoranda of understanding (MOUs) and/or other agreements, in accordance with applicable state law, to operate within the jurisdictions of other member PHAs in order to further the goals of the consortium and to expand housing opportunities for assisted families.

§ 943.307 Elements of a multiple-ACC consortium agreement.

(a) The multiple-ACC consortium agreement governs the formation and operation of the consortium. The consortium agreement must be consistent with any payment agreements between the member PHAs and HUD and must specify the following:

(1) The names of the member PHAs and the program categories each PHA is including under the consortium agreement;

(2) The name of the lead agency;

(3) The functions to be performed by the lead agency and the other member PHAs during the term of the consortium;

(4) The allocation of funds among member PHAs, including funding awards made following formation of the multiple-ACC consortium, and responsibility for administration of funds paid to the consortium;

(5) The structure of the multiple-ACC consortium; and

(6) The terms under which a PHA may join or withdraw from the multiple-ACC consortium. The consortium agreement shall conform to § 943.309 (Withdrawals from or additions to a multiple-ACC consortium) of this subpart.

(b) The agreement must acknowledge that the member PHAs are subject to the joint PHA Plan submitted by the lead agency.

(c) The agreement must be signed by an authorized representative of each member PHA.

§ 943.309 Withdrawals from or additions to a multiple-ACC consortium.

(a) Withdrawal refers to one or more consortium member leaving the multiple-ACC consortium without resulting in dissolution of the multiple-ACC consortium.

(b) Withdrawals from a multiple-ACC consortium may not occur until the initial 5-year consortium term has expired. HUD may, upon showing of good cause, allow withdrawals from a multiple-ACC consortium before completion of the initial 5-year term.

(c) If the consortium has any outstanding civil rights matters, withdrawals from a multiple-ACC consortium may not occur unless the withdrawal is consistent with the action(s) to resolve such matters.

(d) To provide for orderly transition, withdrawal of a PHA must take effect on the last day of the consortium’s fiscal year, and addition of a PHA must take effect on the first day of the consortium’s fiscal year. The multiple-ACC consortium must notify HUD, in writing, of any additions or withdrawals at least 120 days in advance. This notification must include submission of the withdrawing member PHA’s replacement 5-Year Plan and Annual Plan, as applicable, in accordance with 24 CFR part 903 and any other statutory or HUD requirements.

(e) Because each member PHA retains its own ACC with HUD, upon withdrawal from the multiple-ACC consortium, the withdrawing PHA begins to operate in accordance with its own ACC with HUD.

§ 943.311 Dissolution of a multiple-ACC consortium.

(a) A multiple-ACC consortium may not be dissolved prior to the expiration of the initial 5-year consortium term. HUD may, upon showing of good cause, allow dissolution of a consortium prior to completion of the initial 5-year term. A multiple-ACC consortium will continue to exist beyond the initial 5-year consortium term, unless dissolved.

(b) If the consortium has any outstanding civil rights matters,

dissolution of a multiple-ACC consortium may not occur unless the dissolution is consistent with the action(s) to resolve such matters.

(c) Dissolution of the multiple-ACC consortium must take effect on the last day of the consortium's fiscal year. The multiple-ACC consortium must notify HUD of the dissolution, in writing, at least 120 days in advance. This notification must include submission of all member PHA's replacement 5-Year Plans and Annual Plans, as applicable, in accordance with 24 CFR part 903 and any other statutory or HUD requirements.

(d) Because each member PHA retains its own ACC with HUD, upon dissolution of the consortium, each member PHA begins to operate as it did prior to the formation of the consortium.

§ 943.313 The relationship between HUD and a multiple-ACC consortium.

(a) HUD has a direct relationship with the consortium through the joint PHA Plan, as applicable, and through one or more payment agreements, executed in a form prescribed by HUD, under which HUD and the member PHAs agree that program funds will be paid to the lead agency on behalf of the member PHAs. Such funds must be used in accordance with the consortium agreement, the joint PHA Plan, and HUD regulations and requirements.

(b) HUD may take any of the remedies described in the ACC against an individual member in a multiple-ACC consortium or against the multiple-ACC consortium as a whole, if it determines that either has substantially violated—or is improperly administering—the requirements of any of its programs.

§ 943.315 Organizational costs and administrative fees.

(a) The administrative fee for the Section 8 HCV program for each member PHA in a multiple-ACC consortium will be based on the published administrative fee for each member PHA prior to formation of the consortium.

(b) If appropriations are available, a multiple-ACC consortium may be eligible, during the first year of operation of the consortium, for administrative fees to cover extraordinary costs determined necessary by HUD in accordance with 24 CFR 982.152(a)(1)(iii)(C) for the organization and implementation of the multiple-ACC consortium.

§ 943.317 Planning, reporting, and financial accountability.

(a) During the term of the consortium agreement, the consortium must submit joint 5-Year Plans and joint Annual

Plans, as applicable, for all member PHAs, in accordance with 24 CFR part 903 and any other statutory or HUD requirements. For any programs not covered by the multiple-ACC consortium (e.g., a member PHA administers a public housing or Section 8 HCV program separately from the multiple-ACC consortium), member PHAs must submit a separate 5-Year Plan and Annual Plan to HUD for those programs, as applicable, in accordance with 24 CFR part 903 and any other statutory or HUD requirements.

(b) The lead agency must maintain records and submit reports to HUD, in accordance with HUD regulations and requirements, for all of the member PHAs. All PHAs will be bound by the 5-Year and Annual Plans and reports submitted to HUD by the multiple-ACC consortium for programs covered by the consortium.

(c) Each member PHA must keep a copy of the consortium agreement on file for inspection. The consortium agreement must also be a supporting document to the joint PHA Plan.

(d) Prior to entering a multiple-ACC consortium, each PHA must agree to the completion of a final audit to close-out program accounts for all programs covered by the multiple-ACC consortium, up to the effective date of the consortium.

(e) Independent audits and performance assessment requirements will be applied in the following way:

(1) Where the lead agency will manage substantially all programs and activities of the consortium, HUD interprets financial accountability to rest with the consortium and, thus, HUD will apply independent audit and performance assessment requirements on a consortium-wide basis.

(2) Where the lead agency will not manage substantially all programs and activities of a consortium, the consortium shall indicate in its PHA Plan submission which PHAs have financial accountability for the programs. The determination of financial accountability shall be made in accordance with generally accepted accounting principles, as determined in consultation with an independent public accountant. In such situations, HUD will apply independent audit and performance assessment requirements consistent with that determination.

With respect to any consortium, however, HUD may determine (based on a request from the multiple-ACC consortium or other circumstances) to apply independent audit and performance requirements on a different basis where this would promote sound management.

§ 943.319 Responsibilities of member PHAs.

Despite participation in a consortium, each member PHA remains responsible for its own obligations under its ACC with HUD. This means that each member PHA has an obligation to assure that all program funds, including funds paid to the lead agency for administration by the consortium, are used in accordance with HUD regulations and requirements, and that the PHA's program is administered in accordance with HUD regulations and requirements. Any breach of program requirements with respect to a program covered by the consortium agreement is a breach of the ACC with each of the member PHAs, so each PHA is responsible for the performance of the consortium.

Subpart D—Subsidiaries, Affiliates, Joint Ventures in Public Housing

§ 943.401 Programs and activities covered under this subpart.

(a) This subpart applies to the provision of a PHA's public housing administrative and management functions, and to the provision (or arranging for the provision) of supportive and social services in connection with public housing. This subpart does not apply to activities of a PHA that are subject to the requirements of 24 CFR part 905, subpart F.

(b) For purposes of this subpart, the term "joint venture partner" means a member (other than a PHA) in a joint venture, partnership, or other business arrangement or contract for services with a PHA.

(c) This part does not affect a PHA's authority to use joint ventures, as may be permitted under state law, when using funds that are not 1937 Act funds.

§ 943.403 Types of operating organizations for a participating PHA.

(a) A PHA may create and operate a wholly owned or controlled subsidiary or other affiliate; and may enter into joint ventures, partnerships, or other business arrangements with individuals, organizations, entities, or governmental units. A subsidiary or affiliate may be a nonprofit corporation. A subsidiary or affiliate may be an organization controlled by the same persons who serve on the governing board of the PHA or who are employees of the PHA.

(b) The purpose of any of these operating organizations would be to administer programs of the PHA.

§ 943.405 Financial impact of a subsidiary, affiliate, or joint venture on a PHA.

Income generated by subsidiaries, affiliates, or joint ventures formed under

the authority of this subpart is to be used for low-income housing or to benefit the residents assisted by the PHA. This income will not cause a decrease in funding provided under the public housing program, except as otherwise provided under the Operating Fund and Capital Fund formulas.

§ 943.407 Financial accountability of a subsidiary, affiliate, or joint venture to HUD and the Federal Government.

The subsidiary, affiliate, or joint venture is subject to the same authority of HUD, HUD's Inspector General, and the Comptroller General to audit its conduct.

§ 943.409 Procurement standards for PHAs selecting partners for a joint venture.

(a) The requirements of 24 CFR part 85 are applicable to this part, subject to paragraph (b) of this section, in connection with the PHA's public housing program.

(b) A PHA may use competitive proposal procedures for qualifications-based procurement (Request for Qualifications), or may solicit a proposal from only one source ("sole source") to select a joint venture partner to perform an administrative or management function of its public housing program or to provide, or arrange to provide, supportive or social services covered under this part, under the following circumstances:

(1) The proposed joint venture partner has under its control and will make available to the partnership substantial, unique, and tangible resources or other benefits that would not otherwise be available to the PHA on the open market (e.g., planning expertise, program experience, or financial or other resources). In this case, the PHA must maintain documentation to substantiate both the cost reasonableness of its selection of the proposed partner and the unique qualifications of the partner; or

(2) A resident group or a PHA subsidiary is willing and able to act as the PHA's partner in performing administrative and management functions or to provide supportive or social services. This entity must comply with the requirements of 24 CFR part 84 (if the entity is a nonprofit) or 24 CFR part 85 (if the entity is a state or local government) with respect to its selection of the members of the team, and the members must be paid on a cost-reimbursement basis only. The PHA must maintain documentation that indicates both the cost reasonableness of its selection of a resident group or PHA subsidiary and the ability of that group

or subsidiary to act as the PHA's partner under this provision.

§ 943.411 Procurement standards apply for a PHA's joint venture partner.

(a) *General.* A joint venture partner is not a grantee or subgrantee and, accordingly, is not required to comply with 24 CFR part 84 or 24 CFR part 85 in its procurement of goods and services under this part. The partner must comply with all applicable state and local procurement and conflict of interest requirements with respect to its selection of entities to assist in PHA program administration.

(b) *Exception.* If the joint venture partner is a subsidiary, affiliate, instrumentality, or identity of interest party of the PHA, it is subject to the requirements of 24 CFR part 85. HUD may, on a case-by-case basis, exempt such a joint venture partner from the need to comply with requirements under 24 CFR part 85 if HUD determines that the joint venture has developed an acceptable alternative procurement plan.

(c) *Contracting with identity-of-interest parties.* A joint venture partner may contract with an identity-of-interest party for goods or services, or a party specified in the selected bidder's response to a Request for Proposal or Request for Qualifications (as applicable), without the need for further procurement if:

(1) The PHA can demonstrate that its original competitive selection of the partner clearly anticipated the later provision of such goods or services;

(2) Compensation of all identity-of-interest parties is structured to ensure there is no duplication of profit or expenses; and

(3) The PHA can demonstrate that its selection is reasonable based upon prevailing market costs and standards, and that the quality and timeliness of the goods or services is comparable to that available in the open market. For purposes of this paragraph (c), an "identity-of-interest party" means a party that is wholly owned or controlled by, or that is otherwise affiliated with, the partner or the PHA. The PHA may use an independent organization experienced in cost valuation to determine the cost reasonableness of the proposed contracts.

§ 943.413 Procurement standards for a joint venture.

(a) When the joint venture as a whole is controlled by the PHA or an identity-of-interest party of the PHA, the joint venture is subject to the requirements of 24 CFR part 85.

(b) If a joint venture is not controlled by the PHA or an identity-of-interest

party of the PHA, then the rules that apply to the other partners apply. (See § 943.411, Procurement standards apply for a PHA's joint venture partner).

Dated: June 9, 2014.

Sandra B. Henriquez,

Assistant Secretary for Public and Indian Housing.

BILLING CODE 4210-67-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG-209459-78]

RIN 1545-BL98

Individual Retirement Plans and Simplified Employee Pensions; Partial Withdrawal

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Partial withdrawal of notice of proposed rulemaking.

SUMMARY: This document withdraws part of a notice of proposed rulemaking that specifically relates to rollovers from individual retirement arrangements (IRAs). The partial withdrawal of the proposed regulation will affect individuals who maintain IRAs and financial institutions that are trustees, custodians, or issuers of IRAs. **DATES:** As of July 11, 2014, the proposed amendment to § 1.408-4(b)(4)(ii), published Tuesday, July 14, 1981 (46 FR 36198), is withdrawn.

FOR FURTHER INFORMATION CONTACT: Vernon S. Carter at (202) 317-6700 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

Section 408(d) governs distributions from IRAs. Generally, section 408(d)(1) provides that any amount distributed from an IRA is includible in gross income by the payee or distributee. Section 408(d)(3)(A)(i) allows a payee or distributee of an IRA distribution to exclude from gross income any amount paid or distributed from an IRA that is subsequently paid into an IRA not later than the 60th day after the day on which the payee or distributee receives the distribution. Section 408(d)(3)(A)(i) and (d)(3)(D)(i). Section 408(d)(3)(B) provides that an individual is permitted to make only one nontaxable rollover described in section 408(d)(3)(A)(i) in any 1-year period.

On July 14, 1981, the **Federal Register** published proposed regulations (46 FR

36198) that would have amended § 1.408-4 of the Income Tax Regulations by adding a new paragraph (b)(4)(ii). Those proposed regulations provide that the rollover limitation of section 408(d)(3)(B) is applied on an IRA-by-IRA basis. This rule is reflected in IRS Publication 590, Individual Retirement Arrangements (IRAs). However, section 408(d)(3)(B) provides that the exclusion from gross income for IRA rollovers pursuant to subparagraph (A)(i) does not apply “if at any time during the 1-year period ending on the day of such receipt such individual received any other amount described in that subparagraph from an individual retirement account or an individual retirement annuity which was not includible in his gross income because of the application of this paragraph.”

Based on the language in section 408(d)(3)(B), a recent Tax Court opinion, *Bobrow v. Commissioner*, T.C. Memo. 2014-21, held that the limitation applies on an aggregate basis. Thus, under *Bobrow*, an individual cannot make an IRA-to-IRA rollover if the individual has made an IRA-to-IRA rollover involving any of the individual’s IRAs in the preceding 1-year period. The IRS intends to follow the opinion in *Bobrow* and, accordingly, is withdrawing paragraph (b)(4)(ii) of § 1.408-4 of the proposed regulations and will revise Publication 590. This interpretation of the rollover rules under section 408(d)(1)(B) does not affect the ability of an IRA owner to transfer funds from one IRA trustee or custodian directly to another, because such a transfer is not a rollover and, therefore, is not subject to the one-rollover-per-year limitation of section 408(d)(3)(B). See Rev. Rul. 78-406, 1978-2 C.B. 157.

In response to comments expressing concern over implementation of the rollover limitation as interpreted in *Bobrow*, the IRS released Announcement 2014-15, 2014-16 I.R.B. 973, on March 20, 2014. Announcement 2014-15 addresses the application to Individual Retirement Accounts and Individual Retirement Annuities of the one-rollover-per-year limitation of section 408(d)(3)(B) and provides transition relief for owners. Consistent with that Announcement, the IRS will not apply the *Bobrow* interpretation of section 408(d)(3)(B) to any rollover that involves a distribution occurring before January 1, 2015.

List of Subjects in 26 CFR Part 1

Treatment of distributions from individual retirement arrangements.

Partial Withdrawal of Proposed Rulemaking

For the reasons stated in the preamble and under the authority of 26 U.S.C. 7805, the Internal Revenue Service withdraws the proposed amendment to § 1.408-4(b)(4)(ii).

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket Number USCG-2014-0407]

RIN 1625-AA08

Special Local Regulation; Great Race On The Sea, Powerboat Race, Atlantic Ocean, Long Beach, NY

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing a temporary special local regulation on the navigable waters of the Atlantic Ocean off Long Beach, NY during the Great Race On The Sea Powerboat Race. This action is necessary to provide for the safety of life of participants and spectators during this event. Entering into, transiting through, remaining, anchoring or mooring within these regulated areas would be prohibited unless authorized by the Captain of the Port (COTP) Sector Long Island Sound.

DATES: Comments and related material must be received by the Coast Guard on or before August 11, 2014.

Requests for public meetings must be received by the Coast Guard on or before July 18, 2014.

ADDRESSES: You may submit comments identified by docket number using any one of the following methods:

(1) *Federal eRulemaking Portal:*

<http://www.regulations.gov>.

(2) *Fax:* 202-493-2251.

(3) *Mail or Delivery:* Docket Management Facility (M-30), U.S. Department of Transportation, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590-0001. Deliveries accepted between 9 a.m. and 5 p.m., Monday through Friday, except federal holidays. The telephone number is 202-366-9329.

See the “Public Participation and Request for Comments” portion of the

SUPPLEMENTARY INFORMATION section below for further instructions on submitting comments. To avoid duplication, please use only one of these three methods.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Petty Officer Scott Baumgartner, Prevention Department, Coast Guard Sector Long Island Sound, (203) 468-4559, Scott.A.Baumgartner@uscg.mil. If you have questions on viewing or submitting material to the docket, call Cheryl Collins, Program Manager, Docket Operations, telephone (202) 366-9826.

SUPPLEMENTARY INFORMATION:

NPRM Notice of Proposed Rulemaking

A. Public Participation and Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related materials. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you have provided.

1. Submitting Comments

If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online at <http://www.regulations.gov>, or by fax, mail, or hand delivery, but please use only one of these means. If you submit a comment online, it will be considered received by the Coast Guard when you successfully transmit the comment. If you fax, hand deliver, or mail your comment, it will be considered as having been received by the Coast Guard when it is received at the Docket Management Facility. We recommend that you include your name and a mailing address, an email address, or a telephone number in the body of your document so that we can contact you if we have questions regarding your submission.

To submit your comment online, go to <http://www.regulations.gov>, type the docket number [USCG-2014-0407] in the “SEARCH” box and click “SEARCH.” Click on “Submit a Comment” on the line associated with this rulemaking.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the Facility, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period and may change the rule based on your comments.

2. Viewing Comments and Documents

To view comments, as well as documents mentioned in this preamble as being available in the docket, go to <http://www.regulations.gov>, type the docket number (USCG–2014–0407) in the “SEARCH” box and click “SEARCH.” Click on Open Docket Folder on the line associated with this rulemaking. You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

3. Privacy Act

Anyone can search the electronic form of comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review a Privacy Act notice regarding our public dockets in the January 17, 2008, issue of the **Federal Register** (73 FR 3316).

4. Public meeting

We do not plan to hold a public meeting. But you may submit a request for one, using one of the methods specified under **ADDRESSES** on or before July 18, 2014. Please explain why you believe a public meeting would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register**.

B. Regulatory History and Information

In 2013, the Event Sponsor, Great South Bay Racing Inc. sponsored a similar powerboat racing event that was held in the same location, with the same race course, in the same timeframe but with a different event name, “Long Beach Regatta”. The Coast Guard issued a temporary final rule entitled, “Special Local Regulations: Long Beach Regatta, Powerboat Race, Atlantic Ocean, Long Beach, NY” that was effective on August 25, 2013 for this event.

C. Basis and Purpose

The legal basis for this proposed rule is 33 U.S.C. 1233 and Department of Homeland Security Delegation No. 0170.1, which collectively authorize the Coast Guard to define regulatory special local regulations. This rule would establish a special local regulation in order to provide for the safety of life on navigable waters during the Great Race On The Sea Powerboat Race.

D. Discussion of Proposed Rule

Great South Bay Racing Inc. is sponsoring the Great Race On The Sea Powerboat Race, an offshore powerboat race, located on the Atlantic Ocean off Long Beach, NY. The event will span two days with race trials and practice runs conducted on Saturday, August 23, 2014 from 8:30 a.m. until 3:30 p.m., and the actual races conducted on Sunday, August 24, 2014 from 8:30 a.m. until 6:30 p.m. The event will feature six classes of offshore powerboats including vessels from the Extreme Class which can reach speeds up to 150 miles per hour during the race. The sponsor expects a minimum of 5,000 spectators for this event with a portion of them expected to view the event from recreational vessels.

The COTP Sector Long Island Sound has determined the combination of increased numbers of recreational vessels in close proximity to this event and registered event participants operating powerboats at high speeds have the potential to result in serious injuries or fatalities. This special local regulation proposes temporary regulated areas to restrict vessel movement around the location of the powerboat race to reduce the risks associated with racing vessels operating within congested waterways. For these reasons the Coast Guard is proposing three temporary regulated areas on the Atlantic Ocean, from 8:30 a.m. to 3:30 p.m. on August 23, 2014 and from 8:30 a.m. to 6:30 p.m. on August 24, 2014:

(1) *Race Course Area*. This area is for the exclusive use of registered event participants, safety, support, and official vessels.

(2) *No Entry Area*. This area serves as a buffer zone that separates racing vessels from spectators.

(3) *Spectator Viewing Area*. This area is for the exclusive use of spectator vessels. The sponsor will mark this area.

The geographic locations of these regulated areas and specific requirements of this rule are contained in the regulatory text.

Because a number of spectator vessels are expected to congregate around the location of this event, these regulated

areas are needed to protect both spectators and participants from the safety hazards created by them, including powerboats traveling at high speeds and congested waterways. During the enforcement periods, persons and vessels would be prohibited from entering, transiting through, remaining, anchoring or mooring within the regulated areas unless stipulated otherwise or specifically authorized by the COTP or the designated representative. The Coast Guard may be assisted by other federal, state, and local agencies in the enforcement of these regulated areas.

The Coast Guard determined that these regulated areas would not have a significant impact on vessel traffic due to their temporary nature and the fact that vessels are allowed to transit the navigable waters outside of the regulated areas.

The Coast Guard has ordered special local regulations and safety zones for this event when it was held in different locations and has received no public comments or concerns regarding the impact to waterway traffic. Advanced public notifications would be made to the local maritime community through all appropriate means which may include, but is not limited to, Local Notice to Mariners and Broadcast Notice to Mariners.

E. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes or executive orders.

1. Regulatory Planning and Review

This proposed rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of Executive Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under those Orders.

The Coast Guard determined that this proposed rulemaking is not a significant regulatory action because the regulated areas would be of limited duration and vessels may transit the navigable waterways outside of the regulated areas. Additionally, persons or vessels requiring entry into the regulated areas may be authorized to do so by the COTP Sector Long Island Sound or designated representative.

Advanced public notifications would also be made to local mariners through appropriate means, which may include but is not limited to, Local Notice to Mariners and Broadcast Notice to Mariners.

2. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule will not have a significant economic impact on a substantial number of small entities.

This proposed rule would affect the following entities, some of which may be small entities: The owners or operators of vessels intending to enter, transit, anchor or moor within the regulated areas on August 23, 2014 from 8:30 a.m. to 3:30 p.m. and on August 24, 2014 from 8:30 a.m. until 6:30 p.m.

This proposed temporary special local regulation will not have a significant economic impact on a substantial number of small entities for the following reasons: The regulated areas are of short duration, vessels that can safely do so may navigate in all other portions of the waterways except for the areas designated as regulated areas, and vessels requiring entry into the regulated areas may be authorized to do so by the COTP Sector Long Island Sound or designated representative. Additionally, before the effective period, public notifications would be made to local mariners through appropriate means, which may include but is not limited to, Local Notice to Mariners and Broadcast Notice to Mariners.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

3. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental

jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

4. Collection of Information

This proposed rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520.).

5. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and determined that this rule does not have implications for federalism.

6. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

7. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. Taking of Private Property

This proposed rule would not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of

Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. Protection of Children From Environmental Health Risks

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This proposed rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

11. Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This proposed rule is not a “significant energy action” under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. Technical Standards

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA)(42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves the establishment of special local regulations. This rule may be categorically excluded from further review under paragraph 34(h) of Figure 2–1 of the Commandant Instruction. A preliminary environmental analysis checklist supporting this determination is available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant

environmental impact from this proposed rule.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recording requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

■ 1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233.

■ 2. Add § 100.35T01–0407 to read as follows:

§ 100.35T01–0407 Special Local Regulation; Great Race On The Sea, Powerboat Race, Atlantic Ocean, Long Beach, NY.

(a) *Regulated Areas.* All coordinates are North American Datum 1983 (NAD 83).

(1) “*Race Course Area*”: All navigable waters of the Atlantic Ocean off Long Beach, NY within the following boundaries: Beginning at point “A” at position 40°34′15.84” N, 073°36′03.82” W, then west to point “B” at position 40°34′06.68” N, 073°40′09.27” W, then north to point “C” at position 40°34′48.56” N, 073°40′08.70” W, then east to point “D” at position 40°34′53.33” N, 073°36′14.93” W, then south to the point of origin, point “A”.

(2) “*No Entry Area*”: A buffer zone comprising all navigable waters of the Atlantic Ocean surrounding the “*Race Course Area*” and extending from the south border 700 feet outwards, from the east and west borders 1000 feet outwards and from the north border extending to the shoreline.

(3) “*Spectator Viewing Area*”: All navigable waters of the Atlantic Ocean off Long Beach, NY within the following boundaries: Beginning at point “A” at position 40°34′00.59” N, 073°35′53.34” W, then west to point “B” at position 40°33′54.27” N, 073°38′33.75” W, then north to point “C” at position 40°34′03.29” N, 073°38′34.11” W, then east to point “D” at position 40°34′09.15” N, 073°35′56.24” W, then south to the point of origin, point “A”.

(b) *Special Local Regulations.*

(1) In accordance with the general regulations found in section 100.35 of this part, entering into, transiting through, anchoring or remaining within the regulated areas is prohibited unless authorized by the Captain of the Port (COTP) Sector Long Island Sound, or designated representative.

(2) The following persons and vessels are authorized by the COTP Sector Long Island Sound to enter areas of this special local regulation:

(i) “*Race Course Area*”: Registered event participants, safety, support, and official vessels.

(ii) “*No Entry Area*”:

(A) Registered regatta participants, safety, support, and official vessels may transit to or from the “*Race Course Area*” at a speed of 25 knots or less when racing is halted.

(B) Swimmers may utilize all shoreline waters up to 100 feet from shore (i.e. end of the jetties).

(iii) “*Spectator Viewing Area*”: Spectator vessels engaged in viewing the powerboat race.

(3) All persons and vessels shall comply with the instructions of the COTP Sector Long Island Sound or designated representative. These designated representatives are comprised of commissioned, warrant, and petty officers of the Coast Guard. Upon being hailed by a U.S. Coast Guard vessel by siren, radio, flashing lights, or other means the operator of a vessel shall proceed as directed.

(4) Persons and vessels desiring to enter, transit through, anchor in, or remain within the regulated areas must contact the COTP Sector Long Island Sound by telephone at (203) 468–4401, or designated representative via VHF radio on channel 16, to request authorization. If authorization to enter, transit through, anchor in, or remain within the regulated areas is granted by the COTP Sector Long Island Sound or designated representative, all persons and vessels receiving such authorization must comply with the instructions of the COTP Sector Long Island Sound or designated representative.

(5) The Coast Guard will provide notice of the regulated areas prior to the event through appropriate means, which may include but is not limited to, the Local Notice to Mariners and Broadcast Notice to Mariners.

(c) *Definitions.* The following definitions apply to this section:

(1) *Designated Representative.* A “designated representative” is any commissioned, warrant, or petty officer of the U.S. Coast Guard who has been designated by the Captain of the Port, Sector Long Island Sound to act on his or her behalf. The designated representative may be on an official patrol vessel or may be on shore and will communicate with vessels via VHF–FM radio or loudhailer. In addition, members of the Coast Guard Auxiliary may be present to inform vessel operators of this regulation.

(2) *Official Patrol Vessels.* Official patrol vessels may consist of any Coast Guard, Coast Guard Auxiliary, state, or local law enforcement vessels assigned or approved by the COTP Sector Long Island Sound.

(3) *Spectators.* All persons and vessels not registered with the event sponsor as participants or official patrol vessels.

(d) *Enforcement Period:* This section will be enforced from 8:30 a.m. until 3:30 p.m. on August 23, 2014 and from 8:30 a.m. until 6:30 p.m. on August 24, 2014.

Dated: June 30, 2014.

H.L. Morrison,

Commander, U.S. Coast Guard, Acting Captain of the Port, Sector Long Island Sound.

BILLING CODE 9110–04–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

37 CFR Part 1

[Docket No.: PTO–P–2014–0012]

RIN 0651–AC95

Changes To Facilitate Applicant’s Authorization of Access to Unpublished U.S. Patent Applications by Foreign Intellectual Property Offices

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: The electronic sharing of information and documents between intellectual property (IP) offices is critical for increasing the efficiency and quality of patent examination worldwide. Current examples of this sharing include the priority document exchange (PDX) program and the program by which U.S. search results are delivered to the European Patent Office (EPO). In support of electronic file sharing, the United States Patent and Trademark Office (Office) is proposing to amend its rules of practice to include a specific provision by which an applicant can authorize the Office to give a foreign IP office access to all or part of the file contents of an unpublished U.S. patent application in order to satisfy a requirement for information imposed on a counterpart application filed with the foreign intellectual property office. Currently, for unpublished U.S. patent applications, applicants follow one regulatory provision to provide the Office with authorization for a foreign IP office to access an application-as-filed via a PDX program and follow another

regulatory provision to provide the Office with authorization to share the file contents with a foreign IP office. The proposed changes to the rules will consolidate the specific provisions of the regulations by which applicants give the Office authority to provide a foreign IP office with access to an application in order to satisfy a requirement for information of the foreign IP office. Additionally, along with changes to the application data sheet (ADS) form, the proposed rule changes will simplify the process for how applicants provide the Office with the required authorization, thereby reducing the resources applicants must expend to comply with these foreign IP office requirements, and enhance the quality of patent examination.

DATES: Written comments must be received on or before September 9, 2014.

ADDRESSES: Comments should be sent by electronic mail message over the Internet addressed to: *AC95.comments@uspto.gov*. Comments also may be submitted by postal mail addressed to: Mail Stop Comments—Patents, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313–1450, marked to the attention of either Susy Tsang-Foster, Senior Legal Advisor, or Joseph F. Weiss, Jr., Senior Legal Advisor, Office of Patent Legal Administration, Office of the Deputy Commissioner for Patent Examination Policy.

Comments further may be sent by electronic mail message over the Internet via the Federal eRulemaking Portal. See the Federal eRulemaking Portal Web site (*http://www.regulations.gov*) for additional instructions on providing comments via the Federal eRulemaking Portal.

Although comments may be submitted by postal mail, the Office prefers to receive comments by electronic mail message over the Internet because sharing comments with the public is more easily accomplished. Electronic comments are preferred to be submitted in plain text, but also may be submitted in ADOBE® portable document format or MICROSOFT WORD® format. Comments not submitted electronically should be submitted on paper in a format that facilitates convenient digital scanning into ADOBE® portable document format.

The comments will be available for public inspection at the Office of the Commissioner for Patents, currently located in Madison East, Tenth Floor, 600 Dulany Street, Alexandria, Virginia. Comments also will be available for

viewing via the Office's Internet Web site (*http://www.uspto.gov*). Because comments will be made available for public inspection, information that the submitter does not desire to make public, such as an address or phone number, should not be included in the comments.

FOR FURTHER INFORMATION CONTACT:

Susy Tsang-Foster, Senior Legal Advisor ((571) 272–7711), or Joseph F. Weiss, Jr., Senior Legal Advisor ((571) 272–2259), Office of Patent Legal Administration, Office of the Deputy Commissioner for Patent Examination Policy.

SUPPLEMENTARY INFORMATION: The electronic sharing of information and documents between IP offices is critical for increasing the efficiency and quality of patent examination worldwide. The electronic sharing of documents between IP offices also benefits applicants by reducing the cost of ordering documents from one IP office and then filing them in another IP office where a counterpart application has been filed.

Due to the confidential nature of unpublished U.S. patent applications, set forth in 35 U.S.C. 122, an applicant must provide the Office with written authority in accordance with 37 CFR 1.14 to grant a foreign IP office access to an unpublished U.S. patent application. With this grant of authority, the Office may electronically provide the U.S. patent application-as-filed or the requested file contents, such as information and documents, from the U.S. patent application to the foreign IP office on behalf of the applicant.

Currently, applicants comply with 37 CFR 1.14(h) when authorizing the Office to give a foreign IP office participating in a bilateral or multilateral priority document exchange agreement access to an unpublished U.S. priority application-as-filed. 37 CFR 1.14(h), however, does not provide a specific provision by which an applicant can authorize the Office to provide a foreign IP office access to an unpublished U.S. patent application's file contents including documents and other information in order to satisfy a requirement for information imposed on a counterpart application from a U.S. applicant by the foreign IP office. As a result, U.S. applicants, unprompted by the rules, must provide written authority for access by a foreign IP office to an unpublished application's contents in accordance with 37 CFR 1.14(c).

The Office is proposing to amend 37 CFR 1.14(h) to include a specific provision by which an applicant can authorize the Office to give a foreign IP

office access to all or part of the file contents (as opposed to a copy of the application-as-filed) of an unpublished patent application, including search results, to satisfy a foreign IP office requirement for information on a counterpart application filed by an U.S. applicant. The proposed changes to 37 CFR 1.14(h) would consolidate the provisions by which applicants authorize the Office to give access to an unpublished application-as-filed or its file contents to a foreign IP office, while also clarifying for applicants the provision of 37 CFR 1.14 under which such access authorization can be provided. The proposed rule change will further serve as a reminder of the opportunity for applicants to grant the Office with the authority to provide a foreign IP office with access to file contents of an unpublished U.S. patent application.

Any information concerning an unpublished application or documents from an unpublished application will only be shared in accordance with the authority provided by applicant and in accordance with the terms of any agreement between the Office and respective foreign IP offices. The Office is not proposing any fee for this service. In addition, sharing of information and documents would be limited to those foreign IP offices where applicant has filed a counterpart application and provided written authority to give a foreign IP office access to all or part of the file contents of an unpublished U.S. application.

The proposed changes to 37 CFR 1.14(h) emphasize the Office's continued support of work sharing efforts between IP offices to increase the quality of issued patents, as well as its commitment to assist in reducing the expenditure of resources of its applicants when complying with the requirements of a foreign IP office for a counterpart application.

Revision to Application Data Sheet Form: In addition to the proposed rule changes, the Office is planning to revise the application data sheet (ADS) form, PTO/AIA/14 (ADS form). The revised ADS form would include separate access authorizations for the PDX program and certain work sharing initiatives for which the Office has an agreement with one or more foreign IP offices.

The submission of a properly signed revised ADS form with the appropriate authorization language would be a specific act authorizing access. After a revised ADS form including the authorization language for access by foreign IP office(s) and signed in accordance with 37 CFR 1.14(c) and

1.33(b) has been submitted and placed in the application file, the Office would give the foreign IP office(s) access to the contents in accordance with the specific authorization language upon request of the foreign IP office.

In contrast to the current ADS form, the revised ADS form would include an “opt-out” check box for each access authorization and not an “opt-in” check box. Therefore, when an “opt-out” check box for a specific authorization to access is selected, the Office would not provide access to the contents of the application associated with that check box. The revised ADS form will make it easier for applicants to give the statutorily required authorization for access to specific file contents, as well as afford an applicant the opportunity to inform the Office that the required authority to allow a foreign IP office specific access to an application has not been given. Appropriate authorization language for access in any ADS generated by applicant must mirror the authorization language provided in the Office’s revised ADS form. Where an applicant-generated ADS does not include the required authorization language for access by a foreign IP office, the ADS will be interpreted as not providing the authorization necessary to give a foreign IP office access.

The changes to the Office’s ADS form should reduce those instances where an applicant inadvertently fails to provide authorization necessary to participate in PDX (by not selecting the opt-in check box for priority document exchange authorization on the current ADS form) and, as a result, must expend resources to obtain and file a copy of a U.S. priority document with a foreign IP office. Similarly, this approach will help eliminate those instances where an applicant inadvertently fails to give the Office authority (by filing form PTO/SB/69) to provide the EPO with the search results from an unpublished U.S. priority application and, as a consequence, must expend resources to file the results with the EPO.

The Office will not deliver an unpublished priority document, file contents of an unpublished application, including information about an unpublished application, to a foreign IP office, even where a counterpart application has been filed, if applicant does not provide proper written authority for access. As discussed above, the revised ADS form would need to be executed in accordance with 37 CFR 1.33(b), and if there is written authority for any access by a foreign IP office, the revised ADS form also must be executed in accordance with 37 CFR

1.14(c). Applicants should be aware of the differences in signature requirements under 37 CFR 1.33(b) and under 37 CFR 1.14(c). For example, under 37 CFR 1.33(b) in applications filed on or after September 16, 2012, the following individuals can sign:

- A patent practitioner of record;
 - A patent practitioner not of record who acts in a representative capacity under the provisions of 37 CFR 1.34; or
 - The applicant under 37 CFR 1.42.
- Unless otherwise specified, all papers submitted on behalf of a juristic entity must be signed by a patent practitioner.

By contrast, under 37 CFR 1.14(c) in applications filed on or after September 16, 2012, the following individuals can sign:

- The applicant;
- A patent practitioner of record;
- The assignee or an assignee of an undivided part interest;
- The inventor or a joint inventor; or
- A registered attorney or agent

named in the papers accompanying the application papers filed under 37 CFR 1.53 or the national stage under 37 CFR 1.495, if a power of attorney has not been appointed under 37 CFR 1.32.

Where forms PTO/SB/39 for PDX authorization and PTO/SB/69 for search results authorization are used instead of the revised ADS form, these forms must still be executed in accordance with 37 CFR 1.14(c) even though written authority is provided for under proposed 37 CFR 1.14(h). If the revised ADS form is not signed in accordance with the relevant rules, then applicant has not provided written authority for access by a foreign IP office to an application.

The transaction of sharing documents and information from a U.S. application with a foreign IP office has several built in safeguards to ensure that only authorized sharing occurs. For example, in order for a foreign IP office to receive information about a U.S. application, the Office requires that the foreign IP office expressly identify the U.S. application serial number, along with other elements of bibliographic data for each U.S. application in its request, to ensure that only the correct U.S. application’s information will be given to the foreign IP office. Once the application is properly identified, the Office will then determine whether the requisite authorization for access exists in the U.S. application. The Office will only share information or other file content from a U.S. application with a foreign IP office when both the correct application is identified and the existence of proper authorization is confirmed. If an unpublished application, which has not been foreign

filed, includes an unintended access authorization pursuant to proposed 37 CFR 1.14(h), a foreign IP office would not obtain access because it would not have the information necessary to request access to that specific U.S. application. Further, the U.S. application’s filing receipt will indicate whether applicant has provided written authority for access pursuant to proposed 37 CFR 1.14(h). Applicants should inspect the application filing receipt and request a corrected filing receipt if authorization for access under proposed 37 CFR 1.14(h) was incorrectly captured from the revised ADS form or applicant-generated ADS. If authorization for access was inadvertently given, a request for rescission of the authorization can be made, and the Office should be informed of such rescission as early as possible so the Office has time to recognize the request for rescission and act upon it.

To avoid inconsistent means of authorization for access and to avoid duplicative processing, the Office also is considering removal of the opt-in check box and associated authorization language for the PDX program from the inventor’s oath or declaration form (PTO/SB/01 for applications filed before September 16, 2012 and PTO/AIA/08 for applications filed on or after September 16, 2012). Form PTO/SB/39 for the priority document exchange authorization and Form PTO/SB/69 for the search results authorization will remain available for applicants that do not use an ADS form or have selected the check boxes for opting out of specific authorizations for access by a foreign IP office on the revised ADS form, but later decide to give a foreign IP office access to the application.

Discussion of Specific Rules: The following is a discussion of the amendments to title 37 of the Code of Federal Regulations, part 1, which are being proposed in this document.

Section 1.14: Section 1.14(h)(1) is proposed to retain the first sentence of current § 1.14(h)(1) and include the provisions from current § 1.14(h)(3). Proposed § 1.14(h)(1) also would be amended to include that the date of filing of the written authority for priority document exchange may be provided to the respective participating foreign IP office, which codifies the practice set forth in the Official Gazette of the United States Patent and Trademark Office (1328 OG 90 (March 11, 2008)). In proposed § 1.14(h)(1), the text added from current § 1.14(h)(3) has been amended to delete the language “indicated in the written authority.” This deleted language is not necessary

as written authority for access under current § 1.14(h) and proposed § 1.14(h) will result in access being granted to all PDX and WIPO Digital Access Service (DAS) participating foreign IP offices in which a subsequently filed application claims benefit of the earlier filed U.S. application. Within the WIPO DAS system, however, there is an option where an applicant may decide which WIPO DAS foreign IP office(s) are granted or not granted access.

Proposed § 1.14(h)(1)(i) and (ii) also are amended to include the term “bibliographic data” to reflect that “bibliographic data” is used to ensure the correct application-as-filed is being provided to the participating foreign IP office requesting access in any access to the application-as-filed transaction. The term bibliographic data as used in proposed § 1.14(h)(1) covers certain bibliographic data set forth in WIPO standard ST.9 for bibliographic data. The bibliographic data used to confirm that the correct application-as-filed is being provided may include the patent document identification, filing data, priority data, publication data, data concerning technical information such as patent classification (international or domestic), and title of the invention.

Proposed § 1.14(h)(2) would permit an applicant to authorize the Office to grant a foreign IP office access to the file contents of an application where a counterpart application has been filed with a foreign IP office and the counterpart application is subject to a requirement for information from the application filed with the Office. The Office would only provide access to the relevant portion or portions of an unpublished U.S. application’s file contents necessary to satisfy any requirement for information by the foreign IP office, triggered by the U.S. applicant filing a counterpart application with the foreign IP office. The Office and the foreign IP office would need to have a bilateral or multilateral agreement that provides for the secure transmission and receipt of any shared information. Proposed § 1.14(h)(2)(i) includes the term “bibliographic data” to reflect that “bibliographic data” is used to ensure the information is from the correct application for which access has been requested by the foreign IP office in any access to the application. The term bibliographic data as used in § 1.14(h)(2) includes the same types of bibliographic data set discussed above with respect to § 1.14(h)(1).

Current § 1.14(h)(2) has been moved to proposed § 1.14(h)(3).

Section 1.14(h)(3) as proposed indicates that written authority

provided under proposed §§ 1.14(h)(1) and (h)(2) should be submitted before the filing of any subsequent foreign application in which priority is claimed to the application. Section 1.14(h)(3) as proposed also indicates that the written authority under §§ 1.14(h)(1) and (2) must include the title of the invention (§ 1.72(a)), comply with the requirements of § 1.14(c), and must be submitted on an application data sheet (§ 1.76) or on a separate document (§ 1.4(c)).

Section 1.19: Section 1.19(b)(1)(iv) is proposed to be amended to indicate there is no fee for providing a foreign IP office with a copy of either an application-as-filed or patent related file wrapper and contents pursuant to a bilateral or multilateral agreement (see § 1.14(h)).

Rulemaking Considerations

A. Administrative Procedure Act: This rulemaking amends the rules of practice to include a specific provision by which an applicant can authorize the Office to give a foreign IP office access to all or part of the file contents of an application, and thus pertains solely to the process for an applicant to provide a limited waiver of confidentiality under 35 U.S.C. 122(a) to allow a counterpart IP office access to all or part of the file contents of an application. Therefore, the changes proposed in this rulemaking involve rules of agency practice and procedure and/or interpretive rules. *See Bachow Commc’ns Inc. v. F.C.C.*, 237 F.3d 683, 690 (D.C. Cir. 2001) (rules governing an application process are procedural under the Administrative Procedure Act); *Inova Alexandria Hosp. v. Shalala*, 244 F.3d 342, 350 (4th Cir. 2001) (rules for handling appeals were procedural where they did not change the substantive standard for reviewing claims).

Accordingly, prior notice and opportunity for public comment are not required pursuant to 5 U.S.C. 553(b) or (c) (or any other law). *See Cooper Techs. Co. v. Dudas*, 536 F.3d 1330, 1336–37 (Fed. Cir. 2008) (stating that 5 U.S.C. 553, and thus 35 U.S.C. 2(b)(2)(B), does not require notice and comment rulemaking for “interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice”) (quoting 5 U.S.C. 553(b)(A)). The Office, however, is publishing these proposed changes for comment as it seeks the benefit of the public’s views on the Office’s proposed changes to provide the Office with authority to give a foreign IP office access to all or part of the file contents of an application.

B. Regulatory Flexibility Act: For the reasons set forth herein, the Deputy General Counsel for General Law of the United States Patent and Trademark Office has certified to the Chief Counsel for Advocacy of the Small Business Administration that changes proposed in this document will not have a significant economic impact on a substantial number of small entities. *See* 5 U.S.C. 605(b).

This rulemaking amends the rules of practice to include a specific provision by which an applicant can authorize the Office to give a foreign IP office access to all or part of the file contents of an application. This rulemaking consolidates and clarifies in one place—37 CFR 1.14(h)—existing procedures in both 37 CFR 1.14(c) and (h) relevant to authorizing the Office to provide a foreign IP office access to all or part of the file contents of an application or to an application-as-filed. The changes in this rulemaking do not require any applicant to provide the Office with this authority. There is no fee for this service. Therefore, the changes proposed in this document will not have a significant economic impact on a substantial number of small entities.

C. Executive Order 12866 (Regulatory Planning and Review): This rulemaking has been determined to be not significant for purposes of Executive Order 12866 (Sept. 30, 1993).

D. Executive Order 13563 (Improving Regulation and Regulatory Review): The Office has complied with Executive Order 13563. Specifically, the Office has, to the extent feasible and applicable: (1) Made a reasoned determination that the benefits justify the costs of the rule; (2) tailored the rule to impose the least burden on society consistent with obtaining the regulatory objectives; (3) selected a regulatory approach that maximizes net benefits; (4) specified performance objectives; (5) identified and assessed available alternatives; (6) involved the public in an open exchange of information and perspectives among experts in relevant disciplines, affected stakeholders in the private sector, and the public as a whole, and provided on-line access to the rulemaking docket; (7) attempted to promote coordination, simplification, and harmonization across government agencies and identified goals designed to promote innovation; (8) considered approaches that reduce burdens and maintain flexibility and freedom of choice for the public; and (9) ensured the objectivity of scientific and technological information and processes.

E. Executive Order 13132 (Federalism): This rulemaking does not

contain policies with federalism implications sufficient to warrant preparation of a Federalism Assessment under Executive Order 13132 (Aug. 4, 1999).

F. Executive Order 13175 (Tribal Consultation): This rulemaking will not: (1) Have substantial direct effects on one or more Indian tribes; (2) impose substantial direct compliance costs on Indian tribal governments; or (3) preempt tribal law. Therefore, a tribal summary impact statement is not required under Executive Order 13175 (Nov. 6, 2000).

G. Executive Order 13211 (Energy Effects): This rulemaking is not a significant energy action under Executive Order 13211 because this rulemaking is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required under Executive Order 13211 (May 18, 2001).

H. Executive Order 12988 (Civil Justice Reform): This rulemaking meets applicable standards to minimize litigation, eliminate ambiguity, and reduce burden as set forth in sections 3(a) and 3(b)(2) of Executive Order 12988 (Feb. 5, 1996).

I. Executive Order 13045 (Protection of Children): This rulemaking does not concern an environmental risk to health or safety that may disproportionately affect children under Executive Order 13045 (Apr. 21, 1997).

J. Executive Order 12630 (Taking of Private Property): This rulemaking will not affect a taking of private property or otherwise have taking implications under Executive Order 12630 (Mar. 15, 1988).

K. Congressional Review Act: Under the Congressional Review Act provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 *et seq.*), prior to issuing any final rule, the United States Patent and Trademark Office will submit a report containing the final rule and other required information to the United States Senate, the United States House of Representatives, and the Comptroller General of the Government Accountability Office. The changes in this proposed rule are not expected to result in an annual effect on the economy of 100 million dollars or more, a major increase in costs or prices, or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets. Therefore, this proposed rule is not

expected to result in a “major rule” as defined in 5 U.S.C. 804(2).

L. Unfunded Mandates Reform Act of 1995: The changes set forth in this proposed rule do not involve a Federal intergovernmental mandate that will result in the expenditure by State, local, and tribal governments, in the aggregate, of 100 million dollars (as adjusted) or more in any one year, or a Federal private sector mandate that will result in the expenditure by the private sector of 100 million dollars (as adjusted) or more in any one year, and will not significantly or uniquely affect small governments. Therefore, no actions are necessary under the provisions of the Unfunded Mandates Reform Act of 1995. *See* 2 U.S.C. 1501 *et seq.*

M. National Environmental Policy Act: This rulemaking will not have any effect on the quality of the environment and is thus categorically excluded from review under the National Environmental Policy Act of 1969. *See* 42 U.S.C. 4321 *et seq.*

N. National Technology Transfer and Advancement Act: The requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) are not applicable because this rulemaking does not contain provisions which involve the use of technical standards.

O. Paperwork Reduction Act: The Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) requires that the Office consider the impact of paperwork and other information collection burdens imposed on the public. This rulemaking involves information collection requirements which are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3549). The collection of information involved in this rulemaking has been reviewed and previously approved by OMB under OMB Control Numbers 0651–0031 and 0651–0032. The Office is not resubmitting an information collection package to OMB for its review and approval because the changes in this rulemaking do not change patent fees or change the information collection requirements (the estimated number of respondents, time per response, total annual respondent burden hours, or total annual respondent cost burden) associated with the information collections approved under OMB Control Numbers 0651–0031 and 0651–0032.

Notwithstanding any other provision of law, no person is required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork

Reduction Act, unless that collection of information displays a currently valid OMB control number.

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Courts, Freedom of information, Inventions and patents, Reporting and recordkeeping requirements, Small businesses.

For the reasons stated in the preamble, 37 CFR part 1 is proposed to be amended as follows:

PART 1—RULES OF PRACTICE IN PATENT CASES

■ 1. The authority citation for 37 CFR part 1 continues to read as follows:

Authority: 35 U.S.C. 2(b)(2).

■ 2. Section 1.14 is amended by revising paragraph (h) to read as follows:

§ 1.14 Patent applications preserved in confidence.

* * * * *

(h) *Access by a Foreign Intellectual Property Office.* (1) Access to an application-as-filed may be provided to any foreign intellectual property office participating with the Office in a bilateral or multilateral priority document exchange agreement (participating foreign intellectual property office), if the application contains written authority granting such access. Written authority provided under this paragraph (h)(1) will be treated as authorizing the Office to provide to all participating foreign intellectual property offices in accordance with their respective agreements with the Office:

(i) A copy of the application-as-filed and its related bibliographic data;

(ii) A copy of the application-as-filed of any application the filing date of which is claimed by the application in which written authority under this paragraph (h)(1) is filed and its related bibliographic data; and

(iii) The date of filing of the written authorization under this paragraph (h)(1).

(2) Access to the file contents of an application may be provided to a foreign intellectual property office if a counterpart application filed with the foreign intellectual property office is subject to a requirement for information from the application filed with the Office, the application contains written authority granting the foreign intellectual property office access to the required information, and the Office and the foreign intellectual property office have a bilateral or multilateral agreement to provide the required information. Written authority provided

under this paragraph (h)(2) will be treated as authorizing the Office to provide to all foreign intellectual property offices indicated in the written authority in accordance with their respective agreements with the Office:

(i) Bibliographic data regarding the application; and

(ii) Any content of the application file necessary to satisfy the foreign intellectual property office requirement for information indicated in the respective agreement.

(3) Written authority provided under paragraphs (h)(1) and (h)(2) of this section must include the title of the invention (§ 1.72(a)), comply with the requirements of paragraph (c) of this section, and be submitted on an application data sheet (§ 1.76) or on a separate document (§ 1.4(c)). The written authority provided under these paragraphs should be submitted before filing any subsequent foreign application in which priority is claimed to the application.

■ 3. Section 1.19 is amended by revising paragraph (b)(1)(iv) to read as follows:

§ 1.19 Document supply fees.

* * * * *

(b) * * *

(1) * * *

(iv) If provided to a foreign intellectual property office pursuant to a bilateral or multilateral agreement (see § 1.14(h)): \$0.00.

* * * * *

Dated: July 2, 2014.

Michelle K. Lee,

Deputy Under Secretary of Commerce for Intellectual Property and Deputy Director of the United States Patent and Trademark Office.

RIN 2070-AJ53

Labeling of Pesticide Products and Devices for Export; Clarification of Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to amend the regulations that pertain to the labeling of pesticide products and devices that are intended solely for export. These amendments clarify that

pesticide products and devices that are intended solely for export must meet the Agency's labeling requirements by attaching a label to the immediate product container or by providing collateral labeling that is either attached to the immediate product being exported or that accompanies the shipping container of the product being exported at all times when it is shipped or held for shipment in the United States. Collateral labeling will ensure the availability of the required labeling information, while allowing pesticide products and devices that are intended solely for export to be labeled for use in and consistent with the applicable requirements of the importing country.

DATES: Comments must be received on or before August 11, 2014.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2009-0607, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.

- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>. Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:

Kathryn Boyle, Field and External Affairs Division (7506P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (703) 305-6304; email address: boyle.kathryn@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action affect me?

You may be potentially affected by this action if you export a pesticide product, a pesticide device, or an active ingredient used in producing a pesticide. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether

this document applies to them. Potentially affected entities may include, but are not limited to: Pesticide and other agricultural chemical manufacturing (NAICS code 325320), e.g., Pesticides manufacturing, Insecticides manufacturing, Herbicides manufacturing, Fungicides manufacturing, etc.

B. What is the Agency's authority for taking this action?

This action is issued under the authority of section 25(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136w(a), to carry out the provisions of FIFRA section 17(a), 7 U.S.C. 136o(a).

C. What action is the Agency taking?

EPA is proposing to amend the regulations that pertain to the labeling of pesticide products and devices that are intended solely for export. These amendments clarify that pesticide products and devices that are intended solely for export must meet the Agency's labeling requirements by attaching a label to the immediate product container or by providing collateral labeling that is either attached to the immediate product being exported or that accompanies the shipping container of the product being exported at all times when it is shipped or held for shipment in the United States. Collateral labeling will ensure the availability of the required labeling information, while allowing pesticide products and devices that are intended solely for export to be labeled for use in and consistent with the applicable requirements of the importing country.

D. What are the impacts of this action?

There are no costs associated with this action, and the benefits provided are related to avoiding potential costs. Without these labeling provisions, registrants would be required to place export-related labeling on the immediate package of each individual pesticide product in a shipping container that is intended solely for export. According to stakeholders, the inability to use the labeling method allowed under the previous regulations could significantly increase their costs and create trade barriers.

II. Background

A. The April 30, 2014 Direct Final Rule

Industry stakeholders subsequently brought to the Agency's attention their concern that removing the term "supplemental labeling" resulted in the removal of a provision stating that such supplemental labeling can be attached to a shipping container holding export

pesticides or devices rather than to each individual product container in a shipment. They stated that the inability of registrants to use “supplemental labeling” in that manner could create trade barriers and increase costs. The purpose of the direct final rule EPA published in the **Federal Register** of April 30, 2014 (79 FR 24347) (FRL–9909–82) was to address those concerns as expeditiously as possible.

As indicated in the direct final rule, EPA now believes that the term “supplemental labeling” is not the appropriate term to describe the material or documentation used to meet the requirements of the export labeling rules. To more accurately describe the materials other than “labels” that are acceptable for meeting these requirements, EPA believes that a better term is “collateral labeling.” EPA has already described collateral labeling in the Label Review Manual (LRM), p. 3–2 (see <http://www.epa.gov/oppfead1/labeling/lrm/chap-03.pdf>), as follows:

Bulletins, leaflets, circulars, brochures, data sheets, flyers or other written, printed or graphic matter which are referred to on the label or which are to accompany the product are known in Agency practice as “collateral labeling.” Such labeling is subject to applicable requirements of FIFRA and the Agency’s regulations.

Accordingly, the direct final rule used the term “collateral labeling” in restoring the ability of exporters to comply with export labeling requirements through materials that are not attached to each individual export product’s immediate container. The direct final rule provided amendments for revising existing 40 CFR 168.66 to remove the reference to 40 CFR 156.10(a)(4), and to restore the inadvertently eliminated provisions that allowed exporters to use such collateral labeling attached to, or accompanying, the product shipping container of the export pesticide at all times when shipped or held for shipment in the United States. The direct final rule also restructures 40 CFR part 168, subpart D, by moving the text in § 168.68 and some of the text in § 168.66 to new § 168.65.

B. Summary of the April 6, 2011 Proposed Rule

In the **Federal Register** of April 6, 2011 (76 FR 18995) (FRL–8862–2), EPA issued a proposed rule to clarify, restructure, and add specificity to labeling regulations for the export of unregistered pesticide products and devices. Additionally, that proposed rule explicitly requires labeling to accompany the unregistered export pesticide product or device at all times, even when such products are being

shipped between registered establishments operated by the same producer.

C. Public Comments on the April 6, 2011 Proposed Rule

Six sets of comments were submitted. Two of the commenters pointed out several inconsistencies in the use of the terms “label,” “labeling,” and “supplemental labeling” in the proposed rule. One of those commenters also urged “that all labeling requirements should be in compliance with existing regulations under 40 CFR 156.” The comments are available in the docket under docket ID number EPA–HQ–OPP–2009–0607.

EPA analyzed the comments and prepared a response to comments document, which is available in the docket under document ID number EPA–HQ–OPP–2009–0607–0016. As part of analyzing the comment on inconsistencies in the use of the terms “label,” “labeling,” and “supplemental labeling,” EPA referred to FIFRA’s definitions of “label” and “labeling.” Section 2(p)(1) of FIFRA defines label as “the written, printed, or graphic matter on, or attached to, the pesticide or device or any of its containers or wrappers.” Under FIFRA section 2(p)(2), labeling is a more inclusive term which includes labels as well as “all other written, printed, or graphic matter” that accompanies the product at any time, or to which reference is made on a label or in literature accompanying the pesticide or device. Because the two terms are not interchangeable, EPA agreed that inconsistent use could create confusion. Thus, as EPA began to write the regulatory text for the final rule, the Agency carefully evaluated the regulatory text for possibly confusing uses of the terms “label” and “labeling.”

During that evaluation, and bearing in mind the comment that “all labeling requirements should be in compliance with existing regulations under 40 CFR 156,” EPA analyzed proposed § 168.66(b). Proposed § 168.66(b) specified that “the required label information may be fully met by” and then provided several examples of ways to provide the required label information. One of the examples referred to “supplemental labeling.” At that time, EPA determined to provide a reference to the existing label regulations in 40 CFR part 156, instead of providing examples of ways to meet the required label information. Specifically, EPA referred to 40 CFR 156.10(a)(4), believing that provision would provide appropriate and accurate information.

D. The January 18, 2013 Final Rule

The final rule entitled “Labeling of Pesticide Products and Devices for Export; Clarification of Requirements” published in the **Federal Register** of January 18, 2013 (78 FR 4073) (FRL–9360–8). This final rule was effective on March 19, 2013, with a compliance date of January 21, 2014.

III. Withdrawal of the April 30, 2014 Direct Final Rule

In the preamble to the direct final rule, EPA explained the Agency’s reasons for these amendments, and that we would withdraw that direct final rule if written adverse comment were received within 30 days of the publication of that direct final rule. Since EPA received written adverse comments, elsewhere in this issue of the **Federal Register**, EPA has withdrawn the direct final rule, and the direct final rule will not take effect.

In accordance with the procedures described in the April 30, 2014 direct final rule, EPA is publishing this proposed rule.

IV. Issues Raised by the Adverse Comments

EPA received two written adverse comments in response to the direct final rule. Both commenters indicated their disagreement with EPA’s approach on the use of collateral labeling. Their comments indicated their belief that individual pesticide products should be properly labeled, even if intended solely for export. One commenter indicated that this would only “benefit the large pesticide producers, allowing them to cut the cost of production by not properly labeling everything.” The other commenter indicated that labeling “is critical to safe and rational use of pesticides.”

EPA believes that both commenters misinterpreted the intent of the direct final rule and interpreted the direct final rule as removing or eliminating requirements. The amendments specified in the direct final rule do not remove or eliminate label requirements for individual pesticide products or devices that are intended solely for export. The amendments would have simply clarified that the label requirements for products intended for export can be met with labeling on the individual products with the addition of collateral labeling attached to either the product or the product shipment container.

Typically, products that are manufactured in the United States for export bear a label which meets the requirements of the importing country.

Since that label may not meet all the FIFRA labeling requirements contained in 40 CFR part 168, the regulations previously allowed for these products to meet those requirements by labeling attached to the shipping container. As an example, a shrink-wrapped pallet of cartons would have only one FIFRA export label attached to the shrink-wrap. A pallet of unwrapped cartons, on the other hand, would have FIFRA export labels attached to each carton. In both cases, the individual products in those cartons are individually labeled for use in the importing country and in compliance with the applicable labeling requirements of that importing country. EPA believes that collateral labeling is appropriate for shipping containers holding pesticide products and devices that are intended solely for export because it ensures the availability of the information provided by the FIFRA export label requirements while those products are in transit in the United States.

The amendments specified in the direct final rule were not to establish a new or substantively different requirement from that which existed until 2013, when a final rule inadvertently deleted the applicable provisions. After considering these adverse comments, EPA has determined no changes are needed, and is proposing the same regulatory text as that in the April 30, 2014 direct final rule.

V. FIFRA Review Requirements

In accordance with FIFRA section 25(a), EPA previously submitted the draft proposed rule to the Secretary of Agriculture (USDA), the FIFRA Scientific Advisory Panel (SAP), and the appropriate Congressional Committees. On February 10, 2014, the FIFRA SAP waived its review of this proposed rule because the changes “are administrative in nature and do not contain scientific issues that require the SAP’s consideration.” On March 12, 2014, USDA waived review of this proposed rule, because this action merely “corrects the regulatory text.”

VI. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This proposed rule is not a “significant regulatory action” under the terms of Executive Order 12866 (58 FR 51735, October 4, 1993) and was not, therefore, submitted to the Office of Management and Budget (OMB) for review under Executive Orders 12866

and 13563 (76 FR 3821, January 21, 2011).

B. Paperwork Reduction Act (PRA)

According to PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information that requires OMB approval under PRA, unless it has been approved by OMB and displays a currently valid OMB control number. The OMB control numbers for EPA regulations in title 40 of the CFR, after appearing in the **Federal Register**, are listed in 40 CFR part 9, and included on the related collection instrument or form, as applicable.

The information collection requirements associated with reporting under 40 CFR part 168 have already been approved by OMB pursuant to PRA under OMB control number 2070–0027 (EPA ICR No. 0161). This proposed rule is not expected to involve an increase in information collection activities. There are no additional burdens imposed by this proposed rule that requires additional review or approval by OMB.

C. Regulatory Flexibility Act (RFA)

I certify that this action, if finalized as proposed, will not have a significant economic impact on a substantial number of small entities under RFA, 5 U.S.C. 601 *et seq.* In making this determination, the impact of concern is any significant adverse economic impact on small entities, because the primary purpose of an initial regulatory flexibility analysis is to identify and address regulatory alternatives “which minimize any significant economic impact of the rule on small entities” 5 U.S.C. 603. Thus, an agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule has no net burden effect on the small entities subject to the rule. As indicated previously, EPA is restoring a provision that was inadvertently removed from the regulation. We have therefore concluded that this action will have no net regulatory burden for all directly regulated small entities.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action imposes no enforceable duty on any State, local, or Tribal governments, because no State, local, or Tribal government is known to produce, transport, formulate, package,

or export unregistered pesticide products or devices. As indicated previously, EPA is restoring a provision that was inadvertently removed from the regulation.

E. Executive Order 13132: Federalism

This action will not have substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999).

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This proposed rule does not have tribal implications because it is expected to only affect producers, transporters, formulators, packagers, and exporters of unregistered pesticide products and devices. Since no Indian Tribal government is known to produce, transport, formulate, package, or export unregistered pesticide products or devices, this action has no tribal implications. Accordingly, the requirements of Executive Order 13175 (65 FR 67249, November 9, 2000) does not apply to this proposed rule.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety

This action is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because this action does not address environmental health or safety risks disproportionately affecting children.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211 (66 FR 28355, May 22, 2001), because this action is not expected to affect energy supply, distribution, or use.

I. National Technology Transfer and Advancement Act (NTTAA)

Since this action does not involve any technical standards, NTTAA section 12(d), 15 U.S.C. 272 note, does not apply to this action.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

EPA has determined that this action will not have disproportionately high and adverse human health or

environmental effects on minority or low-income populations because it increases the level of environmental protection for all affected populations without having any disproportionately high and adverse human health or environmental effects on any population, including any minority or low-income population. As such, this action does not entail special considerations of environmental justice related issues as delineated by Executive Order 12898 (59 FR 7629, February 16, 1994).

List of Subjects in 40 CFR Part 168

Environmental protection, Administrative practice and procedure, Advertising, Exports, Labeling, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: July 3, 2014.

James Jones,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

Therefore, it is proposed that 40 CFR chapter I be amended as follows:

PART 168—[AMENDED]

■ 1. The authority citation for part 168 continues to read as follows:

Authority: 7 U.S.C. 136–136y.

■ 2. Revise the heading for subpart D to part 168 to read as follows:

Subpart D—Procedures for Exporting Pesticides

■ 3. Add § 168.65 to subpart D to read as follows:

§ 168.65 Applicability.

(a) This subpart describes the labeling requirements applicable to pesticide products and devices that are intended solely for export from the United States under the provisions of FIFRA section 17(a).

(b) This subpart applies to all export pesticide products and export pesticide devices that are exported for any purpose, including research.

(c) Export pesticide products and export pesticide devices are also subject to requirements for pesticide production reporting, recordkeeping and inspection, and purchaser acknowledgement provisions that can be found in the following parts:

(1) Pesticide production reporting requirements under FIFRA section 7 are located in part 167 of this chapter (as referenced in § 168.85(b)).

(2) Recordkeeping and inspection requirements under FIFRA section 8 are located in part 169 of this chapter (as referenced in § 168.85(a)).

(3) Purchaser acknowledgement statement provisions under FIFRA section 17(a) are located in § 168.75.

■ 4. Revise § 168.66 to read as follows:

§ 168.66 Labeling of pesticide products and devices for export.

Any label and labeling information requirements in §§ 168.69, 168.70, and 168.71 that are not met fully on the product label attached to the immediate product container may be met by collateral labeling that is either:

(a) Attached to the immediate product (container label); or

(b) Attached to or accompanies the shipping container of the export pesticide or export device at all times when it is shipped or held for shipment in the United States.

§ 168.68 [Removed and Reserved]

■ 5. Remove and reserve § 168.68.

■ 6. In § 168.69, revise paragraph (a) to read as follows:

§ 168.69 Registered export pesticide products.

(a) Each export pesticide product that is registered under FIFRA section 3 or FIFRA section 24(c) must bear labeling approved by EPA for its registration or collateral labeling in compliance with § 168.66.

* * * * *

■ 7. In § 168.70, revise the introductory text of paragraph (b) to read as follows:

§ 168.70 Unregistered export pesticide products.

* * * * *

(b) Each unregistered export pesticide product must bear labeling that complies with all requirements of this section or collateral labeling in compliance with § 168.66:

* * * * *

■ 8. In § 168.71, revise paragraph (a) to read as follows:

§ 168.71 Export pesticide devices.

(a) Each export pesticide device sold or distributed anywhere in the United States must bear labeling that complies with all requirements of this section or collateral labeling in compliance with § 168.66.

* * * * *

RIN 2070–ZA16

Amitraz, Carfentrazone-ethyl, Ethephon, Malathion, Mancozeb, et al.; Proposed Tolerance Actions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to revoke certain tolerances for the fungicides spiroxamine and triflumizole, the herbicides carfentrazone-ethyl and quizalofop ethyl; the insecticides amitraz, oxamyl, propetamphos, and spinosad; and the plant growth regulators ethephon and mepiquat. In addition, EPA is proposing to revoke the tolerance on rice straw for multiple active ingredients. Also, EPA is proposing to modify certain tolerances for the fungicides mancozeb, thiram, and triflumizole; and the insecticide malathion. In addition, EPA is proposing to establish new tolerances for the fungicide mancozeb. Also, in accordance with current Agency practice, EPA is proposing to make minor revisions to the tolerance expression for malathion, mepiquat, and thiram.

DATES: Comments must be received on or before September 9, 2014.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2014–0194, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.

- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>.

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: Joseph Nevola, Pesticide Re-Evaluation Division (7508P), Office of Pesticide

Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (703) 308-8037; email address: nevola.joseph@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

C. What can I do if I wish the agency to maintain a tolerance that the agency proposes to revoke?

This proposed rule provides a comment period of 60 days for any person to state an interest in retaining a tolerance proposed for revocation. If EPA receives a comment within the 60-day period to that effect, EPA will not proceed to revoke the tolerance immediately. However, EPA will take steps to ensure the submission of any needed supporting data and will issue an order in the **Federal Register** under the Federal Food, Drug, and Cosmetic Act (FFDCA) section 408(f), if needed. The order would specify data needed and the timeframes for its submission, and would require that within 90 days some person or persons notify EPA that they will submit the data. If the data are not submitted as required in the order, EPA will take appropriate action under FFDCA.

EPA issues a final rule after considering comments that are submitted in response to this proposed rule. In addition to submitting comments in response to this proposal, you may also submit an objection at the time of the final rule. If you fail to file an objection to the final rule within the time period specified, you will have waived the right to raise any issues resolved in the final rule. After the specified time, issues resolved in the final rule cannot be raised again in any subsequent proceedings.

II. Background

A. What action is the agency taking?

EPA is proposing to revoke, modify, and establish specific tolerances for residues of the fungicides mancozeb, spiroxamine, thiram, and triflumizole; the herbicides carfentrazone-ethyl and quizalofop ethyl; the insecticides amitraz, malathion, oxamyl, propetamphos, and spinosad; and the plant growth regulators ethephon and mepiquat in or on commodities listed in the regulatory text. In addition, EPA is proposing to revoke the tolerances on rice straw for multiple active

ingredients because it is no longer considered by the Agency to be a significant feed item.

Also, EPA is proposing to make minor revisions to the tolerance expressions for malathion, mepiquat, and thiram in accordance with current Agency practice to describe more clearly the measurement of residues for tolerances and coverage of metabolites and degradates of a pesticide by the tolerances. The revisions to the tolerance expressions do not substantively change the tolerance or, in any way, modify the permissible level of residues permitted by the tolerances.

EPA is proposing to revoke certain tolerances because they are no longer needed or are associated with food uses that are no longer registered under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

The proposed tolerance actions for mancozeb and malathion are consistent with the recommendations in their Reregistration Eligibility Decisions (REDs) of 2005 and 2009, respectively. As part of the tolerance reassessment process, EPA is required to determine whether each of the amended tolerances meets the safety standard of FFDCA. The safety finding determination of "reasonable certainty of no harm" is discussed in detail in each RED. REDs recommend the implementation of certain tolerance actions, including modifications to reflect current use patterns, meet safety findings, and change commodity names and groupings in accordance with new EPA policy. Printed copies of many REDs may be obtained from EPA's National Service Center for Environmental Publications (EPA/NSCEP), P.O. Box 42419, Cincinnati, OH 45242-2419; telephone number: 1-800-490-9198; fax number: 1-513-489-8695; Internet at <http://www.epa.gov/ncepihom> and from the National Technical Information Service (NTIS), 5285 Port Royal Rd., Springfield, VA 22161; telephone number: 1-800-553-6847 or (703) 605-6000; Internet at <http://www.ntis.gov>. Electronic copies are available on the Internet for the malathion and mancozeb REDs in dockets EPA-HQ-OPP-2004-0348 and EPA-HQ-OPP-2005-0176, respectively, at <http://www.regulations.gov> and at <http://www.epa.gov/pesticides/reregistration/status.htm>.

In REDs, Chapter IV on risk management, reregistration, and tolerance reassessment typically describes the regulatory position, cumulative safety determination, determination of safety for U.S. general population, and safety for infants and children. In particular, the human

health risk assessment document which supports the RED describes risk exposure estimates and whether the Agency has concerns. EPA also seeks to harmonize tolerances with international standards set by the Codex Alimentarius Commission, as described in Unit III.

Explanations for proposed modifications in tolerances can be found in the RED document and in more detail in the Residue Chemistry Chapter document which supports the RED. Copies of the Residue Chemistry Chapter documents are found in the Administrative Record and electronic copies for malathion and mancozeb can be found under their respective docket ID numbers, identified in Unit II.A. Electronic copies of other support documents (including explanations for proposed modifications in trifluridazole tolerances) are available through EPA's electronic docket and comment system, [regulations.gov](http://www.regulations.gov) at <http://www.regulations.gov>. You may search for this proposed rule under docket ID number EPA-HQ-OPP-2014-0194, then click on that docket ID number to view its contents.

EPA had determined at the time of the RED that the aggregate exposures and risks are not of concern for the above mentioned pesticide active ingredients based upon the data identified in the RED which lists the submitted studies that the Agency found acceptable.

EPA has found that the tolerances that are proposed in this document to be modified, are safe; i.e., that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residues, in accordance with FFDCA section 408(b)(2)(C). (Note that changes to tolerance nomenclature do not constitute modifications of tolerances). These findings are discussed in detail in each RED. The references are available for inspection as described in this document under **SUPPLEMENTARY INFORMATION.**

In addition, it is EPA's general practice to propose revocation of those tolerances for residues of pesticide active ingredients on crop uses for which there are no active registrations under FIFRA, unless any person in comments on the proposal indicates a need for the tolerance to cover residues in or on imported commodities or legally treated domestic commodities.

EPA is proposing to revoke specific tolerances for residues of mepiquat and trifluridazole because the Agency has concluded that there is no reasonable expectation of finite residues in or on the commodities associated with the tolerances, and therefore these tolerances are no longer needed.

The determinations that there are no reasonable expectations of finite residues for the tolerances listed in this document were made based on feeding studies submitted since the time that the tolerances were originally established. These feeding studies used exaggerated amounts of the compound and did not show measurable residues of the pesticide active ingredient tested. The Agency made the determination that there is no reasonable expectation of finite residues for the pesticides active ingredient/commodity combinations listed in this proposal in memoranda of July 30, 2001 for mepiquat and October 1, 2008 for trifluridazole. Copies of these memoranda can be found in the docket for this proposed rule. Because EPA determined that there is no reasonable expectation of finite residues, under 40 CFR 180.6 the tolerances are no longer needed under FFDCA and can be proposed for revocation.

1. *Multiple active ingredients.* EPA has determined that rice straw is no longer a significant feed item in the United States, and therefore the tolerance is no longer needed and should be revoked. (The document entitled "OPPTS Test Guideline 860.1000 Supplement: Guidance on Constructing Maximum Reasonably Balanced Diets (MRBD)" is available at <http://www.regulations.gov> under docket ID number EPA-HQ-OPP-2009-0155). Consequently, EPA is proposing to revoke the tolerances for rice, straw in 40 CFR 180.142(a) for 2,4-D; 180.169(a)(1) for carbaryl; 180.205(a) for paraquat; 180.274(a) for propanil; 180.288(a) for 2-(thiocyanomethylthio)benzothiazole; 180.293(a)(1) for endothall; 180.301(a) for carboxin; 180.355(a)(1) for bentazon; 180.361(a) for pendimethalin; 180.377(a)(2) for diflufenuron; 180.383(a) for sodium salt of acifluorfen; 180.399(a)(1) for iprodione; 180.401(a) for thiobencarb; 180.417(a)(1) for triclopyr; 180.418(a)(2) for zeta-cypermethrin; 180.425(a) for clomazone; 180.434(a) for propiconazole; 180.438(a)(1) for lambda-cyhalothrin; 180.438(a)(2) for gamma-cyhalothrin and its epimer; 180.439(a) for thifensulfuron methyl; 180.445(a) for bensulfuron methyl; 180.447(a)(2) for imazethapyr; 180.451(a) for tribenuron methyl; 180.463(a)(1) for quinclorac; 180.473(a) for glufosinate ammonium; 180.479(a)(2) for halosulfuron-methyl; 180.484(a) for flutolanil; 180.507(a)(1) for azoxystrobin; 180.517(a) for fipronil; 180.555(a) for trifloxystrobin; 180.570(a)(2) for isoxadifen-ethyl; 180.577(a) for bispyribac-sodium;

180.605(a) for penoxsulam; and 180.625(a) for orthosulfamuron.

2. *Amitraz.* There have been no active U.S. registrations for use of amitraz on cotton since May 3, 2006 and the manufacturer, Arysta Life Sciences, notified EPA in July 2011 that it no longer is interested in supporting the tolerance for amitraz use on cotton, undelinted seed for import purposes. The tolerance is no longer needed and therefore should be revoked. Consequently, EPA is proposing to revoke the tolerance for amitraz in 40 CFR 180.287(a) on cotton, undelinted seed.

3. *Carfentrazone-ethyl.* Because the first cotton processing study submitted by the registrant was conducted at 1.0x the seasonal application rate and resulted in residues less than the Limit of Quantitation (LOQ) of 0.05 ppm, EPA requested that a processing study be conducted at an application rate sufficient to generate residues in/on cottonseed and set tolerances for cotton hulls, meal, and oil using theoretical processing factors and the highest average cottonseed field trial residue. Based on an available second processing study conducted at 2.0x the seasonal application rate, which showed that carfentrazone-ethyl residues of concern in or on cottonseed were detected (Limit of Detection 0.015–0.020 ppm) but were less than the LOQ of 0.05 ppm, EPA determined that the tolerances for carfentrazone-ethyl residues of concern are no longer needed on cottonseed hull, meal, and oil and therefore should be revoked. Consequently, EPA is proposing to revoke the tolerances for carfentrazone-ethyl in 40 CFR 180.515(a) on cotton, hulls; cotton, meal; and cotton, refined oil.

Because uses supported by the carfentrazone-ethyl tolerance for caneberry subgroup 13A at 0.1 ppm are covered by the tolerance for berry group 13 at 0.10 ppm, there is no longer any need for the separate subgroup tolerance and therefore it should be revoked. In addition, because EPA no longer considers rice straw to be a significant feed item, the tolerance is no longer needed and should be revoked. Consequently, EPA is proposing to revoke the tolerances for carfentrazone-ethyl in 40 CFR 180.515(a) on caneberry subgroup 13A and rice, straw.

4. *Ethephon.* Because the last product label amendment has been completed which limits the use of ethephon to cucumbers grown for seed production only and restricts the harvesting of treated cucumbers for human or animal consumption, a food tolerance for ethephon is no longer needed and therefore should be revoked.

Consequently, EPA is proposing to revoke the tolerance for ethephon in 40 CFR 180.300(a) on cucumber.

5. *Malathion*. EPA is proposing to modify the plant tolerance commodity levels for certain existing malathion tolerances in 40 CFR 180.111(a)(1) based on available field trial data and product label changes. Currently, those tolerances are established for residues of malathion. However, as stated in the 2009 amended RED for malathion, based on available plant metabolism data, EPA determined that the residues of concern in plants consist of malathion and its metabolite, malaaxon, and therefore the tolerance expression for plant commodities should be revised. Because EPA is not proposing to modify all of the plant commodity tolerances in 40 CFR 180.111(a)(1) at this time, EPA is proposing that those specific tolerances which it is proposing to modify herein be redesignated from 40 CFR 180.111(a)(1) to 40 CFR 180.111(a)(2), where tolerances are currently established for malathion and its metabolite malaaxon. Also, in accordance with current Agency practice to describe more clearly the measurement and scope or coverage of the tolerances, EPA is proposing to revise the introductory text containing the tolerance expression in 40 CFR 180.111(a)(2) to read as set out in the proposed regulatory text at the end of this document.

Based on product label changes to their use patterns and available field trial data that showed malathion residues of concern in or on apricot as high as <0.65 ppm, avocado as high as <0.08 ppm, fig as high as <0.41 ppm, grape as high as 2.78 ppm, macadamia nut as high as <0.10 ppm, melon as high as <0.85 ppm, mushroom as high as <0.10 ppm, okra as high as <2.23 ppm, bulb onion as high as <0.60 ppm, green onion as high as 4.88 ppm, peach as high as <3.64 ppm, pear as high as 2.23 ppm, peppermint and spearmint tops as high as 1.43 ppm, EPA determined that the tolerances should be decreased from 8 to 1.0 ppm, 8 to 0.2 ppm, 8 to 1.0 ppm, 8 to 4.0, 1 to 0.2 ppm, 8 to 1.0 ppm, 8 to 0.2 ppm, 8 to 3.0 ppm, 8 to 1.0, 8 to 6.0, 8 to 6.0 ppm, 8 to 3.0 ppm, 8 to 2.0 ppm, and 8 to 2.0 ppm, respectively. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for apricot, fig, melon, and onion, bulb to 1.0 ppm, avocado, mushroom, and nut, macadamia to 0.2 ppm, grape to 4.0 ppm, okra and pear to 3.0 ppm, onion, green and peach to 6.0 ppm, peppermint, tops and spearmint, tops to 2.0 ppm, and redesignate them to 40 CFR 180.111(a)(2).

Available residue data may be translated by the Agency from one commodity to another related commodity where appropriate (e.g., have similar use patterns). Based on their use patterns and the translation of apricot data to nectarine, bulb onion data to garlic, and green onion data to leek and shallot (data previously mentioned herein), EPA determined that the tolerances for nectarine, bulb garlic, leek, and bulb shallot should be decreased from 8 to 1.0 ppm, 8 to 1.0 ppm, 8 to 6 ppm, and 8 to 6 ppm, respectively. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for nectarine and garlic, bulb to 1.0 ppm, and leek and shallot, bulb to 6.0 ppm, and redesignate them to 40 CFR 180.111(a)(2).

Based on their use patterns and the translation of melon data (data previously mentioned herein) to pumpkin and winter squash, EPA determined that the tolerances for pumpkin and winter squash should each be decreased from 8 to 1.0 ppm. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for pumpkin; and squash, winter; each to 1.0 ppm, and redesignate them to 40 CFR 180.111(a)(2).

Based on its use pattern and available field trial data that showed malathion residues of concern in or on asparagus were as high as 1.38 ppm, EPA determined that the tolerance should be decreased from 8 to 2.0 ppm. Therefore, EPA is proposing to decrease the tolerance in 40 CFR 180.111(a)(1) for asparagus to 2.0 ppm, and redesignate it to 40 CFR 180.111(a)(2).

Based on their use patterns and available field trial data that showed malathion residues of concern in or on blackberry as high as 3.99 ppm and raspberry as high as 4.96 ppm, EPA determined that the tolerances should be decreased from 8 to 6 ppm and 8 to 6 ppm, respectively. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for blackberry and raspberry to 6 ppm, and redesignate them to 40 CFR 180.111(a)(2).

Based on their use patterns and the translation of blackberry and/or raspberry data (data previously mentioned herein) to boysenberry, dewberry, gooseberry, and loganberry, EPA determined that the tolerances for boysenberry, dewberry, gooseberry, and loganberry should each be decreased from 8 to 6 ppm. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for boysenberry, dewberry, gooseberry, and loganberry, each to 6 ppm, and redesignate them to 40 CFR 180.111(a)(2).

Based on their use patterns and available field trial data that showed malathion residues of concern in or on turnip greens as high as 3.40 ppm and turnip roots as high as <0.18 ppm, EPA determined that the tolerances should be decreased from 8 to 4.0 ppm and 8 to 0.5 ppm, respectively. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for turnip, greens to 4.0 ppm and turnip, roots to 0.5 ppm, and redesignate them to 40 CFR 180.111(a)(2).

Based on their use patterns and the translation of turnip greens data (data previously mentioned herein) to garden beet tops and salsify tops, EPA determined that the tolerances for beet, garden, tops and salsify, tops; should each be decreased from 8 to 4.0 ppm. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for beet, garden, tops; and salsify, tops; each to 4.0 ppm, and redesignate them to 40 CFR 180.111(a)(2).

Based on their use patterns and the translation of the turnip root data (data previously mentioned herein) to garden beet roots, horseradish, parsnip, radish, rutabaga, and salsify roots, EPA determined that the tolerances for beet, garden, roots; horseradish; parsnip; radish; rutabaga; and salsify, roots; should each be decreased from 8 to 0.5 ppm. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for beet, garden, roots, horseradish; parsnip; radish; rutabaga; and salsify, roots; each to 0.5 ppm, and redesignate them to 40 CFR 180.111(a)(2).

Based on their use patterns and available field trial data that showed malathion residues of concern in or on potatoes as high as 0.05 ppm, and translation of that data to chayote roots and sweet potato roots, EPA determined that the tolerances should be decreased from 8 to 0.1 ppm for potato; chayote, roots; and sweet potato, roots. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for potato; chayote, roots; and sweet potato, roots; each to 0.1 ppm, and redesignate them to 40 CFR 180.111(a)(2).

Based on their use patterns and cucumber data which showed malathion residues of concern as high as <0.11 ppm, and translation of that data to chayote fruit and summer squash, EPA determined that the tolerances for chayote fruit and summer squash should be decreased from 8 to 0.2 ppm. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for chayote, fruit; and squash, summer; each to 0.2 ppm, and redesignate them to 40 CFR 180.111(a)(2).

Based on their use patterns and tomato data, which showed malathion residues of concern as high as 1.54 ppm, and translation of that data to eggplant, EPA determined that the tolerance for eggplant should be decreased from 8 to 2.0 ppm. Therefore, EPA is proposing to decrease the tolerance in 40 CFR 180.111(a)(1) for eggplant to 2.0 ppm, and redesignate it to 40 CFR 180.111(a)(2).

Based on their use patterns and available field trial data that showed malathion residues of concern in or on alfalfa and clover forage as high as 110.12 ppm and 120.14 ppm, respectively, and translation of that data to trefoil forage, EPA determined that the tolerances should be decreased from 135 to 125 ppm for alfalfa, clover, and trefoil forage. Also, based on its use pattern and available field trial data that showed malathion residues of concern in or on clover hay as high as 120.50 ppm, EPA determined that the tolerance should be decreased from 135 to 125 ppm. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for alfalfa, forage; clover, forage; trefoil, forage; and clover, hay; each to 125 ppm; and redesignate them to 40 CFR 180.111(a)(2).

Based on its use pattern and available storage stability data that showed malathion residues of concern in or on carrots were as high as 0.54 ppm, EPA determined that the tolerance should be decreased from 8 to 1 ppm. Therefore, EPA is proposing to decrease the tolerance in 40 CFR 180.111(a)(1) for carrot, roots to 1 ppm, and redesignate it to 40 CFR 180.111(a)(2).

Based on their use patterns and available field trial data that showed malathion residues of concern in or on mango were as high as <0.12 ppm, passionfruit were as high as <0.12 ppm, pineapple were as high as 0.17 ppm, and walnuts were non-detectable (<0.10 ppm), EPA determined that the tolerances should each be decreased from 8 to 0.2 ppm. Also, based on their use patterns and the translation of walnut data to pecan, EPA determined that the pecan tolerance should be decreased from 8 to 0.2 ppm. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for mango, passionfruit, pecan, pineapple, and walnut, each to 0.2 ppm, and redesignate them to 40 CFR 180.111(a)(2).

Based on their use patterns and available field trial data that showed malathion residues of concern in or on oranges as high as 1.91 ppm, and translation of that data to grapefruit, kumquat, lemon, lime, and tangerine, EPA determined that the tolerances

should be decreased from 8 to 4.0 ppm for orange, grapefruit, kumquat, lemon, lime, and tangerine. Therefore, EPA is proposing to decrease the tolerances in 40 CFR 180.111(a)(1) for orange, grapefruit, kumquat, lemon, lime, and tangerine; each to 4.0 ppm, and redesignate them to 40 CFR 180.111(a)(2).

Based on their use patterns and dry bean data, which showed malathion residues of concern as high as 0.74 ppm, and translation of that data to lupin seed, EPA determined that the tolerance for lupin seed should be decreased from 8 to 2.0 ppm. Therefore, EPA is proposing to decrease the tolerance in 40 CFR 180.111(a)(1) for lupin, seed to 2.0 ppm, and redesignate it to 40 CFR 180.111(a)(2).

Based on its use pattern and available field trial data that showed malathion residues of concern in or on peppers as high as 0.09 ppm, EPA determined that the tolerance should be decreased from 8 to 0.5 ppm. Therefore, EPA is proposing to decrease the tolerance in 40 CFR 180.111(a)(1) for pepper to 0.5 ppm, and redesignate it to 40 CFR 180.111(a)(2).

6. *Mancozeb*. Based on label revisions and available field trial data that showed mancozeb residues as high as 0.738 ppm in or on wheat grain and 27.1 ppm in or on wheat straw, the Agency determined that the tolerances should be set at 1 ppm for wheat grain and 30 ppm for wheat straw, which when converted to carbon disulfide equivalents using a rounded conversion factor of 0.6X (based on relative molecular weights) is calculated as 0.6 ppm for grain and 18 ppm for straw. The Agency determined that data for wheat should be translated to barley, oat, and rye because of similar use patterns. In order to harmonize with Codex, EPA is proposing in 40 CFR 180.176(a) to decrease the tolerances on barley, grain; oat, grain; rye, grain; and wheat, grain; each to 1 ppm and to maintain the tolerance for wheat, straw at 25 ppm (as recommended in the RED) and therefore, also maintain the straw tolerances at 25 ppm for barley, oat, and rye.

Based on available processing data that showed mancozeb residues concentrated 2X in flour and 4X in wheat bran and shorts, and a highest average field trial (HAFT) of <0.748 ppm on the raw agricultural commodity (RAC), the Agency expected residues as high as 1.5 ppm for flour and 2.99 ppm for bran, and the Agency determined that the tolerances should be set at 2.0 ppm for flour and 3.0 ppm for bran and shorts, which when converted to carbon disulfide equivalents using a rounded

conversion factor of 0.6X is calculated as 1.2 ppm for flour and 2 ppm for bran and shorts. The Agency determined that data for wheat should be translated to barley, oat, and rye because of similar use patterns. Therefore, EPA is proposing in 40 CFR 180.176(a) to decrease the tolerances on wheat, flour; barley, flour; and oat, flour; each to 1.2 ppm and also to establish a tolerance on rye, flour at 1.2 ppm; and decrease the tolerances on wheat, bran; barley, bran; rye, bran; and wheat, shorts; each to 2 ppm.

Based on sufficient data for wheat hay, where the field trial data showed mancozeb residues as high as 46.4 ppm, the Agency determined that the tolerance, in carbon disulfide equivalents, should be set at 30 ppm. No additional data for wheat hay have been received since the RED that would change that conclusion. (Although the Mancozeb RED stated that additional data for wheat hay were needed to establish a tolerance value, the Agency had received sufficient data prior to the RED to establish a tolerance value and no additional data are needed). The Agency determined that data for wheat hay should be translated to barley and oats because of similar use patterns. Therefore, EPA is proposing to establish tolerances in 40 CFR 180.176(a) on wheat, hay; barley hay; and oat, hay at 30 ppm.

Based on label revision and available field trial data that showed mancozeb residues were as high as 12.6 ppm in or on papaya, the Agency determined that the tolerance should be set at 15 ppm, which when converted to carbon disulfide equivalents using a rounded conversion factor of 0.6X is calculated as 9 ppm. Therefore, EPA is proposing to decrease the tolerance in 40 CFR 180.176(a) on papaya to 9 ppm.

Based on available field trial data that showed mancozeb residues were not detectable (<0.05 ppm) in or on field corn grain, the Agency determined that the tolerance should be set at 0.1 ppm, which when converted to carbon disulfide equivalents using a rounded conversion factor of 0.6X is calculated as 0.06 ppm. Therefore, EPA is proposing to decrease the tolerance in 40 CFR 180.176(a) on corn, field, grain to 0.06 ppm.

7. *Mepiquat*. Based on available data at an exaggerated feeding level of 7X the Maximum Theoretical Dietary Burden (MTDB) which showed mepiquat residues of concern in cattle meat, fat, and milk were below the limit of detection (<0.05 ppm), EPA determined that there is no reasonable expectation of finite mepiquat residues of concern in livestock meat and fat. The tolerances

are no longer needed under 40 CFR 180.6(a)(3) and therefore should be revoked. Consequently, EPA is proposing to revoke the tolerances for mepiquat chloride in 40 CFR 180.384(a)(2) on cattle, fat; cattle, meat; goat, fat; goat, meat; hog, fat; hog, meat; horse, fat; horse, meat; sheep, fat; and sheep, meat.

In addition, EPA is proposing to combine the tolerance expressions for mepiquat in 40 CFR 180.384(a)(1) and mepiquat chloride in 40 CFR 180.384(a)(2) by measuring only mepiquat in newly designated 40 CFR 180.384(a). Also, in order to describe more clearly the measurement of residues for tolerances and coverage of metabolites and degradates of a pesticide by the tolerances, EPA is proposing to revise the introductory text in newly designated 40 CFR 180.384(a) to read as set out in the proposed regulatory text at the end of this document.

8. *Oxamyl*. In the **Federal Register** of January 11, 2012 (77 FR 1684) (FRL–9328–2), EPA announced its receipt of voluntary requests by registrants to amend certain pesticide registrations, including amendments to terminate the last oxamyl registrations for soybean use. In the **Federal Register** of April 11, 2012 (77 FR 21767) (FRL–9342–2), EPA published a cancellation order in follow-up to the January 11, 2012 notice and granted the requested amendments to terminate use of oxamyl on soybeans. Because the soybean use has not been included on oxamyl product labels since 2006, no existing stocks period is needed. Therefore, EPA is proposing to revoke the tolerance for oxamyl in 40 CFR 180.303(a) on soybean, seed.

9. *Propetamphos*. In the **Federal Register** of August 18, 2010 (75 FR 51053) (FRL–8840–3), EPA announced its receipt of voluntary requests by the registrant to cancel certain propetamphos registrations, which would terminate the last propetamphos products registered for use in the United States. In the **Federal Register** of December 30, 2010 (75 FR 82387) (FRL–8854–8), EPA published a cancellation order in follow-up to the August 18, 2010 notice which granted the requested product cancellations and prohibited the registrant from selling or distributing its propetamphos technical product after March 30, 2012 and end-use product until stocks are exhausted as described. Persons other than the registrant are allowed to sell, distribute, and use existing stocks of the end-use product until supplies are exhausted. EPA believes that existing stocks have been exhausted. Therefore, EPA is proposing to revoke the sole tolerance

for propetamphos in 40 CFR 180.541, on food and feed commodities, and remove that section in its entirety.

10. *Quizalofop ethyl*. Because EPA no longer considers soybean soapstock to be a significant livestock feed item, the tolerance for quizalofop ethyl residues of concern is no longer needed and therefore should be revoked. Consequently, EPA is proposing to revoke the tolerance for quizalofop ethyl in 40 CFR 180.441(a)(1) on soybean, soapstock.

11. *Spinosad*. The existing tolerance for spinosad on coriander leaves was translated from the tolerance for vegetable, leafy, except brassica, group 4 at 8.0 ppm. The 2009 Calendar Year Pesticide Data Program (PDP) summary, available at <http://www.ams.usda.gov/AMSV1.0/science>, reported that spinosad residues were detected in two cilantro samples out of 184 samples. Residues ranged from 0.016 to 0.030 ppm. Because fresh coriander leaves are included in herb subgroup 19A, fresh and residues on coriander leaves do not exceed the herb subgroup 19A, fresh tolerance of 3.0 ppm, there is no longer any need for the separate tolerance on coriander leaves at 8.0 and therefore it should be revoked. Consequently, EPA is proposing to revoke the tolerance for spinosad in 40 CFR 180.495(a) on coriander, leaves.

12. *Spiroxamine*. In the **Federal Register** of September 7, 2011 (76 FR 55385) (FRL–8887–1), EPA announced its receipt of voluntary requests by registrants to cancel certain pesticide registrations, including the last registrations for use of spiroxamine on hops. In the **Federal Register** of May 23, 2012 (77 FR 30526) (FRL–9347–3), EPA published a cancellation order in follow-up to the September 7, 2011 notice and granted the requested product cancellations, including ones which terminated use of spiroxamine on hops. The cancellation order allowed registrants to sell and distribute existing stocks until May 23, 2013. EPA believes that existing stocks (with hops use) will be exhausted 1 year after May 23, 2013; i.e., by May 23, 2014. Therefore, EPA is proposing to revoke the tolerance for spiroxamine in 40 CFR 180.602(a) on hop, dried cones.

13. *Thiram*. Currently, tolerances for thiram are established in 40 CFR 180.132(a) for residues of the fungicide thiram (tetramethyl thiuram disulfide). Thiram is a member of the class of dithiocarbamates, whose decomposition releases a common moiety, carbon disulfide. In order to allow harmonization of U.S. tolerances with Codex MRLs, the Agency determined that for the purpose of tolerance

enforcement, residues of thiram should be calculated as carbon disulfide. Therefore, EPA is proposing to revise the introductory text containing the tolerance expression in 40 CFR 180.132(a) to thiram residues convertible to and expressed in terms of the degradate carbon disulfide and also revise the tolerance expression in accordance with current Agency practice to describe more clearly the measurement and scope or coverage of the tolerances, to read as set out in the proposed regulatory text at the end of this document. Based on the revising of the tolerance expression to carbon disulfide, EPA determined that the thiram tolerances for apple and strawberry should be decreased from 7.0 to 5 ppm and 20 to 13 ppm, respectively, and the tolerance for banana should be increased from 0.80 to 2.0 ppm in order to harmonize with Codex. Also, in order to harmonize with Codex, EPA is maintaining the tolerance for peach at 7.0 ppm. (The Agency's determination is available in the docket of this proposed rule). Therefore, EPA is proposing in 40 CFR 180.132(a) to decrease the tolerances for apple to 5 ppm and strawberry to 13 ppm, and increase the tolerance for banana to 2.0 ppm. The Agency determined that the increased tolerance is safe; i.e., there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue.

14. *Triflumizole*. Because EPA no longer considers dry apple pomace, grape pomace, and grape raisin waste to be significant livestock feed items, the associated tolerances for triflumizole residues of concern are no longer needed and therefore should be revoked. Also, based on apple processing data that showed triflumizole residues of concern do not concentrate in wet apple pomace, the tolerance is no longer needed and should be revoked. Consequently, EPA is proposing to revoke the tolerances for triflumizole in 40 CFR 180.476(a)(1) on apple, dry pomace; apple, wet pomace; grape, dried pomace; grape, raisin, waste; and grape, wet pomace.

Also, because there are no longer any registered triflumizole uses associated with feed items for poultry and swine, tolerances for triflumizole residues of concern on swine and poultry are no longer needed and therefore should be revoked. Consequently, EPA is proposing to revoke the tolerances for triflumizole in 40 CFR 180.476(a)(2) on hog, fat; hog, meat; hog, meat byproducts; poultry, fat; poultry, meat; poultry, meat byproducts; and egg.

Based on available data at an exaggerated feeding level of 6X the

MTDB which showed trifluridazole residues of concern to be below the limit of quantitation (<0.05 ppm) and projected residues at 1X the MTDB in cattle meat and milk to be well below the limit of quantitation (<0.05 ppm), EPA determined that there is no reasonable expectation of finite trifluridazole residues of concern in livestock meat and milk. These tolerances are no longer needed under 40 CFR 180.6(a)(3) and therefore should be revoked. Consequently, EPA is proposing to revoke the tolerances for trifluridazole in 40 CFR 180.476(a)(2) on cattle, meat; goat, meat; horse, meat; sheep, meat; and milk.

In addition, based on available data at an exaggerated feeding level at 6X the MTDB which projected residues at 1X the MTDB in cattle fat, kidney, and liver to be <0.05 ppm, <0.10 ppm, and <0.10 ppm, respectively, EPA determined that the existing tolerances should be decreased. Consequently, EPA is proposing to decrease the tolerances for trifluridazole in 40 CFR 180.476(a)(2) from 0.5 to 0.10 ppm on cattle, fat; goat, fat; horse, fat; and sheep, fat; and from 0.5 to 0.20 ppm on cattle, meat byproducts; goat, meat byproducts; horse, meat byproducts; and sheep, meat byproducts.

B. What is the agency's authority for taking this action?

A "tolerance" represents the maximum level for residues of pesticide chemicals legally allowed in or on raw agricultural commodities and processed foods. Section 408 of FFDCA, 21 U.S.C. 346a, authorizes the establishment of tolerances, exemptions from tolerance requirements, modifications in tolerances, and revocation of tolerances for residues of pesticide chemicals in or on raw agricultural commodities and processed foods. Without a tolerance or exemption, food containing pesticide residues is considered to be unsafe and therefore "adulterated" under FFDCA section 402(a), 21 U.S.C. 342(a). Such food may not be distributed in interstate commerce, 21 U.S.C. 331(a). For a food-use pesticide to be sold and distributed, the pesticide must not only have appropriate tolerances under the FFDCA, but also must be registered under FIFRA, 7 U.S.C. 136 *et seq.* Food-use pesticides not registered in the United States must have tolerances in order for commodities treated with those pesticides to be imported into the United States.

EPA is proposing certain specific tolerance actions to implement the tolerance recommendations made during the reregistration and tolerance reassessment processes (including

follow-up on canceled or additional uses of pesticides). As part of these processes, EPA is required to determine whether each of the amended tolerances meets the safety standard of FFDCA. The safety finding determination is discussed in detail in each RED for the active ingredient. REDs recommend the implementation of certain tolerance actions, including modifications to reflect current use patterns, to meet safety findings, and change commodity names and groupings in accordance with new EPA policy. Printed and electronic copies of the REDs are available as provided in Unit II.A.

EPA has issued REDs for malathion and mancozeb. REDs contain the Agency's evaluation of the database for these pesticides, including requirements for additional data on the active ingredients to confirm the potential human health and environmental risk assessments associated with current product uses, and in REDs state conditions under which these uses and products will be eligible for reregistration. The REDs recommended the establishment, modification, and/or revocation of specific tolerances. RED and TRED recommendations such as establishing or modifying tolerances, and in some cases revoking tolerances, are the result of assessment under the FFDCA standard of "reasonable certainty of no harm." However, tolerance revocations recommended in REDs that are proposed in this document do not need such assessment when the tolerances are no longer necessary.

EPA's general practice is to propose revocation of tolerances for residues of pesticide active ingredients on crops for which FIFRA registrations no longer exist and on which the pesticide may therefore no longer be used in the United States. EPA has historically been concerned that retention of tolerances that are not necessary to cover residues in or on legally treated foods may encourage misuse of pesticides within the United States. Nonetheless, EPA will establish and maintain tolerances even when corresponding domestic uses are canceled if the tolerances, which EPA refers to as "import tolerances," are necessary to allow importation into the United States of food containing such pesticide residues. However, where there are no imported commodities that require these import tolerances, the Agency believes it is appropriate to revoke tolerances for unregistered pesticides in order to prevent potential misuse.

Furthermore, as a general matter, the Agency believes that retention of import tolerances not needed to cover any

imported food may result in unnecessary restriction on trade of pesticides and foods. Under FFDCA section 408, a tolerance may only be established or maintained if EPA determines that the tolerance is safe based on a number of factors, including an assessment of the aggregate exposure to the pesticide and an assessment of the cumulative effects of such pesticide and other substances that have a common mechanism of toxicity. In doing so, EPA must consider potential contributions to such exposure from all tolerances. If the cumulative risk is such that the tolerances in aggregate are not safe, then every one of these tolerances is potentially vulnerable to revocation. Furthermore, if unneeded tolerances are included in the aggregate and cumulative risk assessments, the estimated exposure to the pesticide would be inflated. Consequently, it may be more difficult for others to obtain needed tolerances or to register needed new uses. To avoid potential trade restrictions, the Agency is proposing to revoke tolerances for residues on crops uses for which FIFRA registrations no longer exist, unless someone expresses a need for such tolerances. Through this proposed rule, the Agency is inviting individuals who need these import tolerances to identify themselves and the tolerances that are needed to cover imported commodities.

Parties interested in retention of the tolerances should be aware that additional data may be needed to support retention. These parties should be aware that, under FFDCA section 408(f), if the Agency determines that additional information is reasonably required to support the continuation of a tolerance, EPA may require that parties interested in maintaining the tolerances provide the necessary information. If the requisite information is not submitted, EPA may issue an order revoking the tolerance at issue.

When EPA establishes tolerances for pesticide residues in or on raw agricultural commodities, consideration must be given to the possible residues of those chemicals in meat, milk, poultry, and/or eggs produced by animals that are fed agricultural products (for example, grain or hay) containing pesticide residues (40 CFR 180.6). When considering this possibility, EPA can conclude that:

1. Finite residues will exist in meat, milk, poultry, and/or eggs.

2. There is a reasonable expectation that finite residues will exist.

3. There is a reasonable expectation that finite residues will not exist. If there is no reasonable expectation of finite pesticide residues in or on meat,

milk, poultry, or eggs, tolerances do not need to be established for these commodities (40 CFR 180.6(b) and (c)).

EPA has evaluated certain specific meat, milk, poultry, and egg tolerances proposed for revocation in this document and has concluded that there is no reasonable expectation of finite pesticide residues of concern in or on those commodities.

C. When do these actions become effective?

EPA is proposing that the actions herein become effective 6 months after the date of publication of the final rule in the **Federal Register**. EPA is proposing this effective date for these actions to allow a reasonable interval for producers in exporting members of the World Trade Organization's (WTO's) Sanitary and Phytosanitary (SPS) Measures Agreement to adapt to the requirements of a final rule. EPA believes that treated commodities will have sufficient time for passage through the channels of trade. If you have comments regarding existing stocks and whether the effective date allows sufficient time for treated commodities to clear the channels of trade, please submit comments as described under **SUPPLEMENTARY INFORMATION**.

Any commodities listed in this proposal treated with the pesticides subject to this proposal, and in the channels of trade following the tolerance revocations, shall be subject to FFDCA section 408(1)(5), as established by the Food Quality Protection Act (FQPA). Under this unit, any residues of these pesticides in or on such food shall not render the food adulterated so long as it is shown to the satisfaction of the Food and Drug Administration that:

1. The residue is present as the result of an application or use of the pesticide at a time and in a manner that was lawful under FIFRA, and
2. The residue does not exceed the level that was authorized at the time of the application or use to be present on the food under a tolerance or exemption from tolerance. Evidence to show that food was lawfully treated may include records that verify the dates when the pesticide was applied to such food.

III. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4).

The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

The Codex has not established a MRL for carfentrazone-ethyl, mepiquat, propetamphos, quizalofop ethyl, spiroxamine, triflumizole, ethephon in or on cucumber, oxamyl in or on soybean seed, spinosad in or on coriander leaves, or total dithiocarbamates in or on barley bran, barley flour, field corn grain, oat flour, oat grain, rye bran, rye grain, wheat bran, wheat flour, and wheat, shorts.

The Codex has established MRLs for total dithiocarbamates determined as carbon disulfide in or on various commodities, including barley and wheat, each at 1 milligrams/kilogram (mg/kg). These MRLs are the same as the tolerances proposed for mancozeb in the United States.

The Codex has established MRLs for total dithiocarbamates determined as carbon disulfide in or on various commodities, including papaya at 5 mg/kg. This MRL is covered by a proposed U.S. tolerance at a higher level than the MRL. The MRL is different than the proposed U.S. tolerance for mancozeb in the United States because of differences in residue definition, use patterns, and/or good agricultural practices.

The Codex has established MRLs for malathion in or on various commodities, including onion, bulb at 1 milligrams/kilogram (mg/kg). This MRL is the same as the tolerance proposed for malathion in the United States.

The Codex has established MRLs for malathion in or on various commodities, including asparagus at 1 mg/kg and peppers at 0.1 mg/kg. These MRLs are covered by proposed U.S. tolerances at higher levels than the MRLs. These MRLs are different than the tolerances established for malathion in the United States because of differences in residue definition, use patterns, and/or good agricultural practices.

The Codex has established MRLs for malathion in or on citrus fruits at 7 mg/kg, grapes at 5 mg/kg, and turnip greens at 5 mg/kg. These MRLs are different than the tolerances proposed for malathion in the United States because of differences in residue definition, use

patterns, and/or good agricultural practices.

The Codex has established a MRL for amitraz in or on various commodities, including cotton seed at 0.5 mg/kg. This MRL is covered by the current U.S. tolerance at a higher level than the MRL, but would no longer be covered due to the proposed revocation of the U.S. tolerance.

The Codex has established MRLs for total dithiocarbamates determined as carbon disulfide in or on various commodities, including banana at 2 mg/kg, peach at 7 mg/kg, and strawberry at 5 mg/kg. The MRLs for banana and peach are the same as the U.S. tolerances proposed for thiram in the United States. The MRL for strawberry is covered by a proposed U.S. tolerance at a higher level than the MRL. The MRL for strawberry is different than the tolerance proposed for thiram in the United States because of differences in use patterns, and/or good agricultural practices.

IV. Statutory and Executive Order Reviews

In this proposed rule, EPA is proposing to establish tolerances under FFDCA section 408(e), and also modify and revoke specific tolerances established under FFDCA section 408. The Office of Management and Budget (OMB) has exempted these types of actions (e.g., establishment and modification of a tolerance and tolerance revocation for which extraordinary circumstances do not exist) from review under Executive Order 12866, entitled "*Regulatory Planning and Review*" (58 FR 51735, October 4, 1993). Because this proposed rule has been exempted from review under Executive Order 12866 due to its lack of significance, this proposed rule is not subject to Executive Order 13211, entitled "*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*" (66 FR 28355, May 22, 2001). This proposed rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (2 U.S.C. 1501 *et seq.*). Nor does it require any special considerations as required by Executive Order 12898, entitled "*Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations*" (59 FR 7629, February 16, 1994); or OMB review or any other Agency action under Executive Order

13045, entitled “Protection of Children from Environmental Health Risks and Safety Risks” (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA) (15 U.S.C. 272 note). Pursuant to the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agency previously assessed whether establishment of tolerances, exemptions from tolerances, raising of tolerance levels, expansion of exemptions, or revocations might significantly impact a substantial number of small entities and concluded that, as a general matter, these actions do not impose a significant economic impact on a substantial number of small entities. These analyses for tolerance establishments and modifications, and for tolerance revocations were published on May 4, 1981 (46 FR 24950) and on December 17, 1997 (62 FR 66020) (FRL-5753-1), respectively, and were provided to the Chief Counsel for Advocacy of the Small Business Administration. Taking into account this analysis, and available information concerning the pesticides listed in this proposed rule, the Agency hereby certifies that this proposed rule will not have a significant negative economic impact on a substantial number of small entities. In a memorandum dated May 25, 2001, EPA determined that eight conditions must all be satisfied in order for an import tolerance or tolerance exemption revocation to adversely affect a significant number of small entity importers, and that there is a negligible joint probability of all eight conditions holding simultaneously with respect to any particular revocation. (This Agency document is available in the docket of this proposed rule). Furthermore, for the pesticide named in this proposed rule, the Agency knows of no extraordinary circumstances that exist as to the present proposal that would change the EPA’s previous analysis. Any comments about the Agency’s determination should be submitted to the EPA along with comments on the proposal, and will be addressed prior to issuing a final rule. In addition, the Agency has determined that this action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled “Federalism” (64 FR 43255, August 10,

1999). Executive Order 13132 requires EPA to develop an accountable process to ensure “meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.” “Policies that have federalism implications” is defined in the Executive order to include regulations that have “substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.” This proposed rule directly regulates growers, food processors, food handlers, and food retailers, not States. This action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCFA section 408(n)(4). For these same reasons, the Agency has determined that this proposed rule does not have any “tribal implications” as described in Executive Order 13175, entitled “Consultation and Coordination with Indian Tribal Governments” (65 FR 67249, November 9, 2000). Executive Order 13175, requires EPA to develop an accountable process to ensure “meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.” “Policies that have tribal implications” is defined in the Executive order to include regulations that have “substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and the Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.” This proposed rule will not have substantial direct effects on tribal governments, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this proposed rule.

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: June 24, 2014.

Jack Housenger,
Director, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR chapter I be amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.111, revise the table in paragraph (a)(1) and revise paragraph (a)(2) to read as follows:

§ 180.111 Malathion; tolerances for residues.

- (a) * * *
- (1) * * *

Commodity	Parts per million
Alfalfa, hay	135
Almond, hulls	50
Almond, postharvest	8
Apple	8
Barley, grain, postharvest	8
Bean, dry, seed	8
Bean, succulent	8
Beet, sugar, roots	1
Beet, sugar, tops	8
Blueberry	8
Cherry	8
Chestnut	1
Corn, field, forage	8
Corn, field, grain, postharvest	8
Corn, pop, grain, postharvest	8
Corn, sweet, forage	8
Corn, sweet, kernel plus cob with husks removed	2
Cowpea, forage	135
Cowpea, hay	135
Cranberry	8
Cucumber	8
Currant	8
Date, dried fruit	8
Flax, seed	0.1

Sorghum, grain, grain, postharvest	8
Soybean, forage	135
Soybean, hay	135
Soybean, seed	8
Soybean, vegetable, succulent	8
Strawberry	8
Sunflower, seed, postharvest	8
Tomato	8
Trefoil, hay	135
Vegetable, brassica, leafy, group 5	8

Commodity	Parts per million
Vegetable, leafy, except brassica, group 4	8
Vetch, hay	135
Wheat, grain, postharvest	8

(2) Tolerances are established for residues of the insecticide malathion, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of malathion (*O,O*-dimethyl dithiophosphate of diethyl mercaptosuccinate), and its metabolite malaoson (*O,O*-dimethyl thiophosphate of diethyl mercaptosuccinate), in or on the commodity.

Commodity	Parts per million
Alfalfa, forage	125
Apricot	1.0

■ 3. In § 180.132, revise paragraph (a) to read as follows:

§ 180.132 Thiram; tolerances for residues.

(a) *General.* Tolerances are established for residues of the fungicide thiram, tetramethyl thiuram disulfide, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only those thiram residues convertible to and expressed in terms of the degradate carbon disulfide, in or on the commodity.

Commodity	Parts per million	Expiration/revocation date
Apple	5	None
Banana ¹	2.0	3/31/15
Peach	7.0	None
Strawberry	13	None

¹ There are no U.S. registrations as of September 23, 2009.

§ 180.205 [Amended]

■ 7. In § 180.205, remove the entry for “Rice, straw” from the table in paragraph (a).

§ 180.274 [Amended]

■ 8. In § 180.274, remove the entry for “Rice, straw” from the table in paragraph (a).

§ 180.287 [Amended]

■ 9. In § 180.287, remove the entry for “Cotton, undelinted seed¹” and the footnote from the table in paragraph (a).

§ 180.288 [Amended]

■ 10. In § 180.288, remove the entry for “Rice, straw” from the table in paragraph (a).

§ 180.293 [Amended]

■ 11. In § 180.293, remove the entry for “Rice, straw” from the table in paragraph (a)(1).

§ 180.300 [Amended]

■ 12. In § 180.300, remove the entry for “Cucumber” from the table in paragraph (a).

§ 180.301 [Amended]

■ 13. In § 180.301, remove the entry for “Rice, straw” from the table in paragraph (a).

§ 180.303 [Amended]

■ 14. In § 180.303, remove the entry for “Soybean, seed” from the table in paragraph (a).

§ 180.355 [Amended]

■ 15. In § 180.355, remove the entry for “Rice, straw” from the table in paragraph (a)(1).

§ 180.361 [Amended]

■ 16. In § 180.361, remove the entry for “Rice, straw” from the table in paragraph (a).

§ 180.377 [Amended]

■ 17. In § 180.377, remove the entry for “Rice, straw” from the table in paragraph (a)(2).

§ 180.383 [Amended]

■ 18. In § 180.383, remove the entry for “Rice, straw” from the table in paragraph (a).

■ 19. In § 180.384, revise paragraph (a) to read as follows:

§ 180.384 Mepiquat (N,N-dimethylpiperidinium); tolerances for residues.

(a) *General.* Tolerances are established for residues of the plant growth regulator mepiquat, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only mepiquat, N,N-dimethylpiperidinium, in or on the commodity.

Commodity	Parts per million
Cattle, meat byproducts	0.1
Cotton, gin byproducts	6.0
Cotton, undelinted seed	2.0
Goat, meat byproducts	0.1
Grape	1.0
Grape, raisin	5.0
Hog, meat byproducts	0.1
Horse, meat byproducts	0.1
Sheep, meat byproducts	0.1

§ 180.399 [Amended]

■ 20. In § 180.399, remove the entry for “Rice, straw” from the table in paragraph (a)(1).

§ 180.401 [Amended]

■ 21. In § 180.401, remove the entry for “Rice, straw” from the table in paragraph (a).

§ 180.417 [Amended]

■ 22. In § 180.417, remove the entry for “Rice, straw” from the table in paragraph (a)(1).

§ 180.418 [Amended]

■ 23. In § 180.418, remove the entry for “Rice, straw” from the table in paragraph (a)(2).

§ 180.425 [Amended]

■ 24. In § 180.425, remove the entry for “Rice, straw” from the table in paragraph (a).

§ 180.434 [Amended]

■ 25. In § 180.434, remove the entry for “Rice, straw” from the table in paragraph (a).

§ 180.438 [Amended]

■ 26. In § 180.438, remove the entry for “Rice, straw” from the table in paragraph (a)(1) and from the table in paragraph (a)(2).

§ 180.439 [Amended]

■ 27. In § 180.439, remove the entry for “Rice, straw” from the table in paragraph (a).

§ 180.441 [Amended]

■ 28. In § 180.441, remove the entry for “Soybean, soapstock” from the table in paragraph (a)(1).

§ 180.445 [Amended]

■ 29. In § 180.445, remove the entry for “Rice, straw” from the table in paragraph (a).

§ 180.447 [Amended]

■ 30. In § 180.447, remove the entry for “Rice, straw” from the table in paragraph (a)(2).

§ 180.451 [Amended]

■ 31. In § 180.451, remove the entry for “Rice, straw” from the table in paragraph (a).

§ 180.463 [Amended]

■ 32. In § 180.463, remove the entry for “Rice, straw” from the table in paragraph (a)(1).

§ 180.473 [Amended]

■ 33. In § 180.473, remove the entry for “Rice, straw” from the table in paragraph (a).

■ 34. In § 180.476, revise the table in paragraph (a)(1) and revise the table in paragraph (a)(2) to read as follows:

§ 180.476 Triflumizole; tolerances for residues.

RIN 0648-XD267

Endangered and Threatened Wildlife; 90-Day Finding on a Petition To Identify the Central North Pacific Population of Humpback Whale as a Distinct Population Segment (DPS) and Delist the DPS Under the Endangered Species Act; Extension of Public Comment Period

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Extension of public comment period.

SUMMARY: We, NMFS, announce the extension of the public comment period on our June 26, 2014, 90-day finding on a petition to designate the Central North Pacific population of humpback whale (*Megaptera novaeangliae*) as a Distinct Population Segment (DPS) and delist the DPS under the Endangered Species Act (ESA). As part of that finding, we solicited scientific and commercial information about the status of this population and announced a 30-day comment period to end on July 28, 2014. Today, we extend the public comment period to August 27, 2014. Comments previously submitted need not be resubmitted, as they will be fully considered in the agency’s final determination.

DATES: The deadline for receipt of comments is extended from July 28, 2014 until August 27, 2014.

ADDRESSES: You may submit comments on this document, identified by FDMS Docket Number NOAA-NMFS-2014-0051, by any of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2014-0051, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

- **Mail:** Address written comments to Jon Kurland, Assistant Regional Administrator for Protected Resources, Alaska Region NMFS, Attn: Ellen Sebastian. Mail comments to P.O. Box 21668, Juneau, AK 99802-1668.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

Interested persons may obtain a copy of the petition online at the NMFS Alaska Region Web site: <http://alaskafisheries.noaa.gov/protectedresources/whales/humpback/>.

FOR FURTHER INFORMATION CONTACT: Aleria Jensen, NMFS Alaska Region, (907) 586-7248 or Jon Kurland, NMFS Alaska Region, (907) 586-7638.

SUPPLEMENTARY INFORMATION:

Background

On June 26, 2014 we published a proposed rule (79 FR 36281) announcing a positive 90-day finding on a petition to designate the Central North Pacific population of humpback whale as a Distinct Population Segment (DPS) and delist the DPS under the Endangered Species Act (ESA). In that notice we also solicited comments and information from the public to inform the continued development of our humpback whale status review to determine whether the Central North Pacific humpback whale population constitutes a DPS under the ESA, and if so, the risk of extinction to this DPS.

We have received requests to extend the public comment period by 30 days

to be consistent with previous 60-day comment periods for other listing and delisting actions under the ESA. Given the complexity of the issues raised in the petition, this extension would provide the public with additional time to gather relevant information and adequately comment on the validity of the petitioned action in a meaningful and constructive manner. We considered these requests and concluded that a 30-day extension should allow sufficient time for responders to submit comments without significantly delaying the completion of the status review. We are therefore extending the close of the public comment period from July 28, 2014, to August 27, 2014. Although we have extended the public comment period, we are unable to extend the deadline for completing the status review. As such, we urge members of the public to submit their comments as soon as possible to allow us more time to review and incorporate the submitted information where appropriate.

Authority: The authority for this action is the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Dated: July 7, 2014.

Perry F. Gayaldo,

Deputy Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 300

[Docket No. 140502404-4404-01]

RIN 0648-BE21

International Fisheries; Western and Central Pacific Fisheries for Highly Migratory Species; Fishing Capacity Limits in Purse Seine and Longline Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Advance notice of proposed rulemaking; notification of control date; request for comments.

SUMMARY: NMFS announces that persons who bring a U.S. purse seine or longline vessel into the fisheries in the western and central Pacific Ocean (WCPO) after July 11, 2014 (“control date”), or who, after the control date, expand the carrying capacity or well

volume of a purse seine vessel already in the fishery, are not guaranteed the future participation of that vessel in the fishery if NMFS decides to limit the number of fishing vessels in the fishery or, with respect to purse seine vessels, the fishing capacity of the fleet or of vessels in the fleet in terms of carrying capacity or well volume. Furthermore, with respect to purse seine vessels, even if the future participation of such a vessel is allowed, the vessel’s future allowable level of fishing effort and/or catch might be limited if NMFS decides to limit vessels’ individual or collective allowable levels of fishing effort or catch. NMFS is considering the need to undertake such actions to implement provisions of a conservation and management measure adopted by the Commission for the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (WCPFC or Commission).

DATES: Comments must be submitted in writing by August 11, 2014.

ADDRESSES: You may submit comments on this document, identified by NOAA-NMFS-2014-0067, by either of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov/#/docketDetail;D=NOAA-NMFS-2014-0067, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

- *Mail:* Submit written comments to Michael D. Tosatto, Regional Administrator, NMFS, Pacific Islands Regional Office (PIRO), 1845 Wasp Blvd., Building 176, Honolulu, HI 96818.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, might not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name and address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT: Tom Graham, NMFS PIRO, 808-725-5032.

SUPPLEMENTARY INFORMATION:

Background on the U.S. WCPO Purse Seine and Longline Fisheries

Participation by U.S. flagged purse seine and longline vessels in the WCPO fisheries is contingent on fishing authorizations granted under several statutes.

The U.S. WCPO purse seine fishery is regulated in part under the authority of the South Pacific Tuna Act of 1988 (16 U.S.C. 973-973r; SPTA) through implementing regulations at 50 CFR part 300, subpart D. The terms of the treaty between the United States and 16 Members of the Pacific Islands Forum Fisheries Agency (Treaty on Fisheries between the Governments of Certain Pacific Island States and the Government of the United States of America and its annexes, schedules, and implementing agreements, as amended; hereafter called “the Treaty”) are implemented by the SPTA and the regulations cited above. The Treaty provides access to and generally governs U.S. fishing vessels operating in the Treaty Area, which comprises much of the exclusive economic zones of the 16 Pacific Island Parties to the Treaty (PIPs) through a licensing system. License applications are first submitted to NMFS, which are approved or disapproved according to procedures established at 50 CFR 300.32. NMFS forwards approved applications to the Pacific Islands Forum Fisheries Agency (FFA, located in the Solomon Islands), which issues the licenses and acts as the Treaty administrator on behalf of the PIPs.

In addition to being governed by the Treaty and the SPTA, the U.S. WCPO purse seine fishery is subject to the authority of the WCPFC Implementation Act (16 U.S.C. 6901 *et seq.*). The WCPFC Implementation Act authorizes the Secretary of Commerce to implement the provisions of the Convention on the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (Convention) and the decisions of the Commission, which was established under the Convention. The area of competence of the Commission, or the Convention Area, includes the majority of the Treaty Area. As a Party to the Convention and a Member of the Commission, the United States is obligated to implement the decisions of the Commission. The decisions of the Commission can be found on its Web site (<http://www.wcpfc.int/>). Pursuant to the Convention and the decisions of the Commission, a U.S. fishing vessel must have a high seas fishing permit (see below) with a valid WCPFC Area

Endorsement, issued by NMFS under 50 CFR 300.212, to be used for commercial fishing for highly migratory species on the high seas in the Convention Area.

The U.S. WCPO purse seine fishery is also subject to the authority of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*; MSA), particularly with respect to the operation of the fishery within the U.S. exclusive economic zone. The fishery is also subject to the authority of the High Seas Fishing Compliance Act (16 U.S.C. 5501 *et seq.*), which governs the conduct of U.S. fishing vessels on the high seas, and under which a high seas fishing permit is required for a U.S. fishing vessel to be used for commercial fishing anywhere on the high seas.

The U.S. WCPO longline fishery is regulated in part under the authority of the MSA. Longline vessels are subject to the management regime developed by the Western Pacific Fishery Management Council and established in the Fishery Ecosystem Plan for Pacific Pelagic Fisheries of the Western Pacific Region, which is implemented through regulations at 50 CFR part 665. Among other management controls, there are limited entry programs for the Hawaii and American Samoa longline fisheries, with specific limits on the numbers of fishing permits available in each of the two fisheries. Longline vessels are also subject to the authority of the WCPFC Implementation Act. Like U.S. purse seine vessels, a U.S. longline vessel must have a high seas fishing permit with a valid WCPFC Area Endorsement, issued by NMFS under 50 CFR 300.212, to be used for commercial fishing for highly migratory species on the high seas in the Convention Area.

Recent Decisions of the WCPFC

In December 2013, the Commission adopted a conservation and management measure for bigeye tuna, yellowfin tuna, and skipjack tuna (CMM 2013–01). Most of that CMM's provisions are in effect from February 4, 2014, until December 31, 2017. The CMM includes provisions specific to longline vessels and provisions specific to purse seine vessels. The CMM's longline provisions include limits on vessel numbers and limits on bigeye tuna catches. The CMM's purse seine provisions include limits on fishing effort, restrictions on the use of fish aggregating devices (FADs), catch retention requirements, observer requirements, and restrictions on vessel numbers and vessels' fishing capacity.

This advance notice of proposed rulemaking (ANPR) and control date relate to CMM 2013–01's provisions on

vessel numbers (which apply to both purse seine and longline vessels) and its provisions on vessels' fishing capacity (which apply only to purse seine vessels).

Regarding purse seine vessels, CMM 2013–01 obligates certain flag States, including the United States, to limit the number of their purse seine vessels that are greater than 24 meters in length, have freezing capacity, and operate between the latitudes of 20° North and 20° South to the current level (paragraph 49 of CMM 2013–01). CMM 2013–01 also obligates certain flag States, including the United States, to ensure that purse seine vessels in their fleets are not replaced with vessels with greater carrying capacity or well volume, or that the catch or fishing effort of such vessels is not greater than that of the replaced vessels (paragraph 50 of CMM 2013–01). Notwithstanding this latter obligation, CMM 2013–01 provides for flag States to allow the replacement of purse seine vessels in their fleets with vessels for which building approval has been granted and notified to the Commission before March 1, 2014 (paragraph 50 of CMM 2013–01). These provisions for purse seine vessels do not apply to small island developing States or Participating Territories of the WCPFC, which include American Samoa, Commonwealth of the Northern Mariana Islands, and Guam.

Regarding longline vessels, CMM 2013–01 obligates certain flag States, including the United States, to limit the number of their longline vessels with freezing capacity targeting bigeye tuna to the current level (paragraph 51 of CMM 2013–01), and to limit the number of their ice-chilled longline vessels targeting bigeye tuna and landing exclusively fresh fish to the current level or to the current number of licenses available under established limited entry programs (paragraph 52 of CMM 2013–01). These provisions for longline vessels do not apply to small island developing States or Participating Territories of the WCPFC, which include American Samoa, Commonwealth of the Northern Mariana Islands, and Guam.

Establishment of Control Date and Possible Rulemaking

One purpose of this ANPR is to notify persons that if they attempt to bring a vessel into the U.S. WCPO purse seine fishery or longline fishery after the control date of July 11, 2014, or if, after the control date, they expand the carrying capacity or well volume of a purse seine vessel already in the fishery, there is no assurance of being granted

future participation of that vessel in the fishery if NMFS decides to limit the number of fishing vessels in the fishery, or, with respect to purse seine vessels, the fishing capacity of the fleet or of vessels in the fleet in terms of carrying capacity or well volume. Furthermore, with respect to purse seine vessels, even if the participation of such a vessel in the future is granted, the vessel's future allowable level of fishing effort and/or catch might be limited if NMFS decides to limit vessels' individual or collective allowable levels of fishing effort or catch beyond the limits already in place. For the purse seine fishery, any of these limits would likely apply only to vessels more than 24 meters in length with freezing capacity (all of the 40 currently SPTT-licensed purse seine vessels fall in this category). For the longline fishery, any limit on vessel numbers would likely apply only to vessels that NMFS determines target bigeye tuna.

A second purpose of this ANPR is to solicit comments and input on possible ways to establish limits on purse seine fishing capacity as required under paragraphs 49 and 50 of CMM 2013–01, specifically on vessels' individual or collective carrying capacity, well volume, fishing effort, and/or catch levels. NMFS is especially interested in comments on whether it would be preferable to place limits on carrying capacity, well volume, fishing effort, or catch levels; on possible measures of carrying capacity and well volume that could be used for the purpose of such limits; and on possible methods for determining and verifying such measures.

Establishment of this control date does not commit NMFS to any particular action or, if action is taken, any particular criteria for limiting vessel numbers in the U.S. WCPFC purse seine or longline fisheries or for limiting fishing capacity or fishing effort or catch levels in the U.S. WCPO purse seine fishery: NMFS might decide to continue to rely on existing regulatory controls, such as, for purse seine vessels, the limits on the number of available licenses under SPTA regulations, and for longline vessels, the limits on the number of available permits under MSA regulations. For example, NMFS has determined that the United States is currently in full compliance with the longline vessel number limits of CMM 2013–01 by virtue of the Hawaii longline limited entry program. As long as the number of permits available under that program does not increase—and NMFS does not anticipate any such increase in the foreseeable future—the United States would remain in

compliance with the longline vessel number limits of CMM 2013–01.

Vessels are not guaranteed future participation in the U.S. WCPO purse seine or longline fisheries, regardless of their participation before or after the control date. Furthermore, NMFS might adopt a different control date or it might take an action that does not involve a control date.

If NMFS proceeds with a proposed rule, the scope of the rule might be expanded to implement additional provisions of CMM 2013–01.

Classification

This advance notice of proposed rulemaking has been determined to be not significant for the purposes of Executive Order 12866.

Authority: 16 U.S.C. 6901 *et seq.*

BILLING CODE P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

July 7, 2014.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c)

ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques and other forms of information technology.

Comments regarding this information collection received by August 11, 2014 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725-17th Street NW., Washington, DC, 20503. Commentors are encouraged to submit their comments to OMB via email to: OIRA_Submission@omb.eop.gov or fax (202) 395-5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250-7602. Copies of the submission(s) may be obtained by calling (202) 720-8681.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

30-day Federal Register Notice

Forest Service

Title: National Forest System Land Management Planning—Generic Collection

OMB Control Number: 0596-NEW

Summary Of Collection: Section 6 of the National Forest Management Act of 1976 (16 U.S.C. 1600 *et seq.*) and implementing regulations 36 CFR part 219 (2012 Planning Rule) direct the U.S. Forest Service to revise land management plans for each National Forest System unit every 15 years, and to continuously monitor conditions to inform interim or subsequent planning actions. The planning process requires public participation and involvement. As such, the agency will invite public participation broadly to facilitate public comments and submission of information that members of the public find to be relevant.

Need And Use Of The Information: To ensure that the Agency can be inclusive of, and responsive to, customer/stakeholder concerns during the development, assessment, and monitoring of National Forest System Land Management Plans, the agency will use a variety of methods, such as but not limited to, customer/stakeholder comment cards, focus groups, small discussion groups and surveys. Feedback and input will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communications, training, or changes in operations might improve delivery of products or services such as improved Land Management Planning or the implementation thereof.

Description Of Respondents:

Individuals or households; business or other for-profit; not-for-profit institutions; and State, Local, Tribal Government

Number Of Respondents: 37,250

Frequency Of Responses: Reporting; On occasion

Total Burden Hours: 63,000

Charlene Parker,

Departmental Information Collection Clearance Officer.

[FR Doc. 2014-16210 Filed 7-10-14; 8:45 am]

BILLING CODE 3411-15-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Alaska Pacific Halibut Fisheries: Subsistence (formerly titled: Alaska Pacific Halibut Fisheries: Special Subsistence Permits and Harvest Logs).

OMB Control Number: 0648-0512.

Form Number(s): NA.

Type of Request: Regular submission (revision and extension of a current information collection).

Number of Respondents: 3,806.

Average Hours Per Response: Permit applications and Subsistence Halibut

Registration Certificates, 10 minutes; Community harvest log, 30 minutes; Ceremonial or educational harvest log, 30 minutes; Appeal for permit denial, 4 hours; gear marking, 15 minutes per buoy.

Burden Hours: 1,379.

Needs and Uses: This request is for a revision and extension of a currently approved information collection.

This information collection describes special permits and certificates issued to participants in the Pacific halibut subsistence fishery in waters off the coast of Alaska and any appeals resulting from denials. The National Marine Fisheries Service (NMFS) designed the permits to work in conjunction with other halibut harvest assessment measures. Subsistence fishing for halibut has occurred for many years among the Alaska Native people and non-Native people. Special permits are initiated in response to the concerns of Native and community groups regarding increased restrictions in International Pacific Halibut Commission Area 2C and include Community Harvest Permits, Ceremonial Permits, and Educational Permits.

A Community Harvest Permit allows the community or Alaska Native tribe to appoint one or more individuals from its respective community or tribe to harvest subsistence halibut from a single vessel under reduced gear and harvest restrictions. Ceremonial and Educational Permits are available

exclusively to Alaska Native tribes. Eligible Alaska Native tribes may appoint only one Ceremonial Permit Coordinator per tribe for Ceremonial Permits or one authorized Instructor per tribe for Educational Permits.

Except for enrolled students fishing under a valid Educational Permit, special permits require persons fishing under them to also possess a Subsistence Halibut Registration Certificate (SHARC), formerly approved under OMB Control No. 0648-0460, now to be included in this information collection, which identifies those persons who are currently eligible for subsistence halibut fishing. Each of the instruments is designed to minimize the reporting burden on subsistence halibut fishermen while retrieving essential information. Along with the SHARC registration, gear-marking of subsistence halibut vessels has also been transferred from OMB Control No. 0648-0460.

Affected Public: Individuals or households.

Frequency: Annually and on occasion.

Respondent's Obligation: Required to obtain or maintain benefits.

This information collection request may be viewed at *reginfo.gov*. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or faxed to (202) 395-5806.

Dated: July 8, 2014

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

Economic Development Administration

Notice of Petitions by Firms for Determination of Eligibility to Apply for Trade Adjustment Assistance

AGENCY: Economic Development Administration, Department of Commerce.

ACTION: Notice and Opportunity for Public Comment.

Pursuant to Section 251 of the Trade Act 1974, as amended (19 U.S.C. 2341 et seq.), the Economic Development Administration (EDA) has received petitions for certification of eligibility to apply for Trade Adjustment Assistance from the firms listed below. Accordingly, EDA has initiated investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each of these firms contributed importantly to the total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

LIST OF PETITIONS RECEIVED BY EDA FOR CERTIFICATION ELIGIBILITY TO APPLY FOR TRADE ADJUSTMENT ASSISTANCE

[06/26/2014 through 07/07/2014]

Firm name	Firm address	Date accepted for investigation	Product(s)
Sheyenne Tooling and Manufacturing, Inc..	701 Lenham Ave, SW, Coopers town, ND 58425.	7/7/2014	The firm manufactures articles are made from metals, using metal fabrication processes.
Grrreat Creations, Inc.	597 Shawnee Street, Nappanee, IN 46550.	7/7/2014	The firm manufactures and machines aluminum truck cap and lid clamps, both standard and special design.

Any party having a substantial interest in these proceedings may request a public hearing on the matter. A written request for a hearing must be submitted to the Trade Adjustment Assistance for Firms Division, Room 71030, Economic Development Administration, U.S. Department of Commerce, Washington, DC 20230, no later than ten (10) calendar days following publication of this notice.

Please follow the requirements set forth in EDA's regulations at 13 CFR 315.9 for procedures to request a public hearing. The Catalog of Federal Domestic Assistance official number

and title for the program under which these petitions are submitted is 11.313, Trade Adjustment Assistance for Firms.

Dated: July 7, 2014.

Michael DeVillo,

Eligibility Examiner.

[A-552-801]

Certain Frozen Fish Fillets from the Socialist Republic of Vietnam: Preliminary Results of the Antidumping Duty Administrative Review; 2012-2013

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce ("the Department") is conducting the

tenth administrative review of the antidumping duty order on certain frozen fish fillets (“fish fillets”) from the Socialist Republic of Vietnam (“Vietnam”).¹ The Department preliminarily determines that the Hung Vuong Group (“HVG”)² sold subject merchandise in the United States at prices below normal value (“NV”) during the period of review (“POR”) August 1, 2012, through July 31, 2013. With respect to Anvifish Joint Stock Company (“Anvifish”), this exporter failed to establish that it is separate from the Vietnam-wide entity. As a result, the Vietnam-wide entity is now under review.³ We are preliminarily applying adverse facts available (“AFA”) to the Vietnam-wide entity because an element of the entity, Anvifish, failed to act to the best of its ability in complying with the Department’s request for information in this review within the established deadlines, significantly impeded the proceeding, and provided information that cannot be verified. If these preliminary results are adopted in the final results, the Department will instruct U.S. Customs and Border Protection (“CBP”) to assess antidumping duties on all appropriate entries of subject merchandise during the POR. Interested parties are invited to comment on these preliminary results.

DATES: *Effective Date:* July 11, 2014.

FOR FURTHER INFORMATION CONTACT: Paul Walker or Steven Hampton, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone 202–482–0413 or 202–482–0116, respectively.

SUPPLEMENTARY INFORMATION:

¹ See *Notice of Antidumping Duty Order: Certain Frozen Fish Fillets from the Socialist Republic of Vietnam*, 68 FR 47909 (August 12, 2003) (“Order”).

² The Department previously found that An Giang Fisheries Import & Export Joint Stock Company (“Agifish”) is a member of the Hung Vuong Group, which also includes Asia Pangasius Company Limited, Europe Joint Stock Company, Hung Vuong Joint Stock Company, Hung Vuong Mascato Company Limited, Hung Vuong—Vinh Long Co., Ltd., and Hung Vuong—Sa Dec Co., Ltd. See *Certain Frozen Fish Fillets From the Socialist Republic of Vietnam: Final Results of the Antidumping Duty Administrative Review and New Shipper Review; 2011–2012*, 79 FR 19053 (April 7, 2014).

³ On November 4, 2013, the Department announced a change in practice with respect to the conditional review of the NME entity. See *Antidumping Proceedings; Announcement of Change in Department Practice for Respondent Selection in Antidumping Duty Proceedings and Conditional Review of the Nonmarket Economy Entity in NME Antidumping Proceedings*, 78 FR 65963 (Nov. 4, 2013). This review initiated before this change in practice became effective; therefore, the Department’s new practice does not apply to this segment.

Background

On October 2, 2013, the Department initiated the tenth administrative review of the antidumping duty order on fish fillets from Vietnam for the period August 1, 2012, through July 31, 2013.⁴ As explained in the memorandum from the Assistant Secretary for Enforcement and Compliance, the Department exercised its discretion to toll deadlines for the duration of the closure of the Federal Government from October 1 through October 16, 2013.⁵ On March 26, 2014, the Department partially extended the deadline for issuing the preliminary results by 30 days.⁶ On June 11, 2014, the Department partially extended the deadline for issuing the preliminary results by 14 days.⁷ The revised deadline for the preliminary results of this administrative is now July 2, 2014.

Scope of the Order

The product covered by the order is frozen fish fillets, including regular, shank, and strip fillets and portions thereof, whether or not breaded or marinated, of the species *Pangasius bocourti*, *Pangasius hypophthalmus* (also known as *Pangasius pangasius*), and *Pangasius micronemus*. These products are classifiable under tariff article codes 0304.29.6033, 0304.62.0020, 0305.59.0000, 0305.59.4000, 1604.19.2000, 1604.19.2100, 1604.19.3000, 1604.19.3100, 1604.19.4000, 1604.19.4100, 1604.19.5000, 1604.19.5100, 1604.19.6100, and 1604.19.8100 (Frozen Fish Fillets of the

⁴ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part*, 78 FR 60834 (October 2, 2013) (“Initiation Notice”). On November 8, 2013, the Department published a second notice to list two companies that were inadvertently omitted from the *Initiation Notice*. See *Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part*, 78 FR 67104 (November 8, 2013).

⁵ See Memorandum for the Record from Paul Piquado, Assistant Secretary for Enforcement and Compliance, “Deadlines Affected by the Shutdown of the Federal Government” (October 18, 2013).

⁶ See Memorandum to Gary Taverman, Senior Advisor for Antidumping and Countervailing Duty Operations, through James C. Doyle, Director, Office V, Antidumping and Countervailing Duty Operations regarding “Certain Frozen Fish Fillets from the Socialist Republic of Vietnam: Extension of Deadline for Preliminary Results of 2012–2013 Antidumping Duty Administrative Review,” dated March 26, 2014.

⁷ See Memorandum to Gary Taverman, Senior Advisor for Antidumping and Countervailing Duty Operations, through James C. Doyle, Director, Office V, Antidumping and Countervailing Duty Operations regarding “Certain Frozen Fish Fillets from the Socialist Republic of Vietnam: Extension of Deadline for Preliminary Results of 2012–2013 Antidumping Duty Administrative Review,” dated June 11, 2014.

species *Pangasius* including basa and tra) of the Harmonized Tariff Schedule of the United States (“HTSUS”).⁸ Although the HTSUS subheading is provided for convenience and Customs purposes, our written description of the scope of the order is dispositive.⁹

Preliminary Determination of No Shipments

On December 11, 2013, the following companies filed no-shipment certifications indicating that they did not export subject merchandise to the United States during the POR: An Giang Agriculture and Food Import-Export Joint Stock Company; Golden Quality Seafood Corporation; Hoa Phat Seafood Import-Export and Processing J.S.C.; and To Chau Joint Stock Company. Based on the certifications submitted by the above companies, and our analysis of the CBP information, we preliminarily determine that An Giang Agriculture and Food Import-Export Joint Stock Company, Golden Quality Seafood Corporation, Hoa Phat Seafood Import-Export and Processing J.S.C., and To Chau Joint Stock Company¹⁰ did not have any reviewable transactions during the POR. The Department finds that consistent with its practice in non-market economy (“NME”) cases, it is appropriate not to rescind the review in part in this circumstance but, rather, to complete the review with respect to the above named companies and issue appropriate instructions to CBP based on the final results of the review.¹¹

⁸ Until July 1, 2004, these products were classifiable under HTSUS 0304.20.6030 (Frozen Catfish Fillets), 0304.20.6096 (Frozen Fish Fillets, NESOI), 0304.20.6043 (Frozen Freshwater Fish Fillets), and 0304.20.6057 (Frozen Sole Fillets). Until February 1, 2007, these products were classifiable under HTSUS 0304.20.6033 (Frozen Fish Fillets of the species *Pangasius*, including basa and tra). On March 2, 2011, the Department added two HTSUS numbers at the request of U.S. Customs and Border Protection (“CBP”): 1604.19.2000 and 1604.19.3000. On January 30, 2012, the Department added eight HTSUS numbers at the request of CBP: 0304.62.0020, 0305.59.0000, 1604.19.2100, 1604.19.3100, 1604.19.4100, 1604.19.5100, 1604.19.6100, and 1604.19.8100.

⁹ See “Certain Frozen Fish Fillets from the Socialist Republic of Vietnam: Decision Memorandum for the Preliminary Results of the 2012–2013 Antidumping Duty Administrative Review,” dated concurrently with and hereby adopted by this notice (“Preliminary Decision Memorandum”), for a complete description of the Scope of the Order.

¹⁰ See Memorandum to the File through Scot T. Fullerton, Program Manager, Office V, Enforcement and Compliance, through Steven Hampton, International Trade Compliance Analyst, Office V, Enforcement and Compliance, regarding “2012–2013 Administrative Review of Certain Frozen Fish Fillets from the Socialist Republic of Vietnam,” dated February 28, 2014.

¹¹ See *Non-Market Economy Antidumping Proceedings; Assessment of Antidumping Duties*, 76 FR 65694, 65694–65695 (October 24, 2011).

Methodology

The Department conducted this review in accordance with sections 751(a)(1)(B) and 751(a)(2)(A) of the Tariff Act of 1930, as amended (“the Act”). Constructed export prices and export prices have been calculated in accordance with section 772 of the Act. Because Vietnam is an NME within the meaning of section 771(18) of the Act, NV has been calculated in accordance with section 773(c) of the Act.

For a full description of the methodology underlying our

conclusions, see the Preliminary Decision Memorandum. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (“IA ACCESS”). IA ACCESS is available to registered users at <http://iaaccess.trade.gov>, and is available to all parties in the Central Records Unit, room 7046 of the main Department of Commerce building. In addition, a complete version of the Preliminary

Decision Memorandum can be accessed directly on the Internet at <http://enforcement.trade.gov/frn/>. The signed Preliminary Decision Memorandum and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Preliminary Results of Review

The Department preliminarily determines that the following weighted-average dumping margins exist for the period August 1, 2012, through July 31, 2013:

Exporter	Weighted-average margin (dollars/kilogram) ¹²
Hung Vuong Group ¹³	0.58
An Giang Agriculture and Food Import-Export Joint Stock Company	(*)
Asia Commerce Fisheries Joint Stock Company	0.58
Binh An Seafood Joint Stock Company	0.58
Cadovimex II Seafood Import-Export and Processing Joint Stock Company	0.58
Can Tho Import-Export Joint Stock Company	0.58
C.P. Vietnam Corporation	0.58
Cuu Long Fish Joint Stock Company	0.58
Dai Thanh Seafoods Company Limited	0.58
Fatfish Company Limited	0.58
GODACO Seafood Joint Stock Company	0.58
Golden Quality Seafood Corporation	(*)
Hiep Thanh Seafood Joint Stock Company	0.58
Hoang Long Seafood Processing Company Limited	0.58
Hoa Phat Seafood Import-Export and Processing J.S.C.	(*)
International Development and Investment Corporation	0.58

To Chau Joint Stock Company	(*)
Vinh Quang Fisheries Joint-Stock Company	0.58
Vietnam-Wide Rate ¹⁵	2.39

* No Shipments or sales to this review, and the firm has an individual rate from a prior segment of the proceeding in which the firm had shipments or sales.

Disclosure, Public Comment & Opportunity To Request a Hearing

The Department will disclose the calculations used in our analysis to

parties in this review within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Interested parties may submit case briefs within 30 days after the date of publication of these preliminary results of review in the **Federal Register**.¹⁶ Rebuttals to case briefs, which must be limited to issues raised in the case briefs, must be filed within five days after the time limit for filing case briefs.¹⁷ Parties who submit arguments are requested to submit with the argument (a) a statement of the issue, (b) a brief summary of the argument, and (c)

¹² In the third administrative review of this order, the Department determined that it would calculate per-unit assessment and cash deposit rates for all future reviews. See *Certain Frozen Fish Fillets from the Socialist Republic of Vietnam: Final Results of Antidumping Duty Administrative Review and Partial Rescission*, 73 FR 15479 (March 24, 2008).

¹³ This rate is applicable to the Hung Vuong Group, which includes: An Giang Fisheries Import and Export Joint Stock Company, Asia Pangasius Company Limited, Europe Joint Stock Company, Hung Vuong Joint Stock Company, Hung Vuong Mascato Company Limited, Hung Vuong—Vinh Long Co., Ltd., and Hung Vuong—Sa Dec Co., Ltd.

¹⁴ This rate is also applicable to QVD Dong Thap Food Co., Ltd. (“Dong Thap”) and Thuan Hung Co., Ltd. (“THUFICO”). In the second review of this order, the Department found QVD, Dong Thap and THUFICO to be a single entity, and because there has been no evidence submitted on the record of this review that calls this determination into question, we continue to find these companies to be part of a single entity. Therefore, we will assign this rate to the companies in the single entity. See *Certain Frozen Fish Fillets from the Socialist Republic of Vietnam: Preliminary Results of Antidumping Duty Administrative Review*, 71 FR 53387 (September 11, 2006).

¹⁵ The Vietnam-wide rate includes the following companies which are under review, but which did not submit a separate rate application or

certification: East Seafoods Limited Liability Company and Anvifish Joint Stock Company.

¹⁶ See 19 CFR 351.309(c)(1)(ii).

¹⁷ See 19 CFR 351.309(d)(1)–(2).

a table of authorities.¹⁸ Parties submitting briefs should do so pursuant to the Department's electronic filing system, IA ACCESS.

Any interested party may request a hearing within 30 days of publication of this notice.¹⁹ Hearing requests should contain the following information: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. Oral presentations will be limited to issues raised in the briefs. If a request for a hearing is made, parties will be notified of the time and date for the hearing to be held at the U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.²⁰

The Department intends to issue the final results of this administrative review, which will include the results of our analysis of all issues raised in the case briefs, within 120 days of publication of these preliminary results in the **Federal Register**, pursuant to section 751(a)(3)(A) of the Act.

Assessment Rates

Upon issuance of the final results, the Department will determine, and CBP shall assess, antidumping duties on all appropriate entries covered by this review.²¹ The Department intends to issue assessment instructions to CBP 15 days after the publication date of the final results of this review.

For any individually examined respondent whose weighted average dumping margin is above *de minimis* (*i.e.*, 0.50 percent) in the final results of this review, the Department will calculate importer-specific assessment rates on the basis of the ratio of the total amount of dumping calculated for the importer's examined sales to the total entered value of sales, in accordance with 19 CFR 351.212(b)(1). Where an importer- (or customer-) specific *ad valorem* rate is greater than *de minimis*, the Department will instruct CBP to collect the appropriate duties at the time of liquidation.²² Where either a respondent's weighted average dumping margin is zero or *de minimis*, or an importer- (or customer-) specific *ad valorem* is zero or *de minimis*, the Department will instruct CBP to liquidate appropriate entries without regard to antidumping duties.²³ For the respondents that were not selected for individual examination in this

administrative review and that qualified for a separate rate, the assessment rate will be the rate calculated for HVG.²⁴ We intend to instruct CBP to liquidate entries containing subject merchandise exported by the Vietnam-wide entity at the Vietnam-wide rate.

The Department refined its assessment practice in NME cases. Pursuant to this refinement in practice, for entries that were not reported in the U.S. sales databases submitted by companies individually examined during the administrative review, the Department will instruct CBP to liquidate such entries at the Vietnam-wide rate. Additionally, if the Department determines that an exporter had no shipments of the subject merchandise, any suspended entries that entered under that exporter's case number (*i.e.*, at that exporter's rate) will be liquidated at the Vietnam-wide rate.²⁵

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this review for shipments of the subject merchandise from Vietnam entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by sections 751(a)(2)(C) of the Act: (1) For the companies listed above that have a separate rate, the cash deposit rate will be that established in the final results of this review (except, if the rate is zero or *de minimis*, then zero cash deposit will be required); (2) for previously investigated or reviewed Vietnam and non-Vietnam exporters not listed above that received a separate rate in a prior segment of this proceeding, the cash deposit rate will continue to be the existing exporter-specific rate; (3) for all Vietnam exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be that for the Vietnam-wide entity; and (4) for all non-Vietnam exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the Vietnam exporter that supplied that non-Vietnam exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a preliminary reminder to importers of

their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during the POR. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This preliminary determination is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: July 2, 2014.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Diamond Sawblades and Parts Thereof from the People's Republic of China: Final Results of the Expedited Sunset Review of the Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) finds that revocation of the antidumping duty order on diamond sawblades and parts thereof (diamond sawblades) from the People's Republic of China (the PRC) would be likely to lead to continuation or recurrence of dumping as indicated in the "Final Results of Sunset Review" section of this notice.

DATES: *Effective Date:* July 11, 2014.

and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-5760 or (202) 482-1690, respectively.

SUPPLEMENTARY INFORMATION:

Background

In accordance with 19 CFR 351.218(d)(1)(i) and (ii), the Department received notices of intent to participate in this sunset review from Diamond Sawblades Manufacturers Coalition and Husqvarna Construction Products North America (collectively, the domestic interested parties) within 15 days after the date of publication of the *Initiation Notice*.¹ The domestic interested parties claimed interested party status under section 771(9)(A), (C), and (F) of the Tariff Act of 1930, as amended (the Act).

The Department received adequate substantive responses to the *Initiation Notice* from the domestic interested parties within the 30-day period specified in 19 CFR 351.218(d)(3)(i). The Department received no substantive response from any respondent interested parties. In accordance with section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), the Department conducted an expedited (120-day) sunset review of the antidumping duty order on diamond sawblades from the PRC.

Scope of the Order

The merchandise subject to the order is diamond sawblades. The diamond sawblades subject to the order are currently classifiable under subheadings 8202 to 8206 of the Harmonized Tariff Schedule of the United States (HTSUS), and may also enter under 6804.21.00. While the HTSUS subheadings are provided for convenience and customs purposes, the written description is dispositive. A full description of the scope of the order is contained in the Issues and Decision Memorandum.²

Analysis of Comments Received

All issues raised in this review are addressed in the Issues and Decision Memorandum, including the likelihood

¹ See *Initiation of Five-year ("Sunset") Review*, 78 FR 72061 (December 2, 2013) (*Initiation Notice*) and *Diamond Sawblades and Parts Thereof From the People's Republic of China and the Republic of Korea: Antidumping Duty Orders*, 74 FR 57145 (November 4, 2009).

² See the Memorandum from Deputy Assistant Secretary Christian Marsh to Acting Assistant Secretary Ronald K. Lorentzen entitled "Issues and Decision Memorandum for the Final Results of Expedited First Sunset Review of the Antidumping Duty Order on Diamond Sawblades and Parts Thereof from the People's Republic of China" dated concurrently with and hereby adopted by this notice (Issues and Decision Memorandum).

of continuation or recurrence of dumping in the event of revocation and the magnitude of dumping margins likely to prevail if the order was revoked. Parties can find a complete discussion of all issues raised in this review and the corresponding recommendations in the Issues and Decision Memorandum, which is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (IA ACCESS). IA ACCESS is available to registered users at <http://iaaccess.trade.gov> and to all parties in the Central Records Unit in Room 7046 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly on the internet at <http://enforcement.trade.gov/frn/index.html>. The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

Final Results of Sunset Review

The Department determines that revocation of the antidumping duty order on diamond sawblades from the PRC would be likely to lead to continuation or recurrence of dumping at weighted-average margins up to 164.09 percent.

Notification to Interested Parties

This notice serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a). Timely written notification of the destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

The Department is issuing and publishing the final results and notice in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act and 19 CFR 351.221(c)(5)(ii).

Dated: July 7, 2014.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Solid Urea from the Russian Federation: Preliminary Results of Antidumping Duty Administrative Review; 2012-2013

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is conducting an administrative review of the antidumping duty order on solid urea from the Russian Federation (Russia). The period of review (POR) is July 1, 2012, through June 30, 2013. The review covers one producer/exporter of the subject merchandise, MCC EuroChem (EuroChem). We preliminarily find that EuroChem has not sold subject merchandise at less than normal value during the POR. Interested parties are invited to comment on these preliminary results.

DATES: *Effective Date:* July 11, 2014.

SUPPLEMENTARY INFORMATION:

Scope of the Order

The merchandise subject to the order is solid urea. The product is currently classified under the Harmonized Tariff Schedules of the United States (HTSUS) item number 3102.10.00.00. The HTSUS subheading is provided for convenience and customs purposes. A full description of the scope of the order is contained in the memorandum from Gary Taverman, Senior Advisor for Antidumping and Countervailing Duty Operations, to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, "Decision Memorandum for Preliminary Results of Antidumping Duty Administrative Review: Solid Urea from the Russian Federation" dated concurrently with this notice (Preliminary Decision Memorandum), which is hereby adopted by this notice. The written description is dispositive.

The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized

Electronic Service System (IA ACCESS). Access to IA ACCESS is available to registered users at <http://iaaccess.trade.gov>, and it is available to all parties in the Central Records Unit, room 7046 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the Internet at <http://enforcement.trade.gov/frn/index.html>. A list of the topics discussed in the Preliminary Decision Memorandum is attached as an Appendix to this notice. The signed Preliminary Decision Memorandum and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Methodology

The Department conducted this review in accordance with section 751(a)(2) of the Tariff Act of 1930, as amended (the Act). Constructed export price is calculated in accordance with section 772 of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our conclusions, see Preliminary Decision Memorandum.

Preliminary Results of the Review

As a result of this review, we preliminarily determine that a dumping margin of 0.00 percent exists for EuroChem for the period July 1, 2012, through June 30, 2013.

Disclosure and Public Comment

We intend to disclose the calculations performed to parties in this proceeding within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b). Pursuant to 19 CFR 351.309(c), interested parties may submit cases briefs not later than 30 days after the date of publication of this notice. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.¹ Parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.²

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via IA ACCESS. An electronically filed document must be

received successfully in its entirety by the Department's electronic records system, IA ACCESS, by 5 p.m. Eastern Time within 30 days after the date of publication of this notice.³ Requests should contain: (1) The party's name, address and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective case briefs.

The Department intends to issue the final results of this administrative review, including the results of its analysis of the issues raised in any written briefs, not later than 120 days after the date of publication of this notice, pursuant to section 751(a)(3)(A) of the Act.

Assessment Rates

Upon completion of the administrative review, the Department shall determine and U.S. Customs and Border Protection (CBP) shall assess antidumping duties on all appropriate entries. If EuroChem's weighted-average dumping margin is not zero or *de minimis* in the final results of this review, we will calculate importer-specific assessment rates on the basis of the ratio of the total amount of antidumping duties calculated for an importer's examined sales and the total entered value of such sales in accordance with 19 CFR 351.212(b)(1). If EuroChem's weighted-average dumping margin continues to be zero or *de minimis* in the final results of review, we will instruct CBP not to assess duties on any of its entries in accordance with the *Final Modification for Reviews, i.e.,* "{w}here the weighted-average margin of dumping for the exporter is determined to be zero or *de minimis*, no antidumping duties will be assessed."⁴

The Department clarified its "automatic assessment" regulation on May 6, 2003.⁵ This clarification will apply to entries of subject merchandise during the POR produced by EuroChem for which it did not know its merchandise was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate of 64.93 percent⁶ if there is no rate for the

intermediate company(ies) involved in the transaction.

We intend to issue instructions to CBP 15 days after publication of the final results of this review.

Cash Deposit Requirements

The following deposit requirements will be effective upon publication of the notice of final results of administrative review for all shipments of solid urea from Russia entered, or withdrawn from warehouse, for consumption on or after the date of publication as provided by section 751(a)(2) of the Act: (1) The cash deposit rate for EuroChem will be the rate established in the final results of this administrative review; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation but the manufacturer is, the cash deposit rate will be the rate established for the manufacturer of the merchandise for the most recently completed segment of this proceeding; (4) the cash deposit rate for all other manufacturers or exporters will continue to be 64.93 percent.⁷ These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: July 3, 2014.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

National Oceanic and Atmospheric Administration

RIN 0648-XD364

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council's (Council) Risk Policy Working Group will meet to consider actions affecting New England fisheries in the exclusive economic zone (EEZ).

DATES: The meeting will be held on Tuesday, July 29, 2014 at 10 a.m.

ADDRESSES: The meeting will be held at the Hampton Inn & Suites, 2100 Post Road, Warwick, RI; telephone: (401) 739-8888.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492.

SUPPLEMENTARY INFORMATION: The items of discussion in the committee and advisory panel's agenda are: The Risk Policy Working Group will continue the development of a risk policy to serve as guidance for ABC (acceptable biological catch) control rules and annual catch limits (ACLs) for Council-managed species. They will develop a Risk Policy Statement, to be reviewed by the Council's Scientific and Statistical Committee (SSC) in August and approved by the Council at its September 2014 meeting. Also on the agenda will be the review and discussion on baseline conditions related to overfishing definitions, ABC

control rules, and harvest control rules in Council-managed FMPs. They will discuss the next steps for applying the Risk Policy Statement across Council-managed FMPs and address other business as necessary.

Although non-emergency issues not contained in this agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies (see **ADDRESSES**) at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: July 8, 2014.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XD373

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Pacific Fishery Management Council's (Pacific Council) Highly Migratory Species Management Team (HMSMT) will hold a webinar, which is open to the public.

DATES: The HMSMT will hold the webinar on Tuesday, July 29, 2014 from 9 a.m. to noon, Pacific Time.

ADDRESSES: To attend the webinar, visit <http://www.joinwebinar.com>. Enter the Webinar ID: 493-503-175, and your name and email address (required). Once you have joined the webinar, choose either your computer's audio or select "Use Telephone." If you do not select "Use Telephone" you will be

connected to audio using your computer's microphone and speakers (VoIP). It is recommended that you use a computer headset, as GoToMeeting allows you to listen to the meeting using your computer headset and speakers. If you do not have a headset and speakers, you may use your telephone for the audio portion of the meeting by dialing this TOLL number 1-480-297-0021 (not a toll-free number); phone audio access code 861-856-225; audio phone pin shown after joining the webinar. System requirements for PC-based attendees: Required: Windows® 7, Vista, or XP; for Mac®-based attendees: Required: Mac OS® X 10.5 or newer; and for mobile attendees: Required: iPhone®, iPad®, Android™ phone or Android tablet (See the GoToMeeting Webinar Apps). You may also send an email to Mr. Kris Kleinschmidt or contact him at 503-820-2280 for technical assistance. A listening station will also be provided at the Pacific Council office.

Council address: Pacific Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220-1384.

FOR FURTHER INFORMATION CONTACT: Dr. Kit Dahl, Pacific Council; telephone: (503) 820-2422.

SUPPLEMENTARY INFORMATION: The HMSMT will discuss the development of alternatives and analyses for issues to be addressed as part of the HMS biennial harvest specifications and management measures process. Of the issues identified at the June Pacific Council meeting, the Pacific Council assigned highest priority to reducing recreational catch of Pacific bluefin tuna and identifying take caps ("hard caps") for selected protected species (marine mammals and sea turtles) for the California drift gillnet fishery. The HMSMT may also discuss exempted fishing permit review and monitoring requirements for proposed management measures. The HMSMT will report on their work at the September 12-17, 2014, Council meeting in Spokane, WA.

Public comments during the webinar will be received from attendees at the discretion of the HMSMT Chair.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt at (503) 820-2280 at least 5 days prior to the meeting date.

Dated: July 8, 2014.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED**Procurement List; Proposed Addition and Deletions**

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Addition to and Deletions from the Procurement List.

SUMMARY: The Committee is proposing to add a service to the Procurement List that will be provided by a nonprofit agency employing persons who are blind or have other severe disabilities, and deletes products previously furnished by such agencies.

DATES: *Comments Must Be Received On Or Before:* 8/11/2014.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 10800, Arlington, Virginia, 22202-4149.

For Further Information or To Submit Comments Contact: Barry S. Lineback, Telephone: (703) 603-7740, Fax: (703) 603-0655, or email *CMTEFedReg@AbilityOne.gov*.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Addition

If the Committee approves the proposed addition, the entities of the Federal Government identified in this notice will be required to procure the service listed below from the nonprofit agency employing persons who are blind or have other severe disabilities.

The following service is proposed for addition to the Procurement List for production by the nonprofit agency listed:

Service

Service Type/Location: Janitorial Service, U.S. Geological Survey, Illinois Water Science Center, 1201 W. University Avenue, Suite 100, Urbana, IL

NPA: United Cerebral Palsy of the Land of Lincoln, Springfield, IL

Contracting Activity: Dept of the Interior, Geological Survey, Eastern Region Acquisition and Grants Branch, Reston, VA

Deletions

The following products are proposed for deletion from the Procurement List:

Products

NSN: 2510-01-251-8548—Blanket, Insulation, Thermal, Vehicular

NSN: 2510-01-251-9995—Panel, Insulation, Vehicular, Interior Left Hand Front Tunnel

NSN: 2510-01-335-7363—Panel, Insulation, Vehicular, Interior Right Hand Front Tunnel

NSN: 2510-01-421-8067—Panel, Insulation, Vehicular, Cab

NPA: New York City Industries for the Blind, Inc., Brooklyn, NY

Contracting Activity: Defense Logistics Agency Land and Maritime, Columbus, OH

Label, Pressure-Sensitive Adhesive

BILLING CODE 6353-01-P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to and Deletions from the Procurement List.

SUMMARY: This action adds products to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes products from the Procurement List previously furnished by such agencies.

DATES: *Effective Date:* 8/11/2014.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 10800, Arlington, Virginia, 22202-4149.

FOR FURTHER INFORMATION CONTACT: Barry S. Lineback, Telephone: (703) 603-7740, Fax: (703) 603-0655, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION:

Additions

On 5/16/2014 (79 FR 28490-28491) and 6/6/2014 (79 FR 32716-32718), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the products and impact of the additions on the current or most recent contractors, the Committee has determined that the products listed below are suitable for procurement by the Federal Government under 41 U.S.C. 8501-8506 and 41 CFR 51-2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products to the Government.

2. The action will result in authorizing small entities to furnish the products to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501-8506) in connection with the products proposed for addition to the Procurement List.

End of Certification

Accordingly, the following products are added to the Procurement List:

Products

NSN: 7510-00-290-2026—Tape, Masking & Packaging, General Purpose

NPA: Cincinnati Association for the Blind, Cincinnati, OH

Contracting Activity: General Services Administration, New York, NY

Coverage: A-List for the Total Government Requirement as aggregated by the General Services Administration, New York, NY.

Dry Erase White Board

NSN: 7110-00-NIB-2207—Magnetic Porcelain Surface, Mahogany Finish, Top-Bottom-Side Rails, 36" x 24"

NSN: 7110-01-334-7078—Magnetic Porcelain Surface, Oak Finish, 24" x 18"

NSN: 7110-01-334-7081—Magnetic Porcelain Surface, Oak Finish, 60" x 36"

Coverage: B-List for the Broad Government Requirement, as aggregated by the General Services Administration, Arlington, VA.

NSN: 7110-00-NIB-2201—Magnetic Porcelain Surface, Mahogany Finish, 36" x 24"

NSN: 7110-00-NIB-2202—Magnetic Porcelain Surface, Mahogany Finish, 48" x 36"

NSN: 7110-00-NIB-2203—Magnetic Porcelain Surface, Mahogany Finish, 72" x 48"

NSN: 7110-00-NIB-2204—Melamine Surface, Oak Finish, 36" x 24"

NSN: 7110-00-NIB-2205—Melamine Surface, Oak Finish, 48" x 36"

NSN: 7110-00-NIB-2208—Magnetic Porcelain Surface, Mahogany Finish, Top-Bottom-Side, 48" x 36"

NSN: 7110-00-NIB-2209—Magnetic Porcelain Surface, Mahogany Finish, Top-Bottom-Side Rails, 72" x 48"

NSN: 7110-01-334-7079—Magnetic Porcelain Surface, Oak Finish, 36" x 24"

NSN: 7110-01-334-7080—Magnetic Porcelain Surface, Oak Finish, 48" x 36"

NSN: 7110-01-334-7082—Magnetic Porcelain Surface, Oak Finish, 72" x 48"

Coverage: A-List for the Total Government Requirement, as aggregated by the General Services Administration, Arlington, VA.

NPA: The Lighthouse for the Blind, Inc. (Seattle Lighthouse), Seattle, WA

Contracting Activity: General Services Administration, FSS Household and Industrial Furniture, Arlington, VA

NSN: 5120-00-900-6103—Hammer—3 lb, Cross-Peen, 15" Fiberglass Handle, Cushioned Grip

NPA: Keystone Vocational Services, Inc., Sharon, PA

Contracting Activity: General Services Administration, Kansas City, MO

Coverage: B-List for the Broad Government Requirement as aggregated by the General Services Administration, Kansas City, MO.

NSN: MR 896—Turner, Flexible, Thin, 11.5" X 12" X 4"

NSN: MR 335—Squeezer, Citrus, Aluminum

NSN: MR 332—Peeler, Corn

NSN: MR 331—Pitter, Cherry and Olive

NPA: Cincinnati Association for the Blind, Cincinnati, OH

NSN: MR 604—Drinking Straws, Flexible, Clear, 180ct

NSN: MR 10674—Funnel, Collapsible

NSN: MR 10679—Baster, Bottletop

NSN: MR 10663—Pouf Balls, Bath, Toddler

NPA: Winston-Salem Industries for the Blind, Inc., Winston-Salem, NC

NSN: MR 399—Set, Cookie Cutter, Assorted, 3PC
 NPA: Industries for the Blind, Inc., West Allis, WI

Contracting Activity: Defense Commissary Agency, Fort Lee, VA
Coverage: C-List for the requirements of military commissaries and exchanges as aggregated by the Defense Commissary Agency, Fort Lee, VA.

NSN: 6850-01-560-6131—Calcium, Lime, and Rust Remover, 5 GL
 NPA: The Lighthouse for the Blind, St. Louis, MO

Contracting Activity: Defense Logistics Agency Aviation, Richmond, VA
Coverage: A-List for the Total Government Requirement as aggregated by the Defense Logistics Agency Aviation, Richmond, VA.

Deletions

On 6/6/2014 (79 FR 32716-32718), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the products listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501-8506 and 41 CFR 51-2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the products to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501-8506) in connection with the products deleted from the Procurement List.

End of Certification

Accordingly, the following products are deleted from the Procurement List:

Products

Ergo Aluminum Broom Handle & Mophead
 NSN: 7920-01-503-1669
 NSN: 7920-01-503-1670
 NSN: 7920-01-503-1671

CONSUMER PRODUCT SAFETY COMMISSION

Announcement of Carbon Monoxide Safety Poster Contest Under the America COMPETES Reauthorization Act of 2011

AGENCY: U.S. Consumer Product Safety Commission. **ACTION:** Notice

SUMMARY: To raise awareness of the dangers of carbon monoxide in the home, the Consumer Product Safety Commission (CPSC) announces a poster contest for children in grades six, seven, and eight under section 105 of the America COMPETES Reauthorization Act of 2011, 15 U.S.C. 3719 (America COMPETES Act).

DATES: Entries will be accepted from July 14, 2014 until 11:59 p.m. EDT on February 27, 2015. CPSC expects to complete judging on or about May 1, 2015 and will award prizes soon thereafter.

FOR FURTHER INFORMATION CONTACT:

Patty Davis, Public Affairs Specialist, Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone (301) 504-7601; pdavis@cpsc.gov, or visit www.cpsc.gov/COcontest.

SUPPLEMENTARY INFORMATION: CPSC is charged with protecting the public from unreasonable risks of injury or death from thousands of types of consumer products under the agency's jurisdiction. CPSC has issued more than 13,000 consumer product recalls since the agency's creation in 1973.

To raise awareness of the danger of carbon monoxide (CO) gas, CPSC will administer a nationwide CO safety poster contest to help alert consumers, and children in particular, to the dangers of CO in the home.

Contest Requirements and Rules

1. *Subject of the Contest.* A key mission of the CPSC is to empower consumers with safety information. This contest seeks to help raise awareness about the dangers of CO in the home.

Potential topics include:

- how to recognize CO exposure and CO exposure symptoms;
- facts about CO: you cannot see it or smell it;

- what steps to take to protect against CO poisoning; and

2. *Eligibility.* To be eligible to participate in CPSC's CO Poster Contest and win a prize, a contestant must:

- be an individual who is a citizen or permanent resident of the United States;
- be in, or about to enter, the sixth, seventh, or eighth grade at the time of submission;
- not be a federal employee acting in the scope of the employee's employment;

- not be a child of a CPSC employee;
- not submit more than one poster;
- provide a completed and signed

Contest Submission and Parental Consent Form (available on:

www.cpsc.gov/COcontest);

- have complied with all requirements of this Notice, the official contest rules posted at: www.cpsc.gov/COcontest/, and all requirements of the America COMPETES Act.

The rules in this Notice supplement the rules on the www.cpsc.gov/COcontest/ Web site. If there is a conflict between any requirement stated on www.cpsc.gov/COcontest/ and the provisions of this Notice, the provisions of this Notice will govern. Entries must comply with form, content, eligibility, and other requirements set forth in this Notice and on the www.cpsc.gov/COcontest/ Web site.

3. *How to Enter.* Contestants may submit entries between July 14, 2014 and February 27, 2015. Only one poster per contestant may be submitted; all entries must be received by CPSC not later than 11:59 p.m. EDT, February 27, 2015.

- Contestant must create the poster without assistance from others. The poster must not have been submitted to any prior CPSC poster contest or published previously. The poster must not contain any elements that violate a third party's copyright, trademark, or other intellectual property rights.

- Entries must consist of one piece of original artwork (poster) and a completed *Contest Submission and Parental Consent Form* submitted through the contest Web site at: www.cpsc.gov/COcontest. Uploaded files should be in the form of either a PDF or JPG, and each file must be no larger than one megabyte.

- Teachers are encouraged to submit poster entries for their students. However, to be eligible for a prize, each student must satisfy contest requirements, and each entry must include a completed and signed *Contest Submission and Parental Consent Form*.
- Once a poster is entered, a contestant cannot make any changes or

alterations to the poster. CPSC expects to complete judging on or about May 1, 2015.

- CPSC will not consider contest entries on topics other than carbon monoxide (CO).
- By submitting an entry (including the completed and signed *Contest Submission and Parental Consent Form*) to the contest, the contestant and the contestant's parent or guardian agrees to be bound by the contest's Official Rules. This contest is a skills-based contest. Chance plays no part in the determination of winners.

- To maintain privacy, a contestant should not put his or her full name or any personal information on the poster. CPSC will remove any identifying information on the poster.

- Sending a poster and completed *Contest Submission and Parental Consent Form* by the deadline constitutes "registration to participate in the competition" required by Section 105(g)(1) of the America COMPETES Act.

4. *Parent or Guardian's Consent.* All contestants must submit a completed *Contest Submission and Parental Consent Form*. On the form, parents or guardians must provide CPSC:

- permission for the contestant to enter the contest;
- an agreement that the contestant will abide by the contest rules;
- contact information to notify the parent or guardian if the contestant wins a prize;
- permission to collect, use, or disclose the contestant/child's personal information in accordance with the contest rules and applicable laws, including information necessary to issue and report any prize payments.

5. *Privacy.* CPSC will collect, use, and disclose the information submitted in accordance with the Privacy Act and/or E-Government Act of 2002. Information is not collected for commercial marketing.

6. *Children's Online Privacy.* The safety and privacy of children is CPSC's priority. CPSC complies with the Children's Online Privacy Protection Act of 1998 (COPPA) and COPPA's accompanying regulations protecting the privacy of children using the Internet.

CPSC requires verifiable parental consent via a *Contest Submission and Parental Consent Form* for all contestants and requires this consent before CPSC collects, uses, or discloses personal information about children under the age of 13. CPSC requires contestants to disclose the minimum amount of personal information necessary to participate in the contest.

To enter the contest, CPSC only requires contestants to provide a full name, grade in school, and state of residence. CPSC will obtain full contact information about the contestant's parent or guardian, not the child contestant; contact information includes the parent or guardian's full name, address, telephone number, and email address. CPSC requires contest winners to provide a Social Security number to process prize payments. CPSC will contact a contestant only through a parent or guardian.

CPSC uses the personal information about a contestant to administer the contest. After obtaining parental consent via a *Contest Submission and Parental Consent Form*, CPSC will publish the contestant's poster, along with the contestant's first name, grade level, and state of residence. CPSC does not permit contestants to make any additional information publicly available and will not publish personal information about contestants beyond the information described above.

CPSC maintains reasonable procedures to protect the confidentiality, security, and integrity of personal information collected from children, as described in CPSC's Systems of Records Notice, Privacy Impact Assessment, and agency policies and directives. CPSC only discloses personal information as required by applicable laws and regulations.

Questions about these privacy policies should be directed to Patty Davis, CPSC Office of Communications at: pdavis@cpsc.gov.

At any time, a parent or guardian may review or have deleted the contestant's personal information from CPSC records and may refuse to permit further collection or use of the contestant's information by contacting the contest administrator at: pdavis@cpsc.gov.

7. *Prizes.* CPSC will award:

- three 6th grade winners, a cash award of \$500 each
- three 7th grade winners, a cash award of \$500 each
- three 8th grade winners, a cash award of \$500 each
- one winner, chosen by public vote on CPSC's Web site, a cash award of \$500
- one grand prize winner picked from all winners, a cash award of \$1,000.

One poster may win multiple prizes. Winners shall be responsible for paying any applicable federal, state, or local taxes. CPSC will pay prize money directly to the winner or winners. Each winner must provide CPSC with sufficient information to issue payments in accordance with CPSC fiscal policy and issue an Internal Revenue Service

Form 1099. CPSC will not issue prize payments without sufficient information to issue payments in compliance with CPSC fiscal policy and federal law. Winners may not transfer, assign, or substitute any prize.

CPSC may print, reproduce, or display winning posters publicly in print, online on the CPSC's Web site, and online on other safety partners' Web sites.

8. *Judges.* The posters will be judged by a qualified panel selected by CPSC at CPSC's sole discretion. CPSC retains the right to add or remove judges at any time before the winners are announced. Contest judges may include people from outside CPSC, including individuals from the private sector. The panel of judges will select the winning posters based on the criteria identified below. Judges have the right to withdraw from judging the contest entries without advance notice.

Judges may not:

- have personal or financial interests in, or be an employee, officer, director, or agent of, any entity that is a registered contestant in this contest;
- have a familial or financial relationship with an individual who is a registered contestant; or
- have any matter pending before CPSC or represent anyone in any matter pending before CPSC.

Specific tasks related to the judging process may be delegated to CPSC employees or employees of a collaborating agency. Judges shall have the authority to disregard any minor error in an entry that does not create any substantial benefit or detriment to any contestant. Decisions made by the judges are final.

9. *Judging Criteria.*

- clarity of CO safety message
- visual appeal of poster
- design originality.

10. *Contest Subject to Applicable Law.*

The contest is subject to all applicable federal laws and regulations. By submitting an entry to the contest, the contestant and the contestant's parent or guardian agrees to be bound by these Official Rules and administrative decisions, which are final and binding in all matters relating to the contest. Eligibility for a contest prize is contingent upon fulfilling all of the requirements of the Official Rules. The final award of prizes is contingent upon the availability of appropriations.

11. *No CPSC Logo.* The poster must not use CPSC's logo or official seal and must not claim federal government endorsement.

12. *Copyright/Original Work.* Each contestant, through the contestant's parent or guardian, represents and

warrants that the contestant is the sole author and owner of the poster; that the poster is wholly original with the contestant; and that the poster does not infringe any copyright or any other rights of any third party of which the contestant is aware.

13. *Intellectual Property.* By entering a poster in the contest, each contestant and the contestant's parent or guardian grants to the CPSC an irrevocable, paid-up, royalty-free, nonexclusive worldwide and perpetual license to use, copy, distribute to the public, create derivative works from, link to, display publicly (on the Internet or otherwise), and grant sublicenses to the poster, indefinitely, starting on the date the poster is entered into the contest. All contestants will retain all other intellectual property rights over their posters.

14. *Payment of Prizes, Use of Prize Money, and Post-Award Performance.*

- Prize money will be paid after the announcement of the winners.
- CPSC will pay prize money directly to the winner or winners. Each winner must provide CPSC with sufficient information to issue payments in accordance with CPSC fiscal policy and issue an Internal Revenue Service Form 1099.

15. *Verification of Contest Winners.* All contestants must continue to comply with all terms and conditions of the Official Rules, and winning is contingent upon fulfilling all requirements contained in the Official Rules and this Notice. The parent or guardian of the winner(s) will be notified by email, telephone, or mail, after the date of the judging, using the information provided by the parent or guardian to CPSC. The end date for judging is an approximation and may change, depending on the number of entries. The contest winner(s) will be required to sign and return to CPSC, within ten (10) calendar days after the date that notice is sent, an Affidavit of Eligibility and Liability/Publicity Release (except where prohibited) to claim any prize or recognition. If a contest winner is disqualified for any reason, CPSC may award the applicable recognition and prize to an alternate winner selected by the judges from the remaining eligible entries.

16. *Limitation of Liability.* By submitting an entry to the contest, all contestants and parents or guardians of the contestants agree to, and thereby do, release, discharge, and hold harmless the government and its employees, agents, contractors, and representatives (except in the case of willful misconduct) from any claims, losses, and damages arising out of their

participation in this contest or any contest-related activities and the acceptance and use, misuse, or possession of any prize awarded hereunder, including claims for injury, death, damage, or loss of property, revenue, or profits, whether direct, indirect, or consequential, arising from their participation in the contest, whether the injury, death, damage, or loss arises through negligence, or otherwise. Contestants will not be required to waive claims against CPSC that arise from the unauthorized use or disclosure by the agency of the intellectual property, trade secrets, or confidential information of the contestant. The contestant and his or her parent or guardian shall be liable for, and shall indemnify and hold harmless, the U.S. government against all actions or claims for loss of, or damage to, property resulting from the fault, negligence, or wrongful act or omission of the contestant.

17. *Liability Insurance.* Contestants will not be required to obtain liability insurance or demonstrate financial responsibility for claims by: (1) A third party for death, bodily injury, or property damage, or loss resulting from activity carried out in connection with the participation in the competition, with the federal government named as an additional insured under the registered contestant's insurance policy and registered contestants agreeing to indemnify the federal government against third party claims for damages arising from or related to competition activities; and (2) the federal government for damage or loss to government property resulting from such an activity.

18. *Records Retention and Freedom of Information Act.* All materials submitted as part of a contest entry (including the poster and the *Contest Submission and Parental Consent Form*) become CPSC records and will not be returned. No confidential information will be accepted with any contest entry. Contestants will be notified of any Freedom of Information Act requests for their contest entries in accordance with applicable law.

19. *General Conditions.* This contest is void where prohibited. Contestants agree that this contest shall be subject to, and governed by, the laws of the District of Columbia, and the forum for any dispute shall be in the District of Columbia, United States of America. To the extent permitted by law, the right to litigate, to seek injunctive relief, or to make any other recourse to judicial or any other procedure in case of disputes or claims resulting from, or in connection with this contest, are hereby

excluded, and any contestant expressly waives any and all such rights. Certain restrictions may apply. CPSC, in consultation with the judges, reserves the right, in CPSC's discretion, not to make an award in one or more categories, based on factors such as quality, quantity, or nature of eligible entries. CPSC reserves the right to cancel, suspend, and/or modify the contest, or any part of the contest, for any reason, at CPSC's sole discretion.

All decisions by CPSC are final and binding in all matters related to the contest.

20. *Procedures for obtaining additional information.*

- During the period of the CO Safety Poster Contest, CPSC will respond to questions submitted to COcontest@cpsc.gov from potential contestants.
- CPSC employees will respond to all questions submitted to COcontest@cpsc.gov on an equitable basis. CPSC's responses to questions submitted to COcontest@cpsc.gov are not official guidance.
- CPSC will not permit any contestant to use federal facilities during the contest.

Authority: 15 U.S.C. 3719

Dated: July 8, 2014.

Todd A. Stevenson,
Secretary, Consumer Product Safety
Commission.

BILLING CODE 6355-01-P

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Proposed Information Collection; Comment Request

AGENCY: Corporation for National and Community Service.

ACTION: Notice.

SUMMARY: The Corporation for National and Community Service (CNCS), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) (44 U.S.C. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirement on respondents can be properly assessed.

Currently, CNCS is soliciting comments concerning its proposed renewal of the Disaster Response Cooperative Agreement (DRCA) application. The DRCA enables CNCS supported national service organizations to engage members and participants in disaster response efforts to disaster events and to be eligible to be reimbursed for expenses incurred while engaged in such efforts. This document describes eligibility criteria, the nature of disaster deployments, CNCS's expectations for performance upon selection, and the application process. Also included are supporting forms and templates that are part of the deployment and reimbursement process. This agreement is the legal instrument by which organizations can be reimbursed by CNCS for expenses incurred by a disaster response, when it occurs under authority of a Mission Assignment from FEMA or another agency. National service organizations must have an approved and current DRCA in order to be reimbursed for a CNCS authorized disaster deployment.

Copies of the information collection request can be obtained by contacting the office listed in the Addresses section of this Notice.

DATES: Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by September 9, 2014.

ADDRESSES: You may submit comments, identified by the title of the information collection activity, by any of the following methods:

(1) By mail sent to: Corporation for National and Community Service, Corporation for National and Community Service; Attention Kelly DeGraff, Senior Advisor, Disaster Services, Room 9607; 1201 New York Avenue NW., Washington, DC 20525.

(2) By hand delivery or by courier to the CNCS mailroom at Room 8100 at the mail address given in paragraph (1) above, between 9:00 a.m. and 4:00 p.m.

Eastern Time, Monday through Friday, except Federal holidays.

(3) Electronically through www.regulations.gov. Individuals who use a telecommunications device for the deaf (TTY-TDD) may call 1-800-833-3722 between 8:00 a.m. and 8:00 p.m. Eastern Time, Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Kelly DeGraff, 202-606-6817, or by email at your kdegraff@cns.gov.

SUPPLEMENTARY INFORMATION:

CNCS is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of CNCS, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are expected to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submissions of responses).

Background

The information collected will be used to help CNCS more effectively utilize its deployable resources to meet the needs of disaster affected communities. A better understanding of the participating programs will allow CNCS to match the capabilities of the programs to the needs of the communities and will allow better asset mapping and resource typing. Additionally, the information collected will allow CNCS to conduct better outreach to interested programs by

providing them with more information about CNCS disaster procedures, reimbursement requirements, and support services offered.

The additional tools and forms under the DRCA will allow for effective information collection during a disaster event as well as assess the capacity of all DRCA programs throughout the year. Information will be collected electronically through completion of the forms and emailed to CNCS.

Current Action

CNCS seeks to renew the current information collection. The revisions are intended to streamline the application process and ensure interested programs meet the appropriate programmatic and fiscal requirements to successfully execute disaster response activities. Additionally, the supporting forms will help CNCS identify and deploy programs more effectively and efficiently, matching the capabilities of the programs to the needs of the communities requesting assistance.

The information collection will otherwise be used in the same manner as the existing application. CNCS also seeks to continue using the current application until the revised application is approved by OMB. The current application is due to expire on March 31, 2015.

Type of Review: Renewal.
Agency: Corporation for National and Community Service.

Title: Disaster Response Cooperative Agreement.

OMB Number: 3045-0133.
Agency Number: None.
Affected Public: Current grantees and CNCS-supported programs.

Total Respondents: 100.

BILLING CODE 6050-28-P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID DoD-2014-OS-0105]

Privacy Act of 1974; System of Records

AGENCY: Defense Health Agency, DoD.
ACTION: Notice to add a new System of Records.

SUMMARY: The Defense Health Agency is proposing to establish a new system of records, EDHA 25 DoD, entitled "Enterprise Blood Management System (EBMS)" in its inventory of record systems subject to the Privacy Act of 1974, as amended. This system will be used to obtain information from individuals donating blood in order to identify and verify donor demographics; determine donor suitability; associate donors to blood collections for testing; and create records necessary to identify and notify recipients of potential or known infectious blood units. Information collected is also used to determine the suitability of voluntary blood donations, record time of blood donation, and blood type; administer the Armed Services Blood Program (ASBP); and in some instances, recommend medical treatment for prospective blood donors.

DATES: Comments will be accepted on or before August 11, 2014. This proposed action will be effective on the day following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal:* <http://www.regulations.gov>.

Follow the instructions for submitting comments.

* *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive, East Tower, 2nd Floor, Suite 02G09, Alexandria, VA 22350-3100.

Instructions: All submissions received must include the agency name and

docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Ms. Linda S. Thomas, Chief, Defense Health Agency Privacy and Civil Liberties Office, 7700 Arlington Boulevard, Suite 5101, Falls Church, VA 22042-5101, or by phone at (703) 681-7500.

SUPPLEMENTARY INFORMATION: The Defense Health Agency notices for systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or at the Defense Privacy and Civil Liberties Office Web site <http://dpclo.defense.gov/>.

The proposed system report, as required by 5 U.S.C. 552a(r) of the Privacy Act of 1974, as amended, was submitted on July 1, 2014, to the House Committee on Oversight and Government Reform, the Senate Committee on Governmental Affairs, and the Office of Management and Budget (OMB) pursuant to paragraph 4c of Appendix I to OMB Circular No. A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated February 8, 1996 (February 20, 1996, 61 FR 6427).

Dated: July 8, 2014.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

EDHA 25 DoD

SYSTEM NAME:

Enterprise Blood Management System (EBMS)

SYSTEM LOCATION:

Primary location: Enterprise Infrastructure (EI) Military Health System (MHS) Enterprise Services Operations Center (MESOC) San Antonio, 300 Convent Street, Suite 1800, San Antonio, TX 78205-3742.

SECONDARY LOCATIONS:

Enterprise Infrastructure (EI) Military Health System (MHS) Enterprise Services Operations Center (MESOC) Aurora, 16401 East Centretech Parkway, Aurora, CO 80011-9066.

For a complete listing of all system location addresses, contact the system manager.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Donors: Any member of the Armed Services, Department of Defense (DoD) civilian employees (including non-appropriated fund employees), DoD contractors, federal employees from other federal agencies, civilians, and foreign nationals donating blood at one or more DoD blood donor collection sites.

Recipients: Armed Services medical beneficiaries who receive or have received medical care at one or more DoD medical treatment facilities and who have a need for a blood services encounter; and DoD civilian employees (including non-appropriated fund employees), federal employees from other federal agencies, contractors, civilians, and foreign nationals who receive or have received care at one or more DoD medical treatment facilities and who have a need for a blood services encounter.

CATEGORIES OF RECORDS IN THE SYSTEM:

Donors: Name; date of birth; Social Security Number (SSN) and/or DoD Identification (DoD ID) number; in the case of a foreign national, the foreign national number assigned to that individual; donor family member prefix and/or sponsor SSN or DoD ID number; gender; race/ethnicity; contact phone number(s); home address; personal email address; medical history; current health and disability information; and employment information (including, for donors who are Armed Services members, the donor's organization, station, and duty phone), and previous donation history.

Recipients: Individual's name and other name(s) used, date of birth, SSN and/or DoD ID number, gender, race/ethnicity, medical information, and recipient's previous donation history (if any).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. Chapter 55, Medical and Dental Care; 32 CFR Part 199, Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); DoD Directive 6000.12E, Health Service Support; DoD Instruction (DoDI) 6015.23, Delivery of Healthcare at Military Treatment Facilities; Foreign Service Care; Third-Party Collection; Beneficiary Counseling and Assistance Coordinators (BCACs); DoDI 6480.04, Armed Services Blood Program Operational Procedures; and E.O. 9397 (SSN), as amended.

PURPOSE(S):

To obtain information from individuals donating blood in order to

identify and verify donor demographics; determine donor suitability; associate donors to blood collections for testing; and create records necessary to identify and notify recipients of potential or known infectious blood units.

Information collected is also used to determine the suitability of voluntary blood donations, record time of blood donation, and blood type; administer the Armed Services Blood Program (ASBP); and in some instances, recommend medical treatment for prospective blood donors.

To permit verification and authentication of the individuals receiving blood transfusions.

To trace blood units and blood products that are unsuitable to transfer, and previous units donated by the same donor, for review and possible recipient notifications.

To obtain information on individuals receiving blood transfusions through the ASBP, and the donor(s) of that blood for use in an automated and standardized quality information system to ensure the safety and quality of the blood supply in support of the Military Health System's medical readiness and healthcare treatment activities.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act of 1974, as amended, these records may be specifically disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

To the Department of Health and Human Services (HHS) and its components for the purpose of conducting research and analytical projects, and to facilitate collaborative research activities between DoD and HHS.

To the Department of Veterans Affairs (VA) for the purpose of providing medical care to former Armed Services members and retirees and facilitating collaborative research activities between the DoD and VA.

To the National Research Council, National Academy of Sciences, and similar institutions for authorized health research in the interest of the Federal Government and the public.

To other federal, local, and state government agencies for compliance with federal, state, and local laws and regulations governing blood supply safety, control of communicable diseases, preventive medicine and safety, and other public health and welfare mandates relating to blood supplies.

To federal offices and agencies involved in the documentation and review of defense occupational and environmental exposure data.

The DoD Blanket Routine Uses may apply to this system of records, except as stipulated in the Notes below.

Note 1: This system of records contains individually identifiable health information. The DoD Health Information Privacy Regulation (DoD 6025.18-R) or any successor DoD issuances implementing the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and 45 CFR Parts 160 and 164, Health and Human Services, General Administrative Requirements and Security & Privacy, respectively, within the DoD applies to most such health information. DoD 6025.18-R or any successor issuance may place additional procedural requirements on the uses and disclosures of such information beyond those found in the Privacy Act of 1974, as amended, or mentioned in this system of records notice.

Note 2: Except as provided under 42 U.S.C. 290dd-2, records of identity, diagnosis, prognosis or treatment of any patient maintained in connection with the performance of a program or activity relating to substance abuse education, prevention, training, treatment, rehabilitation, or research which is conducted, regulated, or directly or indirectly assisted, by a department or agency of the United States, will be treated as confidential and disclosed only for the purposes and under the circumstances expressly authorized in 42 U.S.C. 290dd-2.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Electronic storage media.

RETRIEVABILITY:

Donor: Donor name, SSN and/or DoD ID number, and date of birth.

Recipient: Recipient name, SSN and/or DoD ID number, and date of birth.

SAFEGUARDS:

Systems are maintained in controlled areas accessible only to authorized personnel. Entry into these areas is restricted to those personnel with a valid requirement and authorization to enter. Physical entry is restricted by the use of locks, passwords which are changed periodically, and administrative procedures.

The system provides two-factor authentication including Common Access Cards with pin number and user ID/passwords. Access to personal information is restricted to those who require the data in the performance of their official duties. All personnel whose official duties require access to the information are trained in the proper safeguarding and use of the information.

RETENTION AND DISPOSAL:

Disposition pending (treat records as permanent until the National Archives and Records Administration has approved the retention and disposal schedule).

SYSTEM MANAGER(S) AND ADDRESS:

EBMS Program Manager, Defense Health Clinical Systems (DHCS)/Deployment and Readiness System (D&RS), 5109 Leesburg Pike, Skyline 6, Suite 817, Falls Church, VA 22041-3240.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this system of records should address written inquiries to the Chief, Freedom of Information Act (FOIA) Service Center, Defense Health Agency Privacy and Civil Liberties Office, 7700 Arlington Boulevard, Suite 5101, Falls Church, VA 22042-5101.

Requests should contain the name and number of this system of records notice, the individual's full name, current address, telephone number, and signature.

If requesting information about a minor or legally incompetent person, the request must be made by the custodial parent, legal guardian, or party acting in loco parentis of such individual. Written proof of that status may be required before the existence of any information will be confirmed.

RECORD ACCESS PROCEDURES:

Individuals seeking access to information about themselves contained in this system of records should address written inquiries to the Chief, FOIA Service Center, Defense Health Agency Privacy and Civil Liberties Office, 7700 Arlington Boulevard, Suite 5101, Falls Church, VA 22042-5101.

Requests should contain the name and number of this system of records notice, the individual's full name, current address, telephone number, and signature.

If requesting records about a minor or legally incompetent person, the request must be made by the custodial parent, legal guardian, or party acting in loco parentis of such individual. Written proof of that status may be required before any records will be provided.

CONTESTING RECORD PROCEDURES:

The Office of the Secretary of Defense (OSD) rules for accessing records, for contesting contents and appealing initial agency determinations are published in OSD Administrative Instruction 81, 32 CFR Part 311, or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Individuals, information printed on blood samples, the Composite Health Care System, and AHLTA.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

BILLING CODE 5001-06-P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID DoD-2014-OS-0107]

Privacy Act of 1974; System of Records

AGENCY: Defense Intelligence Agency, DoD.

ACTION: Notice to delete a System of Records.

SUMMARY: The Defense Intelligence Agency is deleting a system of records notice from its existing inventory of records systems subject to the Privacy Act of 1974, as amended. The system notice is entitled "LDIA 10-0001, Equal Opportunity, Diversity and Alternate Dispute Resolution Records".

DATES: Comments will be accepted on or before August 11, 2014. This proposed action will be effective the date following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal:* <http://www.regulations.gov>.

Follow the instructions for submitting comments.

* *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive, East Tower, 2nd Floor, Suite 02G09, Alexandria, VA 22350-3100.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Ms. Theresa Lowery, DIA Privacy Act Compliance Officer, DAN 1C, 200 MacDill Blvd., Washington, DC 20340-0001; telephone (202) 231-1193.

SUPPLEMENTARY INFORMATION: The Defense Intelligence Agency systems of

records notices subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or at the Defense Privacy and Civil Liberties Office Web site at <http://dpclo.defense.gov/>.

The proposed deletion is not within the purview of subsection (r) of the Privacy Act of 1974 (5 U.S.C. 552a), as amended, which requires the submission of a new or altered system report.

Dated: July 8, 2014.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Deletion LDIA 10-0001

SYSTEM NAME:

Equal Opportunity, Diversity and Alternate Dispute Resolution Records (June 15, 2010, 75 FR 33792)

REASON:

The records contained in this system of records have been migrated into the Conflict Management Programs system LDIA 13-0001 (November 20, 2013, 78 FR 69651). Therefore LDIA 10-0001, Equal Opportunity, Diversity and Alternate Dispute Resolution Records can be deleted.

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID DoD-2014-OS-0103]

Privacy Act of 1974; System of Records

AGENCY: Defense Information Systems Agency, DoD.

ACTION: Notice to amend a System of Records.

SUMMARY: The Defense Information Systems Agency is amending a system of records notice, K890.16, entitled "Enterprise Mission Assurance Support Service (EMASS)" in its existing inventory of record systems subject to the Privacy Act of 1974, as amended. This notice is being amended to add "DoD" to the system ID, as it is a DoD-wide system.

DATES: Comments will be accepted on or before August 11, 2014. This proposed action will be effective the day following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

* *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive, East Tower, 2nd Floor, Suite 02G09, Alexandria, VA 22350-3100.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Ms. Jeanette Weathers-Jenkins, DISA Privacy Officer, Chief Information Office, 6916 Cooper Avenue, Fort Meade, MD 20755-7901, or by phone at (301)225-8158.

SUPPLEMENTARY INFORMATION: The Defense Information Systems Agency systems of records notices subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or at <http://dpclo.defense.gov/>.

The proposed change to the record system being amended is set forth below. The proposed amendment is not within the purview of subsection (r) of the Privacy Act of 1974 (5 U.S.C. 552a), as amended, which requires the submission of a new or altered system report.

Dated: July 7, 2014.

DEPARTMENT OF DEFENSE**Office of the Secretary****[Docket ID DoD-2014-OS-0102]****Privacy Act of 1974; System of Records****AGENCY:** Office of the Secretary of Defense, DoD.**ACTION:** Notice to alter a System of Records.

SUMMARY: The Defense Finance and Accounting Service proposes to alter a system of records in its inventory of record systems subject to the Privacy Act of 1974 as amended. This system is used to provide a bridge or link between the Defense Civilian Payroll System (DCPS) and the Civilian Pay Accounting Interface System (CPAIS). This system will create pay information files from DCPS. The pay information files will contain civilian payroll costs and manpower data; this data will then be provided to the U.S. Air Force accounting activities for processing. The system contains information on other than U.S. Air Force civilian employees; however, the CPAIS system will not use the non-Air Force data other than to transmit it directly to the General Accounting and Finance System (GAFS).

DATES: Comments will be accepted on or before August 11, 2014. This proposed action will be effective the day following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

* *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive, East Tower, 2nd Floor, Suite 02G09, Alexandria, VA 22350-3100.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Mr. Gregory L. Outlaw, Defense Finance and Accounting Service, Freedom of Information/Privacy Act Program Manager, Corporate Communications, DFAS-HKC/IN, 8899 E. 56th Street, Indianapolis, IN 46249-0150 or at (317) 212-4591.

SUPPLEMENTARY INFORMATION: The Defense Finance and Accounting Service notices for systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or from the Defense Privacy and Civil Liberties Office Web site at <http://dpclo.defense.gov/>.

The proposed system report, as required by 5 U.S.C. 552a(r) of the Privacy Act of 1974, as amended, was submitted on June 24, 2014, to the House Committee on Oversight and Government Reform, the Senate Committee on Governmental Affairs, and the Office of Management and Budget (OMB) pursuant to paragraph 4c of Appendix I to OMB Circular No. A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated February 8, 1996 (February 20, 1996, 61 FR 6427).

Dated: July 7, 2014.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001-06-P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID DoD-2014-OS-0104]

Privacy Act of 1974; System of Records

AGENCY: Office of the Secretary of Defense, DoD.

ACTION: Notice to alter a System of Records.

SUMMARY: The Office of the Secretary of Defense proposes to alter a system of records, WUSU 07, entitled "USUHS Grievance Records", in its inventory of

record systems subject to the Privacy Act of 1974, as amended. This system will be used to track, analyze and mitigate informal grievances filed by Uniformed Services University employees covered by a collective bargaining agreement. Utilizing this information allows Uniformed Services University civilian personnel employer relations officers to track grievances, to analyze findings from an investigation, and to research the success and/or failure of mitigation efforts. The information is collected and used by Civilian Personnel Employee Relations Officers.

DATES: Comments will be accepted on or before August 11, 2014. This proposed action will be effective the date following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

* *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive, East Tower, 2nd Floor, Suite 02G09, Alexandria, VA 22350-3100.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Ms. Cindy Allard, Chief, OSD/JS Privacy Office, Freedom of Information Directorate, Washington Headquarters Service, 1155 Defense Pentagon, Washington, DC 20301-1155, or by phone at (571) 372-0461.

SUPPLEMENTARY INFORMATION: The Office of the Secretary of Defense notices for systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or at the Defense Privacy and Civil Liberties Office Web site at <http://dpcl.o.defense.gov/>.

The proposed system report, as required by U.S.C. 552a(r) of the Privacy Act of 1974, as amended, was submitted on June 27, 2014, to the House Committee on Oversight and

Government Reform, the Senate Committee on Governmental Affairs, and the Office of Management and Budget (OMB) pursuant to paragraph 4c of Appendix I to OMB Circular No. A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated February 8, 1996 (February 20, 1996, 61 FR 6427).

Dated: July 7, 2014.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

WUSU 07

SYSTEM NAME: USUHS GRIEVANCE RECORDS (JUNE 8, 2010, 75 FR 32416).

CHANGES:

BILLING CODE 5001-06-P

DEPARTMENT OF DEFENSE

Department of the Air Force

[Docket ID USAF-2014-0024]

Privacy Act of 1974; System of Records

AGENCY: Department of the Air Force, DoD.

ACTION: Notice to alter a System of Records.

SUMMARY: The Department of the Air Force proposes to alter a system of records notice, F065 AF SVA C, entitled "Services Activities Participation/Membership/Training Records" in its existing inventory of records systems subject to the Privacy Act of 1974, as amended. System is utilized by the Air Force Services activities to determine membership and participation eligibility; maintain patron attendance; conduct contests; monitor training and currency of members; tee time and equipment rental reservations; and to track purchase transactions.

DATES: Comments will be accepted on or before August 11, 2014. This proposed action will be effective the day following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal:* <http://www.regulations.gov>.

Follow the instructions for submitting comments.

* *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive East Tower, 2nd Floor, Suite 02G09, Alexandria, VA 22350-3100.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Mr. Charles J. Shedrick, Department of the Air Force Privacy Office, Air Force Privacy Act Office, Office of Warfighting Integration and Chief Information officer, ATTN: SAF/CIO A6, 1800 Air Force Pentagon, Washington, DC 20330-1800, or by phone at (571) 256-2515.

SUPPLEMENTARY INFORMATION: The Department of the Air Force's notices

for systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or from the Defense Privacy and Civil Liberties Office at <http://dpclo.defense.gov/>.

The proposed systems reports, as required by 5 U.S.C. 552a(r) of the Privacy Act, as amended, were submitted on June 18, 2014, to the House Committee on Oversight and Government Reform, the Senate Committee on Homeland Security and Governmental Affairs, and the Office of Management and Budget (OMB) pursuant to paragraph 4c of Appendix I to OMB Circular No. A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated February 8, 1996, (February 20, 1996, 61 FR 6427).

Dated: July 8, 2014.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001-06-P

DEPARTMENT OF DEFENSE**Department of the Army**

[Docket ID USA-2014-0024]

Privacy Act of 1974; System of Records**AGENCY:** Department of the Army, DoD.**ACTION:** Notice to alter a System of Records.

SUMMARY: The Department of the Army proposes to alter a system of records notice, A0027-20a DAJA, entitled "U.S. Army Claims Service Management Information System" in its existing inventory of records systems subject to the Privacy Act of 1974, as amended. This system is used to develop and preserve all relevant evidence about incidents, which generate claims against or in favor of the Army. Evidence developed is used as a legal basis to support the settlement of claims. Data are also used as a management tool to supervise claims operations at subordinate commands worldwide.

DATES: Comments will be accepted on or before August 11, 2014. This proposed action will be effective the day following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

* *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive East Tower, 2nd Floor, Suite 02G09, Alexandria, VA 22350-3100.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Mr. Leroy Jones, Department of the Army, Privacy Office, U.S. Army Records Management and Declassification Agency, 7701 Telegraph Road, Casey Building, Suite 144, Alexandria, VA 22325-3905 or by calling (703) 428-6185.

SUPPLEMENTARY INFORMATION: The Department of the Army's notices for

systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or from the Defense Privacy and Civil Liberties Office Web site at <http://dpcl.o.defense.gov/>.

The proposed systems reports, as required by 5 U.S.C. 552a(r) of the Privacy Act, as amended were submitted on June 10, 2014, to the House Committee on Oversight and Government Reform, the Senate Committee on Homeland Security and Governmental Affairs, and the Office of Management and Budget (OMB) pursuant to paragraph 4c of Appendix I to OMB Circular No. A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated February 8, 1996 (February 20, 1996, 61 FR 6427).

Dated: July 8, 2014.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

A0027-20a DAJA**SYSTEM NAME:**

U.S. Army Claims Service Management Information System (August 1, 2008, 73 FR 44974)

CHANGES:

* * * * *

CATEGORIES OF RECORDS IN THE SYSTEM:

Delete entry and replace with "Name of claimant, Social Security Number (SSN), address and telephone number, case/claim file number, type of claim presented, reports of investigation, witness statements, police reports, photographs, diagrams, bills, estimates, expert opinions, medical records and similar reports, copy of correspondence with claimant, potential claimants, third parties, and insurers of claimants or third parties, copies of finance vouchers evidencing payment of claims, and similar relevant information."

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Delete entry and replace with "In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act of 1974, as amended, these records contained therein may specifically be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

To the Internal Revenue Service for tax purposes.

To the Department of Justice for assistance in deciding disposition of

claims filed against or in favor of the government and for considering criminal prosecution, civil court action or regulatory orders.

To the U.S. Claims Court and the Court of Appeals for the Federal Circuit, to support legal actions, considerations or evidence to support proposed legislative or regulatory changes, for budgetary purposes, for quality control or assurance type studies, or to support action against a third party.

To foreign governments for use in settlements of claims under the North Atlantic Treaty Organization Status of Forces Agreement or similar international agreements.

To the state governments for use in defending or prosecuting claim by the state or its representatives.

To the Department of Labor, for consideration in determining rights under Federal Employees Compensation Act or similar legislation.

To civilian and government experts for assistance in evaluating the claim.

To the Office of Management and Budget for preparation of private relief bills for presentation to the Congress.

To government contractors for use in defending or settling claims filed against them, including recovery actions, arising out of the performance of a Government contract.

To federal and state workmen's compensation agencies for use in adjudicating claims.

To private insurers with a legal interest in the same case.

To potential joint tort-feasors or their representatives for the purpose of prosecuting or defending claims for contribution or indemnity.

Information from this system of records may also be disclosed to law students participating in a volunteer legal support program approved by the Judge Advocate General of the Army.

The DoD Blanket Routine Uses set forth at the beginning of the Army's compilation of systems of records notices may apply to this system.

Note: This system of records contains protected health information. The DoD Health Information Privacy Regulation (DoD 6025.18-R) issued pursuant to the Health Insurance Portability and Accountability Act of 1996, applies to most such health information. DoD 6025.18-R may place additional procedural requirements on the uses and disclosures of such information beyond those found in the Privacy Act of 1974, as amended, or mentioned in this system of records notice."

* * * * *

SYSTEM MANAGER(S) AND ADDRESS:

Delete entry and replace with "The Judge Advocate General, Headquarters,

Department of the Army, 2200 Army Pentagon, Room 2B517, Washington, DC 20310-2200."

NOTIFICATION PROCEDURE:

Delete entry and replace with "Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Commander, U.S. Army Claims Service, 4411 Llewellyn Avenue, Fort Meade, MD 20755-5360.

Individual should provide his/her full name, current address and telephone number, case number appearing on correspondence, and any other personal identifying data that will assist in locating the record.

In addition, the requester must provide a notarized statement or an unsworn declaration made in accordance with 28 U.S.C. 1746, in the following format:

If executed outside the United States: 'I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (date). (Signature).'

If executed within the United States, its territories, possessions, or commonwealths: 'I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (date). (Signature).'

RECORD ACCESS PROCEDURES:

Delete entry and replace with "Individuals seeking access to information about themselves contained in this system should address written inquiries to the Commander, U.S. Army Claims Service, 4411 Llewellyn Avenue, Fort Meade, MD 20755-5360.

BILLING CODE 5001-06-P

DEPARTMENT OF DEFENSE

Department of the Army

[Docket ID USA-2014-0026]

Privacy Act of 1974; System of Records

AGENCY: Department of the Army, DoD.

ACTION: Notice to amend two systems of records.

SUMMARY: The Department of the Army proposes to amend two systems of records "A0340-21 OAA, Privacy Case Files" and "A0025-55 OAA, Freedom of Information Act Program Files" in its inventory of record systems subject to the Privacy Act of 1974, as amended. The A0340-21 OAA is used to process and coordinate requests for access and amendment of an individuals' record; to process appeals on denials of requests for access or amendment to individuals' records by the data subject against agency rulings; and to ensure timely response to requesters. The A0025-55 OAA is used to control administrative processing of requests for information either pursuant to the Freedom of Information Act Program or to E.O. 12958, National Classified Security Information, as amended, including appeals from denials.

DATES: Comments will be accepted on or before August 11, 2014. This proposed action will be effective on the day following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* Federal Rulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

* Mail: Federal Docket Management System Office, 4800 Mark Center Drive, East Tower, 2nd Floor, Suite 02G09, Alexandria, VA 22350-3100.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any

personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Mr. Leroy Jones, Jr., Department of the Army, Privacy Office, U.S. Army Records Management and Declassification Agency, 7701 Telegraph Road, Casey Building, Suite 144, Alexandria, VA 22315-3827 or by phone at 703-428-6185.

SUPPLEMENTARY INFORMATION: The Department of the Army systems of records notices subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or at the Defense Privacy and Civil Liberties Office Web site at <http://dpclo.defense.gov/>.

The proposed changes to the record systems being amended are set forth in this notice. The proposed amendments are not within the purview of subsection (r) of the Privacy Act of 1974 (5 U.S.C. 552a), as amended, which requires the submission of a new or altered system report.

Dated: July 8, 2014.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

SYSTEM NAME:

Privacy Case Files (December 8, 2005, 70 FR 72997)

CHANGES:

* * * * *

SYSTEM LOCATION:

Delete entry and replace with "These records exist at Headquarters, Department of the Army, staff and field operating agencies, major commands, installations and activities receiving Privacy Act requests.

Director, U.S. Army Records Management and Declassification Agency, ATTN: Freedom of Information/Privacy Division, 7701 Telegraph Road, Casey Building, Suite 144, Alexandria, VA 22315-3905.

Records also exist in offices of Access and Amendment Refusal Authorities when an individual's request to access and/or amend his/her record is denied. Upon appeal of that denial, record is maintained by the Department of the Army Privacy Review Board."

* * * * *

PURPOSE(S):

Delete entry and replace with "To process and coordinate requests for access and amendment of an individuals' record; to process appeals

on denials of requests for access or amendment to individuals' records by the data subject against agency rulings; and to ensure timely response to requesters."

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Delete entry and replace with "In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act of 1974, as amended, these records contained therein may specifically be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

The DoD Blanket Uses set forth at the beginning of the Army's compilation of systems of records notices may apply to this system."

* * * * *

RETRIEVABILITY:

Delete entry and replace with "By individual's name."

SAFEGUARDS:

Delete entry and replace with "Records are accessed by custodian of the record system and by persons responsible for servicing the record system in performance of their official duties. Records are stored in locked cabinets or rooms.

DoD components and approved users ensure that electronic records collected and used are maintained in controlled areas accessible only to authorized personnel. Physical security differs from site to site, but the automated records must be maintained in controlled areas accessible only by authorized personnel. Access to computerized data is restricted by use of common access card (CAC) and is accessible only by users with an authorized account. The system and electronic backups are maintained in controlled facilities that employ physical restrictions and safeguards such as security guards, identification badges, key cards, and locks."

* * * * *

NOTIFICATION PROCEDURE:

Delete entry and replace with "Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the U.S. Army Records Management and Declassification Agency, Freedom of Information/Privacy Division, 7701 Telegraph Road, Casey Building, Suite 144, Alexandria, VA 22315-3905.

For verification purposes, individual should provide full name, date and place of birth, current address and other personal information necessary to locate the record.

In addition, the requester must provide a notarized statement or an unsworn declaration made in accordance with 28 U.S.C. 1746, in the following format:

If executed outside the United States: 'I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (date). (Signature).'

If executed within the United States, its territories, possessions, or commonwealths: 'I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (date). (Signature).'"

RECORD ACCESS PROCEDURES:

Delete entry and replace with "Individuals seeking access to information about themselves contained in this system should address written inquiries to the office that processed the initial inquiry, access request, or amendment request.

Individual may obtain assistance from the U.S. Army Records Management and Declassification Agency, Freedom of Information/Privacy Division, 7701 Telegraph Road, Casey Building, Suite 144, Alexandria, VA 22315-3905.

For verification purposes, individual should provide full name, date and place of birth, current address and other personal information necessary to locate the record.

In addition, the requester must provide a notarized statement or an unsworn declaration made in accordance with 28 U.S.C. 1746, in the following format:

DEPARTMENT OF DEFENSE

Department of the Army

[Docket ID USA-2014-0025]

Privacy Act of 1974; System of Records

AGENCY: Department of the Army, DoD.

ACTION: Notice to alter a System of Records.

SUMMARY: The Department of the Army proposes to alter a system of records notice, A0190-13 OPMG, entitled "Security/Access Badges and Automated Installation Entry System (AIE) Records" in its existing inventory of records systems subject to the Privacy Act of 1974, as amended. This system supports the Department of the Army physical security and access control programs and Information Assurance programs. Records personal data and vehicle information registered with the Department of the Army; provides a record of security/access badges issued; ensures positive identification of personnel authorized access to restricted areas; restricts entry to installations and activities; maintains accountability for issuance and disposition of security/access badges and for producing installation management reports.

DATES: Comments will be accepted on or before August 11, 2014. This proposed action will be effective the day following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal:* <http://www.regulations.gov>.

Follow the instructions for submitting comments.

* *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive East Tower, 2nd Floor, Suite 02G09, Alexandria, VA 22350-3100.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://>

www.regulations.gov as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Mr. Leroy Jones, Department of the Army, Privacy Office, U.S. Army Records Management and Declassification Agency, 7701 Telegraph Road, Casey Building, Suite 144, Alexandria, VA 22325-3905 or by calling (703) 428-6185.

SUPPLEMENTARY INFORMATION: The Department of the Army's notices for systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or from the Defense Privacy and Civil Liberties Office Web site at <http://dpcl.o.defense.gov/>.

The proposed systems reports, as required by 5 U.S.C. 552a(r) of the Privacy Act, as amended were submitted on June 12, 2014, to the House Committee on Oversight and Government Reform, the Senate Committee on Homeland Security and Governmental Affairs, and the Office of Management and Budget (OMB) pursuant to paragraph 4c of Appendix I to OMB Circular No. A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated February 8, 1996 (February 20, 1996, 61 FR 6427).

Dated: July 8, 2014.

DEPARTMENT OF DEFENSE

Department of the Navy

Notice of Intent to Grant Partially Exclusive Patent License; Xtreme Alternative Defense Systems Ltd.

AGENCY: Department of the Navy, DoD.

ACTION: Notice.

SUMMARY: The Department of the Navy hereby gives notice of its intent to grant to Xtreme Alternative Defense Systems Ltd. a revocable, nonassignable, partially exclusive license to practice in the United States in the fields of Counter Piracy Application for Commercial Shipping and Counter UAV Systems, the Government-owned invention described below: Patent 8,420,977 (Navy Case 99,996), issued April 16, 2013, entitled "High Power Laser System."

DATES: Anyone wishing to object to the grant of this license must file written objections along with supporting evidence, if any, not later than July 28, 2014.

ADDRESSES: Written objections are to be filed with Naval Surface Warfare Center, Crane Div, Code OOL, Bldg 2, 300 Highway 361, Crane, IN 47522-5001.

FOR FURTHER INFORMATION CONTACT: Mr. Christopher Monsey, Naval Surface Warfare Center, Crane Div, Code OOL, Bldg 2, 300 Highway 361, Crane, IN 47522-5001, telephone 812-854-4100.

Authority: 35 U.S.C. 207, 37 CFR part 404.

Dated: July 2, 2014.

N.A. Hagerty-Ford,

Commander, Office of the Judge Advocate General, U.S. Navy, Federal Register Liaison Officer.

BILLING CODE 3810-FF-P

DEPARTMENT OF EDUCATION

Deadline Dates for Reports and Other Records Associated With the Free Application for Federal Student Aid (FAFSA®), the Federal Pell Grant Program, the William D. Ford Federal Direct Loan Program, the Teacher Education Assistance for College and Higher Education Grant Program, and the Iraq and Afghanistan Service Grant Program for the 2014-2015 Award Year

AGENCY: Federal Student Aid, Department of Education.

ACTION: Notice.

Catalog Federal Domestic Assistance (CFDA) Numbers: 84.007 Federal Supplemental Educational Opportunity

Grant Program (FSEOG); 84.033 Federal Work Study Program (FWS); 84.038 Federal Perkins Loan (Perkins Loan) Program; 84.063 Federal Pell Grant Program; 84.268 William D. Ford Federal Direct Loan Program; 84.379 Teacher Education Assistance for College and Higher Education Grant Program; 84.408 Iraq and Afghanistan Service Grant Program.

SUMMARY: The Secretary announces deadline dates for the receipt of documents and other information from applicants and institutions participating in certain Federal student aid programs authorized under title IV of the Higher Education Act of 1965, as amended (HEA), for the 2014-2015 award year. The Federal student aid programs covered by this deadline date notice are the Federal Pell Grant (Pell Grant), William D. Ford Federal Direct Loan (Direct Loan), Teacher Education Assistance for College and Higher Education (TEACH) Grant, and Iraq and Afghanistan Service Grant programs.

These programs, administered by the U.S. Department of Education (Department), provide financial assistance to students attending eligible postsecondary educational institutions to help them pay their educational costs.

Deadline and Submission Dates: See Tables A and B at the end of this notice.

Table A—Deadline Date by Which a Student Must Submit the FAFSA, by Which the Institution Must Receive the Student's Institutional Student Information Record (ISIR) or Student Aid Report (SAR), and by Which the Institution Must Submit Verification Outcomes for Certain Students for the 2014-2015 Award Year

Table A provides information and deadline dates for receipt of the FAFSA, corrections to and signatures for the FAFSA, ISIRs, and SARs, and verification documents.

For all Federal student aid programs, an ISIR or SAR for the student must be received by the institution no later than the student's last date of enrollment for the 2014-2015 award year or September 28, 2015, whichever is earlier. As a reminder, a FAFSA must be submitted for the dependent student for whom a parent is applying for a Direct PLUS Loan.

The deadline date for the receipt of a FAFSA by the Department's Central Processing System is June 30, 2015, regardless of the method that the applicant uses to submit the FAFSA. The deadline date for the receipt of a signature page for the FAFSA (if required), correction, notice of change of

address or school, or request for a duplicate SAR is September 19, 2015.

Verification documents must be received by the institution no later than 120 days after the student's last date of enrollment for the 2014–2015 award year or September 28, 2015, whichever is earlier.

For all Federal student aid programs except for (1) Direct PLUS Loans that will be made to parent borrowers, and (2) Direct Unsubsidized Loans that will be made to dependent students who have been determined by the institution, pursuant to HEA section 479A(a), to be eligible for such a loan without providing parental information on the FAFSA, the ISIR or SAR must have an official expected family contribution (EFC) and must be received by the institution no later than the earlier of the student's last date of enrollment for the 2014–2015 award year or September 28, 2015.

For a student who is requesting aid through the Pell Grant, FSEOG, FWS, and Federal Perkins Loan programs or for a student requesting Direct Subsidized Loans, who does not meet the conditions for a late disbursement under 34 CFR 668.164(g), a valid ISIR or valid SAR must be received no later than the student's last date of enrollment for the 2014–2015 award year or September 28, 2015, whichever is earlier. For a student meeting the conditions for a late disbursement for these programs, a valid ISIR or valid SAR must be received no later than 180 days after the student otherwise became ineligible or September 28, 2015, whichever is earlier.

In accordance with 34 CFR 668.164(g)(4)(i), an institution may not make a late disbursement of title IV student assistance funds later than 180 days after the date of the institution's determination that the student was no longer enrolled. Table A provides that, to make a late disbursement of title IV student assistance funds, an institution must receive a valid ISIR or valid SAR no later than 180 days after its determination that the student was no longer enrolled, but not later than September 28, 2015.

Table B—Federal Pell Grant, Iraq and Afghanistan Service Grant, Direct Loan, and TEACH Grant Programs' Deadline Dates for Disbursement Information by Institutions for the 2014–2015 Award Year or Processing Year

Table B provides the earliest dates for institutions to submit Pell Grant, Iraq

and Afghanistan Service Grant, Direct Loan, and TEACH Grant disbursement records to the Department's Common Origination and Disbursement (COD) System and deadline dates for an institution's request for administrative relief if it cannot meet the established deadline for specified reasons.

An institution must submit Pell Grant, Iraq and Afghanistan Service Grant, Direct Loan, and TEACH Grant disbursement records, as applicable, no later than 15 days after making the disbursement or becoming aware of the need to adjust a student's previously reported disbursement. In accordance with 34 CFR 668.164(a), title IV funds are disbursed on the date that the institution: (a) Credits those funds to a student's account in the institution's general ledger or any subledger of the general ledger, or (b) pays those funds to a student directly. Title IV funds are disbursed even if an institution uses its own funds in advance of receiving program funds from the Secretary.

An institution's failure to submit disbursement records within the required timeframe may result in the Secretary rejecting all or part of the reported disbursement. Such failure may also result in an audit or program review finding or the initiation of an adverse action, such as a fine or other penalty for such failure, in accordance with subpart G of the General Provisions regulations in 34 CFR part 668.

Other Sources for Detailed Information

Student	Paper corrections to the FAFSA using a SAR, including change of mailing and email addresses and change of institutions	To the address printed on the SAR	September 19, 2015
Student	Change of mailing and email addresses, change of institutions, or requests for a duplicate SAR	To the Federal Student Aid Information Center by calling 1-800-433-3243	September 19, 2015
Student	Except for Parent PLUS Loans and Direct Unsubsidized Loans made to a dependent student under HEA section 479A(a), a SAR with an official expected family contribution (EFC) calculated by the Department's CPS	To the institution	The earlier of: - The student's last date of enrollment for the 2014-2015 award year; or - September 28, 2015 ²

Student through CPS	Except for Parent PLUS Loans and Direct Unsubsidized Loans made to a dependent student under HEA section 479A(a), an ISIR with an official expected family contribution (EFC) calculated by the Department's CPS	To the institution from the Department's CPS	The earlier of: - The student's last date of enrollment for the 2014-2015 award year; or - September 28, 2015 ²
Student	Valid SAR (Pell Grant, FSEOG, FWS, Perkins Loan, and Direct Subsidized Loans)	To the institution	Except for a student meeting the conditions for a late disbursement under 34 CFR 668.164(g), the earlier of: - The student's last date of enrollment for the 2014-2015 award year; or - September 28, 2015 ²
Student through CPS	Valid ISIR (Pell Grant, FSEOG, FWS, Perkins Loan, and Direct Subsidized Loans)	To the institution from the Department's CPS	
Student	Valid SAR (Pell Grant, FSEOG, FWS, Perkins Loan, and Direct Subsidized Loans)	To the institution	For a student receiving a late disbursement under 34 CFR 668.164(g)(4)(i), the earlier of: - 180 days after the date of the institution's determination that the student withdrew or otherwise became ineligible; or - September 28, 2015 ²
Student through CPS	Valid ISIR (Pell Grant, FSEOG, FWS, Perkins Loan, and Direct Subsidized Loans)	To the institution from the Department's CPS	
Student	Verification documents	To the institution	The earlier of: ³ - 120 days after the student's last date of enrollment for the 2014-2015 award year; or - September 28, 2015 ²
Institution	Identity and high school completion verification results for a student selected for verification by the Department and placed in Verification Tracking Group V4 or V5	Electronically to the Department's CPS using "FAA Access to CPS Online"	60 days following the institution's first request to the student to submit the required V4 or V5 identity and high school completion documentation ⁴

- ¹ The deadline for electronic transactions is 11:59 p.m. (Central Time) on the deadline date. Transmissions must be completed and accepted before 12:00 midnight to meet the deadline. If transmissions are started before 12:00 midnight but are not completed until after 12:00 midnight, those transmissions do not meet the deadline. In addition, any transmission submitted on or just prior to the deadline date that is rejected may not be reprocessed because the deadline will have passed by the time the user gets the information notifying him or her of the rejection.
- ² The date the ISIR/SAR transaction was processed by CPS is considered to be the date the institution received the ISIR or SAR regardless of whether the institution has downloaded the ISIR from its Student Aid Internet Gateway mailbox or when the student submits the SAR to the institution.
- ³ Although the Secretary has set this deadline date for the submission of verification documents, if corrections are required, deadline dates for submission of paper or electronic corrections and, for Federal Pell Grant and applicants selected for verification, deadline dates for the submission of a valid SAR or valid ISIR to the institution must still be met. An institution may establish an earlier deadline for the submission of verification documents for purposes of the campus-based programs and the Federal Direct Loan Program, but it cannot be later than this deadline date.
- ⁴ Note that changes to previously submitted Identity Verification Results must be updated within 30 days.

Table B. Pell Grant, Iraq and Afghanistan Service Grant, Direct Loan, and TEACH Grant Programs Deadline Dates for Disbursement Information by Institutions for the 2014-2015 Award Year or Processing Year¹

Which program?	What is submitted?	Under what circumstances is it submitted?	Where is it submitted?	What are the deadlines for disbursement and for submission of records and information?
All (Pell Grant, Direct Loan, TEACH Grant, and Iraq and Afghanistan Service Grant programs)	An origination or disbursement record	The institution has made a disbursement.	To the Common Origination and Disbursement (COD) System using the Student Aid Internet Gateway (SAIG); or to the COD System using the COD Web site at: www.cod.ed.gov .	The earliest disbursement date is January 31, 2014. The earliest submission date for anticipated disbursement information is April 14, 2014. The earliest submission date for actual disbursement information is April 14, 2014, but no earlier than: (a) 7 calendar days prior to the disbursement date under the advance payment method or the Cash Monitoring #1 payment method; or (b) The date of disbursement under the Reimbursement or Cash Monitoring #2 payment methods.
Pell Grant, Iraq and	An origination or	The institution has made a	To COD using SAIG; or to	The deadline submission date ² is the

Afghanistan Service Grant, and TEACH Grant programs	disbursement record	disbursement and will submit records on or before the deadline submission date.	COD using the COD Web site at: www.cod.ed.gov .	earlier of: (a) 15 calendar days after the institution makes a disbursement or becomes aware of the need to make an adjustment to previously reported disbursement data, except that records for disbursements made between January 31, 2014 and April 14, 2014 must be submitted no later than April 29, 2014; or (b) September 30, 2015.
Direct Loan Program	An origination or disbursement record	The institution has made a disbursement and will submit records on or before the deadline submission date.	To COD using SAIG; or to COD using the COD Web site at: www.cod.ed.gov .	The deadline submission date ² is the earlier of: (a) 15 calendar days after the institution makes a disbursement or becomes aware of the need to make an adjustment to previously reported disbursement data, except that records of disbursements made between January 1, 2014, and March 23, 2014, may be submitted no later than April 7, 2014; or (b) July 29, 2016.
Pell Grant and Iraq and Afghanistan Service Grant programs	A downward adjustment to an origination or disbursement record	It is after the deadline submission date.	To COD using SAIG; or to COD using the COD Web site at: www.cod.ed.gov .	No later than September 30, 2020.

Pell Grant, TEACH Grant, Iraq and Afghanistan Service Grant, and Direct Loan programs	An origination or disbursement record.	After the deadline submission date the institution has received approval of its request for an extension to the deadline submission date. Requests for extensions to the established submission deadlines may be made for reasons, including, but not limited to:	Via the COD Web site at: www.cod.ed.gov .	The earlier of: (a) When the institution is fully reconciled and is ready to submit all additional data for the program and the award year; or (b) September 30, 2020.
Direct Loan Program		(a) A program review or initial audit finding under 34 CFR 690.83; (b) A late disbursement under 34 CFR 668.164(g); or (c) Disbursements previously blocked as a result of another institution failing to post a downward adjustment.		When the institution is fully reconciled and is ready to submit all additional data for the program and the award year.
Pell Grant and Iraq and Afghanistan Service Grant programs	An origination or disbursement record.	It is after the deadline submission date and the institution has received approval of its request for an extension to the deadline submission date based on a natural disaster, other unusual circumstances, or an administrative error made by the Department.	Via the COD Web site at: www.cod.ed.gov .	The earlier of: (a) A date designated by the Secretary after consultation with the institution; or (b) February 1, 2016.
Pell Grant and Iraq and Afghanistan Service Grant programs	An origination or disbursement record.	It is after the deadline submission date and the institution has received approval of its request for administrative relief to extend the deadline submission date based on a	Via the COD Web site at: www.cod.ed.gov .	The earlier of: (a) 15 days after the student reenrolls; or (b) May 3, 2016.

		student's reentry to the institution within 180 days after initially withdrawing. ³		
1	A COD Processing Year is a period of time in which institutions are permitted to submit Direct Loan records to the COD System that are related to a given award year. For a Direct Loan, the period of time includes loans that have a loan period covering any day in the 2014-2015 award year.			
2	Transmissions must be completed and accepted before 12:00 midnight (Eastern Time) to meet the deadline. If transmissions are started before 12:00 midnight but are not completed until after 12:00 midnight, those transmissions will not meet the deadline. In addition, any transmission submitted on or just prior to the deadline date that is rejected may not be reprocessed because the deadline will have passed by the time the user gets the information notifying him or her of the rejection.			
3	Applies only to students enrolled in clock-hour and nonterm credit-hour educational programs.			
NOTE: The COD System must accept origination data for a student from an institution before it accepts disbursement information from the institution for that student. Institutions may submit origination and disbursement data for a student in the same transmission. However, if the origination data is rejected, the disbursement data is rejected.

DEPARTMENT OF EDUCATION

[Docket ID ED-2014-OSERS-0058]

Extension of Public Comment Period; Request for Information on Addressing Significant Disproportionality Under Section 618(d) of the Individuals With Disabilities Education Act

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Notice extending public comment period.

SUMMARY: On June 19, 2014, we published in the **Federal Register** (79 FR 35154) a request for information (RFI) seeking comment on actions that the Department should take to address significant disproportionality based on race and ethnicity in the identification, placement, and discipline of children with disabilities. The RFI established a July 21, 2014, deadline for the submission of written comments. We are extending the comment period to July 28, 2014.

DATES: Comments must be received on or before July 28, 2014.

ADDRESSES: Submit your comments through the Federal eRulemaking Portal or via postal mail, commercial delivery, or hand delivery. We will not accept comments by fax or by email. Please submit your comments only one time, in order to ensure that we do not receive duplicate copies. In addition, please include the Docket ID at the top of your comments.

- *Federal eRulemaking Portal:* Go to www.regulations.gov to submit your comments electronically. Information on using Regulations.gov, including instructions for accessing agency documents, submitting comments, and viewing the docket is available on the site under "Are you new to the site?"

- *U.S. Mail, Commercial Delivery, or Hand Delivery:*

If you mail or deliver your comments about these proposed regulations, address them to the contact person listed under **FOR FURTHER INFORMATION CONTACT**.

- *Privacy Note:* The Department's policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at www.regulations.gov. Therefore, commenters should be careful to include in their comments only

information that they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT:

Larry Ringer, U.S. Department of Education, 400 Maryland Avenue SW., room 4032, Potomac Center Plaza, Washington, DC 20202-2600. Telephone: (202) 245-7496.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1-800-877-8339.

SUPPLEMENTARY INFORMATION:

Background:

On June 19, 2014, we published in the **Federal Register** an RFI seeking comment on actions that the Department should take to address significant disproportionality based on race and ethnicity in the identification, placement, and discipline of children with disabilities. The RFI established July 21, 2014, as the deadline for receiving comments. However, from June 19-25, 2014, the RFI was not consistently available on www.regulations.gov, the Government-wide portal that allows the public to comment electronically on documents in the **Federal Register**. To ensure that anyone unable to comment during that period has the opportunity to do so, we are extending the deadline for comments to July 28, 2014.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (e.g., braille, large print, audiotope, or compact disc) on request to the contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: www.gpo.gov/fdsys. At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at this site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: July 8, 2014.

Michael K. Yudin,

Acting Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000-01-P

DEPARTMENT OF ENERGY

Quadrennial Energy Review: Notice of Public Meeting

AGENCY: Office of Energy Policy and Systems Analysis, Secretariat, Quadrennial Energy Review Task Force, Department of Energy.

ACTION: Notice of public meeting.

SUMMARY: At the direction of the President, the U.S. Department of Energy (DOE or Department), as the Secretariat for the Quadrennial Energy Review Task Force (QER Task Force) will convene a public meeting to discuss and receive comments on issues related to the Quadrennial Energy Review.

DATES: The sixth public meeting will be held on July 28, 2014, beginning at 9:00 a.m. Mountain Time. Written comments are welcome, especially following the public meeting, and should be submitted within 60 days of the meeting.

ADDRESSES: The sixth meeting will be held at: University of Colorado-Denver, Auraria Campus, St. Cajetan's Center, 1190 9th Street, Denver, Colorado 80204.

You may submit written comments to: QERComments@hq.doe.gov or by U.S. mail to the Office of Energy Policy and Systems Analysis, EPSA-60, QER Meeting Comments, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585-0121.

For the sixth public meeting, please title your comment "Quadrennial Energy Review: Comment on the Public Meeting Gas-Electricity Interdependence."

FOR FURTHER INFORMATION CONTACT: Ms. Adonica Renee Pickett, EPSA-90, U.S. Department of Energy, Office of Energy Policy and Systems Analysis, 1000 Independence Avenue SW., Washington, DC 20585-0121. Telephone: (202) 586-9168. Email: Adonica.Pickett@hq.doe.gov.

SUPPLEMENTARY INFORMATION: On January 9, 2014, President Obama issued a *Presidential Memorandum - Establishing a Quadrennial Energy Review*. To accomplish this review, the Presidential Memorandum establishes a Quadrennial Energy Review Task Force to be co-chaired by the Director of the

Office of Science and Technology Policy, and the Director of the Domestic Policy Council. Under the Presidential Memorandum, the Secretary of Energy shall provide support to the Task Force, including support for coordination activities related to the preparation of the Quadrennial Energy Review Report, policy analysis and modeling, and stakeholder engagement.

The DOE, as the Secretariat for the Quadrennial Energy Review Task Force, will hold a series of public meetings to discuss and receive comments on issues related to the Quadrennial Energy Review.

The initial focus for the Quadrennial Energy Review will be our Nation's infrastructure for transporting, transmitting, storing and delivering energy. Our current infrastructure is increasingly challenged by transformations in energy supply, markets, and patterns of end use; issues of aging and capacity; impacts of climate change; and cyber and physical threats. Any vulnerability in this infrastructure may be exacerbated by the increasing interdependencies of energy systems with water, telecommunications, transportation, and emergency response systems. The first Quadrennial Energy Review Report will serve as a roadmap to help address these challenges.

The Department of Energy has a broad role in energy policy development and the largest role in implementing the Federal Government's energy research and development portfolio. Many other executive departments and agencies also play key roles in developing and implementing policies governing energy resources and consumption, as well as associated environmental impacts. In addition, non-Federal actors are crucial contributors to energy policies. Because most energy and related infrastructure is owned by private entities, investment by and engagement of the private sector is necessary to develop and implement effective policies. State and local policies; the views of nongovernmental, environmental, faith-based, labor, and other social organizations; and contributions from the academic and non-profit sectors are also critical to the development and implementation of effective energy policies.

An interagency Quadrennial Energy Review Task Force, which includes members from all relevant executive departments and agencies (agencies), will develop an integrated review of energy policy that integrates all of these perspectives. It will build on the foundation provided in the Administration's *Blueprint for a Secure Energy Future* of March 30, 2011, and

Climate Action Plan released on June 25, 2013. The Task Force will offer recommendations on what additional actions it believes would be appropriate. These may include recommendations on additional executive or legislative actions to address the energy challenges and opportunities facing the Nation.

July 28, 2014 Public Meeting: Gas-Electricity Interdependence

On July 28, 2014, the DOE will hold a public meeting in Denver, Colorado. The July 28, 2014 public meeting will feature facilitated panel discussions, followed by an open microphone session. Persons desiring to speak during the open microphone session at the public meeting should come prepared to speak for no more than 5 minutes and will be accommodated on a first-come, first-served basis, according to the order in which they register to speak on a sign-in sheet available at the meeting location, on the morning of the meeting.

In advance of the meeting, DOE anticipates making publicly available a briefing memorandum providing useful background information regarding the topics under discussion at the meeting. DOE will post this memorandum on its Web site: <http://energy.gov>.

Submitting comments via email. Submitting comments by email to the QER email address will require you to provide your name and contact information in the transmittal email. Your contact information will be viewable to DOE staff only. Your contact information will not be publicly viewable except for your first and last names, organization name (if any), and submitter representative name (if any). Your contact information will be publicly viewable if you include it in the comment itself or in any documents attached to your comment. Any information that you do not want to be publicly viewable should not be included in your comment, nor in any document attached to your comment. Otherwise, persons viewing comments will see only first and last names, organization names, correspondence containing comments, and any documents submitted with the comments.

Do not submit to the QER email address (QERcomments@hq.doe.gov) information for which disclosure is restricted by statute, such as trade secrets and commercial or financial information (hereinafter referred to as Confidential Business Information (CBI)). Comments submitted to the QER email address cannot be claimed as CBI. Comments received through the email address will waive any CBI claims for

the information submitted. For information on submitting CBI, see the Confidential Business Information section, below.

If you do not want your personal contact information to be publicly viewable, do not include it in your comment or any accompanying documents. Instead, provide your contact information in a cover letter. Include your first and last names, email address, telephone number, and optional mailing address. The cover letter will not be publicly viewable as long as it does not include any comments.

Include contact information each time you submit comments, data, documents, and other information to DOE. If you submit via mail or hand delivery/courier, please provide all items on a CD, if feasible, in which case it is not necessary to submit printed copies. No telefacsimiles (faxes) will be accepted.

Comments, data, and other information submitted to DOE electronically should be provided in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format. Provide documents that are not secured, written in English, and are free of any defects or viruses. Documents should not contain special characters or any form of encryption and, if possible, they should carry the electronic signature of the author.

Confidential Business Information. Pursuant to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email, postal mail, or hand delivery/courier two well-marked copies: One copy of the document marked "confidential" including all the information believed to be confidential, and one copy of the document marked "non-confidential" with the information believed to be confidential deleted. Submit these documents via email or on a CD, if feasible. DOE will make its own determination about the confidential status of the information and treat it according to its determination. Confidential information should be submitted to the Confidential QER email address: QERConfidential@hq.doe.gov.

Factors of interest to DOE when evaluating requests to treat submitted information as confidential include: (1) A description of the items; (2) whether and why such items are customarily treated as confidential within the industry; (3) whether the information is generally known by or available from other sources; (4) whether the information has previously been made available to others without obligation concerning its confidentiality; (5) an

explanation of the competitive injury to the submitting person which would result from public disclosure; (6) when such information might lose its confidential character due to the passage of time; and (7) why disclosure of the information would be contrary to the public interest. It is DOE's policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

Issued in Washington, DC, on July 8, 2014.

Michele Torrusio,

QER Secretariat, QER Interagency Task Force, U.S. Department of Energy.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Bonneville Power Administration

Hot Springs to Anaconda Transmission Line Rebuild Project

AGENCY: Bonneville Power Administration (BPA), Department of Energy (DOE). **ACTION:** Notice of intent to prepare an Environmental Impact Statement (EIS) and notice of floodplain and wetland assessment.

SUMMARY: In accordance with the National Environmental Policy Act (NEPA), BPA intends to prepare an EIS on its proposed rebuild of approximately 120 miles of existing 230-kilovolt (kV) wood-pole transmission line that runs through Sanders, Lake, Missoula, Granite, Powell, and Deer Lodge counties, Montana. The deteriorated condition of the more than 60-year-old line compromises BPA's ability to maintain reliable electric service, and poses a safety risk to the public and maintenance crews.

With this notice, BPA is initiating the public scoping process for the EIS and is requesting comments about the potential environmental impacts it should consider as it prepares the EIS for the proposed project. In accordance with DOE regulations for compliance with floodplain and wetland environmental review requirements, BPA will prepare a floodplain and wetlands assessment that identifies, evaluates, and as appropriate, implements actions to avoid or minimize potential harm to or within any affected floodplains and wetlands. The assessment will be included in the EIS.

DATES: Written comments are due to the address below by August 12, 2014.

Comments may also be made at three EIS scoping meetings to be held on the 29th, 30th, and 31st of July, 2014 at the addresses below.

ADDRESSES: Comments and suggestions on the proposed scope of the Draft EIS for this project and requests to be placed on the project mailing list may be mailed by letter to Bonneville Power Administration, Public Affairs—DKC-7, P.O. Box 14428, Portland, OR 97292-4428. Or you may FAX them to 503-230-3285; submit them on-line at www.bpa.gov/comment; or email them to comment@bpa.gov. Scoping meetings will be held in Montana from 4:00 p.m. to 7:00 p.m. at the following locations: July 29, 2014 at the Missoula Fire Department, Station 4, 3011 Latimor Street, Missoula; on July 30, 2014 at the Dixon Senior Citizens Center, 106 3rd Street, Dixon; and on July 31, 2014 at the William K. Kohrs Memorial Library, 501 Missouri Avenue, Deer Lodge. At these informal, open-house meetings, BPA will provide project information and maps. Members of the project team will be available to answer questions and accept verbal and written comments.

FOR FURTHER INFORMATION CONTACT: Doug Corkran, Environmental Coordinator, Bonneville Power Administration—KEC-4, P.O. Box 3621, Portland, Oregon, 97208-3621; toll-free telephone number 1-800-622-4519; direct number 503-230-7646; fax number 503-230-5699; or email at dfcorkran@bpa.gov. You may also contact Chad Hamel, Project Manager, Bonneville Power Administration—TEP-TPP-1, P.O. Box 3621, Portland, Oregon, 97208-3621; toll-free telephone 1-800-622-4519; direct telephone 360-619-6557; or email cjhamel@bpa.gov. Additional information can be found at the project Web site: www.bpa.gov/goto/HotSpringsAnaconda.

SUPPLEMENTARY INFORMATION: BPA proposes to rebuild three existing wood-pole transmission lines—the Hot Springs-Rattlesnake, Rattlesnake-Garrison, and Garrison-Anaconda lines—that run consecutively from Hot Springs, Montana to Anaconda, Montana. No major work has been done on the lines since they were built in 1952. Many of the structures, the electric wire (conductor), and associated structural components (cross arms, insulators, and dampers) are physically worn and structurally unsound in places. The wood transmission poles have lasted beyond the expected 55 to 60 years and now need to be replaced due to age, rot, and deterioration. Rebuilding the deteriorated line would maintain reliable electrical service and

avoid risks to the safety of the public and maintenance crews.

The project would include removing and replacing existing wood-pole structures and components, as well as the conductor; improving access roads and establishing temporary access where needed; removing trees adjacent to the line that may cause a threat to reliability; developing temporary staging areas for storage of project materials; and revegetating areas disturbed by construction activities. The existing structures would be replaced with structures of similar design within or near to their existing locations. The line would continue to operate at 230 kV.

Proposed activities would also include the installation of new line disconnect switches at the Hot Springs and Garrison substations, and upgrading the existing fiber optic line that is attached to the Hot Springs-Rattlesnake and Rattlesnake-Garrison transmission line structures.

Alternatives Proposed for Consideration: In addition to the Proposed Action, BPA will evaluate the No Action Alternative as well as any additional viable alternatives brought forward during the scoping process. Under the No Action Alternative, BPA would not rebuild the line and would make repairs on an as-needed or emergency basis.

Public Participation and Identification of Environmental Issues: The potential environmental issues identified for most transmission line projects include land use, cultural resources, visual impacts, sensitive plants and animals, erosion/soils, wetlands, floodplains, and fish and water resources. The existing lines cross about 50 miles of the Flathead Indian Reservation, small portions of the Lolo and Beaverhead-Deer Lodge National Forests, several miles of State land, as well as private land.

BPA has established a 30-day scoping period during which affected landowners, concerned citizens, special interest groups, local governments, and any other interested parties are invited to comment on the scope of the proposed EIS. Scoping will help BPA ensure that a full range of issues related to this proposal is addressed in the EIS, and also help identify significant or potentially significant impacts that may result from the proposed project. When completed, the Draft EIS will be circulated for review and comment, and BPA will hold at least one public comment meeting for the Draft EIS. BPA will consider and respond in the Final EIS to comments received on the Draft EIS. BPA's subsequent decision will be documented in a Record of Decision.

Issued in Portland, Oregon, on June 19, 2014.

Elliot Mainzer,

Administrator and Chief Executive Officer.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP14-504-000; PF14-3-000]

Transcontinental Gas Pipe Line Company, LLC; Notice of Application

Take notice that on June 23, 2014, Transcontinental Gas Pipe Line Company LLC (Transco), 2800 Post Oak Boulevard, Houston, Texas 77056, filed in the above referenced docket an application pursuant to section 7(c) of the Natural Gas Act (NGA), and Part 157 of the Commission's regulations requesting authorization to construct and operate the Rock Springs Expansion Project (Project), all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site web at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at FERCOnlineSupport@ferc.gov or call toll-free, (886) 208-3676 or TTY, (202) 502-8659.

Any questions concerning this application may be directed to Bill Hammons, P.O. Box 1396, Houston, Texas 77251, by telephone at (713) 215-2130.

Specifically, the Project consists of approximately 11.17 miles, 20-inch diameter pipeline lateral, a 4,000 horsepower compression station, and appurtenant facilities in Lancaster County, Pennsylvania and Cecil County, Maryland. Transco has executed a binding precedent agreement with ODEC for 100% of the capacity. The Project will enable Transco to provide 192 million cubic feet per day of incremental firm transportation capacity from Transco's Station 210 Zone 6 Pool in Mercer County, New Jersey to Old Dominion Electric Cooperative's (ODEC) proposed Wildcat Point Generating Facility in Cecil County, Maryland. Transco proposes that the firm transportation service will be rendered pursuant to Rate Schedule FT of Transco's FERC Gas Tariff and Transco's

blanket certificate under Part 284 (G) of the Commission's regulations. The approximate cost for the Project is \$79,476,150.

On October 16, 2013, the Commission staff granted Transco's request to utilize the Pre-Filing Process and assigned Docket No. PF14-3-000 to staff activities involved in the Project. Now, as of the filing of the June 23, 2014 application, the Pre-Filing Process for this project has ended. From this time forward, this proceeding will be conducted in Docket No. CP14-504-000, as noted in the caption of this Notice.

Pursuant to section 157.9 of the Commission's rules (18 CFR 157.9), within 90 days of this Notice, the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit seven copies of filings made in the proceeding with the Commission and must mail a copy to the applicant and to every other party. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments

considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Comment Date: 5:00 p.m. Eastern Time on July 24, 2014.

Dated: July 3, 2014.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Docket No. EL14–80–000]

Calpine Construction Finance Company, L.P. v. Tampa Electric Company; Notice of Complaint

Take notice that on July 1, 2014, pursuant to Rule 206 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.206 and sections 206 and 306 of the Federal Power Act, 16 U.S.C. 824(e) and 825(e), Calpine Construction Finance Company, L.P. (Complainant or CCFC) filed a formal complaint against Tampa Electric Company (Respondent or TECO) requesting that the Commission order TECO to permit CCFC to defer the commencement of service under the transmission service agreement between CCFC and TECO pursuant to section 17.7 of TECO's Open Access Transmission Tariff.

CCFC certifies that copies of the complaint were served on the contacts for the TECO as listed on the Commission's list of Corporate Officials.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainants.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC. [Docket No. ER13–102–003]

New York Independent System Operator, Inc.; Notice of Compliance Filing

Take notice that on July 2, 2014, New York Independent System Operator, Inc. (NYISO) submitted a compliance filing requesting deferral of the effective date of January 1, 2014 for its Open Access Transmission Tariff revisions filed to comply with the requirements of Order Nos. 1000 and 1000–A.¹ NYISO requests that the Commission immediately issue a notice providing for a shortened comment period, so as not to delay Commission action in underlying proceedings.

We grant NYISO's request for shortened comment period, with comments due on July 14, 2014. Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 619-158]

Pacific Gas and Electric Company and the City of Santa Clara; Notice of Environmental Site Review

On Monday, August 4, 2014, the Federal Energy Regulatory Commission (Commission) staff and the Pacific Gas and Electric Company and the City of Santa Clara (licensees) will conduct an environmental site review of the Bucks Creek Hydropower Project. The project is located on Bucks, Grizzly, and Milk Ranch Creeks in Plumas County, California.

The site review is open to the public and resource agencies and will occur from 9:00 a.m. to about 4:00 p.m. (Pacific Daylight Time). The following itinerary provides general guidance only and the specific itinerary including approximate times may change.

9:00 a.m. Meet at Bucks Lakeshore Resort [16001 Bucks Lake Rd., Quincy, CA 95971, (530) 283-2848]

- Safety briefing
- Project overview

9:30 a.m. Bucks Lake Recreation Features and Dam

- All recreation features in license
- Bucks storage dam

Noon Lunch (bring your own)

12:45 p.m. Lower Bucks Lake Recreation Features and Dam

- All recreation features in license, and view Lower Bucks dam from nearest recreation facility
- At Grizzly intake tower, show pictures of Three Lakes, the road to Three Lakes dam, and Milk Ranch conduit (not visiting these sites due to long distance, treacherous road conditions without specialized vehicle, and visitor safety)

2:00 p.m. Grizzly Forebay Features

- En route, stop at Grizzly powerhouse tunnel portal and view Grizzly penstock
- All recreation features in license, and view Grizzly forebay dam from nearest recreation facility
- Show pictures of Grizzly and Bucks powerhouses, Bucks penstock and other features (not visiting these sites due to specialized personal protective gear requirements and visitor safety)

4:00 p.m. Finish at Bucks Lakeshore Resort

To better support the safety of the group, participants will be requested to car pool in vehicles provided by the licensees. Participants are asked not to attempt to join the site review after it departs the initial meeting location. Participants must wear appropriate footwear (i.e., no sandals or open-toed shoes). Some brief walking over dirt trails may be needed.

To appropriately accommodate persons interested in attending the site tour, participants must contact Alan Mitchnick, FERC Team Leader, at (202) 502-6074 or alan.mitchnick@ferc.gov, no later than Monday, July 28, 2014.

Dated: July 2, 2014.

[Docket No. CP14-505-000]

WBI Energy Transmission, Inc.; Notice of Request Under Blanket Authorization

Take notice that on June 24, 2014, WBI Energy Transmission, Inc., (WBI Energy), 1250 West Century Avenue, Bismarck, North Dakota 58503, filed in Docket No. CP14-505-000, a prior notice request pursuant to sections 157.205 and 157.210 of the Commission's regulations under the Natural Gas Act to replace natural gas compression facilities at its Baker Compressor Station located in Fallon County, Montana. Specifically, WBI Energy proposes to replace two Ingersoll Rand 6SVG 330 horsepower (HP) natural gas fired compressor units (Units 6 and 7) with one Ajax 2802LE 384 HP natural gas driven compressor unit (Unit 10). The certificated horsepower at the Baker Compressor Station will decrease from 4,780 HP to 4,504 HP, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing may also be viewed on the Web at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at FERCOnlineSupport@ferc.gov or call toll-free, (866) 208-3676 or TTY, (202) 502-8659.

Any questions regarding this Application should be directed to Keith A. Tiggelaar, Director of Regulatory Affairs, WBI Energy Transmission, Inc., 1250 West Century Avenue, Bismarck, North Dakota 58503, or by calling (701) 530-1560, or by email keith.tiggelaar@wbienergy.com.

Any person may, within 60 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention. Any person filing to intervene or the Commission's staff may, pursuant to section 157.205 of the Commission's Regulations under the NGA (18 CFR 157.205) file a protest to the request. If no protest is filed within

the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenter's will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenter's will not be required to serve copies of filed documents on all other parties. However, the non-party commentary, will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests, and interventions via the internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (www.ferc.gov) under the "e-Filing" link. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal

Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Dated: July 3, 2014.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9913-39-OGC]

Proposed Consent Decree, Clean Air Act Citizen Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Proposed Consent Decree; Request for Public Comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act, as amended ("CAA" or the "Act"), notice is hereby given of a proposed consent decree to address a lawsuit filed by the National Parks Conservation Association, et al., ("Plaintiffs") in the United States District Court for the District of Minnesota: *National Parks Conservation Association v. McCarthy*, Civil Action No. 12-3043 (RHK/JSM) (D. Minn.). On December 5, 2012, Plaintiffs filed a complaint alleging that Gina McCarthy, in her official capacity as Administrator of the United States Environmental Protection Agency ("EPA"), failed to perform a mandatory duty to respond to a 2009 certification by the Department of the Interior ("DOI") that visibility impairment in Minnesota's Voyageurs National Park and Michigan's Isle Royale National Park is reasonably attributable to emissions from Xcel Energy's coal-fired Sherburne County Generating Station ("Sherco") in Minnesota. The proposed consent decree would establish deadlines for EPA to take such action.

DATES: Written comments on the proposed consent decree must be received by *August 11, 2014*.

ADDRESSES: Submit your comments, identified by Docket ID number EPA-HQ-OGC-2014-0508 online at www.regulations.gov (EPA's preferred method); by email to oei.docket@epa.gov; by mail to EPA Docket Center, Environmental Protection Agency, Mailcode: 2822T, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; or by hand delivery or courier to EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC, between 8:30 a.m. and 4:30 p.m. Monday through Friday, excluding legal holidays. Comments on

a disk or CD-ROM should be formatted in Word or ASCII file, avoiding the use of special characters and any form of encryption, and may be mailed to the mailing address above.

FOR FURTHER INFORMATION CONTACT:

Matthew C. Marks, Air and Radiation Law Office (2344A), Office of General Counsel, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone: (202) 564-3276; fax number: (202) 564-5603; email address: marks.matthew@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Additional Information About the Proposed Consent Decree

The proposed consent decree would address a lawsuit filed by Plaintiffs alleging that EPA failed to perform a mandatory duty pursuant to 40 CFR 51.302(c)(4)(iii) and (iv) to promulgate a federal reasonably attributable visibility impairment best available retrofit technology (“RAVI BART”) determination for the Sherco power plant in Minnesota in response to the DOI’s October 21, 2009 certification. In response to the lawsuit, EPA filed an answer on February 1, 2013, denying that the Administrator has a mandatory duty to promulgate RAVI BART for Sherco because EPA has not yet determined that visibility impairment at one or more Class I areas is reasonably attributable to emissions from Sherco. The proposed consent decree would require EPA to sign a proposed rule by February 27, 2015, and a final rule by August 31, 2015, in which EPA determines under 40 CFR 51.302(c)(4)(i) whether visibility impairment in Voyageurs National Park or Isle Royale National Park is reasonably attributable to Sherco. If EPA determines that visibility impairment in Voyageurs National Park or Isle Royale National Park is reasonably attributable to Sherco, then EPA’s final rulemaking shall also include EPA’s final determination of BART for Sherco. However, if EPA determines that visibility impairment in neither Voyageurs National Park nor Isle Royale National Park is reasonably attributable to Sherco, then BART for Sherco will not be required. In addition, the proposed consent decree states that if EPA signs a proposed rule by February 27, 2015, and a final rule by August 31, 2015, in which EPA either approves a State Implementation Plan (“SIP”) or promulgates a Federal Implementation Plan (“FIP”) under 40 CFR 51.308 that includes a final determination of BART for Sherco, then EPA’s obligation is fulfilled. The proposed consent decree also resolves any claim the Plaintiffs

have for the costs of litigation, including attorney fees.

For a period of thirty (30) days following the date of publication of this notice, the Agency will accept written comments relating to the proposed consent decree from persons who are not named as parties or interveners to the litigation in question. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act. Unless EPA or the Department of Justice determines that consent to this consent decree should be withdrawn, the terms of the consent decree will be affirmed.

II. Additional Information about Commenting on the Proposed Consent Decree

A. How can I get a copy of the consent decree?

The official public docket for this action (identified by Docket ID No. EPA-HQ-OGC-2014-0508 contains a copy of the proposed consent decree. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OEI Docket is (202) 566-1752.

An electronic version of the public docket is available through www.regulations.gov. You may use www.regulations.gov to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select “search”.

It is important to note that EPA’s policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing online at www.regulations.gov without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. Information claimed as CBI and other information whose disclosure is restricted by statute is not included in the official public docket or in the electronic public

docket. EPA’s policy is that copyrighted material, including copyrighted material contained in a public comment, will not be placed in EPA’s electronic public docket but will be available only in printed, paper form in the official public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the EPA Docket Center.

B. How and to whom do I submit comments?

You may submit comments as provided in the **ADDRESSES** section. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked “late.” EPA is not required to consider these late comments.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment and with any disk or CD-ROM you submit. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA’s electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the www.regulations.gov Web site to submit comments to EPA electronically is EPA’s preferred method for receiving comments. The electronic public docket system is an “anonymous access” system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment. In contrast to EPA’s electronic public docket, EPA’s electronic mail (email) system is not an “anonymous access” system. If you send an email comment directly to the Docket without going through www.regulations.gov, your email address is automatically captured and included as part of the comment that is placed in the official public docket, and made available in EPA’s electronic public docket.

Dated: June 27, 2014.

Lorie J. Schmidt,

Associate General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9913-44-OA]

Notification of Two Public Teleconferences of the Science Advisory Board Panel for the Review of the EPA Water Body Connectivity Report

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The EPA Science Advisory Board (SAB) Staff Office announces two public teleconferences of the SAB Panel to provide comments to the chartered SAB on the adequacy of the scientific and technical basis of the proposed rule titled *Definition of Waters of the United States under the Clean Water Act*.

DATES: The SAB Panel for the Review of the EPA Water Body Connectivity Report will conduct public teleconferences on August 20, 2014 and August 21, 2014. Each of the teleconferences will begin at 1:00 p.m. and end at 5:00 p.m. (Eastern Time).

Location: The public teleconferences will be conducted by telephone only.

FOR FURTHER INFORMATION CONTACT: Any member of the public wishing to obtain information concerning the public teleconferences may contact Dr. Thomas Armitage, Designated Federal Officer (DFO), EPA Science Advisory Board Staff Office (1400R), U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington, DC 20460; via telephone at (202) 564-2155 or via email at armitage.thomas@epa.gov. General information concerning the SAB as well as any updates concerning the teleconferences announced in this notice may be found on the EPA Web site at <http://www.epa.gov/sab>.

SUPPLEMENTARY INFORMATION: The SAB was established pursuant to the Environmental Research, Development, and Demonstration Authorization Act (ERDDAA), codified at 42 U.S.C. 4365, to provide independent scientific and technical advice to the Administrator on the technical basis for Agency positions and regulations. The SAB is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. The SAB will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies. Pursuant to FACA and EPA policy, notice is hereby given that the SAB Panel for the Review of the EPA Water Body Connectivity Report will hold two public teleconferences to provide comments to the chartered SAB on adequacy of the scientific and

technical basis of the proposed rule titled *Definition of Waters of the United States under the Clean Water Act*. This proposed rule was published by the EPA and the U.S. Army Corps of Engineers on April 21, 2014 (79 FR 22188).

Background: The SAB Panel for the Review of the EPA Water Body Connectivity Report was established to conduct a peer review of the EPA draft report titled *Connectivity of Streams and Wetlands to Downstream Waters: A Review and Synthesis of the Scientific Evidence* (September, 2013 External Review Draft, EPA/600/R-11/098B). The report was written to inform development of a rule proposed by the EPA and the U.S. Army Corps of Engineers to clarify the definition of waters of the United States under the Clean Water Act (79 FR 22188). The Panel was charged with reviewing the overall clarity and technical accuracy of the EPA draft report, whether it included and correctly summarized the most relevant peer-reviewed scientific literature, and whether the findings and conclusions were supported by the available science. To conduct the peer review, the Panel held a face-to-face meeting on December 16-18, 2013 [Federal Register Notice dated September 24, 2013 (78 FR 58536)], public teleconferences on April 28 and May 2, 2014 [Federal Register Notice dated April 1, 2014 (79 FR 18293)], and a public teleconference on June 19, 2014 [Federal Register Notice dated May 23, 2014 (79 FR 29760)]. Information about this activity may be found at http://yosemite.epa.gov/sab/sabproduct.nsf/fedrgstr_activites/Watershed%20Connectivity%20Report?OpenDocument.

The ERDDAA requires the EPA to make available to the SAB proposed criteria documents, standards, limitations, or regulations provided to any other federal agency for formal review and comment together with the relevant scientific and technical information on which the proposed action is based. The SAB may then make available to the Administrator its advice and comments on the adequacy of the scientific and technical basis of the proposed actions. The purpose of the upcoming teleconferences is for the SAB Panel to develop comments to the chartered SAB on the adequacy of the scientific and technical basis of the proposed rule cited above. Comments from the Panel will inform a letter to the EPA Administrator, to be prepared by the chartered SAB, on the adequacy of the scientific and technical basis of the proposed rule titled *Definition of Waters of the United States under the Clean*

Water Act. The two Panel teleconferences will be conducted as one complete meeting, beginning on August 20, 2014 and continuing on August 21, 2014. Information about this advisory activity may be found at http://yosemite.epa.gov/sab/sabproduct.nsf/fedrgstr_activites/WOUS-adv%26com?OpenDocument.

Availability of Meeting Materials:

Teleconference agendas and any other meeting materials will be placed on the SAB Web site at <http://www.epa.gov/sab> in advance of the teleconferences. The proposed rule titled *Definition of Waters of the United States under the Clean Water Act* is available on the EPA Web site at <http://www2.epa.gov/sites/production/files/2014-04/documents/fr-2014-07142.pdf>. For questions and information concerning the proposed rule please contact Ms. Donna Downing, Office of Water (4502-T), Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington, DC 20460; telephone (202) 566-2428 or via email at CWAwaters@epa.gov.

Procedures for Providing Public Input: Public comment for consideration by EPA's federal advisory committees and panels has a different purpose from public comment provided to EPA program offices. Therefore, the process for submitting comments to a federal advisory committee is different from the process used to submit comments to an EPA program office.

Federal advisory committees and panels, including scientific advisory committees, provide independent advice to EPA. Members of the public can submit comments for a federal advisory committee to consider as it develops advice for EPA. Input from the public to the SAB will have the most impact if it provides specific scientific or technical information or analysis for SAB panels to consider or if it relates to the clarity or accuracy of the technical information. Members of the public wishing to provide oral statements to the SAB Panel should contact the DFO directly. *Oral Statements:* In general, individuals or groups requesting an oral presentation at a public teleconference will be limited to three minutes. Interested parties should contact Dr. Thomas Armitage, DFO, in writing (preferably via email) at the contact information noted above by August 13, 2014 to be placed on the list of public speakers for August 20, 2014. *Written Statements:* Members of the public wishing to provide written comments may submit them to the EPA Docket electronically via www.regulations.gov by email, by mail, or by hand delivery/courier. Please follow the detailed instructions provided in the written

statements section of this notice. Written statements should be received in the EPA Docket by August 13, 2014 so that the information may be made available to the SAB Panel for its consideration. Written statements should be identified by Docket ID No. EPA-HQ-OA-2014-0010 and submitted to the Docket at www.regulations.gov by one of the following methods:

- www.regulations.gov: Follow the on-line instructions for submitting comments.
- Email: Docket_OEI@epa.gov: Include the docket number in the subject line of the message.
- Mail: Office of Environmental Information (OEI) Docket (Mail Code: 28221T), Docket ID No. EPA-HQ-OA-2014-0010, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460. The phone number is (202) 566-1752.
- Hand Delivery: The OEI Docket is located in the EPA headquarters Docket Center, Room 3334, EPA West Building, 1301 Constitution Ave. NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744. Deliveries are only accepted during the docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Direct your comments to Docket ID No. EPA-HQ-OA-2014-0010. Please ensure that your comments are submitted by August 13, 2014. Comments received after that date will be marked late and may not be provided to the SAB Panel for consideration before the August 20, 2014 teleconference. It is EPA's policy to include all comments received in the public docket without change and to make the comments available on-line at www.regulations.gov, including any personal information provided, unless a comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through www.regulations.gov or email. The www.regulations.gov Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email directly to EPA without going through www.regulations.gov, your email address will be automatically captured and included as part of the comment that is placed in the public docket and

made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comments due to technical difficulties and cannot contact you for clarification, the SAB Panel may not be able to consider your comments. Electronic files should avoid the use of special characters and any form of encryption and be free of any defects or viruses. For additional information about EPA's public docket, visit the EPA Docket Center homepage at www.epa.gov/epahome/dockets.htm.

Documents in the docket are listed in the www.regulations.gov index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material will be publicly available only in hard copy. Publicly available docket materials are available either electronically at www.regulations.gov or in hard copy at the OEI Docket in the EPA Headquarters Docket Center.

Accessibility: For information on access or services for individuals with disabilities, please contact Dr. Thomas Armitage at (202) 564-2155 or armitage.thomas@epa.gov. To request accommodation of a disability, please contact Dr. Armitage preferably at least ten days prior to the teleconference to give EPA as much time as possible to process your request.

Dated: June 30, 2014.

Thomas H. Brennan,
Deputy Director, EPA Science Advisory Staff
Office.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9913-43-OA]

Notification of a Public Meeting of the Science Advisory Board Advisory Panel on EPA's Report on the Environment 2014

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) Science Advisory Board (SAB) Staff Office announces a public meeting of the SAB Advisory Panel on EPA's Report on the Environment (ROE) 2014.

DATES: The SAB Advisory Panel on EPA's Report on the Environment 2014 public meeting will be held on Wednesday, July 30, 2014, from 9:00 a.m. to 5:00 p.m. Eastern Time and Thursday, July 31, 2014, from 8:30 a.m. to 4:00 p.m. Eastern Time.

ADDRESSES: The public meeting will be held at the J.W. Marriott, 1331 Pennsylvania Avenue NW., Washington, DC 20004.

FOR FURTHER INFORMATION CONTACT: Any member of the public who wishes further information concerning the public meeting may contact Ms. Stephanie Sanzone, Designated Federal Officer (DFO), via telephone at (202) 564-2067 or email at sanzone.stephanie@epa.gov. General information concerning the SAB can be found on the EPA Web site at <http://www.epa.gov/sab>.

SUPPLEMENTARY INFORMATION:

Background

The SAB was established pursuant to the Environmental Research, Development, and Demonstration Authorization Act (ERDDAA), codified at 42 U.S.C. 4365, to provide independent scientific and technical advice to the Administrator on the technical basis for agency positions and regulations. The SAB is a federal advisory committee chartered under the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. The SAB and its panels will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies. Pursuant to FACA and EPA policy, notice is hereby given that the SAB Advisory Panel on EPA's Report on the Environment 2014 will hold a public meeting to discuss the Agency's draft Report on the Environment (ROE) 2014. This SAB panel will provide advice to the Administrator through the chartered SAB.

EPA's ROE compiles and maintains indicators on the status and trends for environmental and human health conditions related to the mission of the agency. The indicators are focused on informing questions of interest to the EPA and its mission of protecting the environment and human health. The EPA's first ROE was released in draft in 2003 with the corresponding final report released in 2008 in hard copy and online format. The SAB provided advice on two draft versions leading up to the 2008 ROE; the findings and recommendations of those SAB reviews are available on the SAB Web site at www.epa.gov/sab (see reports EPA-SAB-05-004 and EPA-SAB-08-007). In 2009, SAB members provided

additional input to inform the continued development of future versions of the ROE (see report EPA-SAB-09-017). In response to suggestions from the SAB and additional comments from users of the ROE, the EPA developed the draft ROE 2014 as an entirely web-based product.

The EPA's Office of Research and Development has requested that the SAB review and comment on the recently released draft of the ROE Web site (<http://www.epa.gov/draftroe>) with particular attention to the new features added since the release of the 2008 report. Specifically, the Agency has requested the SAB to comment on the clarity of the ROE objectives for various audiences, the overarching conceptual framework based on a sustainability theme, the addition of statistical information for individual indicators, and the presentation of the ROE 2014 features in an online format.

The EPA made the draft ROE 2014 Web site available for public comment through April 27, 2014 (see <https://www.federalregister.gov/articles/2014/03/27/2014-06824/draft-revised-epas-report-on-the-environment-2014>). Public comments received by the agency will be provided to the SAB panel.

The purpose of the July 30-31, 2014, meeting is for the SAB Panel to be briefed on the ROE 2014 and to develop draft responses to a set of EPA charge questions. Additional information about this advisory activity, including the process for forming the SAB panel, can be found at the following URL: http://yosemite.epa.gov/sab/sabproduct.nsf/fedrgrstr_activites/ROE%202014?OpenDocument.

Technical Contacts

Any technical questions concerning EPA's draft ROE 2014 should be directed to Dr. Jeffrey Frithsen at (703) 347-8623 or by email at frithsen.jeffrey@epa.gov.

Availability of Meeting Materials

The external review draft of the ROE 2014 is available at <http://www.epa.gov/draftroe>. Additional information, including the meeting agenda, the EPA charge and other materials provided to the panel, will be accessible prior to the meeting through the calendar link on the blue navigation bar at <http://www.epa.gov/sab/>.

Procedures for Providing Public Input

Public comment for consideration by EPA's federal advisory committees and panels has a different purpose from public comment provided to EPA program offices. Therefore, the process for submitting comments to a federal

advisory committee is different from the process used to submit comments to an EPA program office. Federal advisory committees and panels, including scientific advisory committees, provide independent advice to the EPA.

Interested members of the public may submit relevant written or oral information on the topic of this advisory activity (including the review materials and the charge), and/or the group conducting the activity, for the SAB to consider during the advisory process. Input from the public to the SAB will have the most impact if it provides specific scientific or technical information or analysis for SAB committees to consider or if it relates to the clarity or accuracy of the technical information. Members of the public wishing to provide comment should contact the DFO directly. *Oral Statements:* In general, individuals or groups requesting an oral presentation at a public meeting will be limited to five minutes. Interested parties should contact Ms. Stephanie Sanzone, DFO, in writing (preferably via email) at the contact information noted above by July 23, 2014, to be placed on the list of public speakers for the meeting.

Written Statements: Written statements should be supplied to the DFO via email at the contact information noted above by July 23, 2014, so that the information may be made available to the panel members for their consideration prior to the meeting. Written statements should be supplied in one of the following electronic formats: Adobe Acrobat PDF, MS Word, MS PowerPoint, or Rich Text files in IBM-PC/Windows 98/2000/XP format. It is the SAB Staff Office general policy to post written comments on the Web page for the advisory meeting or teleconference. Submitters are requested to provide an unsigned version of each document because the SAB Staff Office does not publish documents with signatures on its Web sites. Members of the public should be aware that their personal contact information, if included in any written comments, may be posted to the SAB Web site. Copyrighted material will not be posted without explicit permission of the copyright holder.

Accessibility

For information on access or services for individuals with disabilities, please contact Ms. Stephanie Sanzone at (202) 564-2067 or sanzone.stephanie@epa.gov. To request accommodation of a disability, please contact Ms. Sanzone preferably at least ten days prior to the meeting to give EPA as much time as possible to process your request.

Dated: June 25, 2014.

Christopher Zarba,

Director, EPA Science Advisory Board Staff Office.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-R04-OW-2014-0453; FRL 9913-57-OW]

Public Water System Supervision Program Revision for the State of Mississippi

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Notice of tentative approval.

SUMMARY: Notice is hereby given that the State of Mississippi is revising its approved Public Water System Supervision Program. Mississippi has adopted the following rules: Long Term 1 Enhanced Surface Water Treatment Rule, Long Term 2 Enhanced Surface Water Treatment Rule, Stage 2 Disinfectants and Disinfection Byproducts Rule, Lead and Copper Rule Short-Term Regulatory Revisions and Clarifications, and Ground Water Rule. The EPA has determined that Mississippi's rules are no less stringent than the corresponding Federal regulations. Therefore, the EPA is tentatively approving this revision to the State of Mississippi's Public Water System Supervision Program.

DATES: Any interested person may request a public hearing. A request for a public hearing must be submitted by August 11, 2014, to the Regional Administrator at the EPA Region 4 address shown below. The Regional Administrator may deny frivolous or insubstantial requests for a hearing. However, if a substantial request for a public hearing is made by August 11, 2014, a public hearing will be held. If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on her own motion, this tentative approval shall become final and effective on August 11, 2014. Any request for a public hearing shall include the following information: The name, address and telephone number of the individual, organization or other entity requesting a hearing; a brief statement of the requesting person's interest in the Regional Administrator's determination and a brief statement of the information that the requesting person intends to submit at such hearing; and the signature of the individual making the request or, if the

request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

ADDRESSES: All documents relating to this determination are available for inspection between the hours of 8:30 a.m. and 4:30 p.m., Monday through Friday, at the following offices: Mississippi State Department of Health, Bureau of Public Water Supply, 570 East Woodrow Wilson Drive, Jackson, Mississippi 39216; and the U.S. Environmental Protection Agency Region 4, Safe Drinking Water Branch, 61 Forsyth Street SW., Atlanta, Georgia 30303.

FOR FURTHER INFORMATION CONTACT: Dale Froneberger, EPA Region 4, Safe Drinking Water Branch, by mail at the Atlanta address given above, by telephone at (404) 562-9446, or by email at froneberger.dale@epa.gov.

EPA Analysis: On August 29, 2012, the State of Mississippi submitted a request that the Region approve a revision to the State's Safe Drinking Water Act Public Water System Supervision Program to include the authority to implement and enforce the Long Term 1 Enhanced Surface Water Treatment Rule, the Long Term 2 Enhanced Surface Water Treatment Rule, the Stage 2 Disinfectants and Disinfection Byproducts Rule, and the Lead and Copper Rule Short-Term Regulatory Revisions and Clarifications. On November 6, 2012, the State of Mississippi submitted a request that the Region approve a revision to the State's Safe Drinking Water Act Public Water System Supervision Program to include the authority to implement and enforce the Ground Water Rule. For the requests to be approved, the EPA must find the State Rules codified at 15 Miss. Admin. Code Pt. 20, Subpt. 72, Ch. 1., to be no less stringent than the Federal Rules codified at 40 CFR Part 141, Subpart T—Enhanced Filtration and Disinfection—Systems Serving Fewer Than 10,000 People; 40 CFR part 141, Subpart W—Enhanced Treatment for *Cryptosporidium*; 40 CFR part 141, Subpart L—Disinfectant Residuals, Disinfection Byproducts, and Disinfection Byproduct Precursors; 40 CFR Part 141, Subpart U—Initial Distribution System Evaluations; 40 CFR part 141, Subpart V—Stage 2 Disinfection Byproducts Requirements; 40 CFR part 141, Subpart I—Control of Lead and Copper; and 40 CFR Part 141, Subpart S—Ground Water Rule. The EPA reviewed the applications using the Federal statutory provisions (Section 1413 of the Safe Drinking Water Act), Federal regulations (at 40 CFR part 142),

State regulations, rule crosswalks, and EPA regulatory guidance to determine whether the requests for revision are approvable. The EPA determined that the Mississippi regulations are no less stringent than the corresponding Federal regulations.

EPA Action: The EPA is tentatively approving this revision. If the EPA does not receive a timely and appropriate request for a hearing and the Regional Administrator does not elect to hold a hearing on her own motion, this tentative approval will become final and effective on August 11, 2014.

Authority: Section 1413 of the Safe Drinking Water Act, as amended (1996), and 40 CFR Part 142.

Dated: June 16, 2014.

Heather McTeer Toney,

Regional Administrator, Region 4.

BILLING CODE 6560-50-P

EXPORT-IMPORT BANK

[Public Notice 2014-0035]

Application for Final Commitment for a Long-Term Loan or Financial Guarantee in Excess of \$100 Million: AP088819XX

AGENCY: Export-Import Bank of the United States.

ACTION: Notice.

SUMMARY: This Notice is to inform the public, in accordance with Section 3(c)(10) of the Charter of the Export-Import Bank of the United States ("Ex-Im Bank"), that Ex-Im Bank has received an application for final commitment for a long-term loan or financial guarantee in excess of \$100 million (as calculated in accordance with Section 3(c)(10) of the Charter). Comments received within the comment period specified below will be presented to the Ex-Im Bank Board of Directors prior to final action on this Transaction.

DATES: Comments must be received on or before August 5, 2014 to be assured of consideration before final consideration of the transaction by the Board of Directors of Ex-Im Bank.

ADDRESSES: Comments may be submitted through Regulations.gov at WWW.REGULATIONS.GOV. To submit a comment, enter EIB-2014-0035 under the heading "Enter Keyword or ID" and select Search. Follow the instructions provided at the Submit a Comment screen. Please include your name, company name (if any) and EIB-2014-0035 on any attached document.

Reference: AP088819XX.

Purpose and Use:

Brief description of the purpose of the transaction:

To support the export of U.S.-manufactured aircraft and engines.

Brief non-proprietary description of the anticipated use of the items being exported:

To provide commercial passenger air transportation services globally.

To the extent that Ex-Im Bank is reasonably aware, the item(s) being exported are not expected to produce exports or provide services in competition with the exportation of goods or provision of services by a United States industry.

Parties: Principal Supplier: The Boeing Company and General Electric; Obligor: ICBC Financial Leasing Co., Ltd.; Guarantor(s): ICBC International Leasing Co., Ltd.

Description of Items Being Exported: Boeing 787 aircraft.

Information on Decision: Information on the final decision for this transaction will be available in the "Summary Minutes of Meetings of Board of Directors" on <http://exim.gov/newsandevents/boardmeetings/board/>.

Confidential Information: Please note that this notice does not include confidential or proprietary business information; information which, if disclosed, would violate the Trade Secrets Act; or information which would jeopardize jobs in the United States by supplying information that competitors could use to compete with companies in the United States.

Alla Lake,

Ex-Im Bank Records Officer, (Contractor).

BILLING CODE 6690-01-P

FEDERAL RESERVE SYSTEM**Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company**

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank

indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than July 28, 2014.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690-1414:

1. *Michael O. and Sheila F. Cloonen, both of Palmer, Texas, as co-trustees of the Michael O. Cloonen and Sheila F. Cloonen Revocable Trust, and Larry R. Tarman and Susan M. Tarman, both of Morris, Illinois;* as a group to acquire voting shares of First Mazon Bancorp, Inc., and thereby indirectly acquire voting shares of Mazon State Bank, both in Mazon, Illinois.

Board of Governors of the Federal Reserve System, July 8, 2014.

Michael J. Lewandowski,

Associate Secretary of the Board.

BILLING CODE 6210-01-P

FEDERAL RESERVE SYSTEM**Formations of, Acquisitions by, and Mergers of Bank Holding Companies**

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than August 7, 2014.

A. Federal Reserve Bank of Minneapolis (Jacquelyn K. Brunmeier, Assistant Vice President) 90 Hennepin Avenue, Minneapolis, Minnesota 55480-0291:

1. *Wilcox Bancshares, Inc.,* Grand Rapids, Minnesota; to acquire 100 percent of the voting shares of Crow River State Bank, Delano, Minnesota.

Board of Governors of the Federal Reserve System, July 8, 2014.

Michael J. Lewandowski,

Associate Secretary of the Board.

BILLING CODE 6210-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Centers for Disease Control and Prevention****Board of Scientific Counselors, National Center for Injury Prevention and Control, (BSC, NCIPC)**

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC) announces, the following meeting of the aforementioned committee:

Time and Date: 9:00 a.m.–12:00 p.m., July 29, 2014 (Closed).

Place: Teleconference.

Status: The meeting as designated above will be closed to the public in accordance with provisions set forth in Section 552b(c)(4) and (6), Title 5 U.S.C., and the Determination of the Director, Management Analysis and Services Office, CDC pursuant to Public Law 92-463.

Purpose: The Board of Scientific Counselors makes recommendations regarding policies, strategies, objectives, and priorities; and reviews progress toward injury prevention goals and provides evidence in injury prevention-related research and programs. The Board also provides advice on the appropriate balance of intramural and extramural research, the structure, progress, and performance of intramural programs. The Board is designed to provide guidance on extramural scientific program matters, including the: (1) Review of extramural research concepts for funding opportunity announcements; (2) conduct of Secondary Peer Review of extramural research grants, cooperative agreements, and contracts applications received in response to the funding opportunity announcements as it relates to the Center's programmatic balance and mission; (3) submission of secondary review recommendations to the Center

Director of applications to be considered for funding support; (4) review of research portfolios, and (5) review of program proposals.

Matters for Discussion: The Board of Scientific Counselors, National Center for Injury Prevention and Control (BSC, NCIPC) will meet to conduct a Secondary Peer Review of extramural research grant applications received in response to five (5) Funding Opportunity Announcements (FOAs) “Research to Prevent Prescription Drug Overdoses”, FOA CE14-002; “Motor Vehicle Injury Prevention: Evaluation of Increased Nighttime Enforcement of Seatbelts Uses”, FOA CE14-003; “Research on Integration of Injury Prevention in Health Systems”, FOA CE14-004; “Evaluating Promising Strategies to Build the Evidence Base for Sexual Violence Prevention”, FOA CE14-005; and “Research Grants for Preventing Violence and Violence-Related Injury”, FOA CE14-006. Applications will be assessed for applicability to the Center’s mission and programmatic balance. Recommendations from the secondary review will be voted upon and the applications will be forwarded to the Acting Center Director for consideration for funding support.

Contact Person for More Information: Gwendolyn H. Cattledge, Ph.D., M.S.E.H., Deputy Associate Director for Science, NCIPC, CDC, 4770 Buford Highway NE., Mailstop F-63, Atlanta, GA 30341, Telephone (770) 488-1430.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS-10137, CMS-10237, CMS-10398 and CMS-10522]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS’ intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency’s functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by September 9, 2014.

ADDRESSES: When commenting, please reference the document identifier or OMB control number (OCN). To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to <http://www.regulations.gov>. Follow the instructions for “Comment or Submission” or “More Search Options” to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB

Control Number _____, Room C4-26-05, 7500 Security Boulevard, Baltimore, Maryland 21244-1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS’ Web site address at <http://www.cms.hhs.gov/PaperworkReductionActof1995>.

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to Paperwork@cms.hhs.gov.

3. Call the Reports Clearance Office at (410) 786-1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786-1326.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection’s supporting statement and associated materials (see **ADDRESSES**).

CMS-10137 Solicitation for Applications for Medicare Prescription Drug Plan 2015 Contracts

CMS-10237 Part C—Medicare Advantage and 1876 Cost Plan Expansion Application

CMS-10398 Generic Clearance for Medicaid and CHIP State Plan, Waiver, and Program Submissions

CMS-10522 Executive Summary Form for Research Identifiable Data

Under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term “collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. Type of Information Collection

Request: Revision of a currently approved collection; *Title of Information Collection:* Solicitation for Applications for Medicare Prescription Drug Plan 2015 Contracts; *Use:* The information will be collected under the solicitation of proposals from PDP, MA-PD, Cost Plan, PACE, and EGWP applicants. We will use the information to ensure that applicants meet our requirements and support the determination of contract awards. Participation in the Part D program is voluntary in nature. Only organizations that are interested in participating in the program will respond to the solicitation. The MA-PDs that voluntarily participate in the Part C program must submit a Part D application and successful bid. *Form Number:* CMS-10137 (OMB control number: 0938-0936); *Frequency:* Yearly; *Affected Public:* Private sector—Business or other for-profits and Not-for-profit institutions; *Number of Respondents:* 254; *Total Annual Responses:* 254; *Total Annual Hours:* 2,193. (For policy questions regarding this collection contact Arianne Spaccarelli at 410-786-5715).

2. Type of Information Collection

Request: Revision of a currently approved collection; *Title of Information Collection:* Part C—Medicare Advantage and 1876 Cost Plan Expansion Application; *Use:* The information will be collected under the solicitation of Part C applications from MA, EGWP Plan, and Cost Plan applicants and will be used to ensure that applicants meet our requirements and support the determination of contract awards. Participation in all programs is voluntary in nature; only organizations that are interested in participating in the program will respond to the solicitation. The MA-PDs that voluntarily participate in the Part C program must submit a Part D application and successful bid. *Form Number:* CMS-10237 (OMB control number: 0938-0935); *Frequency:* Yearly; *Affected Public:* Private sector—Business or other for-profits and Not-for-profit institutions; *Number of Respondents:* 566; *Total Annual Responses:* 566; *Total Annual Hours:* 22,625. (For policy questions regarding this collection contact Melissa Staud at 410-786-3669).

3. Type of Information Collection

Request: Revision of a currently approved collection; *Title of Information Collection:* Generic Clearance for Medicaid and CHIP State Plan, Waiver, and Program Submissions;

Use: State Medicaid and CHIP agencies are responsible for developing submissions to CMS, including State plan amendments and requests for waivers and program demonstrations. States use templates when they are available and submit the forms to review for consistency with statutory and regulatory requirements (or in the case of waivers and demonstrations whether the proposal is likely to promote the objectives of the Medicaid program). If the requirements are met, we approve the States' submissions giving the States the authority to implement the flexibilities. For a State to receive Medicaid Title XIX funding, there must be an approved Title XIX State plan.

The development of streamlined submissions forms enhances the collaboration and partnership between States and CMS by documenting our policy for States to use as they are developing program changes. Streamlined forms improve efficiency of administration by creating a common and user-friendly understanding of the information we need to quickly process requests for State plan amendments, waivers, and demonstration, as well as ongoing reporting. *Form Number:* CMS-10398 (OMB control number: 0938-1148); *Frequency:* Collection specific, but generally the frequency is yearly, once, and occasionally; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 56; *Total Annual Responses:* 1,120; *Total Annual Hours:* 28,747. (For policy questions regarding this collection contact Annette Pearson at 410-786-6858).

4. *Type of Information Collection Request:* New collection (Request for a new OMB control number); *Title of Information Collection:* Executive Summary Form for Research Identifiable Data; *Use:* The Centers for Medicare & Medicaid Services (CMS) is responsible for administering the Medicare, Medicaid and State Children's Health Insurance Programs. We collect data to support the Agency's mission and operations. These data include information about Medicare beneficiaries, Medicare claims, Medicare providers, and Medicaid eligibility and claims. We disclose the identifiable data consistent with the routine uses identified in the Privacy Act Systems of Records notices that are published in the **Federal Register** and the limitations on uses and disclosures that are set out in the HIPAA Privacy Rule.

All requests for identifiable data are received and reviewed by the Division of Privacy Operations & Compliance (DPOC) in the Office of E-Health

Standards and Services. The DPOC staff and the CMS Privacy Officer review the requests to determine if there is legal authorization for disclosure of the data. If legal authorization exists, the request is reviewed to ensure that the minimal data necessary is requested and approved for the project. Requests for identifiable data for research purposes must be submitted to and approved by the CMS Privacy Board. To assist the CMS Privacy Board with its review of research data requests, OIPDA has developed the Executive Summary (ES) forms. The ES collects all the information that the CMS Privacy Board needs to review and make a determination on whether the request meets the requirements for release of identifiable data for research purposes. We currently have three versions of the ES Form and an ES Supplement for Requestors of the National Death Index (NDI) Causes of Death Variables. Each meets the need for a different type of requestor. *Form Number:* CMS-10522 (OMB control number: 0938-New); *Frequency:* On occasion; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 325; *Total Annual Responses:* 325; *Total Annual Hours:* 650. (For policy questions regarding this collection contact Kim Elmo at 410-786-0161).

Dated: July 3, 2014.

Martique Jones,

Deputy Director, Regulations Development Group, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS-304/CMS-304a, CMS-368/CMS-R-144 and CMS-10517]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow

a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by August 11, 2014.

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions:

OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395-5806 OR, Email: OIRA_submission@omb.eop.gov.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at <http://www.cms.hhs.gov/PaperworkReductionActof1995>.

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to Paperwork@cms.hhs.gov.

3. Call the Reports Clearance Office at (410) 786-1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786-1326.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information,

including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Reconciliation of State Invoice and Prior Quarter Adjustment Statement; *Use:* Form CMS-304 (Reconciliation of State Invoice) is used by manufacturers to respond to the state's rebate invoice for current quarter utilization. Form CMS-304a (Prior Quarter Adjustment Statement) is required only in those instances where a change to the original rebate data submittal is necessary. *Form Number:* CMS-304 and -304a (OMB control number: 0938-0676); *Frequency:* Quarterly; *Affected Public:* Private sector—Business or other for-profits; *Number of Respondents:* 1,037; *Total Annual Responses:* 4,148; *Total Annual Hours:* 187,880. (For policy questions regarding this collection contact Andrea Wellington at 410-786-3490.)

2. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Medicaid Drug Rebate Program Forms; *Use:* We develop the rebate amount per drug unit from information supplied by the drug manufacturers and distributes these data to the states. States then must report quarterly to the drug manufacturers and report to us the total number of units of each dosage form/strength of their covered outpatient drugs reimbursed during a quarter and the rebate amount to be refunded. This report is due within 60 days of the end of each calendar quarter. The information in the report is based on claims paid by the state Medicaid agency during a calendar quarter. Form CMS-R-144 (Quarterly Report Data) is required from states quarterly to report utilization for any drugs paid for during that quarter. Form CMS-368 (Administrative Data) is required only in those instances where a change to the original data submittal is necessary. *Form Number:* CMS-368 and -R-144 (OMB control number: 0938-0582); *Frequency:* Quarterly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 56; *Total Annual Responses:* 224; *Total Annual Hours:* 12,101. (For policy questions regarding this collection contact Andrea Wellington at 410-786-3490.)

3. *Type of Information Collection Request:* New collection (Request for a

new control number); *Title of Information Collection:* The Predictive Learning Analytics Tracking Outcome (PLATO™); *Use:* The Predictive Learning Analytics Tracking Outcome (PLATO™) is a web-based application tool that will serve as the centerpiece of the advanced analytics initiative with the Centers for Medicare & Medicaid Services (CMS) and Health Integrity, LLC, the National Benefit Integrity Medicare Integrity Contractor (NBI MEDIC). Developed by Health Integrity, LLC and licensed for one of its contracts—the NBI MEDIC—PLATO™ utilizes a cutting-edge advanced analytics fraud detection process in conjunction with a state-of-the-art web-based user interface tool to present fraud and abuse lead information visually to Medicare Part D plan sponsors. Summary data, based on National Prescription Drug Event Data and actions from all Part D plan sponsors, is shared with law enforcement, CMS, NBI MEDIC, and Part D plan sponsors to review historic actions taken against providers who are enrolled in the Medicare Part D program, which will assist in detecting and preventing fraud, waste, and abuse. *Form Number:* CMS-10517 (OMB control number: 0938—New); *Frequency:* Monthly; *Affected Public:* Private sector—Business or other for-profits and Not-for-profit institutions; *Number of Respondents:* 1,550; *Total Annual Responses:* 1,550; *Total Annual Hours:* 18,600. (For policy questions regarding this collection contact Delois Newkirk at 410-786-1247.)

Dated: July 3, 2014.

Martique Jones,

Deputy Director, Regulations Development Group, Office of Strategic Operations and Regulatory Affairs.

Food and Drug Administration

[Docket No. FDA-2011-D-0125]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Guidance for Industry on Establishing That a Tobacco Product Was Commercially Marketed in the United States as of February 15, 2007

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995 (PRA).

DATES: Fax written comments on the collection of information by August 11, 2014.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, Attn: FDA Desk Officer, FAX: 202-395-7285, or emailed to oir_submission@omb.eop.gov. All comments should be identified with the OMB control number 0910-New and title "Guidance for Industry on Establishing That a Tobacco Product Was Commercially Marketed in the United States as of February 15, 2007." Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, 8455 Colesville Rd., COLE-14526, Silver Spring, MD 20993-0002, PRAStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA

has submitted the following proposed collection of information to OMB for review and clearance.

Guidance for Industry on Establishing That a Tobacco Product Was Commercially Marketed in the United States as of February 15, 2007—(OMB Control Number 0910-New)

This guidance provides information on how a manufacturer may establish that a tobacco product was commercially marketed in the United States as of February 15, 2007. Grandfathered tobacco products are not considered new tobacco products and thus are not subject to premarket review. A grandfathered tobacco product may also serve as the predicate tobacco product in a Section 905(j) Report: Demonstrating Substantial Equivalence for Tobacco Products (intended to be used toward demonstrating substantial equivalence) for a new tobacco product (section 905(j)(1)(A)(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 387e(j)(1)(A)(i))).

The guidance recommends that the manufacturer submit information adequate to demonstrate that the tobacco product was commercially marketed in the United States as of February 15, 2007. Examples of such information may include, but are not limited to, the following: dated copies of advertisements, dated catalog pages,

dated promotional material, and dated bills of lading.

FDA's estimate of the number of respondents is based on the fact that requesting an Agency determination of the grandfathered status of a tobacco product under the guidance is not required and also on indications of interest of making such request. The number of hours to gather the evidence is FDA's estimate of how long it might take one to review, gather, and submit dated information if making a request for Agency determination. After further consideration of these estimates, FDA has reduced the number of hours to submit this information from 10 to 5 hours.

In the **Federal Register** of April 25, 2011 (76 FR 22903), FDA published a 60-day notice requesting public comment on the proposed collection of information. No comments were submitted on FDA's estimates of the number of respondents or burden. FDA received three comments that generally addressed topics related to the recommendations of the guidance, including questions about the status of tobacco products that were in test markets in the United States as of February 15, 2007, and how much evidence should be submitted.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN¹

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Submit evidence of commercial marketing in the United States as of February 15, 2007	150	1	150	5	750

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

FDA based the estimates on information it received from interactions with the industry that 3 large manufacturers might submit as many as 25 packages of evidence annually, and other manufacturers might submit as many as 125 packages of evidence indicating that their tobacco product was commercially marketed in the United States as of February 15, 2007, for a total of 150 responses annually. FDA further estimates it would take a manufacturer approximately 5 hours to put together this collection of evidence and to submit the package to FDA for review. This is a reduction from FDA's original estimate of 10 hours per response. FDA estimates that it should take approximately 750 hours annually (150

responses times 5 hours for each response) to respond to this collection of information.

Dated: July 8, 2014.
Leslie Kux,
Assistant Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration
 [Docket No. FDA-2012-E-0434]

Determination of Regulatory Review Period for Purposes of Patent Extension; HORIZANT

AGENCY: Food and Drug Administration, HHS.
ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for HORIZANT and is publishing this notice of that determination as required by law. FDA has made the determination because of the

submission of an application to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human drug product.

ADDRESSES: Submit electronic comments to <http://www.regulations.gov>. Submit written petitions (two copies are required) and written comments to the Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit petitions electronically to <http://www.regulations.gov> at Docket No. FDA-2013-S-0610.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Management, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6257, Silver Spring, MD 20993-0002, 301-796-7900.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100-670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human drug product HORIZANT (gabapentin enacarbil). HORIZANT is

indicated for the treatment of moderate to severe primary Restless Legs Syndrome in adults. Subsequent to this approval, the USPTO received a patent term restoration application for HORIZANT (U.S. Patent No. 6,818,787) from Xenoport, Inc., and the USPTO requested FDA's assistance in determining this patent's eligibility for patent term restoration. In a letter dated July 2, 2012, FDA advised the USPTO that this human drug product had undergone a regulatory review period and that the approval of HORIZANT represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for HORIZANT is 2,277 days. Of this time, 1,459 days occurred during the testing phase of the regulatory review period, while 818 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 355(i)) became effective:* January 12, 2005. FDA has verified the applicant's claim that the date the investigational new drug application became effective was on January 12, 2005.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the FD&C Act:* January 9, 2009. FDA has verified the applicant's claim that the new drug application (NDA) for Horizant (NDA 22-399) was submitted on January 9, 2009.

3. *The date the application was approved:* April 6, 2011. FDA has verified the applicant's claim that NDA 22-399 was approved on April 6, 2011.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 882 days of patent term extension.

Anyone with knowledge that any of the dates as published are incorrect may submit to the Division of Dockets Management (see **ADDRESSES**) either electronic or written comments and ask for a redetermination by September 9, 2014. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by January 7, 2015. To meet its

burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41-42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Interested persons may submit to the Division of Dockets Management (see **ADDRESSES**) electronic or written comments and written or electronic petitions. It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. If you submit a written petition, two copies are required. A petition submitted electronically must be submitted to <http://www.regulations.gov>, Docket No. FDA-2013-S-0610. Comments and petitions that have not been made publicly available on <http://www.regulations.gov> may be viewed in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

Dated: July 8, 2014.

Leslie Kux,

Assistant Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2014-N-0829]

Draft Guidance for Industry on Reporting Drug Sample Information Under Section 6004 of the Affordable Care Act; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft guidance for industry entitled "Reporting Drug Sample Information Under Section 6004 of the Affordable Care Act." On March 23, 2010, the Patient Protection and Affordable Care Act (ACA) was signed into law. The Secretary of Health and Human Services has delegated authority to FDA to issue guidance to identify the information to be submitted under section 6004 and oversee and make arrangements for the collection of such information. FDA is issuing this draft guidance to provide information to assist persons submitting drug sample information under ACA section 6004, and to advise industry of an updated compliance policy. This draft guidance revises the draft compliance policy guide issued on April 3, 2012.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by October 9, 2014. Submit either electronic or written comments concerning the proposed collection of information by September 9, 2014.

ADDRESSES: Submit written requests for single copies of the draft guidance to the Office of Communications, Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Bldg., 4th floor, Rm. 4147, Silver Spring, MD 20993, or the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993-0002. The draft guidance may also be obtained by mail by calling CBER at 1-800-835-4709 or 301-827-1800. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

Submit electronic comments on the draft guidance to <http://www.regulations.gov>. Submit written comments to the Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Karen Rothschild, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 4282, Silver Spring, MD 20903, 301-796-3689, or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20903, 240-402-7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled "Reporting Drug Sample Information Under Section 6004 of the Affordable Care Act." On March 23, 2010, the ACA was signed into law. Among its many provisions, section 6004 of the ACA amended the Social Security Act (SSA) by adding section 1128H (42 U.S.C. 1320a-7i). This new section required the submission of certain drug sample

information to FDA not later than April 1 of each year, beginning April 1, 2012.

In particular, section 6004 requires reporting about drug sample requests and distributions from manufacturers and authorized distributors of record (ADRs) of applicable drugs (prescription drugs), which are defined in the ACA as drugs subject to section 503(b) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 353(b)) for which payment is available under Title XVIII or the SSA or a State plan under Title XIX or XXI of the SSA (or a waiver of such plan). (See 42 U.S.C. 1320a-7i(b)(1).) The Secretary has delegated authority to FDA to issue guidance identifying the information to be submitted under section 6004, and to oversee and arrange for the collection of such information.

Section 6004 is not part of the Prescription Drug Marketing Act (PDMA) but must be read together with that act. Two of the terms used in section 6004 are defined by reference to the PDMA. In addition, the PDMA and its implementing regulations at 21 CFR part 203, subpart D (beginning at § 203.30 (21 CFR 203.30)) require the collection and maintenance of information that must be submitted under section 6004. For example, § 203.38(b) requires that a manufacturer or ADR *maintain* records of drug sample distribution for all samples distributed under section 503(d)(2) or 503(d)(3) of the FD&C Act that are sufficient to permit tracking of sample units to the point of the licensed practitioner. Under section 6004, manufacturers and ADRs must now *submit* much of the same information, aggregated as specified, to FDA.

Another example of how the PDMA and section 6004 are complementary is that the PDMA requires manufacturers and ADRs to collect signatures to ensure that drug samples are distributed on the request of authorized persons and that their receipt is accounted for by persons authorized to take responsibility for them. The purpose of this requirement is to ensure a tight chain of custody, which is why no person other than the practitioner or a specified designee (i.e., not a common carrier) may sign for receipt of drug samples. The requirement in section 6004 to report drug sample requests and distributions for each drug, aggregated by signature, is to ensure that FDA has the information needed to demonstrate compliance with this important PDMA provision.

In the **Federal Register** of April 3, 2012 (77 FR 20025), FDA issued a draft guidance for industry entitled "Compliance Policy on Reporting Drug

Sample Distribution Information Under the Affordable Care Act," concerning section 6004. In that draft guidance, FDA explained that the Electronic Submissions Gateway (the Gateway) was available and ready to receive submissions of drug sample information as required by section 6004. That guidance also stated FDA's temporary compliance policy with regard to those submissions, and FDA's intent to issue subsequent guidance with details to better assist persons submitting drug sample information under section 6004 and to advise industry of an updated compliance policy. FDA received comments on the guidance and on the use of the Gateway to submit the drug sample information required by section 6004. After carefully considering submitted comments, FDA has revised the draft guidance, adding more substantive information and announcing an updated compliance policy, and is reissuing it as a draft to facilitate public comment.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the Agency's current thinking on reporting drug sample information under section 6004 of the ACA. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

Under the Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3501-3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information that they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA, 44 U.S.C. 3506(c)(2)(A), requires Federal Agencies to provide a 60-day notice in the **Federal Register** for each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing this notice of the proposed collection of information set forth in this document.

With respect to the collection of information associated with this draft guidance, FDA invites comments on the following topics: (1) Whether the proposed information collected is necessary for the proper performance of

FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimated burden of the proposed information collected, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of information collected on the respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Under section 6004 of the ACA, manufacturers and ADRs must submit the following drug sample information to FDA each year: (1) The identity and quantity of drug samples requested; (2) the identity and quantity of drug samples distributed; (3) the name, address, professional designation, and signature of any person who makes or signs for the request; and (4) any other category of information determined appropriate by the Secretary. The draft guidance clarifies the specific information that should be submitted under this provision and the manner in which that information should be submitted.

The draft guidance states that FDA's Gateway became available for drug sample reporting under 6004 in March 2012, and that FDA intends to continue the use of the Gateway for this purpose. The Gateway accepts submissions in XML format. Technical specifications for the data type and size for submitting each of the items listed previously may be found in the ACA Industry

Submission Specifications User Guide, available at: <http://www.fda.gov/downloads/Drugs/GuidanceComplianceRegulatoryInformation/UCM297610.pdf>.

The Gateway requests that manufacturers and ADRs provide the following information, which is sufficient to comply with the reporting requirements set forth in section 6004 of the ACA:

- The year the sample was distributed to the provider;
- the type of business (i.e., either manufacturer or distributor);
- the business name of the manufacturer or distributor that distributed the drug sample;
- the trade name and dosage of the drug sample distributed;
- the total quantity of the drug requested by the practitioner during the calendar year;
- the total quantity of the drug distributed to the practitioner during the calendar year;
- the first name, last name, and middle initial of the practitioner;
- the practitioner's designation (i.e., M.D., D.O., P.A., or more);
- the street number, street name, city, state, and ZIP code address of the practitioner;
- an electronic affirmation that a signed written request for drug samples was received by the manufacturer or ADR from the licensed practitioner and is available to FDA upon request;
- an electronic affirmation that a signature of the requesting practitioner, or appropriate designee, acknowledging receipt of drug samples has been

received by the manufacturer or ADR and is available to FDA upon request;

- the first name, last name, and middle initial of a practitioner's designee; and
- the address, including street number, street, city, state, and ZIP code of the designee.

Based on the current number of submissions since the enactment of section 6004 of the ACA, we estimate that annually a total of approximately 120 to 250 manufacturers or ADRs ("number of respondents" in table 1) will submit the drug sample information specified, resulting in approximately 120 to 250 annual submissions ("total annual responses" in table 1). We also estimate that preparing and submitting this information to FDA will take approximately 500 to 600 hours for each manufacturer or ADR ("hours per response" in table 1). We base the burden hour estimate on information we obtained from two manufacturers who have submitted the drug sample information since the enactment of section 6004 of the ACA. We are using the upper end of these ranges to calculate the burden in table 1, and the burden hour estimate includes the time that may be needed to submit any followup or additional information to FDA. In addition, for purposes of this notice, FDA assumes that only manufacturers will submit the required information on behalf of all samples distributed, thereby excluding the need for ADRs to do so.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN ¹

Section 6004 of the ACA	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Submission of drug sample information	250	1	250	600	150,000

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

III. Comments

Interested persons may submit either electronic comments regarding this document to <http://www.regulations.gov> or written comments to the Division of Dockets Management (see ADDRESSES). It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at <http://www.regulations.gov>.

IV. Electronic Access

Persons with access to the Internet may obtain the document at either <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, <http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/default.htm>, or <http://www.regulations.gov>.

[Docket No. FDA-2014-D-0902]

Draft Guidance for Industry on Abbreviated New Drug Application Submissions; Amendments and Easily Correctable Deficiencies Under the Generic Drug User Fee Amendments; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft guidance for industry entitled “ANDA Submissions—Amendments and Easily Correctable Deficiencies Under GDUFA.” The guidance document is intended to assist applicants in preparing to submit to FDA amendments to abbreviated new drug applications (ANDAs) or prior approval supplements (PASs) under the Federal Food, Drug, and Cosmetic Act (the FD&C Act), by explaining how the Generic Drug User Fee Amendments of 2012 (GDUFA) performance metric goals apply to these submissions. When finalized, this guidance will replace the December 2001 guidance for industry entitled “Major, Minor, and Telephone Amendments to Abbreviated New Drug Applications” in consideration of the new amendment review tier system and performance goals under GDUFA.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by September 9, 2014.

ADDRESSES: Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 2201, Silver Spring, MD 20993-0002 or the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

Submit electronic comments on the draft guidance to <http://www.regulations.gov>. Submit written comments to the Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Elizabeth Giaquinto, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 75, Rm. 1670, Silver Spring, MD 20993-0002, 240-402-7930, Elizabeth.Giaquinto@fda.hhs.gov or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903

New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993-0002, 240-402-7911, stephen.ripley@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled “ANDA Submissions—Amendments and Easily Correctable Deficiencies Under GDUFA.” On July 9, 2012, GDUFA (Pub. L. 112-144, Title III) was signed into law by the President to speed the delivery of safe and effective generic drugs to the public and reduce costs to industry. Under GDUFA, FDA agreed to certain performance goals and procedures for the review of amendments submitted to original ANDAs and PASs filed on or after October 1, 2014.

This draft guidance describes how FDA intends to classify major amendments, minor amendments, and easily correctable deficiencies (ECDs). Specifically, the draft guidance defines the types of amendments and describes the GDUFA performance metric goals for the amendment tiers, the process for submitting amendments, and dispute resolution procedures regarding amendment classifications.

In accordance with the Commitment Letter, the GDUFA performance metrics described in the draft guidance only apply to amendments to original ANDAs and PASs submitted on or after October 1, 2014, and do not apply to amendments submitted on or after October 1, 2014, that amend original ANDAs or PASs submitted before October 1, 2014.

Elsewhere in this issue of the **Federal Register**, FDA is announcing another draft guidance entitled “ANDA Submissions—Prior Approval Supplements Under GDUFA,” which describes FDA’s performance metric goals and clarifies how FDA will handle a PAS and amendments to a PAS for an ANDA.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the Agency’s current thinking on “ANDA Submissions—Amendments and Easily Correctable Deficiencies Under GDUFA.” It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). The collections of information in 21 CFR 314.96 have been approved under OMB control number 0910-0001.

III. Comments

Interested persons may submit either electronic comments regarding this document to <http://www.regulations.gov> or written comments to the Division of Dockets Management (see **ADDRESSES**). It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at <http://www.regulations.gov>.

III. Electronic Access

Persons with access to the Internet may obtain the document at either <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, <http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, or <http://www.regulations.gov>.

Dated: July 8, 2014.

Leslie Kux,

Assistant Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2014-D-0901]

Draft Guidance for Industry on Abbreviated New Drug Application Submissions—Prior Approval Supplements Under the Generic Drug User Fee Amendments of 2012; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft guidance for industry entitled “ANDA Submissions—Prior Approval

Supplements Under GDUFA.” The Generic Drug User Fee Amendments of 2012 (GDUFA) enables FDA to assess user fees to fund critical and measurable improvements to FDA’s generic drugs program. This draft guidance is intended to assist applicants preparing to submit to FDA prior approval supplements (PASs) and amendments to PASs for abbreviated new drug applications (ANDAs). It describes FDA’s performance metric goals for PASs and clarifies how FDA will handle a PAS and amendments to a PAS for an ANDA subject to the GDUFA performance metric goals.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by September 9, 2014.

ADDRESSES: Submit written requests for single copies of this draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, rm. 2201, Silver Spring, MD 20993–0002, or the Office of Communication, Outreach, and Development, Center for Biologics Evaluation and Research, 10903 New Hampshire Ave., Bldg. 71, rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the SUPPLEMENTARY INFORMATION section for electronic access to the guidance document.

Submit electronic comments on the draft guidance to <http://www.regulations.gov>. Submit written comments to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Benjamin Chacko, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 75, Rm. 1673, Silver Spring, MD 20993–0002, 240–402–7924 or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled “ANDA Submissions—Prior Approval Supplements Under GDUFA.” On July

9, 2012, the President signed GDUFA (Pub. L. 112–144, Title III) into law. GDUFA is based on an agreement negotiated by FDA and representatives of the generic drug industry to address a growing number of regulatory challenges. GDUFA aims to ensure timely access to safe, high-quality, low-cost generic drugs. GDUFA enables FDA to assess user fees to fund critical and measurable improvements to FDA’s generic drugs program and to bring greater predictability and timeliness to the review of generic drug applications.

GDUFA requires that FDA and human generic drug manufacturers meet certain commitments. In the GDUFA Commitment Letter, FDA committed to review and act on a certain percentage of PASs within a specified time period from the date of submission for receipts in fiscal years (FY) 2015–2017. The percentage of PASs that FDA has committed to review and act on varies for each fiscal year, and the deadlines for review depend on whether a PAS requires an inspection.

This draft guidance describes the performance metric goals that FDA agreed to in the Commitment Letter and clarifies how FDA will review a PAS and amendments to a PAS for an ANDA subject to the GDUFA performance metric goals. The GDUFA performance metrics described in this draft guidance only apply to ANDA applicants that submit a PAS on or after October 1, 2014. These performance metrics do not apply to new drug applications (NDAs), biologics license applications (BLAs), supplements filed for NDAs or BLAs, or changes being effected (CBE) supplements and annual report filings to NDAs, BLAs, or ANDAs.

Elsewhere in this issue of the **Federal Register**, FDA is publishing another draft guidance entitled “ANDA Submissions—Amendments and Easily Correctable Deficiencies Under GDUFA,” which explains how the GDUFA performance metric goals apply to amendments made to ANDAs and to PASs.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The guidance, when finalized, will represent the Agency’s current thinking on how GDUFA relates to prior approval supplements for ANDAs. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

II. The Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information for supplements and amendments in 21 CFR part 314 have been approved under OMB control number 0910–0001. The collection of information for manufacturer registration in 21 CFR part 207 has been approved under OMB control number 0910–0045. The collection of information for manufacturer compliance with current good manufacturing practices in 21 CFR part 211 has been approved under OMB control number 0910–0139.

III. Comments

Interested persons may submit either electronic comments regarding this document to <http://www.regulations.gov> or written comments to the Division of Dockets Management (see **ADDRESSES**). It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at <http://www.regulations.gov>.

IV. Electronic Access

Persons with access to the Internet may obtain the document at either <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, <http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidance/default.htm>, or <http://www.regulations.gov>.

Dated: July 8, 2014.

Leslie Kux,

Assistant Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2014–N–0894]

2014 Scientific Meeting of the National Antimicrobial Resistance Monitoring System; Public Meeting; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public meeting; request for comments.

SUMMARY: The Food and Drug Administration (FDA) is announcing a public meeting entitled “2014 Scientific Meeting of the National Antimicrobial Resistance Monitoring System.” The purpose of the meeting is to discuss progress made in achieving the goals of the National Antimicrobial Resistance Monitoring System (NARMS) Strategic Plan: 2012–2016.

Dates And Time: The public meeting will be held on August 12 and 13, 2014, from 8 a.m. to 5 p.m.

ADDRESSES: *Location:* The public meeting will be held at the FDA White Oak Campus, 10903 New Hampshire Ave., Building 31, Great Room (rm. 1503A), Silver Spring, MD 20993–0002. Please note that visitors to the White Oak Campus must enter through Building 1. The White Oak Campus location is a Federal facility with security procedures. For parking and security information, please refer to <http://www.fda.gov/AboutFDA/WorkingatFDA/BuildingsandFacilities/WhiteOakCampusInformation/ucm241740.htm>.

FOR FURTHER INFORMATION CONTACT: Laura Bradbard, Center for Veterinary Medicine (HFV–12), Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855, 240–276–9109, FAX: 240–276–9115, laura.bradbard@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: NARMS periodically conducts public meetings to inform stakeholders of NARMS activities and receive comments on ways to improve. The last two public NARMS meetings (held in 2010 and 2011) focused on recommendations made by the FDA Science Board Advisory Subcommittee in 2007. These meetings dealt with enhancing international partnerships, and improving NARMS sampling. Since then, NARMS created the 2012–2016 Strategic Plan that addressed all of the Science Board’s recommendations (<http://www.fda.gov/downloads/AnimalVeterinary/SafetyHealth/AntimicrobialResistance/NationalAntimicrobialResistanceMonitoringSystem/UCM236283.pdf>). A number of strategic planning goals already have been achieved and several of the objectives outlined in the plan are ongoing. The purpose of this meeting will be to provide updates on progress of the NARMS 2012–2016 strategic plan, discuss possible future activities, and receive comments for the official record. A number of items will be discussed including comparisons of new and old slaughter sampling

methods, the role of NARMS in foodborne outbreaks, results of interagency research projects using advanced detection methods, and how these scientific advances impact FDA decisionmaking.

Registration and Requests for Oral Presentations: Interested persons may make oral presentations on the topic of the discussion of the meeting. Oral presentations from the public during the open public comment period will be scheduled between approximately 3:50 p.m. and 4:50 p.m. on August 13, 2014. Those desiring to make oral presentations should notify the contact person by July 29, 2014, and submit a brief statement of the general nature of information they wish to present. In an effort to accommodate all who desire to speak, time allotted for each presentation may be limited. The contact person will inform each speaker of their schedule prior to the meeting.

Registration is required for the meeting. Please send registration information (including name, title, organization, address, and telephone and fax numbers) by email to Laura Bradbard (see **FOR FURTHER INFORMATION CONTACT**) by July 29, 2014. There is no fee to register for the public meeting, and registration will be on a first-come, first-served basis.

If you need special accommodations due to a disability, please contact Laura Bradbard (see **FOR FURTHER INFORMATION CONTACT**) at least 7 days in advance.

Comments: Regardless of attendance at the public meeting, interested persons may submit either electronic or written comments regarding the topic to be discussed at the meeting. Submit electronic comments to <http://www.regulations.gov>. Submit written comments to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday. The docket will remain open for written or electronic comments for 30 days following the meeting.

Agenda: The meeting will address monitoring and research for NARMS. The final agenda for the public meeting will be made available on the Agency’s Web site at <http://www.fda.gov/AnimalVeterinary/SafetyHealth/AntimicrobialResistance/NationalAntimicrobialResistanceMonitoringSystem/ucm059135.htm> and will be posted to the docket

at <http://www.regulations.gov> no later than 2 weeks prior to the meeting.

Transcripts: FDA will prepare a meeting transcript and make it available on the Agency’s Web site (see *Agenda*) after the meeting. FDA anticipates that transcripts will be available approximately 60 business days after the meeting. The transcript will be available for public examination at the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday. A transcript will also be available in either hardcopy or on CD–ROM after submission of a Freedom of Information request. Written requests are to be sent to Division of Freedom of Information (ELEM–1029), Food and Drug Administration, 12420 Parklawn Dr., Element Bldg., Rockville, MD 20857.

Dated: July 7, 2014.

Leslie Kux,

Assistant Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Inspector General

Solicitation of Information and Recommendations for Revising OIG’s Non-Binding Criteria for Implementing Permissive Exclusion Authority Under Section 1128(b)(7) of the Social Security Act

AGENCY: Office of Inspector General (OIG), HHS.

ACTION: Notice and Opportunity for Comment.

SUMMARY: This **Federal Register** notice informs the public that OIG: (1) Is considering revising the Non-Binding Criteria for Implementing Permissive Exclusion Authority Under Section 1128(b)(7) of the Social Security Act (62 FR 67392, December 24, 1997), and (2) is soliciting input from the public for OIG to consider in developing the revised criteria.

DATES: To ensure consideration, public comments must be delivered to the address provided below by no later than 5 p.m. on September 9, 2014.

ADDRESSES: In commenting, please refer to file code OIG–1271–N. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of three ways (no duplicates, please):

1. *Electronically.* You may submit electronic comments on specific recommendations and proposals through the Federal eRulemaking Portal at <http://www.regulations.gov>.

2. *By regular, express, or overnight mail.* You may send written comments to the following address: Patrice Drew, Office of Inspector General, Department of Health and Human Services, Attention: OIG-1271-N, Room 5296, Cohen Building, 330 Independence Avenue SW., Washington, DC 20201. Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By hand or courier.* If you prefer, you may deliver, by hand or courier, your written comments before the close of the comment period to Patrice Drew, Office of Inspector General, Department of Health and Human Services, Cohen Building, 330 Independence Avenue SW., Washington, DC 20201. Because access to the interior of the Cohen Building is not readily available to persons without Federal Government identification, commenters are encouraged to schedule their delivery with one of our staff members at (202) 619-1368.

For information on viewing public comments, please see the Supplementary Information section.

FOR FURTHER INFORMATION CONTACT: Patrice Drew, Department of Health and Human Services, Office of Inspector General, Office of External Affairs, at (202) 619-1368.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the end of the comment period are available for viewing by the public. All comments will be posted on <http://www.regulations.gov> as soon as possible after the closing of the comment period. Comments received timely will also be available for public inspection as they are received at Office of Inspector General, Department of Health and Human Services, Cohen Building, 330 Independence Avenue SW., Washington, DC 20201, Monday through Friday of each week from 10 a.m. to 4 p.m. To schedule an appointment to view public comments, phone (202) 619-1368.

Background

Section 1128(b)(7) of the Social Security Act (Act) authorizes the Secretary, and by delegation the Inspector General, to exclude an individual or entity from participation in the Federal health care programs for engaging in conduct described in sections 1128A and 1128B of the Act. In

general, OIG may seek to exclude any person who violates the Federal False Claims Act, 31 U.S.C. 3729-3733, or the Civil Monetary Penalties Law, section 1128A of the Act. For example, submitting or causing the submission of false or fraudulent claims or soliciting or paying kickbacks in violation of the Federal Anti-Kickback Statute, section 1128B of the Act, can result in exclusion from participation in Medicare, Medicaid, and all other Federal health care programs. On October 24, 1997, OIG published a proposed policy statement in the **Federal Register** (62 FR 55410) in the form of non-binding criteria to be used by OIG in assessing whether to impose a permissive exclusion under section 1128(b)(7) of the Act. On December 24, 1997, OIG published the final policy statement in the **Federal Register** (62 FR 67392).

Since 1997, OIG has used these criteria to evaluate whether to impose a permissive exclusion under section 1128(b)(7) of the Act or release this authority in exchange for the defendant's entering into an Integrity Agreement with OIG. On the basis of our experience evaluating permissive exclusion in False Claims Act and administrative cases over the past 17 years, we are considering revising the existing criteria. We believe revised criteria may help the provider community understand how OIG exercises its discretion in cases under section 1128(b)(7) of the Act. We also believe that updated guidance could better reflect the state of the health care industry today, including the changes in legal requirements and the emergence of the health care compliance industry.

In considering possible revisions to the criteria, we are soliciting comments, recommendations, and other suggestions from concerned parties on how best to revise the criteria to address relevant issues and to provide useful guidance to the health care industry. The issues we are considering include, but are not limited to: (1) Whether there should be differences in the criteria for individuals and entities and (2) whether and how to consider a defendant's existing compliance program.

After reviewing any timely submitted comments, we will decide whether and how to revise the non-binding criteria for use in evaluating exclusion under 1128(b)(7) of the Act where the defendant has defrauded the Federal health care programs.

Dated: June 7, 2014.

Daniel R. Levinson,

Inspector General.

[FR Doc. 2014-16222 Filed 7-10-14; 8:45 am]

BILLING CODE 4150-04-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Inspector General

Special Fraud Alert: Laboratory Payments to Referring Physicians

AGENCY: Office of Inspector General (OIG), HHS.

ACTION: Notice.

SUMMARY: This Special Fraud Alert addresses compensation paid by laboratories to referring physicians and physician group practices (collectively, physicians) for blood specimen collection, processing, and packaging, and for submitting patient data to a registry or database. OIG has issued a number of guidance documents and advisory opinions addressing the general subject of remuneration offered and paid by laboratories to referring physicians, including the 1994 Special Fraud Alert on Arrangements for the Provision of Clinical Laboratory Services, the OIG Compliance Program Guidance for Clinical Laboratories, and Advisory Opinion 05-08. In these and other documents, we have repeatedly emphasized that providing free or below-market goods or services to a physician who is a source of referrals, or paying such a physician more than fair market value for his or her services, could constitute illegal remuneration under the anti-kickback statute. This Special Fraud Alert supplements these prior guidance documents and advisory opinions and describes two specific trends OIG has identified involving transfers of value from laboratories to physicians that we believe present a substantial risk of fraud and abuse under the anti-kickback statute.

I. The Anti-Kickback Statute

One purpose of the anti-kickback statute is to protect patients from inappropriate medical referrals or recommendations by health care professionals who may be unduly influenced by financial incentives. Section 1128B(b) of the Social Security Act (the Act) makes it a criminal offense to knowingly and willfully offer, pay, solicit, or receive any remuneration to induce, or in return for, referrals of items or services reimbursable by a Federal health care program. When remuneration is paid purposefully to induce or reward referrals of items or services payable by a Federal health care program, the anti-kickback statute is violated. By its terms, the statute ascribes criminal liability to parties on both sides of an impermissible "kickback" transaction. Violation of the statute constitutes a felony punishable

by a maximum fine of \$25,000, imprisonment up to 5 years, or both. Conviction will also lead to exclusion from Federal health care programs, including Medicare and Medicaid. OIG may also initiate administrative proceedings to exclude persons from the Federal health care programs or to impose civil money penalties for fraud, kickbacks, and other prohibited activities under sections 1128(b)(7) and 1128A(a)(7) of the Act.

II. Remuneration From Laboratories To Referring Physicians

Arrangements between referring physicians and laboratories historically have been subject to abuse and were the topic of one of the OIG's earliest Special Fraud Alerts.¹ In that Special Fraud Alert, we stated that, "[w]henver a laboratory offers or gives to a source of referrals anything of value not paid for at fair market value, the inference may be made that the thing of value is offered to induce the referral of business." More generally, we have, on various occasions, repeated our position that arrangements providing free or below-market goods or services to actual or potential referral sources are suspect and may violate the anti-kickback statute, depending on the circumstances.²

Likewise, when a laboratory pays a physician more than fair market value for the physician's services or for services the laboratory does not actually need or for which the physician is otherwise compensated, the anti-kickback statute is implicated. Such payments are suspect under the anti-kickback statute because of the implication that one purpose of the payments is to induce the physician's Federal health care program referrals. OIG also historically has been concerned with arrangements in which the amounts paid to a referral source take into account the volume or value of business generated by the referral source.

Arrangements in which laboratories provide free or below-market goods or services to physicians or make payments to physicians that are not commercially reasonable in the absence of Federal health care program referrals potentially raise four major concerns typically associated with kickbacks—corruption of medical judgment, overutilization, increased costs to the Federal health care programs and beneficiaries, and unfair competition.

This is because such transfers of value may induce physicians to order tests from a laboratory that provides them with remuneration, rather than the laboratory that provides the best, most clinically appropriate service. Such transfers of value also may induce physicians to order more laboratory tests than are medically necessary, particularly when the transfers of value are tied to, or take into account, the volume or value of business generated by the physician. We are particularly concerned about these types of arrangements because the choice of laboratory, as well as the decision to order laboratory tests, typically is made or strongly influenced by the physician, with little or no input from patients.

Although physicians may order any tests they believe are appropriate to diagnose and treat their patients, Medicare will pay for laboratory tests only if they meet Medicare coverage criteria and are reasonable and necessary.³ Moreover, claims that include items or services resulting from a violation of the anti-kickback statute are not payable by Medicare and may constitute false claims under the False Claims Act, even if the items or services are medically necessary.⁴ OIG recognizes that the lawfulness of any particular arrangement under the anti-kickback statute depends on the intent of the parties. Such intent may be evidenced by the arrangement's characteristics, including its legal structure, its operational safeguards, and the actual conduct of the parties to the arrangement. Nonetheless, we believe the following types of arrangements between laboratories and physicians are suspect under the anti-kickback statute.

A. Blood-Specimen Collection, Processing, and Packaging Arrangements

OIG has become aware of arrangements under which clinical laboratories are providing remuneration to physicians to collect, process, and package patients' specimens. This Special Fraud Alert addresses arrangements under which laboratories pay physicians, either directly or indirectly (such as through an arrangement with a marketing or other agent) to collect, process, and package patients' blood specimens (Specimen Processing Arrangements).⁵ Specimen

Processing Arrangements typically involve payments from laboratories to physicians for certain specified duties, which may include collecting the blood specimens, centrifuging the specimens, maintaining the specimens at a particular temperature, and packaging the specimens so that they are not damaged in transport. Payments under Specimen Processing Arrangements typically are made on a per-specimen or per-patient-encounter basis and often are associated with expensive or specialized tests.

Medicare allows the person who collects a specimen to bill Medicare for a nominal specimen collection fee in certain circumstances, including times when the person draws a blood sample through venipuncture (*i.e.*, inserting into a vein a needle with syringe or vacuum tube to draw the specimen).⁶ Medicare allows such billing only when: (1) It is the accepted and prevailing practice among physicians in the locality to make separate charges for drawing or collecting a specimen and (2) it is the customary practice of the physician performing such services to bill separate charges for drawing or collecting the specimen.⁷ Only one collection fee is allowed for each type of specimen for each patient encounter, regardless of the number of specimens drawn.⁸ Physicians who satisfy the specimen collection fee criteria and choose to bill Medicare for the specimen collection must use Current Procedural Terminology (CPT) Code 36415, "Routine venipuncture—Collection of venous blood by venipuncture."^{9 10}

provide free or below-market point of care urine testing cups to health care providers who use the cups to perform billable in-office testing.

⁶ Section 1833(h)(3) of the Act; *Medicare Claims Processing Manual*, CMS Pub. 100–04, Chapter 16, section 60.1.

⁷ *Medicare Claims Processing Manual*, CMS Pub. 100–04, Chapter 16, section 60.1.1.

⁸ *Medicare Claims Processing Manual*, CMS Pub. 100–04, Chapter 16, section 60.1.

⁹ The five character codes and descriptions included in this document are obtained from Current Procedural Terminology (CPT®), copyright 2014 by the American Medical Association (AMA). CPT is developed by the AMA as a listing of descriptive terms and five character identifying codes and modifiers for reporting medical services and procedures. Any use of CPT outside of this document should refer to the most current version of the Current Procedural Terminology available from AMA. Applicable FARS/DFARS apply.

¹⁰ CPT code 36415 is included on the clinical laboratory fee schedule. As of the date of issuance of this Special Fraud Alert, Medicare pays a specimen collection fee of \$5 for samples collected from individuals in skilled nursing facilities and by laboratories on behalf of home health agencies and a specimen collection fee of \$3 for all other samples. *See, e.g.*, Clinical Laboratory Fee Schedule—January 2014 Release, available at <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ClinicalLabFeeSched/>

¹ Special Fraud Alert: Arrangements for the Provision of Clinical Laboratory Services (Oct. 1994), reprinted at 59 FR 65,372, 65,377 (Dec. 19, 1994).

² *See, e.g.*, Advisory Opinion 11–07, p. 7.

³ Section 1862(a)(1)(A) of the Act.

⁴ 31 U.S.C. 3729 et seq.

⁵ The same principles described in this Special Fraud Alert apply to arrangements that are similar or analogous to Specimen Processing Arrangements, including arrangements under which clinical laboratories pay physicians to collect and package patients' buccal swabs or urine specimens or

Medicare reimburses physicians for processing and packaging specimens for transport to a clinical laboratory through a bundled payment.¹¹ Physicians who wish to report the work involved in preparing a specimen to send to a laboratory may use CPT code 99000, “Handling and/or conveyance of specimen for transfer from the office to a laboratory.”¹² CPT code 99000 is intended to reflect the work involved to prepare a specimen prior to sending it to a laboratory, including centrifuging a specimen, separating serum, labeling tubes, packing the specimens for transport, filling out laboratory forms, and supplying necessary insurance information and other documentation.¹³

The anti-kickback statute is implicated when a clinical laboratory pays a physician for services. Whether an actual violation of the statute occurs depends on the intent of the parties—the anti-kickback statute prohibits the knowing and willful payment of such amounts if even one purpose of the payment is to induce or reward referrals of Federal health care program business. This is true regardless of whether the payment is fair market value for services rendered. The probability that a payment is for an illegitimate purpose is increased, however, if a payment exceeds fair market value or if it is for a service for which the physician is paid by a third party, including Medicare.

clinlab.html; specifically CLAB2014.Effjan1.Full.xlsx (the 2014 Clinical Diagnostic Laboratory Fee Schedule), available at <http://www.cms.gov/apps/ama/license.asp?file=/ClinicalLabFeeSched/downloads/14CLAB.zip>; and Protecting Access to Medicare Act of 2014, Public Law 113–93, § 216(a), 128 Stat. 1040 and 1053–1059 (to be codified at 42 U.S.C. 1395m–1(b)(5)) (2014).

¹¹ Since 2003, CPT code 99000 has been listed as a “Bundled Code” in the Medicare Physician Fee Schedule (MPFS). See, e.g., Physician Fee Schedule—January 2014 Release, available at <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Relative-Value-Files-Items/RVU14A.html>; specifically PRRVU14_V1219.xlsx (the 2014 National Physician Fee Schedule Relative Value File) and RVUPUF14.pdf (containing information on services covered by the MPFS, including fee schedule status indicators), available at <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Downloads/RVU14A.zip>. A “Bundled Code” means that “[p]ayment for covered services are always bundled into payment for other services not specified.” RVUPUF14.pdf, Attachment A.

¹² Even though physicians are not directly reimbursed under this code, as they are with CPT code 36145, they may choose to report this CPT code so that the costs associated with the services they perform are taken into account in CMS’s calculation of the practice expense component of a procedure’s relative value unit. See Overview, MPFS, available at <https://www.cms.gov/apps/physician-fee-schedule/overview.aspx>.

¹³ Coding Clarification: Handling and/or Conveyance of Specimen for Transfer from the Physician’s Office to a Laboratory, CPT Assistant (AMA), Oct. 1999, at 11.

When determining the fair market value of a physician’s services, a clinical laboratory should consider whether the services for which it may compensate the physician have been, or may be, paid for, including through a bundled payment, by Medicare. Additionally, the laboratory should consider whether payment is appropriate at all; if the services for which the laboratory intends to compensate the physician are paid for by a third party through other means, such as payments intended to reimburse the physician for overhead expenses, any payment by the laboratory to the physician may constitute double payment for the physician’s services and, consequently, provide evidence of unlawful intent.

Characteristics of a Specimen Processing Arrangement that may be evidence of such unlawful purpose include, but are not limited to, the following:

- Payment exceeds fair market value for services actually rendered by the party receiving the payment.
- Payment is for services for which payment is also made by a third party, such as Medicare.
- Payment is made directly to the ordering physician rather than to the ordering physician’s group practice, which may bear the cost of collecting and processing the specimen.
- Payment is made on a per-specimen basis for more than one specimen collected during a single patient encounter or on a per-test, per-patient, or other basis that takes into account the volume or value of referrals.
- Payment is offered on the condition that the physician order either a specified volume or type of tests or test panel, especially if the panel includes duplicative tests (e.g., two or more tests performed using different methodologies that are intended to provide the same clinical information), or tests that otherwise are not reasonable and necessary or reimbursable.
- Payment is made to the physician or the physician’s group practice, despite the fact that the specimen processing is actually being performed by a phlebotomist placed in the physician’s office by the laboratory or a third party.

OIG’s concerns regarding Specimen Processing Arrangements are not abated when those arrangements apply only to specimens collected from non-Federal health care program patients. Arrangements that “carve out” Federal health care program beneficiaries or business from otherwise questionable arrangements implicate the anti-kickback statute and may violate it by

disguising remuneration for Federal health care program business through the payment of amounts purportedly related to non-Federal health care program business. Because physicians typically wish to minimize the number of laboratories to which they refer for reasons of convenience and administrative efficiency, Specimen Processing Arrangements that carve out Federal health care program business may nevertheless be intended to influence physicians’ referrals of Federal health care program business to the offering laboratories.

Finally, because the anti-kickback statute ascribes criminal liability to parties on both sides of an impermissible “kickback” arrangement, physicians who enter into Specimen Processing Arrangements with laboratories also may be at risk under the statute.

B. Registry Payments

OIG has become aware of arrangements under which clinical laboratories are establishing, coordinating, or maintaining databases, either directly or through an agent, purportedly to collect data on the demographics, presentation, diagnosis, treatment, outcomes, or other attributes of patients who have undergone, or who may undergo, certain tests performed by the offering laboratories. Typically these are specialized and expensive tests paid for by Federal health care programs. This Special Fraud Alert addresses such “Registries” or “Registry Arrangements,” whether they are referred to as “registries” or “observational outcomes databases” or by other terminology.

Laboratories that participate in Registry Arrangements often assert that they are intended to advance clinical research to promote treatment, to provide physicians with valuable clinical knowledge for patients with similar disease profiles, and to provide other benefits to physicians or the health care industry generally. Registry Arrangements may take various forms; however, they typically involve payments from laboratories to physicians for certain specified duties, including, by way of example only, submitting patient data to be incorporated into the Registry, answering patient questions about the Registry, and reviewing Registry reports.

Registry Arrangements may induce physicians to order medically unnecessary or duplicative tests, including duplicative tests performed for the purpose of obtaining comparative data, and to order those tests from laboratories that offer Registry

Arrangements in lieu of other, potentially clinically superior, laboratories. OIG recognizes that whether any particular Registry Arrangement violates the anti-kickback statute depends on the intent of the parties to the arrangement. Payments from a laboratory to a physician to compensate the physician for services related to data collection and reporting may be reasonable in certain limited circumstances. However, the anti-kickback statute prohibits the knowing and willful payment of such compensation if even one purpose of the payments is to induce or reward referrals of Federal health care program business.

Characteristics of a Registry Arrangement that may be evidence of such unlawful purpose include, but are not limited to, the following:

- The laboratory requires, encourages, or recommends that physicians who enter into Registry Arrangements perform the tests with a stated frequency (e.g., four times per year) to be eligible to receive, or to not receive a reduction in, compensation.
- The laboratory collects comparative data for the Registry from, and bills for, multiple tests that may be duplicative (e.g., two or more tests performed using different methodologies that are intended to provide the same clinical information) or that otherwise are not reasonable and necessary.
- Compensation paid to physicians pursuant to Registry Arrangements is on a per-patient or other basis that takes into account the value or volume of referrals.
- Compensation paid to physicians pursuant to Registry Arrangements is not fair market value for the physicians' efforts in collecting and reporting patient data.
- Compensation paid to physicians pursuant to Registry Arrangements is not supported by documentation, submitted by the physicians in a timely manner, memorializing the physicians' efforts.
- The laboratory offers Registry Arrangements only for tests (or disease states associated with tests) for which it has obtained patents or that it exclusively performs.
- When a test is performed by multiple laboratories, the laboratory collects data only from the tests it performs.
- The tests associated with the Registry Arrangement are presented on the offering laboratory's requisition in a manner that makes it more difficult for the ordering physician to make an independent medical necessity decision with regard to each test for which the

laboratory will bill (e.g., disease-related panels).

Other characteristics not listed above may increase the risk of fraud and abuse associated with a Registry Arrangement or provide evidence of unlawful intent. For example, the risk of fraud and abuse would be particularly high if a laboratory were to pay, and collect data for its Registry from, only a subset of physicians who were selected on the basis of their prior or anticipated referral volume, rather than their specialty, sub-specialty, or other relevant attribute.

The anti-kickback statute does not prohibit laboratories from engaging in, or paying compensation for, legitimate research activities. However, claims that Registries are intended to promote and support clinical research and treatment are not sufficient to disprove unlawful intent. Even legitimate actions taken to substantiate such claims, including, for example, retaining an independent Institutional Review Board to develop study protocols and participation guidelines, will not protect a Registry Arrangement if one purpose of the arrangement is to induce or reward referrals. Furthermore, for the reasons set forth in section II.A above, OIG's concerns regarding Registry Arrangements are not abated when those arrangements apply only to data collected from tests performed on non-Federal health care program patients' specimens.

Finally, because the anti-kickback statute ascribes criminal liability to parties on both sides of an impermissible "kickback" arrangement, physicians who enter into Registry Arrangements with laboratories also may be at risk under the statute.

III. Conclusion

OIG is concerned about the risks that Specimen Processing Arrangements and Registry Arrangements pose under the anti-kickback statute. This Special Fraud Alert reiterates our longstanding concerns about payments from laboratories to physicians in excess of the fair market value of the physicians' services and payments that reflect the volume or value of referrals of Federal health care program business. Should interested parties continue to have questions about the structure of a particular Specimen Processing Arrangement or Registry Arrangement, the OIG Advisory Opinion process remains available. Information about the process may be found at: <http://oig.hhs.gov/faqs/advisory-opinions-faq.asp>.

To report suspected fraud involving Registry Arrangements, Specimen

Processing Arrangements, or similar arrangements, contact the OIG Hotline at <https://forms.oig.hhs.gov/hotlineoperations/> or by phone at 1-800-447-8477 (1-800-HHS-TIPS).

Dated: June 7, 2014.

Daniel R. Levinson,
Inspector General.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of Evaluation Option Exclusive License: Development of Granulysin Immunotherapy

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: This is notice, in accordance with 35 U.S.C. 209 and 37 CFR 404, that the National Institutes of Health, Department of Health and Human Services, is contemplating the grant of an exclusive evaluation option license to practice the inventions embodied in U.S. Provisional Patent Application. No. 61/250,601, filed October 12, 2009, HHS Ref. No.: E-158-2009/0-US-01, Titled: "Granulysin Immunotherapy"; International Application No. PCT/US2010/052036, filed October 8, 2010, HHS Ref. No.: E-158-2009/0-PCT-02, Titled: "Granulysin Immunotherapy"; U.S. Patent Application No. 13/501,726, filed April 12, 2012, HHS Ref. No.: E-158-2009/0-US-06, Titled: "Granulysin Immunotherapy", and foreign equivalents thereof to Orpheden Therapeutics, Inc. ("Orpheden"), a Delaware corporation doing business principally in the state of Illinois. The patent rights in these inventions have been assigned to the United States of America.

The prospective exclusive evaluation option license territory may be worldwide and the field of use may be limited to the development of 15kD granulysin as set forth in the Licensed Patent Rights for the treatment of human cancers.

Upon the expiration or termination of the exclusive evaluation option license, Orpheden will have the exclusive right to execute an exclusive commercialization license which will supersede and replace the exclusive evaluation option license with no greater field of use and territory than granted in the exclusive evaluation option license.

DATES: Only written comments and/or applications for a license which are received by the NIH Office of Technology Transfer on or before July 28, 2014 will be considered.

ADDRESSES: Requests for copies of the patent application, inquiries, comments, and other materials relating to the contemplated exclusive license should be directed to: Whitney A. Hastings, Ph.D., Licensing and Patenting Manager, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852-3804; Telephone: (301) 451-7337; Facsimile: (301) 402-0220; Email: hastingsw@mail.nih.gov.

SUPPLEMENTARY INFORMATION:

Granulysin is a cytolytic and proinflammatory molecule expressed by activated human cytotoxic T lymphocytes (CTLs) and natural killer (NK) cells when they are attached to disease cells including infection, cancer, transplantation, autoimmunity, skin and reproductive maladies. Granulysin is made in a 15-kDa form that is cleaved into a 9-kDa form at both the amino and the carboxy termini. Granulysin is broadly cytolytic against tumors and microbes. It has been implicated in many of diseases and studies suggest that granulysin may be a useful therapeutic directly contributing to immunity against foreign molecules for a wide variety of diseases.

This technology describes the use of 15 kD granulysin for enhancing immune responses.

Investigators at the NIH have discovered that 15 kD granulysin activates monocytes and induces them to differentiate into mature dendritic cells and activates allospecific T cells.

The proof of this principle was demonstrated by mice expressing granulysin *in vivo* showing markedly improved anti-tumor responses, with increased numbers of activated dendritic cells and cytokine-producing T cells. Furthermore, current data suggest that dendritic cells matured with 15 kD granulysin are superior to the well-established GM-CSF induction. There appears to be a significant market opportunity for use of the 15 kD granulysin for the *ex vivo* dendritic cell maturation and adoptive immunotherapy.

The prospective exclusive evaluation option license, and a subsequent exclusive commercialization license, may be granted unless the NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37

CFR part 404 within fifteen (15) days from the date of this published notice.

Complete applications for a license in the field of use filed in response to this notice will be treated as objections to the grant of the contemplated exclusive evaluation option license. Comments and objections submitted to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: July 10, 2014.

Richard U. Rodriguez,

Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

[FR Doc. 2014-16267 Filed 7-10-14; 8:45 am]

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of Evaluation Option Exclusive License: Development of a Diagnostic and Prognostic for Breast and Prostate Cancer Using Spatial Genome Organization

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: This is notice, in accordance with 35 U.S.C. 209 and 37 CFR 404, that the National Institutes of Health, Department of Health and Human Services, is contemplating the grant of an exclusive evaluation option license to practice the inventions embodied in U.S. Provisional Application 61/094,318 filed September 4, 2008 entitled "Method for detection of cancer based on spatial genome organization" (HHS Ref No. E-283-2008/0-US-01); International Application PCT/US2009/055857 filed September 3, 2009 entitled "Method for detection of cancer based on spatial genome organization" (HHS Ref No. E-283-2008/0-PCT-02); U.S. Patent Application 13/062,247 filed March 4, 2011 entitled "Method for detection of cancer based on spatial genome organization" (HHS Ref No. E-283-2008/0-US-0; and foreign equivalents thereof to Radial Genomics, Ltd. ("RG"), a company located in Cambridge, U.K. The patent rights in these inventions have been assigned to the United States of America.

The prospective exclusive evaluation option license territory may be worldwide and the field of use may be limited to the use of the Licensed Patent

Rights for the diagnosis, prognosis, and prediction of cancer.

Upon the expiration or termination of the exclusive evaluation option license, RG will have the exclusive right to execute an exclusive commercialization license which will supersede and replace the exclusive evaluation option license with no greater field of use and territory than granted in the exclusive evaluation option license.

DATES: Only written comments and/or applications for a license which are received by the NIH Office of Technology Transfer on or before July 28, 2014 will be considered.

ADDRESSES: Requests for copies of the patent application, inquiries, comments, and other materials relating to the contemplated exclusive license should be directed to: Whitney A. Hastings, Ph.D., Licensing and Patenting Manager, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852-3804; Telephone: (301) 451-7337; Facsimile: (301) 402-0220; Email: hastingsw@mail.nih.gov.

SUPPLEMENTARY INFORMATION: The successful treatment of cancer is correlated with the early detection of the cancerous cells. Conventional cancer diagnosis is largely based on qualitative morphological criteria, but more accurate quantitative tests could greatly increase early detection of malignant cells. It has been observed that the spatial arrangement of DNA in the nucleus is altered in cancer cells in comparison to normal cells. Therefore, it is possible to distinguish malignant cells by mapping the position of labeled marker genes in the nucleus. This NIH invention provides methods of detecting abnormal cells in a sample using the spatial position of one or more genes within the nucleus of a cell, as well as a kit for detecting abnormal cells using such methods. It also provides methods of identifying gene markers for abnormal cells using the spatial position of one or more genes within the nucleus of a cell. Therefore, this invention could be used as a very effective cancer diagnostic from tumor biopsies after non-invasive techniques such as a mammogram or PSA assay have suggested cancer.

The primary product arising from this technology would be a diagnostic for cancer using tumor biopsies after non-invasive techniques such as a mammogram or PSA assay have suggested the presence of cancer. This novel *in vitro* diagnostic test for cancer has use in oncology laboratories of hospitals and commercial clinical laboratories. It has several advantages

over other diagnostics including sensitive cancer detection, small sample size (100–200 cells), probes to all genomic regions are available, and it does not require mitotic chromosomes. Additionally, it is applicable to both solid tumors and blood cancers, allows analysis of subpopulations from biopsy, measures metastatic potential of cancer cells, determines tumor type, and can be alternative to or complementary to conventional diagnostics.

The prospective exclusive evaluation option license, and a subsequent exclusive commercialization license, may be granted unless the NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404 within fifteen (15) days from the date of this published notice.

Complete applications for a license in the field of use filed in response to this notice will be treated as objections to the grant of the contemplated exclusive evaluation option license. Comments and objections submitted to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: July 10, 2014.

Richard U. Rodriguez,

Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of Exclusive License: Development of Molecular-Based Cancer Diagnostic and Prognostic

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: This is notice, in accordance with 35 U.S.C. 209 and 37 CFR 404, that the National Institutes of Health, Department of Health and Human Services, is contemplating the grant of an exclusive patent license to Heragen, Inc., which is located in Benicia, California to practice the inventions embodied in the following patent applications:

1. U.S. Provisional Application 61/152,597 filed February 13, 2009 entitled “Molecular-Based Method of Cancer Diagnosis and

Prognosis” (HHS Ref No. E–023–2009/0–US–01).

2. International Application PCT/US2010/024026 filed February 12, 2010 entitled “Molecular-Based Method of Cancer Diagnosis and Prognosis” (HHS Ref No. E–023–2009/0–PCT–02).

3. U.S. Patent No. 8,715,928 issued May 6, 2014 entitled “Molecular-Based Method of Cancer Diagnosis and Prognosis” (HHS Ref No. E–023–2009/0–US–03).

4. U.S. Patent Application No. 14/215,574, filed March 17, 2014 entitled “Molecular-Based Method of Cancer Diagnosis and Prognosis” (HHS Ref No. E–023–2009/0–US–04).

The patent rights in these inventions have been assigned to the United States of America.

The prospective exclusive license territory may be worldwide and the field of use may be limited to the use of the Licensed Patent Rights to develop FDA approved and/or 510K cleared tests and kits for the diagnosis and prognosis of breast and lung cancer.

DATES: Only written comments and/or applications for a license which are received by the NIH Office of Technology Transfer on or before August 11, 2014 will be considered.

ADDRESSES: Requests for copies of the patent application, inquiries, comments, and other materials relating to the contemplated exclusive license should be directed to: Whitney A. Hastings, Ph.D., Licensing and Patenting Manager, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852–3804; Telephone: (301) 451–7337; Facsimile: (301) 402–0220; Email: hastingsw@mail.nih.gov.

SUPPLEMENTARY INFORMATION: Molecular profiling with high throughput assays has gained utility in the management of select cancer patients and several gene expression-based assays are now marketed for improved prognostic accuracy for patients with cancer.

This technology describes a genomics based diagnostic assay for the diagnosis and prognosis of cancer patients. Using a mouse model of breast cancer, the inventors identified a gene expression signature that can predict the outcome for human breast cancer patients with as few as six genes. The gene signature includes a total of 79 cancer survival factor-associated genes and was validated using available genomic test sets that were based on previously conducted human clinical trials. More recently, the six-gene-model was validated for cancers other than breast using multiple, independent, publicly-available human lung cancer data sets. In addition to predicting the outcome of cancer patients, this technology could

also be used to stratify patients for further therapy and treat patients by administering therapeutic agents that alter the activity of one of the aforementioned cancer survival factor-associated genes.

The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license may be granted unless within thirty (30) days from the date of this published notice, the NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

Any additional applications for a license in the field of use filed in response to this notice will be treated as objections to the grant of the contemplated exclusive license. Comments and objections submitted to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: July 10, 2014.

Richard U. Rodriguez,

Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The inventions listed below are owned by an agency of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 209 and 37 CFR part 404 to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

FOR FURTHER INFORMATION CONTACT: Licensing information and copies of the U.S. patent applications listed below may be obtained by writing to the indicated licensing contact at the Office of Technology Transfer, National Institutes of Health, 6011 Executive

Boulevard, Suite 325, Rockville, Maryland 20852-3804; telephone: 301-496-7057; fax: 301-402-0220. A signed Confidential Disclosure Agreement will be required to receive copies of the patent applications.

SUPPLEMENTARY INFORMATION:
Technology descriptions follow.

Delta Tocopherol for the Treatment of Lysosomal Storage Disorders

Description of Technology: Delta Tocopherol is identified as a novel therapeutic to treat lysosomal disorders characterized by defective cellular cholesterol and other lipid trafficking and storage. Currently, there is no treatment for many of Lysosomal Storage Disorders. In some cases, such as Gaucher disease, enzyme replacement therapy and substrate deduction treatment are available with very high cost (over \$100,000 per patient per year). NIH investigators have identified an unexpected and previously unrecognized use for delta tocopherol, which is a form of vitamin E, in the treatment of diseases and conditions related to lysosomal storage disorders. Scientists at the National Center for Advancing Translational Sciences, NIH discovered a clear difference between the effects of delta-tocopherol and alpha tocopherol on the cell-based disease models of Niemann Pick C (NPC) disease. They found that while delta-tocopherol significantly reduced the cholesterol accumulation in NPC cells and reduced the size of enlarged lysosomes, alpha-tocopherol only showed weak effects in the same cells.

The present invention can be used to develop new therapies involving delta-tocopherol to treat lysosomal disorders, such as Niemann-Pick type C disease, Mucopolysaccharidoses disorder, and Neuronal Ceroid Lipofuscinoses. This invention provides potential novel methods for the modulation of cholesterol and other lipids' recycling. It may be also possible to use delta-tocopherol for the reduction of the size of enlarged lysosomes caused by accumulation of lipids and macromolecules.

Potential Commercial Applications:

- Therapeutics for lysosomal disorders

- Therapeutics for Niemann-Pick type C disease

Competitive Advantages: delta-tocopherol is a novel lead compound for drug development to treat a variety of lysosomal storage diseases characterized by lipid/macromolecule accumulation and defective lipid trafficking.

Development Stage:

- Early-stage
- In vitro data available

Inventors: Wei Zheng et al. (NCATS).

¹⁸F-Labeled Calcofluor Derivatives for PET Imaging and Diagnosis of *Aspergillus* Infection

Description of Technology: *Aspergillus* is a common fungal lung infection with high mortality rates in immune compromised patients. The inability to diagnose this infection impedes treatment. Blood based diagnostic tests for this infection lack sensitivity and specificity due to cross reactivity. Other methods of diagnosis are invasive and labor intensive. The ability to accurately and non-invasively diagnose infection in *Aspergillus* immune compromised populations may greatly improve treatment and lower mortality rates. This technology uses ¹⁸F-labeled calcofluor derivatives for positron emission tomography (PET) imaging of filamentous fungal infections. ¹⁸F-labeled calcofluor derivatives have low toxicity, high binding specificity to *Aspergillus* species due to uptake by *Aspergillus*-specific siderophore system, and low binding affinity to patient tissue. These compounds may be used for rapid and

accurate PET diagnostic imaging of infection by species of *Aspergillus*.

Potential Commercial Applications:
Diagnosis of *Aspergillus* infection.
Competitive Advantages: Non-invasive, low toxicity, specific for *Aspergillus*.

Development Stage: In vivo data available (animal).

Multifunctional RNA Nanoparticles as Therapeutic Agents

Description of Technology: The promise of RNA interference based therapeutics is made evident by the recent surge of biotechnological drug companies that pursue such therapies and their progression into human clinical trials. The present invention discloses novel RNA and RNA/DNA nanoparticles including multiple siRNAs, RNA aptamers, fluorescent dyes, and proteins. These RNA nanoparticles are useful for various nanotechnological applications. This technology has a higher detection sensitivity and higher silencing efficiencies of targeted genes than conventional siRNAs. This technology has significant therapeutic potential against multiple disease types, including cancer and viral infections.

Potential Commercial Applications:

- Treatment for various diseases

- Clinical research
- Basic research

Competitive Advantages:

- More sensitivity
- Higher efficiency
- Low cytotoxicity
- Multiple functionality
- Multiple targets
- Visualization
- Controlled activation

Development Stage:

- In vitro data available
- In vivo data available

Inventors: Bruce A. Shapiro, Kirill A. Afonin, Angelica N. Martins, Mathias D. Viard (all of NCI)

Intellectual Property: HHS Reference No. E-765-2013/0—US Provisional Application No. 61/878,758 filed 17 Sep 2013.

Collaborative Research Opportunity:

The National Cancer Institute is seeking statements of capability or interest from parties interested in collaborative research to further develop, evaluate or commercialize scaling up, animal models, multiple targets, delivery. For collaboration opportunities, please contact John D. Hewes, Ph.D. at hewesj@mail.nih.gov.

Nucleic Acid Nanoparticles for Triggering RNA Interference

Description of Technology: RNA interference (RNAi) is a naturally occurring cellular post-transcriptional gene regulation process that utilizes small double-stranded RNAs to trigger and guide gene silencing. By introducing synthetic RNA duplexes called small-interfering RNAs (siRNAs), we can harness the RNAi machinery for therapeutic gene control and the treatment of various diseases.

The present invention discloses RNA, RNA-DNA, DNA-RNA, hybrid nanocubes consisting of a DNA or RNA core (composed of six strands) with attached RNA or DNA hybrid duplexes. The nanocubes can induce the reassociation of the RNA duplexes, which can then be processed by the human recombinant Dicer enzyme, thus activating RNAi. This technology opens a new route for the development of "smart" nucleic acid based nanoparticles for a wide range of biomedical applications. Immune responses can be controlled by altering the composition of the particles.

Potential Commercial Applications:

- Treatment for various diseases
- Clinical research

- Basic research
- Competitive Advantages:
- Low cytotoxicity
- Chemical stability
- More specificity
- Controlled activation
- Multiple targets
- Visualization

Development Stage: In vitro data available

DEPARTMENT OF HEALTH AND HUMAN SERVICES**National Institutes of Health****National Institute of General Medical Sciences; Notice of Closed Meetings**

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of General Medical Sciences Special Emphasis Panel, Peer Review of P20 Grant Applications.

Date: August 7, 2014.

Time: 12:00 p.m. to 2:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Natcher Building, 45 Center Drive, Room 3An.12, Bethesda, MD 20892 (Telephone Conference Call).

Contact Person: Lee Warren Slice, Ph.D., Scientific Review Officer, Office of Scientific Review, National Institute of General Medical Sciences, National Institutes of Health, 45 Center Drive, Room 3An.12, Bethesda, MD 20892, 301-594-2769, slicelw@mail.nih.gov.

Name of Committee: National Institute of General Medical Sciences Special Emphasis Panel, Program Project Review in Anesthesiology.

Date: August 7, 2014.

Time: 2:30 p.m. to 5:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Natcher Building, 45 Center Drive, Room 3An.18F, Bethesda, MD 20892 (Telephone Conference Call).

Contact Person: Brian R. Pike, Ph.D., Scientific Review Officer, Office of Scientific Review, National Institute of General Medical Sciences, National Institutes of Health, 45 Center Drive, Room 3An.18, Bethesda, MD 20892, 301-594-3907, pikbr@mail.nih.gov. [Docket No. DHS-2014-0035]

Privacy Act of 1974; Department of Homeland Security Federal Emergency Management Agency—012 Suspicious Activity Reporting System of Records

AGENCY: Privacy Office, Department of Homeland Security.

ACTION: Notice of Privacy Act System of Records.

SUMMARY: In accordance with the Privacy Act of 1974, the Department of Homeland Security proposes to update and reissue a current system of records titled, “Department of Homeland Security/Federal Emergency Management Agency—012 Suspicious Activity Reporting System of Records.” This system of records allows the Department of Homeland Security/Federal Emergency Management Agency to collect and maintain records on individuals who report suspicious activities, individuals reported as being involved in suspicious activities, and individuals charged with the analysis and appropriate handling of suspicious activity reports. As a result of the biennial review, the Federal Emergency Management Agency has made non-substantive changes to simplify the formatting and text of the previously published notice. This updated system will be included in the Department of Homeland Security’s inventory of record systems.

DATES: Submit comments on or before August 11, 2014. This updated system will be effective August 11, 2014.

ADDRESSES: You may submit comments, identified by docket number DHS-2014-0035 by one of the following methods:

- Federal e-Rulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.
- Fax: 202-343-4010.
- Mail: Karen L. Neuman, Chief Privacy Officer, Privacy Office, Department of Homeland Security, 245 Murray Drive SW., Building 410, STOP-0655, Washington, DC 20528.
- Instructions: All submissions received must include the agency name and docket number for this rulemaking.

All comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided.

- Docket: For access to the docket to read background documents or comments received go to <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: For general questions please contact: Eric M. Leckey, (202) 212-5100, Privacy Officer, Federal Emergency Management Agency, Department of Homeland Security, Washington, DC 20478. For privacy questions please contact: Karen Neuman (202) 343-1717, Chief Privacy Officer, Privacy Office, Department of Homeland Security, 245 Murray Drive SW., Building 410, STOP-0655, Washington, DC 20528.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) Federal Emergency Management Agency (FEMA) proposes to update and reissue a current DHS/FEMA system of records titled, “DHS/FEMA—012 Suspicious Activity Reporting System of Records.”

FEMA’s mission is to “support our citizens and first responders to ensure that as a nation we work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards.” FEMA collects, maintains, and retrieves records of individuals who report suspicious activities, individuals reported as being involved in suspicious activities, and individuals charged with the analysis and appropriate handling of suspicious activity reports. FEMA’s Office of the Chief Security Officer (OCSO), Fraud and Investigations Unit manages this process. FEMA Suspicious Activity Reports (SAR) are secured in a room monitored by FEMA OCSO special agents and analysts to reduce any risk of unauthorized access.

FEMA SARs may be shared with federal, state, local, and tribal jurisdictions that have the responsibility of investigating suspicious activities within their jurisdictions. FEMA SARs that do not have a nexus to terrorism or hazards to homeland security, (as determined by FEMA OCSO special agents or analysts) are forwarded to the appropriate jurisdiction (such as sheriff offices, county/city police, and state police). FEMA SARs that have a nexus to terrorism or hazards to homeland security, (as determined by FEMA OCSO special agents or analysts), are shared with the Federal Bureau of Investigation (FBI) Joint Terrorism Task

Force (JTTF), Federal Protective Service, and/or other federal agencies that are required to investigate and respond to terrorist threats or hazards to homeland security.

As a result of the biennial review, FEMA has made non-substantive changes to simplify the formatting and text of the previously published notice. FEMA’s SAR process is authorized and governed by 44 CFR Chapter 2 “Delegation of Authority;” 42 U.S.C. 5196(d); Executive Order No. 12333 and 13388; 40 U.S.C. 1315(b)(2)(F); 6 U.S.C. 314 of the Homeland Security Act of 2002, as amended; the Intelligence Reform and Terrorism Prevention Act of 2004, as amended; the National Security Act of 1947, as amended; and FEMA Manual 1010-1 “Federal Emergency Management Agency Missions and Functions.”

Consistent with DHS’s information sharing mission, information stored in the DHS/FEMA-012 Suspicious Activity Reporting System of Records may be shared with other DHS components that have a need to know the information to carry out their national security, law enforcement, immigration, intelligence, or other homeland security functions. In addition, information may be shared with appropriate federal, state, local, tribal, territorial, foreign, or international government agencies consistent with the routine uses set forth in this system of records notice.

This updated system will be included in DHS’s inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information practice principles in a statutory framework governing the means by which the U.S. government collects, maintains, uses, and disseminates individuals’ records. The Privacy Act applies to information that is maintained in a “system of records.” A “system of records” is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals when systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors.

Below is the description of the DHS/FEMA-12 Suspicious Activity Reporting System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget and to Congress.

System of Records

Department of Homeland Security (DHS)/Federal Emergency Management Agency (FEMA)—012

SYSTEM NAME:

DHS FEMA—012 Suspicious Activity Reporting.

SECURITY CLASSIFICATION:

For official use only (FOUO) and law enforcement sensitive (LES).

SYSTEM LOCATION:

FEMA maintains records at FEMA Headquarters in Washington, DC, and in field offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Categories of individuals includes individuals who report suspicious activities, individuals reported as being involved in suspicious activities, and individuals charged with the analysis and appropriate handling of suspicious activity reports.

CATEGORIES OF RECORDS IN THE SYSTEM:

- Case/incident number;
- Name (first, middle, and last);
- Address (number, street, apartment, city, and state);
- Age;
- Sex;
- Race;
- Signature (investigator, analyst, or law enforcement officer (LEO));
- Jurisdiction;
- Injury code (if applicable);
- Telephone numbers (home, business, or cell);
- Other contact information (e.g., email address); and
- Property information (name, quantity, serial number, brand name, model, value, year, make, color, identifying characteristics, and/or registration information).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 CFR Chapter 2 “Delegation of Authority;” 42 U.S.C. 5196(d); Executive Order No. 12333 and 13388; 40 U.S.C. 1315(b)(2)(F); 6 U.S.C. 314 of the Homeland Security Act of 2002, as amended; the Intelligence Reform and Terrorism Prevention Act of 2004, as amended; the National Security Act of 1947, as amended; and FEMA Manual 1010–1 “Federal Emergency Management Agency Missions and Functions.”

PURPOSE(S):

The purpose of this system is to collect, investigate, analyze, and report suspicious activities to the Federal Bureau of Investigations (FBI) Joint Terrorism Task Force (JTTF), Federal Protective Service, and/or other federal, state, or local agencies required to investigate and respond to terrorist threats or hazards to homeland security.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice (DOJ), including Offices of the U.S. Attorneys, or to another federal agency conducting litigation or in proceedings before any court, adjudicative, or administrative body, when it is necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;
2. Any employee or former employee of DHS in his/her official capacity;
3. Any employee or former employee of DHS in his/her individual capacity when DOJ or DHS has agreed to represent the employee; or
4. The U.S. or any agency thereof.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration (NARA) or General Services Administration pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. DHS has determined that as a result of the suspected or confirmed compromise, there is a risk of identity theft or fraud, harm to economic or property interests, harm to an individual, or harm to the security or integrity of this system or other systems

or programs (whether maintained by DHS or another agency or entity) that rely upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To an appropriate federal, state, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, when a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

H. To an appropriate federal, state, tribal, local, international counterterrorism agencies when DHS becomes aware of an indication of a threat or potential threat to security, and when such use is to assist in counterterrorism efforts.

I. To an organization or individual in either the public or private sector, either foreign or domestic, when there is a reason to believe that the recipient is or could become the target of a particular terrorist activity or conspiracy, to the extent the information is relevant to the protection of life, property, or other vital interests of a data subject and disclosure is proper and consistent with the official duties of the person making the disclosure.

J. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information, when disclosure is necessary to preserve confidence in the integrity of DHS, or is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent it is determined that release of

the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

DISCLOSURE TO CONSUMER REPORTING**AGENCIES:**

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**STORAGE:**

FEMA stores records in this system electronically or on paper in secure facilities in a locked drawer behind a locked door. The records are stored on magnetic disc, tape, and digital media.

RETRIEVABILITY:

FEMA retrieves records by case/incident number, name, address, and/or date.

SAFEGUARDS:

FEMA safeguards records in this system in accordance with applicable rules and policies, including all applicable DHS automated systems security and access policies. FEMA imposes strict controls to minimize the risk of compromising the information that is being stored. FEMA limits access to the computer system containing the records to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

RETENTION AND DISPOSAL:

Pursuant to National Archives and Records Administration (NARA) Schedule Number N1-311-99-6, Items 1, 2, and 3, files containing information or allegations that are of an investigative nature but do not relate to a specific investigation are destroyed when five years old. Investigative case files that involve allegations made against senior agency officials, attract significant attention in the media, attract congressional attention, result in substantive changes in agency policies and procedures, or are cited in the Office of the Investigator General (OIG)'s periodic reports to Congress are cut off when the case is closed, retired to the Federal Records Center (FRC) five years after cutoff, and then transferred to NARA 20 years after cutoff. All other investigative case files are placed in inactive files when case is closed, cut off at the end of fiscal year, and destroyed 10 years after cutoff, except those that are unusually significant for documenting major violations of criminal law or ethical standards by agency officials or others.

SYSTEM MANAGER AND ADDRESS:

Office of the Chief Security Officer, Fraud and Investigation Unit, 1201 Maryland Avenue SW, Washington, DC 20024.

NOTIFICATION PROCEDURE:

The Secretary of Homeland Security has exempted this system from the notification, access, and amendment procedures of the Privacy Act because it is a law enforcement system. However, DHS/FEMA will consider individual requests to determine whether or not information may be released. Thus, individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to the Chief of the FEMA Disclosure Branch whose contact information can be found at <http://www.dhs.gov/foia> under "contacts." If an individual believes more than one component maintains Privacy Act records concerning him or her, the individual may submit the request to the Chief Privacy Officer and Chief Freedom of Information Act Officer, Department of Homeland Security, 245 Murray Drive SW., Building 410, STOP-0655, Washington, DC 20528.

When seeking records about yourself from this system of records or any other Departmental system of records your request must conform with the Privacy Act regulations set forth in 6 CFR Part 5. You must first verify your identity, meaning that you must provide your full name, current address and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Chief Privacy Officer and Chief Freedom of Information Act Officer, <http://www.dhs.gov/foia> or 1-866-431-0486. In addition you should:

- Explain why you believe the Department would have information on you;
- Identify which component(s) of the Department you believe may have the information about you;
- Specify when you believe the records would have been created; and
- Provide any other information that will help the FOIA staff determine which DHS component agency may have responsive records.

If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without this bulleted information the component(s) may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

RECORD ACCESS PROCEDURES:

See "Notification procedure" above.

CONTESTING RECORD PROCEDURES:

See "Notification procedure" above.

RECORD SOURCE CATEGORIES:

Records are obtained from individuals who report suspicious activities, individuals reported as being involved in suspicious activities, and individuals charged with the analysis and appropriate handling of suspicious activity reports, commercially available systems, and also from other federal, state, and local law enforcement agencies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

The Secretary of Homeland Security has exempted this system from the following provisions of the Privacy Act, subject to the limitation set forth in 5 U.S.C. 552a(c)(3); (d); (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I); and (f) pursuant to 5 U.S.C. 552a (k)(2).

Dated: June 24, 2014.

Karen L. Neuman,

Chief Privacy Officer, Department of Homeland Security.

BILLING CODE 9110-17-P

DEPARTMENT OF HOMELAND SECURITY**Coast Guard**

[Docket No. USCG-2014-0543]

Great Lakes Pilotage Advisory Committee; Notice of a Meeting

AGENCY: Coast Guard, DHS.

ACTION: Committee Management; Notice of Federal Advisory Committee Meeting; Correction

SUMMARY: The Coast Guard published a meeting notice for the Great Lakes Pilotage Advisory Committee in the **Federal Register** of July 7, 2014. The notice contained incorrect information under **ADDRESSES** and **SUPPLEMENTARY INFORMATION**—Agenda.

FOR FURTHER INFORMATION CONTACT: Ms. Michelle Birchfield, telephone 202-372-1537, fax 202-372-8387, or email at Michelle.R.Birchfield@uscg.mil.

Correction

In the **Federal Register** of July 7, 2014, in FR Doc. 2014-15790, on page

38324, in the first column, fourth line, correct the reference to “[USCG–2014–9110]” to read “[USCG–2014–0543]”; and on the same page, in the second column, ninth line from the bottom, correct “raining” to read “training.”

Dated: July 8, 2014.

Katia Cervoni,

Chief, Office of Regulations and Administrative Law, U. S. Coast Guard.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

[1651–0078]

Agency Information Collection Activities: Automated Clearinghouse

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: 30-day notice and request for comments; extension of an existing collection of information.

SUMMARY: U.S. Customs and Border Protection (CBP) of the Department of Homeland Security will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act: Automated Clearinghouse. This is a proposed extension of an information collection that was previously approved. CBP is proposing that this information collection be extended with no change to the burden hours or to the information collected. This document is published to obtain comments from the public and affected agencies.

DATES: Written comments should be received on or before August 11, 2014 to be assured of consideration.

ADDRESSES: Interested persons are invited to submit written comments on this proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the OMB Desk Officer for Customs and Border Protection, Department of Homeland Security, and sent via electronic mail to oir_submission@omb.eop.gov or faxed to (202) 395–5806.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Tracey Denning, U.S. Customs and Border Protection, Regulations and Rulings, Office of International Trade, 90 K Street NE.,

10th Floor, Washington, DC 20229–1177, at 202–325–0265.

SUPPLEMENTARY INFORMATION: This proposed information collection was previously published in the **Federal Register** (79 FR 26445) on May 8, 2014, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.10. CBP invites the general public and other Federal agencies to comment on proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104–13; 44 U.S.C. 3507). The comments should address: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s estimates of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden, including the use of automated collection techniques or the use of other forms of information technology; and (e) the annual costs to respondents or record keepers from the collection of information (total capital/startup costs and operations and maintenance costs). The comments that are submitted will be summarized and included in the CBP request for OMB approval. All comments will become a matter of public record. In this document, CBP is soliciting comments concerning the following information collection:

Title: Automated Clearinghouse.

OMB Number: 1651–0078.

Form Number: CBP Form 400.

Abstract: The Automated Clearinghouse (ACH) allows participants in the Automated Broker Interface (ABI) to transmit daily statements, deferred tax, and bill payments electronically through a financial institution directly to a CBP account. ACH debit allows the payer to exercise more control over the payment process. In order to participate in ACH debit, companies must complete CBP Form 400, *ACH Application*. Participants also use this form to notify CBP of changes to bank information or contact information. The ACH procedure is authorized by 19 U.S.C. 1202, and provided for by 19 CFR 24.25. CBP Form 400 is accessible at <http://www.cbp.gov/sites/default/files/documents/CBP%20Form%20400.pdf>

Current Actions: CBP proposes to extend the expiration date of this information collection with no change to the burden hours or to the information collected.

Type of Review: Extension (without change).

Affected Public: Businesses.

Estimated Number of Respondents: 1,443.

Estimated Number of Annual Responses per Respondent: 2.

Estimated Number of Total Annual Responses: 2,886.

Estimated Time per Response: 5 minutes.

Estimated Total Annual Burden Hours: 240.

Dated: July 7, 2014.

Tracey Denning,

Agency Clearance Officer, U.S. Customs and Border Protection.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

[1651–0027]

Agency Information Collection Activities: Record of Vessel Foreign Repair or Equipment Purchase

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: 30-day notice and request for comments; extension of an existing collection of information.

SUMMARY: U.S. Customs and Border Protection (CBP) of the Department of Homeland Security will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act: Record of Vessel Foreign Repair or Equipment Purchase (CBP Form 226). This is a proposed extension of an information collection that was previously approved. CBP is proposing that this information collection be extended with no change to the burden hours or to the information collected. This document is published to obtain comments from the public and affected agencies.

DATES: Written comments should be received on or before August 11, 2014 to be assured of consideration.

ADDRESSES: Interested persons are invited to submit written comments on this proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the OMB Desk Officer for Customs and Border Protection, Department of Homeland Security, and sent via

electronic mail to oir_submission@omb.eop.gov or faxed to (202) 395-5806.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information should be directed to Tracey Denning, U.S. Customs and Border Protection, Regulations and Rulings, Office of International Trade, 90 K Street, NE., 10th Floor, Washington, DC 20229-1177, at 202-325-0265.

SUPPLEMENTARY INFORMATION: This proposed information collection was previously published in the **Federal Register** (79 FR 22519) on April 22, 2014, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.10. CBP invites the general public and other Federal agencies to comment on proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104-13; 44 U.S.C. 3507). The comments should address: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimates of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden, including the use of automated collection techniques or the use of other forms of information technology; and (e) the annual costs to respondents or record keepers from the collection of information (total capital/startup costs and operations and maintenance costs). The comments that are submitted will be summarized and included in the CBP request for OMB approval. All comments will become a matter of public record. In this document, CBP is soliciting comments concerning the following information collection:

Title: Record of Vessel Foreign Repair or Equipment Purchase.

OMB Number: 1651-0027.

Form Number: CBP Form 226.

Abstract: 19 U.S.C. 1466(a) provides for a 50 percent *ad valorem* duty assessed on a vessel master or owner for any repairs, purchases, or expenses incurred in a foreign country by a commercial vessel registered in the United States. CBP Form 226, Record of Vessel Foreign Repair or Equipment Purchase, is used by the master or owner of a vessel to declare and file entry on equipment, repairs, parts, or materials purchased for the vessel in a foreign country. This information enables CBP to assess duties on these

foreign repairs, parts, or materials. CBP Form 226 is provided for by 19 CFR 4.7 and 4.14 and is accessible at: <http://www.cbp.gov/sites/default/files/documents/CBP%20Form%20226.pdf>.

Current Actions: This submission is being made to extend the expiration date with no change to the burden hours or to the information collected on Form 226.

Type of Review: Extension (without change).

Affected Public: Businesses.

Estimated Number of Respondents: 100.

Estimated Number of Responses per Respondent: 11.

Estimated Number of Total Annual Responses: 1,100.

Estimated Time per Response: 45 minutes.

Estimated Total Annual Burden Hours: 825.

Dated: July 7, 2014.

Tracey Denning,

Agency Clearance Officer, U.S. Customs and Border Protection.

[FR Doc. 2014-16183 Filed 7-10-14; 8:45 am]

BILLING CODE 9111-14-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

[1651-0098]

Agency Information Collection Activities:

NAFTA Regulations and Certificate of Origin

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: 30-day notice and request for comments; extension of an existing collection of information.

SUMMARY: U.S. Customs and Border Protection (CBP) of the Department of Homeland Security will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act: NAFTA Regulations and Certificate of Origin. This is a proposed extension of an information collection that was previously approved. CBP is proposing that this information collection be extended with no change to the burden hours or to the information collected. This document is published to obtain comments from the public and affected agencies.

DATES: Written comments should be received on or before August 11, 2014 to be assured of consideration.

ADDRESSES: Interested persons are invited to submit written comments on this proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the OMB Desk Officer for Customs and Border Protection, Department of Homeland Security, and sent via electronic mail to oir_submission@omb.eop.gov or faxed to (202) 395-5806.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information should be directed to Tracey Denning, U.S. Customs and Border Protection, Regulations and Rulings, Office of International Trade, 90 K Street, NE., 10th Floor, Washington, DC 20229-1177, at 202-325-0265.

SUPPLEMENTARY INFORMATION: This proposed information collection was previously published in the **Federal Register** (79 FR 28532) on May 16, 2014, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.10. CBP invites the general public and other Federal agencies to comment on proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104-13; 44 U.S.C. 3507). The comments should address: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimates of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden, including the use of automated collection techniques or the use of other forms of information technology; and (e) the annual costs to respondents or record keepers from the collection of information (total capital/startup costs and operations and maintenance costs). The comments that are submitted will be summarized and included in the CBP request for OMB approval. All comments will become a matter of public record. In this document, CBP is soliciting comments concerning the following information collection:

Title: NAFTA Regulations and Certificate of Origin.

OMB Number: 1651-0098.

Form Number: CBP Forms 434, 446, and 447.

Abstract: On December 17, 1992, the U.S., Mexico and Canada entered into an agreement, "The North American Free Trade Agreement" (NAFTA). The provisions of NAFTA were adopted by

the U.S. with the enactment of the North American Free Trade Agreement Implementation Act of 1993 (PL. 103–182).

CBP Form 434, *North American Free Trade Certificate of Origin*, is used to certify that a good being exported either from the United States into Canada or Mexico or from Canada or Mexico into the United States qualifies as an originating good for purposes of preferential tariff treatment under NAFTA. This form is completed by exporters and/or producers and furnished to CBP upon request. CBP Form 434 is provided for by 19 CFR 181.11 and is accessible at: <http://www.cbp.gov/sites/default/files/documents/CPB%20Form%20434.pdf>.

CBP Form 446, *NAFTA Verification of Origin Questionnaire*, is a questionnaire that CBP personnel use to gather sufficient information from exporters and/or producers to determine whether goods imported into the United States qualify as originating goods for the purposes of preferential tariff treatment under NAFTA. CBP Form 446 is provided for by 19 CFR 181.72 and is accessible at: <http://www.cbp.gov/sites/default/files/documents/CPB%20Form%20446.pdf>.

CBP Form 447, *North American Free Trade Agreement Motor Vehicle Averaging Election*, is used to gather information required by 19 CFR 181 Appendix, Section 11, (2) “Information Required When Producer Chooses to Average for Motor Vehicles”. This form is provided to CBP when a manufacturer chooses to average motor vehicles for the purpose of obtaining NAFTA preference. CBP Form 447 is accessible at: <http://www.cbp.gov/sites/default/files/documents/CPB%20Form%20447.pdf>.

Current Actions: This submission is being made to extend the expiration date for CBP Forms 434, 446, and 447.

Type of Review: Extension (without change).

Affected Public: Businesses.

Form 434, NAFTA Certificate of Origin:

Estimated Number of Respondents: 40,000.

Estimated Number of Responses per Respondent: 3.

Estimated Time per Response: 15 minutes.

Estimated Total Annual Burden Hours: 30,000.

Form 446, NAFTA Questionnaire:

Estimated Number of Respondents: 400.

Estimated Number of Responses per Respondent: 1.

Estimated Time per Response: 45 minutes.

Estimated Total Annual Burden

Hours: 300.

Form 447, NAFTA Motor Vehicle

Averaging Election:

Estimated Number of Respondents: 11.

Estimated Number of Responses per Respondent: 1.28.

Estimated Time per Response: 1 hour.

Estimated Total Annual Burden Hours: 14.

Dated: July 7, 2014.

Tracey Denning,

Agency Clearance Officer, U.S. Customs and Border Protection.

BILLING CODE 9111–14–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5756–N–26]

Notice of Proposed Information Collection: Comment Request Annual Adjustment Factors (AAF) Rent Increase Requirement

AGENCY: Office of the Assistant Secretary for Housing, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: *Comments Due Date:* September 9, 2014.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Reports Liaison Officer, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410, Room 9120 or the number for the Federal Information Relay Service (1–800–877–8339).

FOR FURTHER INFORMATION CONTACT:

Catherine Brennan, Director, Office of Housing Assistance & Grant Administration, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410, telephone (202) 708–3000 (this is not a toll free number) for copies of the proposed forms and other available information.

SUPPLEMENTARY INFORMATION: The Department is submitting the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended).

This Notice is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

A. Overview of Information Collection

Title of Information Collection: Annual Adjustment Factors (AAF) Rent Increase Requirement .

OMB Approval Number: 2502–0507.

Type of Request: Extension of a currently approved collection.

Form Number: HUD–92273–S8.

Description of the need for the information and proposed use: Owners of project-based section 8 contracts that utilize the AAF as the method of rent adjustment provide this information which is necessary to determine whether or not the subject properties’ rents are to be adjusted and, if so, the amount of the adjustment.

Respondents: Business, Not for profit institutions.

Estimated Number of Respondents: 4,287.

Estimated Number of Responses: 612.

Frequency of Response: On occasion.

Average Hours per Response: 1.5 Hours.

Total Estimated Burdens: 918.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency’s estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated

collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: July 7, 2014.

Laura M. Marin,

Associate General Deputy Assistant Secretary for Housing-Associate Deputy Federal Housing Commissioner.

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5758-N-08]

60-Day Notice of Proposed Information Collection: Energy Evaluation of Public Housing Capital Fund (PHCF), Category 4, Option 2 Grantees

AGENCY: Office of Policy Development and Research, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: Comments Due Date: September 9, 2014.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to

the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Room 4176, Washington, DC 20410-5000; telephone 202-402-3400 (this is not a toll-free number) or email at Colette.Pollard@hud.gov for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

FOR FURTHER INFORMATION CONTACT:

Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410; email Colette Pollard at Colette.Pollard@hud.gov or telephone 202-402-3400. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Energy Evaluation of Public Housing Capital Fund (PHCF), Category 4, Option 2 Grantees.

OMB Approval Number: None.

Type of Request: This is a new request.

Form Number: None.

Description of the need for the information and proposed use: The information is being collected to assist in evaluating the short- and long-term performance of the energy retrofits funded by HUD through the American Recovery and Reinvestment Act (ARRA). One component of this overall evaluation project is to evaluate the ARRA PIH Capital Fund Recovery Grants awarded through a competitive process with the purpose of creating energy efficient, green communities (Category 4). In particular, this funding aims to “substantively increase energy efficiency and environmental performance of public housing properties and thereby reduce energy costs, generate resident and PHA energy consumption savings, reduce Greenhouse Gas emissions attributable to energy consumption and improve indoor air quality to provide a healthy living environment.” Competitive proposals from eligible PHAs responding to one of two options available were funded under this category: Option 1, Substantial Rehabilitation or New Construction, and Option 2, Moderate Rehabilitation.

Respondents (i.e. affected public): Employees of housing organizations receiving funding from HUD, specifically public housing agencies who received Public Housing Capital Fund, Category 4, Option 2 grants.

Estimated Number of Respondents: 127.

Estimated Number of Responses: 229 (one response per AMP).

Frequency of Response: 1.

Average Hours per Response: 1 (0.5 hrs/utility * 2 utilities/AMP).

Total Estimated Burdens: 229 hrs.

Information collection	Respondents	Number of responses/instances of collection	Frequency of response	Responses per annum	Avg. time per response (Hr/AMP)	Annual burden hours	Hourly cost per response	Annual cost
Energy Survey	127	229	1	229	1	229	\$31	\$7,099
Total	127	229	\$7,099

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency’s estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: July 2, 2014.

Katherine M. O’Regan,

Assistant Secretary for Policy Development and Research.

BILLING CODE 4210-67-P

**DEPARTMENT OF HOUSING AND
URBAN DEVELOPMENT**

[Docket No. FR-5740-N-02]

**Federal Housing Administration (FHA)
Multifamily Rental Project Closing
Documents: Notice Announcing
Approval of Revised Documents**

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: This notice announces that HUD has completed the notice and comment processes required by the Paperwork Reduction Act of the 1995 (PRA), and the Office of Management and Budget (OMB) has reviewed and approved the FHA-insured multifamily rental closing documents (Closing Documents), as revised, under the previously approved control number: 2502-0598. This notice highlights certain of the revisions to the documents that HUD made based on comments submitted in response to the April 1, 2014, 30-day **Federal Register** notice (30-day notice). The final versions of the Closing Documents, including redlines against the documents currently in use, can be viewed on HUD's Web site at: http://portal.hud.gov/hudportal/HUD?src=/program_offices/housing/mfh/mfhclosingdocuments. Please note that the documents found at this Web site are for informational purposes only; participants must access the official version of the Closing Documents for FHA multifamily loan closings from HUD's forms resource Web page: <http://www.hud.gov/hudclips>.

FOR FURTHER INFORMATION CONTACT: Millicent Potts, Associate General Counsel for Insured Housing, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20310; telephone number (202) 708-1274. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

I. Background

On October 29, 2013, and consistent with the Paperwork Reduction Act of 1995, HUD published for public comment, for a period of 60 days, a notice in the **Federal Register** advising that HUD was proposing technical and substantive revisions to the closing documents used in FHA multifamily rental projects based on the experiences of HUD staff working with the documents since 2011(60-day notice).

(See 78 FR 64524.) This notice highlighted the proposed changes and advised that redline/strike-out and clean versions of the proposed revisions were available for review on HUD's Web site. On April 1, 2014, HUD published a 30-day notice in the **Federal Register** in accordance with the public comment process required by the PRA. See 79 FR 18305. The 30-day notice identified substantive changes that HUD made to the Closing Documents based on public comment submitted in response to the 60-day notice, and responded to significant issues raised by commenters on the Closing Documents. In addition to providing a summary of the changes made, HUD posted on its Web site the redline-strikeout versions of the documents depicting the changes that HUD initially proposed with the 60-day notice as well as clean and redline-strikeout versions with additional changes made in response to public comments received on the 60-day notice, so that industry participants and interested members of the public could see all of the changes that were being proposed to the Closing Documents.

This notice published today announces that HUD has completed the notice and comment processes required by the PRA, and that OMB has completed its review and approved the Closing Documents, as revised, under the previously approved OMB control number 2502-0598.

In response to the 30-day notice, HUD received comments from four (4) commenters. Commenters included the American Bar Association, a law firm, a private attorney, and a local municipality's housing and community investment department. All comments were carefully considered by HUD prior to presentation to OMB for final approval and re-authorization, pursuant to the PRA. In this notice, HUD is highlighting certain of the changes that were made and providing its rationale for not accepting certain comments. The final approved documents are available for your review in clean and redline-strike-out (against the documents currently in use) formats on HUD's Web site at: http://portal.hud.gov/hudportal/HUD?src=/program_offices/housing/mfh/mfhclosingdocuments.

II. Effective Date

These revised Closing Documents are required for transactions that receive a firm commitment on or after the date that is 30 calendar days after the date of this notice. As OMB approval for these documents has been received, parties may use these documents on a voluntary basis as of the date of this publication.

III. Discussion of Public Comments and Subsequent Document Revisions

General Comments

Section 50 Name Changes: A commenter noted that when a party named in section 50 of the Regulatory Agreement is changed, but the borrower does not change, the references to the those parties in the Regulatory Agreement, Note, and Security Instrument would all need to be revised. The commenter asked whether HUD would consider incorporating the section 50 parties into the Note and Security Instrument by reference to the Regulatory Agreement. HUD agreed with the comment and has made the necessary change to the documents.

Document Submissions: A commenter requested that HUD allow electronic submission of draft closing documents and final loan documents post-closing on CDs or thumb drives, in lieu of several paper binders, in order to reduce the amount of paper as well as reduce the storage requirements for HUD. The commenter acknowledged that a single paper binder with original signatures could be required, but urged that there should be standardized submission requirements, as much as possible, in all HUD offices, in order to help standardize the process.

With respect to electronic copies of documents, the HUD Office of Chief Information Officer policy allows submission on CD but does not allow submission of materials on thumb drive because of an increased threat of corruption and harm to HUD information systems. With respect to the number of copies and whether by electronic or paper submission, HUD offices will be reevaluating their policy in connection with the current reorganization of the Office of Multifamily Housing.

Identity of Interest: A commenter asked for clarification regarding when an identity of interest exists pursuant to program obligations in Section 26 of the Lender's Certificate and Section 27 of the Request for Endorsement. Specifically, the commenter asked whether a conflict of interest exists when a counsel to the borrower has served as counsel to a lender in other transactions.

HUD does not opine on the ABA Model Rules of Professional Conduct. HUD notes that counsel may not represent Borrower and Lender on the same transaction for a number of reasons, including those which commenter has identified. To the extent commenter questions the applicability of MAP Guide § 2.6 or other HUD requirements, if counsel to a lender or

borrower has appropriately represented a borrower or lender, respectively, on past transactions in accordance with the applicable state's rules of professional responsibility, such prior representation does not make counsel an employee of lender pursuant to the Map Guide or create an identity of interest with borrower or lender.

Note: Commenters have identified confusion with section 9(c) of the note and HUD has taken this opportunity to clarify this section. This section identifies circumstances that shall not be considered prepayments and shall not trigger prepayment premiums.

Regulatory Agreement

A commenter suggested deleting reference to the "Building Loan Agreement" in Section 8(b) because this section applies to refinancings with limited repairs where the Building Loan Agreement would be inapplicable. However, certain jurisdictions require the use of this document for repairs, so HUD has declined to make this change.

A commenter requested a change to Section 10(b) with respect to the initial deposit to the reserve for replacement, stating that requiring a specific amount in the Regulatory Agreement for a one-time deposit that occurs at closing is often problematic since the Reserve for Replacement amount can change. HUD agrees and has removed the first sentence of Section 10(b). The initial deposit to the reserve for replacement account should be disclosed, including any applicable transfer amounts, in the closing statement and the Request for Endorsement.

Opinion of Borrower's Counsel and Instructions

One commenter asked HUD to reconsider previously submitted comments to the Opinion of the Borrower's Counsel. The commenter asserts that the comments align with "customary practice" and with the practices of Fannie Mae and Freddie Mac, who, the commenter asserts negotiate their model opinion forms. Although HUD looks occasionally to the example of Fannie Mae and Freddie Mac, FHA's role in the housing market, its obligations as the Federal Government and its congressional mandate are distinct. HUD has determined that the requested changes would increase the cost, time and administrative burdens associated with transactions and conflict with HUD's interests in maintaining a uniform practice nationwide and protecting the Federal Government's interests. Thus, HUD declines to make commenter's requested changes.

Escrow Agreement for Working Capital

A commenter noted that the Escrow Agreement for Working Capital improperly references the firm commitment when providing for the allocation of escrow funds for new construction because the MAP Guide sets forth this policy. HUD has determined, however, that the firm commitment does set forth provisions regarding the working capital amount and should be reviewed in connection with the Escrow Agreement for Working Capital. There should not be discrepancies between the firm commitment and other HUD requirements; if participants notice discrepancies in their transactions, they should notify HUD's Office of Housing. HUD has also inserted the word "equally" in Section 2 of the Escrow Agreement for Working Capital in order to clarify HUD's MAP Guide requirement.

Security Instrument

A commenter noted that the provision in section 7(a)(ii) of the Security Instrument setting forth a monthly service charge in the event the note is held by HUD needs to be updated to reflect current policy and suggested a revision. HUD agrees and has updated the provision but has not used the language suggested by the commenter.

Authority Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: July 8, 2014.

Laura Marin,

Associate General Deputy Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5756-N-25]

60-Day Notice of Proposed Information Collection: Request for Prepayment of Section 202 or 202/8 Direct Loan Project

AGENCY: Office of the Assistant Secretary for Housing- Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice

is to allow for 60 days of public comment.

DATES: *Comments Due Date:* September 9, 2014.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Room 4176, Washington, DC 20410-5000; telephone 202-402-3400 (this is not a toll-free number) or email at Colette.Pollard@hud.gov for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

FOR FURTHER INFORMATION CONTACT:

Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410; email Colette Pollard at Colette.Pollard@hud.gov or telephone (202) 402-3400. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Request for Prepayment of Section 202 or 202/8 Project.

OMB Approval Number: 2502-0554.

Type of Request: Extension of a currently approved collection.

Form Number: 9808.

Description of the need for the information and proposed use: Owners of Section 202 projects use the form as the initial application to prepay their Section 202 Direct Loan and provide narrative information relative to the prepayment that must be reviewed by HUD staff.

Respondents: Business, not for profit institutions.

Estimated Number of Respondents: 185.

Estimated Number of Responses: 185.

Frequency of Response: On occasion.

Average Hours per Response: 2 hours.

Total Estimated Burdens: 370.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: July 7, 2014.

Laura M. Marin,

Associate General Deputy Assistant Secretary for Housing-Associate Deputy Federal Housing Commissioner.

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5696-N-10]

Additional Clarifying Guidance, Waivers, and Alternative Requirements for Grantees in Receipt of Community Development Block Grant Disaster Recovery Funds Under the Disaster Relief Appropriations Act, 2013

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice provides additional clarifying guidance, waivers, and alternative requirements for all Community Development Block Grant (CDBG) disaster recovery grantees in receipt of funds under the Disaster Relief Appropriations Act, 2013 (Pub. L. 113-2).¹ To date, the Department has

allocated \$14.1 billion under the Act to assist recovery in the most impacted and distressed areas identified in major disaster declarations due to Hurricane Sandy and other eligible events in calendar years 2011, 2012, and 2013.

DATES: *Effective Date:* July 16, 2014.

FOR FURTHER INFORMATION CONTACT: Stan Gimont, Director, Office of Block Grant Assistance, Department of Housing and Urban Development, 451 7th Street SW., Room 7286, Washington, DC 20410, telephone number 202-708-3587.

Persons with hearing or speech impairments may access this number via TTY by calling the Federal Relay Service at 800-877-8339. Facsimile inquiries may be sent to Mr. Gimont at 202-401-2044. (Except for the "800" number, these telephone numbers are not toll-free.) Email inquiries may be sent to disaster_recovery@hud.gov.

Table of Contents

- I. Background
- II. Applicable Rules, Statutes, Waivers, and Alternative Requirements
- III. Catalog of Federal Domestic Assistance
- IV. Finding of No Significant Impact

I. Background

The Disaster Relief Appropriations Act, 2013 (Pub. L. 113-2, approved January 29, 2013) (Appropriations Act) made available \$16 billion in Community Development Block Grant (CDBG) funds for necessary expenses related to disaster relief, long-term recovery, restoration of infrastructure and housing, and economic revitalization in the most impacted and distressed areas resulting from a major disaster declared pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act of 1974 (42 U.S.C. 5121 *et seq.*) (Stafford Act), due to Hurricane Sandy and other eligible events in calendar years 2011, 2012, and 2013. As the Appropriations Act requires funds to be awarded directly to a State, or unit of general local government (hereinafter, local government), at the discretion of the Secretary, the term "grantee" refers to any jurisdiction that has received a direct award from HUD under the Appropriations Act.

On March 1, 2013, the President issued a sequestration order pursuant to section 251A of the Balanced Budget and Emergency Deficit Control Act, as amended (2 U.S.C. 901a), and reduced funding for CDBG-DR grants under the Appropriations Act to \$15.18 billion. To date, \$14.1 billion has been allocated for the areas most impacted by Hurricane Sandy and other disasters occurring in 2011, 2012, and 2013. To describe these

allocations and the accompanying requirements, the Department published multiple **Federal Register** notices: March 5, 2013 (78 FR 14329), April 19, 2013 (78 FR 23578), May 29, 2013 (78 FR 32262), August 2, 2013 (78 FR 46999), November 18, 2013 (78 FR 69104), March 27, 2014 (78 FR 17173), and June 3, 2014 (79 FR 31964), referred to collectively in this Notice as the "Prior Notices"). The requirements of the Prior Notices continue to apply, except as modified by this Notice.²

II. Applicable Rules, Statutes, Waivers, and Alternative Requirements

The Appropriations Act authorizes the Secretary to waive, or specify alternative requirements for, any provision of any statute or regulation that the Secretary administers in connection with HUD's obligation or use by the recipient of these funds (except for requirements related to fair housing, nondiscrimination, labor standards, and the environment). Waivers and alternative requirements are based upon a determination by the Secretary that good cause exists and that the waiver or alternative requirement is not inconsistent with the overall purposes of title I of the HCD Act. Regulatory waiver authority is also provided by 24 CFR 5.110, 91.600, and 570.5.

This Notice clarifies or modifies requirements of the Prior Notices. Except as noted, the waivers and alternative requirements in this Notice apply to all grants under the Appropriations Act. For each waiver and alternative requirement described in this Notice, the Secretary has determined that good cause exists and the action is not inconsistent with the overall purpose of the HCD Act. Grantees may request additional waivers and alternative requirements from the Department as needed to address specific needs related to their recovery activities. Under the requirements of the Appropriations Act, waivers must be published in the **Federal Register** no later than five days before the effective date of such waiver.

1. *Reporting of contracts.* Public Law 113-2 requires grantees "to maintain on a public Web site information accounting for how all grant funds are

² Links to the Prior Notices, the text of the Appropriations Act, and additional guidance prepared by the Department for CDBG-DR grants, are available on HUD's Web site under the Office of Community Planning and Development, Disaster Recovery Assistance: http://portal.hud.gov/hudportal/HUD?src=/program_offices/comm_planning/communitydevelopment/programs/drsi. The same information is also available on HUD's OneCPD Web site: <https://www.onecpd.info/cdbg-dr/>.

¹ Luzerne, PA initially received disaster assistance under Public Law 112-55 and was provided with additional assistance through Pub. L. 113-2. The waiver in this Notice specific to Luzerne, PA applies to both its 112-55 funds and 113-2 funds as described herein.

used, including details of all contracts and ongoing procurement processes.” To streamline the reporting requirements for grantees by eliminating duplicative reporting efforts, and to provide greater transparency regarding procured contracts, HUD is removing the requirement that grantees identify contracts above \$25,000 in HUD’s Disaster Recovery Reporting System (DRGR) because grantees are already reporting this information in the Federal Subaward Reporting System (FSRS) through USA Spending [usaspending.gov]. Grantees are still required to post contract information as described below. HUD is amending requirements described in the March 5, 2013 Notice as follows:

a. Paragraph 2.b. at 78 FR 14337 is amended to exclude the requirement for grantees “to identify in the DRGR system any contract over \$25,000,” and now reads as follows: “DRGR Action Plan. Each grantee must enter its Action Plan for Disaster Recovery, including performance measures, into HUD’s DRGR system. As more detailed information about uses of funds is identified by the grantee, it must be entered into the DRGR system at a level of detail that is sufficient to serve as the basis for acceptable performance reports, and permits HUD review of compliance requirements.

The Action Plan must also be entered into the DRGR system so that the grantee is able to draw its CDBG–DR funds. The grantee may enter activities into DRGR before or after submission of the Action Plan to HUD. To enter an activity into the DRGR system, the grantee must know the activity type, national objective, and the organization that will be responsible for the activity. In addition, a Data Universal Numbering System (DUNS) number must be entered into the system for any entity carrying out a CDBG–DR funded activity, including the grantee, recipient(s) and subrecipient(s), contractor(s) and developers carrying out a CDBG–DR activity.

Each activity entered into the DRGR system must also be categorized under a “project”. Typically, projects are based on groups of activities that accomplish a similar, broad purpose (e.g., Housing, Infrastructure, or Economic Development) or are based on an area of service (e.g., Community A). If a grantee submits a partial Action Plan or amendment to describe just one program (e.g., Single Family Rehabilitation), that program is entered as a project in DRGR. Further, the budget of the program would be identified as the project’s budget. If a State grantee has only identified the

Method of Distribution (MOD) upon HUD’s approval of the published Action Plan, the MOD itself typically serves as the projects in the DRGR system, rather than the activities. As funds are distributed to subgrantees and subrecipients, who decide which specific activities to fund, those activity fields are then populated.

b. Paragraph 23 at 78 FR 14344 is amended to exclude the requirement for grantees to “enter information on contracts in the DRGR system activity profiles (for all contracts valued over \$25,000)” and now reads as follows: “Public Web site. The Appropriations Act requires grantees to maintain a public Web site which provides information accounting for how all grant funds are used, and managed/administered, including details of all contracts and ongoing procurement policies. To meet this requirement, each grantee must make the following items available on its Web site: The Action Plan (including all amendments); each QPR (as created using the DRGR system); procurement policies and procedures; status of services or goods currently being procured by the grantee—e.g., phase of the procurement, requirements for proposals, etc.; a copy of contracts the grantee has procured directly; and a summary of all procured contracts, including those procured by the grantee, recipients, or subrecipients. Grantees should post only those contracts subject to 24 CFR 85.36 or in accordance with the State’s procurement policies. To assist grantees prepare this summary, HUD has developed a template. The template can be accessed at: <https://www.onecpd.info/cdbg-dr/>. Grantees are required to use this template, and attach an updated version to DRGR each quarter as part of their QPR submissions. Updated summaries must also be posted quarterly on each grantee’s Web site.”

2. *Incorporation of clarifications and requirements for grantees in receipt of grant awards made by HUD in response to disasters occurring in 2011 or 2012.* Grantees in receipt of funds under the Appropriations Act for disasters occurring in 2011 or 2012 (see the Notice published in the **Federal Register** May 29, 2013, at 78 FR 32262) are advised that the following paragraphs in section VI. (Applicable Rules, Statutes, Waivers, and Alternative Requirements) of the Notice published November 18, 2013 apply to grant funds provided pursuant to Public Law 113–2: 3.b. (Liquid Fuel Supply Chain Assistance); 5. (Reimbursement of disaster recovery expenses); 6. (Duplication of benefits); 7. (Eligibility

of needs assessment and risk analysis costs); 8. (Eligibility of mold remediation); 9. (Eligibility of public services and assistance to impacted households); 10. (Modification of the alternative requirement related to small business assistance); and 11. (Eligibility of Local Disaster Recovery Manager costs) (see 78 FR 69108 through 69110). These paragraphs impose or clarify general requirements or provide additional flexibility in program design and implementation to support resilient recovery following the 2011 and 2012 disasters, while also ensuring that statutory requirements unique to the Appropriations Act are met. Any new requirements established by this paragraph are applicable to all programs initiated in an Action Plan Amendment subsequent to the date of this Notice.

3. *Tenant-based rental assistance (State of New Jersey, only).* The State of New Jersey has requested a waiver of 42 U.S.C. 5305(a) in order to provide tenant-based rental assistance to households impacted by disasters eligible under the Appropriations Act. Eligible assistance includes rental assistance and utility payments and may also include rental costs (i.e., security deposits and utility deposits) when the grantee determines that such payments are necessary to help prevent a household from being homeless. While existing CDBG regulations allow payments for these purposes, those regulations limit assistance to a period not to exceed three months. The State’s tenant-based rental assistance will be funded through its Supportive Services program, will be limited to the beneficiaries of that program as described in the State’s approved Action Plan, and will not be tied to HUD’s Section 8 program assistance.

As a result of Hurricane Sandy, thousands of households in New Jersey were displaced and need housing at a time when the State’s housing stock had been substantially reduced. The decrease in the housing supply placed upward pressure on housing costs, making housing less affordable for households already strained by hurricane-related expenses. To date, the State has invested more than \$320 million to support the rehabilitation or construction of new affordable rental housing (to create approximately 7,000 units); however, the most vulnerable of Sandy-displaced households—including very low-income persons—continue to need immediate rental assistance until construction of affordable rental units is completed and those units become available.

The goal of this waiver is to minimize the time households are homeless by

providing re-housing and rental assistance, and by linking the person or family with services that can help them become stable and self-sufficient. Throughout the rental period, assisted households will receive referrals to available long-term units, as well as housing counseling. Further, the State plans to establish a referral process that will enable the targeted households to apply to live in the affordable housing units created under other CDBG–DR funded programs.

The State's use of CDBG–DR funds for this purpose advances the Department's priority to support forward-thinking solutions to help communities that are struggling to house and serve persons and families that are homeless or at risk of homelessness. In addition, HUD has previously granted the States of Louisiana and New York, as well as New York City, similar waivers in response to Hurricanes Katrina, Rita, and Sandy. After reviewing the State's request, HUD is waiving 42 U.S.C. 5305(a), to the extent necessary, to make eligible up to \$17 million in rental assistance and utility payments paid for up to 2 years on behalf of homeless and at-risk low- and moderate-income households displaced by Hurricane Sandy, when such assistance or payments are part of a homeless prevention or rapid re-housing program or activity. The Department is approving the State's request for a waiver to allow for the payment of tenant-based rental assistance. This waiver is in effect from January 1, 2014 to January 1, 2016.

4. *Documentation of Low- and Moderate-Income National Objective for Multi-Unit Housing Projects (State of New Jersey, only).* Per the HCD Act and the Prior Notices, Hurricane Sandy CDBG–DR grantees may fund the rehabilitation, reconstruction, and new construction of housing. To further address its housing needs, the State of New Jersey has requested to measure the benefit to low- and moderate-income households, in multiunit residential projects, in a manner more supportive of mixed income housing. In general, the applicable regulation, 24 CFR 570.208(a)(3), requires at least 51 percent of the units in an assisted multi-unit structure to be occupied by residents that are income eligible. This method of calculating the benefit to low- and moderate-income households is often referred to as the structure basis.

HUD has reviewed other housing assistance programs that measure benefit differently—only those units in a multi-unit structure occupied by income eligible residents are used to calculate the benefit to low- and moderate-income households. Under

this “unit” approach, when units are alike, the proportion of CDBG funds contributed to the project may be no more than the proportion of units in the project that will be occupied by income-eligible households. For this reason, this approach is sometimes called the proportional units approach. In other words, the rule under the structure approach is that a dollar of CDBG assistance to a structure means that 51 percent of the units must meet income requirements. Under the unit approach, the amount of assistance provided is equal to the cost of units occupied by low- and moderate-income households.

Based on HUD experience, the unit approach can be more compatible with large-scale development of mixed-income housing. For example, in response to the widespread devastation caused by Hurricanes Katrina and Rita, HUD allowed the states of Louisiana and Mississippi to use this approach under their respective CDBG–DR programs. Additionally—(1) the CDBG program rule has a built-in exception that allows limited use of the unit basis for multi-unit non-elderly new construction structures with between 20 and 50 percent low- and moderate-income occupancy, (2) in the HOME Investment Partnerships program, HUD's primary housing production program, HUD grantees use funds to pay for the cost of affordable units, and (3) the Neighborhood Stabilization Program permitted grantees to use a unit basis approach to meet the CDBG low- and moderate-income benefit requirement.

After review of the State of New Jersey's Action Plan for Disaster Recovery, and discussions with the State regarding its intent to encourage mixed-income housing development, HUD has determined that it is consistent with the overall purposes of the HCD Act to provide the State the requested additional flexibility in measuring program benefit. Therefore, the waiver and alternative requirements allow the State to measure benefit within a housing development project: (1) According to the existing CDBG requirements or (2) according to the unit approach described above for multi-unit housing projects involving rehabilitation and/or reconstruction. However, the second option may only be used if the units are generally comparable in size and finishes. The State must select and use one method for each project. For these purposes, the term “project” will have the same meaning as in the HOME program at 24 CFR 92.2. The State is reminded that per 2 CFR part 225, CDBG–DR costs must be necessary and reasonable. To meet this requirement, the State must develop

policies and procedures to document its costs for housing investments are necessary and reasonable. The State must also meet all civil rights and fair housing requirements and comply with any applicable civil rights or fair housing related voluntary compliance agreements, settlement agreements, or consent decrees.

5. *Limited purpose modification of overall benefit requirement (Luzerne County, Pennsylvania, only).* The primary objective of the Housing and Community Development Act is the “development of viable urban communities, by providing decent housing and a suitable living environment and expanding economic opportunities, principally for persons of low- and moderate-income” (42 U.S.C. 5301 et seq.). To carry out this objective, the statute requires that 70 percent of the aggregate of the grantee's CDBG program's funds be used to support activities benefitting low- and moderate-income persons.

This target can be difficult, if not impossible, for many CDBG–DR grantees to reach as a disaster impacts entire communities—regardless of income. Further, it may prevent grantees from providing assistance to the most damaged areas of need. Therefore, as described by the Prior Notices, Luzerne County, in addition to the other grantees under the Appropriations Act, received a waiver and alternative requirement—only 50 percent of funds must be used for activities that benefit low- and moderate-income persons. Additional flexibility was provided in the March 5, 2013 Notice (78 FR 14329) and the May 29, 2013 Notice (FR 32262), which is applicable to Luzerne County. It allows a grantee to request a further reduction of its overall benefit requirement by submitting a justification that, at a minimum: (a) Identifies the planned activities that meet the needs of its low- and moderate-income population; (b) describes proposed activity(ies) and/or program(s) that will be affected by the alternative requirement, including their proposed location(s) and role(s) in the grantee's long-term disaster recovery plan; (c) describes how the activities/programs identified in (b) prevent the grantee from meeting the 50 percent requirement; and (d) demonstrates that the needs of non-low and moderate-income persons or areas are disproportionately greater, and that the jurisdiction lacks other resources to serve them. After review of grantee requests, under the Appropriations Act, HUD can grant such a waiver request only if the Secretary finds a compelling need to reduce the overall benefit below 50 percent.

In response to the above, Luzerne County submitted justification addressing the required criteria. As described in the correspondence, the county has received two awards of CDBG-DR funds (appropriated under two separate laws and totaling more than \$25.5 million) in response to disasters that occurred in 2011 (Hurricane Irene and Tropical Storm Lee). The county's first allocation was for \$15,738,806 under Section 239 of the Department of Housing and Urban Development Appropriations Act, 2012 (Pub. L. 112-55, approved November 18, 2011). The second allocation to the county for \$9,763,000 was made under Public Law 113-2.

Initially, the county's first award allocated funds to acquisition/buyouts, housing rehabilitation and mitigation, and infrastructure. The county anticipated that buyouts would be primarily paid for using FEMA funds under the FEMA's Hazard Mitigation Grant Program; CDBG-DR funds would provide the local match (25 percent). However, following approval of the county's CDBG-DR Action Plan, FEMA announced that requests for acquisition far exceeded available funds. Thus, citizens and local elected officials requested that CDBG-DR address this unmet need. In response, the county participated in public meetings to gauge the scope of unmet need. It was determined that approximately 100 residential properties (across 14 jurisdictions) could not be funded by FEMA, but those property owners wished to participate in a voluntary buyout program. Additionally, while other citizens were no longer interested in a buyout (they were either back in their homes or would be soon), they were in need of assistance to elevate or otherwise mitigate their disaster-impacted homes. As a result, the county amended its Action Plan to pay 100 percent of the costs associated with acquiring properties, and demolishing any structures, in order to assist participating households' recovery in a safer area, and reduce future flood hazards and prevent the loss of life. In counties such as Luzerne with a history of flooding, the need for a buyout program is particularly compelling. The county's buyout activities (\$11,951,625 for residential properties and \$1 million for commercial properties) will use the majority of its first CDBG-DR allocation. The remainder of funds are programmed to infrastructure (\$1.2 million) and administration and planning (\$1.6 million). While the Action Plan includes housing rehabilitation as an eligible activity, this will only be

funded if all buyout needs have been addressed and CDBG-DR funds are available.

Of note, Luzerne County's residential buyout program is prioritizing low- and moderate-income property owners. To date, of the 100 properties estimated to participate in the program, 68 property owners have submitted pre-applications. An initial review shows that only 30 of the 68 owners are low- and moderate-income households (44 percent). Approximately 44 percent of the households will be of low- and moderate-income, and the county estimates that of the total amount budgeted for residential buyouts, \$3,940,715 will benefit low- and moderate-income households. In addition, the county has plans to address the needs of low- and moderate income households it moves out of harm's way, through a down payment assistance to assist households who require assistance in buying a replacement home. As applications with the greatest need under the infrastructure program and the commercial buyout programs are not in areas with significant low- and moderate-income populations, these programs will not help the county meet its overall benefit requirement. The county anticipates an overall low- and moderate-income benefit of 27.82 percent for its first CDBG-DR allocation.

In regards to the county's second award of CDBG-DR funds, the primary activity to be funded is infrastructure (\$8,786,700). The remaining funds, \$976,300, are for administration and planning. As the census tracts and block groups most impacted by the 2011 disasters and in need of assistance are not predominately low- and moderate-income, and as infrastructure activities generally only meet the low- and moderate-income national objective on an area basis, the county has requested a reduction of the overall benefit requirement for this grant as well. (The county is prioritizing infrastructure activities with this grant due to the significant unmet needs demonstrated. Further, market studies indicate little demand in the county for new housing stock and the county's business assistance program received no applications). Based on infrastructure applications received to date, the county anticipates that three projects, totaling \$3,268,000, will benefit low- and moderate-income households on an area basis. Thus, the overall low- and moderate-income benefit for the second grant award is projected to be 37.19 percent.

To enable the county to undertake the activities it has deemed most critical for

its recovery, and to ensure that low- and moderate-income households are adequately served and/or assisted, HUD is granting a limited waiver and alternative requirement to reduce the overall benefit from 50 percent to not less than 27 percent for the county's first allocation of CDBG-DR funds, and to not less than 37 percent for the county's second allocation of CDBG-DR funds. Based on the county's justification, the Secretary has found a compelling need for this reduction due to the unique circumstances related to Luzerne County's request. In particular, HUD notes that the county prioritized the needs of low- and moderate-income populations with its first allocation; the county has identified getting people out of harm's way as a top priority and this waiver will allow low- and moderate-income families to take advantage of Luzerne's program for this purpose; and finally, the waiver will enable the county to undertake critical infrastructure activities necessary to its recovery. This is a limited waiver modifying 42 U.S.C. 5301(c), 42 U.S.C. 5304(b)(3)(A), 24 CFR 570.484, and 570.200(a)(3) only to the extent necessary to permit the county to use funds appropriated by Public Law 112-55 for its residential buyout program, to use funds appropriated by Public Law 113-2 for its infrastructure program, as described by the county's Action Plans.

III. Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance number for the disaster recovery grants under this Notice is as follows: 14.269.

IV. Finding of No Significant Impact

A Finding of No Significant Impact (FONSI) with respect to the environment has been made in accordance with HUD regulations at 24 *CFR part 50*, which implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)). The FONSI is available for public inspection between 8 a.m. and 5 p.m. weekdays in the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW., Room 10276, Washington, DC 20410-0500. Due to security measures at the HUD Headquarters building, an advance appointment to review the docket file must be scheduled by calling the Regulations Division at 202-708-3055 (this is not a toll-free number). Hearing or speech-impaired individuals may access this number through TTY by calling the toll-free Federal Relay Service at 800-877-8339.

Dated: July 7, 2014.

Clifford Taffet,

*General Deputy Assistant Secretary for
Community Planning and Development.*

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5750-N-28]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant
Secretary for Community Planning and
Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies
unutilized, underutilized, excess, and
surplus Federal property reviewed by
HUD for suitability for use to assist the
homeless.

FOR FURTHER INFORMATION CONTACT:

Juanita Perry, Department of Housing
and Urban Development, 451 Seventh
Street SW., Room 7266, Washington, DC
20410; telephone (202) 402-3970; TTY
number for the hearing- and speech-
impaired (202) 708-2565 (these
telephone numbers are not toll-free), or
call the toll-free Title V information line
at 800-927-7588.

SUPPLEMENTARY INFORMATION: In
accordance with 24 CFR part 581 and
section 501 of the Stewart B. McKinney
Homeless Assistance Act (42 U.S.C.
11411), as amended, HUD is publishing
this Notice to identify Federal buildings
and other real property that HUD has
reviewed for suitability for use to assist
the homeless. The properties were
reviewed using information provided to
HUD by Federal landholding agencies
regarding unutilized and underutilized
buildings and real property controlled
by such agencies or by GSA regarding
its inventory of excess or surplus
Federal property. This Notice is also
published in order to comply with the
December 12, 1988 Court Order in
*National Coalition for the Homeless v.
Veterans Administration*, No. 88-2503-
OG (D.D.C.).

Properties reviewed are listed in this
Notice according to the following
categories: Suitable/available, suitable/
unavailable, and suitable/to be excess,
and unsuitable. The properties listed in
the three suitable categories have been
reviewed by the landholding agencies,
and each agency has transmitted to
HUD: (1) Its intention to make the
property available for use to assist the
homeless, (2) its intention to declare the
property excess to the agency's needs, or

(3) a statement of the reasons that the
property cannot be declared excess or
made available for use as facilities to
assist the homeless.

Properties listed as suitable/available
will be available exclusively for
homeless use for a period of 60 days
from the date of this Notice. Where
property is described as for "off-site use
only" recipients of the property will be
required to relocate the building to their
own site at their own expense.
Homeless assistance providers
interested in any such property should
send a written expression of interest to
HHS, addressed to Theresa Ritta, Ms.
Theresa M. Ritta, Chief Real Property
Branch, the Department of Health and
Human Services, Room 5B-17,
Parklawn Building, 5600 Fishers Lane,
Rockville, MD 20857, (301) 443-2265
(This is not a toll-free number.) HHS
will mail to the interested provider an
application packet, which will include
instructions for completing the
application. In order to maximize the
opportunity to utilize a suitable
property, providers should submit their
written expressions of interest as soon
as possible. For complete details
concerning the processing of
applications, the reader is encouraged to
refer to the interim rule governing this
program, 24 CFR part 581.

For properties listed as suitable/to be
excess, that property may, if
subsequently accepted as excess by
GSA, be made available for use by the
homeless in accordance with applicable
law, subject to screening for other
Federal use. At the appropriate time,
HUD will publish the property in a
Notice showing it as either suitable/
available or suitable/unavailable.

For properties listed as suitable/
unavailable, the landholding agency has
decided that the property cannot be
declared excess or made available for
use to assist the homeless, and the
property will not be available.

Properties listed as unsuitable will
not be made available for any other
purpose for 20 days from the date of this
Notice. Homeless assistance providers
interested in a review by HUD of the
determination of unsuitability should
call the toll free information line at 1-
800-927-7588 for detailed instructions
or write a letter to Ann Marie Oliva at
the address listed at the beginning of
this Notice. Included in the request for
review should be the property address
(including zip code), the date of
publication in the **Federal Register**, the
landholding agency, and the property
number.

For more information regarding
particular properties identified in this
Notice (i.e., acreage, floor plan, existing

sanitary facilities, exact street address),
providers should contact the
appropriate landholding agencies at the

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–HQ–EA–2014–N140; FF09F42300–FVWF9792090000–XXX]

Sport Fishing and Boating Partnership Council

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of teleconference.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce a

public teleconference of the Sport Fishing and Boating Partnership Council (Council).

DATES: *Teleconference:* Wednesday, July 23, 2014, 1 p.m. to 2 p.m. (Eastern daylight time). For deadlines and directions on registering to listen to the teleconference, submitting written material, and giving an oral presentation, please see “Public Input” under **SUPPLEMENTARY INFORMATION**.
FOR FURTHER INFORMATION CONTACT: Brian Bohnsack, Council Coordinator, via U.S. mail at 4401 North Fairfax Drive, Mailstop 720–FAC, Arlington, VA 22203; via telephone at (703) 358–2435; via fax at (703) 358–2548; or email (brian_bohnsack@fws.gov).

SUPPLEMENTARY INFORMATION: In accordance with the requirements of the Federal Advisory Committee Act, 5 U.S.C. App., we announce that Sport Fishing and Boating Partnership Council will hold a teleconference.

Background

The Council was formed in January 1993 to advise the Secretary of the Interior, through the Director of the Service, on nationally significant recreational fishing, boating, and aquatic resource conservation issues. The Council represents the interests of the public and private sectors of the sport fishing, boating, and conservation communities and is organized to enhance partnerships among industry,

constituency groups, and government. The 18-member Council, appointed by the Secretary of the Interior, includes the Service Director and the president of the Association of Fish and Wildlife Agencies, who both serve in ex officio capacities. Other Council members are directors from State agencies responsible for managing recreational fish and wildlife resources and individuals who represent the interests of saltwater and freshwater recreational fishing, recreational boating, the recreational fishing and boating industries, recreational fisheries resource conservation, Native American tribes, aquatic resource outreach and education, and tourism. Background information on the Council is available at <http://www.fws.gov/sfbpc>.

Meeting Agenda

The Council will hold a teleconference to:

- Consider and approve a response to a request for comments on proposed regulations for the U.S. Fish and Wildlife Service’s Boating Infrastructure Grant program;
- Consider other Council business, including planning for the July 30–31, 2014, meeting.

The final agenda will be posted on the Internet at <http://www.fws.gov/sfbpc>.

Public Input

If you wish to . . .	You must contact the Council Coordinator (see FOR FURTHER INFORMATION CONTACT) no later than . . .
Listen to the teleconference	Thursday, July 17, 2014.
Submit written information or questions before the teleconference for the council to consider during the teleconference.	Thursday, July 17, 2014.
Give an oral presentation during the teleconference	Thursday, July 17, 2014.

Submitting Written Information or Questions

Interested members of the public may submit relevant information or questions for the Council to consider during the teleconference. Written statements must be received by the date listed in “Public Input” under **SUPPLEMENTARY INFORMATION**, so that the information may be made available to the Council for their consideration prior to this teleconference. Written statements must be supplied to the Council Coordinator in one of the following formats: One hard copy with original signature, and one electronic copy via email (acceptable file formats are Adobe Acrobat PDF, MS Word, MS PowerPoint, or rich text file).

Giving an Oral Presentation

Individuals or groups requesting to make an oral presentation during the teleconference will be limited to 2 minutes per speaker, with no more than a total of 15 minutes for all speakers. Interested parties should contact the Council Coordinator, in writing (preferably via email; see **FOR FURTHER INFORMATION CONTACT**), to be placed on the public speaker list for this teleconference. To ensure an opportunity to speak during the public comment period of the teleconference, members of the public must register with the Council Coordinator. Registered speakers who wish to expand upon their oral statements, or those who had wished to speak but could not be

accommodated on the agenda, may submit written statements to the Council Coordinator up to 30 days subsequent to the teleconference.

Meeting Minutes

Summary minutes of the teleconference will be maintained by the Council Coordinator (see **FOR FURTHER INFORMATION CONTACT**) and will be available for public inspection within 90 days of the meeting and will be posted on the Council’s Web site at <http://www.fws.gov/sfbpc>.

Rowan W. Gould,
Deputy Director.

DEPARTMENT OF THE INTERIOR**Bureau of Land Management**

[LLWY922000-L13200000-EL0000, WYW1 83321]

Notice of Invitation to Participate; Coal Exploration License Application WYW183321, Wyoming**AGENCY:** Bureau of Land Management, Interior.**ACTION:** Notice.

SUMMARY: Pursuant to the Mineral Leasing Act of 1920, as amended by the Federal Coal Leasing Amendments Act of 1976, and to Bureau of Land Management (BLM) regulations, all interested parties are hereby invited to participate with Bridger Coal Company on a pro rata cost-sharing basis, in its program for the exploration of coal deposits owned by the United States of America in Sweetwater County, Wyoming.

DATES: This notice of invitation will be published in the *Rock Springs Rocket-Miner* once each week for 2 consecutive weeks beginning the week of June 9, 2014, and in the **Federal Register**. Any party electing to participate in this exploration program must send written notice to both the BLM and Bridger Coal Company, as provided in the **ADDRESSES** section below, no later than 30 days after publication of this invitation in the **Federal Register**.

ADDRESSES: Copies of the exploration plan are available for review during normal business hours in the following offices (serialized under number WYW183321): BLM, Wyoming State Office, 5353 Yellowstone Road, Cheyenne, WY 82009; and, BLM, Rock Springs Field Office, 280 Highway 191 North, Rock Springs, WY 82901. The written notice should be sent to the following addresses: Bridger Coal Company, c/o Interwest Mining Co., Attn: Scott M. Child, 1407 W. North Temple, #310, Salt Lake City, UT 84116 and the BLM Wyoming State Office, Branch of Solid Minerals, Attn: Jackie Madson, P.O. Box 1828, Cheyenne, WY 82003.

FOR FURTHER INFORMATION CONTACT: Jackie Madson, Land Law Examiner, at 307-775-6258. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Bridger Coal Company has applied to the BLM for a coal exploration license on public land to the west of the Jim Bridger underground coal mine. The purpose of the exploration program is to obtain structural and quality information of the coal. The BLM regulations at 43 CFR 3410 require the publication of an invitation to participate in the coal exploration in the **Federal Register**. The Federal coal resources included in the exploration license application are located in the following described lands in Wyoming:

Sixth Principal Meridian

T. 22 N., R. 101 W.,

Sec. 28, lots 1 to 15, inclusive, and NW1/4SE1/4.

The area described contains 639.49 acres.

The proposed exploration program is fully described and will be conducted pursuant to an exploration plan to be approved by the BLM.

Authority: 43 CFR 3410.2-1(c)(1).**Larry Claypool,***Deputy State Director, Minerals and Lands.*

Notice of Invitation to Participate; Coal Exploration License Application UTU-90194, Sevier County, UT**AGENCY:** Bureau of Land Management, Interior.**ACTION:** Notice.

SUMMARY: Pursuant to Mineral Leasing Act of 1920, as amended by the Federal Coal Leasing Amendments Act of 1976 and Bureau of Land Management (BLM) regulations, members of the public are invited to participate with Canyon Fuel Company, LLC, on a pro rata cost sharing basis in a program for the exploration of coal deposits owned by the United States of America in Sevier County, Utah.

DATES: Any party seeking to participate in this exploration program must send written notice to both the BLM and Canyon Fuel Company, LLC, to the addresses provided in the **ADDRESSES** section below, no later than August 11, 2014. Such written notice must refer to serial number UTU-90194. The notice of invitation to participate in this coal exploration license was published in the *Richfield Reaper*, beginning the third

week of January 2014, once each week for two consecutive weeks.

ADDRESSES: Copies of the exploration license application UTU-90194 and the proposed plan are available for review from 7:45 a.m.-4:30 p.m., Monday through Friday, excluding Federal holidays, in the public room of the BLM-Utah State Office, 440 West 200 South, Suite 500, Salt Lake City, UT 84101.

A written notice to participate in the exploration program should be sent to Roger Bankert, Bureau of Land Management, Utah State Office, Division of Lands and Minerals, 440 West 200 South, Suite 500, Salt Lake City, UT 84101, and to Mark Bunnell, Canyon Fuel Company LLC, c/o SUFCO Mine, 597 South SR 24, Salina, UT 84654.

FOR FURTHER INFORMATION CONTACT: Stan Perkes by telephone (801)539-4036, or by email: *sperkes@blm.gov*. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact the above individual. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The exploration activities will be performed pursuant to the Mineral Leasing Act of 1920, as amended, 30 U.S.C. 201(b), and to the regulations at 43 CFR Part 3410. The purpose of the exploration program is to gain additional geologic knowledge of the coal underlying the exploration area for the purpose of assessing the coal resources. The exploration program is fully described and will be conducted pursuant to an exploration license and plan approved by the BLM. The exploration plan may be modified to accommodate the legitimate exploration needs of persons seeking to participate.

Canyon Fuel Company, LLC, has applied to the BLM for a coal exploration license on U.S. Forest Service surface with federally-owned minerals in Sevier County, Utah.

The lands to be explored for coal deposits in exploration license UTU-90194 are described as follows:

T. 21 S., R. 4 E., SLM, Utah
 Sec. 13, W $\frac{1}{2}$ NE $\frac{1}{4}$, E $\frac{1}{2}$ NW $\frac{1}{4}$;
 Sec. 21, all;
 Sec. 22, all;
 Sec. 23, W $\frac{1}{2}$ NW $\frac{1}{4}$, W $\frac{1}{2}$ SW $\frac{1}{4}$;
 Sec. 26, W $\frac{1}{2}$ NW $\frac{1}{4}$;
 Sec. 27, N $\frac{1}{2}$;
 Secs. 28-33, all.
 Containing 5,770.93 acres.

The Federal coal within the lands described for exploration license

application UTU-90194 is currently unleased for development of Federal coal reserves.

Authority: 43 CFR 3410.2-1(c)(1).

Jenna Whitlock,

Associate State Director.

Notice of Invitation to Participate; Coal Exploration License Application NDM 107286, North Dakota

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Pursuant to the Mineral Leasing Act of 1920, as amended by the Federal Coal Leasing Amendments Act of 1976, and to Bureau of Land Management (BLM) regulations, members of the public are invited to participate with BNI Coal Ltd. on a pro rata cost sharing basis in a program for the exploration of coal deposits owned by the United States of America in lands located in Oliver County, North Dakota.

DATES: Any party seeking to participate in this exploration program must send written notice to both the Bureau of Land Management (BLM) and BNI Coal Ltd. as provided in the **ADDRESSES** section below no later than August 11, 2014 or 10 calendar days after the last publication of this Notice in the *Bismarck Tribune* newspaper, whichever is later. This Notice will be published once a week for 2 consecutive weeks in the *Bismarck Tribune*, Bismarck, North Dakota. Such written notice must refer to serial number NDM 107286.

ADDRESSES: The proposed exploration license and plan (serialized under number NDM 107286) are available for review from 9 a.m. to 4 p.m., Monday through Friday, in the public room at the BLM Montana State Office, 5001 Southgate Drive, Billings, Montana. The exploration license application and exploration plan are also available for viewing on the Montana State Office coal Web site at <http://www.blm.gov/mt/st/en/prog/energy/coal.html>.

A written notice to participate in the exploration license should be sent to the State Director, BLM Montana State Office, 5001 Southgate Drive, Billings, MT 59101-4669 and BNI Coal, 2360 35th Avenue SW., Center, ND 58530.

FOR FURTHER INFORMATION CONTACT:

Anne Allen, telephone 406-896-5082 or email at amallen@blm.gov; or Kym Dowdle, telephone 406-896-5046, or email at kdowdle@blm.gov. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question for the above individuals. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The exploration activities will be performed pursuant to the Mineral Leasing Act of 1920, as amended, 30 U.S.C. 201(b), and to the regulations at 43 CFR part 3410. The BLM regulations at 43 CFR 3410 require the publication of an invitation to participate in the coal exploration in the **Federal Register**. The purpose of the exploration program is to gain additional geologic knowledge of the coal underlying the exploration area for the purpose of assessing the coal resources. The exploration program is fully described and will be conducted pursuant to an exploration license and plan approved by the BLM. The exploration plan may be modified to accommodate the legitimate exploration needs of persons seeking to participate.

The Federal coal resources included in the exploration license application NDM 107286 are located in the following-described lands in North Dakota:

Fifth Principal Meridian, North Dakota

T141N, R83W,
Sec. 8, NW $\frac{1}{4}$ SE $\frac{1}{4}$, S $\frac{1}{2}$ SE $\frac{1}{4}$;
Sec. 18, NE $\frac{1}{4}$,
T141 N, R84W,
Sec. 24, SW $\frac{1}{4}$.

The area described contains 440 acres.

The Federal coal within the lands described for exploration license application NDM 107286 is currently unleased for development of Federal coal reserves.

Authority: 43 CFR 3410.2-1(c)(1).

Phillip C. Perlewitz,

Chief, Branch of Solid Minerals.

BILLING CODE 4310-DN-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLCA930000-1430; CACA 007678]

Public Land Order No. 7826; Partial Revocation of Executive Orders Dated June 8, 1866, and September 10, 1902; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially revokes approximately 12.97 acres of a withdrawal created by two Executive Orders that reserved land at Trinidad Head for use by the United States Coast Guard for lighthouse purposes. The United States Coast Guard no longer needs the reservation on this portion of land. This order returns administrative jurisdiction over this land back to the Bureau of Land Management (BLM).

DATE: *Effective Date:* July 11, 2014.

FOR FURTHER INFORMATION CONTACT: Elizabeth Easley, BLM California State Office, 2800 Cottage Way, Sacramento, CA 95825, 916-978-4673. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact the above individual. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The United States Coast Guard has determined that 12.97 acres of land withdrawn for the Trinidad Head Light Station in Humboldt County, California, is no longer needed for lighthouse purposes and the BLM has determined that the lands are suitable for return to the public domain. The United States Coast Guard will retain 1.08 acres of the original reservation which it continues to use for communication site purposes related to navigation.

Order

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714, it is ordered as follows:

1. The withdrawal created by two Executive Orders dated June 8, 1866, and September 10, 1902, which reserved public land at Trinidad Head for lighthouse purposes, is hereby revoked insofar as it affects the following described land:

Humboldt Meridian

T. 8 N., R. 1 W.,

Sec. 26, lot 6.

The land described contains 12.97 acres Humboldt County.

2. At 8:30 a.m. on August 11, 2014, the land described in Paragraph 1 shall be opened to appropriation under the general land laws, except location and entry under the United States mining laws, subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law.

Dated: June 18, 2014.

Janice M. Schneider,

Assistant Secretary—Land and Minerals Management.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: The Bureau of Land Management (BLM) is considering the issuance of a permit for mineral exploration on lands withdrawn for use by the National Oceanic and Atmospheric Administration (NOAA). The proposal to conduct sampling associated with mineral assessment on the subject lands was provided by Fairbanks Gold Mining, Inc. (FGMI). The BLM has determined that the lands are suitable and available for issuance of a non-competitive permit for such purposes to FGMI under the authority of Section 302 of the Federal Land Policy and Management Act (FLPMA).

DATES: Comments must be received by the BLM Eastern Interior Field Office at the address below on or before August 11, 2014.

ADDRESSES: Send written comments concerning this notice to: Acting Field Office Manager, Bureau of Land Management, Eastern Interior Field Office, 1150 University Avenue, Fairbanks, AK 99709.

FOR FURTHER INFORMATION CONTACT: Michael Gibson, Acting Field Office Manager, Bureau of Land Management, Eastern Interior Field Office, at the above address, by telephone at 907-474-2263, or by email at mjgibson@blm.gov. Persons who use a

telecommunication device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact the individual. The FIRS is available 24 hours a day, 7 days a week to leave a message or a question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The proposed FLPMA Section 302 permit would be located within the following lands:

Fairbanks Meridian, Alaska

T. 2 N., R. 2 E.,

Sec. 7, SE $\frac{1}{4}$ SE $\frac{1}{4}$;

Sec. 8, SW $\frac{1}{4}$ SW $\frac{1}{4}$;

Sec. 17, W $\frac{1}{2}$, excepting lands described in Public Land Order 7763;

Sec. 18;

Sec. 19, lot 1;

Sec. 20, W $\frac{1}{2}$, W $\frac{1}{2}$ E $\frac{1}{2}$ (partial), excepting lands described in Public Land Order 7682.

The areas described aggregate approximately 1,966 acres within the Fairbanks North Star Borough.

Although the subject lands are not covered by a BLM land use plan, the proposed mineral assessment activities are consistent with current and historic uses of BLM-managed lands in the area. The BLM has authorized similar mineral assessment activities on these lands in the past, and mining and mineral-related activities have been ongoing in this area for more than 100 years. No mineral assessment activities would take place on ground subject to valid existing rights pursuant to Public Land Order (PLO) 3708 (30 FR 8753, July 10, 1965), as modified by PLO 6709 (54 FR 6919, February 15, 1989), and extended by PLO 7710 (73 FR 35708, June 24, 2008). The lands affected are adjacent to Fort Knox, one of the largest operating gold mines in Alaska.

In accordance with the requirements of PLO 3708, the BLM sought and received a letter of non-objection from NOAA stating that the mineral assessment activities proposed by FGMI will not interfere with the operation of its facilities so long as certain conditions identified by NOAA are incorporated into any permit.

The proposed mineral assessment activities are anticipated to impact approximately 25 acres over a 3-year period. Approximately 250 bore holes supporting the sampling would be drilled. Each drill site would require a drill pad approximately 2,400 square feet in size. Access would be provided by a combination of existing roads and trails and newly constructed trails 14 feet in width. Heavy equipment including caterpillars, low-boy transport

trailers, and portable drill rigs would be utilized to take the samples.

Should a permit be issued, the permit would not authorize any activity under the authority of the Mining Law and will not authorize mineral development or extraction beyond that associated with assessment sampling. Disturbed lands would be reclaimed in accordance with BLM regulations and standards.

Pursuant to the regulations found in 43 CFR part 2920, BLM has determined that the public lands described above are available for issuance of a non-competitive permit to FGMI for mineral assessment purposes. The BLM will therefore accept an application filed by FGMI for such a permit under Section 302 of FLPMA. The BLM will complete an environmental analysis and make a decision regarding whether to deny or grant the application.

Detailed information relating to the permit process and environmental analysis will be available for review at the location identified in **ADDRESSES** above. Comments regarding the proposed non-competitive permit and the BLM's determination of the availability of the subject lands for the described use may be submitted in writing to the Acting Field Office Manager (see **ADDRESSES**, above) on or before August 11, 2014. All comments submitted will be evaluated by BLM's Eastern Interior Acting Field Office Manager prior to making a final decision on whether or not to authorize use of the subject lands for mineral assessment work.

Before including your address, phone number, email address or other personal identifying information (PII) in your comment, you should be aware that your entire comment may be made publically available at any time. While you may request that your PII be withheld from public review, we cannot guarantee that we will be able to do so.

Authority: 43CFR 2920.4.

Ted A. Murphy,

BLM Alaska Acting State Director.

BILLING CODE 4312-51-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-506-508 and 731-TA-1238-1243 (Final)]

Non-Oriented Electrical Steel from China, Germany, Japan, Korea, Sweden, and Taiwan; Scheduling of the final phase of countervailing duty and antidumping duty investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the scheduling of the final phase of antidumping and countervailing duty investigation Nos. 701-TA-506-508 and 731-TA-1238-1243 (Final) under sections 705(b) and 731(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b) and 1673d(b)) (the Act) to determine whether an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from China, Germany, Japan, Korea, Sweden, and Taiwan of non-oriented electrical steel, provided for in subheading 7225.19.00 and 7226.19.10, and 7226.19.90 of the Harmonized Tariff Schedule of the United States,¹ that are sold in the

¹ For purposes of these investigations, the Department of Commerce has defined the subject merchandise as "non-oriented electrical steel (NOES), which includes cold-rolled, flat-rolled, alloy steel products, whether or not in coils, regardless of width, having an actual thickness of

United States at less than fair value and by reason of imports of non-oriented electrical steel that are subsidized by the Governments of China, Korea, and Taiwan.²

For further information concerning the conduct of this phase of the investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

DATES: *Effective Date:* Thursday, July 2, 2014.

FOR FURTHER INFORMATION CONTACT:

Edward Petronzio (202–205–3176), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office

of 0.20 mm or more, in which the core loss is substantially equal in any direction of magnetization in the plane of the material. The term "substantially equal" means that the cross grain direction of core loss is no more than 1.5 times the straight grain direction (i.e., the rolling direction) of core loss. NOES has a magnetic permeability that does not exceed 1.65 Tesla when tested at a field of 800 A/m (equivalent to 10 Oersteds) along (i.e., parallel to) the rolling direction of the sheet (i.e., B800 value). NOES contains by weight more than 1.00 percent of silicon but less than 3.5 percent of silicon, not more than 0.08 percent of carbon, and not more than 1.5 percent of aluminum. NOES has a surface oxide coating, to which an insulation coating may be applied.

NOES is subject to these investigations whether it is fully processed (i.e., fully annealed to develop final magnetic properties) or semi-processed (i.e., finished to final thickness and physical form but not fully annealed to develop final magnetic properties). Fully processed NOES is typically made to the requirements of ASTM specification A 677, Japanese Industrial Standards (JIS) specification C 2552, and/or International Electrotechnical Commission (IEC) specification 60404–8–4. Semi-processed NOES is typically made to the requirements of ASTM specification A 683. However, the scope of these investigations is not limited to merchandise meeting the ASTM, JIS, and IEC specifications noted immediately above.

NOES is sometimes referred to as cold-rolled non-oriented (CRNO), non-grain oriented (NGO), non-oriented (NO), or cold-rolled non-grain oriented (CRNGO) electrical steel. These terms are interchangeable.

Excluded from the scope of these investigations are flat-rolled products not in coils that, prior to importation into the United States, have been cut to a shape and undergone all punching, coating, or other operations necessary for classification in Chapter 85 of the Harmonized Tariff Schedule of the United States (HTSUS) as a part (i.e., lamination) for use in a device such as a motor, generator, or transformer."

² The Department of Commerce has preliminarily determined that countervailing subsidies are not being provided to producers and exporters of non-oriented electrical steel from the Government of Korea.

of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (<http://www.usitc.gov>). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at <http://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background. The final phase of these investigations is being scheduled as a result of affirmative preliminary determinations by the Department of Commerce that certain benefits which constitute subsidies within the meaning of section 703 of the Act (19 U.S.C. 1671b) are being provided to manufacturers, producers, or exporters in China and Taiwan of non-oriented electrical steel, and that such products from China, Germany, Japan, Korea, Sweden, and Taiwan are being sold in the United States at less than fair value within the meaning of section 733 of the Act (19 U.S.C. 1673b).³ The investigations were requested in a petition filed on September 30, 2013 by AK Steel Corp., West Chester, Ohio.

Although the Department of Commerce has preliminarily determined that imports of non-oriented electrical steel from Korea are not being and are not likely to be subsidized by the Government of Korea, for the purposes of efficiency the Commission hereby waives rule 207.21(b)⁴ so that the final phase of the investigation may proceed concurrently in the event that Commerce makes a final affirmative determination with respect to such imports.

Participation in the investigations and public service list. Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the final phase of these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in section 201.11 of the Commission's rules, no later than 21 days prior to the hearing date specified in this notice. A party that filed a notice of appearance during the preliminary phase of the investigations need not file an

³ In addition to making its preliminary countervailing duty determinations on non-oriented electrical steel from China, Korea, and Taiwan, the Department of Commerce simultaneously announced the alignment of the final countervailing duty determinations with its final determinations in the companion antidumping duty investigations.

⁴ Section 207.21(b) of the Commission's rules provides that, where the Department of Commerce has issued a negative preliminary determination, the Commission will publish a Final Phase Notice of Scheduling upon receipt of an affirmative final determination from Commerce.

additional notice of appearance during this final phase. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list. Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in the final phase of these investigations available to authorized applicants under the APO issued in the investigations, provided that the application is made no later than 21 days prior to the hearing date specified in this notice. Authorized applicants must represent interested parties, as defined by 19 U.S.C. 1677(9), who are parties to the investigations. A party granted access to BPI in the preliminary phase of the investigations need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report. The prehearing staff report in the final phase of these investigations will be placed in the nonpublic record on Tuesday, September 23, 2014, and a public version will be issued thereafter, pursuant to section 207.22 of the Commission's rules.

Hearing. The Commission will hold a hearing in connection with the final phase of these investigations beginning at 9:30 a.m. on Wednesday, October 8, 2014, at the U.S. International Trade Commission Building. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before Thursday, October 2, 2014. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference to be held at 9:30 a.m. on Monday, October 6, 2014, at the U.S.

International Trade Commission Building. Oral testimony and written materials to be submitted at the public hearing are governed by sections 201.6(b)(2), 201.13(f), and 207.24 of the Commission's rules. Parties must submit any request to present a portion of their hearing testimony *in camera* no later than 7 business days prior to the date of the hearing.

Written submissions. Each party who is an interested party shall submit a prehearing brief to the Commission. Prehearing briefs must conform with the

provisions of section 207.23 of the Commission's rules; the deadline for filing is Tuesday, September 30, 2014. Parties may also file written testimony in connection with their presentation at the hearing, as provided in section 207.24 of the Commission's rules, and posthearing briefs, which must conform with the provisions of section 207.25 of the Commission's rules. The deadline for filing posthearing briefs is Thursday, October 16, 2014. In addition, any person who has not entered an appearance as a party to the investigations may submit a written statement of information pertinent to the subject of the investigations, including statements of support or opposition to the petition, on or before Thursday, October 16, 2014. On Wednesday, October 29, 2014, the Commission will make available to parties all information on which they have not had an opportunity to comment. Parties may submit final comments on this information on or before Friday, October 31, 2014, but such final comments must not contain new factual information and must otherwise comply with section 207.30 of the Commission's rules. All written submissions must conform with the provisions of section 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on E-Filing*, available on the Commission's Web site at <http://edis.usitc.gov>, elaborates upon the Commission's rules with respect to electronic filing.

Additional written submissions to the Commission, including requests pursuant to section 201.12 of the Commission's rules, shall not be accepted unless good cause is shown for accepting such submissions, or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with sections 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.21 of the Commission's rules.

Issued: July 8, 2014.

By order of the Commission.

Jennifer D. Rohrbach,
Supervisory Attorney.

BILLING CODE 7020-02-P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

On July 7, 2014, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the District of Colorado, in the lawsuit entitled *United States v. Thoro Products Company*, Civil Action No. 1:14-cv-01867.

The Consent Decree resolves the claims of the United States set forth in the complaint against Thoro Products Company for costs incurred and to be incurred in connection with the Twins Inn Superfund Site, located in Arvada, Colorado (the "Site"), pursuant to Section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. § 9607. Under the Consent Decree, the settling defendant agrees to reimburse \$400,000 in past costs to the United States Environmental Protection Agency, based upon its limited ability to pay.

The publication of this notice opens a period for public comment on the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States v. Thoro Products Company*, D.J. Ref. No. 90-11-2-08744. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	Send them to:
By email	pubcomment-ees.enrd@usdoj.gov .
By mail	Assistant Attorney General, U.S. DOJ-ENRD, P.O. Box 7611, Washington, DC 20044-7611.

During the public comment period, the Consent Decree may be examined and downloaded at this Justice Department Web site: <http://www.usdoj.gov/enrd/ConsentDecrees.html>. We will provide a paper copy of the Consent Decree upon written request and payment of

reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ-ENRD, P.O. Box 7611, Washington, DC 20044-7611.

Please enclose a check or money order for \$13.25 (25 cents per page reproduction cost) payable to the United States Treasury. For a paper copy without the appendices and signature pages, the cost is \$6.75.

Robert Brook,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410-15-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 11-72]

Moore Clinical Trials, L.L.C.; Decision and Order

On August 8, 2011, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, issued an Order to Show Cause to Moore Clinical Trials, L.L.C. (Respondent), of North Little Rock, Arkansas. The Show Cause Order proposed the denial of Respondent's application for a DEA Certificate of Registration as a researcher, on the ground that "its registration would be inconsistent with the public interest." ALJ Ex. 1, at 1 (citing 21 U.S.C. 823(f)).

The Show Cause Order alleged that on March 15, 2011, Ms. Greta B. Moore submitted on Respondent's behalf, an "application for a DEA research registration for [s]chedule II controlled substances." *Id.* The Show Cause Order alleged that while Ms. Moore would be the primary person responsible for ordering and storing controlled substances, she "has no prior experience with handling controlled substances." *Id.* (citing 21 U.S.C. 823(f)(2)). The Show Cause Order then alleged that "Ms. Moore initially informed DEA investigators that she had experience researching with controlled substances but then admitted this assertion was not true." *Id.* (citing 21 U.S.C. 823(f)(5)).

Next, the Show Cause Order alleged that "[t]he only DEA registered physician that plans to work at [Respondent] will have very limited hours and contact with" it. *Id.* at 2. The Show Cause Order further alleged that "[i]n 2006, the Arkansas State Medical Board suspended this physician's medical license because . . . he . . . pre-signed controlled substance

prescriptions, which were issued by his staff,” and that “[i]n 2008, [he] was convicted of one count of Medicare fraud” in federal district court and subsequently “excluded . . . from participating in the Medicare programs as required by 42 U.S.C. 1320a–7(a).” *Id.* (citing 21 U.S.C. 823(f)(5)).

Finally, the Show Cause Order alleged that the State of Arkansas “has not granted [Respondent’s] application for a research license,” and that Respondent “is currently without authority to handle controlled substances in the State . . . in which [it] has applied for a DEA . . . registration.” *Id.* The Order thus alleged that “DEA must deny [its] application based upon its lack of authority to handle controlled substances in the State of Arkansas.” *Id.* (citing 21 U.S.C. 823(f)(1)).

On August 26, 2011, Respondent, through its owner Ms. Moore, requested a hearing on the allegations, ALJ Ex. 2, and the matter was placed on the docket of the Office of Administrative Law Judges (ALJ). Thereafter, the Government moved for summary disposition on the ground that Respondent did not possess the requisite Arkansas researcher’s license and therefore could not be registered pursuant to 21 U.S.C. 823(f); the Government’s motion was supported by a letter from the Deputy General Counsel of the Arkansas Department of Health stating that Respondent’s application for a state license had not been granted. ALJ Ex. 3.

Respondent opposed the Government’s motion, contending that it possesses a temporary Arkansas license authorizing it to handle controlled substances.¹ ALJ Ex. 4, at 4. The Government then filed a reply to the Respondent’s opposition and included a further letter from the aforementioned official, which again stated that Respondent did not possess a valid state license but had been issued a temporary state registration number in order to allow it to complete its DEA application. ALJ Ex. 4, at 4–5. Thereafter, the ALJ found that there was no dispute over the material fact “that Respondent is presently without state authority to handle controlled

substances in Arkansas.” *Id.* at 8–9. The ALJ thus granted the Government’s motion and forwarded the then-existing record to me for final agency action. *Id.* at 12.

On April 16, 2012, while the matter was still pending before this Office, the Government filed a motion to remand the case, noting that on March 12, 2012, Respondent obtained a state controlled-substance registration. ALJ Ex. 6, at 1. The Government observed, however, that it had raised “additional allegations under 21 U.S.C. 823(f) to deny [Respondent’s] application” and that an evidentiary hearing was required to litigate them. Gov. Mot. to Remand, at 1. In opposition, Respondent contended that a hearing was no longer required because the Government had “abandoned” its other claims by seeking summary disposition and that “[t]he re-litigation of these issues following the [ALJ’s] Order on the Government’s Summary Judgment Motion would be akin to *res judicata*.” Response of Moore Clinical Trials LLC To The Government’s Motion To Remand, at 1–2. On June 4, 2012, I found neither of Respondent’s contentions persuasive and granted the Government’s motion to remand the matter to the ALJ “for further proceedings.” *Id.* at 2–3.

Thereafter, on June 22, 2012, the Government filed a second motion for summary disposition. ALJ Ex. 7. Therein, the Government asserted that while Respondent “had planned to hire a DEA registered physician, Brian T. Nichol, M.D., . . . to administer and dispense the controlled substances to the research subjects,” it was its “understanding that [Respondent] now would not be hiring Dr. Nichol.” *Id.* at 2. The Government further argued that under Arkansas law, Respondent “cannot operate until and unless there is an authorized licensed physician in the State . . . who will be hired by [it] to administer and dispense the controlled substance that [it] seeks to use in its research facility.” *Id.* at 3. The Government thus contended that because Respondent “does not have such a person who will serve in this capacity . . . [its] DEA application should be summarily denied.” *Id.* The Government did not, however, offer any evidence to support the factual premise of its motion.

Respondent opposed the motion (although here again, the ALJ failed to forward its filing), contending that it had entered into a contract with Dr. Nichol (more precisely, his entity, Brinch Clinical Research), to provide a licensed physician to administer or dispense the controlled substances to the research subjects. ALJ Ex. 8 (citing

Respondent’s Response, at 1–2). In contrast to the Government, Respondent provide evidence to support its contention, specifically, a copy of its contract with Dr. Nichol’s entity. *Id.* at 2.

On July 6, 2012, the ALJ denied the Government’s motion, finding that “there is a genuine dispute of material fact regarding Dr. Nichol’s employment with [Respondent] as the physician assigned to this research project.” ALJ Ex. 8, at 2. However, “because the Government asserts additional material factual allegations regarding Respondent’s application for a DEA registration, allegations which the Respondent vigorously disputes,” the ALJ set the matter for hearing. *Id.*

Following additional pre-hearing procedures, on September 19–21, 2012, the ALJ conducted a hearing in Little Rock, Arkansas. Recommended Rulings, Findings of Fact, Conclusions of Law, and Decision of the Administrative Law Judge (hereinafter, Recommended Decision or R.D.), at 5. At the hearing, both parties called witnesses to testify and submitted various documents for the record. Following the hearing, both parties filed briefs containing their proposed findings of fact, conclusions of law, and arguments.²

On November 30, 2012, the ALJ issued her Recommended Decision. Therein, the ALJ reviewed the evidence with respect to the five public interest factors. *See* R.D. at 25–35. With respect to factor one—the recommendation of the appropriate state licensing board—the ALJ found that the State of Arkansas “has granted the Respondent a temporary controlled substance registration.” R.D. at 26. The ALJ thus concluded that while this factor is “not dispositive,” because “[t]he ultimate responsibility to determine whether a registration is consistent with the public interest has been delegated exclusively to the DEA” and not to state officials, the ALJ found that “Respondent meets that requirement for gaining a DEA registration.” *Id.* (citing *Edmund Chein, M.D.*, 72 FR 6580, 6590 (2007), *pet. for rev. denied, Chein v. DEA*, 533 F.3d 828 (D.C. Cir. 2008)).

Likewise, with respect to factor three—Respondent’s record of convictions for offenses relating to the manufacture, distribution, and dispensing of controlled substances—the ALJ found that there was no evidence that Respondent has been convicted of such an offense. *Id.* at 27. However, the ALJ further noted that “[w]hile this factor may support the

¹ Notably, in forwarding the record to this Office, the ALJ failed to include the Respondent’s opposition to the Government’s motion. In addition, numerous other filings were not initially forwarded to this Office, including the parties’ pre-hearing statements, motions and oppositions related to various rejected exhibits, as well as the ALJ’s order excluding these exhibits. Accordingly, I ordered the ALJ to forward these documents to me. Given that proper review of the record requires that the entire record be forwarded to this office for review, these filings should have been designated as ALJ Exhibits and forwarded as part of the record.

² Each party’s brief is cited as Gov. Br. or Resp. Br.

granting of Respondent's application . . . [i]t is not dispositive [of] the public interest determination." *Id.* at 27–28 (citing *Morris W. Cochran*, 77 FR 17505, 17517 (2012)).

As for factor two—the applicant's experience in dispensing or conducting research with respect to controlled substances—the ALJ noted that under Agency precedent, both an applicant's lack of relevant experience and an applicant's having "previously poorly handled controlled substances" provide grounds to deny an application. R.D. at 26 (citing cases). The ALJ then found that "the parties do not dispute that Ms. Moore lacks experience in handling controlled substances in a research project" and that "[s]he freely admitted that she is unfamiliar with the documentary requirements for the maintenance of inventories and other accountability purposes." R.D. at 27. The ALJ thus found that "this lack of experience weighs against granting her a DEA registration to handle controlled substances." *Id.*

However, the ALJ then noted that "Ms. Moore has extensive clinical research experience," including "experience maintaining documents necessary for such research accountability." *Id.* While finding that "the record contains no evidence of her success," the ALJ found "the fact that AstraZeneca granted her a research project indicative of her documented experience at least to their satisfaction for purposes of this study." *Id.* And while finding that "Ms. Moore has struggled to create a form document that will capture the facts necessary for an accountability audit," the ALJ then found that "the record amply demonstrates her willingness to become compliant." *Id.* The ALJ then offered the conclusion, which she herself deemed "speculative," that "[w]ith training, [Ms. Moore] should be able to convert her research-required recordkeeping system into one compliant with DEA requirements." *Id.* While the ALJ "recommend[ed] that Ms. Moore take a course in the handling of controlled substances by researchers," she did not make an explicit finding as to whether this factor supported either the granting or denial of Respondent's application. *Id.*

Turning to factor four—the applicant's compliance with applicable laws related to controlled substances—the ALJ noted that registrants who dispense controlled substances must comply with a number of statutes and regulations, including various registration, recordkeeping and security requirements. *Id.* at 28 (citations omitted). Moreover, the ALJ found that

"Ms. Moore signed for a shipment of [a] controlled substance when she was not registered to do so," and that "[s]uch handling of controlled substances without a registration is a violation of DEA statutory and regulatory provisions." *Id.* at 29 (citing 21 CFR 1301.13(a)).

The ALJ also found that "the documents kept by Dr. Nichol," who was supervising the two clinical trials on behalf of Respondent, "were deficient" and that the order forms for Schedule II controlled substances (DEA-222) "were lacking." *Id.* The ALJ also found that "Dr. Nichol transported controlled substances to the Respondent's location," where he was not registered to dispense them. *Id.* (citing 21 U.S.C. 822(e)). However, the ALJ declined "to impute Dr. Nichol's errors to the Respondent," reasoning that while Nichol was an independent contractor, he did not act as Respondent's agent because "Respondent's business is not meant to exercise control over the doctor's medical judgment nor is the Respondent meant to be primarily responsible for the research and recordkeeping." *Id.* at 31. In support of her conclusion, the ALJ further explained that "Respondent does not even pay Dr. Nichol for his service in conducting research at Respondent's place of business, but[] rather[,] Dr. Nichol's payment is a 'pass-through' system of payment in which the Respondent pays [him] once [it] receives funds from the Sponsoring Organization." *Id.*

The ALJ thus reasoned that Dr. Nichol is not Respondent's agent "because the Respondent does not exercise any control over Dr. Nichol's work; rather, the Respondent only offers Dr. Nichol a facility in which to conduct research." *Id.* at 32. Based on this conclusion, the ALJ declined to impute to Respondent what she characterized as "the alleged wrongdoing of Dr. Nichol regarding the transporting and dispensing of the controlled substances at Respondent's location." *Id.*

"Although [she did] not attribute the past wrongdoings of Dr. Nichol to the Respondent, [the ALJ] recognize[d] the Respondent's responsibility in needing to maintain proper records." *Id.* (citing *United States v. Clinical Leasing Service, Inc.*, 759 F. Supp. 310, 312 (E.D. La. 1990)). However, the ALJ then explained that "there has been no evidence placed in the record of Respondent's recordkeeping" and that the "[t]he records that were produced were Dr. Nichol's records." *Id.* at 33. Thus, while the ALJ found that the evidence is clear that Nichol's records did not comply with the Controlled

Substances Act or DEA regulations, "the shortcomings of these records are attributable to him" and not Respondent. *Id.* The ALJ thus reasoned that while "Respondent has failed to maintain its own recordkeeping system, it cannot be held responsible for all of the noncompliant actions of Dr. Nichol" and that "Nichol's failure to meet his responsibilities as a registrant is not a basis for refusing to grant the Respondent a researcher registration." *Id.*

As for factor five—such other conduct which may threaten public health and safety—the ALJ noted that DEA has consistently held that an applicant's candor during an investigation and failure to accept responsibility for its misconduct are "important factor[s] when assessing whether a . . . registration is consistent with the public interest." *Id.* at 34 (quoting *Jeri Hassman, M.D.*, 75 FR 8194, 8236 (2010), *pet. for rev. denied, Hassman v. DEA*, No. 10–70684, slip. op. at 4 (9th Cir., Apr. 9, 2013)). In this regard, the ALJ "acknowledge[d] that, from the Diversion Investigators' points of view, Ms. Moore appeared to change her position on her research experience and her experience [in] handling controlled substances." *Id.* Also, the ALJ found that Ms. Moore "also vacillated in her testimony concerning where the controlled substance was actually dispensed." *Id.* The ALJ then explained that "[t]his lack of candor may weigh against her being granted a DEA registration." *Id.*

As for whether Ms. Moore had accepted responsibility, the ALJ reasoned that while the "[t]he record is filled with wrongdoing done by Dr. Nichol, . . . his wrongdoing is not imputed to the Respondent," and that "[e]xcept for Ms. Moore's signing for the receipt of one shipment of the controlled substance, . . . the Government has not cited to any regulatory or statutory provision resulting in a finding of wrongdoing done by the Respondent." *Id.* at 34–35. While the ALJ agreed with the Government's contention "that Ms. Moore did not express any remorse for this wrongdoing," she "disagree[d] that this one incident is enough to deny the Respondent a DEA registration." *Id.* at 35.

The ALJ thus "conclude[d] that the Government has proven that the Respondent lacks experience in handling controlled substances as a researcher," and that while "in the past, this has served as a basis for denying a DEA registration. . . . Respondent clearly has experience in conducting drug research." *Id.* The ALJ then

observed that there was no evidence that “Respondent’s proposed business plan is a sham or an excuse to gain access to controlled substances for unlawful purposes.” *Id.* The ALJ thus “recommend[ed] that the Respondent’s application be granted” subject to the condition that “Ms. Moore should be required to take a course in the handling of controlled substances for researchers.” *Id.* at 36. The ALJ further explained that “[i]n this way she will have the knowledge necessary to both maintain the records required, and to interview future researcher registrants to ensure they have the requisite knowledge and experience to handle controlled substances in a research environment.” *Id.*

The Government filed exceptions to the ALJ’s Recommended Decision. Thereafter, the ALJ initially forwarded the transcript and exhibits, along with various filings, orders, and rulings (ALJ Exs. 1–10) to me. Thereafter, I issued an order for the ALJ to submit the rest of the record; on July 24, 2013, the ALJ complied.

Having considered the record evidence, I have decided to reject the ALJ’s Recommended Decision. While I adopt the ALJ’s findings of fact and conclusions of law with respect to factors one and three, I reject her legal conclusion that Respondent is not liable for Dr. Nichol’s misconduct in dispensing controlled substances at its Office, where Dr. Nichol was not registered (and when Respondent was not registered). Moreover, I also conclude that Respondent is liable for failing to maintain records which comply with the CSA. Because Ms. Moore (on behalf of Respondent) has not acknowledged its misconduct in allowing Nichol to dispense from an unregistered location and failing to keep compliant records, I reject the ALJ’s implicit conclusion that Respondent’s registration is consistent with the public interest. While I agree with the ALJ that upon taking an appropriate course, Ms. Moore may be able to demonstrate her ability to properly comply with controlled substance laws and regulations, I will not grant Respondent’s application absent Ms. Moore’s acknowledgement of her wrongdoing. I make the following findings of fact.

Findings

Respondent is a limited liability company; its owner and Chief Executive Officer is Ms. Greta B. Moore. GXs 1; 9; 10, at 2; Tr. 48. On March 12, 2012, the Arkansas Department of Health, Pharmacy Services, issued Respondent a temporary certificate for an Arkansas

Controlled Substances Registration. RX 19. According to the certificate, this license was good for a period of six months and was due to expire on September 12, 2012. *Id.* While Ms. Moore testified that her license had been extended for ninety days, Tr. 505, the record (as forwarded by the ALJ) contained no evidence as to whether this license remains current.

Accordingly, I issued an order directing Respondent to submit evidence that it retains authority under Arkansas law to conduct research with respect to controlled substances. Order (July 16, 2013). On July 26, 2013, Respondent submitted an email from an official with the Arkansas Department of Health stating that its state registration was extended until December 31, 2013. Email from Marci Middleton-Yates to Greta Moore (July 26, 2013).

On March 15, 2011, Ms. Moore submitted an application on behalf of Respondent for a DEA Certificate of Registration as a researcher in schedules II through V, with the proposed registered location of 3508 JFK Blvd., Suite 1, North Little Rock, Arkansas. GX 1. However, in July 2012, Respondent moved its office to 7510 Highway 107, Sherwood, Arkansas. RX 26.

Between September 1989 and March 1997, Ms. Moore worked as a respiratory therapist. RX 1, at 2; Tr. 374–75. However, as the ALJ found, Ms. Moore’s duties “did not include keeping controlled substance records, and she had very limited experience handling controlled substances.” R.D. at 6. More recently, from October 2007 through December 2007, Ms. Moore worked as a Clinical Research Coordinator for Research Solutions, L.L.C., which was managing clinic trials for a Dr. Derek Lewis. RX 1, at 1–2. Ms. Moore’s duties included the recruitment, retention, and randomization of patients. Tr. 371.

Thereafter, Dr. Lewis decided to no longer use Research Solutions and hired Ms. Moore as his site manager. *Id.* at 372. Ms. Moore was involved in managing some thirty clinical trials before she was fired.³ *Id.* at 377, 517–18. However, none of these trials involved controlled substances. *See* RX 1, at 3–5.

Subsequently, Ms. Moore decided to open her own business to provide clinical research services and formed Respondent. Tr. 373. According to Ms. Moore, her business is to “talk with the doctor to determine what the doctor

needs” and “put together a program that will help the doctor’s clinical research programs,” or to “be a full-service company, whereby a doctor can come into our site and perform studies in our site, using our resources comparatively.” *Id.* at 381. Ms. Moore further explained that “[s]ome doctors like to keep their clinic practice and their clinical research practice separate,” and that “[e]ven when a doctor is doing clinical research in his office or his practice, what you would generally find is that the clinical research practice is a total [sic] separate entity” and that “[t]he staff is totally different.” *Id.* at 383. Ms. Moore also explained that while the doctors “do the medical things that patients need,” unless the “doctor is solely doing research . . . most of the recordkeeping is going to be done by the coordinator.” *Id.* at 384–85. Ms. Moore then asserted that “[u]ltimately the doctor is totally responsible for the clinical research study.” *Id.*

Ms. Moore also denied that she allowed anyone who was not licensed to dispense at Respondent, stating “[w]e don’t dispense. We do accountability. For instance, if a patient brings back the drug, then we are responsible to document return[ed] tablets and things like that.” *Id.* at 386.

Ms. Moore proceeded to market Respondent to contract research organizations (CROs), which are firms that drug manufacturers contract with to provide support services for clinical trials. *Id.* at 386, 389. In the meantime, Respondent entered into a contract with Dr. Brian Nichol, an interventional pain management specialist, to perform clinical research for it pursuant to contracts it might obtain from CROs. *Id.* at 387; GX 10.

At some point in late 2010 or early 2011, Respondent received information that Quintiles, a CRO, was managing clinical trials of the drug Naloxol 6a-methoxyhepta(ethylene glycol) ether (hereinafter, NKTR–118), for AstraZeneca, a large pharmaceutical manufacturer.⁴ Tr. 387–90; GX 9. NKTR–118 is, however, a schedule II controlled substance. Tr. 266; RX 9.

Respondent applied to Quintiles to participate in the study and was selected by the latter for a site visit which occurred on February 15, 2011. RX 3, at 1. During the visit, the Quintiles representative discussed with Dr. Nichol, Ms. Moore, and Kianna Marshall (Respondent’s research project

³ Ms. Moore testified that she was not fired directly by Dr. Lewis but by Dr. Lewis’ subordinates. Tr. 517–18. She further testified that she never learned the reason for her dismissal and the record contains no evidence on the issue. Tr. 518.

⁴ The name of the study was: “An Open-Label 52-week Study to Assess the Long-Term Safety of NKTR–118 in Opioid-Induced Constipation (OIC) in patients with Non-Cancer-Related Pain.” RX 14, at 1.

coordinator, *see* GX 9, at 1) “the protocol, . . . investigational product storage, [the] document storage areas, lab area, patient exams rooms, and monitoring areas.” RX 4, at 1. The Quintiles representative further advised Dr. Nichol and Ms. Moore of other requirements for participating in the study, including that “[t]he site must obtain a DEA license for research with a controlled substance” and provided “[i]nformation for obtaining this license” to Ms. Moore. *Id.* Moreover, Ms. Moore testified that during the meeting with the Quintiles representative,

we were told that the drug had been scheduled by the DEA as a controlled II substance, and we were also told that the pharma does not believe that their drug has the properties of a controlled II substance, but based on the scheduling, then the sites would need a DEA license.

Tr. 400.

On March 30, 2011, Respondent (who was designated as the “Institution”) and Dr. Nichol (who was designated as the “Investigator”) entered into a Clinical Trial Agreement (CTA) with Quintiles, to participate in the NKTR–118 long-term safety study, with Quintiles acknowledging its agreement on April 5. RX 14, at 1–2, 16. The CTA’s terms required, *inter alia*, that “Institution, Investigator and their personnel shall perform the Study at Institution’s facility according to the Protocol and this Agreement, and shall comply with all: (i) Applicable local, state and federal laws and regulations relating to the conduct of the Study.” *Id.* at 2 (emphasis added). In addition, Respondent and Dr. Nichol:

each represent[ed], warrant[ed] and promise[d] that . . . Institution and the Investigator have, at all times during the course of the Study, the appropriate licenses, approvals and certifications necessary to safely, adequately and lawfully perform the Study in accordance with good clinical practice, FDA requirements and all Applicable Laws and have no notice of any investigations that would jeopardize such licenses, approvals or certifications[.]

Id. at 2.⁵

As stated above, on March 14, 2011, Ms. Moore applied on Respondent’s behalf for a DEA researcher’s registration. GX 1. On March 31, 2011, a DEA Diversion Investigator (DI) with the Little Rock District Office sent Ms. Moore a list of various items of information that she should have

available during the on-site inspection, RX 7, at 2; and on April 14, 2011, two DIs went to Respondent’s then-location to conduct a pre-registration investigation. Tr. 31. The DIs determined that Respondent’s facility was located on the ground floor of an office building, and that while the entire building had an alarm system, if another tenant turned off the alarm or left the building without turning the alarm on, the building would not be secure. Tr. 158–59. However, in response to the DIs’ concerns, Ms. Moore installed an alarm in her office. *Id.* at 159–60.

During the visit, the DIs interviewed Ms. Moore, who told them that the proposed research involved studying the safety of NKTR–118 for use on patients with opiate-induced constipation. Tr. 266. Ms. Moore told the DIs that the drug would be supplied by Fisher Clinical Services and stated that Respondent had a contract with Fisher to provide the drug; however, when asked to provide the contract, Ms. Moore could not do so. *Id.* at 267. Ms. Moore also told the DIs that Dr. Brian Nichol “would be the principal investigator.” *Id.* at 297. A DI who conducted the inspection testified that it was her understanding that Ms. Moore and Ms. Marshall “would dispense the drugs” and that Dr. Nichol “would come into the clinic approximately two to three times a week and basically review the charts and do the patient evaluations.” *Id.* at 298.

At the conclusion of the interview, the Senior DI provided Ms. Moore with a copy of the Code of Federal Regulations. *Id.* at 274. She also reviewed the recordkeeping requirements of Part 1304, as well as the requirements pertaining to the ordering of schedule II controlled substances under Part 1305. *Id.*

On April 21, 2011, Ms. Moore sent a letter by fax to the Senior DI, stating that Respondent had installed “an in suite alarm.” RX 12. On April 27 (following a phone conversation two days earlier), Ms. Moore sent an email to the DI explaining that Respondent had met all requirements; Ms. Moore also wrote that it was “not required to have any site license(s) to conduct human subject research.” RX 13, at 1. Ms. Moore further noted that the DI had told her that the DI’s “superior had a couple of questions regarding our application” and advised that “if there are more questions please email me.” *Id.* Following additional emails sent by Ms. Moore on April 29 and May 4, 2011 asking the DI if there were “[a]ny further requirements,” on May 6, the DI wrote Ms. Moore that she “need[ed] a copy of your signed contract with Fisher for

further review of your application.” RX 13, at 1–2. Ms. Moore then emailed the Quintiles representative who had performed the February on-site visit, asking if she had a copy of the Fisher contract; the Quintiles Representative agreed to “get right on this.” RX 13, at 3.

Less than a week later, Ms. Moore emailed the DI regarding the issue and discussed a phone conversation the DI had with another representative of Quintiles, who explained that Respondent did not have a contract with Fisher but rather with Quintiles. RX 15, at 1. Ms. Moore then stated that the Quintiles representative had advised her to send a copy of Respondent’s contract with Quintiles, as well as a letter from the FDA’s Controlled Substance Staff to Astra Zeneca. *Id.* Ms. Moore testified that she sent these documents as an attachment to the email. Tr. 450. Ms. Moore further wrote that “[i]f I have not proceeded properly, or additional information is needed please let me know as soon as possible, as time is of the essence.” RX 15, at 1. *Id.* In response, the DI asked Ms. Moore to come to the DEA office “to discuss further details regarding [the] application.” *Id.* at 2.

On May 16, Ms. Moore went to the DEA Office and met with the two DIs who had made the onsite inspection and the Diversion Group Supervisor (GS). Tr. 32–33. According to the GS, she was concerned as to whether Ms. Moore was qualified to be a researcher “because she did not have MD, DO or Ph.D. behind her name” and “didn’t know what kind of qualifications, training, or experience she had.” *Id.* at 34. The GS testified that she checked the registration database to see “if DEA had granted any other registrations to persons who were not licensed in that fashion,” *id.* at 34–35, “printed out all of Fisher’s customers,” *id.* at 39, and determined that they were generally medical doctors, doctors of osteopathy, or Ph.D.s “affiliated with a hospital or a university.” *Id.* at 42.

During the interview, Ms. Moore was asked about her experience in handling controlled substances. *Id.* at 49. According to the GS, Ms. Moore “at first . . . said she had quite a bit of experience, but upon further questioning, it turned out [that] controlled substances were in the facility, but she did not actually handle the drugs herself.” *Id.* Ms. Moore further stated that she did have research experience, which primarily involved “handling the paperwork.” *Id.* at 50.

During the interview, Ms. Moore stated that Dr. Nichol would be responsible for ordering and receiving the controlled substances at

⁵ The CTA also provided “that if [the] Site has not enrolled at least one (1) subject by the Key Enrollment Date,” RX 14, at 3, which was “100 Calendar Days after [the] Site Initiation Visit,” *id.* at 1, then Quintiles could terminate the agreement. *Id.* at 3.

Respondent, as well as keeping the controlled substance records for it. *Id.* at 50–51. Ms. Moore also stated that Dr. Nichol “would be present at [Respondent] three to four days a week.” *Id.* Dr. Nichol was registered at 5106 McClanahan Drive, Suite B, North Little Rock, Arkansas. Tr. 487 (testimony of Ms. Moore); RX 22.

According to Ms. Moore, during the meeting, the DIs told her that her application was being denied because she did not meet the “criteria” found in the U.S. Code. *Id.* at 457, 460. Ms. Moore testified that when she asked what criteria she did not meet, a DI said that Fisher (the drug supplier) “only contracted with doctors.” *Id.* at 458. Ms. Moore testified that she had previously sent a copy of the contract she had with Quintiles⁶ to the DI and clarified that “I did not have a contract with Fisher.” *Id.* Upon reviewing the provisions of the U.S. Code, the GS told Respondent that she did not have a state license and lacked experience in dispensing controlled substances. *Id.* at 462. The DIs eventually asked Ms. Moore to withdraw her application; when Ms. Moore declined to do so, the DIs told her that they would file an order to show cause. *Id.* at 464.

In a subsequent phone conversation, Dr. Nichol confirmed to a DI that he would be ordering the drugs and acting as Respondent’s medical director. *Id.* at 56. Dr. Nichol also stated that “[a]fter the initial work-up of a new patient coming to the clinic for the trial . . . he would be at the clinic once a month for about 30 minutes or so to dispense the medications.” *Id.* at 56–57. However, according to the GS, Dr. Nichol also stated that he was not “going to do research at his own facility, because he didn’t have the staff.” *Id.* at 57.

On some date which is not clear on the record, Ms. Moore started recruiting patients by advertising the study on television. *Id.* at 473–74. Following screening, which included a physical exam by Dr. Nichol, various patients who met the criteria for participation were placed in the study.⁷ *Id.* at 475–77. In total, eleven patients were selected for the studies, with five being placed in the Kodiak 8 study (two of whom dropped out) and six being placed in the Kodiak 5 study. *Id.* at 477, 481.

Ms. Moore testified that she was aware that Dr. Nichol had a DEA registration and it was her

understanding that he could “participate in our study” and “dispense” the drugs. *Id.* at 484–85. Ms. Moore testified, however, that Dr. Nichol was registered at 5106 McClanahan, Tr. 487, and not at Respondent’s office. Ms. Moore further maintained that the drugs were to go to Dr. Nichol’s site and that “he would be required to dispense the drug to the patients” and the drugs were not to be stored at Respondent. *Id.* at 485. Ms. Moore denied that she dispensed any of the drugs. *Id.* at 486. However, when asked where Dr. Nichol dispensed the drugs, Ms. Moore testified that he “dispensed the drug in his site or MCT.” *Id.*⁸ Ms. Moore admitted that she never asked the DEA Investigators whether Dr. Nichol could lawfully transport the controlled substances to Respondent and dispense them there. *Id.* at 538.

Ms. Moore testified that in “early 2012⁹,” she learned that Dr. Nichol’s relationship with DEA had changed and he “was no longer allowed to dispense from” Respondent. *Id.* at 497–98. Ms. Moore subsequently explained that this occurred around the time that Nichol entered into a Memorandum of Agreement (MOA) with DEA. *Id.* at 615–16. Ms. Moore maintained that following this, “[a]ll the patients were . . . dispensed from Dr. Nichol’s office.” *Id.* at 498. However, patients would still come to Respondent for lab draws and EKGs, as there were “different procedures that would need to be done where the equipment was.” *Id.* at 499.

In November or December 2011, one or more of the DIs “saw a television commercial” which sought patients to participate in the NKTR–118 study. *Id.* at 58. In either February or March 2012, a DI contacted the Arkansas Department of Health and asked an official if Respondent had received a state license. *Id.* The official stated that “Dr. Nichol had given them a letter, and . . . stated that he would be transporting this NKTR drug to [Respondent] for the research project.” *Id.* at 58–59.

Months later, in July 2012, the GS contacted John Wegner, a Quintiles official and asked if Quintiles had approved Respondent for participation

⁸ When asked why, at the beginning of the study, Dr. Nichol would dispense at his office rather than at Respondent’s location, Ms. Moore offered the incoherent response that: “He’s a busy doctor, and where it was an inconvenience to the patients to go there, we would send the patients there, because he may not be able to . . . meet them, so we would send them there, and he would dispense there.” Tr. 488.

⁹ Subsequently, Ms. Moore testified that she learned about the MOA in “[m]id-2012. I say in the middle range of the year.” Tr. 631.

in the NKTR–118 study. *Id.* at 61. The GS testified that the reason why she had contacted Mr. Wegner was “because we saw the commercials on TV that [Respondent] was doing research.” *Id.* It is unclear, however, whether the impetus for this contact were the commercials that the DIs had seen in late 2011 or more recent ones.

In any event, Mr. Wegner told the GS that Dr. Nichol was ordering the controlled substances, which were being shipped to Nichol’s registered location, and that Dr. Nichol was transporting them to Respondent, where they were being dispensed. *Id.* at 61–62; *see also* GX 16, at 2. The GS told Mr. Wegner that this “was illegal because [Respondent] was not a DEA-registered location.” Tr. 62. The DI then contacted Mr. Jim Phillips, Dr. Nichol’s attorney, and asked him if Nichol was involved in the research study and transporting controlled substances to Respondent. *Id.* at 63. Mr. Phillips acknowledged that Nichol was involved in the study and that he was transporting the controlled substances to Respondent and dispensing them. *Id.* Moreover, Mr. Phillips stated that this had been ongoing “[a]t least since April of 2012.” *Id.* at 64. However, Mr. Phillips did not know if Dr. Nichol had been doing this even earlier. *Id.*

The DI also requested of Mr. Phillips that Dr. Nichol provide his records, including the dispensing records and the schedule II order forms (DEA Form 222). *Id.* Two weeks later, Mr. Phillips contacted the DI and explained that because the NKTR–118 study was double blinded, neither the patient nor Dr. Nichol knew which patient received the schedule II drug or the placebo. *See* GX 16, at 1–2. In the letter, Mr. Phillips further wrote that “Dr. Nichol will administer the drugs only at his DEA approved address” and that “[w]e will notify the DEA in advance of any upcoming trials involving controlled substances.” *Id.* at 2. Mr. Phillips then acknowledged that “[a]ll of this has been previously agreed upon and is clearly stated in the” MOA.¹⁰ *Id.*

¹⁰ The MOA between DEA and Dr. Nichol was submitted into evidence by Respondent. *See* RX 22. The Agreement recounts that “[o]n September 27, 2011, DEA issued an Order to Show Cause” to Dr. Nichol, which proposed the revocation of his registration based on three allegations. *Id.* at 1. First, that the Arkansas State Medical Board had found that Dr. Nichol “pre-signed controlled substance prescriptions, which were then issued to patients by [his] staff” when he was “not present and [was] not consulted by [his] staff when [the] prescriptions were issued.” *Id.* Second, that in May 2008, he was convicted of health care fraud, in violation of 18 U.S.C. 1347, and was subsequently excluded from participating in Medicare and Medicaid by the Department of Health and Human Services pursuant to 42 U.S.C. 1320a–7(a). *Id.*

⁶ As found above, Ms. Moore had previously sent a copy of her contract to the DI. RX 15.

⁷ The criteria included that the patients could not be using any prohibited medications, must be taking a specified amount of opiates (which were prescribed by their regular doctor), and could not “have any GI conditions.” Tr. 476–77.

In late July 2012, the GS was notified that Respondent was moving its office. Tr. 69. On August 24, 2012, the GS and another DI went to Respondent's new office to conduct an inspection, and met with Ms. Moore and her attorney, Ashley Hudson. *Id.* at 70–71. According to the GS, Ms. Moore “explained her recordkeeping system to us, how she got the drugs, how she made the records. She showed us how they logged dispensations to the patients. She also had copies of the DEA 222 order form in her notebook.” *Id.* at 71–72. Ms. Moore explained, however, that the records onsite were copies and that “all the originals were kept at Dr. Nichol’s registered location.” *Id.* at 72–73.

The GS testified that upon seeing the records, she asked Ms. Moore where the NKTR–118 was being dispensed, and that Ms. Moore stated that “the drugs were dispensed at Moore Clinical Trials.” *Id.* at 72; *see also id.* at 711 (testimony of second DI that during August 24 inspection, Ms. Moore “stated that NKTR was dispensed from the new location . . . in Sherwood, Arkansas,” and that Ms. Moore never stated that Nichol had dispensed the NKTR at his office). The GS further testified that Ms. Moore also “stated that Dr. Nichol had transported [the] drugs to that location [Respondent’s previous office] as well.” *Id.* at 72.

After Ms. Moore told the GS that Nichol had been transporting the drugs to Respondent and dispensing them, the GS told Ms. Moore that this was illegal because Respondent’s location was not registered. *Id.* at 74. According to the DI, Respondent “made no comment” in response. *Id.* Nor, according to the GS, did Ms. Moore ever assert that any of the dispensings had occurred at Dr. Nichol’s office.¹¹ *Id.*

Third, that he “contracted with a researcher to administer a controlled substance [NKTR–118] to research subjects,” but that “[t]he owner/operator of this research clinic has no experience handling controlled substances, and that [he] and the owner/operator gave conflicting information about the operation of this research clinic.” *Id.* at 1–2.

Notwithstanding these allegations, the Agency allowed Dr. Nichol to retain his registration subject to various terms and conditions. Of relevance here, Dr. Nichol agreed that he “will not administer or dispense . . . controlled substances except in the course of his own medical practice as an individual practitioner and will administer or dispense . . . controlled substances only from his DEA registered location. As the physician who is contracted to administer the FDA approved study drug NKTR–118, Dr. Nichol will administer that drug at either his DEA registered location or at an approved site for the current drug study.” *Id.* at 3. The Special Agent in Charge approved the MOA on April 17, 2012, and Dr. Nichol signed the agreement on April 20, 2012. *Id.* at 4.

¹¹ At the hearing, Ms. Moore denied that it was her understanding that Respondent could not dispense controlled substance until it got its DEA registration; she also testified that she did not think

On cross-examination, the Government asked Ms. Moore if she had informed the DIs that she understood “that Dr. Nichol was no longer allowed to dispense NKTR from MCT.” Tr. 534. Respondent answered:

I didn’t understand that the investigators were coming to my site to talk about Dr. Nichol. I thought they were coming to my site to look at my site to get further information about my 225 application. I didn’t inform them anything about Dr. Nichol until the very end, when I was asked that very question.

Id. at 534–35.

The Government then asked Ms. Moore: “[s]o you’re asked, where is Dr. Nichol dispensing the NKTR, and your answer to them was at MCT. Is that correct?” *Id.* at 535. Ms. Moore replied:

That is not correct. I was not asked that. Actually, there was a statement made to me by [the] GS . . . that said, you know Dr. Nichol is not supposed to dispense from MCT. And I said, Uh-huh-yes.

Id. However, Ms. Moore did admit that “for part of the time,” Respondent’s arrangement was that Dr. Nichol “was to receive the controlled substances in his office” and subsequently take them to Respondent to dispense the drug to the research subjects. *Id.* at 538.

The GS also testified that the records did not indicate the name or initials of the person who had dispensed the drugs. *Id.* at 73. The GS then asked Ms. Moore who had dispensed the drugs; Ms. Moore said that Dr. Nichol had. *Id.* at 73–74. Moreover, the GS testified that upon reviewing the DEA Form 222s, the forms did not indicate the date the drugs were received and the quantity received. *Id.* at 78.

On September 4, 2012, the GS received the dispensing records she had previously requested from Mr. Phillips, Dr. Nichol’s attorney. *Id.* at 75–76; *see also* GX 14. While the GS testified that the records show that the controlled substances were dispensed at Dr. Nichol’s registered address, *id.* at 76, only the first page of the forms, which is not a dispensing record at all but rather a list of persons designated by Dr. Nichol “to access controlled substances at the above location address,” listed Dr. Nichol’s address. *See* GX 14, at 1. With the exception of a single shipping document entitled “Blinded Shipment Request,” which appears to have been created by Astra Zeneca, *see* GX 14, at

that it was illegal for Dr. Nichol to bring the controlled substances to Respondent and dispense them there. Tr. 537–39. Still later, Ms. Moore testified that she “didn’t understand that [Respondent] was dispensing or ordering” and asserted that “[w]e weren’t dispensing or ordering any controlled substances.” *Id.* at 597.

13, all of the forms are designated as an “MCTLLC Form” with a number,¹² and stated that they were “[c]reated by: Moore Clinical Trials LLC” on August 27, 2012. *See generally* GX 14.

As for the shipping document, while it lists eighteen kits of “[r]andomised (blinded) drug” and Dr. Nichol’s registered location as the Shipping Address, it also listed Respondent’s phone number as the “shipping phone.” *Id.* at 13; Tr. 84–85. The GS testified that Ms. Moore had signed for the drugs. Tr. 85.

Regarding the records created by Respondent, the GS further testified that they did not differentiate between the two strengths of the drug. Tr. 88. And regarding Respondent’s Form 1, an inventory record for the Kodiak 5 arm, *see* GX 14, at 22; the GS testified that the figure for the quantity on hand in the final entry of August 28, 2012 was erroneous. *Id.* at 90. The GS testified that the correct figure should have been 3500 dosage units and not either the number 1120, which was lined out, or the number 1373. *Id.* According to the GS, when the numbers were added up—more specifically the 32 bottles (each containing 35 dosage units) that were listed on the form as “number of kits/bottles received”) to the previous quantity on hand figure of 2380—the total was 3500. *Id.*; *see also* Tr. 134.

On cross-examination, the GS was asked to explain how she came up with this figure. The GS maintained that she did so by “following the methodology that Ms. Moore used, that 32 bottles at 35 tablets apiece is 1,120 tablets,” and that she added these tablets to the previous quantity on hand “[b]ecause all the other entries were added in.” *Id.* at 131–32. When then asked what was listed in the August 28, 2012 entry for the Shipment ID Number, the GS acknowledged that the entry stated: “Kits Remaining Unused” and that no shipment was listed. *Id.* at 132. When

¹² More specifically, MCTLLC Form 5 lists the persons who Dr. Nichol authorized to access the controlled substances, *see* GX 14, at 1; MCTLLC Form 4 lists the DEA Order Forms (222s) which were submitted to Fisher Clinical Services, along with the amounts ordered and received, as well as the dates of the orders and receipts, *see id.* at 2; MCTLLC Form 2 lists the drug, the quantity, the date received, the distributor, and the invoice number, *id.* at 4; MCTLLC Form 3 is a perpetual inventory which lists quantities on hand, the amounts received in incoming shipments, the amounts dispensed along with the study subjects’ initials and subject number, and the amounts returned by them, *id.* at 5; and MCTLLC Form 1 lists the inventory, including incoming shipments but not the drugs dispensed. *Id.* at 8. The latter also includes a final entry, dated August 27, 2012, the same date the document was created, that lists the number of bottles unused and the number of tablets that were returned by the study subjects. *See id.* at 9.

asked if she counted the 32 bottles as a new shipment, the GS testified that: “I counted it because it was the same methodology. Now, if it had been just the number of tablets remaining, it would have been the 1,120, which is crossed out.” *Id.* at 133. The GS then denied that the math would have worked out if she had just calculated the 32 bottles as “kits remaining unused” and asserted that “[t]he math works with the 1,373 number.” *Id.*

Throughout her testimony, the GS insisted that in coming up with the 3500 figure, she was following Ms. Moore’s methodology.¹³ *See id.* at 134–35. However, the GS acknowledged that she did not contact either Ms. Moore or Dr. Nichol and ask them what “kits remaining unused meant.” *Id.* Ms. Moore later explained that this term meant “kits that were never dispensed” and that this entry did not reflect a new shipment. *Id.* at 622.

The GS testified that using the records provided by Dr. Nichol’s attorney, she created a computation chart in which she added the quantities of drugs received in each arm of the study to the initial inventory (which was zero), to determine the total amount that Dr. Nichol was accountable for; she then took what she called the closing inventory and added to it the quantities which were distributed to calculate the total amount Nichol could account for, and compared the two. Tr. 95–100; GX 15. However, the closing inventory was not based on an actual physical count performed by the DIs but on the records provided by Dr. Nichol. Tr. 99, 623.

The GS further testified that she made two sets of calculations, one based on the closing inventory figures Ms. Moore listed on the documents, and the other based on what the GS called “the correct math.” *Id.* at 105. Subsequently, the GS testified that this was not “a normal DEA audit” and that these “are Dr. Nichol’s records” and “not Ms. Moore’s records.” *Id.* at 142. Moreover, the GS testified that she did not contact Dr. Nichol about the records. *Id.* at 143.

¹³ Likewise, in determining the closing inventory for the drugs that were received and dispensed in the Kodiak 8 study, the GS determined that “the correct math” was 822 dosage units and not 192 dosage units as recorded on the form. *See* GX 14, at 9; Tr. 105–07. However, the form was not a perpetual inventory, but rather, a record of inventories taken periodically as well as when shipments were received. *See* GX 14, at 8–9. Here again, the last entry (which is dated August 27, 2012) does not list a “Shipment ID Number.” *Id.* at 9. Rather, it states “unused/returned” in this column and indicates that 105 (3 kits) were unused and 87 tablets were returned, for a total quantity on hand of 192. *See id.* The GS, however, simply added up the figures for each shipment, as well as the figures that were listed for August 27, and concluded that Dr. Nichol should have had on hand 822 dosage units. *See id.*; GX 15; Tr. 106–07.

Regarding the records which were provided by Dr. Nichol’s counsel, Ms. Moore acknowledged that she had created them, and that they had been created between August 24 and 27, 2012. Tr. 544–45. The Government also asked about a computation chart (GX 18), which Ms. Moore had created, with Ms. Moore testifying that the chart was based on Dr. Nichol’s records for the Kodiak 5 and 8 studies. *Id.* at 546–48. Ms. Moore denied, however, that the chart should differentiate between the 12.5mg and 25mg strength dosage units, contending that because the studies were blinded, she would not know which kits contained what strength tablet; she also testified that the information could not be discerned from the sponsor’s records. *Id.* at 549.

Ms. Moore then testified:

I’m sorry . . . but I don’t know anything about the true nature of creating these records. My intent in creating these records was simply to have [the GS] affirm to me that I was on the right track, so this record is not a response to any of these other beings. I’m simply trying to create records, because my understanding after the visit with [the GS] was the DEA’s main concern is compliance.

So my main concern after what I thought was my . . . on-site visit at the second point was to attempt to be compliant with the DEA, so I’m simply creating forms, not for the DEA. I didn’t realize that the DEA was going to get these forms. The reason that the forms are not correct is because it was eleven o’clock at night when I did the forms. My intention was to have an opportunity to think on, [w]hy are my forms not balancing. But before I could do that, which would have been the next day, when I went to Dr. Nichol’s office, the forms had been submitted to the DEA.

Id. at 550–51; *see also id.* at 563 (further testimony from Ms. Moore to same effect).¹⁴ And on further questioning, Ms. Moore again re-iterated that the bottles did not indicate whether they were 12.5 or 25 mg tablets. *Id.* at 553.

Regarding the computation chart Ms. Moore created (GX 18), the Government attempted to show that the “total accountable for” figures did not add up to the “total accounted for.” More specifically, the Government noted that on the “total accounted for” side of the chart, Ms. Moore had four columns: (1) the closing inventory, which included

¹⁴ *See also* Tr. 564 (“So these records are simply trying to be compliant with what I was told in my on-site visit, that we needed to create records for being compliant. I used these numbers, because this was what I had at hand, but I didn’t use these for the DEA. I used these to say, [i]f I were a DEA registrant and I was going to do forms, then I have information I’m trying to put in here to show, hey, I know how to do it; I’m trying to do it right. But it may or may not balance, because it can be used like that. I’m trying to figure out how to do the forms.”).

the sum of the drugs returned and not dispensed (192); (2) the number distributed/transferred (438); (3) the number of tablets returned unused (87); and (4) the number of tablets not dispensed (105). Tr. 557; GX 18. According to Ms. Moore’s chart, for the Kodiak 8 study, Dr. Nichol was “accountable for” 630 tablets and “accounted for” 630 tablets. GX 18.

The Government then asked Ms. Moore how she arrived at the 630 figure, given the figures in the four columns totaled 822 and not 630. Tr. 557–60. Ms. Moore testified that “what I attempted to do was to show the number of tablets that were received per these shipping documents. That’s 630, the number of tablets that were dispensed, the number of tablets that were returned, the number of tablets that never left the site, and the closing inventory.” *Id.* at 560. Ms. Moore then explained that “[w]here the DEA’s example of this sheet may balance the way you’re saying, that’s not the balance, because the balance can only be the number of tablets that were actually received per the shipping documents.” *Id.*

When the Government then asked if the “total accountable for” and the “total accounted for” should be the same, Ms. Moore replied:

If I’m looking at this record, if I add 438, 87—perhaps I should have done some lines more similar to this form, where you could see double lines, but because I really didn’t have any real direction on how to do it, I’m simply making an example. This is not for the DEA. This was simply just to try to be compliant, which is what I was told.

Id. at 560–61; *see also id.* at 570 (“This is not a record for the DEA. This is simply just to try to be compliant, to try to do what [the GS] told me in my meeting that I did not realize was an audit.”). Ms. Moore added that she was “simply learning how to do the form, trying to do the form properly, but you can’t use this form as a proper documentation of anything. This form balances to my sponsor form, which is what is important to me, that my sponsor’s count is correct.” *Id.* at 561.¹⁵ However, on redirect, Ms. Moore clarified that “the number of tablets returned unused, plus the number of tablets not dispensed” equals the closing inventory. *Id.* at 625. She also testified that the “number of tablets returned unused” was documented “[i]n

¹⁵ Ms. Moore further testified that the GS had told her she “could email a form that I put together, and she would give me a response on whether it was the information that was needed for the DEA.” Tr. 620. Ms. Moore asserted that she did send the GS a form to review but received no response. *Id.* at 621; *see also* RX 25.

our sponsor's records¹⁶," and that "every time the patient would return drug, you're required to do accountability, because in the study, there's a certain accountability that the patient has to maintain to stay in the study." *Id.* at 636–37. Finally, Ms. Moore testified that the numbers on the forms she created "match my sponsor's records" and that "[t]he sponsor has signed off on the records." *Id.* at 638.

Regarding the forms she created (GX 14), Ms. Moore testified that she used the sponsor's records to create them. *Id.* at 562. Ms. Moore further explained that:

[t]hose are the records that are important to the sponsor and important to the study. Nowhere in keeping records was there ever any indication, until [the GS] came to my site, that we were to keep two sets of books. I never heard that, but I'm not a registrant, so maybe if I were, I would have heard it and known that. But this was simply in response to the on-site visit in my office on 24th of August 2012.

Id. at 564–65. Still later, Ms. Moore reiterated that she was not aware that Dr. Nichol was required to keep controlled substance records for the NKTR studies (for DEA) until the August 24, 2012 visit. Tr. 822–23.

Addressing the GS's computation chart (GX 15), Ms. Moore maintained that the Kodiak 8 study had received only 630 dosage units and not 717 as asserted by the GS. Tr. 574. She also disputed the GS's conclusion that using the "correct math" for the Kodiak 8 study resulted in an average of 630 dosage units. *Id.* at 575. And when asked about the closing inventory figure for the Kodiak 5 study (GX 14, at 22), Ms. Moore maintained that neither the GS's 3500 figure, nor the 1120 figure (which was crossed out), were correct. Tr. 576. Instead, she explained that 1373 (as is written on the form) was correct, because it included both the bottles that were not dispensed (32, each with 35 tablets) and the tablets that the patients returned.¹⁷ *Id.*

¹⁶ On rebuttal, Respondent also introduced copies of a Sponsor Record entitled: "NKTR-118 Accountability Form." RX 23. This form includes a column for the date drugs were either received or dispensed, a column for a shipment ID number, a column for a Subject Number, Kit Number, number of tablets dispensed or returned, the recorder's initials, the balance, and comments (the latter indicating whether drugs were dispensed or returned, or a new shipment was received). See RXs 23 & 24. While these records were introduced into the record to refute the testimony of the DIs that Dr. Nichol had continued to dispense controlled substances from Respondent's new office, the documents show that a dispensing occurred on August 3, 2012, two days after Ms. Moore said the new office had opened. See RX 23, at 12; RX 26, at 2.

¹⁷ Having reviewed Respondent's Form 3 for the Kodiak 5 study, see GX 14, at 14–20; I find that 253

The Government also asked Ms. Moore if she knew "that it is a required dispensing record to put down the location where the controlled substances were dispensed from?" Tr. 583. Ms. Moore testified that she does not

know what is required, but as a compliant person, I'm more than happy to learn what is required as a DEA registrant, because I am prepared to do whatever needs to be done, as I do my clinical research, because there are requirements that are required there as well. So after I learn what is required . . . I'm fully prepared to be compliant.

Id. at 584. Ms. Moore also testified that in her discussion with the GS regarding the records, the GS "did not" tell her that she needed to have a column to indicate where the drugs were dispensed.¹⁸ *Id.* at 620.

tablets were returned by the study subjects. When added to the number of dosage units that were not dispensed (1120), the total is 1373.

¹⁸ Respondent also called as a witness a former DEA Diversion Investigator from the Little Rock office, who asserted that Ms. Moore's application was not handled in the same manner as other researchers' applications, which apparently he routinely approved in a perfunctory fashion such as by not even writing the required reports. Tr. 657–58, 716. In addition to expressing his typically erroneous views on various issues (such as whether NKTR-118 was subject to being removed from the schedule of controlled substances or moved to a less-restrictive schedule, see *id.* at 685–86, 714), the former DI also alleged that one of the subordinate DIs involved in the investigation of Respondent had been the subject of an investigation by the Office of Professional Responsibility into her use of racial slurs made to a roommate at the DEA Academy, and that someone intervened to prevent her termination. Tr. 665. The former DI also provided an affidavit, in which he stated: "I speculate that when the Investigators learned of Ms. Moore's race, that this may have contributed to an Investigator requesting Ms. Moore's application be denied. The Investigator has a history of racial problems." RX 21, at 2. However, when asked what information he had that there was a specific complaint that the DI had engaged in racist conduct, the former DI replied: "What information do I have? You want details on the allegation?" Tr. 695. The former DI then further acknowledged that he did not have the names of those involved in the purported incident. *Id.*

The former DI did not identify any incidents on the part of the Investigator beyond the purported incident described above, and on rebuttal, the GS testified that she had checked with the Agency's Office of Professional Responsibility and determined that no complaint had ever been filed against the DI. Tr. 715.

Moreover, the former DI admitted that he had been denied a permanent promotion to Group Supervisor and had resigned after the Agency proposed his removal for failing to meet medical standards. *Id.* at 697, 700. Thereafter, the former DI filed an EEO complaint, a petition before the Merit Systems Protection Board, and two lawsuits against the Agency challenging his removal on various grounds. *Id.* at 696–701. However, the former DI lost every challenge. See *id.* Of further note, the DI, who he had accused of racism, had testified against him in a federal court proceeding in which he unsuccessfully sought to enjoin his removal. *Id.* at 697–98.

As did the ALJ, I reject the former's DI contention that Ms. Moore was treated differently on account

On cross-examination, the Government also asked Ms. Moore whether, prior to entering into the contract with Dr. Nichol in 2010, she was aware of his history with the Arkansas Medical Board, which had suspended him for pre-signing controlled substances prescriptions. *Id.* at 590. Ms. Moore answered that she was not aware of his history, but was aware that he had a current medical license. *Id.* Ms. Moore then added that she found out "some things" later, but could not say when she did. *Id.*

The Government then asked Ms. Moore whether, prior to entering into the contract with Dr. Nichol in 2010, she was aware that he had been convicted of felony health care fraud in federal district court. *Id.* Apparently referring to an un-admitted exhibit, Ms. Moore testified that she had "never seen this before" but that she "would like to have . . . documentation to just confirm . . . what you're saying is true." *Id.* at 590–91. Ms. Moore then testified that she did not know this information, and that she "can't just confirm it, based on what you're showing me here." *Id.* at 591. When the Government followed-up by asking whether, regardless of the documentation (that was not admitted), she knew, prior to entering into the contract, that Dr. Nichol had been suspended by the state board and been convicted of health care fraud, Ms. Moore testified that she did not "know the answer to that" but did "know that in our relationship, I knew it." *Id.* at 592. Ms. Moore then explained that when she "met Dr. Nichol, he had a valid license, and he was not under any restrictions on the license that I obtained, and so in my estimation of our business relationship, he was okay to do research." *Id.*

Discussion

Section 303(f) of the Controlled Substances Act (CSA) provides that "[t]he Attorney General shall register practitioners . . . to dispense, or conduct research with, controlled substances in schedules II, III, IV, or V . . . if the applicant is authorized to dispense, or conduct research with respect to, controlled substances under

of her race. See R.D. at 8 n.3. While there is evidence that other researchers' application were approved during the former DI's time in Little Rock without an on-site inspection, as the GS testified, Ms. Moore was neither a medical doctor nor a Ph.D., as is typically the case with researcher applicants, and she also had no experience in conducting research with respect to controlled substances. Beyond the fact that Agency personnel have discretion to conduct an on-site inspection whenever they deem it necessary, the unique circumstances posed by this applicant clearly warranted an on-site inspection.

the laws of the State in which [s]he practices.” 21 U.S.C. 823(f). However, “[t]he Attorney General may deny an application for such registration . . . if the Attorney General determines that the issuance of such registration . . . would be inconsistent with the public interest.” *Id.* In making the public interest determination, the CSA directs that the following factors be considered:

(1) The recommendation of the appropriate State licensing board or professional disciplinary authority.

(2) The applicant’s experience in dispensing or conducting research with respect to controlled substances.

(3) The applicant’s conviction record under Federal or State laws relating to the manufacture, distribution, or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health and safety.

Id.

“[T]hese factors are . . . considered in the disjunctive.” *Robert A. Leslie, M.D.*, 68 FR 15227, 15230 (2003). It is well settled that I “may rely on any one or a combination of factors, and may give each factor the weight [I] deem[] appropriate in determining whether” an application for registration should be denied. *Id.*; see also *MacKay v. DEA*, 664 F.3d 808, 816 (10th Cir. 2011); *Volkman v. DEA*, 567 F.3d 215, 222 (6th Cir. 2009); *Hoxie v. DEA*, 419 F.3d 477, 482 (6th Cir. 2005). Moreover, while I am required to consider each of the factors, I “need not make explicit findings as to each one.” *MacKay*, 664 F.3d at 816 (quoting *Volkman*, 567 F.3d at 222); see also *Hoxie*, 419 F.3d at 482.¹⁹

The Government has “the burden of proving that the requirements for . . . registration . . . are not satisfied.” 21 CFR 1301.44(d). However, where the Government has met its *prima facie* burden of showing that issuing a new registration to the applicant would be inconsistent with the public interest, an applicant must then “present sufficient mitigating evidence” to show why she can be entrusted with a new registration. *Medicine Shoppe-Jonesborough*, 73 FR 364, 387 (2008)

¹⁹ In short, this is not a contest in which score is kept; the Agency is not required to mechanically count up the factors and determine how many favor the Government and how many favor the registrant. Rather, it is an inquiry which focuses on protecting the public interest; what matters is the seriousness of the registrant’s or applicant’s misconduct. *Jayam Krishna-Iyer*, 74 FR 459, 462 (2009). Accordingly, as the Tenth Circuit has recognized, findings under a single factor can support the revocation of a registration. *MacKay*, 664 F.3d at 821. Likewise, findings under a single factor can support the denial of an application.

(quoting *Samuel S. Jackson*, 72 FR 23848, 23853 (2007) (quoting *Leo R. Miller*, 53 FR 21931, 21932 (1988))).

In this matter, I have considered all of the factors. I agree with the ALJ’s finding that Ms. Moore violated federal law when she signed for and took possession of a shipment of controlled substances and Respondent was not registered. Moreover, I further agree with the ALJ’s finding that Dr. Nichol violated federal law when he dispensed controlled substances at Respondent’s office without being registered at that location.

However, for reasons explained below, I reject the ALJ’s conclusion that Dr. Nichol’s misconduct cannot be imputed to Respondent because the Government has not proved that he acted as Respondent’s agent. Contrary to the ALJ’s understanding, the Government was not required to prove an agency relationship existed in order to impute Dr. Nichol’s violations to Respondent and Ms. Moore. Rather, Dr. Nichol’s violations can be imputed to Ms. Moore and Respondent because at a minimum, the evidence shows that they aided and abetted his violations of federal law in dispensing controlled substances at Respondent, which was not registered. Moreover, I find that Ms. Moore and Respondent failed to maintain complete and accurate records as required by the CSA. Because Ms. Moore has failed to accept responsibility for both the dispensing and recordkeeping violations, and, as found by the ALJ, lacked candor in her testimony regarding the dispensing violations, I conclude that she has not rebutted the Government’s *prima facie* case.

Factor One—The Recommendation of the State Licensing Authority

Pursuant to 21 U.S.C. 823(f), “[t]he Attorney General shall register practitioners . . . to dispense, or conduct research with, controlled substances in schedule II, III, IV, or V . . . if the applicant is authorized to dispense, or conduct research with respect to, controlled substances under the laws of the State in which he practices.” See also 21 U.S.C. 802(21) (“The term ‘practitioner’ means a physician, dentist, veterinarian, scientific investigator . . . or other person licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices or does research, to distribute, dispense, conduct research with respect to, administer, or use in teaching or chemical analysis, a controlled substance in the course of professional practice or research.”); *id.* § 824(a)(3)

(authorizing the suspension or revocation of a registration “upon a finding that the registrant . . . has had his State license or registration suspended, revoked, or denied by competent State authority and is no longer authorized by State law to engage in the manufacturing, distribution, or dispensing of controlled substances”).

As explained above, the Government initially sought to deny Respondent’s application on the ground that it did not hold authority under state law to engage in research with respect to controlled substances. However, on March 12, 2012, Respondent obtained a temporary Arkansas Controlled Substance Registration, which was due to expire on September 12, 2012. RX 19. Moreover, Respondent’s state registration has since been extended until December 31, 2013.

However, while the possession of state authority is an essential condition for obtaining a practitioner’s (and researcher’s) registration, it “is not dispositive of the public interest inquiry.” *George Mathew, M.D.*, 75 FR 66138, 66145 (2010), *pet. for rev. denied*, *Mathew v. DEA*, No. 10–73480, slip op. at 5 (9th Cir., Mar. 16, 2012); see also *Patrick W. Stodola*, 74 FR 20727, 20730 n.16 (2009). As the Agency has long held, “the Controlled Substances Act requires that the Administrator . . . make an independent determination [from that made by state officials] as to whether the granting of controlled substance privileges would be in the public interest.” *Mortimer Levin, D.O.*, 57 FR 8680, 8681 (1992). Ultimately, because I conclude that other grounds exist to deny Respondent’s application, I hold that this factor is not dispositive and give it nominal weight in the public interest analysis.²⁰

Factors Two and Four—The Applicant’s Experience in Dispensing, or Conducting Research with Respect to Controlled Substances and The Applicant’s Compliance with Applicable Laws Related to Controlled Substances

As found above, it is undisputed that Ms. Moore was previously employed as

²⁰ As for factor three, there is no evidence that Respondent has been convicted of an offense “relating to the manufacture, distribution or dispensing of controlled substances.” 21 U.S.C. 823(f)(3). However, there are a number of reasons why even a person who has engaged in misconduct may never have been convicted of an offense under this factor, let alone prosecuted for one. *Dewey C. MacKay*, 75 FR 49956, 49973 (2010), *pet. for rev. denied*, *MacKay v. DEA*, 664 F.3d 808 (10th Cir. 2011). The Agency has therefore held that “the absence of such a conviction is of considerably less consequence in the public interest inquiry” and is therefore not dispositive. *Id.*

a Respiratory Therapist and as a Clinical Research Coordinator. As the ALJ found with respect to Ms. Moore's employment as a Respiratory Therapist, Ms. Moore had limited experience handling controlled substances and no experience in keeping controlled substance records. R.D. at 6. As for her more recent employment as a Clinical Research Coordinator, while Ms. Moore was involved in managing a number of clinical trials, none of these involved controlled substances.²¹ *Id.* at 7.

Indeed, Ms. Moore's lack of experience in research with respect to controlled substances was manifested throughout her testimony. For example, Ms. Moore denied that she understood that Respondent could not dispense controlled substances until it obtained a DEA registration. Tr. 537–38, and—as if the law isn't clear enough—did so notwithstanding that the Quintiles representative had advised her in writing that her “site must obtain a DEA license for research with a controlled substance.” RX 4. Ms. Moore also testified that she did not think it was illegal for Dr. Nichol to bring the controlled substances to Respondent's office and dispense them there. Tr. 538–39. Subsequently, and notwithstanding that at the very first DEA visit, the DIs provided Ms. Moore with a copy of the Code of Federal Regulations and reviewed the recordkeeping requirements found in Part 1304, Ms. Moore testified that she was not aware that Dr. Nichol was required to keep controlled substance records until the August 24, 2012 visit.²² *Id.* at 822–23.

Later, when asked if the dispensing record was required to include the location of where the controlled substances were dispensed from, Ms. Moore testified that she does not “know what is required, but as a compliant person, I'm more than happy to learn what is required as a DEA registrant, because I am prepared to do whatever needs to be done. . . . So after I learn

what is required. . . . I'm fully prepared to be compliant.” *Id.* at 584. Thus, while there is some evidence to support Ms. Moore's contention that she is prepared to be compliant (e.g., her installation of the alarm, provision of information to the DIs, and attempts to create compliant records), it is shocking that even at the time of the hearing, Ms. Moore still lacked knowledge of several of the fundamental requirements imposed by the CSA and Agency regulations.

For example, regarding Dr. Nichol's dispensings at Respondent's office, the CSA provides that “[a] separate registration shall be required at each principal place of business or professional practice where the applicant . . . dispenses controlled substances.” 21 U.S.C. 822(e). Interpreting this provision, the Fifth Circuit has held that “[i]f a physician intends to dispense controlled substances from a particular location several times a week or month, he must first file a separate registration for the location. This aspect of the registration provisions is beyond cavil.” *United States v. Clinical Leasing Serv., Inc.*, 930 F.2d 394, 395 (5th Cir. 1991) (emphasis added). *See also id.* § 822(b) (“Persons registered by the Attorney General under this subchapter to . . . dispense controlled substances . . . are authorized to possess . . . or dispensed such substances . . . (including any such activity in the conduct of research) to the extent authorized by their registration and in conformity with the other provisions of this subchapter.”) (emphasis added); *see also* 21 CFR 1301.12(a); *Jeffery Becker, M.D.*, 77 FR 72387, 72387–88 (2012).

As for Ms. Moore's testimony that she was not aware that Dr. Nichol was required to keep controlled substance records until August 24, 2012, the CSA provides that “every registrant . . . shall . . . as soon . . . as such registrant first engages in the . . . dispensing of controlled substances . . . make a complete and accurate record of all stocks thereof on hand.” 21 U.S.C. 827(a)(1). So too, the CSA requires that “every registrant . . . dispensing a controlled substance . . . shall maintain, on a current basis, a complete and accurate record of each such substance . . . received, sold, delivered, or otherwise disposed of by him, except that this paragraph shall not require the maintenance of a perpetual inventory.” *Id.* at § 827(a)(3) (emphasis added).

As the Agency has previously explained, “the CSA creates a closed regulatory system making it unlawful to manufacture, distribute, dispense, or possess any controlled substance except

in a manner authorized by the [Act].” *Daniel Koller, D.V.M.*, 71 FR 66975, 66981 (2006) (quoting *Gonzales v. Raich*, 545 U.S. 1, 13 (2005) (citing 21 U.S.C. 841(a)(1), 844(a))). Of particular relevance here, the Supreme Court has noted that “[t]he CSA and its implementing regulations set forth strict requirements regarding registration . . . and recordkeeping.” *Koller*, 71 FR at 66981 (quoting *Raich*, 545 U.S. at 14). *See also Paul H. Volkman*, 73 FR 30630, 30644 (2008) (“Recordkeeping is one of the CSA's central features; a registrant's accurate and diligent adherence to this obligation is absolutely essential to protect against the diversion of controlled substances.”). In short, the requirements that a practitioner be registered at each principal place of professional practice where he dispenses controlled substances and maintain complete and accurate records of the controlled substances he handles are not arcane rules; rather, they are two of the fundamental features of the closed regulatory system created by the CSA. Yet Ms. Moore claimed to be unaware of these rules. Ms. Moore's lack of experience in conducting research with respect to controlled substances, when coupled with her lack of knowledge of these essential requirements, provides ample reason to conclude that her registration “would be inconsistent with the public interest.” 21 U.S.C. 823(f).²³

Moreover, the record clearly establishes that Dr. Nichol violated both the separate registration provision and DEA recordkeeping requirements. As for Dr. Nichol's violations of the separate registration provision, it is true that Ms. Moore disputed the testimony of the GS and another DI that during the August 24, 2012 on-site inspection, she was asked where Dr. Nichol was dispensing the drugs and said they had been dispensed at Respondent's offices, and that Ms. Moore never claimed that Nichol had dispensed the controlled substances at his office. Tr. 72, 710–11. Of note, Ms. Moore specifically denied that she was even asked if Dr. Nichol was dispensing the drugs at Respondent. Tr. 535; *see also id.* at 726–27.

²³ In assessing Respondent's experience in conducting research with respect to controlled substances, the ALJ found “the fact that Astra Zeneca [actually, Quintiles] granted her a research project indicative of her documented experience at least to their satisfaction for purposes of this study.” R.D. at 27. As explained above, the determination of whether granting a researcher's registration is consistent with the public interest is vested in the Agency (by delegation from the Attorney General) and not in pharmaceutical companies or CROs. Accordingly, I reject the ALJ's ruminations as totally irrelevant.

²¹ I place no weight on the fact that Ms. Moore was fired by her previous employer or that she failed to produce letters of recommendation. *See* Gov. Br. at 24. The Government produced no evidence regarding the circumstances surrounding her termination. Nor has it cited any authority that DEA requires an applicant for a research registration to produce letters of recommendation.

²² The Government also argues that “Dr. Nichol's past experience with controlled substances does not qualify him . . . to handle controlled substances.” Gov. Br. 24. As support for this assertion, the Government cites Dr. Nichol's state board suspension and his exclusion from participation in federal health care programs. *Id.* The Government does not explain why it nonetheless entered into an MOA with Dr. Nichol, pursuant to which it allowed him to keep his registration and did so even after it became aware that he was transporting controlled substances to Respondent's office and dispensing them. I thus reject its contention.

While the ALJ's opinion contained inconsistent findings on the issue of whether Nichol was still dispensing the drugs at Respondent after he entered the MOA,²⁴ the ALJ did find that Ms. Moore "vacillated in her testimony concerning where the controlled substance was actually dispensed," and most significantly, that she lacked candor. R.D. at 34. In any event, even accepting Ms. Moore's testimony that Dr. Nichol stopped dispensing at Respondent's offices following his entering into the MOA, I would still conclude that Nichol violated the separate registration provision by dispensing controlled substances at Respondent.²⁵ In short, the evidence shows that Dr. Nichol made the dispensings on a regular and non-random basis, even if he did so only a few times a month. See *Jeffery J. Becker, D.D.S.*, 77 FR 72387, 72388 (2012). Indeed, for purposes of Dr. Nichol's activities as a researcher, Respondent's office was in every sense an "important or consequential" place of professional practice. *Clinical Leasing Serv.*, 930 F.2d at 395; see also *id.* ("If a physician intends to dispense controlled substances from a particular location several times a week or month, he must first file a separate registration for the location.").

Moreover, while Ms. Moore maintained that if she is granted a registration, the physicians Respondent contracts with will be responsible for the dispensing and recordkeeping of the controlled substances, as the ALJ

²⁴ More specifically, the ALJ found that the GS had spoken with the John Wegner, a Quintiles representative and "confirmed that the controlled substance was being dispensed from MCT. The drug was being ordered by Dr. Nichol, sent to his office location, and transported to MCT for dispensing. This procedure was ongoing from at least April of 2012." R.D. at 10 (citing Tr. 61–64) (emphasis added and citations omitted). As found above, the record indicates that while the GS spoke with Mr. Wegner in July 2012 and was told that Dr. Nichol was taking the drugs to Respondent, where they were dispensed, she then contacted Dr. Nichol's attorney, who confirmed that his client had been doing this "[a]t least since April of 2012." *Id.* at 64.

Yet later in the R.D., the ALJ found that "[a]t some unspecified time in 2012, Ms. Moore became aware that Dr. Nichol's relationship with the DEA had changed. She understood that Dr. Nichol could no longer dispense controlled substances from the Respondent's location. Thereafter, patients were dispensed controlled substances from Dr. Nichol's office." R.D. at 16 (citing Tr. 497–98; 531–35, 631). However, the evidence shows that Nichol did not enter into the MOA until the middle of April 2012. RX 22, at 4.

²⁵ Given the ALJ's finding that Ms. Moore vacillated in her testimony and lacked candor on the issue of where the dispensings occurred, as ultimate factfinder I give no weight to her testimony that even before Nichol entered into the MOA, he made some of the dispensings at his office. Indeed, the Clinical Trial Agreement expressly required that the "Institution, Investigator and their personnel shall perform the Study at Institution's facility." RX 14, at 2 (emphasis added).

recognized, under federal law, if controlled substances were dispensed at Respondent's office, it was responsible for maintaining complete and accurate records. *United States v. Clinical Leasing Serv., Inc.*, 759 F. Supp. 310, 313 (E.D. La. 1990), *aff'd* 925 F.2d 120, 123 (5th Cir. 1991). As the court explained:

The clinic is charged with failure to maintain proper records. The law clearly requires every "person" (including a corporation) to maintain proper records if that person dispenses controlled substances. By employing physicians to dispense drugs in connection with its operation, the clinic is a dispenser of controlled substances. Therefore, *the clinic, as well as the physicians it employs, must maintain the proper records required by law.*

759 F. Supp. at 312 (emphasis added).

The court expressly rejected the clinic's contention that "it was not required to maintain records," because "the record keeping requirements pertain only to 'registrants,'" noting that 21 U.S.C. 842(a)(5) "does not require that one who refuses or fails to make, keep, or furnish records be a 'registrant,'" but applies to "any person," including "an individual, corporation . . . business trust, partnership, association, or other legal entity." *Id.* at 313 (quoting 21 CFR 1301.02(j)). Multiple federal courts have likewise rejected the contention that the CSA's recordkeeping requirements do not apply to non-registrant owners of clinics which dispense controlled substances. See *United States v. Robinson*, 2012 WL 3984786, *6–7 (S.D. Fla., Sept. 11, 2012) (holding non-registrant owner of cosmetic surgery clinic liable for recordkeeping violations under section 842(a)(5); statute "includes the broader term of 'any person' and does not limit application of the subsection to registrants"); *United States v. Stidham*, 938 F.Supp. 808, 813–15 (S.D. Ala. 1996) (holding non-registrant owner of methadone clinic liable for recordkeeping violations); *United States v. Poulin*, 926 F.Supp. 246, 250–51 (D. Mass. 1996) ("The recordkeeping provisions of the [CSA] apply to all persons who dispense drugs, even if they have not registered as required under the Act" and holding both pharmacy's owner/proprietor and corporate entity liable for recordkeeping violations); see also 21 U.S.C. 842(a)(5).

Of note, the GS testified that during the August 24, 2012 inspection of Respondent's new office, she examined the Schedule II order forms and noted that they had not been completed by indicating the date the drugs were received and the quantity received. Tr. 78; see also 21 CFR 1305.13(e). The

evidence also shows that in response to the GS's request (through Dr. Nichol's attorney) for Dr. Nichol's dispensing records, Nichol provided the GS with the records found in Government Exhibit 14. Tr. 75.

Notably, it is undisputed that the dispensing record for each study—which Dr. Nichol provided—was not created until August 27, 2012, well after all of the dispensings were made. See GX 14, at 5–7 (Kodiac 8); *id.* at 14–20 (Kodiac 5). The CSA requires, however, that a dispensing record be "maintain[ed], on a current basis." 21 U.S.C. 827(a)(3). Thus, the records presented to the GS by Dr. Nichol clearly did not comply with federal law.

As for whether Ms. Moore was maintaining the records which complied with the CSA, the ALJ's decision again contains several inconsistent findings and conclusions. For example, the ALJ found that "it is unknown whether Ms. Moore's sponsor-required records would satisfy the DEA's recordkeeping requirements, since neither party made them exhibits in this matter." R.D. 20; see also *id.* at 32 ("Evidence of Ms. Moore's Sponsor Records was not entered into this record."). However, Ms. Moore testified that the NKTR-118 Accountability Forms, which were introduced into the record at RXs 23 and 24, were "my sponsor's record[s]." Tr. 811; see also *id.* at 813–23 (discussing notations in records made by the sponsor's representative or CRA).

The ALJ nonetheless concluded that because "[e]vidence of Ms. Moore's Sponsor records was not entered into this record . . . the Government has failed to prove by a preponderance of the evidence that the Respondent's records are deficient." R.D. at 33. Yet the ALJ then explained that "[a]lthough Respondent has failed to maintain its own recordkeeping system, it cannot be held responsible for all of the noncompliant actions of Dr. Nichol." *Id.* (emphasis added). And later, the ALJ explained that Ms. Moore "clearly lacks experience in handling controlled substances, for she has not prepared the paperwork required in remaining accountable for the controlled substances in Dr. Nichol's charge." R.D. at 35 (emphasis added).

Moreover, regarding the obligation to keep records under the CSA, Ms. Moore testified that "I only learned on the 24th of August 2012, when the DEA came into my site for onsite inspection, that there was a requirement to have separate books. So I wasn't keeping records for the DEA." Tr. 811. As for the sponsor record, Ms. Moore testified that she "was simply recording everything

. . . we were just to count the drug and send it away.” *Id.* at 811.²⁶ Ms. Moore then reiterated that “I was not keeping records for the DEA.” *Id.* at 812.

Accordingly, I find that substantial evidence supports the conclusion that neither Dr. Nichol nor Respondent was maintaining dispensing records for the two studies which complied with federal law.²⁷ And because federal law requires that both the physician and the clinic are required to maintain records, *see Clinical Leasing*, 759 F. Supp. at 312; I conclude that Respondent violated federal law when it failed to maintain on a current basis, complete and accurate records of its dispensings of controlled substances. I thus reject the ALJ’s conclusion that “the Government has not cited to any regulatory or statutory provision resulting in a finding of wrongdoing

²⁶ Notably, Respondent does not argue that Respondent’s Exhibits 23 and 24 (the NKTR–118 Accountability Forms) comply with the CSA and DEA regulations, notwithstanding that they document various dispensings. *See generally* Resp. Br. Indeed, in seeking admission of these documents, Respondent’s counsel represented to the ALJ that they were offered “for a very limited purpose, only with regard to the date of [the] last dispensal” [sic] and that “[w]e do not offer them for anything else with regard to the dispensal [sic] records.” Tr. 750. The ALJ thus admitted these records—over the Government’s objection—only “for the limited purpose of” showing the dates of the last dispensings. *Id.*

In any event, the records support the conclusion that Respondent failed to comply with federal recordkeeping obligations. Indeed, a review of these records shows that multiple entries are not in chronological order, thus indicating that these logs were not maintained on a current basis as required by federal law, but were created after the fact. *See* RX 24, at 3 (listing entries dated in following order: 25 Oct. 2011, 09 Nov. 2011, 15 Sep. 2011, 26 Sep. 2011, 22 Nov. 2011, 20 Dec. 2011); *id.* at 5–6 (single entry containing crossed-out date of 18 Aug., and two dates of 18 July 2012 and 15 Aug 2012). *See also* RX 23, at 11–13 (listing more dates of dispensings which are not in chronological order).

²⁷ In its post-hearing brief, the Government makes extensive arguments, based largely on the GS’s audit, that the dispensing records Ms. Moore created were inaccurate. Gov. Br. 28–32. However, the Government never performed a physical count of the drugs on hand for the closing inventory. Instead, as found above, it based its closing inventory figures on records which showed inventories taken on various dates. GX 14, at 22. However, the GS ignored that these records (MCT Form 1) were not perpetual inventories. Thus, the GS simply added any quantities received in a new shipment to the previous balance, ignoring that the last count was dated weeks earlier and that dispensings had been ongoing. Tr. 90, 133. The GS also treated the last entry on each form as if it was a new shipment (adding it to the previous figure) when the forms indicated that the quantities were of the drugs that were “unused/returned” and “kits remaining unused.” *Id.* at 133. Moreover, the GS acknowledged that she did not ask either Dr. Nichol or Ms. Moore to explain what these entries showed. *Id.* at 134–35. As for the GS’s testimony that she was simply following Ms. Moore’s methodology, the GS never asked Ms. Moore to explain her methodology. *Id.*

Accordingly, I find the Government’s contention not proved.

done by the Respondent” other than the violation which Ms. Moore committed when she accepted a shipment of controlled substances.²⁸ R.D. at 35; *see also* GX 14, at 13 (receipt for shipment of drugs signed by Ms. Moore on July 31, 2012).

The ALJ also declined to impute Dr. Nichol’s violations of the separate registration provision to Respondent, reasoning that under Arkansas law, an employer is not responsible for the acts of its independent contractor. R.D. at 30. As support for her conclusion, the ALJ noted that Dr. Nichol’s contract with Respondent stated that he was an independent contractor and not an employee. *Id.* at 31 (citing RX 16, at 6). The ALJ then explained:

Ms. Moore testified that her vision of the Respondent’s business is to provide site resources for the doctor who is conducting the research. Respondent’s business is not meant to exercise control over the doctor’s medical judgment nor is the Respondent meant to be primarily responsible for the research and recordkeeping. Additionally, the Respondent does not even pay Dr. Nichol for his services in conducting research at Respondent’s place of business, but, rather, Dr. Nichol’s payment is a ‘pass-through’ system of payment in which the Respondent pays Dr. Nichol once the Respondent receives funds from the Sponsoring Organization. Simply put, Dr. Nichol is not an employee or an agent of the Respondent because the Respondent does not exercise any control over Dr. Nichol’s work; rather, the Respondent only offers Dr. Nichol a facility in which to conduct research.

R.D. at 31–32 (citing Tr. 381, 383–85; RX 16).

Not only is the ALJ’s reasoning counterfactual, it reflects a stunning misunderstanding of the CSA. As for the ALJ’s reliance on Ms. Moore’s vision, it is beside the point.²⁹ Indeed, here, the evidence shows that Respondent did far more than “provide site resources for [a] doctor who is conducting research.” *Id.* Rather, the evidence shows that Ms. Moore sought out, and contracted with Dr. Nichol, to perform clinical research for Respondent, pursuant to contracts it might obtain from contract research organizations, *id.* at 387, and that upon receiving information that Quintiles

²⁸ As relevant here, under the CSA, it is “unlawful for any person knowingly or intentionally to possess a controlled substance . . . except as otherwise authorized by this subchapter.” 21 U.S.C. 844(a); *see also id.* § 822(b) (“Persons registered by the Attorney General under this subchapter to . . . distribute, or dispense controlled substances . . . are authorized to possess . . . distribute, or dispense such substances . . . to the extent authorized by their registration and in conformity with the other provisions of this subchapter.”).

²⁹ So too, the fact that Respondent was not contractually required to pay Dr. Nichol until it was paid is beside the point.

would be managing clinical trials of NKTR–118, Ms. Moore applied for Respondent to participate in the study. RX 3, at 1.

Moreover, upon Respondent’s being approved by Quintiles, Ms. Moore (on behalf of Respondent) and Dr. Nichol jointly agreed with Quintiles to “perform the Study at [Respondent’s] facility according to the Protocol and th[e] [Clinical Trial] Agreement.” RX 14, at 2. Thus, the evidence shows that Respondent did not simply provide a facility for Dr. Nichol to undertake the research. To the contrary, Ms. Moore, on behalf Respondent, undertook to perform the clinical trials. Furthermore, it is clear that there was an agreement between Ms. Moore and Dr. Nichol to dispense controlled substances at Respondent’s office. *See also* Tr. 57 (Ms. Moore’s statement during May 2011 interview that Dr. Nichol “would be present at the clinic [Respondent] three to four days a week.”).

Notwithstanding that Dr. Nichol was an independent contractor and not Respondent’s employee, he was still obligated to comply with the terms of his agreement with Respondent, which required that he “act in accordance and compliance with any and all applicable Federal, State, and local laws, rules, regulations, guidelines, including but not limited to the . . . CFR . . . as amended.” RX 16, at 4. Indeed, Respondent had the power to terminate the agreement “upon the breach of” the agreement by Dr. Nichol and his failure to cure the breach. *Id.* at 5. Thus, even if Respondent could not exercise control over Dr. Nichol’s medical decisions, she still retained authority to supervise various other aspects of his activities and to ensure that he complied with the requirements of federal law, including the CSA.³⁰ Accordingly, whether Dr. Nichol was an agent under the standards set forth in the Restatement of the Law (Third) Agency (2006), *see* R.D. at 31, the evidence shows that he clearly acted on Respondent’s behalf in performing the Clinical Trial Agreement and Ms. Moore clearly knew that Dr. Nichol was dispensing controlled substances at Respondent. *See* 21 U.S.C. 802(3). Thus, Dr. Nichols’ misconduct in dispensing controlled substances at Respondent’s unregistered location is properly imputed to Respondent.

Indeed, even if the evidence is not sufficient to establish the existence of an

³⁰ It is not uncommon that pharmacies utilize the services of relief pharmacists, who are not employees, but rather independent contractors. Under the ALJ’s theory, a pharmacy owned by a non-pharmacist could not be held liable for violations committed by a relief pharmacist who is an independent contractor.

agency relationship between Dr. Nichol and Respondent, the ALJ was simply mistaken in concluding that proof of an agency relationship was necessary to impute Nichol's misconduct to Respondent. Contrary to the ALJ's understanding, the CSA recognizes the principle of agency for the purpose of allowing "an authorized person who acts on behalf of or at the direction of a manufacturer, distributor, or dispenser," 21 U.S.C. 802(3), to handle controlled substances without having to be registered as well. *See id.* § 822(c) ("The following persons shall not be required to register and may lawfully possess any controlled substance . . . under this subchapter: (1) An agent or employee of any registered manufacturer, distributor, or dispenser of any controlled substance . . . if such agent or employee is acting in the usual course of his business or employment."). The CSA's agency provision does not, however, limit the liability of a person for the misconduct of another to the circumstance in which the latter acts as an agent of the former. Thus, while obviously any misconduct in handling controlled substances which is committed by an agent in the course of the agency is properly imputed to his principal, *see Mediplas Innovations*, 67 FR 41256 (2002),³¹ this is not the only basis for imputing Dr. Nichol's violations of the separate registration requirement to Respondent and Ms. Moore.

Significantly, Dr. Nichol's violations can be imputed to Respondent because Ms. Moore knowingly aided and abetted Dr. Nichol's violations. *Cf.* 18 U.S.C. 2; *FDIC v. First Interstate Bank of Des*

Moines, N.A., 885 F.2d 423, 431 (8th Cir. 1989) (noting that "under the common law, liability is sufficiently established by an aider-abettor's knowledge of the wrong and its awareness of its assistance in furthering the scheme") (citing *Restatement (Second) of Torts* § 876 comment d (other citation omitted)). Here, in addition to the Clinical Trial Agreement (by which Respondent, through Ms. Moore, and Dr. Nichol agreed with Quintiles to "perform the Study at [Respondent's] facility," RX 14, at 2), the evidence shows that Ms. Moore provided Respondent's facility to Dr. Nichol for the purpose of performing the clinical studies.

Moreover, the evidence shows that Respondent did not have a registration to conduct research, Tr. 62, and that during the February 15, 2011 site selection visit, Quintiles' representative informed both Ms. Moore and Dr. Nichol that "[t]he site must obtain a DEA license for research with a controlled substance." RX 4, at 1; *see also* Tr. 400 (testimony of Ms. Moore that sponsor told her and Nichol that "based on the scheduling [of NKTR-118], then the sites [sic] would need a DEA license"). So too, the evidence shows that Dr. Nichol was not registered at Respondent and Ms. Moore knew this.³² Tr. 487; RX 22, at 1. Finally, the evidence further shows that Dr. Nichol proceeded to dispense controlled substances at Respondent's office when neither he, nor Respondent, held a registration at this location and did so on numerous occasions through at least April 2012.³³ Thus, the evidence

establishes that Ms. Moore and Respondent aided and abetted Dr. Nichol's violations of section 822(e), by allowing him to dispense at Respondent's office, which was not registered.

I therefore reject the ALJ's conclusion that Dr. Nichol's violations of section 822(e) cannot be imputed to Ms. Moore and Respondent.³⁴ Moreover, as

As the Fifth Circuit has recognized, the statute (21 U.S.C. 822(e)) and regulation provide fair notice such that:

A physician of ordinary means and intelligence would understand that the federal registration provisions apply to *each* important or consequential place of business where the physician distributes controlled substances. It is sufficiently clear that the application of the provisions is not limited to a *single* important or consequential place of business where controlled substances are distributed.

Clinical Leasing Serv., 925 F.2d at 123 (emphasis added). Moreover, Ms. Moore admitted that she never asked DEA whether Dr. Nichol could lawfully transport the controlled substances to Respondent and dispense them there. Tr. 538. *See Clinical Leasing Serv.*, 925 F.2d at 122 ("licensing or registration requirements, are afforded considerable deference in the vagueness analysis because the regulated party may 'have the ability to clarify the meaning of the regulation[s] by its own inquiry, or by resort to an administrative process'") (quoting *Village of Hoffman Estates v. Flipside, Hoffman Estates, Inc.*, 455 U.S. 489, 498 (1991)).

³⁴ So too, liability can be imputed based on proof that a conspiracy existed, even where the conspiracy had a lawful objective but was carried out through unlawful means. *See* 21 U.S.C. 846 ("Any person who . . . conspires to commit any offense defined in this subchapter [*i.e.*, the CSA] shall be subject to the same penalties as those prescribed for the offense, the commission of which was the object of the . . . conspiracy.").

To establish the existence of a conspiracy, the Government "must prove there was a conspiracy with an illegal purpose, that the defendant was aware of the conspiracy, and that [s]he knowingly became a part of it. Moreover, there must be evidence that the defendant entered into an agreement with at least one other person and that the agreement had as its objective a violation of law." *United States v. Fitz*, 317 F.3d 878, 881 (8th Cir. 2003) (citations omitted). Proof of the existence of an agreement "'does not require evidence of a formal or express agreement'" but only evidence "'that the parties have a tacit understanding to carry out the prohibited conduct.'" *United States v. Nusraty*, 867 F.2d 759, 763 (2d Cir. 1989) (quoting *United States v. Rubin*, 844 F.2d 979, 984 (2d Cir. 1988)) (other citation omitted).

However, because the act of entering into a conspiracy is itself an actionable offense, the Government was required to allege this in either the Show Cause Order or its Pre-Hearing Statements. I therefore do not rely on this theory.

By contrast, the aiding and abetting statute does not create a separate offense, but simply "abolishes the distinction between common law notions of 'principal' and 'accessory.'" *United States v. Kegler*, 724 F.2d 190, 200 (D.C. Cir. 1983). Accordingly, in a criminal prosecution, "[a]iding and abetting . . . need not be alleged in the indictment." *United States v. Alexander*, 447 F.3d 1290, 1298 (10th Cir. 2006). *See also United States v. Good Shield*, 544 F.2d 900, 952 (8th Cir. 1976) ("Aiders and abettors and those causing an act to be done are punishable as principals. The indictment may charge a defendant as a principal, and need not specifically allege that he aided and abetted in the commission of the crime.").

³¹ Citing *Mediplas Innovations*, 67 FR 41256 (2002) and *Daniel Koller, D.V.M.*, 71 FR 66975 (2006), the ALJ explained that these decisions "regarding imputing a worker's conduct to an employer turn on the fact that the worker was deemed an agent of the employer." R.D. at 31. The ALJ misread both cases.

In *Mediplas*, the Agency held that a firm, which sought to import list I chemicals, was liable for the failure of its customs broker to timely file import notification forms (DEA-486), explaining that the firm had a statutory duty to file the forms and that under the law of agency, it was liable "for its agent's failure to timely file" the forms. 67 FR at 41262 (citing, *inter alia*, *Restatement (Second) of Agency* §§ 272, 275, 277 (1958)). While the liability of a principal for the acts committed by an agent in the course of its agency is hardly disputable, *Mediplas* simply does not address whether, absent an agency or employment relationship, a person can be held liable under the CSA for the misconduct of another person, such as a co-conspirator.

Nor does *Koller* support the ALJ's reasoning. Rather, *Koller* simply addressed whether a relief veterinarian, who was an independent contractor and not an employee of a clinic owner, could act as an agent of the owner and lawfully dispense controlled substances under the exemption from registration provided under 21 U.S.C. 822(c). *See* 71 FR 66975.

³² Obviously, Dr. Nichol knew that he was not registered at Respondent.

³³ As for Ms. Moore's testimony that she did not think it was illegal for Dr. Nichol to bring the controlled substances to Respondent and dispense them there, this is not a mistake of fact, but rather, a mistake of law. As such, even if I deemed it credible, it offers no comfort to Respondent.

Moreover, the record shows that at the April 2011 meeting, the DIs provided Ms. Moore with the Code of Federal Regulations. Among the regulations contained therein are 21 CFR 1301.11, which requires that "[e]very person who . . . dispenses . . . any controlled substances or who proposes to engage in the . . . dispensing of any controlled substance shall obtain a registration unless exempted by law or" regulation, and as well as 21 CFR 1301.12, which provides that "[a] separate registration is required for each principal place of professional practice at one general physical location where controlled substances are . . . dispensed by a person." *See also* 21 CFR 1301.12(b)(3) (exempting from the separate registration requirement, "[a]n office used by a practitioner . . . where controlled substances are prescribed but neither administered nor otherwise dispensed as a regular part of the professional practice of the practitioner at such office, and where no supplies of controlled substances are maintained.") (emphasis added).

discussed above, Ms. Moore and Respondent violated federal law by failing to maintain complete and accurate dispensing records. These findings support the conclusion that granting Respondent's application "would be inconsistent with the public interest." 21 U.S.C. 823(f).

Sanction

Under Agency precedent, where, as here, "the Government has proved that [an applicant] has committed acts inconsistent with the public interest, [the applicant] must "present sufficient mitigating evidence to assure the Administrator that it can be entrusted with the responsibility carried by such a registration." " *Medicine Shoppe-Jonesborough*, 73 FR 364, 387 (2008) (quoting *Samuel S. Jackson*, 72 FR 23848, 23853 (2007) (quoting *Leo R. Miller*, 53 FR 21931, 21932 (1988))).

Of significance here, "[p]leadings in administrative proceedings are not judged by the standards applied to an indictment at common law." " *Citizens States Bank of Marshfield v. FDIC*, 751 F.2d 209, 213 (8th Cir. 1984) (quoting *Aloha Airlines v. Civil Aeronautics Bd.*, 598 F.2d 250, 262 (D.C. Cir. 1979)) (quoted in *George Mathew, M.D.*, 75 FR 66138, 66146 n.20 (2010)). "An agency is not required "to give every [Respondent] a complete bill of particulars as to every allegation that [he] will confront." " *Boston Carrier, Inc., v. ICC*, 746 F.2d 1555, 1560 (D.C. Cir. 1984) (quoted in *Mathew*, 75 FR at 66146 n.20). "Thus, the failure of the Government to disclose an allegation in the Order to Show Cause is not dispositive, and an issue can be litigated if the Government otherwise timely notifies a respondent of its intent to litigate the issue." *Mathew*, 75 FR at 66146 n.20. See also *Darrell Risner, D.M.D.*, 61 FR 728, 730 (1996) ("the parameters of the hearing are determined by the prehearing statements"); *accord Nicholas A. Sychak*, 65 FR 75959, 75961 (2000).

Here, the Government provided adequate notice that it intended to litigate the issue of Dr. Nichol's transporting controlled substances to Respondent's office to dispense them there and that this was illegal because he was not registered at that location. See Gov. Second Supplemental Prehearing Statement, at 1–2. More specifically, the Government disclosed that it intended to sponsor testimony from the GS that she was told by a Quintiles employee that "the MCT study situation was unique in that they had to send the drugs to Dr. Nichol who then transported them to MCT to dispense." *Id.* at 1. The Government further disclosed that the GS would testify that she contacted Dr. Nichol's attorney and "informed him of the problems with transporting and dispensing drug from an unregistered location and that it was not legal to do so unless the location was registered" and that "Dr. Nichol needed to be registered at the MCT location if he wished to dispense there." *Id.* The Government then disclosed that the GS would testify that on August 22, 2012, she received a letter from Dr. Nichol's attorney which "assured her that Dr. Nichol would administer the controlled substances for research at his DEA approved address." *Id.* at 2.

Finally, the Government disclosed that the GS would testify that during the August 24, 2012 meeting with Ms. Moore, the latter "admitted that Dr. Nichol was dispensing [NKTR-118] from MCT both at the new and old locations for MCT." *Id.* I thus conclude that Respondent had adequate notice that the issue would be litigated.

"Moreover, because 'past performance is the best predictor of future performance,' *ALRA Labs, Inc. v. DEA*, 54 F.3d 450, 452 (7th Cir. 1995), [DEA] has repeatedly held that where [an applicant] has committed acts inconsistent with the public interest, the registrant must accept responsibility for its actions and demonstrate that it will not engage in future misconduct." *Medicine Shoppe*, 73 FR at 387; see also *Jackson*, 72 FR at 23853; *John H. Kennedy*, 71 FR 35705, 35709 (2006); *Prince George Daniels*, 60 FR 62884, 62887 (1995). See also *Hoxie v. DEA*, 419 F.3d at 483 ("admitting fault" is "properly consider[ed]" by DEA to be an "important factor[]" in the public interest determination). So too, in making the public interest determination, "this Agency also places great weight on an [applicant's] candor, both during an investigation and in [a] subsequent proceeding." *Robert F. Hunt*, 75 FR 49995, 50004 (2010) (citing *The Lawsons, Inc., t/a The Medicine Shoppe Pharmacy*, 72 FR 74334, 74338 (2007) quoting *Hoxie*, 419 F.3d at 483 ("Candor during DEA investigations properly is considered by the DEA to be an important factor when assessing whether a . . . registration is consistent with the public interest.")).

While an applicant must accept responsibility and demonstrate that it will not engage in future misconduct in order to establish that granting its application is consistent with the public interest, DEA has repeatedly held these are not the only factors that are relevant in determining the appropriate sanction. See, e.g., *Joseph Gaudio*, 74 FR 10083, 10094 (2009); *Southwood Pharmaceuticals, Inc.*, 72 FR 36487, 36504 (2007). Obviously, the egregiousness and extent of a registrant's misconduct are significant factors in determining the appropriate sanction. See *Jacobo Dreszer*, 76 FR 19386, 19387–88 (2011) (explaining that a respondent can "argue that even though the Government has made out a *prima facie* case, his conduct was not so egregious as to warrant revocation"); *Paul H. Volkman*, 73 FR 30630, 30644 (2008); see also *Gregory D. Owens*, 74 FR 36751, 36757 n.22 (2009).

Moreover, as I have noted in several cases, "[n]either *Jackson*, nor any other agency decision, holds . . . that the Agency cannot consider the deterrent value of a sanction in deciding whether a registration should be [suspended or] revoked." *Gaudio*, 74 FR at 10094 (quoting *Southwood*, 72 FR at 36503 (2007)); see also *Robert Raymond Reppy*, 76 FR 61154, 61158 (2011); *Michael S. Moore*, 76 FR 45867, 45868 (2011). This is so, both with respect to

the respondent in a particular case and the community of registrants. See *Gaudio*, 74 FR at 10095 (quoting *Southwood*, 71 FR at 36504). Cf. *McCarthy v. SEC*, 406 F.3d 179, 188–89 (2d Cir. 2005) (upholding SEC's express adoption of "deterrence, both specific and general, as a component in analyzing the remedial efficacy of sanctions").

The ALJ reasoned that while "[t]he record is filled with wrongdoing done by Dr. Nichol . . . his wrongdoing is not imputed to Respondent" and that the only violation Respondent "had . . . to be remorseful about," was Ms. Moore's act of signing for, and taking possession of, the July 31, 2012 shipment of controlled substances. R.D. at 35. While acknowledging that "Ms. Moore did not express any remorse for this wrongdoing," the ALJ concluded that "this one incident is [not] enough to deny the Respondent a DEA registration." *Id.*

As explained above, the ALJ's conclusion rests upon the erroneous premise that Ms. Moore is only responsible for her act of taking possession of a shipment of controlled substances. Rather, the evidence shows that Ms. Moore aided and abetted Dr. Nichol's violations of the CSA by dispensing controlled substance at an unregistered location. See 21 U.S.C. 822(e), 841(a)(1), 846. As explained above, this misconduct constitutes a violation of one of the CSA's core provisions.

Yet Ms. Moore utterly failed to acknowledge her misconduct, insisting that she did not understand that: (1) Respondent could not dispense controlled substances without first obtaining a DEA registration, Tr. 537, 539; and (2) it was illegal for Dr. Nichol to dispense controlled substances at Respondent. *Id.* at 539. Not only is Ms. Moore's ignorance of the law no excuse, see *Sigrid Sanchez, M.D.*, 78 FR 3933, 39336 (2013); her assertions are extraordinary when considered in light of the facts that: (1) She was explicitly told by the Quintiles representative that Respondent must obtain a DEA license, RX 4; (2) she was provided with a copy of the Code of Federal Regulations, Tr. 274; and (3) she admitted that she never asked DEA Investigators if Dr. Nichol could lawfully transport the drugs to Respondent and dispense them there. *Id.* at 538.

Ms. Moore also failed to accept responsibility for Respondent's recordkeeping violations. Ms. Moore did not address at all the failure to properly annotate the Schedule II order forms with the date of receipt and quantity of drugs received. Moreover, while both

Respondent and Dr. Nichol failed to maintain dispensing records on a current basis, *see* 21 U.S.C. 827(a)(3); 21 CFR 1304.21(a). Ms. Moore asserted that she was not aware that Dr. Nichol was required to keep controlled substances records for the studies until August 24, 2012. Tr. 822–23. As for Respondent’s failure to keep records, Ms. Moore asserted that “[n]owhere in keeping records was there ever any indication, until [the GS] came to my site, that we were to keep two sets of books. I never heard that, but I’m not a registrant, so maybe if I were, I would have heard it and known that.” *Id.* at 565.

However, as stated above, during the April 2011 on-site inspection, Ms. Moore was provided with the Code of Federal Regulations. Tr. 274. And during the visit, one of the DIs explained the recordkeeping requirements to Ms. Moore. *Id.* Regardless of whether Ms. Moore was required to keep two sets of books, Respondent was obligated to maintain current records of the controlled substances that were received and dispensed by Respondent and Dr. Nichol. Here again, Ms. Moore’s testimony manifests that she does not accept responsibility for the failure of Respondent and Dr. Nichol to keep records that complied with the CSA. Indeed, Ms. Moore’s testimony is all the more remarkable in light of the fact that it occurred at a hearing at which the issue was whether her entity should be granted a registration. *Cf.* 4 *OTC, Inc.*, 77 FR 35031, 35035 (2012) (“it is not too much to expect that an applicant seeking to show its intent to comply with applicable state laws, would produce [Standard Operating Procedures] which were not riddled with misstatements of those laws and which correctly reflected those States where its proposed method of operations would be unlawful”).

I therefore hold that Ms. Moore has failed to accept responsibility for her (and Respondent’s) misconduct. *See Jeffery P. Gunderson*, 61 FR 62884, 62887 (1996). While there is no evidence that any of the drugs that were dispensed in the NKTR–118 study were diverted, both the registration and recordkeeping violations involve core provisions of the CSA. Moreover, Respondent’s violations of the registration requirements were clearly intentional. Accordingly, Ms. Moore’s failure to acknowledge her wrongdoing provides ample reason to reject Respondent’s application. This conclusion is buttressed by the ALJ’s finding that Ms. Moore lacked candor when she testified “concerning where the controlled substance was actually

dispensed.” R.D. at 34 (citing *Jeri Hassman, M.D.*, 75 FR 8,194, 8236 (2010), *pet. for rev. denied, Hassman v. Office of the Deputy Administrator*, No. 10–70684 (9th Cir., Apr. 9, 2013)).

To be sure, Ms. Moore put on some evidence of her willingness to comply with the CSA and Agency regulations, including her installation of the alarm, her timely provision of information to investigators, and her efforts to create compliant records. However, where, as here, the evidence shows that an applicant has engaged in knowing or intentional misconduct, Agency precedent has long held that the acknowledgement of such misconduct is an essential element of rebutting the Government’s *prima facie* case. *See Hoxie v. DEA*, 419 F.3d at 483; *see also Medicine Shoppe*, 73 FR at 387; *Kennedy*, 71 FR at 35709; *Daniels*, 60 FR at 62887. And in any event, the weight to be given Ms. Moore’s evidence of her willingness to comply is greatly diminished by her aiding and abetting Dr. Nichol’s violations of federal law when he dispensed at an unregistered location. Moreover, Ms. Moore’s testimony shows that she still does not understand the scope of the recordkeeping obligations of a DEA registrant.

Accordingly, I conclude that Respondent’s application should be denied.

Order

Pursuant to the authority vested in me by 21 U.S.C. 823(f) and 28 CFR 0.100(b), I order that the application of Moore Clinical Trials, L.L.C., for a DEA Certificate of Registration as a Researcher, be, and it hereby is, denied. This Order is effective immediately.

Dated: July 2, 2014.

Michele M. Leonhart,
Administrator.

[FR Doc. 2014–16162 Filed 7–10–14; 8:45 am]

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–392]

Importer of Controlled Substances Application: Research Triangle Institute

ACTION: Notice of application.

DATES: Registered bulk manufacturers of the affected basic classes, and applicants therefore, may file written comments on or objections to the issuance of the proposed registration in

accordance with 21 CFR 1301.34(a) on or before August 11, 2014. Such persons may also file a written request for a hearing on the application pursuant to 21 CFR 1301.43 on or before August 11, 2014.

ADDRESSES: Written comments should be sent to: Drug Enforcement Administration, Attention: DEA Federal Register Representative/ODW, 8701 Morrisette Drive, Springfield, Virginia 22152.

SUPPLEMENTARY INFORMATION: The Attorney General has delegated his authority under the Controlled Substances Act to the Administrator of the Drug Enforcement Administration (DEA), 28 CFR 0.100(b). Authority to exercise all necessary functions with respect to the promulgation and implementation of 21 CFR part 1301, incident to the registration of manufacturers, distributors, and dispensers of controlled substances (other than final orders in connection with suspension, denial, or revocation of registration) has been redelegated to the Deputy Assistant Administrator of the DEA Office of Diversion Control (“Deputy Assistant Administrator”) pursuant to sec. 7(g) of 28 CFR part 0, subpart R, App.

In accordance with 21 CFR 1301.34(a), this is notice that on April 8, 2014, Research Triangle Institute, Kenneth S. Rehder, Ph.D., Hermann Building East Institute Drive, P.O. Box 12194, Research Triangle Park, North Carolina 27709, applied to be registered as an importer of the following basic classes of controlled substances:

Controlled substance	Schedule
AM-2201 (7201)	I
AM-694 (7694)	I
JWH-018 (7118)	I
JWH-073 (7173)	I

The company plans to import small quantities of the listed controlled substances for the National Institute on Drug Abuse for research activities.

In reference to drug codes 7360 and 7370, the company plans to import a synthetic cannabidiol and a synthetic tetrahydrocannabinol. No other activity for this drug code is authorized for this registration.

Comments and requests for hearings on applications to import narcotic raw material are not appropriate. 72 FR 3417 (January 25, 2007).

In regard to the non-narcotic raw material, any bulk manufacturer who is presently, or is applying to be, registered with the DEA to manufacture such basic classes of controlled substances listed in schedules I or II, which fall under the authority of section 1002(a)(2)(B) of the Act (21 U.S.C. 952(a)(2)(B)) may, in the circumstances set forth in 21 U.S.C. 958(i), file comments or objections to the issuance of the proposed registration and may, at the same time, file a written request for a hearing on such application pursuant to 21 CFR 1301.43 and in such form as prescribed by 21 CFR 1316.47.

Dated: July 2, 2014.
Joseph T. Rannazzisi,
Deputy Assistant Administrator.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

National Institute of Justice

[OJP (NIJ) Docket No. 1662]

**National Institute of Justice
 Compliance Testing Program's
 Compliant Product List for Ballistic
 Body Armor**

AGENCY: National Institute of Justice, Department of Justice.

ACTION: Notice.

SUMMARY: Notice regarding the removal of Compliant Product Lists (CPL) of ballistic resistant body armor models that met superseded versions of the National Institute of Justice (NIJ) Body Armor Standard.

DATES: *Effective:* August 25, 2014.

FOR FURTHER INFORMATION CONTACT: Daniel Longhurst, NIJ CTP by email at *bactp@justnet.org*, or by telephone at (202) 616-3857.

SUPPLEMENTAL INFORMATION: The National Institute of Justice (NIJ)-supported Compliance Testing Program (CTP) publishes on-line Compliant Product Lists (CPLs) of ballistic resistant body armor models that have satisfactorily demonstrated compliance with NIJ's Body Armor Standard.

It has been NIJ's practice to continue to provide the CPLs associated with superseded versions of the standard for purposes of historical reference. The NIJ CTP currently provides four CPLs associated with the following four specifications:

1. NIJ Standard 0101.03, Ballistic Resistance of Police Body Armor;
2. NIJ Standard-0101.04, Ballistic Resistance of Personal Body Armor;
3. NIJ 2005 Interim Requirements for Bullet-Resistant Body Armor; and
4. NIJ Standard-0101.06, Ballistic Resistance of Body Armor. (Current)

Each subsequent version of the Body Armor standard incorporates new research and understanding of body armor performance with direct implications for officer safety. The existence of the CPLs associated with superseded versions of the NIJ Body Armor Standard may lead officers and agencies to believe that the body armor models listed on those CPLs have been tested to the most current version of the NIJ Body Armor Standard. To eliminate the potential for such confusion, the

CTP intends to remove all older versions of the CPLs and only maintain the CPL associated with the current version of the NIJ Body Armor Standard.

When NIJ Standard 0101.06 is next revised, and for future revisions beyond that, NIJ plans to maintain the superseded CPL for a period of 12-months after publication of the revised standard to enable agencies to complete purchasing actions initiated, but not completed, when the prior version of the standard was in effect.

Greg Ridgeway,
Acting Director, National Institute of Justice.

BILLING CODE 4410-18-P

DEPARTMENT OF JUSTICE

National Institute of Justice

[OJP (NIJ) Docket No. 1665]

**License Plate Reader Manufacturer
 Practical Assessment of Proposed
 Test Methods**

AGENCY: National Institute of Justice, Department of Justice.

ACTION: Notice of License Plate Reader Manufacturer Practical Assessment of Proposed Test Methods.

SUMMARY: The National Institute of Justice (NIJ) is inviting manufacturers of vehicle-mounted license plate reader (LPR) systems to participate in a practical assessment of the proposed test methods in the tentatively titled Vehicle-mounted License Plate Recognition Systems for Law Enforcement standard under development.

DATES: Manufacturers wishing to participate must register with the International Association of Chiefs of Police no later than Friday, August 8, 2014, as instructed below. Test evaluations will take place over two days, Tuesday, August 19, 2014, and Wednesday, August 20, 2014, with a rain date of Thursday, August 21, 2014, from 10:00 a.m. to 4:00 p.m. The test facility will be available for manufacturers to view the test setup and prepare their vehicles from 9:00 to 10:00 a.m.

ADDRESSES: *Location:* U.S. Customs and Border Protection Government Test Lane Facility (GTLF) in Fredericksburg, Virginia. Directions to the facility will be provided upon registration.

FOR FURTHER INFORMATION CONTACT: Manufacturers wishing to participate must register with the International Association of Chiefs of Police by August 8, 2014. To register for the LPR

manufacturer practical assessment, please contact Michael Fergus at fergus@theiacp.org.

For information about the NIJ Vehicle-mounted License Plate Recognition Systems for Law Enforcement under development, please contact Mark Greene, by telephone at (202) 307-3384 [Note: this is not a toll-free telephone number], or by email at mark.greene2@usdoj.gov. For general information about NIJ standards, please visit <http://www.nij.gov/standards> or <http://www.justnet.org/standards>.

SUPPLEMENTARY INFORMATION: The National Institute of Justice (NIJ) is inviting manufacturers of vehicle-mounted license plate reader (LPR) systems to participate in a practical assessment of the proposed test methods in the tentatively titled Vehicle-mounted License Plate Recognition Systems for Law Enforcement standard under development. The development of this draft NIJ standard is being facilitated by IACP with support from and in coordination with NIJ under cooperative agreement 2009-IJ-CX-K009. It contains several practical tests to determine the performance of vehicle-mounted LPR systems regarding four specific functions: detection of plates, capture of images of the plates, interpretation and conversion of images into alphanumeric data, and comparison of data with a list of specified license plates (e.g., a watch list). The tests are performed using license plates set up to mimic the different common parking configurations: parallel, perpendicular, and diagonal.

The practical assessment is primarily intended to allow LPR manufacturers to familiarize themselves with tests for vehicle-mounted LPR systems in the draft NIJ standard and develop any feedback regarding those tests. Manufacturers are invited to bring a vehicle equipped with a mobile LPR system to the U.S. Customs and Border Protection Government Test Lane Facility (GTLF) in Fredericksburg, Virginia. The assessment will take place over two days (see dates above). Manufacturers will be permitted to run through the test setups in an equitable fashion as time permits for the two days depending on the number of respondents to this notice.

Space is limited at the GTLF, and as a result, each manufacturer will only be allowed to bring one test vehicle. Neither NIJ nor IACP will collect any data from any manufacturer from the practical assessment. Manufacturers are encouraged to submit any feedback regarding the test methods as result of the two-day practical assessment during

the forthcoming public comment period for the draft NIJ standard tentatively titled Vehicle-mounted License Plate Recognition Systems for Law Enforcement.

Gregory K. Ridgeway,

Acting Director, National Institute of Justice.

BILLING CODE 4410-18-P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA-2014-043]

Meeting Notice: State, Local, Tribal, and Private Sector Policy Advisory Committee (SLTPS-PAC)

AGENCY: National Archives and Records Administration.

ACTION: Notice of Meeting of Advisory Committee.

SUMMARY: In accordance with the Federal Advisory Committee Act, as amended (5 U.S.C. appendix 2), the National Archives and Records Administration (NARA) announces a meeting of the State, Local, Tribal, and Private Sector Policy Advisory Committee (SLTP-PAC). The meeting will be held to discuss matters relating to the Classified National Security Information Program for State, Local, Tribal, and Private Sector Entities. The meeting will be open to the public.

DATES: The meeting will be held on July 23, 2014, from 10:00 a.m. to 12:00 noon.

ADDRESSES: National Archives and Records Administration, 700 Pennsylvania Avenue NW., Jefferson Room, Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT: Robert J. Skwirot, Senior Program Analyst, ISOO, National Archives Building, 700 Pennsylvania Avenue NW., Washington, DC 20408, by telephone at (202) 357-5398, or by email at robert.skwirot@nara.gov. Contact ISOO at ISOO@nara.gov.

SUPPLEMENTARY INFORMATION: This meeting will be open to the public. However, due to space limitations and access procedures, the name and telephone number of individuals planning to attend must be submitted to the Information Security Oversight Office (ISOO) no later than Friday, July 18, 2014. ISOO will provide additional instructions for gaining access to the location of the meeting.

Dated: July 7, 2014.

Patrice Little Murray,

Acting Committee Management Officer.

BILLING CODE 7515-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2014-0163]

Setpoints for Safety-Related Instrumentation

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory guide, request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing draft regulatory guide (DG), DG-1141, "Setpoints for Safety-Related Instruments" for public comment. This DG is proposed Revision 4 of Regulatory Guide (RG) 1.105, "Setpoints for Safety-Related Instrumentation." This DG describes proposed updates to the recommended practices and criteria for determining instrument setpoints and appropriate setpoint related criteria. This DG describes proposed practices and criteria that the staff of the NRC considers acceptable for demonstrating compliance with NRC requirements for ensuring that setpoints for safety related instruments are initially within, and should remain within, technical specification limits. This DG also proposes practices and criteria for establishing those technical specification limits and ensuring that those limits will adequately support the proper operation of the associated systems.

DATES: Submit comments by September 9, 2014. Comments received after this date will be considered if practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2014-0163. Address questions about NRC dockets to Carol Gallagher; telephone: 301-287-3422; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: 3WFN 06A-A44M, U.S. Nuclear

Regulatory Commission, Washington, DC 20555-0001.

For additional direction on accessing information and submitting comments, see “Accessing Information and Submitting Comments” in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Paul J. Rebstock, telephone: 301-251-7488, email: Paul.Rebstock@nrc.gov or Mark Orr, telephone: 301-251-7495, email: Mark.Orr@nrc.gov. Both of the Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information.

Please refer to Docket ID NRC-2014-0163 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document by any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2014-0163. Address questions about NRC dockets to Carol Gallagher; telephone: 301-287-3422; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may access publicly available documents online in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The draft regulatory guide is available electronically in ADAMS under Accession No. ML14149A361. The regulatory analysis may be found in ADAMS under Accession No. ML101820157.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC-2014-0163 in the subject line of your comment submission, in order to ensure that the NRC is able to make your

comment submission available to the public in this docket.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <http://www.regulations.gov> as well as enters the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC will not edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC's “Regulatory Guide” series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The DG, entitled, “Setpoints for Safety-Related Instrumentation” is temporarily identified by its task number, DG-1141. Draft regulatory guide, DG-1141 is proposed Revision 4 of RG 1.105. The DG describes practices and criteria that the staff of the NRC considers acceptable for compliance with NRC requirements for ensuring that setpoints for safety related instruments are initially within, and should remain within, technical specification limits. This DG also presents practices and criteria for establishing those technical specification limits and ensuring that those limits will adequately support the proper operation of the associated systems—that is, that establishing and maintaining setpoints in accordance with those limits will provide adequate assurance that a plant will operate as described in the plant safety analyses.

This revision continues to address concerns expressed in the previous revision of this regulatory guide. The previous revision addressed problems with setpoint uncertainty allowances

and setpoint discrepancies, which had led to a number of operational problems. This DG also addressed significant variability that had been observed in licensees' surveillance interval evaluations with regard to drift, setpoint methodology, and completeness. This DG enumerates a number of specific concerns in this area, observing that the listed concerns were resolved during the development of the 1994 version of ANSI/ISA-S67.04, Part 1-1994, “Setpoints for Nuclear Safety-Related Instrumentation.”

Copies of American National Standards Institute (ANSI)/International Society of Automation (ISA) Standard ANSI/ISA-S67.04, Part 1-1994 may be obtained through the ISA Web site at www.isa.org or by writing to the International Society of Automation, 67 T.W. Alexander Dr., P.O. Box 12277, Research Triangle Park, NC 27709, by email at info@isa.org, telephone: 919-549-8411, or fax at 919-549-8288

III. Backfitting and Issue Finality

This DG, if finalized, would not constitute backfitting as defined in 10 CFR 50.109 (the Backfit Rule) and would not otherwise be inconsistent with the issue finality provisions in 10 CFR part 52. As discussed in the “Implementation” section of this DG, the NRC has no current intention to impose this DG on holders of current operating licenses or combined licenses.

This DG, if finalized, may be applied to applications for operating licenses and combined licenses docketed by the NRC as of the date of issuance of the final RG, as well as future applications for operating licenses and combined licenses submitted after the issuance of the RG. Such action does not constitute backfitting as defined in 10 CFR 50.109(a)(1) or is otherwise inconsistent with the applicable issue finality provision in 10 CFR part 52, inasmuch as such applicants or potential applicants, with exceptions not applicable here, are not within the scope of entities protected by the Backfit Rule or the relevant issue finality provisions in 10 CFR part 52.

Dated at Rockville, Maryland, this 3rd day of July, 2014.

For the Nuclear Regulatory Commission.

Harriet Karagiannis,

Acting Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.

[FR Doc. 2014-16165 Filed 7-10-14; 8:45 am]

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 40–6563; NRC–2014–0164]

License Amendment Application; Mallinckrodt LLC**AGENCY:** Nuclear Regulatory Commission.**ACTION:** License amendment application; opportunity to request a hearing and to petition for leave to intervene.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has received an application from Mallinckrodt LLC (licensee) to amend NRC Source Materials License No. STB–401 to reduce the amount of its financial assurance for the remaining Columbium-Tantalum (C–T) decommissioning project activities occurring at the Mallinckrodt site in Hazelwood, Missouri from \$21,113,000 dollars to \$5,660,337.

DATES: A request for a hearing or petition for leave to intervene must be filed by September 9, 2014.

ADDRESSES: Please refer to Docket ID NRC–2014–0164 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods.

- Federal Rulemaking Web site: Go to <http://www.regulations.gov> and search for Docket ID NRC–2014–0164. Address questions about NRC dockets to Carol Gallagher; telephone: 301–287–3422; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- NRC's Agencywide Documents Access and Management System (ADAMS): You may obtain publicly available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this document (if that document is available in ADAMS) is provided the first time that a document is referenced. The license amendment application is available under ADAMS Accession No. ML14120A311.

- NRC's PDR: You may examine and purchase copies of public documents at

the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Yolande Norman, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: 301–415–7741; email: Yolande.Norman@nrc.gov.

SUPPLEMENTARY INFORMATION:**I. Introduction**

The NRC has received, by letter dated April 22, 2014, an application to amend Source Materials License No. STB–401, for the Columbium-Tantalum (C–T) decommissioning project at the Mallinckrodt site located in Hazelwood, Missouri (ADAMS Accession No. ML14120A311). Specifically, the licensee, Mallinckrodt LLC (Mallinckrodt), requests NRC approval to reduce its current financial assurance from \$21,113,000 dollars to \$5,660,337 and revise its Letter of Credit and Standby Trust Agreement that was originally established to cover both the Phase I and II Decommissioning Plans under License Conditions 18 and 20 (ADAMS Accession Nos. ML083150652, ML101620140). According to Mallinckrodt, the existing financial assurance is nearly four times greater than the current estimates for the outstanding decommissioning activities that need to be completed for the C–T decommissioning project.

The ultimate goal of the C–T decommissioning project is to remediate the radiological constituents associated with C–T production remaining at the site to the extent necessary to terminate license STB–401. Mallinckrodt elected to decommission the C–T project areas of the site in two phases. In Phase I, Mallinckrodt decommissioned the buildings and equipment to meet the NRC's unrestricted use release criteria stated in § 20.1402 of Title 10 of the *Code of Federal Regulations* (10 CFR). Phase I of the decommissioning project was completed in February 2007 (ADAMS Accession No. ML070530675). Phase II of the decommissioning project included the remediation of the building slabs and foundations, paved surfaces, and all subsurface material. Before the license can be terminated, NRC must determine, among other things, that the areas of the Mallinckrodt facility associated with the C–T project meets the NRC's unrestricted release criteria.

Mallinckrodt contends that the only outstanding work remaining is the NRC's review and approval of the Draft Final Status Survey Reports for the

Phase II remedial field work that has been completed. Mallinckrodt's revised estimate includes contractor and consulting fees for the preparation of the Final Status Survey reports and final approval by the NRC, as well as, oversight costs and contingency fees as prescribed by the NRC's regulatory guidance document, NUREG–1757, Vol. 3, Rev. 1, "Consolidated Decommissioning Guidance: Financial Assurance, Recordkeeping, and Timeliness" (ADAMS Accession No. ML12048A683).

II. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any person(s) whose interest may be affected by this action may file a request for a hearing and a petition to intervene with respect to issuance of the amendment to the subject facility operating license or combined license. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Agency Rules of Practice and Procedure" in 10 CFR Part 2. Interested person(s) should consult a current copy of 10 CFR 2.309, which is available at the NRC's PDR, located in One White Flint North, Room O1–F21 (first floor), 11555 Rockville Pike, Rockville, Maryland 20852. The NRC's regulations are accessible electronically from the NRC Library on the NRC's Web site at <http://www.nrc.gov/reading-rm/doc-collections/cfr/>. If a request for a hearing or petition for leave to intervene is filed within 60 days, the Commission or a presiding officer designated by the Commission or by the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel will rule on the request and/or petition. The Secretary or the Chief Administrative Judge of the Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.309, a petition for leave to intervene shall set forth, with particularity, the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted, with particular reference to the following general requirements: (1) The name, address, and telephone number of the requestor or petitioner; (2) the nature of the requestor's/petitioner's right under the Act to be made a party to the proceeding; (3) the nature and extent of the requestor's/petitioner's property, financial, or other interest in the proceeding; and (4) the possible

effect of any decision or order which may be entered in the proceeding on the requestor's/petitioner's interest. The petition must also set forth the specific contentions which the requestor/petitioner seeks to have litigated at the proceeding.

Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the requestor/petitioner shall provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion that support the contention and on which the requestor/petitioner intends to rely in proving the contention at the hearing. The requestor/petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the requestor/petitioner intends to rely to establish those facts or expert opinion. The petition must include sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the requestor/petitioner to relief. A requestor/petitioner who fails to satisfy these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing with respect to resolution of that person's admitted contentions, including the opportunity to present evidence and to submit a cross-examination plan for cross-examination of witnesses, consistent with NRC regulations, policies, and procedures. The Atomic Safety and Licensing Board will set the time and place for any prehearing conferences and evidentiary hearings, and the appropriate notices will be provided.

Petitions for leave to intervene must be filed no later than 60 days from the date of publication of this notice. Requests for hearing, petitions for leave to intervene, and motions for leave to file new or amended contentions that are filed after the 60-day deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i)-(iii).

A State, local governmental body, Federally-recognized Indian tribe, or agency thereof, may submit a petition to

the Commission to participate as a party under 10 CFR 2.309(h)(1). The petition should state the nature and extent of the petitioner's interest in the proceeding. The petition should be submitted to the Commission by September 9, 2014. The petition must be filed in accordance with the filing instructions in the "Electronic Submissions (E-Filing)" section of this document, and should meet the requirements for petitions for leave to intervene set forth in this section, except that under § 2.309(h)(2) a State, local governmental body, or Federally-recognized Indian tribe, or agency thereof does not need to address the standing requirements in 10 CFR 2.309(d) if the facility is located within its boundaries. A State, local governmental body, Federally-recognized Indian tribe, or agency thereof may also have the opportunity to participate under 10 CFR 2.315(c).

If a hearing is granted, any person who does not wish, or is not qualified, to become a party to the proceeding may, in the discretion of the presiding officer, be permitted to make a limited appearance pursuant to the provisions of 10 CFR 2.315(a). A person making a limited appearance may make an oral or written statement of position on the issues, but may not otherwise participate in the proceeding. A limited appearance may be made at any session of the hearing or at any prehearing conference, subject to the limits and conditions as may be imposed by the presiding officer. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission by September 9, 2014.

III. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including a request for hearing, a petition for leave to intervene, any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene, and documents filed by interested governmental entities participating under 10 CFR 2.315(c), must be filed in accordance with the NRC E-Filing rule (72 FR 49139; August 28, 2007). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of

the Secretary by email at hearing.docket@nrc.gov, or by telephone at 301-415-1677, to request (1) a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign documents and access the E-Submittal server for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a request or petition for hearing (even in instances in which the participant, or its counselor representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public Web site at <http://www.nrc.gov/site-help/e-submittals/getting-started.html>. System requirements for accessing the E-Submittal server are detailed in the NRC's "Guidance for Electronic Submission," which is available on the agency's public Web site at <http://www.nrc.gov/site-help/e-submittals.html>. Participants may attempt to use other software not listed on the Web site, but should note that the NRC's E-Filing system does not support unlisted software, and the NRC Meta System Help Desk will not be able to offer assistance in using unlisted software.

If a participant is electronically submitting a document to the NRC in accordance with the E-Filing rule, the participant must file the document using the NRC's online, Web-based submission form. In order to serve documents through the Electronic Information Exchange System, users will be required to install a Web browser plug-in from the NRC's Web site. Further information on the Web-based submission form, including the installation of the Web browser plug-in, is available on the NRC's public Web site at <http://www.nrc.gov/site-help/e-submittals.html>.

Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit a request for hearing or petition for leave to intervene. Submissions should be in Portable Document Format (PDF) in accordance with NRC guidance available on the NRC's public Web site at <http://www.nrc.gov/site-help/e-submittals.html>. A filing is considered complete at the time the documents are submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing

system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email notice confirming receipt of the document. The E-Filing system also distributes an email notice that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the documents on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before a hearing request/petition to intervene is filed so that they can obtain access to the document via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC Meta System Help Desk through the "Contact Us" link located on the NRC's public Web site at <http://www.nrc.gov/site-help/e-submittals.html>, by email to MSHD.Resource@nrc.gov, or by a toll-free call at 1-866-672-7640. The NRC Meta System Help Desk is available between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, Sixteenth Floor, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852, Attention: Rulemaking and Adjudications Staff. Participants filing a document in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the

reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket which is available to the public at <http://ehd1.nrc.gov/ehd/>, unless excluded pursuant to an order of the Commission, or the presiding officer. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or home phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. However, a request to intervene will require including information on local residence in order to demonstrate a proximity assertion of interest in the proceeding. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

Dated at Rockville, Maryland this 1st day of July 2014.

For the Nuclear Regulatory Commission.

Lydia Chang,

Acting Deputy Director, Decommissioning and Uranium Recovery Licensing Directorate, Division of Waste Management and Environmental Protection, Office of Federal and State Materials and Environmental Management Programs.

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2014-31 and CP2014-56; Order No. 2115]

New Postal Product

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing concerning an addition of Priority Mail Contract 83 to the competitive product list. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* July 15, 2014.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202-789-6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Introduction
- II. Notice of Commission Action

I. Introduction

In accordance with 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.*, the Postal Service filed a formal request and associated supporting information to add Priority Mail Contract 83 to the competitive product list.¹

The Postal Service contemporaneously filed a redacted

¹ Request of the United States Postal Service to Add Priority Mail Contract 83 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data, July 3, 2014 (Request).

contract related to the proposed new product under 39 U.S.C. 3632(b)(3) and 39 CFR 3015.5. *Id.* Attachment B.

To support its Request, the Postal Service filed a copy of the contract, a copy of the Governors' Decision authorizing the product, proposed changes to the Mail Classification Schedule, a Statement of Supporting Justification, a certification of compliance with 39 U.S.C. 3633(a), and an application for non-public treatment of certain materials. It also filed supporting financial workpapers.

II. Notice of Commission Action

The Commission establishes Docket Nos. MC2014-31 and CP2014-56 to consider the Request pertaining to the proposed Priority Mail Contract 83 product and the related contract, respectively.

The Commission invites comments on whether the Postal Service's filings in the captioned dockets are consistent with the policies of 39 U.S.C. 3632, 3633, or 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comments are due no later than July 15, 2014. The public portions of these filings can be accessed via the Commission's Web site (<http://www.prc.gov>).

The Commission appoints Lyudmila Y. Bzhilyanskaya to represent the interests of the general public (Public Representative) in this docket.

III. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket Nos. MC2014-31 and CP2014-56 to consider the matters raised in each docket.

2. Pursuant to 39 U.S.C. 505, Lyudmila Y. Bzhilyanskaya is appointed to serve as an officer of the Commission to represent the interests of the general public in these proceedings (Public Representative).

3. Comments are due no later than July 15, 2014.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

Shoshana M. Grove,

Secretary.

BILLING CODE 7710-FW-P

POSTAL REGULATORY COMMISSION

[Docket No. CP2014-9; Order No. 2114]

Amendment to Postal Product

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing concerning an amendment to Priority Mail Contract 70. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* July 14, 2014.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202-789-6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Introduction
- II. Notice of Filing
- III. Ordering Paragraphs

I. Introduction

On July 3, 2014, the Postal Service filed notice that it has agreed to an Amendment to the existing Priority Mail Contract 70 negotiated service agreement approved in this docket.¹ In support of its Notice, the Postal Service includes a redacted copy of the Amendment. Notice at 1.

The Postal Service also filed the unredacted Amendment under seal. *Id.* The Postal Service seeks to incorporate by reference the Application for Non-Public Treatment originally filed in this docket for the protection of information that it has filed under seal. *Id.*

The Amendment concerns the packages to which the contract applies and the locations from which the packages must originate. *Id.*, Attachment A at 1.

The Postal Service intends for the Amendment to become effective one business day after the date that the Commission completes its review of the Notice. Notice at 1. The Postal Service asserts that the Amendment will not impair the ability of the contract to comply with 39 U.S.C. 3633. *Id.*

II. Notice of Filing

The Commission invites comments on whether the changes presented in the Postal Service's Notice are consistent with the policies of 39 U.S.C. 3632, 3633, or 3642, 39 CFR 3015.5, and 39 CFR part 3020, subpart B. Comments are due no later than July 14, 2014. The public portions of these filings can be accessed via the Commission's Web site (<http://www.prc.gov>).

The Commission appoints Kenneth R. Moeller to represent the interests of the general public (Public Representative) in this docket.

III. Ordering Paragraphs

It is ordered:

1. The Commission reopens Docket No. CP2014-9 for consideration of matters raised by the Postal Service's Notice.

2. Pursuant to 39 U.S.C. 505, the Commission appoints Kenneth R. Moeller to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this proceeding.

3. Comments are due no later than July 14, 2014.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

Shoshana M. Grove,

Secretary.

BILLING CODE 7710-FW-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-72547; File No. SR-NYSEMKT-2014-56]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing of Proposed Rule Change Amending Rule 13—Equities To Make the Add Liquidity Only Modifier Available for Additional Limit Orders and Make the Day Time-In-Force Condition Available for Intermarket Sweep Orders

July 7, 2014.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 ("Act")² and Rule 19b-4 thereunder,³ notice is hereby given that on June 27, 2014, NYSE MKT LLC ("Exchange" or "NYSE MKT") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 13—Equities to make the Add Liquidity Only ("ALO") modifier available for additional limit orders and make the day time-in-force condition available for Intermarket Sweep Orders ("ISO"). The text of the proposed rule change is available on the Exchange's Web site at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included

¹ Notice of United States Postal Service of Amendment to Priority Mail Contract 70, July 3, 2014 (Notice).

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B and C below, of the most significant parts of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is proposing to amend Rule 13—Equities (“Rule 13”) to make the ALO modifier available for additional limit orders and make the day time-in-force condition available for ISOs.

ALO Modifier

The Exchange currently offers an ALO modifier for MPL Orders, which are undisplayed limit orders that execute at the mid-point of the protected best bid or offer (“PBBO”).⁴ Pursuant to paragraph (e) governing MPL Orders in Rule 13, an MPL–ALO Order will not execute upon arrival, even if marketable. The Exchange proposes to amend Rule 13 to make the ALO modifier available for day limit orders. The Exchange notes that all other equity exchanges already make available add-liquidity-only functionality for limit orders.⁵

To effect this change, the Exchange proposes to adopt a definition of ALO Modifier in Rule 13. Proposed paragraph (a) of this new definition would describe how an ALO Modifier impacts an order to which it is appended, which is the same functionality as the ALO modifier currently available for MPL Orders. Specifically, an order designated ALO does not route and will not remove liquidity from the Exchange’s book. Proposed paragraph (a) of the new definition would also state that ALO modifiers are available for MPL Orders,

⁴ See Rule 13 (Mid-Point Passive Liquidity (MPL) Order).

⁵ See BATS Exchange, Inc. (“BATS”) Rule 11.9(c)(6) (“BATS Post Only Order”); BATS Y-Exchange, Inc. (“BATS–Y”) Rule 11.9(c)(6) (“BATS Post Only Order”); Chicago Stock Exchange, Inc. (“CHX”) Article 20, Rule 4(b)(18) (“Post Only”); EDGA Exchange, Inc. (“EDGA”) Rule 11.5(c)(5) (“Post Only Order”); EDGX Exchange, Inc. (“EDGX”) Rule 11.5(c)(5) (“Post Only Order”); NASDAQ Stock Market LLC (“Nasdaq”) Rule 4751(f)(10) (“Post-Only Orders”); NASDAQ OMX BX LLC (“Nasdaq OMX BX”) Rule 4751(f)(10) (“Post-Only Orders”); NASDAQ OMX PHLX LLC (“Nasdaq OMX PSX”) Rule 3301(f)(11) (“Post-Only Orders”); and NYSE Arca Equities, Inc. (“NYSE Arca Equities”) Rule 7.31(nn).

as they are today, and for day limit orders.⁶ Because the behavior of MPL–ALO Orders is currently described in paragraph (e) for MPL Orders in Rule 13, the Exchange further proposes to cross-reference that rule text in the new definition for ALO Modifiers. Accordingly, the remainder of the proposed definition for ALO Modifier would describe the behavior of limit orders designated ALO.

The Exchange further proposes in new paragraph (a) of the new definition that limit orders designated ALO would be eligible to participate in the open or close, which would include Limit on Open or Limit on Close Orders, but that the ALO designation would be ignored. The Exchange’s opening and closing transactions are single-priced auction transactions and the Exchange does not consider either side of the transaction to be either a “provider” or a “taker.” Accordingly, an ALO modifier is moot for the open or close. In order to enable as much interest as possible to participate in the open or close, the Exchange proposes to include any limit orders designated ALO in these auctions, but to ignore the ALO designation.

To promote the display of liquidity, the Exchange further proposes that a limit order designated ALO must be entered with a minimum of one displayable round lot. Accordingly, the ALO Modifier would be available for Minimum Display Reserve Orders (Rule 13) and Minimum Display Reserve e-Quotes (Rule 70(f)(1)—Equities). The Exchange would reject incoming limit orders designated ALO that do not meet the minimum display requirement, including odd-lot sized orders designated ALO.

The Exchange proposes to specify in paragraph (c) to the new rule text that the following interest may not be designated ALO: (1) DMM interest entered via the Capital Commitment Schedule pursuant to Rule 1000—Equities; (2) d-Quotes, as defined in Rule 70.25—Equities; (3) Sell “Plus”—Buy “Minus” Orders as defined in Rule 13; (4) Non-Display Reserve Orders, as defined in Rule 13, or Non-Display Reserve e-Quotes, as defined in Rule 70(f)(ii)—Equities; or (5) Retail Orders or Retail Price Improvement Orders, as defined in Rule 107C—Equities.

⁶ Pursuant to Rule 13, a “Limit, Limited Order, or Limited Price Order” means an order to buy or sell a stated amount of a security at a specified price, or at a better price, if obtainable and a “Day Order” means an order to buy or sell which, if not executed, expires at the end of the 9:30 a.m. to 4:00 p.m. trading session on the day on which it was entered.

To assure that a limit order designated ALO meets its goal to be available on the Exchange’s book to add liquidity to arriving orders, the Exchange proposes to re-price a limit order designated ALO that upon arrival would be marketable against Exchange interest or would lock or cross a protected quotation in violation of Rule 610(d) of Regulation NMS.⁷ Accordingly, the Exchange proposes to specify in paragraph (b) to the rule text for ALO Modifiers that if, at the time of entry, a limit order designated ALO is marketable against Exchange interest or would lock or cross a protected quotation in violation of Rule 610(d) of Regulation NMS, the order would be re-priced and displayed one minimum price variation, as defined in supplementary material to Rule 62—Equities, below the best-priced sell interest (for bids) or above the best-priced buy interest (for offers). The Exchange notes that re-pricing a limit order designated ALO so that it would not execute against resting Exchange interest or lock or cross a protected quotation is consistent with how other equities markets currently operate.⁸

The Exchange proposes to use the term “Exchange interest” in the proposed rule text in order to include both displayed interest and non-displayed interest (i.e., Non-Displayed Reserve Orders or odd-lot sized orders), which may be priced better than the displayed quote. In addition, the Exchange proposes to add new Supplementary Material .10 to Rule 13 to define new terms to capture the best price among Exchange displayed and non-displayed interest and the best away protected quote. As proposed, the term “best-priced sell interest” would refer to the lowest-priced sell interest against which incoming buy interest would be required to execute with and/or route to, including Exchange displayed offers, Non-Display Reserve Orders, Non-Display Reserve e-Quotes, odd-lot sized sell interest, and protected offers on away markets, but would not include non-displayed interest that is priced based on the PBBO, such as MPL Orders or Retail Price Improvement Orders (“RPI”). The term “best-priced buy interest” would refer to the highest-priced buy interest against which incoming sell interest would be required to execute with and/or route to, including Exchange displayed bids, Non-Display Reserve Orders, Non-

⁷ 17 CFR 242.610(d).

⁸ See BATS Rules 11.9(c)(6) and 11.9(g)(2)(D); BATS–Y Rules 11.9(c)(6) and 11.9(g)(2)(D); CHX Article 20, Rule 4(b)(25) (“CHX Only”); EDGA Rule 11.5(c)(5); EDGX Rule 11.5(c)(5); Nasdaq Rule 4751(f)(10); and NYSE Arca Equities Rule 7.31(mm) (PNP Blind order combined with an ALO order).

Display Reserve e-Quotes, odd-lot sized buy interest, and protected bids on away markets, but would not include non-displayed interest that is priced based on the PBBO, such as MPL Orders or RPIs. The Exchange believes it is appropriate to exclude MPL Orders from the definition of best-priced sell/buy interest because the price at which an MPL Order is eligible to execute changes as the PBBO moves.

As further proposed, if the best-priced sell interest is re-priced higher, an order to buy designated ALO would be re-priced and re-displayed higher, up to its limit price. If the best-priced buy interest is re-priced lower, an order to sell designated ALO would be re-priced and re-displayed lower, down to its limit price. The Exchange believes that re-pricing and re-displaying limit orders designated ALO each time the best-priced sell interest is priced higher (for bids) or the best-priced buy interest is priced lower (for offers) would ensure that the order is displayed at its most aggressive price without requiring the order to either take liquidity or lock or cross a protected quotation.

In addition, as proposed, a limit order designated ALO would not be re-priced if it is displayed at its limit price or if the best-priced sell interest moves down in price (for limit orders to buy designated ALO) or if the best-priced buy interest moves up in price (for limit orders to sell designated ALO). Once an order reaches its limit price, the Exchange would no longer need to re-price it. The Exchange also would not need to re-price a limit order designated ALO if the best-priced sell interest moves down (for bids) or the best-priced buy interest moves up (for offers) because in such scenario, the limit order designated ALO would have been displayed first at that price and the opposite-side bid or offer would be required to execute with or route to the resting limit order designated ALO.

For example, assume the Exchange best bid and offer ("BBO") in XYZ is 10.05 x 10.11, the PBBO is 10.05 x 10.09, and the Exchange has a non-displayed odd-lot sell order priced at 10.07. In this scenario, the best-priced sell interest, as defined in new supplementary material .10 to Rule 13, would be 10.07. Accordingly, if the Exchange were to receive a limit order to buy designated ALO at 10.12 ("Order A"), the Exchange would re-price and display Order A at \$10.06, which is one MPV below the 10.07 best-priced sell interest.

Assume now that the resting odd-lot order to sell on the Exchange is either executed or cancelled, but the Exchange best offer and PBO does not change.

Because the new best-priced sell interest is the away-market PBO of 10.09, Order A would re-price and re-display to 10.08, which is one MPV below the updated best-priced sell interest.

Assume further that the market updates so that both the Exchange's BBO and the PBBO update to 10.08–10.14 and there is no undisplayed interest to sell at the Exchange. Order A would be re-priced and re-displayed at its limit price of 10.12. At this point, because it has been displayed at its limit price, Order A would not be subject to any further re-pricing. If the Exchange were to receive incoming sell interest marketable against Order A, Order A would be available liquidity to execute against that incoming sell interest.

As further proposed, a limit order designated ALO would receive a new time stamp each time it is re-priced and re-displayed. The Exchange believes that providing a new time stamp each time a limit order designated ALO is re-priced and re-displayed is consistent with current Exchange rules that provide that an order that is modified to change the price of the order shall receive a new time stamp.⁹

As noted above, limit orders designated ALO would not be priced based on resting opposite-side MPL Orders, which are triggered to trade at the midpoint of the PBBO by arriving interest. To assure that limit orders designated ALO would not trigger an opposite-side MPL Order to trade, the Exchange proposes to add new paragraph (d) governing ALO Modifiers in Rule 13 to specify that a limit order designated ALO would not trigger a contra-side MPL Order to trade. The Exchange proposes to make a conforming change to paragraph (a) governing MPL Orders in Rule 13 to specify that an incoming limit order designated ALO would not interact with an MPL Order.

For example, assume the Exchange BBO and PBBO in XYZ is 10.05–10.09 and there is a sell MPL Order eligible to execute at the midpoint of the PBBO, which would be 10.07. Assume further that the Exchange also has a Non-Display Reserve Order to sell priced at 10.08. In this scenario, an incoming buy order designated ALO priced at 10.11 ("Order B") would re-price and display one MPV below the best-priced sell interest, which is 10.08. Accordingly, Order B would display at 10.07. Although the new 10.07 bid is at the same price that the resting MPL Order could have executed when the PBBO was 10.05 x 10.09, because the new bid updates the PBBO to 10.07 x 10.09, the

MPL Order is now eligible to execute at 10.08 and no longer at 10.07.

Because pegging interest may be designated ALO, the Exchange proposes to amend the rules governing pegging interest in Rule 13 to take into consideration how an ALO Modifier would function with pegging interest. As proposed in paragraph (c) governing pegging interest in Rule 13, pegging interest to buy (sell) that is designated ALO would not peg to a price that would result in its executing before displaying and shall instead peg one minimum price variation below (above) the undisplayed Exchange sell (buy) interest against which it would have otherwise executed. For example, assume the Exchange BBO is 10.05 x 10.10 and the PBBO is 10.08 x 10.10 and the Exchange has sell odd-lot interest priced at 10.08. Assume further incoming pegging interest to buy designated ALO with a limit of 10.10 arrives ("Order C"). If Order C were not designated ALO, it would peg to the PBB of 10.08 and execute against the resting odd-lot interest, and any remainder would be displayed at 10.08. As proposed, with the ALO designation, to assure that Order C would not execute on arrival, it would peg to a price one MPV below the 10.08 odd-lot sell interest and display at 10.07.

Day Time-in-Force Designation for ISOs

An ISO is currently defined in Rule 13 as a limit order designated for automatic execution that meets the following requirements: (i) it is identified as an ISO in the manner prescribed by the Exchange; and (ii) simultaneously with the routing of an ISO to the Exchange, one or more additional limit orders, as necessary, are routed to execute against the full displayed size of any protected bid, in the case of a limit order to sell, or the full displayed size of any protected offer, in the case of a limit order to buy and these additional orders are identified as ISOs. This definition is based on the definition of an ISO set forth in Regulation NMS Rule 600(b)(30),¹⁰ and is consistent with similar provisions on other exchanges.¹¹

Currently, the Exchange immediately and automatically executes an ISO upon arrival and the portion not so executed will be immediately and automatically

¹⁰ 17 CFR 242.600(b)(30).

¹¹ See BATS Rule 11.9(d); BATS–Y Rule 11.9(d); CHX Article 20, Rule 4(b)(1) and (15); EDGA Rule 11.5(d); EDGX Rule 11.5(d); Nasdaq Rule 4751(f)(6); Nasdaq OMX BX Rule 4751(f)(6); Nasdaq OMX PSX Rule 3301(f)(6); and NYSE Arca Equities Rule 7.31(jj).

⁹ See Rule 72(xii)—Equities.

cancelled.¹² Accordingly, the Exchange treats all ISOs with an immediate-or-cancel time-in-force condition.

Other equities exchanges do not limit their ISOs to an immediate-or-cancel time-in-force condition.¹³ Accordingly, the Exchange proposes to amend Rule 13 governing ISOs to make available an ISO Order with a day time-in-force condition. As proposed, an ISO designated day (“Day ISO”), if marketable upon arrival, would be immediately and automatically executed against the displayed bid (offer) up to its full size in accordance with and to the extent provided by Rules 1000—Equities- 1004—Equities and would then sweep the Display Book,[®] as provided in Rule 1000—Equities(d)(iii). This proposed rule text is consistent with current paragraph (b) governing ISOs in Rule 13.

The Exchange further proposes to provide that the remaining unexecuted portion of a Day ISO would be posted to the Exchange’s book at its limit price and may lock or cross a protected quotation that was displayed at the time of arrival of the Day ISO. The Exchange believes this proposed rule text is consistent with Regulation NMS and the rules of other exchanges because the member organization that sent the Day ISO to the Exchange has an existing obligation (pursuant to paragraph (a)(ii) governing ISOs in Rule 13) to simultaneously route ISOs to trade with the full size of protected quotations on other markets.¹⁴ Accordingly, the Exchange would consider any protected quotes that existed at the time of arrival of the Day ISO as cleared when it posts any remainder of a Day ISO to the Exchange’s book.¹⁵

The Exchange further proposes that a Day ISO must be entered with a minimum of one displayable round lot. Accordingly, similar to the proposed ALO Modifier for limit orders, Day ISOs would be available for Minimum

Display Reserve Orders and Minimum Display Reserve e-Quotes. The Exchange also proposes that a Day ISO may also be designated ALO.

Because Day ISOs would not route, which is similar to the proposed ALO Modifier functionality, the Exchange proposes to re-price and re-display resting Day ISOs in a manner consistent with the proposed re-pricing and re-displaying functionality described above for limit orders designated ALO. As proposed, if, after posting, a Day ISO would lock or cross a protected quotation, the Exchange would re-price and re-display the order consistent with proposed paragraph (b) for ALO Modifiers in Rule 13. Accordingly, any such re-pricing would be based on the best-priced sell interest (for bids) or best-priced buy interest (for offers), as proposed in new Supplementary Material .10 to Rule 13.

The Exchange further proposes that a Day ISO designated ALO that is marketable upon arrival would follow a combination of both the Day ISO and ALO rules. Specifically, the Day ISO element of this order would be permitted to trade through away market protected quotations on arrival and lock or cross a protected quotation. In addition, the ALO element would require that this order not result in taking liquidity. Accordingly, the Exchange proposes that if a Day ISO designated ALO is marketable against Exchange interest on arrival, it would be re-priced and displayed one minimum price variation, as defined in supplementary material to Rule 62—Equities, below the Exchange’s best-priced displayed or non-displayed non-MPL Order sell interest (for bids) or above the best-priced Exchange displayed or non-displayed non-MPL Order buy interest (for offers). Any re-pricing and display on arrival would ignore away-market protected quotations. As further proposed, once a Day ISO designated ALO has been posted to the Exchange’s book, to assure that any subsequent re-pricing and re-displaying of a Day ISO designated ALO does not lock or cross a protected quotation, the Exchange proposes to follow the re-pricing rule set forth in proposed paragraph (b) for ALO Modifiers in this Rule. Therefore, any subsequent re-pricing would be based on the best-priced sell interest (for bids) or best-priced buy interest (for offers), as proposed in new Supplementary Material .10 to Rule 13.

For example, assume the BBO in XYZ is 10.05 x 10.11, the PBBO is 10.05 x 10.09, and the Exchange has a resting odd-lot order to sell priced at 10.07. In this scenario, the best-priced sell

interest, as defined in new supplementary material .10 to Rule 13, would be 10.07. If the Exchange were to receive a Day ISO to buy at 10.12 (“Order D”), the Exchange would execute Order D against the resting odd-lot order to sell at 10.07, ignore the best protected offer of 10.09, and execute against the Exchange’s best offer of 10.11. If there were any remaining quantity of Order D, it would post at 10.12. Although this 10.12 bid would cross the 10.09 PBO, the Exchange would consider that 10.09 PBO cleared pursuant to the existing obligation for the entering firm to have sent an ISO to trade with the full size of that PBO simultaneous with entering Order D at the Exchange.

Assume instead that the Day ISO to buy at 10.12 is also designated ALO (“Order E”). In this scenario, upon arrival, Order E would be re-priced and displayed at 10.06, which is one MPV below the Exchange’s best priced non-displayed interest. Assume instead that the Exchange receives a Day ISO designated ALO to buy at 10.12 (“Order F”), but that when Order F arrives, the BBO is 10.05 x 10.11, the PBBO is 10.05 x 10.09, and the Exchange has no non-displayed sell interest. In this scenario, the Exchange would ignore the 10.09 PBO and Order F would be re-priced and displayed at 10.10, which is one MPV below the Exchange’s best-priced displayed offer of 10.11. Assume the market updates and the BBO becomes 10.10 x 10.14 and the PBBO is 10.10 x 10.12. Order F would re-price and re-display one MPV below the best-priced sell interest, which here would be the 10.12 PBO. Accordingly, Order F would re-price and re-display at 10.11.

The Exchange also proposes to add new paragraph (e) governing ISOs in Rule 13 to specify that IOC ISOs and Day ISOs are not available for Sell “Plus”—Buy “Minus” Orders or Non-Display Reserve Orders or Non-Display Reserve e-Quotes.

Finally, the Exchange proposes non-substantive changes to paragraph (a) defining ISOs to provide more detail regarding the current operation of ISOs, consistent with existing NYSE Arca Rule 7.31(jj). As proposed, the Exchange would define an ISO as a limit order designated for automatic execution in a particular security that is never routed to an away market, may trade through a protected bid or offer, and will not be rejected or cancelled if it would lock, cross, or be marketable against an away market provided that it meets the requirements described in the rule. The Exchange also proposes to make non-substantive, technical amendments to define the term “Intermarket Sweep

¹² See paragraph (b) governing ISOs in Rule 13.

¹³ The rules of Nasdaq, BATS, BATS-Y, EDGA, and EDGX do not expressly provide that their versions of ISOs can be day, however, nor do their rules prohibit this functionality. In practice, Nasdaq, BATS, BATS-Y EDGA, and EDGX all accept ISOs with a day time-in-force condition. In addition, NYSE Arca Equities expressly permits an ISO with a day time-in-force condition, which is entered as a Post No Preference (“PNP”) Order. See, e.g., NYSE Arca Equities Rule 7.31(w) (PNP Order designated ISO does not route and may lock and cross and trade through protected quotations). See also Securities Exchange Act Release No. 34-54549 (Sept. 29, 2006), 71 FR 59179 (Oct. 6, 2006) (SR-NYSEArca-2006-59) (Order approving NYSE Arca Equities’ proposal to adopt ISO PNP Orders, which post to NYSE’s Arca book and may lock or cross protected quotations). See also CHX Article 20, Rules 4(b)(1) and (23).

¹⁴ See *supra* n. 11.

¹⁵ See *supra* n. 13.

Order” as “ISO” and change references from “Intermarket Sweep Order” to “ISO.” The Exchange further proposes a non-substantive, technical change to define the existing form of an ISO as an “ISO designated IOC (‘IOC ISO’).”

Because of the technology changes associated with this proposed rule change, the Exchange proposes to announce the implementation date of ALO Modifiers for day limit orders and Day ISOs by Trader Update.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b)¹⁶ of the Act, in general, and furthers the objectives of Section 6(b)(5),¹⁷ in particular, in that it is designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes that the proposal is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system because the expansion of the availability of ALO Modifiers for day limit orders will increase competition, not only among market participants, but also among exchanges offering similar functionality. Specifically, all other equity exchanges currently enable member firms to enter limit orders that would only post on the designated exchange and not route.¹⁸ The Exchange proposes to expand its existing ALO functionality, consistent with other markets, to also make it available for limit orders. The Exchange believes that requiring limit orders designated ALO to be entered with a minimum display quantity will help perfect the mechanism of a free and open market by encouraging additional displayed liquidity on a public registered exchange, and therefore promote price discovery. The Exchange further believes that the proposed re-pricing and re-displaying of a limit order designated ALO removes impediments to and perfects the mechanism of a free and open market because it assures that such an order would meet its intended goal to be available on the Exchange’s book as displayed liquidity without locking or crossing a protected quotation in violation of Rule 610(d) of Regulation NMS.¹⁹ The Exchange further notes that the proposed re-pricing and re-

displaying of limit orders designated ALO is consistent with how other exchanges currently operate.²⁰

The Exchange also believes that adding a day time-in-force condition for ISOs, an existing order type on the Exchange, is designed to remove impediments to and perfect the mechanism of a free and open market and national market system because the proposed expansion is consistent with the definition of an ISO under Regulation NMS²¹ and with the operation of how ISOs may be entered on other exchanges, including that it may trade through protected quotations on arrival and display on the Exchange at a price that may lock or cross a protected quotation.²² The Exchange further believes that any subsequent re-pricing and re-displaying of a Day ISO after it has posted on the Book will meet the entering firm’s expectations that a Day ISO order not route, while at the same time ensure that it would not lock or cross a protected quotation in violation of Rule 610(d) of Regulation NMS.²³

(B) Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, the Exchange believes that the proposed rule change is pro-competitive because it expands the functionality associated with existing Exchange order types to conform to how these order types already operate on other exchanges, thereby harmonizing the forms of order types available for market participants that trade on equity exchanges.²⁴

(C) Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

²⁰ See *supra* n. 8.

²¹ 17 CFR 242.600 (b)(3) and *supra* n. 11.

²² See *supra* n. 13, 71 FR at 59181 (“If an ISO is not marked as ‘immediate or cancel,’ any remaining balance in the order would be displayed by the Exchange without regard to whether that display would lock or cross another market center, only if the participant routing the order has already sent an order to satisfy the quotations of other markets so that the display of the order would not lock or cross those markets.”) and at 59182 (approving, among other things, NYSE Arca’s proposed ISO order type and finding that it is consistent with the Act).

²³ 17 CFR 242.610(d).

²⁴ See *supra*, nn. 5, 11, and 13.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s Internet comment form (<http://www.sec.gov/rules/sro.shtml>) or send an email to rule-comments@sec.gov. Please include File Number SR–NYSEMKT–2014–56 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEMKT–2014–56. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission’s Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for

¹⁶ 15 U.S.C. 78f(b).

¹⁷ 15 U.S.C. 78f(b)(5).

¹⁸ See *supra* n. 5.

¹⁹ 17 CFR 242.610(d).

inspection and copying at the NYSE's principal office and on its Internet Web site at www.nyse.com. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NYSEMKT-2014-56 and should be submitted on or before August 1, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁵

Kevin M. O'Neill,

Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-72549; File No. SR-NASDAQ-2014-069]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Modify NASDAQ Rule 7018 Fees

July 7, 2014.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on July 1, 2014, The NASDAQ Stock Market LLC ("NASDAQ" or the "Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

NASDAQ is proposing to modify NASDAQ Rule 7018 fees assessed for execution and routing securities listed on NASDAQ, the New York Stock Exchange ("NYSE") and on exchanges other than NASDAQ and NYSE.

The text of the proposed rule change is available at at NASDAQ's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NASDAQ included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

NASDAQ is proposing to amend NASDAQ Rule 7018 to modify fees assessed for execution and routing securities listed on NASDAQ, NYSE ("Tape A") and on exchanges other than NASDAQ and the NYSE ("Tape B"), as well as to make nonsubstantive changes to NASDAQ Rule 7018(a)(2) and (3) for the purposes of consistency in the manner that these subsections are organized within NASDAQ Rule 7018(a) and for improved clarity.

NASDAQ is also proposing to create a new credit tier of \$0.0025 per share executed for members that provide a daily average of at least 4 million shares of liquidity, which includes greater than 1.5 million shares per day of non-displayed liquidity, excluding midpoint orders. The Exchange believes that it does not need to include midpoint orders as part of this incentive as the Exchange has ample midpoint liquidity available for members to access. The Exchange believes that the proposed new fee tier will also encourage market participant activity and will also support price discovery and liquidity provision.

The Exchange also proposes to make nonsubstantive changes to NASDAQ Rule 7018(a)(2) and (3) for purposes of consistency in the manner in which these subsections are organized and for improved clarity. Specifically, the entry in these subsections for "firms that execute against resting midpoint liquidity" and its corresponding fee of \$0.0027 per share executed, have been moved-up within both NASDAQ Rule 7018(a)(2) and (3) verbatim so that within each subsection it will be properly situated as falling under the headings "Charge to enter orders that execute in the Nasdaq Market Center" and "Charge to member entering order

that executes in the Nasdaq Market Center", respectively.

2. Statutory Basis

NASDAQ believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,³ in general, and with Sections 6(b)(4) and 6(b)(5) of the Act,⁴ in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system which NASDAQ operates or controls, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. This proposal is reasonable, equitable and not unfairly discriminatory for the reasons noted below.

The Exchange's proposal for a new credit tier of \$0.0025 per share executed for members that provide a daily average of at least 4 million shares of liquidity, which includes greater than 1.5 million shares per day of non-displayed liquidity, excluding midpoint orders, is consistent with an equitable allocation of fees and is not unfairly discriminatory because it remains consistent with the Exchange's approach of providing a credit to members that provide shares of liquidity, which benefits all market participants, and is applicable to all such orders and applies uniformly across all markets. Also, the Exchange believes it is reasonable to use pricing incentives, such as a new tier, because this new tier provides additional opportunities for members to increase their participation in the market.

The Exchange also proposes to make nonsubstantive changes to NASDAQ Rule 7018. Specifically, under both NASDAQ Rule 7018(a)(2) and (3) the entry for "firms that execute against resting midpoint liquidity" and its corresponding fee of \$0.0027 per share executed, have been moved-up within each of these subsections verbatim so that within each subsection it will be properly situated as falling under the headings "Charge to enter orders that execute in the Nasdaq Market Center" and "Charge to member entering order that executes in the Nasdaq Market Center", respectively. These changes are intended to reflect greater consistency in the manner in which these subsections are organized within NASDAQ Rule 7018(a) and for improved clarity.

⁴ 15 U.S.C. 78f(b)(4) and (5).

²⁵ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

B. Self-Regulatory Organization's Statement on Burden on Competition

NASDAQ does not believe that the proposed rule changes will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.⁵ NASDAQ notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, NASDAQ must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, NASDAQ believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited. In this instance, the establishment of a new fee tier for members that provide a daily average of at least 4 million shares of liquidity, which includes greater than 1.5 million shares per day of non-displayed liquidity, excluding midpoint orders, reflects this.

Accordingly, NASDAQ does not believe that the proposed changes will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing change has become effective pursuant to Section 19(b)(3)(A) of the Act,⁶ and paragraph (f) ⁷ of Rule 19b-4, thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of

investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NASDAQ-2014-069 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-NASDAQ-2014-069. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NASDAQ-2014-069, and should be submitted on or before August 1, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁸

Kevin M. O' Neill,

Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-72546; File No. SR-Phlx-2014-40]

Self-Regulatory Organizations; NASDAQ OMX PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Eliminate the Midpoint Peg Post-Only Order and Modify the Minimum Quantity Order on NASDAQ OMX PSX

July 7, 2014.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on June 23, 2014, NASDAQ OMX PHLX LLC ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to eliminate the Midpoint Peg Post-Only Order and to modify the functioning of the Minimum Quantity Order on NASDAQ OMX PSX ("PSX"). The text of the proposed rule change is available at <http://nasdaqomxphlx.cchwallstreet.com/nasdaqomxphlx/phlx/>, at the Exchange's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The

⁵ 15 U.S.C. 78f(b)(8).

⁶ 15 U.S.C. 78s(b)(3)(A).

⁷ 17 CFR 240.19b-4(f).

⁸ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Phlx is proposing two modifications to order types on PSX. First, Phlx is proposing to eliminate the Midpoint Peg Post-Only Order. Like a regular Midpoint Pegged Order, a Midpoint Peg Post-Only Order is a non-displayed order that is priced at the midpoint between the national best bid and best offer ("NBBO"). However, like a Post-Only Order, the Midpoint Peg Post-Only Order does not remove liquidity from PSX upon entry if it would lock a non-displayed order on PSX. Rather, the Midpoint Peg Post-Only Order posts and locks the pre-existing order, but remains undisplayed. If a Midpoint Peg Post-Only Order would cross a pre-existing order, however, the crossing orders will execute. A Midpoint Peg Post-Only Order that posts to the book and locks a pre-existing non-displayed order executes against an incoming order only if the price of the incoming buy (sell) order is higher (lower) than the price of the pre-existing order. If a Midpoint Pegged Order and a Midpoint Peg Post-Only Order are locked, and a Midpoint Pegged Order is entered on the same side of the market as the Midpoint Peg Post-Only Order, the new order executes against the original Midpoint Pegged Order, because the market participant entering the Midpoint Peg Post-Only Order has expressed its intention not to execute against posted liquidity, and therefore cedes execution priority to the new order.

In a pricing environment characterized by fees on one side of a trade being used to fund rebates on the other side, the Midpoint Peg Post-Only Order and similar orders were introduced on PSX and various other markets to allow market participants to structure their trading activity in a manner that is more likely to avoid a fee and earn a rebate. In exchange, the party entering the order also generally provides price improvement to its counterparty. In order to simplify order processing and evaluate the effect of the order type on overall market quality, however, PSX is proposing to eliminate the Midpoint Peg Post-Only Order, while retaining the Midpoint Pegged Order as a means by which market participants may offer hidden liquidity

with price improvement at the midpoint between the NBBO.³

Phlx is also proposing to modify the functioning of PSX's Minimum Quantity Order. A Minimum Quantity Order is an order that will not execute unless a specified minimum quantity of shares can be obtained. Minimum Quantity Orders are not displayed, and upon entry must have a size and a minimum quantity condition of at least one round lot. In the event that the shares remaining in the size of the order following a partial execution thereof are less than the minimum quantity specified by the market participant entering the order, the minimum quantity value of the order is reduced to the number of shares remaining. Phlx is proposing to modify this final condition, so that if the shares remaining in the size of the order are less than one round lot, the minimum quantity condition will be removed from the order. The change will simplify processing of Minimum Quantity Orders by ensuring that once a partially executed order is reduced in size to less than one round lot (generally 100 shares), no restrictions prevent execution of the remainder of the order. The change is also consistent with the existing requirement that a Minimum Quantity Order must be entered with a size and a minimum quantity restriction of at least one round lot. Phlx believes that the change will improve the efficiency of order processing on PSX by limiting the extent to which small Minimum Quantity Orders remain on the PSX book.

Phlx proposes to implement the rule change on or shortly after a date that is thirty days after the date of this proposed rule change, and will notify members of the date of implementation through a widely disseminated notice.

2. Statutory Basis

Phlx believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,⁴ in general, and with Section 6(b)(5) of the Act,⁵ in particular, in that the proposal is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the

mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

Although the availability of the Midpoint Peg Post-Only Order is consistent with the Act because the order type was designed to provide market participants with better control over their execution costs and to provide a means to offer price improvement opportunities, Phlx believes that the elimination of the order type, together with the continued availability of the Midpoint Pegged Order are likewise consistent with the Act. Specifically, the proposal would allow market participants that seek to provide liquidity at the midpoint between the NBBO to use the Midpoint Pegged Order to do so. Accordingly, the change is designed to facilitate transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest, by reducing the complexity of order-type interaction on PSX while still allowing for liquidity provision with price improvement at the midpoint.

The proposed change to Minimum Quantity Orders is consistent with the Act because it will promote the complete execution of partially executed Minimum Quantity Orders once the order is reduced in size to less than one round lot. The change will thereby remove impediments to a free and open market by promoting order interaction and reducing the complexity of PSX's order processing.

B. Self-Regulatory Organization's Statement on Burden on Competition

Phlx does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. The change to eliminate the Midpoint Peg Post-Only Order will provide a means by which PSX may distinguish itself from trading venues that offer orders similar to the Midpoint Peg Post-Only Order. Accordingly, the change has the potential to promote competition by allowing PSX to differentiate itself from other trading venues. Similarly, the proposed change to the Midpoint Peg Post-Only Order and Minimum Quantity Orders has the potential to promote competition by enhancing the efficiency of PSX's processing of orders. In both instances, the changes would not affect the ability of market participants to avail themselves of alternative order-type

³ In addition to eliminating the order description from Rule 3301, Phlx is also making conforming changes to Rule 3305 and the NASDAQ OMX PHLX LLC Pricing Schedule.

⁴ 15 U.S.C. 78f.

⁵ 15 U.S.C. 78f(b)(5).

processing at other trading venues, and therefore would not impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act⁶ and subparagraph (f)(6) of Rule 19b-4 thereunder.⁷

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change, as amended, is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-Phlx-2014-40 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange

Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-Phlx-2014-40. This file number should be included on the subject line if email is used.

To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-Phlx-2014-40, and should be submitted on or before August 1, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁸

Kevin M. O'Neill,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-72550; File No. SR-OCC-2014-802]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of No Objection to Advance Notice Filing Concerning the Consolidation of the Governance Committee and Nominating Committee Into a Single Committee, Changes to the Nominating Process for Directors, and Increasing the Number of Public Directors on The Options Clearing Corporation's Board of Directors

July 7, 2014.

On May 8, 2014, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") advance notice SR-OCC-2014-802 ("Advance Notice") pursuant to Section 806(e)(1) of the Payment, Clearing, and Settlement Supervision Act of 2010 ("Clearing Supervision Act" or "Title VIII")¹ and Rule 19b-4(n)(1)(i) under the Securities Exchange Act of 1934 ("Exchange Act").² The Advance Notice was published for comment in the **Federal Register** on June 3, 2014.³ The Commission did not receive any comments on the Advance Notice publication. This publication serves as a notice of no objection to the Advance Notice.

I. Description of the Advance Notice

OCC is proposing to: (i) amend its By-Laws and Governance Committee Charter to combine the current Nominating Committee ("NC") and Governance Committee ("GC") to establish a single Governance and Nominating Committee ("GNC"), (ii) make changes concerning OCC's nomination process for Directors, and (iii) increase the number of Public Directors on OCC's Board of Directors ("Board") from three to five. The proposed modifications are based on recommendations from the GC in the course of carrying out its mandate of

¹ 12 U.S.C. 5465(e)(1).

² 17 CFR 240.19b-4(n)(1)(i). OCC is a designated financial market utility and is required to file advance notices with the Commission. See 12 U.S.C. 5465(e). OCC also filed the proposal contained in the Advance Notice as a proposed rule change under Section 19(b)(1) of the Exchange Act and Rule 19b-4 thereunder. See SR-OCC-2014-09. The Commission published notice of the proposed rule change in the **Federal Register** on May 30, 2014 and did not receive any comments on the proposal. See Exchange Act Release No. 34-72242 (May 23, 2014), 79 FR 31166 (May 30, 2014) (SR-OCC-2014-09).

³ Release No. 34-72268 (May 28, 2014), 79 FR 31998 (June 3, 2014) (SR-OCC-2014-802) ("Notice").

⁶ 15 U.S.C. 78s(b)(3)(a)(ii) [sic].

⁷ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

⁸ 17 CFR 200.30-3(a)(12).

reviewing the overall corporate governance of OCC and recommending improvements to the structure of OCC's Board. In part, the GC's recommendations stem from suggestions of an outside consultant that was retained to review and report on OCC's governance structure in relationship to industry governance practices. To conform to these proposed changes, OCC is also proposing to make certain edits to its Stockholders Agreement, Board of Directors Charter, and Fitness Standards for Directors.

Currently, the GC operates pursuant to its own Charter.⁴ The NC is not a Board level Committee and does not operate pursuant to a charter; however, provisions in Article III of OCC's By-Laws prescribe certain aspects of the NC's structure and operation. OCC is proposing to apply to the GNC many of the existing provisions of the relevant By-Laws and GC Charter that apply to the NC and GC. Where OCC is proposing amendments to the existing By-Laws and GC Charter, they are discussed below.

Certain provisions of Article III of OCC's By-Laws govern the role the NC plays in nominating persons as Member Directors⁵ on OCC's Board as well as the composition and structure of the NC itself. The NC is required to endeavor to achieve balanced representation in its Member Director and Non-Director Member nominees, giving due consideration to business activities and geographic distribution.

Presently, the NC is composed of seven total members: one Public Director and six Non-Director Members.⁶ The Public Director member, who is nominated by the Executive Chairman with the approval of a majority of the Board, generally serves a three year term, unless she ceases to be a Public Director. The six Non-Director Members nominated by the NC and selected by OCC's stockholders are divided into two equal classes of three members, and the classes serve staggered two year terms.⁷ By

comparison, the GC Charter requires the current GC to have no fewer than five directors and to include at least one Public Director, at least one Exchange Director, and at least one Member Director. It also provides that no Management Directors may serve on the Committee.

OCC's Board currently has 19 members consisting of nine Member Directors, five Exchange Directors, three Public Directors, and two Management Directors.⁸ Based on recommendations from the GC in the course of review of OCC's overall corporate governance, OCC is proposing certain amendments detailed below to merge OCC's NC and GC into a single GNC and increase the number of Public Directors from three to five.

A. Proposed Amendments Common to the By-Laws and Other OCC Governance Documents

Certain of the proposed changes would amend the existing By-Laws as well as other governance documents of OCC. For example, conforming edits would be made throughout the By-Laws and GC Charter to delete NC and GC references and in many cases those references would be replaced with references to the GNC.

1. GNC Composition

The new GNC would be composed of a minimum of three total members: at least one Public Director, at least one Exchange Director and at least one Member Director. To reflect this change, OCC would eliminate in Section 4 of Article III of the By-Laws the requirement for six Non-Director Members, add requirements for at least one Member Director and one Exchange Director, and modify the current requirement for one Public Director to instead require that there must be at least one Public Director. The proposed composition for the GNC already mirrors the existing composition specified in the GC Charter. Therefore, no changes are proposed to the current GC Charter in that respect, other than the elimination of the requirements that the GNC have no fewer than five directors. In its filing with the Commission, OCC stated that limitation would be eliminated with the goal of providing the Board with greater

members. Securities Exchange Act Release No. 29437 (July 12, 1991), 56 FR 33319 (July 19, 1991) (SR-OCC-91-11).

⁸ Public Directors may not be affiliated with any national securities exchange or national securities association or any broker or dealer in securities, and OCC's Executive Chairman and President, who are Management Directors. See OCC By-Laws Article III, Section 6A.

flexibility to determine the optimal size and composition of the GNC, so long as the composition also facilitates diverse representation by satisfying the proposed requirement for at least one GNC representative from each of the Member Director, Exchange Director, and Public Director categories. The prohibition on Management Directors serving on the GC would continue to apply to the GNC.

2. GNC Member Appointment Process and Term Limits

The members of the GNC would be appointed annually by the Board from among certain Board members recommended by the GNC after consultation with OCC's Executive Chairman. GNC Members would serve at the pleasure of the Board. The GNC's Chairman ("GNC Chair") would be designated from among the GNC's Public Directors. Provisions implementing these changes would be added to Section 4 of Article III of the By-Laws to entirely supplant the class and term limit structure and nominations process that currently applies to the NC and its Non-Director Members and Public Director, and references to Non-Director Members would be removed from the By-Laws. Section II.A. The GC Charter would also be amended to reflect this structure for GNC nominations and appointments.

3. Number of Public Directors and Member Directors

OCC is proposing to amend its By-Laws to increase the number of Public Directors on its Board from three to five. It is also making certain other changes related to the overall composition of the Board and the classification and term of office of Public Directors. The proposed change in the number of Public Directors from three to five would reconstitute OCC's Board with a total of 21 directors. OCC believes that, as indicated in its initial proposal to add Public Directors to its Board,⁹ Public Directors broaden the mix of viewpoints and business expertise that is represented on the Board. Accordingly, OCC believes that the input and expertise of two more Public Directors will further benefit OCC in the administration of its affairs in respect of the markets that it serves, and in the discharge of its obligations as a systemically important financial market utility.

The proposed changes would remove a provision that, under certain

⁹ Securities Exchange Act Release No. 30328 (January 31, 1992), 57 FR 4784 (February 7, 1992) (SR-OCC-1992-02).

⁴ Securities Exchange Act Release Nos. 71030 (Dec. 11, 2013), 78 FR 7612 (Dec. 16, 2013) (SR-OCC-2013-18); 71083 (Dec. 16, 2013), 78 FR 77182 (Dec. 20, 2013) (SR-OCC-2013-807).

⁵ Under Article III, Section 2 every Member Director must be either a Clearing Member or a representative of a Clearing Member Organization.

⁶ Under Sections 4 and 5 of Article III, a Non-Director Member of the NC must be a representative of a Clearing Member and no person associated with the same Clearing Member Organization as a member of the NC may be nominated by the NC for a position as a Member Director on the Board of Directors or a Non-Director Member of the NC for the ensuing year.

⁷ This tiered structure eliminated the complete turnover of the members of the NC each year and fostered greater continuity among its elected

conditions, automatically adjusts the number of Member Directors serving on the Board. OCC's By-Laws currently require that if the aggregate number of Exchange Directors and Public Directors equals at least nine, the total number of Member Directors must be automatically adjusted to exceed that number by one.¹⁰ This provision would be removed.¹¹ OCC believes that its removal will provide the Board with greater flexibility to determine its optimal composition. The proposed changes also remove a provision that reduces the number of Member Directors if the number is above nine and exceeds the sum of the number of Exchange Directors and the number of Public Directors by more than one, because the number of Member Directors would be fixed at nine.

OCC is also proposing certain amendments to its Stockholders Agreement, Board of Directors Charter and Fitness Standards for Directors, Clearing Members and Others. In each case, conforming changes would be made to recognize the merger of the NC and GC into the GNC as a standing Committee of the Board and reflect the role it would play in OCC's director nomination process. The proposed modifications to the Board Charter and Fitness Standards would reflect the increase in the number of Public Directors serving on the Board from three to five and the removal of the provision that currently is designed under certain conditions to automatically adjust the number of Member Directors serving on the Board. The criteria specified in the Fitness Standards for Directors, Clearing Members and Others for use in considering individuals nominated to be Member Director would also be revised for consistency with the criteria proposed to be added to Article III, Section 5 of the By-Laws, discussed below, designed to achieve balanced Board representation.

The Stockholders Agreement also contains proposed amendments to replace the term Chairman with Executive Chairman. This parallels a separate proposed amendment by OCC to implement this change in its By-Laws and Rules, but a consolidated amendment to the Stockholders Agreement is proposed for ease of administration.

¹⁰ OCC By-Laws Article III, Section 1.

¹¹ OCC also proposes to make corresponding changes to Article III, Section 3 of its By-Laws under which it would remove provisions that provide for the classification and term of office of Member Directors where the number of Member Directors increases based on the provision in Article III, Section 1 that OCC proposes to delete.

B. Proposed Amendments to By-Laws Only

As explained in more detail below, certain of the proposed changes would require amendments only to OCC's existing By-Laws. One such example is that Sections 2 and 5 of Article III of the By-Laws would be amended to remove prohibitions against representation of the same Clearing Member Organization on the Board and the NC.¹² This barrier would be eliminated since GNC members will be selected from among the members of the Board under the new approach.

1. Balanced Representation

The NC's responsibility to endeavor to achieve balanced representation among Clearing Members on the Board would be carried over to the GNC. Specifically, the GNC would be required to ensure that (1) not all of the Member Directors are from members having the largest volume of business with OCC during the prior year and (2) the mix of Member Directors includes members primarily engaged in agency trading on behalf of retail investors.

2. Nomination and Election Process

The Board would appoint members to the GNC from among the Board's members who are recommended by the GNC. This change requires certain proposed modifications to the nomination and election process currently reflected in Article III, Section 5 of the By-Laws. Changes are also proposed that would change the deadlines for nominations of Member Directors by both the GNC and Clearing Members, and OCC would preserve the petition process by which Clearing Members may nominate additional candidates to be Member Directors on the Board. In recognition of the elimination of the concept of Non-Director Members, several provisions in Section 5 of Article III of the By-Laws addressing the ability of stockholders to elect or nominate Non-Director Members of the NC would be deleted. In relevant part, however, these provisions would be retained to the extent they apply to the ability of stockholders under certain conditions to nominate and elect Member Directors of the Board.

3. Public Directors

Proposed changes to Section 6A of Article III of the By-Laws would require the GNC to nominate Public Directors for election by OCC's stockholders and

to use OCC's fitness standards in making such nominations. Presently, OCC's Executive Chairman nominates Public Directors with Board approval. Changes are also proposed to help clarify the class structure and term limits of Public Directors that are independent of changes proposed to facilitate the formation of the GNC.¹³

The proposed changes to Article III, Section 6A of the By-Laws would also provide for the classification of the two new Public Directors. One of the new Public Directors will be designated as a Class I Public Director, and the other will be designated as a Class III Public Director. The proposed changes also establish the times at which the successors of the two new Public Directors will be elected. The successor of the new Public Director that is a Class III Public Director will be elected at the 2015 annual meeting of stockholders, and the successor of the new Public Director that is a Class I Public Director will be elected at the 2016 annual meeting.

4. Disqualifications and Filling Vacancies and Newly Created Directorships

The disqualification provisions in Article III, Section 11 of the By-Laws would be revised to reflect that any determination to disqualify a director would be effective and result in a vacancy only if the GNC makes a recommendation for disqualification in addition to an affirmative vote for disqualification by a majority of the whole Board. The By-Laws currently provide that if a Member Director vacancy is filled by the Board, the person filling the vacancy will serve until the next scheduled election for the relevant class of Member Director and a successor is elected. However, if the term for that class of Member Director extends beyond the Board's next annual meeting the vacancy must be filled by a person who is recommended by the Nominating Committee. Proposed changes to these terms in respect of the GNC would require the Board in all cases to appoint a person who is recommended by the GNC. Similarly, Public Director vacancies would be required to be filled by the Board as generally provided for in Section 6A of

¹³ These changes would specify that, aside from the Class II Public Director who was elected to the Board at the 2011 annual meeting, two other Public Directors were appointed to the Board prior to its 2013 annual meeting, one designated as a Class I Public Director and the other designated as a Class III Public Director. Generally, the three year terms for Public Directors with staggered expiration for each class would be preserved; however, an exception would be added for the initial Class I and III Public Directors.

¹² A Clearing Member Organization is a Clearing Member that is a legal entity rather than a natural person.

Article III of the By-Laws, including with regard to candidates being nominated by the GNC using OCC's fitness standards for directors. Provisions concerning filling vacancies with respect to the NC would be deleted, consistent with its elimination in favor of the GNC.

5. Ministerial Changes

The proposed changes to Article III of the By-Laws also include certain ministerial changes. A reference to stockholder exchanges in the interpretation and policy to Section 6 would be replaced by the defined term Equity Exchanges, and a reference in Section 14 to notice by telegram would be changed to facsimile to reflect current means of communication.

C. Proposed Amendments to the GC Charter Only

Certain of the proposed amendments relating to the creation of the GNC would apply only to OCC's existing GC Charter. These amendments are discussed below.

1. GNC Purpose

The statement of purpose in the GC Charter would be revised to reflect the GNC's larger scope of responsibilities. The existing GC purpose of reviewing the overall corporate governance of OCC would be maintained, along with language clarifying that this review would be performed on a regular basis and that recommendations concerning Board improvements should be made when necessary. The GNC Charter would also provide that the GNC assists the Board in identifying, screening and reviewing individuals qualified to serve as directors and by recommending candidates to the Board for nomination for election at the annual meeting of stockholders or to fill vacancies. The GNC Charter would also specify that the GNC would develop and recommend to the Board, and oversee the implementation of, a Board Code of Conduct.

2. GNC Membership and Organization

The requirement in the GC Charter that the GC hold four meetings annually would be modified to also permit the GNC to call additional meetings as it deems appropriate.¹⁴ The GC Charter requirement for regular reporting to the Board on Committee activities by the GC chair or a designee would be revised in favor of placing the reporting responsibility solely on the GNC Chair and requiring the GNC Chair to make

timely reports to the Board on important issues discussed at GNC meetings. Taking into consideration certain pre-established guidelines in the GNC Charter, the GNC Chair would also be given responsibility for determining whether minutes should be recorded at any executive session. Aside from this exception for executive sessions, GNC meeting minutes would be required to be recorded. The GNC Charter would also create a position to be filled by an OCC officer who would assist the GNC and liaise between it and OCC's staff.

3. GNC Authority

As in the case of the existing GC, the GNC would have authority to inquire into any matter relevant to its purpose and responsibilities in the course of carrying out its duties. The GNC Charter would further specify that in connection with any such inquiry the GNC would have access to all books, records, facilities and personnel of OCC. Unlike the existing GC Charter, the GNC Charter would not provide express authority for the GNC to rely on members of OCC's management for assistance. Instead, this relationship between the GNC and OCC's management would be more specifically addressed through the role of the newly created staff liaison position. Additional revisions to the GC Charter would also establish that the GNC Chair would not have discretion to take unilateral action on behalf of the Committee, even in special circumstances.

4. Board Composition

Without limiting the GNC to particular activities, the GNC Charter would specify certain responsibilities meant to guide the GNC in achieving its purposes, including with respect to its role in the development of the Board's composition. The GNC's Charter would require it to pursue development of a Board comprised of individuals who have a reputation for integrity and represent diverse professional backgrounds as well as a broad spectrum of experience and expertise. The GNC Charter would also prescribe more detailed responsibilities designed to further this goal. For example, the GNC would be required to conduct periodic reviews of the composition of the Board against the goal, including whether the Board reflects the appropriate balance of types of directors, business specialization, technical skills, diversity and other qualities.¹⁵

The GNC would be required to recommend policies and procedures to the Board for identifying and reviewing Board nominee candidates, and it would implement and oversee the effectiveness of those policies, including with regard to criteria for Board nominees. Using criteria approved by the Board, the GNC would identify, screen and review persons who it determines are qualified to serve as directors. This process would also extend to incumbent directors concerning any potential re-nomination. In all cases, the GNC would only recommend candidates to the Board for nomination for election after consulting with OCC's Executive Chairman.

In the event that a sitting director offers to resign because of a change in occupation or business association, the GNC would be responsible for reviewing whether continued service is appropriate and making a recommendation of any action, consistent with OCC's By-Laws and Rules, that should be taken by the Board. The GNC would also undertake periodic reviews of term limits for certain directors and recommend changes to these limits where appropriate.

5. Governance Practices

The GNC would have responsibility for reviewing the Board's Charter for consistency with regulatory requirements, transparency of the governance process and other sound governance practices. Currently, this is a GC function, and certain GC Charter amendments are proposed to help further detail the GNC's review responsibilities. These include a general responsibility to recommend changes, as the GNC deems appropriate, to the Board concerning Committee Charters. This would include the GNC Charter, which the GNC would be required to review annually.¹⁶ In connection with a periodic review of Board Committee structure, the GNC would advise the Board regarding related matters of structure, operations and charters. Furthermore, and in each case after consultation with OCC's Executive Chairman, the GNC would recommend to the Board for its approval certain directors for Committee service as well as for assignment as Committee chair persons.

The GNC would develop and recommend to the Board the annual process used by the Board and Board Committees for self-evaluation of their

¹⁴ This would bring the Governance and Nominating Committee Charter in line with the Charters of OCC's other Board Committees.

¹⁵ The GNC would also review director conflicts of interest and the manner in which any such conflicts are to be monitored and resolved.

¹⁶ As part of the annual review, the GNC would also submit the GNC Charter to the Board for re-approval, including any changes the GNC deems advisable.

role and performance in the governance of OCC. The GNC would also be responsible for coordinating and providing oversight of that process. Corporate governance principles applicable to OCC would be developed by the GNC for recommendation to the Board, and the GNC would review them at least once a year.

6. Other Proposed GC Charter Amendments

The GNC Charter would require the GNC to regularly evaluate its performance and the performance of its individual members and provide results of such assessments to the Board. It would also require an annual report to be prepared by the GNC and delivered to the Board regarding the GNC's activities for the preceding year, and the GNC would be required to include a statement that it carried out all of its GNC Charter responsibilities. In addition to such responsibilities, the GNC would generally be empowered to perform any other duties that it deems necessary or appropriate and consistent with the GNC Charter or as may otherwise be further delegated to it by the Board.

II. Discussion and Commission Findings

Although Title VIII does not specify a standard of review for an advance notice, the Commission believes that the stated purpose of Title VIII is instructive.¹⁷ The stated purpose of Title VIII is to mitigate systemic risk in the financial system and promote financial stability by, among other things, promoting uniform risk management standards for systemically-important financial market utilities ("FMUs") and strengthening the liquidity of systemically important FMUs.¹⁸

Section 805(a)(2) of the Clearing Supervision Act¹⁹ authorizes the Commission to prescribe risk management standards for the payment, clearing, and settlement activities of designated clearing entities and financial institutions engaged in designated activities for which it is the supervisory agency or the appropriate financial regulator. Section 805(b) of the Clearing Supervision Act²⁰ states that the objectives and principles for the risk management standards prescribed under Section 805(a) shall be to:

- Promote robust risk management;
- promote safety and soundness;

- reduce systemic risks; and
- support the stability of the broader financial system.

The Commission has adopted risk management standards under Section 805(a)(2) of the Clearing Supervision Act²¹ ("Clearing Agency Standards").²² The Clearing Agency Standards became effective on January 2, 2013 and require registered clearing agencies that perform central counterparty ("CCP") services to establish, implement, maintain, and enforce written policies and procedures that are reasonably designed to meet certain minimum requirements for their operations and risk management practices on an ongoing basis.²³ As such, it is appropriate for the Commission to review advance notices against these Clearing Agency Standards and the objectives and principles of these risk management standards as described in Section 805(b) of the Clearing Supervision Act.²⁴

The proposed changes in the Advance Notice may result in changes that will improve OCC's overall risk management process, and therefore may promote robust risk management. A Board-level committee likely will be in a better position to make well-informed nomination decisions. Members of the GNC will themselves be members of the Board, and, thus, have personal insight and experience into the types of experience and credentials that would be useful on the Board and be better able to assess the current needs of the Board. A Board comprised of Directors with more relevant skills and credentials that are better able to evaluate OCC's risks may promote more robust risk management.

Adding two Public Directors to the Board and eliminating the provision which ensured the number of Member Directors would outnumber the combined number of Exchange and Public Directors by one may also result in improved risk management processes and therefore may promote robust risk management. Additional emphasis on Public Directors may result in more independent views on the risks OCC

presents being brought to the Board's attention for discussion and management of those risks. Moreover, the combined GNC and the additional emphasis on Public Directors should also aid in identifying any risks and inefficiencies in the current governance structure and making recommendations to the full Board to help mitigate those risks and eliminate any such inefficiencies.

The GNC's periodic reviews of the composition of the Board, including whether the Board reflects the appropriate balance of types of directors, business specialization, technical skills, diversity and other qualities, may help the GNC achieve balanced representation and a diversity among Member Directors. Maintaining balanced representation and having diversity among Member Directors may help the Board better evaluate and identify the risks OCC presents, and improve overall risk management.

In addition, the changes proposed in the Advance Notice may reduce OCC's contribution to systemic risk because they enhance the transparency of OCC's governance arrangements. The Commission believes that providing additional insight into OCC's governance arrangements may have this effect by allowing Members and other market participants to better assess risks at OCC, to comment on OCC's operations, and otherwise to advocate for improved overall risk management.

Commission Rule 17Ad-22(d)(8), adopted as part of Clearing Agency Standards, requires that a registered clearing agency establish, implement, maintain, and enforce written policies and procedures reasonably designed to "have governance arrangements that are clear and transparent to fulfill the public interest requirements in Section 17A of the Exchange Act applicable to clearing agencies, to support the objectives of owners and participants, and to promote the effectiveness of the clearing agency's risk management procedures."²⁵ The Commission believes that the changes proposed in this advance notice should help OCC fulfill these transparency requirements.

III. Conclusion

It is therefore noticed, pursuant to Section 806(e)(1)(I) of the Clearing Supervision Act,²⁶ that the Commission *does not object* to advance notice proposal (SR-OCC-2014-802) and that OCC is *authorized* to implement the proposal as of the date of this notice or the date of an order by the Commission

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-72545; File No. SR-BOX-2014-19]

Self-Regulatory Organizations; BOX Options Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to amend Interpretive Material to Rule 7150 (Price Improvement Period "PIP") and Interpretive Material to Rule 7245 (Complex Order Price Improvement Period "COPIP")

July 7, 2014.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on July 1, 2014, BOX Options Exchange LLC (the "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Interpretive Material to Rule 7150 (Price Improvement Period "PIP") and Interpretive Material to Rule 7245 (Complex Order Price Improvement Period "COPIP") to extend the pilot programs that permit the Exchange to have no minimum size requirement for orders entered into the PIP ("PIP Pilot Program") and COPIP ("COPIP Pilot Program"). The text of the proposed rule change is available from the principal office of the Exchange, at the Commission's Public Reference Room and also on the Exchange's Internet Web site at <http://boxexchange.com>.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to extend the PIP and COPIP Pilot Programs for three additional months. The PIP and COPIP Pilot Programs allow the Exchange to have no minimum size requirement for orders entered into the PIP³ and the COPIP.⁴ The Exchange has committed to provide certain data to the Commission during the PIP and COPIP Pilot Programs.⁵ The proposed rule change retains the text of IM-7150-1 to Rule 7150 and IM-7245-1 to Rule 7245; and seeks to extend the operation of the PIP and COPIP Pilot Programs until October 18, 2014.

The Exchange notes that the PIP and COPIP Pilot Programs guarantee Participants the right to trade with their customer orders that are less than 50 contracts. In particular, any order entered into the PIP is guaranteed an execution at the end of the auction at a

³ The Pilot Program is currently set to expire on July 18, 2014. See Securities Exchange Act Release Nos. 66871 (April 27, 2012) 77 FR 26323 (May 3, 2012) (File No.10-206, In the Matter of the Application of BOX Options Exchange LLC for Registration as a National Securities Exchange Findings, Opinion, and Order of the Commission), 67255 (June 26, 2012) 77 FR 39315 (July 2, 2012) (SR-BOX-2012-009) (Notice of Filing and Immediate Effectiveness of a Proposal To Extend a Pilot Program That Permits BOX to Have No Minimum Size Requirement for Orders Entered Into the Price Improvement Period), and 69846 (June 25, 2013) 78 FR 39365 (July 1, 2013) (SR-BOX-2013-33) (Notice of Filing and Immediate Effectiveness of a Proposal To Extend a Pilot Program That Permits BOX to Have No Minimum Size Requirement for Orders Entered Into the Price Improvement Period).

⁴ The Pilot Program is currently set to expire on July 18, 2014. See Securities Exchange Act Release No. 71148 (December 19, 2013) 78 FR 78437 (December 26, 2013) (Notice of Filing of Amendment Nos. 1 and 2 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 1 and 2, to Permit Complex Orders to Participate in Price Improvement Periods).

⁵ See supra note 3 at 26334 and note 4 at 78441.

price at least equal to the national best bid or offer. Any order entered into the COPIP is guaranteed an execution at the end of the auction at a price at least equal to or better than the cNBBO,⁶ cBBO,⁷ and BBO on the Complex Order Book for the Strategy at the time of commencement. In further support of this proposed rule change, the Exchange will submit to the Commission monthly a PIP Pilot Program Report and a COPIP Pilot Program Report, offering detailed data from, and analysis of, the PIP Pilot Program and COPIP Pilot Program.

The Exchange believes that, by extending the expiration of the PIP and COPIP Pilot Programs, the proposed rule change will allow for further analysis of the PIP and COPIP Pilot Programs and a determination of how the PIP and COPIP Pilot Programs shall be structured in the future.

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Act,⁸ in general, and Section 6(b)(5) of the Act,⁹ in particular, in that it is designed to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism for a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes that the data demonstrates that there is sufficient investor interest and demand to extend the PIP and COPIP Pilot Programs for an additional three months. The Exchange represents that the PIP and COPIP Pilot Programs are designed to create tighter markets and ensure that each order receives the best possible price.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange believes that, by extending the expiration of the PIP and COPIP

⁶ As defined in BOX Rule 7240(a)(3), the term "cNBBO" means the best net bid and offer price for a Complex Order Strategy based on the NBBO for the individual options components of such Strategy.

⁷ As defined in BOX Rule 7240(a)(1), the term "cBBO" means the best net bid and offer price for a Complex Order Strategy based on the BBO on the BOX Book for the individual options components of such Strategy.

⁸ 15 U.S.C. 78f(b).

⁹ 15 U.S.C. 78f(b)(5).

Pilot Programs, the proposed rule change will allow for further analysis of the PIPP and COPIP Pilot Programs and a determination of how the PIP and COPIP Pilot Programs shall be structured in the future. In doing so, the proposed rule change will also serve to promote regulatory clarity and consistency, thereby reducing burdens on the marketplace and facilitating investor protection.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act¹⁰ and subparagraph (f)(6) of Rule 19b-4 thereunder.¹¹

A proposed rule change filed under Rule 19b-4(f)(6)¹² normally does not become operative for 30 days after the date of filing. However, pursuant to Rule 19b-4(f)(6)(iii)¹³ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requested that the Commission waive the 30-day operative delay. The Exchange noted that such waiver will permit the PIP and COPIP Pilot Programs to continue without interruption.

The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest, as it will allow the pilot program to continue uninterrupted, thereby avoiding any potential investor confusion that could result from a temporary interruption in the pilot program. Further, the

Commission notes that, because the filing was submitted for immediate effectiveness on July 1, 2014, the fact that the current rule provision does not expire until July 18, 2014 will afford interested parties the opportunity to comment on the proposal before the Exchange requires it to become operative. For this reason, the Commission designates the proposed rule change to be operative on July 18, 2014.¹⁴

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-BOX-2014-19 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-BOX-2014-19. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the

provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BOX-2014-19 and should be submitted on or before August 1, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁵

Kevin M. O'Neill,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-72548; File No. SR-NYSE-2014-32]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing of Proposed Rule Change Amending Rule 13 to Make the Add Liquidity Only Modifier Available for Additional Limit Orders and Make the Day Time-In-Force Condition Available for Intermarket Sweep Orders

July 7, 2014.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 ("Act")² and Rule 19b-4 thereunder,³ notice is hereby given that on June 27, 2014, New York Stock Exchange LLC ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE Rule 13 to make the Add Liquidity Only ("ALO") modifier

¹⁰ 15 U.S.C. 78s(b)(3)(A)(ii).

¹¹ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires the Exchange to give the Commission written notice of the Exchange's intent to file the proposed rule change along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has met this requirement.

¹² 17 CFR 240.19b-4(f)(6).

¹³ 17 CFR 240.19b-4(f)(6)(iii).

¹⁴ For purposes only of waiving the operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

¹⁵ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

available for additional limit orders and make the day time-in-force condition available for Intermarket Sweep Orders ("ISO"). The text of the proposed rule change is available on the Exchange's Web site at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B and C below, of the most significant parts of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is proposing to amend NYSE Rule 13 to make the ALO modifier available for additional limit orders and make the day time-in-force condition available for ISOs.

ALO Modifier

The Exchange currently offers an ALO modifier for MPL Orders, which are undisplayed limit orders that execute at the mid-point of the protected best bid or offer ("PBBO").⁴ Pursuant to paragraph (e) governing MPL Orders in Rule 13, an MPL-ALO Order will not execute upon arrival, even if marketable. The Exchange proposes to amend Rule 13 to make the ALO modifier available for day limit orders. The Exchange notes that all other equity exchanges already make available add-liquidity-only functionality for limit orders.⁵

⁴ See Rule 13 (Mid-Point Passive Liquidity (MPL) Order).

⁵ See BATS Exchange, Inc. ("BATS") Rule 11.9(c)(6) ("BATS Post Only Order"); BATS Y-Exchange, Inc. ("BATS-Y") Rule 11.9(c)(6) ("BATS Post Only Order"); Chicago Stock Exchange, Inc. ("CHX") Article 20, Rule 4(b)(18) ("Post Only"); EDGA Exchange, Inc. ("EDGA") Rule 11.5(c)(5) ("Post Only Order"); EDGX Exchange, Inc. ("EDGX") Rule 11.5(c)(5) ("Post Only Order"); NASDAQ Stock Market LLC ("Nasdaq") Rule 4751(f)(10) ("Post-Only Orders"); NASDAQ OMX BX LLC ("Nasdaq OMX BX") Rule 4751(f)(10) ("Post-Only Orders"); NASDAQ OMX PHLX LLC ("Nasdaq OMX PSX") Rule 3301(f)(11) ("Post-Only Orders"); and NYSE Arca Equities, Inc. ("NYSE Arca Equities") Rule 7.31(nn).

To effect this change, the Exchange proposes to adopt a definition of ALO Modifier in Rule 13. Proposed paragraph (a) of this new definition would describe how an ALO Modifier impacts an order to which it is appended, which is the same functionality as the ALO modifier currently available for MPL Orders. Specifically, an order designated ALO does not route and will not remove liquidity from the Exchange's book. Proposed paragraph (a) of the new definition would also state that ALO modifiers are available for MPL Orders, as they are today, and for day limit orders.⁶ Because the behavior of MPL-ALO Orders is currently described in paragraph (e) for MPL Orders in Rule 13, the Exchange further proposes to cross-reference that rule text in the new definition for ALO Modifiers. Accordingly, the remainder of the proposed definition for ALO Modifier would describe the behavior of limit orders designated ALO.

The Exchange further proposes in new paragraph (a) of the new definition that limit orders designated ALO would be eligible to participate in the open or close, which would include Limit on Open or Limit on Close Orders, but that the ALO designation would be ignored. The Exchange's opening and closing transactions are single-priced auction transactions and the Exchange does not consider either side of the transaction to be either a "provider" or a "taker." Accordingly, an ALO modifier is moot for the open or close. In order to enable as much interest as possible to participate in the open or close, the Exchange proposes to include any limit orders designated ALO in these auctions, but to ignore the ALO designation.

To promote the display of liquidity, the Exchange further proposes that a limit order designated ALO must be entered with a minimum of one displayable round lot. Accordingly, the ALO Modifier would be available for Minimum Display Reserve Orders (Rule 13) and Minimum Display Reserve e-Quotes (Rule 70(f)(1)). The Exchange would reject incoming limit orders designated ALO that do not meet the minimum display requirement, including odd-lot sized orders designated ALO.

⁶ Pursuant to Rule 13, a "Limit, Limited Order, or Limited Price Order" means an order to buy or sell a stated amount of a security at a specified price, or at a better price, if obtainable and a "Day Order" means an order to buy or sell which, if not executed, expires at the end of the 9:30 a.m. to 4:00 p.m. trading session on the day on which it was entered.

The Exchange proposes to specify in paragraph (c) to the new rule text that the following interest may not be designated ALO: (1) DMM interest entered via the Capital Commitment Schedule pursuant to Rule 1000; (2) d-Quotes, as defined in Rule 70.25; (3) Sell "Plus"-Buy "Minus" Orders as defined in Rule 13; (4) Non-Display Reserve Orders, as defined in Rule 13, or Non-Display Reserve e-Quotes, as defined in Rule 70(f)(ii); (5) Retail Orders or Retail Price Improvement Orders, as defined in Rule 107C; or (6) High-priced securities, as defined in Rule 1000(a)(vi).

To assure that a limit order designated ALO meets its goal to be available on the Exchange's book to add liquidity to arriving orders, the Exchange proposes to re-price a limit order designated ALO that upon arrival would be marketable against Exchange interest or would lock or cross a protected quotation in violation of Rule 610(d) of Regulation NMS.⁷ Accordingly, the Exchange proposes to specify in paragraph (b) to the rule text for ALO Modifiers that if, at the time of entry, a limit order designated ALO is marketable against Exchange interest or would lock or cross a protected quotation in violation of Rule 610(d) of Regulation NMS, the order would be re-priced and displayed one minimum price variation, as defined in supplementary material .10 to Rule 62, below the best-priced sell interest (for bids) or above the best-priced buy interest (for offers). The Exchange notes that re-pricing a limit order designated ALO so that it would not execute against resting Exchange interest or lock or cross a protected quotation is consistent with how other equities markets currently operate.⁸

The Exchange proposes to use the term "Exchange interest" in the proposed rule text in order to include both displayed interest and non-displayed interest (i.e., Non-Displayed Reserve Orders or odd-lot sized orders), which may be priced better than the displayed quote. In addition, the Exchange proposes to add new Supplementary Material .10 to Rule 13 to define new terms to capture the best price among Exchange displayed and non-displayed interest and the best away protected quote. As proposed, the term "best-priced sell interest" would refer to the lowest-priced sell interest against which incoming buy interest

⁷ 17 CFR 242.610(d).

⁸ See BATS Rules 11.9(c)(6) and 11.9(g)(2)(D); BATS-Y Rules 11.9(c)(6) and 11.9(g)(2)(D); CHX Article 20, Rule 4(b)(25) ("CHX Only"); EDGA Rule 11.5(c)(5); EDGX Rule 11.5(c)(5); Nasdaq Rule 4751(f)(10); and NYSE Arca Equities Rule 7.31(mm) (PNP Blind order combined with an ALO order).

would be required to execute with and/or route to, including Exchange displayed offers, Non-Display Reserve Orders, Non-Display Reserve e-Quotes, odd-lot sized sell interest, and protected offers on away markets, but would not include non-displayed interest that is priced based on the PBBO, such as MPL Orders or Retail Price Improvement Orders (“RPI”). The term “best-priced buy interest” would refer to the highest-priced buy interest against which incoming sell interest would be required to execute with and/or route to, including Exchange displayed bids, Non-Display Reserve Orders, Non-Display Reserve e-Quotes, odd-lot sized buy interest, and protected bids on away markets, but would not include non-displayed interest that is priced based on the PBBO, such as MPL Orders or RPIs. The Exchange believes it is appropriate to exclude MPL Orders from the definition of best-priced sell/buy interest because the price at which an MPL Order is eligible to execute changes as the PBBO moves.

As further proposed, if the best-priced sell interest is re-priced higher, an order to buy designated ALO would be re-priced and re-displayed higher, up to its limit price. If the best-priced buy interest is re-priced lower, an order to sell designated ALO would be re-priced and re-displayed lower, down to its limit price. The Exchange believes that re-pricing and re-displaying limit orders designated ALO each time the best-priced sell interest is priced higher (for bids) or the best-priced buy interest is priced lower (for offers) would ensure that the order is displayed at its most aggressive price without requiring the order to either take liquidity or lock or cross a protected quotation.

In addition, as proposed, a limit order designated ALO would not be re-priced if it is displayed at its limit price or if the best-priced sell interest moves down in price (for limit orders to buy designated ALO) or if the best-priced buy interest moves up in price (for limit orders to sell designated ALO). Once an order reaches its limit price, the Exchange would no longer need to re-price it. The Exchange also would not need to re-price a limit order designated ALO if the best-priced sell interest moves down (for bids) or the best-priced buy interest moves up (for offers) because in such scenario, the limit order designated ALO would have been displayed first at that price and the opposite-side bid or offer would be required to execute with or route to the resting limit order designated ALO.

For example, assume the Exchange best bid and offer (“BBO”) in XYZ is 10.05 x 10.11, the PBBO is 10.05 x

10.09, and the Exchange has a non-displayed odd-lot sell order priced at 10.07. In this scenario, the best-priced sell interest, as defined in new supplementary material .10 to Rule 13, would be 10.07. Accordingly, if the Exchange were to receive a limit order to buy designated ALO at 10.12 (“Order A”), the Exchange would re-price and display Order A at \$10.06, which is one MPV below the 10.07 best-priced sell interest.

Assume now that the resting odd-lot order to sell on the Exchange is either executed or cancelled, but the Exchange best offer and PBO does not change. Because the new best-priced sell interest is the away-market PBO of 10.09, Order A would re-price and re-display to 10.08, which is one MPV below the updated best-priced sell interest.

Assume further that the market updates so that both the Exchange’s BBO and the PBBO update to 10.08–10.14 and there is no undisplayed interest to sell at the Exchange. Order A would be re-priced and re-displayed at its limit price of 10.12. At this point, because it has been displayed at its limit price, Order A would not be subject to any further re-pricing. If the Exchange were to receive incoming sell interest marketable against Order A, Order A would be available liquidity to execute against that incoming sell interest.

As further proposed, a limit order designated ALO would receive a new time stamp each time it is re-priced and re-displayed. The Exchange believes that providing a new time stamp each time a limit order designated ALO is re-priced and re-displayed is consistent with current Exchange rules that provide that an order that is modified to change the price of the order shall receive a new time stamp.⁹

As noted above, limit orders designated ALO would not be priced based on resting opposite-side MPL Orders, which are triggered to trade at the midpoint of the PBBO by arriving interest. To assure that limit orders designated ALO would not trigger an opposite-side MPL Order to trade, the Exchange proposes to add new paragraph (d) governing ALO Modifiers in Rule 13 to specify that a limit order designated ALO would not trigger a contra-side MPL Order to trade. The Exchange proposes to make a conforming change to paragraph (a) governing MPL Orders in Rule 13 to specify that an incoming limit order designated ALO would not interact with an MPL Order.

For example, assume the Exchange BBO and PBBO in XYZ is 10.05–10.09

and there is a sell MPL Order eligible to execute at the midpoint of the PBBO, which would be 10.07. Assume further that the Exchange also has a Non-Display Reserve Order to sell priced at 10.08. In this scenario, an incoming buy order designated ALO priced at 10.11 (“Order B”) would re-price and display one MPV below the best-priced sell interest, which is 10.08. Accordingly, Order B would display at 10.07. Although the new 10.07 bid is at the same price that the resting MPL Order could have executed when the PBBO was 10.05 x 10.09, because the new bid updates the PBBO to 10.07 x 10.09, the MPL Order is now eligible to execute at 10.08 and no longer at 10.07.

Because pegging interest may be designated ALO, the Exchange proposes to amend the rules governing pegging interest in Rule 13 to take into consideration how an ALO Modifier would function with pegging interest. As proposed in paragraph (c) governing pegging interest in Rule 13, pegging interest to buy (sell) that is designated ALO would not peg to a price that would result in its executing before displaying and shall instead peg one minimum price variation below (above) the undisplayed Exchange sell (buy) interest against which it would have otherwise executed. For example, assume the Exchange BBO is 10.05 x 10.10 and the PBBO is 10.08 x 10.10 and the Exchange has sell odd-lot interest priced at 10.08. Assume further incoming pegging interest to buy designated ALO with a limit of 10.10 arrives (“Order C”). If Order C were not designated ALO, it would peg to the PBB of 10.08 and execute against the resting odd-lot interest, and any remainder would be displayed at 10.08. As proposed, with the ALO designation, to assure that Order C would not execute on arrival, it would peg to a price one MPV below the 10.08 odd-lot sell interest and display at 10.07.

Day Time-in-Force Designation for ISOs

An ISO is currently defined in Rule 13 as a limit order designated for automatic execution that meets the following requirements: (i) It is identified as an ISO in the manner prescribed by the Exchange; and (ii) simultaneously with the routing of an ISO to the Exchange, one or more additional limit orders, as necessary, are routed to execute against the full displayed size of any protected bid, in the case of a limit order to sell, or the full displayed size of any protected offer, in the case of a limit order to buy and these additional orders are identified as ISOs. This definition is based on the definition of an ISO set

⁹ See Rule 72(xii).

forth in Regulation NMS Rule 600(b)(30),¹⁰ and is consistent with similar provisions on other exchanges.¹¹

Currently, the Exchange immediately and automatically executes an ISO upon arrival and the portion not so executed will be immediately and automatically cancelled.¹² Accordingly, the Exchange treats all ISOs with an immediate-or-cancel time-in-force condition.

Other equities exchanges do not limit their ISOs to an immediate-or-cancel time-in-force condition.¹³ Accordingly, the Exchange proposes to amend Rule 13 governing ISOs to make available an ISO Order with a day time-in-force condition. As proposed, an ISO designated day (“Day ISO”), if marketable upon arrival, would be immediately and automatically executed against the displayed bid (offer) up to its full size in accordance with and to the extent provided by Exchange Rules 1000–1004 and would then sweep the Display Book,[®] as provided in Rule 1000(d)(iii). This proposed rule text is consistent with current paragraph (b) governing ISOs in Rule 13.

The Exchange further proposes to provide that the remaining unexecuted portion of a Day ISO would be posted to the Exchange’s book at its limit price and may lock or cross a protected quotation that was displayed at the time of arrival of the Day ISO. The Exchange believes this proposed rule text is consistent with Regulation NMS and the rules of other exchanges because the member organization that sent the Day ISO to the Exchange has an existing obligation (pursuant to paragraph (a)(ii) governing ISOs in Rule 13) to simultaneously route ISOs to trade with the full size of protected quotations on

other markets.¹⁴ Accordingly, the Exchange would consider any protected quotes that existed at the time of arrival of the Day ISO as cleared when it posts any remainder of a Day ISO to the Exchange’s book.¹⁵

The Exchange further proposes that a Day ISO must be entered with a minimum of one displayable round lot. Accordingly, similar to the proposed ALO Modifier for limit orders, Day ISOs would be available for Minimum Display Reserve Orders and Minimum Display Reserve e-Quotes. The Exchange also proposes that a Day ISO may also be designated ALO.

Because Day ISOs would not route, which is similar to the proposed ALO Modifier functionality, the Exchange proposes to re-price and re-display resting Day ISOs in a manner consistent with the proposed re-pricing and re-displaying functionality described above for limit orders designated ALO. As proposed, if, after posting, a Day ISO would lock or cross a protected quotation, the Exchange would re-price and re-display the order consistent with proposed paragraph (b) for ALO Modifiers in Rule 13. Accordingly, any such re-pricing would be based on the best-priced sell interest (for bids) or best-priced buy interest (for offers), as proposed in new Supplementary Material .10 to Rule 13.

The Exchange further proposes that a Day ISO designated ALO that is marketable upon arrival would follow a combination of both the Day ISO and ALO rules. Specifically, the Day ISO element of this order would be permitted to trade through away market protected quotations on arrival and lock or cross a protected quotation. In addition, the ALO element would require that this order not result in taking liquidity. Accordingly, the Exchange proposes that if a Day ISO designated ALO is marketable against Exchange interest on arrival, it would be re-priced and displayed one minimum price variation, as defined in supplementary material .10 to Rule 62, below the Exchange’s best-priced displayed or non-displayed non-MPL Order sell interest (for bids) or above the best-priced Exchange displayed or non-displayed non-MPL Order buy interest (for offers). Any re-pricing and display on arrival would ignore away-market protected quotations. As further proposed, once a Day ISO designated ALO has been posted to the Exchange’s book, to assure that any subsequent re-pricing and re-displaying of a Day ISO designated ALO does not lock or cross

a protected quotation, the Exchange proposes to follow the re-pricing rule set forth in proposed paragraph (b) for ALO Modifiers in this Rule. Therefore, any subsequent re-pricing would be based on the best-priced sell interest (for bids) or best-priced buy interest (for offers), as proposed in new Supplementary Material .10 to Rule 13.

For example, assume the BBO in XYZ is 10.05 x 10.11, the PBBO is 10.05 x 10.09, and the Exchange has a resting odd-lot order to sell priced at 10.07. In this scenario, the best-priced sell interest, as defined in new supplementary material .10 to Rule 13, would be 10.07. If the Exchange were to receive a Day ISO to buy at 10.12 (“Order D”), the Exchange would execute Order D against the resting odd-lot order to sell at 10.07, ignore the best protected offer of 10.09, and execute against the Exchange’s best offer of 10.11. If there were any remaining quantity of Order D, it would post at 10.12. Although this 10.12 bid would cross the 10.09 PBO, the Exchange would consider that 10.09 PBO cleared pursuant to the existing obligation for the entering firm to have sent an ISO to trade with the full size of that PBO simultaneous with entering Order D at the Exchange.

Assume instead that the Day ISO to buy at 10.12 is also designated ALO (“Order E”). In this scenario, upon arrival, Order E would be re-priced and displayed at 10.06, which is one MPV below the Exchange’s best priced non-displayed interest. Assume instead that the Exchange receives a Day ISO designated ALO to buy at 10.12 (“Order F”), but that when Order F arrives, the BBO is 10.05 x 10.11, the PBBO is 10.05 x 10.09, and the Exchange has no non-displayed sell interest. In this scenario, the Exchange would ignore the 10.09 PBO and Order F would be re-priced and displayed at 10.10, which is one MPV below the Exchange’s best-priced displayed offer of 10.11. Assume the market updates and the BBO becomes 10.10 x 10.14 and the PBBO is 10.10 x 10.12. Order F would re-price and re-display one MPV below the best-priced sell interest, which here would be the 10.12 PBO. Accordingly, Order F would re-price and re-display at 10.11.

The Exchange also proposes to add new paragraph (e) governing ISOs in Rule 13 to specify that IOC ISOs and Day ISOs are not available for Sell “Plus”—Buy “Minus” Orders or Non-Display Reserve Orders or Non-Display Reserve e-Quotes, and that IOC ISOs are not available for high-priced securities, as defined in Rule 1000(a)(vi).

Finally, the Exchange proposes non-substantive changes to paragraph (a)

¹⁰ 17 CFR 242.600(b)(30).

¹¹ See BATS Rule 11.9(d); BATS–Y Rule 11.9(d); CHX Article 20, Rule 4(b)(1) and (15); EDGA Rule 11.5(d); EDGX Rule 11.5(d); Nasdaq Rule 4751(f)(6); Nasdaq OMX BX Rule 4751(f)(6); Nasdaq OMX PSX Rule 3301(f)(6); and NYSE Arca Equities Rule 7.31(jj).

¹² See paragraph (b) governing ISOs in Rule 13.

¹³ The rules of Nasdaq, BATS, BATS–Y, EDGA, and EDGX do not expressly provide that their versions of ISOs can be day, however, nor do their rules prohibit this functionality. In practice, Nasdaq, BATS, BATS–Y, EDGA, and EDGX all accept ISOs with a day time-in-force condition. In addition, NYSE Arca Equities expressly permits an ISO with a day time-in-force condition, which is entered as a Post No Preference (“PNP”) Order. See, e.g., NYSE Arca Equities Rule 7.31(w) (PNP Order designated ISO does not route and may lock and cross and trade through protected quotations). See also Securities Exchange Act Release No. 34–54549 (Sept. 29, 2006), 71 FR 59179 (Oct. 6, 2006) (SR–NYSEArca–2006–59) (Order approving NYSE Arca Equities’ proposal to adopt ISO PNP Orders, which post to NYSE’s Arca book and may lock or cross protected quotations). See also CHX Article 20, Rules 4(b)(1) and (23).

¹⁴ See *supra* n. 11.

¹⁵ See *supra* n. 13.

defining ISOs to provide more detail regarding the current operation of ISOs, consistent with existing NYSE Arca Rule 7.31(jj). As proposed, the Exchange would define an ISO as a limit order designated for automatic execution in a particular security that is never routed to an away market, may trade through a protected bid or offer, and will not be rejected or cancelled if it would lock, cross, or be marketable against an away market provided that it meets the requirements described in the rule. The Exchange also proposes to make non-substantive, technical amendments to define the term “Intermarket Sweep Order” as “ISO” and change references from “Intermarket Sweep Order” to “ISO.” The Exchange further proposes a non-substantive, technical change to define the existing form of an ISO as an “ISO designated IOC (‘IOC ISO’).”

Because of the technology changes associated with this proposed rule change, the Exchange proposes to announce the implementation date of ALO Modifiers for day limit orders and Day ISOs by Trader Update.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b)¹⁶ of the Act, in general, and furthers the objectives of Section 6(b)(5),¹⁷ in particular, in that it is designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes that the proposal is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system because the expansion of the availability of ALO Modifiers for day limit orders will increase competition, not only among market participants, but also among exchanges offering similar functionality. Specifically, all other equity exchanges currently enable member firms to enter limit orders that would only post on the designated exchange and not route.¹⁸ The Exchange proposes to expand its existing ALO functionality, consistent with other markets, to also make it available for limit orders. The Exchange believes that requiring limit orders designated ALO to be entered with a minimum display quantity will help perfect the mechanism of a free and open market by encouraging additional displayed liquidity on a public

registered exchange, and therefore promote price discovery. The Exchange further believes that the proposed re-pricing and re-displaying of a limit order designated ALO removes impediments to and perfects the mechanism of a free and open market because it assures that such an order would meet its intended goal to be available on the Exchange’s book as displayed liquidity without locking or crossing a protected quotation in violation of Rule 610(d) of Regulation NMS.¹⁹ The Exchange further notes that the proposed re-pricing and re-displaying of limit orders designated ALO is consistent with how other exchanges currently operate.²⁰

The Exchange also believes that adding a day time-in-force condition for ISOs, an existing order type on the Exchange, is designed to remove impediments to and perfect the mechanism of a free and open market and national market system because the proposed expansion is consistent with the definition of an ISO under Regulation NMS²¹ and with the operation of how ISOs may be entered on other exchanges, including that it may trade through protected quotations on arrival and display on the Exchange at a price that may lock or cross a protected quotation.²² The Exchange further believes that any subsequent re-pricing and re-displaying of a Day ISO after it has posted on the Book will meet the entering firm’s expectations that a Day ISO order not route, while at the same time ensure that it would not lock or cross a protected quotation in violation of Rule 610(d) of Regulation NMS.²³

(B) Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, the Exchange believes that the proposed rule change is pro-competitive because it expands the functionality associated

with existing NYSE order types to conform to how these order types already operate on other exchanges, thereby harmonizing the forms of order types available for market participants that trade on equity exchanges.²⁴

(C) Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

- (A) By order approve or disapprove such proposed rule change, or
- (B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s Internet comment form (<http://www.sec.gov/rules/sro.shtml>) or Send an email to rule-comments@sec.gov. Please include File Number SR–NYSE–2014–32 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.
- All submissions should refer to File Number SR–NYSE–2014–32. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements

¹⁶ 15 U.S.C. 78f(b).

¹⁷ 15 U.S.C. 78f(b)(5).

¹⁸ See *supra* n. 5.

¹⁹ 17 CFR 242.610(d).

²⁰ See *supra* n. 8.

²¹ 17 CFR 242.600(b)(3) and *supra* n. 11.

²² See *supra* n. 13, 71 FR at 59181 (“If an ISO is not marked as ‘immediate or cancel,’ any remaining balance in the order would be displayed by the Exchange without regard to whether that display would lock or cross another market center, only if the participant routing the order has already sent an order to satisfy the quotations of other markets so that the display of the order would not lock or cross those markets.”) and at 59182 (approving, among other things, NYSE Arca’s proposed ISO order type and finding that it is consistent with the Act).

²³ 17 CFR 242.610(d).

²⁴ See *supra*, nn. 5, 11, and 13.

with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the NYSE's principal office and on its Internet Web site at www.nyse.com. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NYSE-2014-32 and should be submitted on or before August 1, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁵

Kevin M. O'Neill,

Deputy Secretary.

[FR Doc. 2014-16191 Filed 7-10-14; 8:45 am]

BILLING CODE 8011-01-P

SUSQUEHANNA RIVER BASIN COMMISSION

Public Hearing; Susquehanna River Basin Commission

AGENCY: Susquehanna River Basin Commission.

ACTION: Notice.

SUMMARY: The Susquehanna River Basin Commission will hold a public hearing on August 7, 2014, in Harrisburg, Pennsylvania. At this public hearing, the Commission will hear testimony on the projects listed in the Supplementary Information section of this notice. Such projects are intended to be scheduled for Commission action at its next business meeting, tentatively scheduled for September 4, 2014, which will be noticed separately. The public should take note that this public hearing will be the only opportunity to offer oral comment to the Commission for the listed projects. The deadline for the submission of written comments is August 18, 2014.

DATES: The public hearing will convene on August 7, 2014, at 2:30 p.m. The

public hearing will end at 5:00 p.m. or at the conclusion of public testimony, whichever is sooner. The deadline for the submission of written comments is August 18, 2014.

ADDRESSES: The public hearing will be conducted at the Pennsylvania State Capitol, Room 8E-B, East Wing, Commonwealth Avenue, Harrisburg, Pa.

FOR FURTHER INFORMATION CONTACT: Jason Oyler, Regulatory Counsel, telephone: (717) 238-0423, ext. 1312; fax: (717) 238-2436. Information concerning the applications for these projects is available at the SRBC Water Resource Portal at www.srb.net/wrp. Materials and supporting documents are available to inspect and copy in accordance with the Commission's Access to Records Policy at www.srb.net/pubinfo/docs/2009-02%20Access%20to%20Records%20Policy%209-10-09.PDF.

SUPPLEMENTARY INFORMATION: The public hearing will cover the following projects:

Public Hearing—Projects Scheduled for Action

1. Project Sponsor and Facility: City of Aberdeen, Harford County, Md. Modification to extend the approval term of the surface water withdrawal approval (Docket No. 20021210) to be coterminous with the revised Maryland Department of the Environment State Water Appropriation and Use Permit for the Aberdeen Proving Ground-Aberdeen Area.

2. Project Sponsor and Facility: City of Aberdeen, Harford County, Md. Modification to extend the approval term of the consumptive water use approval (Docket No. 20021210) to be coterminous with the revised Maryland Department of the Environment State Water Appropriation and Use Permit for the Aberdeen Proving Ground-Aberdeen Area.

3. Project Sponsor and Facility: Anadarko E&P Onshore LLC (Lycoming Creek), McIntyre Township, Lycoming County, Pa. Application for surface water withdrawal of up to 0.499 mgd (peak day).

4. Project Sponsor and Facility: Anadarko E&P Onshore LLC (Pine Creek), McHenry Township, Lycoming County, Pa. Application for renewal of surface water withdrawal of up to 0.499 mgd (peak day) (Docket No. 20100902).

5. Project Sponsor and Facility: Cabot Oil & Gas Corporation (Tunkhannock Creek), Nicholson Township, Wyoming County, Pa. Application for surface water withdrawal of up to 2.000 mgd (peak day).

6. Project Sponsor and Facility: Carrizo (Marcellus), LLC (East Branch

Wyalusing Creek), Jessup Township, Susquehanna County, Pa. Application for renewal of surface water withdrawal of up to 0.720 mgd (peak day) (Docket No. 20100601).

7. Project Sponsor and Facility: Heidelberg Township Municipal Authority, Heidelberg Township, Lebanon County, Pa. Application for renewal of groundwater withdrawal of up to 0.115 mgd (30-day average) from Well 5 (Docket No. 19820602).

8. Project Sponsor and Facility: IBM Corporation, Village of Owego, Tioga County, N.Y. Application for groundwater withdrawal of up to 0.002 mgd (30-day average) from Well 415.

9. Project Sponsor and Facility: Inflection Energy (PA) LLC (Loyalsock Creek), Upper Fairfield Township, Lycoming County, Pa. Application for surface water withdrawal of up to 1.700 mgd (peak day).

10. Project Sponsor and Facility: Jay Township Water Authority, Jay Township, Elk County, Pa. Application for groundwater withdrawal of up to 0.265 mgd (30-day average) from Byrnedale Well #1.

11. Project Sponsor: Lancaster County Solid Waste Management Authority. Project Facility: Susquehanna Resource Management Complex, City of Harrisburg, Dauphin County, Pa. Application for consumptive water use of up to 0.700 mgd (peak day).

12. Project Sponsor: Leola Sewer Authority. Project Facility: Upper Leacock Township, Lancaster County, Pa. Application for groundwater withdrawal of up to 0.075 mgd (30-day average) from Well 13.

13. Project Sponsor and Facility: LHP Management, LLC (Muncy Creek), Muncy Creek Township, Lycoming County, Pa. Application for renewal of surface water withdrawal of up to 0.999 mgd (peak day) (Docket No. 20120607).

14. Project Sponsor and Facility: Millersville University of Pennsylvania, Millersville Borough, Lancaster County, Pa. Application for renewal of consumptive water use of up to 0.253 mgd (peak day) (Docket No. 19820105).

15. Project Sponsor and Facility: Millersville University of Pennsylvania, Millersville Borough, Lancaster County, Pa. Application for renewal and modification to increase groundwater withdrawal by an additional 0.055 mgd (30-day average) from Well 1, for a total of up to 0.320 mgd (30-day average) from Well 1 (Docket No. 19820105).

16. Project Sponsor and Facility: Newport Borough Water Authority, Oliver and Howe Townships and Newport Borough, Perry County, Pa. Application for groundwater

²⁵ 17 CFR 200.30-3(a)(12).

withdrawal of up to 0.162 mgd (30-day average) from Well 1.

17. Project Sponsor: Pennsylvania Department of Environmental Protection—South-central Regional Office, City of Harrisburg, Dauphin County, Pa. Facility Location: Leacock Township, Lancaster County, Pa. Application for groundwater withdrawal of up to 0.590 mgd (30-day average) from Stoltzfus Well.

18. Project Sponsor: Pennsylvania Department of Environmental Protection—South-central Regional Office, City of Harrisburg, Dauphin County, Pa. Facility Location: Leacock Township, Lancaster County, Pa. Application for groundwater withdrawal of up to 0.432 mgd (30-day average) from Township Well.

19. Project Sponsor and Facility: Somerset Regional Water Resources, LLC (Salt Lick Creek), New Milford Township, Susquehanna County, Pa. Application for renewal of surface water withdrawal of up to 0.720 mgd (peak day) (Docket No. 20100905).

20. Project Sponsor and Facility: Sugar Hollow Trout Park and Hatchery, Eaton Township, Wyoming County, Pa. Application for renewal of groundwater withdrawal of up to 0.864 mgd (30-day average) from Wells 1, 2, and 3 (the Hatchery Well Field) (Docket No. 20100913).

21. Project Sponsor and Facility: Sunbury Generation LP, Shamokin Dam Borough and Monroe Township, Snyder County, Pa. Modification to project features and reduction of the surface water withdrawal from 354.000 mgd (peak day) to 10.000 mgd (peak day) (Docket No. 20081222).

22. Project Sponsor and Facility: Sunbury Generation LP, Shamokin Dam Borough and Monroe Township, Snyder County, Pa. Modification to project features and reduction of the consumptive water use from 8.000 mgd (peak day) to 6.500 mgd (peak day) (Docket No. 20081222).

23. Project Sponsor and Facility: SWEPI LP (Cowanesque River), Nelson Township, Tioga County, Pa. Application for renewal of surface water withdrawal of up to 0.533 mgd (peak day) (Docket No. 20100604).

24. Project Sponsor and Facility: Talisman Energy USA Inc. (Susquehanna River), Terry Township, Bradford County, Pa. Application for renewal of surface water withdrawal of up to 2.000 mgd (peak day) (Docket No. 20100613).

25. Project Sponsor and Facility: Talisman Energy USA Inc. (Wappasening Creek), Windham Township, Bradford County, Pa. Application for surface water

withdrawal of up to 0.999 mgd (peak day).

26. Project Sponsor and Facility: Upper Halfmoon Water Company, Halfmoon Township, Centre County, Pa. Application for groundwater withdrawal of up to 0.396 mgd (30-day average) from Well 6.

27. Project Sponsor and Facility: Warwick Township Municipal Authority, Warwick Township, Lancaster County, Pa. Application for groundwater withdrawal of up to 0.288 mgd (30-day average) from Rothsville Well 2.

Public Hearing—Projects Scheduled for Action Involving a Diversion

1. Project Sponsor and Facility: City of Aberdeen, Harford County, Md. Modification to extend the approval term of the out-of-basin diversion approval (Docket No. 20021210) to be coterminous with the revised Maryland Department of the Environment State Water Appropriation and Use Permit for the Aberdeen Proving Ground-Aberdeen Area.

2. Project Sponsor: DS Services of America, Inc. Project Facility: Bethany Children's Home, Heidelberg Township, Berks County, Pa. Application of into-basin diversion from the Delaware River Basin of up to 0.200 mgd (peak day) from Bethany Children's Home bulk spring water source (Boreholes PWA and PWB).

Opportunity To Appear and Comment

Interested parties may appear at the hearing to offer comments to the Commission on any project listed above. The presiding officer reserves the right to limit oral statements in the interest of time and to otherwise control the course of the hearing. Ground rules will be posted on the Commission's Web site, www.srbc.net, prior to the hearing for review. The presiding officer reserves the right to modify or supplement such rules at the hearing. Written comments on any project listed above may also be mailed to Mr. Jason Oyler, Regulatory Counsel, Susquehanna River Basin Commission, 4423 North Front Street, Harrisburg, Pa. 17110-1788, or submitted electronically through <http://www.srbc.net/pubinfo/publicparticipation.htm>. Comments mailed or electronically submitted must be received by the Commission on or before August 18, 2014, to be considered.

Authority: Pub. L. 91-575, 84 Stat. 1509 et seq., 18 CFR Parts 806, 807, and 808.

Dated: July 3, 2014.

Stephanie L. Richardson,

Secretary to the Commission.

SUSQUEHANNA RIVER BASIN COMMISSION

Projects Approved for Consumptive Uses of Water

AGENCY: Susquehanna River Basin Commission.

ACTION: Notice.

SUMMARY: This notice lists the projects approved by rule by the Susquehanna River Basin Commission during the period set forth in **DATES**.

DATES: May 1-31, 2014.

ADDRESSES: Susquehanna River Basin Commission, 4423 North Front Street, Harrisburg, PA 17110-1788.

FOR FURTHER INFORMATION CONTACT: Richard A. Cairo, General Counsel, telephone: (717) 238-0423, ext. 1306; fax: (717) 238-2436; email: rcairo@srbc.net. Regular mail inquiries may be sent to the above address.

SUPPLEMENTARY INFORMATION: This notice lists the projects, described below, receiving approval for the consumptive use of water pursuant to the Commission's approval by rule process set forth in 18 CFR 806.22(f) for the time period specified above:

Approvals By Rule Issued Under 18 CFR 806.22(f)

1. Citrus Energy Corporation, Pad ID: Procter and Gamble Mehoopany Plant 1V, ABR-20091014.R1, Washington Township, Wyoming County, Pa.; Consumptive Use of Up to 5.000 mgd; Approval Date: May 1, 2014.

2. Anadarko E&P Onshore LLC, Pad ID: C.O.P. TRACT 343 PAD C, ABR-20090908.R1, Noyes Township, Clinton County, Pa.; Consumptive Use of Up to 5.000 mgd; Approval Date: May 6, 2014.

3. Anadarko E&P Onshore LLC, Pad ID: COP Tr 244 #1000H, ABR-20090927.R1, Rush Township, Centre County, Pa.; Consumptive Use of Up to 5.000 mgd; Approval Date: May 6, 2014.

4. Anadarko E&P Onshore LLC, Pad ID: COP Tr 244 #1001H & #1002H, ABR-20090928.R1, Rush Township, Centre County, Pa.; Consumptive Use of Up to 5.000 mgd; Approval Date: May 6, 2014.

5. Seneca Resources Corporation, Pad ID: DCNR 595 Pad A, ABR-201405001, Covington Township, Tioga County, Pa.; Consumptive Use of Up to 4.000 mgd; Approval Date: May 12, 2014.

6. Chief Oil & Gas LLC, Pad ID: Blanchard Drilling Pad, ABR–201405002, McNett Township, Lycoming County, Pa.; Consumptive Use of Up to 2.500 mgd; Approval Date: May 12, 2014.

7. Range Resources—Appalachia, LLC, Pad ID: Cornwall B Unit, ABR–201405003, Lewis Township, Lycoming County, Pa.; Consumptive Use of Up to 5.000 mgd; Approval Date: May 12, 2014.

8. WPX Energy Appalachia, LLC, Pad ID: Five E's FLP Pad Site, ABR–20090801.R1, Middletown Township, Susquehanna County, Pa.; Consumptive Use of Up to 3.000 mgd; Approval Date: May 13, 2014.

9. WPX Energy Appalachia, LLC, Pad ID: Markovitch Pad Site, ABR–20090828.R1, Bridgewater Township, Susquehanna County, Pa.; Consumptive Use of Up to 3.999 mgd; Approval Date: May 13, 2014.

10. Inflection Energy (PA), LLC, Pad ID: TLC Pad, ABR–201405004, Eldred Township, Lycoming County, Pa.; Consumptive Use of Up to 4.000 mgd; Approval Date: May 13, 2014.

11. Inflection Energy (PA), LLC, Pad ID: Griggs Pad, ABR–201405005, Eldred and Loysock Townships, Lycoming County, Pa.; Consumptive Use of Up to 4.000 mgd; Approval Date: May 13, 2014.

12. Southwestern Energy Production Company, Pad ID: Lepley Pad—TI–04, ABR–201405006, Liberty Township, Tioga County, Pa.; Consumptive Use of Up to 4.999 mgd; Approval Date: May 13, 2014.

13. Chesapeake Appalachia, LLC, Pad ID: Dr. Marone, ABR–201405007, Washington Township, Wyoming County, Pa.; Consumptive Use of Up to 7.500 mgd; Approval Date: May 13, 2014.

14. WPX Energy Appalachia, LLC, Pad ID: Carty Pad Site, ABR–20090916.R1, Liberty Township, Susquehanna County, Pa.; Consumptive Use of Up to 3.999 mgd; Approval Date: May 15, 2014.

15. Chief Oil & Gas LLC, Pad ID: Teel Unit #1H, ABR–20091115.R1, Springville Township, Susquehanna County, Pa.; Consumptive Use of Up to 5.000 mgd; Approval Date: May 15, 2014.

16. Cabot Oil & Gas Corporation, Pad ID: Plonski P1, ABR–201405008, Gibson Township, Susquehanna County, Pa.; Consumptive Use of Up to 4.250 mgd; Approval Date: May 23, 2014.

17. Cabot Oil & Gas Corporation, Pad ID: Friedland Farms P1, ABR–201405009, Lenox Township, Susquehanna County, Pa.; Consumptive

Use of Up to 4.250 mgd; Approval Date: May 23, 2014.

18. Chief Oil & Gas LLC, Pad ID: Teel Unit Drilling Pad #2H, ABR–20091204.R1, Springville Township, Susquehanna County, Pa.; Consumptive Use of Up to 2.000 mgd; Approval Date: May 27, 2014.

19. Chief Oil & Gas LLC, Pad ID: Teel Unit Drilling Pad #3H, ABR–20091205.R1, Springville Township, Susquehanna County, Pa.; Consumptive Use of Up to 2.000 mgd; Approval Date: May 27, 2014.

20. Cabot Oil & Gas Corporation, Pad ID: Butler L P1, ABR–201405010, Lathrop Township, Susquehanna County, Pa.; Consumptive Use of Up to 4.250 mgd; Approval Date: May 27, 2014.

Authority: Pub. L. 91–575, 84 Stat. 1509 et seq., 18 CFR Parts 806, 807, and 808.

Dated: July 2, 2014.

Stephanie L. Richardson,

Secretary to the Commission.

SUPPLEMENTARY INFORMATION: This notice lists the projects, described below, receiving approval for the consumptive use of water pursuant to the Commission's approval by rule process set forth in 18 CFR 806.22(f) for the time period specified above:

Approvals By Rule Issued Under 18 CFR 806.22(f)

1. Cabot Oil & Gas Corporation, Pad ID: Shields G P1, ABR–20090930.R1, Dimock Township, Susquehanna County, Pa.; Consumptive Use of Up to

3.575 mgd; Approval Date: April 14, 2014.

2. Cabot Oil & Gas Corporation, Pad ID: Hunsinger A P2, ABR–20090931.R1, Dimock Township, Susquehanna County, Pa.; Consumptive Use of Up to 3.575 mgd; Approval Date: April 14, 2014.

3. Cabot Oil & Gas Corporation, Pad ID: Hoover P1, ABR–20090937.R1, Dimock Township, Susquehanna County, Pa.; Consumptive Use of Up to 3.575 mgd; Approval Date: April 14, 2014.

4. Pennsylvania General Energy Company, LLC, Pad ID: COP TRACT 724—PAD A, ABR–20091118.R1, Gamble Township, Lycoming County, Pa.; Consumptive Use of Up to 2.000 mgd; Approval Date: April 14, 2014.

5. Chief Oil & Gas LLC, Pad ID: Herbert Drilling Pad, ABR–201404001, Harford Township, Susquehanna County, Pa.; Consumptive Use of Up to 2.500 mgd; Approval Date: April 16, 2014.

6. Cabot Oil & Gas Corporation, Pad ID: Pijanowski J P1, ABR–201404002, Springville Township, Susquehanna County, Pa.; Consumptive Use of Up to 4.250 mgd; Approval Date: April 25, 2014.

7. Anadarko E&P Onshore, LLC, Pad ID: Bonnel Run H&F Pad D, ABR–201404003, Pine Township, Lycoming County, Pa.; Consumptive Use of Up to 4.000 mgd; Approval Date: April 25, 2014.

8. Chesapeake Appalachia, LLC, Pad ID: Three Reasons, ABR–201404004, Overton Township, Bradford County, Pa.; Consumptive Use of Up to 7.500 mgd; Approval Date: April 25, 2014.

9. Chesapeake Appalachia, LLC, Pad ID: Eileen, ABR–20090806.R1, Smithfield Township, Bradford County, Pa.; Consumptive Use of Up to 7.500 mgd; Approval Date: April 25, 2014.

10. Chesapeake Appalachia, LLC, Pad ID: Claudia, ABR–20090807.R1, Terry Township, Bradford County, Pa.; Consumptive Use of Up to 7.500 mgd; Approval Date: April 25, 2014.

11. Chesapeake Appalachia, LLC, Pad ID: Bonnie, ABR–20090904.R1, Albany Township, Bradford County, Pa.; Consumptive Use of Up to 7.500 mgd; Approval Date: April 25, 2014.

12. Talisman Energy USA Inc., Pad ID: Eick 013, ABR–20091105.R1, Columbia Township, Bradford County, Pa.; Consumptive Use of Up to 3.000 mgd; Approval Date: April 25, 2014.

13. Chief Oil & Gas LLC, Pad ID: Marcy Drilling Pad, ABR–201404005, Lenox Township, Susquehanna County, Pa.; Consumptive Use of Up to 2.500 mgd; Approval Date: April 29, 2014.

14. Chief Oil & Gas LLC, Pad ID: Harvey Drilling Pad, ABR-201404006, Elkland Township, Sullivan County, Pa.; Consumptive Use of Up to 2.500 mgd; Approval Date: April 29, 2014.

15. Pennsylvania General Energy Company, LLC, Pad ID: SGL75 Pad A, ABR-201404007, McHenry Township, Lycoming County, Pa.; Consumptive Use of Up to 2.500 mgd; Approval Date: April 29, 2014.

16. Pennsylvania General Energy Company, LLC, Pad ID: Pine Hill 1941 A-B, ABR-20090926.R1, Wharton Township, Potter County, Pa.; Consumptive Use of Up to 4.900 mgd; Approval Date: April 29, 2014.

17. Pennsylvania General Energy Company, LLC, Pad ID: Pine Hill West Pad B, ABR-20090929.R1, Sylvania Township, Potter County, Pa.; Consumptive Use of Up to 4.900 mgd; Approval Date: April 29, 2014.

18. Anadarko E&P Onshore, LLC, Pad ID: COP Tr 551 A, ABR-201404008, McIntyre Township, Lycoming County, Pa.; Consumptive Use of Up to 4.000 mgd; Approval Date: April 29, 2014.

19. Anadarko E&P Onshore, LLC, Pad ID: Marilyn Ely Pad A, ABR-201404009, Gamble Township, Lycoming County, Pa.; Consumptive Use of Up to 4.000 mgd; Approval Date: April 29, 2014.

Authority: Pub. L. 91-575, 84 Stat. 1509 et seq., 18 CFR Parts 806, 807, and 808.

Dated: July 1, 2014.

BILLING CODE 7040-01-P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Final Federal Agency Actions on Proposed Highway in North Carolina

AGENCY: Federal Highway Administration (FHWA), DOT

ACTION: Notice of Limitation on Claims for Judicial Review of Actions by FHWA and Other Federal Agencies.

SUMMARY: This notice announces actions taken by the FHWA and other Federal agencies that are final within the meaning of 23 U.S.C. 139 (J)(1). The actions relate to a proposed highway project, the Monroe Connector Bypass, a controlled-access toll road extending from US 74 near I-485 in Mecklenburg County to US 74 between the towns of Wingate and Marshville in Union County, North Carolina. Those actions grant licenses, permits, and approvals for the project.

DATES: By this notice, the FHWA is advising the public of final agency actions subject to 23 U.S.C. 139 (J)(1). A claim seeking judicial review of the Federal agency actions on the highway project will be barred unless the claim is filed on or before December 4, 2014. If the Federal law that authorizes judicial review of a claim provides a time period of less than 150 days for filing such claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: Mr. George W. Hoops, P.E., Major Projects Engineer, Federal Highway Administration, 310 New Bern Avenue, Suite 410, Raleigh, North Carolina 27601-1418; Telephone: (919) 747-7022; email: george.hoops@dot.gov. FHWA North Carolina Division Office's normal business hours are 8 a.m. to 5 p.m. (Eastern Standard Time). Mr. Richard W. Hancock, P.E., Project Development and Environmental Analysis Branch Manager, North Carolina Department of Transportation (NCDOT), 1548 Mail Service Center, Raleigh, North Carolina 27699-1548; Telephone (919) 707-6000, email: rwhancock@dot.state.nc.us. NCDOT—Project Development and Environmental Analysis Branch Office's normal business hours are 8 a.m. to 5 p.m. (Eastern Standard Time).

SUPPLEMENTARY INFORMATION: Notice is hereby given that the FHWA and other Federal agencies have taken final agency actions subject to 23 U.S.C. 139 (J)(1) by issuing licenses, permits, and approvals for the following highway project in the State of North Carolina: Monroe Connector/Bypass, Federal Aid No. STP-NHF-74(90), from US 74 near I-485 in Mecklenburg County to US 74 between the towns of Wingate and Marshville in Union County, North Carolina. The project is also known as State Transportation Improvement Program (STIP) Projects R-3329 and R-2559. The project is an approximately 20-mile long, multi-lane, fully access-controlled, new location toll road. The project follows existing US 74 for approximately one mile from just east of I-485 to east of Stallings Road (SR 1365) and then proceeds eastward on a new location alignment from east of Stallings Road to the project terminus at existing US 74 between the towns of Wingate and Marshville.

The actions by the Federal agencies, and the laws under which such actions were taken, are described in the Combined Final Supplemental Final Environmental Impact Statement (EIS) and Record of Decision (ROD), approved on May 15, 2014, and in other documents in the FHWA administrative

record. The Final Supplemental Final EIS/ROD and other documents in the FHWA administrative record file are available by contacting the FHWA or NCDOT at the addresses provided above. The Final Supplemental Final EIS/ROD can be viewed and downloaded from the project Web site at <http://www.ncdot.gov/projects/monroconnector/projectResources.html>. A final decision regarding Section 404 permits for this project has not yet been made. This notice, therefore, does not apply to the Section 404 permitting process for this project. This notice applies to all Federal agency actions and decisions as of the issuance date of this notice and all laws under which such actions were taken, including but not limited to:

1. *General:* National Environmental Policy Act (NEPA) [42 USC 4321-4351]; Federal-Aid Highway Act [23 U.S.C. 109].

2. *Air:* Clean Air Act [42 U.S.C. 7401-7671(q)].

3. *Land:* Section 4(f) of the Department of Transportation Act of 1966 [49 U.S.C. 303]; Landscaping and Scenic Enhancement (Wildflowers) [23 U.S.C. 319].

4. *Wildlife:* Endangered Species Act [16 USC 1531-1544 and Section 1536], Marine Mammal Protection Act [16 U.S.C. 1361], Anadromous Fish Conservation Act [16 U.S.C. 757(a)-757(g)], Fish and Wildlife Coordination Act [16 U.S.C. 661-667(d)], Migratory Bird Treaty Act (MBTA) [16 U.S.C. 703-712], Magnuson-Stevenson Fishery Conservation and Management Act of 1976, as amended [16 U.S.C. 1801 et seq.].

5. *Historic and Cultural Resources:* Section 106 of the National Historic Preservation Act of 1966, as amended [16 U.S.C. 470(f) et seq.]; Archeological Resources Protection Act of 1977 (ARPA) [16 U.S.C. 470(aa)-470(II)]; Archeological and Historic Preservation Act (AHPA) [16 U.S.C. 469-469(c)]; Native American Grave Protection and Repatriation Act (NAGPRA) [25 U.S.C. 3001-3013].

6. *Social and Economic:* Civil Rights Act of 1964 [42 U.S.C. 2000(d)-2000(d)(1)]; American Indian Religious Freedom Act [42 U.S.C. 1996]; Farmland Protection Policy Act (FPPA) [7 U.S.C. 4201-4209].

7. *Wetlands and Water Resources:* Clean Water Act [33 U.S.C. 1251-1377 (Section 404, Section 401, Section 319)]; Land and Water Conservation Fund (LWCF) [16 U.S.C. 4601-4604]; Safe Drinking Water Act (SDWA) [42 U.S.C. 300(f)-300(j)(6)]; Wild and Scenic Rivers Act [16 U.S.C. 1271-1287]; Emergency Wetlands Resources Act [16

U.S.C. 3921, 3931]; Wetlands Mitigation [23 U.S.C. 119(g)]; Flood Disaster Protection Act [42 U.S.C. 4001–4128].

8. *Hazardous Materials: Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)* [42 U.S.C. 9601–9675]; Superfund Amendments and Reauthorization Act of 1986 (SARA); Resource Conservation and Recovery Act (RCRA) [42 U.S.C. 6901–6992(k)].

9. *Executive Orders*: E.O. 11990 Protection of Wetlands; E.O. 11988 Floodplain Management; E.O. 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low Income Populations; E.O. 11593 Protection and Enhancement of Cultural Resources; E.O. 11514 Protection and Enhancement of Environmental Quality; E.O. 13112 Invasive Species.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Authority: 23 U.S.C. § 139 (J)(1)

Issued on: June 26, 2014.

George W. Hoops, P.E.,

Major Project Engineer, Raleigh, North Carolina.

BILLING CODE 4910-RY-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA 2014–0240]

Agency Information Collection Activities; Revision of a Currently Approved Collection: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FMCSA announces its plan to submit the Information Collection Request (ICR) described below to the Office of Management and Budget (OMB) for its review and approval and invites public comment. The FMCSA requests approval to revise an existing ICR titled, “Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery,” due to an increase in the annual cost to respondents. This ICR

will allow for ongoing, collaborative and actionable communication between FMCSA and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management. On April 18, 2014, FMCSA published a **Federal Register** notice allowing for a 60-day comment period on this ICR. The agency received no comments in response to that notice.

DATES: Please send your comments to this notice by August 11, 2014. OMB must receive your comments by this date to act quickly on the ICR.

ADDRESSES: All comments should reference Federal Docket Management System (FDMS) Docket Number FMCSA–2014–0240. Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the attention of the Desk Officer, Department of Transportation/Federal Motor Carrier Safety Administration, and sent via electronic mail to oir_submission@omb.eop.gov, faxed to (202) 395–6974, or mailed to the Office of Information and Regulatory Affairs, Office of Management and Budget, Docket Library, Room 10102, 725 17th Street NW., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Mr. Brian Ronk, Program Manager, FMCSA, Office of Enforcement and Program Delivery, Outreach Division/MC–ESO. Telephone (202) 366–1072; or email brian.ronk@dot.gov. Department of Transportation, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590.

Mr. Jeff Loftus., Supervisory Transportation Specialist, Technology Division/MC–RRT, Office of Analysis, Research and Technology, Telephone (202) 385–2363; or email jeff.loftus@dot.gov, Department of Transportation, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

OMB Control Number: 2126–0049.

Type of Request: Revision of a currently-approved information collection.

Respondents: State and local agencies, general public and stakeholders, original equipment manufacturers (OEM) and suppliers to the commercial motor vehicle (CMV) industry, fleets, owner-operators, state CMV safety agencies, research organizations and

contractors, news organizations, safety advocacy groups, and other Federal agencies.

Estimated Number of Respondents: 14,100.

Estimated Time per Response: Range from 5–30 minutes.

Expiration Date: September 30, 2014.

Frequency of Response: Generally, on an annual basis.

Estimated Total Annual Burden: 3,450.

Background: Executive Order 12862 “Setting Customer Service Standards,” direct Federal agencies to provide service to the public that matches or exceeds the best service available in the private sector (58 FR 48257, Sept. 11, 1993). In order to work continuously to ensure that our programs are effective and meet our customers’ needs, FMCSA seeks to obtain OMB approval of a generic clearance to collect qualitative feedback from our customers on our service delivery. The surveys covered in this generic clearance will provide a means for FMCSA to collect this data directly from our customers. The information collected from our customers and stakeholders will help ensure that users have an effective, efficient, and satisfying experience with FMCSA’s programs. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. It will also allow feedback to contribute directly to the improvement of program management. The responses to the surveys will be voluntary and will not involve information that is required by regulations.

Public Comments Invited

FMCSA requests that you comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for FMCSA to perform its functions, (2) the accuracy of the estimated burden, (3) ways for the FMCSA to enhance the quality, usefulness, and clarity of the collected information, and (4) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize or include your comments in the request for OMB’s clearance of this information collection.

Issued under the authority delegated in 49 CFR 1.87 on: July 1, 2014.

G. Kelly Regal,

Associate Administrator, Office of Research and Information Technology and Chief Information Officer.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2008-0362]

Medical Review Board Public Meeting

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of Medical Review Board (MRB) public meeting.

SUMMARY: FMCSA announces that the Medical Review Board will meet on Tuesday and Wednesday, July 29-30, 2014. The MRB will continue its deliberations on Schedule II Controlled Substances and their effect on commercial motor vehicle (CMV) drivers' ability to operate safely. The entire meeting is open to the public and there will be a public comment period at the end of each day.

Time and Dates: The meeting will be held on Tuesday, July 29, 2014, from 9:00 a.m. to 4:30 p.m., and on Wednesday, July 30, 2014, from 9 a.m. to 12:00 p.m., Eastern Daylight Time (E.D.T.). The meeting will be held at the FMCSA National Training Center (NTC), 1310 North Courthouse Road, Suite 600, Arlington, VA. The NTC is located near the Courthouse Metro station.

An agenda for the meeting will be made available in advance of the meeting at <http://mrb.fmcsa.dot.gov>.

FOR FURTHER INFORMATION CONTACT: Eileen Nolan, R.N., MRB Liaison, Medical Programs Division, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590, (202) 366-4001, fmcsamedical@dot.gov.

Services for Individuals With Disabilities

For information on facilities or services for individuals with disabilities or to request special assistance at the meeting, contact Mr. Eran Segev at (617) 494-3174, eran.segev@dot.gov, by Monday, July 21, 2014.

SUPPLEMENTARY INFORMATION:

I. Background

MRB

Section 4116 of the Safe, Accountable, Flexible, Efficient Transportation Equity

Act: A Legacy for Users (SAFETEA-LU), [Pub. L. 109-59, 119 Stat. 1144, Aug. 10, 2005] requires the Secretary of Transportation, with the advice of the MRB and the chief medical examiner, to establish, review, and revise "medical standards for operators of commercial motor vehicles that will ensure that the physical condition of operators of commercial motor vehicles is adequate to enable them to operate the vehicles safely." Composed of five medical experts who each serve 2-year terms, the MRB members are appointed by the Secretary.

The MRB operates in accordance with the Federal Advisory Committee Act (FACA) as announced in the **Federal Register** (70 FR 57642, October 3, 2005). The MRB is charged with the review of all current FMCSA medical standards (49 CFR 391.41), as well as proposing new science-based standards and guidelines to ensure that drivers operating CMVs in interstate commerce, as defined in 49 CFR 390.5, are physically capable of doing so.

II. Meeting Participation

Oral comments from the public will be heard during the last thirty minutes of each day of the meeting. Should all public comments be exhausted prior to the end of the specified period, the comment period will close.

Members of the public may submit written comments by Monday, July 21, 2014, to Federal Docket Management System (FDMS) Docket Number FMCSA-2008-0362 using one of the following methods:

- **Federal eRulemaking Portal:** Go to <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- **Fax:** 202-493-2251.
- **Mail:** Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Room W12-140, Washington, DC 20590.
- **Hand Delivery:** U.S. Department of Transportation, 1200 New Jersey Avenue SE., Room W12-140, Washington, DC, between 9 a.m. and 5 p.m., E.T. Monday through Friday, except Federal holidays.

Issued on: July 3, 2014.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2010-0014]

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew the exemptions from the vision requirement in the Federal Motor Carrier Safety Regulations for 14 individuals. FMCSA has statutory authority to exempt individuals from the vision requirement if the exemptions granted will not compromise safety. The Agency has concluded that granting these exemption renewals will provide a level of safety that is equivalent to or greater than the level of safety maintained without the exemptions for these commercial motor vehicle (CMV) drivers.

DATES: This decision is effective August 9, 2014. Comments must be received on or before August 11, 2014.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) numbers: Docket No. [Docket No. FMCSA-2010-0014], using any of the following methods:

- **Federal eRulemaking Portal:** Go to <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.
- **Mail:** Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12-140, Washington, DC 20590-0001.
- **Hand Delivery or Courier:** West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.
- **Fax:** 1-202-493-2251.

Instructions: Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received without change to <http://www.regulations.gov>, including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments, go to <http://www.regulations.gov> at any time or Room W12-140 on the ground level of

the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Federal Docket Management System (FDMS) is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: Anyone may search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or of the person signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's Privacy Act Statement for the Federal Docket Management System (FDMS) published in the **Federal Register** on January 17, 2008

(73 FR 3316).

FOR FURTHER INFORMATION CONTACT:

Elaine M. Papp, Chief, Medical Programs Division, 202-366-4001, fmcsamedical@dot.gov, FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64-224, Washington, DC 20590-0001. Office hours are from 8:30 a.m. to 5 p.m. Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may renew an exemption from the vision requirements in 49 CFR 391.41(b)(10), which applies to drivers of CMVs in interstate commerce, for a two-year period if it finds "such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption." The procedures for requesting an exemption (including renewals) are set out in 49 CFR part 381.

Exemption Decision

This notice addresses 14 individuals who have requested renewal of their exemptions in accordance with FMCSA procedures. FMCSA has evaluated these 14 applications for renewal on their merits and decided to extend each exemption for a renewable two-year period. They are:

David E. Balboni (MA)
Mark S. Berkheimer (PA)
Tony K. Ellis (IN)
Rici W. Giesseman (OH)
Michael A. Jabro (MI)
Michael M. Martinez (NM)

Robert L. McClain (MI)
Daniel E. Miller (VA)
Buddy W. Myrick (TX)
James L. Okonek (WI)
Alan J. Reynaldos (NJ)
Charles L. Rill, Sr. (MD)
Robert Smiley (NM)
Roger L. Sulfridge (KY)

The exemptions are extended subject to the following conditions: (1) That each individual has a physical examination every year (a) by an ophthalmologist or optometrist who attests that the vision in the better eye continues to meet the requirements in 49 CFR 391.41(b)(10), and (b) by a medical examiner who attests that the individual is otherwise physically qualified under 49 CFR 391.41; (2) that each individual provides a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (3) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file and retains a copy of the certification on his/her person while driving for presentation to a duly authorized Federal, State, or local enforcement official. Each exemption will be valid for two years unless rescinded earlier by FMCSA. The exemption will be rescinded if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315.

Basis for Renewing Exemptions

Under 49 U.S.C. 31315(b)(1), an exemption may be granted for no longer than two years from its approval date and may be renewed upon application for additional two year periods. In accordance with 49 U.S.C. 31136(e) and 31315, each of the 14 applicants has satisfied the entry conditions for obtaining an exemption from the vision requirements (75 FR 34210; 75 FR 34211; 75 FR 34212; 75 FR 47888; 77 FR 40945). Each of these 14 applicants has requested renewal of the exemption and has submitted evidence showing that the vision in the better eye continues to meet the requirement specified at 49 CFR 391.41(b)(10) and that the vision impairment is stable. In addition, a review of each record of safety while driving with the respective vision deficiencies over the past two years indicates each applicant continues to meet the vision exemption requirements.

These factors provide an adequate basis for predicting each driver's ability to continue to drive safely in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each renewal applicant for a period of two years is likely to achieve a level of safety equal to that existing without the exemption.

Request for Comments

FMCSA will review comments received at any time concerning a particular driver's safety record and determine if the continuation of the exemption is consistent with the requirements at 49 U.S.C. 31136(e) and 31315. However, FMCSA requests that interested parties with specific data concerning the safety records of these drivers submit comments by August 11, 2014.

FMCSA believes that the requirements for a renewal of an exemption under 49 U.S.C. 31136(e) and 31315 can be satisfied by initially granting the renewal and then requesting and evaluating, if needed, subsequent comments submitted by interested parties. As indicated above, the Agency previously published notices of final disposition announcing its decision to exempt these 14 individuals from the vision requirement in 49 CFR 391.41(b)(10). The final decision to grant an exemption to each of these individuals was made on the merits of each case and made only after careful consideration of the comments received to its notices of applications. The notices of applications stated in detail the qualifications, experience, and medical condition of each applicant for an exemption from the vision requirements. That information is available by consulting the above cited **Federal Register** publications.

Interested parties or organizations possessing information that would otherwise show that any, or all, of these drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315, FMCSA will take immediate steps to revoke the exemption of a driver.

Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone

number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to <http://www.regulations.gov> and in the search box insert the docket numbers FMCSA-2010-0114 and click the search button. When the new screen appears, click on the blue "Comment Now!" button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and material received during the comment period and may change this proposed rule based on your comments. FMCSA may issue a final rule at any time after the close of the comment period.

Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble, To submit your comment online, go to <http://www.regulations.gov> and in the search box insert the docket number FMCSA-2010-0114 and click "Search." Next, click "Open Docket Folder" and you will find all documents and comments related to the proposed rulemaking.

Issued on: June 30, 2014.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Intercity Passenger Rail Grade Crossing Improvements, Positive Train Control Implementation, and Passenger Rail Corridor Investment Plan Grant Funds

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of funding availability.

SUMMARY: This notice details the application requirements and procedures for obtaining funding for eligible intercity passenger rail grade

crossing improvement projects, positive train control implementation projects, and Passenger Rail Corridor Investment Plan projects. The opportunities described in this notice are available under Catalog of Federal Domestic Assistance (CFDA) number 20.314, "Railroad Development."

DATES: Applications for funding under this solicitation are due no later than 5:00 p.m. EDT, September 15, 2014.

Applications for funding received after 5:00 p.m. EDT on September 15, 2014 will not be considered. See Section 4 of this notice for additional information regarding the application process.

ADDRESSES: Applications must be submitted via Grants.gov. For any required or supporting application materials that an applicant is unable to submit via Grants.gov (such as oversized engineering drawings), an applicant may submit an original and two (2) copies to Mary Ann Mcnamara, Office of Program Delivery, Federal Railroad Administration, 1200 New Jersey Avenue SE, Mail Stop 20, Washington, DC 20590. However, due to delays caused by enhanced screening of mail delivered via the U.S. Postal Service, applicants are advised to use other means of conveyance (such as courier service) to assure timely receipt of materials.

FOR FURTHER INFORMATION CONTACT: For further information regarding this notice, please contact Mary Ann McNamara, Office of Program Delivery, Federal Railroad Administration, 1200 New Jersey Avenue SE., Mail Stop 20, Washington, DC 20590; Email: maryann.mcnamara@dot.gov; Phone: (202) 493-6393; Fax: (202) 493-6333.

SUPPLEMENTARY INFORMATION:

Notice to applicants: The FRA recommends applicants read this notice in its entirety prior to preparing application materials. There are several administrative prerequisites described herein that applicants must comply with in order to submit an application, as well as application requirements that may differ depending on the type of project and funding sought. The FRA has also established the FY14 Grant Application Solicitation homepage on the FRA Web site, which houses certain required application materials and additional guidance for topics referenced in this notice. The FY14 Grant Application Solicitation homepage is located at www.fra.dot.gov/Page/P0701.

Additionally, applicants should note that the required Project Narrative component of the application package may not exceed 25 pages in length (including any appendices).

Table of Contents:

1. Funding Opportunity Description
2. Award Information
3. Eligibility and Review Criteria
4. Application and Submission Information
5. Award Administration Information
6. Agency Contact

Section 1: Funding Opportunity Description

1.1 Background

The purpose of this notice is to solicit applications for eligible intercity passenger rail grade crossing improvement projects, positive train control implementation projects, and Passenger Rail Corridor Investment Plan projects. The funding available under this solicitation was appropriated by Congress over a period of several years. Most recently, the Consolidated Appropriations Act, 2014 (FY14 Omnibus, Pub. L. 113-76, January 17, 2014) made available \$41,827,500 in unobligated funding originally authorized under the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU, Pub. L. 109-59, August 10, 2005; and later amended under the SAFETEA-LU Technical Corrections Act, Pub. L. 110-244, June 6, 2008) and originally appropriated under the Consolidated Appropriations Act, 2008 (Pub. L. 110-161, December 26, 2007) and Omnibus Appropriations Act, 2009 (Pub. L. 111-8, March 11, 2009). FRA is also making available at least \$16,500,000 in additional unobligated funds previously appropriated to FRA under its High-Speed Intercity Passenger Rail (HSIPR) Program. These unobligated funds are available due to projects that were completed under budget or that were not completed as originally anticipated. This notice is also intended to establish a pool of applications that could receive any additional eligible funding that may become available under similar circumstances in the near future.

1.2 FRA-Led Multi-State Planning

In addition to the funding opportunities described in this notice, the FY14 Omnibus also permits the Secretary of Transportation to retain a portion of the \$41,827,500 in previous SAFETEA-LU funds to facilitate—at the Federal level—the preparation of planning documents for passenger rail corridors and networks located in multiple states. The Secretary of Transportation has exercised this authority to provide \$22,000,000 to complete the Department's NEC FUTURE program, which is a comprehensive planning effort to define, evaluate, and prioritize future

high-speed rail investments along the Northeast Corridor (additional information regarding NEC FUTURE is available at www.NECFUTURE.com). In addition to NEC FUTURE, the FRA is soliciting statements of interest from other groups of states that wish to participate in an FRA-led planning process for multi-state passenger rail

networks. Additional information on this FRA-led planning process, including how to submit statements of interest, is available at www.fra.dot.gov/Page/P0021.

1.3 Funding Approach

In total, at least \$36,327,500 is available for awards under this solicitation. The following table

summarizes the amount of funding available per funding source, as well as the eligible project categories and match requirements. Section 3 of this notice provides detailed information and instructions pertaining to applicant and project eligibility, cost sharing and match requirements, and application review criteria.

Program/funding source	Amount available	Eligible project categories	Required federal/non-federal match percentage
New FY14 Omnibus Authority	\$19,827,500	<ul style="list-style-type: none"> • Intercity Passenger Rail Capital • Railroad Safety Technology. • High-Speed Rail Corridor Planning. • FRA-Led Multi-State Planning¹ 	80–20. (100 percent Federal for FRA-Led Planning).
Remaining FY10 HSIPR	\$5,200,000	<ul style="list-style-type: none"> • Intercity Passenger Rail Capital 	80–20
Remaining FY08/FY09 HSIPR	\$11,300,000	<ul style="list-style-type: none"> • Intercity Passenger Rail Capital 	50–50
Total	36,327,500		

As the table above indicates, and unlike the remaining FY08, FY09, and FY10 HSIPR Program funding, the \$19,827,500 made available by the FY14 Omnibus may fund multiple project types—intercity passenger rail capital (49 U.S.C. 24401(2)(A)), railroad safety technology (49 U.S.C. 20158), high-speed rail corridor planning (49 U.S.C. 26101(b)), and FRA-led multi-state planning (FY14 Omnibus). Subject to the type and quality of applications received, the FRA intends to award/allocate the funding made available by the FY14 Omnibus to projects under each of the eligible project types. However, the FRA is not predetermining specific dollar allocations among these project types.

In order to maximize the benefits of the amount of funding available, the FRA is choosing to further focus the broad project eligibilities allowed for under the appropriations acts to specific project types that align with FRA’s current mission and objectives. Applications for projects under the “intercity passenger rail capital” category should focus on grade crossing improvement projects related to intercity passenger rail service; applications for projects under the “railroad safety technology” category should focus on positive train control (PTC) implementation projects; and applications for projects under the “high-speed rail corridor planning” category should focus on developing new or expanded Passenger Rail

Corridor Investment Plans. Additional information of these more focused project types is contained in Section 3 of this notice and on the FY14 Grant Application Solicitation homepage at www.fra.dot.gov/Page/P0701.

1.4 Legislative Authority

The funding made available under this notice was appropriated from the following sources:

- Consolidated Appropriations Act, 2008 (Pub. L. 110–161, December 26, 2007);
- Omnibus Appropriations Act, 2009 (Pub. L. 111–8, March 11, 2009);
- Consolidated Appropriations Act, 2010 (Pub. L. 111–117, December 16, 2009); and
- Consolidated Appropriations Act, 2014 (Pub. L. 113–76, January 17, 2014).

The activities under the FY10 and FY14 funding are authorized by the Passenger Rail Investment and Improvement Act, 2008 (Pub. L. 110–432, October, 16, 2008). The activities under the FY08 and FY09 funding are authorized through their respective appropriations acts and do not have any underlying statutory authorization.

Section 2: Award Information

2.1 Application Limits

The FRA anticipates making multiple awards from the funding made available in this notice and is not predetermining any minimum or maximum dollar amounts for awards. However, given the relatively limited amount of funding that is currently available, applicants are encouraged to constrain their Federal funding requests to a maximum of \$3,000,000 per application. While this \$3,000,000 application limit is a recommendation and not a firm requirement, applications exceeding

this \$3,000,000 threshold must explain why any requested funding over \$3,000,000 is necessary to implement the proposed project. Applicants for grade crossing projects in particular are advised to subdivide higher-cost undertakings into separate project components or discrete phases that demonstrate operational independence and public benefits in order to give FRA maximum flexibility in selecting projects or project components. Additionally, the FRA may choose to award a grant for less than the amount requested in the application.

FRA will make awards for projects selected under this notice through cooperative agreements. Cooperative agreements allow for greater Federal involvement in carrying out the agreed upon investment, including technical assistance, review of interim work products, and increased program oversight. The funding provided under these cooperative agreements will be made available to grantees on a reimbursable basis.

2.2 Application Review Process

Applications will proceed through a three-part review process:

1. Screening for completeness and eligibility;
2. Evaluation of eligible applications by technical panels applying the evaluation criteria; and
3. Project selection by the FRA Administrator applying additional selection criteria.

Each application will first be screened for eligibility (requirements outlined in Section 3 of this notice) and completeness (containing all required documentation outlined in Section 4 of this notice).

¹ Statements of interest for FRA-led multi-state planning are being requested separately and will not be accepted or considered through this solicitation. Additional information on this FRA-led planning process, including how to submit statements of interest, is available at www.fra.dot.gov/Page/P0021.

Eligible and complete applications will then be evaluated by technical panels consisting of subject-matter experts against the evaluation criteria (outlined in Section 3 of this notice). The FRA will not assign specific numerical scores to applications based on the evaluation criteria. Rather, ratings of “highly recommended,” “recommended,” “acceptable,” or “not recommended” will be assigned for each evaluation criterion upon which the applications are being reviewed.

The ratings assigned by the technical panels will not in themselves constitute the final award determination, as this is only the second step in the review process. All eligible and complete applications, regardless of the ratings they receive from the technical panels, will be advanced to the FRA Administrator for funding consideration. The FRA Administrator will also take into consideration several cross-cutting and comparative selection criteria (see Section 3.4 of this notice) to determine awards. The FRA will award funds to projects that are well-aligned with one or more of the evaluation and selection criteria. In addition, FRA will consider whether a project has a negative effect on any of the evaluation and selection criteria, and any such negative effect may reduce the likelihood that the project will be selected for award.

Section 3: Eligibility and Review Criteria

This notice solicits applications for three distinct project types, with funding appropriated from several sources. As such, there are varying minimum requirements that applications must meet related to applicant eligibility, project eligibility, cost sharing, and the fulfillment of other prerequisites. The differences among the three project types also necessitate that they be reviewed against separate evaluation criteria. Section 3.1 of this notice will cover the eligibility and review requirements for intercity passenger rail grade crossing improvement projects, Section 3.2 for positive train control implementation projects, and Section 3.3 for Passenger Rail Corridor Investment Plan projects. Section 3.4 of this notice will cover the additional selection criteria that will be applied to all applications by the FRA Administrator.

3.1 Intercity Passenger Rail Grade Crossing Improvement Projects

3.1.1 Applicant Eligibility

The following entities are eligible applicants for intercity passenger rail grade crossing improvement projects:

- States (including the District of Columbia);
- Groups of States;
- Interstate compacts; and
- Public agencies established by one or more States and having responsibility for providing intercity passenger rail service.

3.1.2 Project Eligibility

Eligible grade crossing projects must involve capital improvements to highway-rail grade crossings that are related to intercity passenger rail service. Applicants must demonstrate that a proposed project is both a capital improvement to a highway-rail grade crossing and that the project improves intercity passenger rail service. The following is a non-exhaustive list of eligible grade crossing projects:

- Safety and/or operational improvements at public or private grade crossings;
- Installation of or upgrades to crossing signal equipment;
- Crossing closures;
- Grade separations;
- Pedestrian crossing improvements;
- Track circuitry improvements to activate warning devices;
- Integration of crossing warning systems with advanced train control, signal preemption, and intelligent highway traffic control systems; and
- Other civil or utility projects that improve crossing surfaces, lighting, and sight distance.

3.1.3 Non-Federal Match Requirements and Other Funding Restrictions

As outlined in Section 1.3 of this notice, intercity passenger rail grade crossing projects are eligible to be funded from three separate sources of funding. Both the \$19,827,500 made available by the FY14 Omnibus and the \$5,200,000 in remaining FY10 HSIPR Program funding allow for up to an 80 percent Federal share of project costs. However, the remaining \$11,300,000 in FY08/FY09 HSIPR Program funding limits the Federal share of project costs to 50 percent. The required 20 percent or 50 percent non-Federal match, depending on the funding source, may be composed of public sector (state or local) or private sector funding. However, the FRA cannot consider any other Federal funds, nor any non-Federal funds already expended (or

otherwise encumbered), towards the matching requirement. Additionally, FRA is limiting the method for calculating the non-Federal match to cash contributions only—“in-kind” contributions will not be accepted. Matching funds provided in excess of the minimum requirements will be considered in evaluating the merit of an application.

Applicants that propose a 50 percent non-Federal match will be more likely to have their applications selected for funding, as they will be eligible to receive funding under each of the three funding sources contained in this notice (and specifically the \$11,300,000 in 50–50 match funding that is dedicated to grade crossing projects). However, these 50–50 match funds contain three eligibility restrictions that differ from the 80–20 match funds:

- States are the only eligible applicant type;
- Proposed projects must be specifically included in the applicant’s Statewide Transportation Improvement Program (STIP) at the time of application to be eligible; and
- States must include intercity passenger rail services as an integral part of statewide transportation planning as required under 23 U.S.C. 135.

3.1.4 Evaluation Criteria

The FRA intends to award funds to grade crossing projects that achieve the maximum public benefits possible, given the amount of funding available. Analysis provided by applicants that quantifies the monetary value (whenever possible) of the anticipated public benefits of the proposed project will be particularly relevant to the FRA in evaluating applications.² The systematic process of comparing expected benefits and costs helps decision-makers organize information about, and evaluate trade-offs between, alternative transportation investments. The FRA will consider benefits and costs using standard data and qualitative information provided by applicants and will evaluate applications in a manner consistent with Executive Order 12893 (Principles for Federal Infrastructure Investments, 59 FR 4233), OMB Circular A–94

² Applicants are encouraged to reference Sections 1 and 2 of the Transportation Investment Generating Economic Recovery (TIGER) Benefit-Cost Analysis Resource Guide for recommended values to use in monetizing benefits and costs of transportation projects. This Resource Guide was developed by the U.S. Department of Transportation for use in the TIGER Discretionary Grant program and can be located on the FY14 Application Solicitation homepage at www.fra.dot.gov/Page/PO701.

(Guidelines and Discount Rates for Benefit-Cost Analysis of Federal Programs), and OMB Circular A-4 (Regulatory Analysis).

The FRA intends to analyze all grade crossing applications utilizing FRA's GradeDec tool to support the evaluation process. GradeDec is a web-based application and decision support tool intended for the identification and evaluation of highway-rail grade crossing upgrades, separations, and closures. The GradeDec tool was designed for the needs of Federal, state, and local authority decision makers, and employs benefit-cost methodologies to assess grade crossing investment alternatives at the corridor level or in a region. The modeling frameworks built into the GradeDec tool were developed by the FRA and include research findings from the Volpe National Transportation Systems Center and the National Cooperative Highway Research Program. Additional information on GradeDec is available at www.fra.dot.gov/Page/P0337.

Applications for intercity passenger rail grade crossing projects will be reviewed by panels of DOT subject-matter experts against the following three evaluation criteria.

Safety Benefits

The following factors will be considered in assessing a proposed project's achievement of safety benefits:

- The extent to which the proposed project will improve safety at a crossing or series of crossings where safety incidents have recently occurred or where a high potential exists for accidents between pedestrian and/or vehicle traffic and intercity passenger rail operations;

- Whether the proposed project will upgrade a crossing or a series of crossings to create a "sealed corridor" segment utilizing advanced warning technology, four-quadrant gates, or median separators—with preference to crossing closures;

- The proposed project's ability to foster a safe, connected, accessible transportation system for the multimodal movement of people and goods;

- The extent to which the proposed project conforms with FRA's "High-Speed Passenger Rail Safety Strategy" guidance that was published in November 2009 (<http://www.fra.dot.gov/eLib/Details/L03624>); and

- Where applicable, the extent to which the proposed project will improve the safety of transporting energy products on rail routes over which both intercity passenger rail and freight rail services operate.

Transportation Benefits

The following factors will be considered in assessing a proposed project's achievement of non-safety related transportation benefits:

- The extent to which the proposed project contributes to other improvements to intercity passenger rail operations, as reflected by estimated increases in operational reliability and on-time performance, increases in average and/or top operating speeds, increases in ridership, reductions in trip times, additional service frequencies, and other related factors;

- The extent to which a proposed project generates cross-modal benefits for commuter rail, freight rail (including ports served by freight rail), or highway operations and safety;

- The extent to which a proposed project benefits a "state-supported" intercity passenger rail service and enables state sponsors and their partners to invest in additional capital projects; and

- The extent to which the proposed project will mitigate mobility and access barriers for all modes of transportation—including bicycle and pedestrian enhancements—and better connect communities to centers of employment, education, and services (including for non-drivers) and that hold promise to stimulate long-term job growth, especially in economically distressed areas.

Project Development Approach

The following factors will be considered in assessing how the proposed project was planned and developed to date:

- The applicant's progress, at the time of application, in reaching compliance with the National Environmental Policy Act (NEPA) for the proposed project.

Although a NEPA decision document (Record of Decision, Finding of No Significant Impact, Categorical Exclusion determination) is not required at the time of application, projects that utilize innovative project delivery approaches to expedite NEPA or are accompanied by a final NEPA determination will be looked upon favorably during the evaluation and selection process;

- The proposed project's consistency with an adopted service development plan and state rail plan;

- The quality and completeness of the proposed project's Statement of Work, including whether a sufficient level of detail regarding scope, schedule, and budget is provided to immediately advance the project to award;

- The level of support demonstrated for the application and proposed project

from key project partners (letters of support are encouraged), including the infrastructure owning railroad, railroad operator, local governments, and other relevant stakeholders;

- The equitable financial participation from benefiting entities in the project's financing;

- The applicant's financial, legal, and technical capacity to implement the project; and

- Whether the engineering materials submitted with the application are of sufficient quality to assess the proposed project's design and constructability risks.

3.2 Positive Train Control Implementation Projects

3.2.1 Applicant Eligibility

The following entities are eligible applicants for positive train control implementation projects:

- Passenger and freight railroad carriers;

- Railroad suppliers; and

- State and local governments.

To be eligible for assistance, the above entities must have either received approval of the Technology Implementation Plans (TIP) and Positive Train Control Implementation Plans (PTCIP) required by 49 U.S.C. 20156(e)(2) and 20157, or demonstrate to the satisfaction of the FRA that they are currently developing the required plans where applicable. Preference will be given in the following order:

1. Entities that have completed and received FRA approval of both their TIP and PTCIP.

2. Entities that have completed and received FRA approval of their PTCIP.

3. Entities that have submitted their PTCIP to FRA for approval.

4. Entities that have certified to FRA progress towards completion of their PTCIP and TIP.

5. All other eligible entities.

Collaborative project submissions by freight and passenger carriers, suppliers, and State and local governments on eligible projects will be evaluated more favorably.

3.2.2 Project Eligibility

The FRA is soliciting applications for projects that will benefit the overall implementation of positive train control on freight, intercity passenger, and commuter railroads. Given that the amount of funding available is not likely sufficient to cover the costs necessary to deploy positive train control on any given railroad, applications should focus on the research and development of technologies that will lower the costs, speed implementation, increase

interoperability, and improve the reliability of positive train control systems.

The FRA is particularly interested in advancing research and development on the following topics related to positive train control: cybersecurity and wireless communications security, back-office reliability, and deployment of an Interoperable Train Control Messaging (ITCM/ITCSM) shared network for short lines and commuter railroads. Additional information on these suggested topic areas are located on the FY14 Application Solicitation homepage at www.fra.dot.gov/Page/PO701. Applicants should note that these topics represent suggested areas of interest by the FRA, and any otherwise eligible applications meeting the criteria above will be evaluated and considered for award.

3.2.3 Non-Federal Match Requirements

The \$19,827,500 made available by the FY14 Omnibus is the only source of funding contained in this notice under which positive train control implementation projects may be funded. The FY14 Omnibus allows for up to an 80 percent Federal share of project costs. The required 20 percent non-Federal match may be composed of public sector (state or local) or private sector funding. However, the FRA cannot consider any other Federal funds, nor any non-Federal funds already expended (or otherwise encumbered), towards the matching requirement. Additionally, FRA is limiting the method for calculating the non-Federal match to cash contributions only—"in-kind" contributions will not be accepted. Matching funds provided in excess of the minimum requirements will be considered in evaluating the merit of an application.

3.2.4 Evaluation and Selection Criteria

The FRA intends to award funds to positive train control implementation projects that achieve the maximum public benefits possible, given the amount of funding available. Analysis provided by applicants that quantifies the monetary value (whenever possible) of the anticipated public benefits of the proposed project will be particularly relevant to the FRA in evaluating applications.³ The systematic process of

comparing expected benefits and costs helps decision-makers organize information about, and evaluate trade-offs between, alternative transportation investments. The FRA will consider benefits and costs using standard data and qualitative information provided by applicants and will evaluate applications in a manner consistent with Executive Order 12893 (Principles for Federal Infrastructure Investments, 59 FR 4233), OMB Circular A-94 (Guidelines and Discount Rates for Benefit-Cost Analysis of Federal Programs), and OMB Circular A-4 (Regulatory Analysis).

Applications for positive train control implementation projects will be reviewed by panels of DOT subject-matter experts against the following three evaluation criteria.

PTC Deployment Benefits

The following factors will be considered in assessing a proposed project's achievement of PTC deployment benefits:

- The degree to which the successful implementation of the proposed idea would advance the technical deployment of PTC, including improvements to reliability, safety, security, and maintainability, among others issues; and
- The degree to which the successful implementation of the proposed idea would decrease PTC implementation and maintenance costs.

Technical Merit

The following factors will be considered in assessing a proposed project's technical merit:

- The degree to which proposed ideas exhibit a sound scientific and engineering basis;
- How well the proposed ideas could be practically applied in, and would be compatible with, the railroad environment; and
- The perceived likelihood of technical and practical success.

Project Development Approach

The following factors will be considered in assessing how the proposed project was planned and developed to date:

- The technical qualifications and demonstrated experience of key personnel proposed to lead and perform the technical efforts, and qualifications of primary and supporting organizations to fully and successfully execute the proposal plan within proposed timeframe and budget;
- The degree to which proposed effort is supported by multiple entities (letters of support are encouraged);

- The affordability and degree to which the proposed effort appears to be a good value for the amount of funding requested;

- The reasonableness and realism of the proposed costs; and
- The extent of proposed cost sharing or cost participation under the proposed effort (exclusive of the applicant's prior investment).

All evaluation criteria, when combined, are significantly more important than cost or price alone. Technical merit is appreciably more important than cost or price and, as such, greater consideration will be given to technical excellence rather than cost or price alone. An offer must be found acceptable under all applicable evaluation factors to be considered eligible for award. Awards will be made to applicants whose offers provide the best value to the Government in terms of technical excellence, cost or price, and performance risk to include consistency and accord with the objectives of the solicitation and FRA's expressed areas of interest.

3.3 Passenger Rail Corridor Investment Plans

3.3.1 Applicant Eligibility

The following entities are eligible applicants for Passenger Rail Corridor Investment Plan projects:

- States (including the District of Columbia);
- Groups of States;
- Interstate compacts; and
- Public agencies established by one or more States and having responsibility for providing intercity passenger rail service.

3.3.2 Project Eligibility

Passenger Rail Corridor Investment Plans consist of two distinct components: (1) A service development plan and (2) corridor-wide environmental documentation. Applicants requesting funding to develop a Passenger Rail Corridor Investment Plan must apply for any necessary work to develop *both* elements, the service development plan and corridor-wide environmental documentation. If the applicant has already completed one of these documents or a component thereof, FRA must have accepted that document as meeting the minimum requirements in order for the applicant to receive a grant to complete the remaining component(s). Similarly, applicants that have either already completed or are in the process of developing elements of a Passenger Rail Corridor Investment Plan through an FRA grant may request

³ Applicants are encouraged to reference Sections 1 and 2 of the TIGER Benefit-Cost Analysis Resource Guide for recommended values to use in monetizing benefits and costs of transportation projects. This Resource Guide was developed by the U.S. Department of Transportation for use in the TIGER Discretionary Grant program and can be located on the FY14 Application Solicitation homepage at www.fra.dot.gov/Page/PO701.

additional Federal funding to expand the scope or geographic study area of the existing planning effort. However, any additional funding requested must result in a fully completed Passenger Rail Corridor Investment Plan. Additionally, pursuant to the FY14 Omnibus, corridor planning improvements grants are only available for passenger rail corridors that are not covered by a Tier 1 Environmental Impact Statement completed within the last ten years (since January 17, 2004). Further guidance on the required elements of a Passenger Rail Corridor Investment Plan is available on the FY14 Grant Application Solicitation homepage at www.fra.dot.gov/Page/P0701.

3.3.3 Non-Federal Match Requirements

The \$19,827,500 made available by the FY14 Omnibus is the only source of funding contained in this notice under which Passenger Rail Corridor Investment Plans may be funded. The FY14 Omnibus required that the Secretary of Transportation make no less than \$20,000,000 available for corridor planning. Although this requirement has already been met by the Department allocating \$22,000,000 to complete NEC FUTURE (as described in Section 1.2 of this notice), the FRA intends to award funds from the \$19,827,500 remaining for additional meritorious planning projects. The FY14 Omnibus allows for an up to 80 percent Federal share of project costs. The required 20 percent non-Federal match may be composed of public sector (state or local) or private sector funding. However, the FRA cannot consider any other Federal funds, nor any non-Federal funds already expended (or otherwise encumbered), towards the matching requirement. Additionally, FRA is limiting the method for calculating the non-Federal match to cash contributions only—"in-kind" contributions will not be accepted. Matching funds provided in excess of the minimum requirements will be considered in evaluating the merit of an application.

3.3.4 Evaluation and Selection Criteria

The FRA intends to award funds to Passenger Rail Corridor Investment Plan projects that achieve the maximum public benefits possible, given the amount of funding available. Analysis provided by applicants that quantifies the monetary value (whenever possible) of the anticipated public benefits of the underlying projects of the Passenger Rail Corridor Investment Plan will be particularly relevant to the FRA in

evaluating applications.⁴ The systematic process of comparing expected benefits and costs helps decision-makers organize information about, and evaluate trade-offs between, alternative transportation investments. The FRA will consider benefits and costs using standard data and qualitative information provided by applicants and will evaluate applications in a manner consistent with Executive Order 12893 (Principles for Federal Infrastructure Investments, 59 FR 4233), OMB Circular A-94 (Guidelines and Discount Rates for Benefit-Cost Analysis of Federal Programs), and OMB Circular A-4 (Regulatory Analysis).

Applications for Passenger Rail Corridor Investment Plan projects will be reviewed by panels of DOT subject-matter experts against the following two evaluation criteria:

Potential Transportation and Other Public Benefits

The following factors will be considered in assessing a proposed project's potential achievement of transportation and other public benefits:

- The clarity and detail with which the applicant has identified the need to be addressed by the proposed service;
- The market potential of the corridor being studied, taking into consideration such factors as population demographics, density, economic activity, and travel patterns;
- The potential for the corridor investment to deliver high-speed and intercity passenger rail service benefits, including ridership, on-time performance reliability, travel time, service frequencies, safety, and other factors;
- The extent to which the Passenger Rail Corridor Investment Plan will examine and evaluate non-transportation issues that could provide public benefits, including but not limited to land use, economic development, energy efficiency and environmental quality, transportation network resilience, social equity and environmental justice, and strengthening opportunities for upward socioeconomic mobility; and
- The consideration and integration of other transportation modes in the planning process and the proposed service's ability to foster a safe,

⁴ Applicants are encouraged to reference Sections 1 and 2 of the TIGER Benefit-Cost Analysis Resource Guide for recommended values to use in monetizing benefits and costs of transportation projects. This Resource Guide was developed by the U.S. Department of Transportation for use in the TIGER Discretionary Grant program and can be located on the FY14 Application Solicitation homepage at www.fra.dot.gov/Page/P0701.

connected, accessible transportation system for the multimodal movement of people and goods.

Future Program Viability and Sustainability

The following factors will be considered in assessing the potential viability and sustainability of the intercity passenger rail service under consideration in the Passenger Rail Corridor Investment Plan:

- The likelihood that the final deliverables (service development plan and environmental decision document) will be completed and of sufficient quality to be implemented upon completion of the proposed cooperative agreement;
- The demonstrated institutional commitment of the State and all other key stakeholders to quickly execute the program once planning is complete;
- The degree to which the planning process meaningfully incorporates input from affected communities, local governments, regional councils and planning organizations, neighboring States, railroads, transportation modal partners, environmental interests, workforce investment boards, the public and other stakeholders—early and throughout the process;
- The level of support demonstrated for the application, proposed study, and underlying projects from key project partners (letters of support are encouraged);
- The likelihood that the corridor(s) being studied can yield measurable service and public benefits in a reasonable period of time; and
- The demonstrated ability of the applicant and other project partners to support the future capital and operating needs of the corridor(s) being studied.

3.4 Selection Criteria

In addition to the evaluation criteria outlined above that is unique for each of the three project types covered by this notice, the FRA Administrator will apply the following selection criteria to further ensure that the projects selected for funding advance FRA's current mission and key priorities

Alignment with the DOT Strategic Goals and Priorities

- Improving transportation safety;
- Maintaining transportation infrastructure in a state of good repair;
- Promoting economic competitiveness;
- Advancing environmentally sustainable transportation policies;
- Furthering the six "Livability Principles" developed by DOT with the Department of Housing and Urban

Development and the Environmental Protection Agency as part of the Partnership for Sustainable Communities;⁵

- Enhancing quality of life; and
- Building ladders of opportunity to expand the middle class. Proposed projects and planning studies that demonstrate the ability to provide reliable, safe and affordable transportation choices to connect economically disadvantaged populations, non-drivers, senior citizens, and persons with disabilities in disconnected communities with employment, training and education will receive particular consideration during project selection.

Project Delivery Performance

- The applicant's track record in successfully delivering previous FRA and DOT grants on time, on budget, and for the full intended scope;
- The applicant's means for achieving satisfactory continuing control over project assets in a timely manner, including, but not limited to, public ownership of project assets or agreements with railroad operators and infrastructure owners at the time of application; and
- The extent to which the proposed project complements previous FRA or DOT awards.

Region/Location

- The extent to which the proposed project increases the economic productivity of land, capital, or labor at specific locations, particularly in economically distressed areas;
- Ensuring appropriate level of regional balance across the country;
- Ensuring consistency with national transportation and rail network objectives; and
- Ensuring integration with other rail services and transportation modes.

Innovation/Resource Development

- Pursuing new rail technologies that result in favorable public return on investment and ensure delivery of project benefits;
- Promoting innovations that demonstrate the value of new approaches to, among other things, transportation funding and finance, contracting, project delivery, congestion management, safety management, asset management, or long-term operations and maintenance;
- Advancing the state of the art in modeling techniques for assessing costs and benefits;

- Promoting domestic manufacturing, supply, and industrial development; and
- Developing professional railroad engineering, operating, planning, and management capacity.

Partnerships

- For projects that span multiple jurisdictions (States or local governments), emphasizing those that have organized multi-jurisdictional partnerships with joint planning and prioritization of investments;
- Strengthening human capital and workforce opportunities, particularly for low-income workers or for people in economically distressed areas;
- Employing creative approaches to ensure workforce diversity and use of disadvantaged and minority business enterprises, including opportunities for small businesses and disadvantaged business enterprises, including veteran-owned small businesses and service-disabled veteran-owned small businesses; and
- Engaging local communities and other stakeholder groups in the project in a way that offers an opportunity for meaningful engagement in the process.

Section 4: Application and Submission Information

4.1 Submission Dates and Times

Complete applications must be submitted to Grants.gov no later than 5:00 p.m. EDT, September 15, 2014. Applicants are strongly encouraged to apply early to ensure that all materials are received before this deadline.

4.2 Application Procedures

To apply for funding through Grants.gov, applicants must be properly registered. Complete instructions on how to register and submit an application can be found at Grants.gov. Registering with Grants.gov is a one-time process; however, it can take up to several weeks for first-time registrants to receive confirmation and a user password. FRA recommends that applicants start the registration process as early as possible to prevent delays that may preclude submitting an application package by the application deadline. Applications will not be accepted after the due date. Delayed registration is not an acceptable justification for an application extension.

In order to apply for funding under this announcement and to apply for funding through Grants.gov, all applicants are required to complete the following:

1. *Acquire a DUNS Number.* A Data Universal Numbering System (DUNS)

number is required for Grants.gov registration. The Office of Management and Budget requires that all businesses and nonprofit applicants for Federal funds include a DUNS number in their applications for a new award or renewal of an existing award. A DUNS number is a unique nine-digit sequence recognized as the universal standard for identifying and keeping track of entities receiving Federal funds. The identifier is used for tracking purposes and to validate address and point of contact information for Federal assistance applicants, recipients, and sub recipients. The DUNS number will be used throughout the grant life cycle. Obtaining a DUNS number is a free, one-time activity. Applicants may obtain a DUNS number by calling 1-866-705-5711 or by applying online at <http://www.dnb.com/us>.

2. *Acquire or Renew Registration with the System for Award Management (SAM) Database.* All applicants for Federal financial assistance must maintain current registrations in the System for Award Management (SAM) database. An applicant must be registered in SAM to successfully register in Grants.gov. The SAM database is the repository for standard information about Federal financial assistance applicants, recipients, and sub recipients. Organizations that have previously submitted applications via Grants.gov are already registered with SAM, as it is a requirement for Grants.gov registration. Please note, however, that applicants must update or renew their SAM registration at least once per year to maintain an active status, so it is critical to check registration status well in advance of the application deadline. Information about SAM registration procedures can be accessed at www.sam.gov.

3. *Acquire an Authorized Organization Representative (AOR) and a Grants.gov Username and Password.* Applicants must complete an AOR profile on Grants.gov and create a username and password. Applicants must use the organization's DUNS number to complete this step. Additional information about the registration process is available at www.grants.gov/applicants/get_registered.jsp.

4. *Acquire Authorization for your AOR from the E-Business Point of Contact (E-Biz POC).* The Applicant's E-Biz POC must log in to Grants.gov to confirm a representative as an AOR. Please note that there can be more than one AOR at an organization.

5. *Search for the Funding Opportunity on Grants.gov.* The Catalog of Federal Domestic Assistance (CFDA) number for

⁵ <http://www.sustainablecommunities.gov>.

this opportunity is 20.314, titled "Railroad Development."

6. *Submit an Application Addressing All of the Requirements Outlined in this Funding Availability Announcement.* After submitting the application through Grants.gov, a confirmation screen will appear on the applicant's computer screen. This screen will confirm that the applicant has submitted an application and provide a tracking number to track the status of the submission. Within 24 to 48 hours after submitting an electronic application, an applicant should receive an email validation message from Grants.gov. The validation message will explain whether the application has been received and validated or rejected, with an explanation. Applicants are urged to submit an application at least 72 hours prior to the due date of the application to allow time to receive the validation

message and to correct any problems that may have caused a rejection notification.

If an applicant experiences difficulties at any point during this process, please call the Grants.gov Customer Center Hotline at 1-800-518-4726, 24 hours a day, 7 days a week (closed on Federal holidays).

Note: Please use generally accepted formats such as .pdf, .doc, .docx, .xls, .xlsx and .ppt, when uploading attachments. While applicants may imbed picture files, such as .jpg, .gif, and .bmp, in document files, please do not submit attachments in these formats. Additionally, the following formats will not be accepted: .com, .bat, .exe, .vbs, .cfg, .dat, .db, .dbf, .dll, .ini, .log, .ora, .sys, and .zip.

4.3 *Content of Application*

Required documents for the application package are outlined in the

checklist below. Applicants are encouraged to visit the FY14 Grant Application Solicitation homepage on the FRA Web site to download the required Statement of Work template, FRA's Additional Assurances and Certifications, and the OMB Standard Forms. The FY14 Application Solicitation homepage also contains additional guidance on the application package and other relevant topics. The FY14 Grant Application Solicitation homepage is located at www.fra.dot.gov/Page/P0701. Detailed requirements for completing the Project Narrative are located below in Section 4.3.1. Brief overviews of the Statement of Work and Spatial Data submission requirements are provided in Sections 4.3.2 and 4.3.3, respectively.

Documents	Project Type		
	Grade Crossing improvements	PTC	Corridor investment plans
FRA Forms

<input type="checkbox"/> SF 424C: Budget Information-Construction	✓
<input type="checkbox"/> SF 424D: Assurances-Construction	✓
<input type="checkbox"/> SF LLL: Disclosure of Lobbying Activities	✓	✓	✓

Applicants must complete and submit all components of the application package. FRA welcomes the submission of other relevant supporting documentation that may have been developed by the applicant (planning, NEPA, engineering and design documentation, letters of support, etc.). In particular, applications accompanied by completed feasibility studies, environmental determinations, and cost estimates may be more favorably considered during the evaluation process, as they demonstrate that an applicant has a greater understanding of the scope and cost of the project.

Applicants should submit all application materials through Grants.gov. For any required or supporting application materials that an applicant is unable to submit via Grants.gov (such as oversized engineering drawings), an applicant may submit an original and two (2)

copies to Mary Ann McNamara, Office of Program Delivery, Federal Railroad Administration, 1200 New Jersey Avenue SE., Mail Stop 20, Washington, DC 20590. However, due to delays caused by enhanced screening of mail delivered via the U.S. Postal Service, applicants are advised to use other means of conveyance (such as courier service) to assure timely receipt of materials.

4.3.1 Project Narrative

The following points describe the minimum content which will be required in the Project Narrative component of grant applications (additionally, FRA recommends that the Project Narrative generally adhere to the following outline). These requirements must be satisfied through a narrative statement submitted by the applicant, and may be supported by spreadsheet documents, tables, maps, drawings, and

other materials, as appropriate. The Project Narrative may not exceed 25 pages in length (including any appendices). Applications containing Project Narratives that exceed this 25 page limitation will not be reviewed or considered for award.

The FRA recommends that applicants read this section carefully and submit all required information. In addition to the following nine standard elements that must be included in all Project Narratives, applications for intercity passenger rail grade crossing improvement projects have additional unique requirements that must be addressed in the Project Narrative. These additional requirements are outlined following the standard Project Narrative elements below:

1. Include a title page that lists the following elements in either a table or formatted list: project title, location (city, State, district), type of application

(e.g. grade crossing improvement, positive train control implementation, Passenger Rail Corridor Investment Plan), the applicant organization name, the name of any co-applicants, and the amount of Federal funding requested and the proposed non-Federal match.

2. Designate a point of contact for the applicant and provide his or her name and contact information, including phone number, mailing address and email address. The point of contact must be an employee of an eligible applicant.

3. Indicate the amount of Federal funding requested, the proposed non-Federal match, and total project cost. Additionally, identify any other sources of Federal funds committed to the project, as well as any pending Federal requests. Make sure to also note if the requested Federal funding must be obligated or expended by a certain date due to dependencies or relationships with other Federal or non-Federal funding sources, related projects, or other factors. Finally, specify whether Federal funding has ever previously been sought for the project and not secured, and name the Federal program and fiscal year from which the funding was requested.

4. Explain how the applicant meets the respective applicant eligibility criteria for the type of funding requested, as outlined in Section 3 of this notice.

5. Provide a brief 4–6 sentence summary of the proposed project, capturing the transportation challenges the proposed project aims to address, as well as the intended outcomes and anticipated benefits that will result from the proposed project.

6. Include a detailed project description that expands upon the brief summary required above. This detailed description should provide, at a minimum, additional background on the transportation challenges the project aims to address, the expected users and beneficiaries of the project, the specific components and elements of the project, and any other information the applicant deems necessary to justify the proposed project. The detailed description should also clearly explain how the proposed project meets the respective project eligibility criteria for the type of funding requested, as outlined in Section 3 of this notice.

7. Include a thorough discussion of how the project meets all of the evaluation criteria for the respective project type, as outlined in Section 3 of this notice. Applicants should note that FRA reviews applications based upon the evaluation criteria. If an application does not sufficiently address the

evaluation criteria, it is unlikely to be a competitive application. In responding to the criteria, applicants are reminded to clearly identify, quantify, and compare expected benefits and costs of proposed projects. The FRA understands that the level of detail and sophistication of analysis that should be expected for relatively small projects (i.e., those encouraged to be limited to under \$3,000,000 in this notice) is less than for larger, multi-million dollar, investments.

8. Describe proposed project implementation and project management arrangements. Include descriptions of the expected arrangements for project contracting, contract oversight, change-order management, risk management, and conformance to Federal requirements for project progress reporting.

9. Describe anticipated environmental or historic preservation impacts associated with the proposed project (or underlying projects for Passenger Rail Corridor Investment Plans), any environmental or historic preservation analyses that have been prepared, and progress toward completing any environmental documentation or clearance required for the proposed project under the National Environmental Policy Act (NEPA), the National Historic Preservation Act (NHPA), section 4(f) of the DOT Act, the Clean Water Act, or other applicable Federal or State laws. Applicants and grantees under FRA's financial assistance programs are encouraged to contact FRA and obtain preliminary direction regarding the appropriate NEPA class of action and required environmental documentation. Generally, projects will be ineligible to receive funding if they have begun construction activities prior to the applicant/grantee receiving written approval from FRA that all environmental and historical analyses have been completed. Additional information regarding FRA's environmental processes and requirements can be located on the FY14 Grant Application Solicitation homepage at www.fra.dot.gov/Page/P0701.

Additional Project Narrative Requirements for Intercity Passenger Rail Grade Crossing Improvement Applications

In addition to the nine standard Project Narrative elements required above, applicants for intercity passenger rail grade crossing improvement projects must specify the following location and crossing characteristics of the proposed grade crossing project (if

the proposed project involves multiple crossings, the following information must be provided for each crossing):

- Locality—City/town, county, and cross streets;
- Right-of-Way Owner—Railroad right-of-way owner/host railroad, railroad milepost number, and DOT crossing inventory number;
- Crossing Characteristics—Number of railroad tracks, number of roadway traffic lanes, existing traffic control devices, average annual daily traffic (and year calculated), volume of truck traffic, and the history of train-vehicle and train-pedestrian accidents at the crossing (including fatalities);
- Rail Service Characteristics—Existing and planned rail services within the project boundaries (freight, commuter, and intercity passenger rail service), name of the corresponding service operators, existing and planned top operating speeds, and average number of daily one-way train operations (i.e. one daily round trip should be counted as two daily one-way operations); and
- Areas of significant concern—Schools, hospitals, first responders, or other emergency services providers in the vicinity of the crossing.

4.3.2 Statement of Work

Applicants are required to submit a Statement of Work (SOW) that addresses the scope, schedule, and budget for the proposed project if it were to be selected for award. The SOW should contain sufficient detail so that both FRA and the applicant can understand the expected outcomes of the proposed work to be performed and monitor progress toward completing project tasks and deliverables during a prospective grant's period of performance. The FRA has developed SOW templates for each of the three project types covered under this notice that applicants must adhere to if they wish to be considered for award. The SOW templates are located on the FY14 Grant Application Solicitation homepage at www.fra.dot.gov/Page/P0701.

4.3.3 Spatial Data

Applicants for intercity passenger rail grade crossing improvement projects are required to submit spatial data concerning their proposed projects to the FRA. This data allows the FRA to quickly orient the locations of grade crossings on the railroad and surrounding environment, and will assist the FRA in the review of applications. While not required, applicants for Passenger Rail Corridor Investment Plans are also encouraged to

submit spatial data for any potential routes under consideration in the planning study, if known. Spatial data must be submitted to the FRA through grants.gov in either shapefile or Keyhole Markup Language (KML) file formats, utilizing the World Geodetic System (WGS) 84 datum standard. Additional guidance and instructions concerning the submission of spatial data is available on the FY14 Grant Application Solicitation homepage at www.fra.dot.gov/Page/P0701.

Section 5: Award Administration Information

5.1 Award Notices

Applications selected for funding will be announced after the application review period. FRA will contact applicants with successful applications after announcement with information and instructions about the award process. Notification of a selected application is not an authorization to begin proposed project activities.

The period of performance for grants awarded under this notice is dependent upon the project and will be determined on a grant-by-grant basis. Extensions to the period of performance will be considered only through written requests to the FRA with specific and compelling justifications for why an extension is required. Any obligated funding that has not been spent by the grantee and reimbursed by the FRA upon completion of the grant will be deobligated.

5.2 Administrative and National Policy Requirements

The grantee and any subgrantee must comply with all applicable laws and regulations. A non-exclusive list of administrative and national policy requirements that grantees must follow includes: Procurement standards, compliance with Federal civil rights laws and regulations, disadvantaged business enterprises (DBE), debarment and suspension, drug-free workplace, FRA's and OMB's Assurances and Certifications, Americans with Disabilities Act (ADA), labor standards, safety oversight, environmental protection, National Environmental Policy Act (NEPA), environmental justice, and Buy America or Buy American provisions (as applicable).

5.3 General Requirements

The grantee must comply with all post-award reporting, auditing, monitoring, and close-out requirements, as described on the FY14 Grant Application Solicitation homepage at www.fra.dot.gov/Page/P0701.

Section 6: Agency Contact

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[Docket No. FD 35820]

Blue Ridge Southern Railroad, L.L.C.—Acquisition Exemption—Norfolk Southern Railway Company

Blue Ridge Southern Railroad, L.L.C. (BLU)¹, a noncarrier, has filed a verified notice of exemption under 49 CFR 1150.31 to acquire from Norfolk Southern Railway Company (NSR), and to operate, three rail lines in the State of North Carolina comprising a total distance of approximately 91.8 miles extending between (1) milepost T0.0 at Murphy Jct., and milepost T47.0 at Dillsboro; (2) milepost W1.0 at Asheville, and milepost W26.0 at East Flat Rock; and (3) milepost TR0.0 at Henderson, and milepost TR19.8 at Pisgah Forest.

This transaction is related to a concurrently filed verified notice of exemption in *Watco Holdings, Inc.—Continuance in Control Exemption—Blue Ridge Southern Railroad, L.L.C.*, Docket No. FD 35821, wherein Watco Holdings, Inc. seeks Board approval under 49 CFR 1180.2(d)(2) to continue in control of BLU, upon BLU's becoming a Class III rail carrier.

BLU states that the agreement between BLU and NSR does not contain any provision that prohibits BLU or may limit future interchange traffic with a third-party connecting carrier.

BLU has certified that its projected annual revenues as a result of this transaction will not result in BLU's becoming a Class II or Class I rail carrier. Because BLU's projected annual revenues will exceed \$5 million, BLU

¹ BLU is a wholly owned subsidiary of Watco Holdings, Inc.

certified to the Board on May 9, 2014, that it had complied with the requirements of 49 CFR 1150.32(e) by providing notice to employees and their labor union on the affected 91.8-mile line.

This transaction may be consummated on or after July 25, 2014, the effective date of the exemption (30 days after the exemption was filed).

If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than July 18, 2014 (at least seven days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 35820 must be filed with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423-0001. In addition, one copy of each pleading must be served on Karl Morell, Ball Janik LLP, 655 Fifteenth Street NW., Suite 225, Washington, DC 20005.

Board decisions and notices are available on our Web site at WWW.STB.DOT.GOV

Decided: July 8, 2014.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Raina S. White,
Clearance Clerk.

[FR Doc. 2014-16276 Filed 7-10-14; 8:45 am]

BILLING CODE 4915-01-P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[Docket No. FD 35821]

Watco Holdings, Inc.—Continuance in Control Exemption—Blue Ridge Southern Railroad, L.L.C.

Watco Holdings, Inc. (Watco), a noncarrier, has filed a verified notice of exemption pursuant to 49 CFR 1180.2(d)(2) to continue in control of Blue Ridge Southern Railroad, L.L.C. (BLU), upon BLU's becoming a Class III rail carrier. Watco owns, indirectly, 100 percent of the issued and outstanding stock of BLU, a limited liability company.

This transaction is related to a concurrently filed verified notice of exemption in *Blue Ridge Southern Railroad, L.L.C.—Acquisition Exemption—Norfolk Southern Railway Company*, Docket No. FD 35820, wherein BLU seeks Board approval to acquire and operate approximately 91.8

miles of rail line owned by Norfolk Southern Railway Company between specified points in North Carolina.

The transaction may be consummated on or after July 25, 2014, the effective date of the exemption (30 days after the notice of exemption was filed).

Watco is a Kansas corporation that currently controls, indirectly, one Class II rail carrier, operating in two states, and 28 Class III rail carriers, operating in 19 states. For a complete list of these rail carriers, and the states in which they operate, see Watco's notice of exemption filed on June 25, 2014. The notice is available on the Board's Web site at "WWW.STB.DOT.GOV."

Watco represents that: (1) The rail lines to be operated by BLU do not connect with any of the rail lines operated by the carriers in the Watco corporate family; (2) the continuance in control is not a part of a series of anticipated transactions that would result in such a connection; and (3) the transaction does not involve a Class I carrier. Therefore, the transaction is exempt from the prior approval requirements of 49 U.S.C. § 11323. See 49 CFR 1180.2(d)(2).

Watco states that the purpose of the transaction is to reduce overhead expenses, coordinate billing, maintenance, mechanical, and personnel policies and practices of its rail carrier subsidiaries and thereby improve the overall efficiency of rail service provided by the railroads in the Watco corporate family.

Under 49 U.S.C. 10502(g), the Board may not use its exemption authority to relieve a rail carrier of its statutory obligation to protect the interests of its employees. Because the transaction involves the control of one Class II and one or more Class III rail carriers, the transaction is subject to the labor protection requirements of 49 U.S.C. 11326(b) and *Wisconsin Central Ltd.—Acquisition Exemption—Lines of Union Pacific Railroad*, 2 S.T.B. 218 (1997).

If the verified notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed by July 18, 2014 (at least seven days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 35821, must be filed with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423-0001. In

addition, a copy of each pleading must be served on Karl Morell, Ball Janik LLP, 655 Fifteenth Street NW., Suite 225, Washington, DC 20005.

Board decisions and notices are available on our Web site at "WWW.STB.DOT.GOV."

Decided: July 8, 2014.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Raina S. White,
Clearance Clerk.

BILLING CODE 4915-01-P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900-0744]

Proposed Information Collection (Call Center Satisfaction Survey): Comment Request

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice. This notice solicits comments for information needed from Veterans regarding their recent experience in contacting VA call centers.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before September 9, 2014.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at www.Regulations.gov or to Nancy J. Kessinger, Veterans Benefits Administration (20M35), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email: nancy.kessinger@va.gov. Please refer to "OMB Control No. 2900-0744" in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Nancy J. Kessinger at (202) 632-8924 or FAX (202) 632-8925.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Public Law 104-13; 44 U.S.C. 3501-3521), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: VBA Call Center Satisfaction Survey.

OMB Control Number: 2900-0744.

Type of Review: Revision of a currently approved collection.

Abstract: VBA maintains a commitment to improve the overall quality of service for Veterans. Feedback from Veterans regarding their recent experience to the VA call centers will provide VBA with three key benefits to: (1) Identify what is most important to Veterans; (2) determine what to do to improve the call center experience; and (3) serve to guide training and/or operational activities aimed at enhancing the quality of service provided to Veterans and active duty personnel.

Affected Public: Individuals or households.

Estimated Annual Burden: 3,600 hours.

Estimated Average Burden Per Respondent: 6 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 36,000.

Dated: July 7, 2014.

By direction of the Secretary.

Crystal Rennie,

Department Clearance Officer, U. S. Department of Veterans Affairs.

BILLING CODE 8320-01-P

FEDERAL REGISTER

Vol. 79

Friday,

No. 133

July 11, 2014

Part II

Department of Health and Human Services

Centers for Medicare & Medicaid Services

42 CFR Parts 405, 411, 413, et al.

Medicare Program; End-Stage Renal Disease Prospective Payment System, Quality Incentive Program, and Durable Medical Equipment, Prosthetics, Orthotics, and Supplies; Proposed Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES
Centers for Medicare & Medicaid Services
42 CFR Parts 405, 411, 413 and 414
[CMS–1614–P]
RIN 0938–AS13
Medicare Program; End-Stage Renal Disease Prospective Payment System, Quality Incentive Program, and Durable Medical Equipment, Prosthetics, Orthotics, and Supplies
AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: This rule proposes to update and make revisions to the End-Stage Renal Disease (ESRD) prospective payment system (PPS) for calendar year (CY) 2015. This rule also proposes to set forth requirements for the ESRD quality incentive program (QIP), including payment years (PYs) 2017 and 2018. This rule also proposes to make a technical correction to remove outdated terms and definitions. In addition, this rule proposes to set forth the methodology for adjusting Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) fee schedule payment amounts using information from the Medicare DMEPOS Competitive Bidding Program (CBP); make alternative payment rules for DME and enteral nutrition under the Medicare DMEPOS CBP; clarify the statutory Medicare hearing aid coverage exclusion and specify devices not subject to the hearing aid exclusion; update the definition of minimal self-adjustment regarding what specialized training is needed by suppliers to provide custom fitting services if they are not certified orthotists; clarify the Change of Ownership (CHOW) and provides for an exception to the current requirements; revise the appeal provisions for termination of a contract and notification to beneficiaries under the Medicare DMEPOS CBP, and add a technical change related to submitting bids for infusion drugs under the Medicare DMEPOS CBP.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. E.S.T. on September 2, 2014.

ADDRESSES: In commenting, please refer to file code CMS–1614–P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to <http://www.regulations.gov>. Follow the “Submit a comment” instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1614–P, P.O. Box 8010, Baltimore, MD 21244–8010.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1614–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* Alternatively, you may deliver (by hand or courier) your written comments ONLY to the following addresses prior to the close of the comment period: a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, call telephone number (410) 786–9994 in advance to schedule your arrival with one of our staff members.

Comments erroneously mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Stephanie Frilling, (410) 786–4507, for issues related to the ESRD PPS, the

ESRD PPS CY 2015 Base Rate and Payment for Frequent Hemodialysis.

Michelle Cruse, (410) 786–7540, for issues related to the ESRD PPS and the Low Volume Payment Adjustment.

Karen Reinhardt, (410) 786–0189, for issues related to the ESRD PPS and the Outlier Payment Policy.

Wendy Tucker, (410) 786–3004, for issues related to the ESRD PPS and Wage Index.

Heidi Oumarou, (410) 786–7342, for issues related to the ESRD PPS Market Basket Update.

Anita Segar, (410) 786–4614, for issues related to the ESRD QIP.

Christopher Molling (410) 786–6399 and Hafsa Vahora (410) 786–7899 for issues related to the methodology for making national price adjustments based upon information gathered from the DMEPOS CBP.

Sandhya Gilkerson, (410) 786–4085, for issues related to the alternative payment methodologies under the CBP.

Sandhya Gilkerson, (410) 786–4085 and Michelle Peterman, 410–786–2581 for issues related to the clarification of the statutory Medicare hearing aid coverage exclusion.

Michelle Peterman, (410) 786–2591 for issues related to the definition of minimal self-adjustment at 414.402.

Janae James (410) 786–0801 for issues related to CHOW and breach of contract appeals.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: <http://www.regulations.gov>. Follow the search instructions on that Web site to view public comments.

Comments received timely will also be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1–800–743–3951.

Electronic Access

This **Federal Register** document is also available from the **Federal Register** online database through *Federal Digital System (FDsys)*, a service of the U.S.

Government Printing Office. This database can be accessed via the internet at <http://www.gpo.gov/fdsys/>.

Addenda Are Only Available Through the Internet on the CMS Web site

In the past, a majority of the Addenda referred to throughout the preamble of our proposed and final rules were available in the **Federal Register**. However, the Addenda of the annual proposed and final rules will no longer be available in the **Federal Register**. Instead, these Addenda to the annual proposed and final rules will be available only through the Internet on the CMS Web site. The Addenda to the End-Stage Renal Disease (ESRD) Prospective Payment System (PPS) rules are available at: <http://www.cms.gov/ESRDPayment/PAY/list.asp>. Readers who experience any problems accessing any of the Addenda to the proposed and final rules of the ESRD PPS that are posted on the CMS Web site identified above should contact Stephanie Frilling at 410-786-4507.

Table of Contents

To assist readers in referencing sections contained in this preamble, we are providing a Table of Contents. Some of the issues discussed in this preamble affect the payment policies, but do not require changes to the regulations in the Code of Federal Regulations (CFR).

I. Executive Summary

A. Purpose

1. End-Stage Renal Disease (ESRD) Prospective Payment System (PPS)
2. End-Stage Renal Disease (ESRD) Quality Incentive Program (QIP)
3. Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS)

B. Summary of the Major Provisions

1. ESRD PPS
2. ESRD QIP
3. DMEPOS

C. Summary of Costs and Benefits

1. Impacts of the Proposed ESRD PPS
2. Impacts for ESRD QIP
3. Impacts for DMEPOS

II. Calendar Year (CY) 2015 End-Stage Renal Disease (ESRD) Prospective Payment System (PPS)

A. Background on the End-Stage Renal Disease (ESRD) Prospective Payment System (PPS)

I. Executive Summary

A. Purpose

1. End-Stage Renal Disease (ESRD) Prospective Payment System (PPS)

On January 1, 2011, we implemented the ESRD PPS, a case-mix adjusted bundled prospective payment system for renal dialysis services furnished by ESRD facilities. This rule proposes to update and make revisions to the End-Stage Renal Disease (ESRD) prospective payment system (PPS) for calendar year (CY) 2015. Section 1881(b)(14) of the Social Security Act (the Act), as added by section 153(b) of the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (Pub. L. 110–275), and section 1881(b)(14)(F) of the Act, as added by section 153(b) of MIPPA and amended by section 3401(h) of the Affordable Care Act (Pub. L. 111–148), established that beginning CY 2012, and each subsequent year, the Secretary shall annually increase payment amounts by an ESRD market basket increase factor, reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act.

Section 632 of the American Taxpayer Relief Act of 2012 (ATRA) (Pub. L. 112–240) included several provisions that apply to the ESRD PPS. Section 632(a) of ATRA added section 1881(b)(14)(I) to the Act, which required the Secretary, by comparing per patient utilization data from 2007 with such data from 2011, to reduce the single payment amount to reflect the Secretary's utilization of ESRD-related drugs and biologicals. We finalized the amount of the drug utilization adjustment pursuant to this section in the CY 2014 ESRD PPS final rule with a 3- to 4-year transition (78 FR 72161 through 72170). Section 632(b) of ATRA prohibited the Secretary from paying for oral-only ESRD-related drugs and biologicals under the ESRD PPS before January 1, 2016. And finally, section 632(c) of ATRA requires the Secretary, by no later than January 1, 2016, to analyze the case mix payment

adjustments under section 1881(b)(14)(D)(i) of the Act and make appropriate revisions to those adjustments.

On April 1, 2014, the Congress enacted the Protecting Access to Medicare Act of 2014 (PAMA) (Pub. L. 113–93). PAMA section 217 includes several provisions that apply to the ESRD PPS. Specifically, sections 217(b)(1) and (2) of PAMA amend sections 1881(b)(14)(F) and (I) of the Act. We interpret the amendments to sections 1881(b)(14)(F) and (I) as replacing the drug utilization adjustment that was finalized in the CY 2014 ESRD PPS final rule with specific provisions that dictate what the market basket update will be for CY 2015 (0.0 percent) and how it will be reduced in CYs 2016 through 2018. Section 217(a)(1) of PAMA amends section 632(b)(1) of ATRA, which now provides that the Secretary may not pay for oral-only drugs and biologicals used for the treatment of ESRD under the ESRD PPS prior to January 1, 2024. Section 217(a)(2) further amends section 632(b)(1) of ATRA by adding a sentence that provides: “Notwithstanding section 1881(b)(14)(A)(ii) of the Social Security Act (42 U.S.C. 1395rr(b)(14)(A)(ii)), implementation of the policy described in the previous sentence shall be based on data from the most recent year available.” Finally, PAMA section 217(c) provides that, as part of the CY 2016 ESRD PPS rulemaking, the Secretary shall establish a process for (1) determining when a product is no longer an oral-only drug; and (2) including new injectable and intravenous products into the ESRD PPS bundled payment.

As discussed further below, section 212 of PAMA provides that the Secretary may not adopt ICD–10 prior to October 1, 2015. HHS has announced that it intends to issue an interim final rule that will require use of ICD–10 beginning October 1, 2015 and will require the continued use of ICD–9–CM through September 30, 2015. Therefore, the ESRD PPS will continue to use ICD–9 through September 30, 2015 and will require use of ICD–10 beginning October 1, 2015 for purposes of the comorbidity payment adjustment.

2. End-Stage Renal Disease (ESRD) Quality Incentive Program (QIP)

This rule also proposes to set forth requirements for the ESRD Quality Incentive Program (QIP), including for payment years (PYs) 2017 and 2018. The program is authorized under section 1881(h) of the Social Security Act (the Act). The ESRD QIP is the most recent step in fostering improved

patient outcomes by establishing incentives for dialysis facilities to meet or exceed performance standards established by CMS.

3. Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS)

This proposed rule proposes a methodology for making national price adjustments to payments for Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) paid under fee schedules based upon information gathered from the DMEPOS competitive bidding programs (CBPs) and proposes to phase in special payment rules in a limited number of competitive bidding areas (CBAs) under the CBP for certain, specified DME and enteral nutrition. This rule proposes to clarify the statutory Medicare hearing aid coverage exclusion under section 1862(a)(7) of the Act and the regulation at 42 CFR 411.15(d) to further specify the scope of this exclusion and to note certain devices excepted from the hearing aid exclusion. In addition, this rule proposes to update the definition of minimal self-adjustment at § 414.402 to note the specialized training that is needed by suppliers to provide custom fitting services if they are not certified orthotists. Finally, this rule proposes a revision to the Change of Ownership (CHOW) policy in the current regulations to allow a product category to be severed from a competitive bidding contract and transferred to a new contract when a contract supplier sells a distinct line of business to a qualified successor entity.

B. Summary of the Major Provisions

1. ESRD PPS

- *Update to the ESRD PPS base rate for CY 2015:* For CY 2015, we are proposing an ESRD PPS base rate of \$239.33. This amount reflects a 0.0 percent update to the payment rate as required by section 1881(b)(14)(F)(i) of the Act, as amended by section 217(b)(2) of PAMA, and the application of the proposed wage index budget-neutrality adjustment factor of 1.001306 to the CY 2014 ESRD PPS base rate of \$239.02.

- *Rebasing and revision of the ESRD bundled (ESRDB) market basket:* For CY 2015, we are proposing to rebase and revise the ESRDB market basket so the cost weights and price proxies would reflect the mix of goods and services that underlie ESRD bundled operating and capital costs for CY 2012. We note that if PAMA had not been enacted the proposed 2012-based ESRDB market basket update less productivity for CY

2015 would have been 1.6 percent, or (2.0 percent less 0.4 percentage point).

- *Update to the labor-related share:* Because the cost distributions would change significantly as a result of the proposed ESRDB market basket revision, the proposed labor-related share would be 50.673 percent compared to the current labor-related share of 41.737 percent. The change to the labor-related share would have a significant impact on payments for certain ESRD facilities, specifically those ESRD facilities that have low wage index values. Therefore, for CY 2015 we are proposing a 2-year transition, in which the CY 2015 payment would be based on a 50/50 blended labor-related share that would apply to all ESRD facilities. ESRD facilities would receive 50 percent of their current labor-related share and 50 percent of their revised labor-related share. Specifically, we would apply a labor-related share of 46.205 $((41.737+50.673)/2 = 46.205)$. For CY 2016, the labor-related share would be based on 100 percent of the revised labor-related share.

- *Update to the wage index and wage index floor:* We adjust wage indices on an annual basis using the most current hospital wage data to account for differing wage levels in areas in which ESRD facilities are located. In CY 2015, we are not proposing any changes to the application of the wage index budget-neutrality adjustment factor and will continue to apply the budget-neutrality adjustment to the base rate for the ESRD PPS. We will continue our policy for the gradual phase-out of the wage index floor and reduce the wage index floor values to 0.40, as finalized in the CY 2014 ESRD PPS final rule (78 FR 72173–72174).

- *Update to the Core-Based Statistical Areas (CBSA):* For CY 2015, we are proposing to implement the new CBSA delineations as described in the February 28, 2013 OMB Bulletin No. 13–01, beginning with the CY 2015 ESRD PPS wage index. In addition, we are proposing to implement a 2-year transition, under which a 50/50 blended wage index would apply to all ESRD facilities for CY 2015. Specifically, facilities would receive 50 percent of their CY 2015 wage index based on the CBSA delineations for CY 2014 and 50 percent of their CY 2015 wage index based on the proposed new CBSA delineations. In CY 2016, facilities' wage index values would be based 100 percent on the new CBSA delineations.

- *Update to the outlier policy:* We are updating the outlier services fixed dollar loss amounts for adult and pediatric patients and Medicare Allowable Payments (MAPs) for adult

patients for CY 2015 using 2013 claims data. Based on the use of more current data, the fixed-dollar loss amount for pediatric beneficiaries would increase from \$54.01 to \$56.30 and the MAP amount would increase from \$37.29 to \$40.05, as compared to CY 2014 values. For adult beneficiaries, the fixed-dollar loss amount would decrease from \$98.67 to \$85.24 and the MAP amount would increase from \$51.97 to \$52.61. The 1 percent target for outlier payments was not achieved in CY 2013. We believe using CY 2013 claims data to update the outlier MAP and fixed dollar loss amounts for CY 2015 will increase payments for ESRD beneficiaries requiring higher resource utilization in accordance with a 1 percent outlier percentage.

- *Clarification for the low-volume payment adjustment (LVPA):* We are clarifying two policies regarding MAC verification and proposing conforming changes to the LVPA regulation. The first clarification explains that MACs can consider supporting data from hospital-based ESRD facilities to verify the facility's total treatment count. The second clarification explains that MACs can add or prorate treatment counts from non-standard cost reporting periods (those that are not 12-month periods) where there is a change in ownership that does not result in a new Provider Transaction Access Number.

- *Continued use of ICD–9–CM codes and corrections to the ICD–10–CM codes eligible for the comorbidity payment adjustment:* Section 212 of PAMA provides that the Secretary may not adopt ICD–10 prior to October 1, 2015. HHS has announced that it intends to issue an interim final rule that will require use of ICD–10 beginning October 1, 2015 and will require the continued use of ICD–9–CM through September 30, 2015. Therefore, the ESRD PPS will continue to use ICD–9 through September 30, 2015 and will require use of ICD–10 beginning October 1, 2015 for purposes of the comorbidity payment adjustment. For CY 2015, we are correcting several typographical errors and omissions in the Tables that appeared in the CY 2014 ESRD PPS final rule.

2. ESRD QIP

This rule proposes to implement requirements for the ESRD QIP, including measure sets for PYs 2017 and 2018.

- *PY 2017 Measure Set:* For PY 2017, we are proposing to remove one measure from the ESRD QIP, the Hemoglobin Greater than 12 g/dL clinical measure, on the grounds that it is “topped out”. We are also proposing

to adopt the Standardized Readmission Ratio (SRR) clinical measure, which evaluates care coordination.

- *PY 2018 Measure Set:* For PY 2018, we are proposing to adopt two new clinical measures—the Standardized Transfusion Ratio (STR) and Pediatric Peritoneal Dialysis Adequacy—and three new reporting measures: (1) Pain Assessment and Follow-Up; (2) Clinical Depression Screening and Follow-Up; and (3) National Healthcare Safety Network (NHSN) Healthcare Personnel Influenza Vaccination. We are also proposing to transition the In-Center Hemodialysis Consumer Assessment of Healthcare Providers and Systems (ICH CAHPS) survey reporting measure to a clinical measure.

- *Revision to the ICH CAHPS Reporting Measure:* Beginning with the PY 2017 program year, we are proposing to revise the ICH CAHPS reporting measure to determine facility eligibility for the measure based on the number of survey-eligible patients treated during the “eligibility period”, which we propose to define as the Calendar Year (CY) that immediately precedes the performance period. Survey-eligible patients are defined in the ICH CAHPS measure specifications available at http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/ESRDQIP/061_TechnicalSpecifications.html and <https://ichcahps.org>.

- *Revision to the NHSN Bloodstream Infection in Hemodialysis Outpatients Clinical Measure:* Beginning with the PY 2016 program year, we are proposing to revise the NHSN Bloodstream Infection in Hemodialysis Outpatients clinical measure to calculate facility performance using the Adjusted Ranking Metric (ARM).

- *Revision to the Mineral Metabolism Reporting Measure:* Beginning with the PY 2018 program year, we are proposing to revise the Mineral Metabolism reporting measure to allow facilities to submit both serum phosphorus and plasma phosphorus measurements.

- *Extraordinary Circumstances Exemption:* Beginning with the PY 2017 ESRD QIP, we are proposing to exempt dialysis facilities from all requirements of the ESRD QIP clinical and reporting measures during the months in which they are forced to close due to a natural disaster or other extraordinary circumstances.

- *New Scoring Methodology for PY 2018:* For PY 2018, we are proposing to use a new scoring methodology for the ESRD QIP. This proposed scoring methodology would assign facility Total Performance Scores (TPS) on the basis of two domains, the Clinical Measure

Domain and the Reporting Measure Domain. Facility scores on clinical measures in the Clinical Measure Domain would be divided into subdomains that align with National Quality Strategy (NQS) domains and weighted according to the number of measures in a subdomain, facility experience with the measure, and the measure's alignment with CMS priorities for quality improvement. These weighted scores would be summed to produce a facility's Clinical Measure Domain score. Facility scores on reporting measures in the Reporting Measure Domain would be summed and calculated to produce a facility's Reporting Measure Adjuster, which would be subtracted from the facility's Clinical Measure Domain score to produce a facility's TPS.

3. DMEPOS

- *The methodology for making national price adjustments based upon information gathered from the DMEPOS CBPs:* As required by the MIPPA, this rule proposes methodologies for using information from the DMEPOS CBP to adjust the fee schedule amounts for DME in areas where CBPs are not implemented. The rule proposes to use the same methodologies to adjust the fee schedule amounts for enteral nutrition and off-the shelf (OTS) orthotics in areas where CBPs are not implemented.

- *Phase in of special payment rules in a limited number of CBAs under the CBP for certain, specified DME and enteral nutrition.* This rule proposes to phase-in special payment rules for certain DME and enteral nutrition under the DMEPOS CBP in a limited number of CBAs.

- *Medicare hearing aid coverage exclusion under section 1862(a)(7) of the Act:* This rule proposes to modify the regulation at § 411.15 to address the scope of the statutory hearing aid exclusion and note the types of devices that are not subject to the hearing aid exclusion.

- *Definition of minimal self-adjustment at § 414.402:* This rule proposes to update the regulation to indicate what specialized training is needed to provide custom fitting services if suppliers are not certified orthotists.

- *Change of Ownership Rules to Allow Contract Suppliers to Sell Specific Lines of Business:* This proposed rule proposes to establish an exception under the CHOW rules to allow CMS to sever a product category from a contract, incorporate the product category into a new contract, and transfer the new contract to a qualified

new owner under certain specific circumstances.

- *Termination of a Competitive Bidding Contract:* This rule proposes to clarify the effective date for terminations of competitive bidding contracts, which impacts the deadline for which contract suppliers must notify its beneficiaries of the termination.

C. Summary of Costs and Benefits

In section XII.B of this proposed rule, we set forth a detailed analysis of the impacts that the proposed changes would have on affected entities and beneficiaries. The impacts include the following:

1. Impacts of the Proposed ESRD PPS

The impact chart in section XII.B.1.a of this proposed rule displays the estimated change in payments to ESRD facilities in CY 2015 compared to estimated payments in CY 2014. The overall impact of the CY 2015 changes is projected to be a 0.3 percent increase in payments. Hospital-based ESRD facilities have an estimated 0.5 percent increase in payments compared with freestanding facilities with an estimated 0.3 percent increase.

We estimate that the aggregate ESRD PPS expenditures would increase by approximately \$30 million from CY 2014 to CY 2015. This reflects a \$0 million change from the payment rate update and a \$30 million increase due to the updates to the outlier threshold amounts. As a result of the projected 0.3 percent overall payment increase, we estimate that there will be an increase in beneficiary co-insurance payments of 0.3 percent in CY 2015, which translates to approximately \$10 million.

2. Impacts for ESRD QIP

The overall economic impact of the ESRD QIP is an estimated \$11.9 million in PY 2017 and \$7.2 million in PY 2018. In PY 2017, we expect the total payment reductions to be approximately \$11.9 million, and the costs associated with the collection of information requirements for the validation of NHSN data feasibility study to be approximately \$27 thousand for all ESRD facilities. In PY 2018, we expect the total payment reductions to be approximately \$7 million, and the costs associated with the collection of information requirements for the NHSN Healthcare Personnel Influenza Vaccination reporting measure to be approximately \$248 thousand for all ESRD facilities.

The ESRD QIP will continue to incentivize facilities to provide high-quality care to beneficiaries.

3. Impacts for DMEPOS

a. Proposed methodology for making national price adjustments to DMEPOS fee schedule amounts based upon information gathered from the DMEPOS competitive bidding programs

The proposed regulation proposes to adjust Medicare fee schedule amounts for items subject to DMEPOS CBPs beginning January 1, 2016, using information from the DMEPOS CBPs to be applied to items in non-competitive bidding areas. It is estimated that these adjustments would save over \$7 billion for the 5-year period beginning January 1, 2016, and ending December 30, 2020. The estimated savings are primarily derived from price reductions for items. It is expected that most of the economic impact would result from reduced payment amounts. The ability of suppliers to furnish items is not expected to be impacted.

b. Proposed phase in of special payment rules under the competitive bidding program for certain DME and enteral nutrition

We believe that the proposed special payment rules for certain DME and enteral nutrition under the DMEPOS CBPs would not have a significant impact on beneficiaries and suppliers. Contract suppliers are responsible for furnishing items and services needed by the beneficiary, and the cost to suppliers for furnishing these items and services does not change based on whether or not the equipment and related items and services are paid for separately under a capped rental payment method. Because the supplier's bids would reflect the cost of furnishing items in accordance with the new payment rules, we expect the overall savings to generally be the same as they are under the current payment rules.

Furthermore, the proposed special payment rules would be phased under a limited number of areas first to evaluate their impact on the program, beneficiaries, and suppliers, including costs, quality, and access. Expanded use of the special payment rules in other areas or for other items would be addressed in future rulemaking.

c. Proposed clarification of the statutory Medicare hearing aid coverage exclusion stipulated at section 1862(a)(7) of the Act

This proposed rule proposes to clarify the scope of the Medicare coverage exclusion for hearing aids and withdraw coverage of bone anchored hearing aids. This proposal would not have a significant fiscal impact on the Medicare program, because the

Medicare program expenditures for bone anchored hearing aids during the period CY2005 through CY 2013 are less than \$9,000,000. This proposed rule, if finalized, would provide further guidance about coverage of DME with regard to the statutory hearing aid exclusion. The proposed rule, if finalized, would leave unchanged coverage of cochlear implants and brain stem implants, which are not considered hearing aids.

d. Proposed update of the definition of minimal self-adjustment at 42 CFR 414.402

The proposed rule proposes to update the definition of minimal self-adjustment to make clear that minimal self-adjustment means an adjustment that the beneficiary, caretaker for the beneficiary, or supplier of the device can perform and does not require the services of a certified orthotist (that is, an individual certified by either the American Board for Certification in Orthotics and Prosthetics, Inc., or the Board for Orthotist/Prosthetist Certification) or a physician as defined in section 1861(r) of the Act, a treating practitioner means a physician assistant, nurse practitioner, or clinical nurse specialist as defined in section 1861(aa)(5) of the Act, an occupational therapist as defined in 42 CFR 484.4, or physical therapist as defined in 42 CFR 484.4 in compliance with all applicable Federal and State licensure and regulatory requirements. If finalized, this revised definition would impact suppliers furnishing custom fitted orthotics that do not have this expertise. These suppliers would be required to hire an individual with expertise. For example, according to the Bureau of Labor Statistics Occupational Employment Statistics May 2013 the median pay for a certified orthotist is \$30.27 an hour. The impact will vary according to the caseload of custom fitted orthotics provided by an individual supplier.

e. Change of Ownership Rules to Allow Contract Suppliers to Sell Specific Lines of Business

This rule proposes to clarify the CHOW rules in order to limit disruption to the normal course of business for DME suppliers. This rule proposes to establish an exception under the current CHOW rules to allow CMS to sever a product category from a contract, incorporate the product category into a new contract, and transfer the new contract to a qualified new owner under certain specific circumstances. This proposed clarification would impact businesses in a positive way by allowing

them to conduct everyday transactions with less disruption from our rules and regulations.

II. Calendar Year (CY) 2015 End-Stage Renal Disease (ESRD) Prospective Payment System (PPS)

A. Background on the End-Stage Renal Disease (ESRD) Prospective Payment System (PPS)

On August 12, 2010, we published in the **Federal Register** a final rule (75 FR 49030 through 49214) in which we implemented a case-mix adjusted bundled PPS for Medicare outpatient ESRD dialysis services beginning January 1, 2011, in accordance with section 1881(b)(14) of the Act, as added by section 153(b) of MIPPA. On November 10, 2011, we published in the **Federal Register** a final rule (76 FR 70228 through 70316) in which we made a number of routine updates for CY 2012, implemented the second year of the transition to the ESRD PPS, made several policy changes and clarifications, and made technical changes. On November 9, 2012, we published in the **Federal Register** a final rule (77 FR 67450 through 67531) in which we made a number of routine updates for CY 2013, implemented the third year of the transition to the ESRD PPS, and made several policy changes and reiterations.

On December 2, 2013, we published in the **Federal Register** a final rule (78 FR 72156 through 72253) titled, Medicare Program; End-Stage Renal Disease Prospective Payment System, Quality Incentive Program, and Durable Medical Equipment, Prosthetics, Orthotics, and Supplies” (hereinafter referred to as the CY 2014 ESRD PPS final rule). In that final rule, for the ESRD PPS, we made a number of routine updates for CY 2014, implemented the fourth and final year of the transition, implemented sections 632(a) and (b)(1) of ATRA, and made policy changes and clarifications. Specifically, in that rule, we finalized the following:

- *Update to the ESRD PPS base rate for CY 2015.* An ESRD PPS base rate of \$239.02 per treatment for renal dialysis services. This amount reflected the CY 2014 ESRD bundled (ESRDB) market basket update of 3.2 percent minus a multifactor productivity adjustment of 0.4 percent, that is, a 2.8 percent increase. This amount also reflected the application of the wage index budget-neutrality adjustment of 1.000454, the home dialysis training add-on budget neutrality adjustment factor of 0.999912, and the portion of the drug utilization

adjustment that was transitioned for CY 2014, or \$8.16.

- *Update to the wage index floor.* A 0.05 reduction to the CY 2014 and CY 2015 wage index floor values, which resulted in a wage index floor value of 0.45 for CY 2014 and a wage index floor value of 0.40 for CY 2015 under the ESRD PPS.

- *Update to the outlier policy.* Using CY 2012 claims data to update the outlier Medicare Allowable Payments (MAPs) and fixed dollar loss amounts for CY 2014, which resulted in updated fixed dollar loss amounts for adult and pediatric patients and MAPs for adult patients. Specifically, for pediatric beneficiaries, we finalized a fixed-dollar loss amount of \$54.01 and a MAP amount of \$40.49. For adult beneficiaries, we finalized a fixed-dollar loss amount of \$98.67 and a MAP amount of \$50.25.

- *The application of ICD-10-CM diagnosis codes to the comorbidity payment adjustment.* We discussed and provided a crosswalk from ICD-9-CM to ICD-10-CM for codes that are subject to the comorbidity payment adjustment. We finalized a policy under which all ICD-10-CM codes to which ICD-9-CM codes that are eligible for the comorbidity payment adjustment crosswalk are eligible for the comorbidity payment adjustment beginning on October 1, 2014 with two exceptions. As discussed further below, however, section 212 of the Protecting Access to Medicare Act of 2014 (PAMA) (Pub. L. 113-93) provides that the Secretary may not adopt ICD-10 prior to October 1, 2015. HHS has announced that it intends to issue an interim final rule that will require use of ICD-10 beginning October 1, 2015 and will continue to require use of ICD-9-CM through September 30, 2015. Accordingly, we plan to continue to require facilities to utilize ICD-9-CM codes to identify comorbidities eligible for the comorbidity payment adjustment through September 30, 2015, and then to use ICD-10-CM codes beginning October 1, 2015.

- *The self-dialysis and home dialysis training add-on adjustment.* An increase to the self-dialysis and home dialysis training add-on adjustment from \$33.44 to \$50.16.

- *The delay in payment for oral-only ESRD-related drugs and biologicals until January 1, 2016.* We also delayed payment for oral-only ESRD-related drugs under the ESRD PPS until January 1, 2016. As discussed further below, section 217(a)(1) of PAMA amended section 632(b)(1) of ATRA to provide that the Secretary may not include oral-only ESRD-related drugs for payment

under the ESRD PPS prior to January 1, 2024.

B. Routine Updates and Proposed Policy Changes to the CY 2015 ESRD PPS

1. ESRD PPS Base Rate

In the CY 2011 ESRD PPS final rule (75 FR 49071 through 49083), we discussed the development of the ESRD PPS per treatment base rate that is codified in the Medicare regulations at § 413.220 and § 413.230. The CY 2011 ESRD PPS final rule also provides a detailed discussion of the methodology used to calculate the ESRD PPS base rate and the computation of factors used to adjust the ESRD PPS base rate for projected outlier payments and budget-neutrality in accordance with sections 1881(b)(14)(D)(ii) and 1881(b)(14)(A)(ii) of the Act, respectively. Specifically, the ESRD PPS base rate was developed from CY 2007 claims (that is, the lowest per patient utilization year as required by section 1881(b)(14)(A)(ii) of the Act), updated to CY 2011, and represented the average per treatment Medicare Allowable Payment (MAP) for composite rate and separately billable services. In accordance with section 1881(b)(14)(D) of the Act and regulations at § 413.230, the ESRD PPS base rate is adjusted for the patient-specific case-mix adjustments, applicable facility adjustments, geographic differences in area wage levels using an area wage index, as well as applicable outlier payments or training payments.

a. Changes to the Drug Utilization Adjustment

i. The Drug Utilization Adjustment Finalized in the CY 2014 ESRD PPS Final Rule

Section 1881(b)(14)(I) of the Act, as added by section 632(a) of the American Taxpayer Relief Act of 2012 (ATRA), required that, for services furnished on or after January 1, 2014, the Secretary shall make reductions to the single payment for renal dialysis services to reflect the Secretary's estimate of the change in the utilization of ESRD-related drugs and biologicals (excluding oral-only ESRD-related drugs) by comparing per patient utilization data from 2007 with such data from 2012. Section 1881(b)(14)(I) further required that in making the reductions, the Secretary take into account the most recently available data on Average Sales Prices (ASP) and changes in prices for drugs and biologicals reflected in the ESRD market basket percentage increase factor under section 1881(b)(14)(F). Consistent with these requirements, in CY 2014, we finalized a payment

adjustment to the CY 2014 ESRD PPS base rate that reflected the change in utilization of ESRD-related drugs and biologicals from CY 2007 to CY 2012.

Specifically, we finalized the drug utilization adjustment amount of \$29.93 per treatment, and finalized a policy to implement this amount over a 3- to 4-year transition period. For CYs 2014 and 2015, we stated that we would implement the transition by offsetting the payment update by a portion of the reduction amount necessary to create an overall impact of a zero percent for facilities from the previous year's payments. For example, in CY 2014 we finalized a per treatment drug utilization adjustment amount for the first transition year of \$8.16 or 3.3 percent, which represented the CY 2014 ESRDB market basket update minus productivity and other impacts to create an overall impact of zero percent. For a complete discussion of the methodology for computing the drug adjustment please see the CY 2014 ESRD PPS final rule (78 FR 72161 through 72170).

ii. PAMA Changes to the Drug Utilization Adjustment

On April 1, 2014, Congress enacted PAMA. Section 217(b), titled Mitigation of the Application of Adjustment to ESRD Bundled Payment Rate to Account for Changes in the Utilization of Certain Drugs and Biologicals, amends section 1881(b)(14)(I) of the Act by inserting "and before January 1, 2015" after January 1, 2014. This amendment effectively eliminates the remaining years of the drug utilization adjustment transition. In its place, the PAMA amendments to section 1881(b)(14)(F)(i) dictate what the market basket increase factor will be for 2015 and how it will be reduced in 2016 through 2018. In particular, PAMA section 217(b)(2)(C) amended section 1881(b)(14)(F)(i) by adding subclause (III), which provides that "[n]otwithstanding subclauses (I) and (II), in order to accomplish the purposes of subparagraph (I) with respect to 2015, the increase factor described in subclause (I) for 2015 shall be 0.0 percent." We interpret subclause (III) to mean that the market basket increase factor less the productivity adjustment for 2015 is 0.0 percent. The PAMA amendments also provide for a payment reduction in lieu of the drug utilization adjustment in 2016 through 2018. In particular, PAMA section 217(b)(2)(ii) further amends section 1881(b)(14)(i)(I) by adding at the end the following new sentence, "In order to accomplish the purpose of subparagraph (I) with respect to 2016, 2017, and 2018, after determining the increase factor

described in the preceding sentence for each of 2016, 2017, and 2018, the Secretary shall reduce such increase factor by 1.25 percentage points for each of 2016 and 2017 and by 1 percentage point for 2018." We interpret this provision as requiring us to reduce the market basket increase factor for 2016 through 2018 by the percentages prescribed in the statute.

b. Payment Rate Update for CY 2015

As discussed in section II.B.2 of this proposed rule, section 1881(b)(14)(F)(i) of the Act, as added by section 153(b) of MIPPA and amended by section 3401(h) of the Affordable Care Act, provides that, beginning in 2012, the ESRD PPS payment amounts are required to be annually increased by the rate of increase in the ESRD market basket, reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act. If PAMA had not stipulated a 0.0 percent payment update for CY 2015, we would have proposed a payment update of 1.6 percent, (a 2.0 percent ESRDB market basket update less a 0.4 percent productivity adjustment). In accordance with section 1881(b)(14)(F)(i)(III) of the Act, as added by PAMA section 217(b)(2)(C), however, we propose a 0.0 percent update to the CY 2014 ESRD PPS base rate of \$239.02 for CY 2015.

c. CY 2015 ESRD PPS Wage Index Budget Neutrality Adjustment

For CY 2015 we propose to apply the wage index budget-neutrality adjustment factor of 1.001306 to the unadjusted CY 2014 and CY 2015 ESRD PPS base rate (that is, \$239.02), yielding a proposed CY 2015 ESRD PPS wage-index budget-neutrality adjusted base rate of \$239.33 ($\$239.02 \times 1.001306 = \239.33).

d. Labor-Related Share

As discussed in section II.2.e, as part of the proposed ESRDB market basket rebasing and revision, we are proposing to update the labor-related share value from 41.737 percent to 50.673 percent. We note that some ESRD facilities are adversely affected by this proposal. For example, rural facilities and facilities located in CBSA areas with wage indexes below 1 will experience reduced payments due to an increase in the labor-related share, while other facilities located in CBSA area where wage indices are above 1 will experience increased payments. While we are proposing the new labor-related share under the ESRD PPS payment system computed at 50.673 percent, we propose to implement this value using a 2-year 50/50 blend transition.

Therefore, for CY 2015 we propose to apply 50 percent of the value of the current labor-related share under the ESRD PPS (41.737) and 50 percent of the value of the new labor-related share, (50.673), add the values together and divide by two, for a CY 2015 labor-related value of 46.205 $((41.737 + 50.673)/2 = 46.205)$. Beginning in CY 2016 we propose to apply 100 percent of the proposed labor-related share value of 50.673 percent. We propose to continue to apply a labor-related share value of 50.673 percent until such time in the future the ESRDB market basket is again rebased in computing a wage index-adjusted base rate for ESRD facilities. We believe that this approach is similar to the 50/50 blend transition proposed for the CY 2015 wage indexes and discussed in section II.3.c of this rule and that a 2-year transition is necessary to allow ESRD facilities time to adjust to the new labor related-share value.

We note that we considered implementing the computed labor related share value of 50.673 for CY 2015, but that would have increased the CY 2015 proposed wage index budget neutrality factor to 1.002081. This increase would have resulted in a decrease in CY 2015 Medicare payments to rural facilities of 1.3 percent, and an increase to urban facilities 0.5 percent. When we apply the transition labor-related share value of 46.205, the disparity in impacts for rural and urban facilities is reduced to less than 1.0 percent. Specifically, rural facilities would experience a decrease in payments of 0.5 percent and urban facilities would experience an increase in payments of 0.4 percent. (For more information of the CY 2015 Impact of Proposed Changes in Payments to ESRD Facilities for CY 2015 ESRD proposed rule, see section XV of this rule). Therefore, we believe a 2-year transition strikes an appropriate balance between ensuring that ESRD PPS payments are as accurate and stable as possible while giving facilities time to adjust to the new labor-related share factor.

In summary, we propose a CY 2015 ESRD PPS base rate update of \$239.33. This reflects a 0.0 percent payment update consistent with section 1881(b)(14)(F)(i)(III), as added by section 217(b)(2) of PAMA. This base rate reflects the CY 2015 proposed wage index budget neutrality factor of 1.001306, and a labor-related share value of 46.205.

2. ESRD Bundled Market Basket and Labor-Related Share

a. Background

In accordance with section 1881(b)(14)(F)(i) of the Act, beginning in 2012, the ESRD payment amounts are required to be annually increased by an ESRD market basket increase factor that is reduced by the productivity adjustment in section 1886(b)(3)(B)(xi)(II) of the Act. The application of the productivity adjustment may result in the increase factor being less than 0.0 for a year and may result in payment rates for a year being less than the payment rates for the preceding year. The statute also provides that the market basket increase factor should reflect the changes over time in the prices of an appropriate mix of goods and services used to furnish renal dialysis services.

In the CY 2011 ESRD PPS final rule (75 FR 49151 through 49162), we established an ESRD Bundled market basket using CY 2008 as the base year. This market basket was used to annually update the ESRD base rate payments for CY 2012, CY 2013, and CY 2014. In this CY 2015 ESRD PPS proposed rule, we are proposing to revise and rebase the ESRDB market basket to a base year of CY 2012. We note that PAMA dictates a market basket update for CY 2015 of 0.0 percent and a reduction to the market basket updates in CYs 2016 through 2018 (by 1.25 percentage points for each of 2016 and 2017 and by 1 percentage point for 2018).

The term "market basket" refers to the mix of goods and services needed to produce ESRD care, and is also commonly used to denote the input price index that includes both weights (mix of goods and services) and price factors. The term "ESRDB market basket" as used in this proposed rule refers to the ESRDB input price index.

The proposed CY 2012-based ESRDB market basket represents the costs of operating and capital-related costs. The percentage change in the ESRDB market basket reflects the average change in the price of a fixed set of goods (both operating and capital) and services purchased by ESRD facilities in providing renal dialysis services. For further background information, see the CY 2011 final rule with comment period (75 FR 49151 through 49162).

For purposes of the ESRDB PPS, the ESRDB market basket is a fixed-weight (Laspeyres-type) price index. A Laspeyres-type index compares the cost of purchasing a specified mix of goods and services in a selected base period to the cost of purchasing that same group of goods and services at current prices.

The effects on total expenditures resulting from changes in the quantity or mix of goods and services purchased subsequent or prior to the base period are, by design, not considered.

We construct the market basket in three steps. The first step is to select a base period and estimate total base period expenditure shares for mutually exclusive and exhaustive spending categories. We use total costs for operating and capital expenses. These shares are called "cost" or "expenditure" weights. The second step is to match each expenditure category to a price/wage variable, called a price proxy. We draw these price proxy variables from publicly available statistical series published on a consistent schedule, preferably at least quarterly. The final step involves multiplying the price series for each spending category by the cost weight for that category. The sum of these products (that is, weights multiplied by proxy index levels) for all cost categories yields the composite index level of the market basket for a given quarter or year. Repeating the third step for other quarters and years produces a time series of market basket index levels, from which we can calculate rates of growth.

The market basket represents a fixed-weight index because it answers the question of how much more or less it would cost, at a later time, to purchase the same mix of goods and services that was purchased in the base period.

We are proposing to use CY 2012 as the base year for the proposed rebased and revised ESRDB market basket cost weights. The cost weights for this proposed ESRDB market basket are based on the cost report data for independent ESRD facilities. We refer to the market basket as a CY market basket because the base period for all price proxies and weights are set to CY 2012 = 100. Source data included CY 2012 Medicare cost reports (Form CMS-265-11), supplemented with 2012 data from the U.S. Census Bureau's Services Annual Survey (SAS). Medicare cost reports from hospital-based ESRD providers were not used to construct the proposed ESRDB market basket because data from independent ESRD facilities tend to better reflect the actual cost structure faced by the ESRD facility itself, and are not influenced by the allocation of overhead over the entire institution, as can be the case with hospital-based providers. This approach is consistent with our standard methodology used in the development of other market baskets.

Consistent with our discussion in the CY 2011 final rule with comment period

(75 FR 49153), and as further discussed below, to implement section 1881(b)(14)(F)(i) of the Act we propose to revise and rebase the market basket so the cost weights and price proxies reflect the mix of goods and services that underlie ESRD bundled operating and capital costs for CY 2012.

b. Rebasing and Revision of the ESRD Bundled Market Basket

The terms “rebasing” and “revising”, while often used interchangeably, actually denote different activities. Rebasing means shifting the base year for the structure of costs of the input price index (for example, for this proposed rule, we propose to shift the base year cost structure from CY 2008 to CY 2012). Revising means changing data sources, cost categories, price proxies, and/or methodology used in developing the input price index. We are proposing both to rebase and revise the ESRDB market basket to reflect CY 2012 total cost data.

We selected CY 2012 as the new base year because 2012 is the most recent year for which relatively complete Medicare cost report (MCR) data are available. In developing the proposed market basket, we reviewed ESRD expenditure data from ESRD MCRs (CMS Form 265–11) for CY 2012 for each freestanding ESRD facility that reported expenses and payments. The CY 2012 cost reports are those with cost reporting periods beginning on or after January 1, 2012 and before December 31, 2012. We propose to maintain our policy of using data from freestanding ESRD facilities because freestanding ESRD data reflect the actual cost structure faced by the ESRD facility itself. In contrast, expense data for a hospital-based ESRD reflect the allocation of overhead over the entire institution. Due to this method of allocation, the expenses of each hospital-based component may be skewed.

We developed cost category weights for the proposed CY 2012-based ESRDB market basket in two stages. First, we derived base weights for nine major categories (Wages and Salaries,

Employee Benefits, Medical Supplies, Lab Services, Housekeeping & Operations, Pharmaceuticals, Administrative and General, Capital-Related Building & Fixed Equipment, and Capital-Related Machinery) from the ESRD MCRs. Second, we are proposing to divide the Administrative & General cost category into further detail using 2012 U.S. Census Bureau Services Annual Survey (SAS) Data for the industry Kidney Dialysis Centers (NAICS 621492). We apply the 2012 distributions from the SAS data to the 2012 “Administrative & General” cost weight to yield the more detailed 2012 cost weights. This is similar to the methodology we used to break the 2008-based Administrative & General Costs into more detail for the ESRDB market basket as detailed in the CY 2011 ESRD final rule (75 FR 49154 through 49159). The main difference is that in the 2008-based market basket we relied on data from the U.S. Census Bureau Business Expenses Survey (BES). The BES data was the predecessor to the SAS. The Census Bureau SAS data are published annually, with the most recent data available being 2012. For more information on the SAS data, see http://www.census.gov/services/sas/about_the_surveys.html.

We are proposing to include a total of 20 detailed cost categories for the proposed CY 2012-based ESRDB market basket, which is four more cost categories than the CY 2008-based ESRDB market basket. In addition, we are proposing to further decompose both the Wages and Salaries and Employee Benefits cost categories into four more detailed cost categories reflecting the occupational mix of full time equivalents (FTEs) at ESRD facilities. The four detailed occupational categories that will underlie both Wages and Salaries and Employee Benefits are: (1) Health-related workers; (2) Management workers; (3) Administrative workers; and (4) Service workers. Having more detailed cost categories for these compensation costs enables them to be proxied more precisely. We are also proposing to

collapse the Professional Fees and All Other Services cost categories into single categories rather than splitting those categories into Labor-Related and Non-Labor-Related Services. We will continue to assume that 87 percent of Professional Fees are labor-related costs and will be included in the proposed labor-related share. In addition, we are proposing to revise our labels for All Other Materials to Medical Materials and Supplies, Laboratories to Lab Services, and All Other Labor-Related/ Non Labor-Related to All Other Goods and Services. A more thorough discussion of our proposals is provided below.

i. Cost Category Weights

Using Worksheets A and B from the CY 2012 Medicare cost reports, we first computed cost shares for nine major expenditure categories: Wages and Salaries, Employee Benefits, Pharmaceuticals, Supplies, Lab Services, Administrative and General (A&G), Housekeeping and Operations, Capital-Related Building & Equipment, and Capital-Related Machinery. Edits were applied to include only cost reports that had total costs greater than zero. In order to reduce potential distortions from outliers in the calculation of the cost weights for the major expenditure categories, cost values for each category less than the 5th percentile or greater than the 95th percentile were excluded from the computations. The resulting data set included information from approximately 4,700 independent ESRD facilities’ cost reports from an available pool of 5,333 cost reports. Expenditures for the nine cost categories as a proportion of total expenditures are shown in Table 1.

Table 1 presents the proposed CY 2012-based ESRDB and CY 2008-based ESRDB market basket major cost weights as derived directly from the MCR data. Following the table, we describe the sources of the major category weights and their subcategories in the proposed CY 2012-based ESRDB market basket.

TABLE 1—PROPOSED CY 2012-BASED ESRDB MARKET BASKET MAJOR COST WEIGHTS

Cost category	Proposed CY 2012-based ESRDB market basket	CY 2008-based ESRDB market basket
Wages and Salaries	31.839%	26.338%
Employee Benefits	6.570%	5.163%
Pharmaceuticals	16.510%	26.358%
Supplies	10.097%	9.726%
Lab Services	1.532%	0.356%
Housekeeping & Operations	3.785%	3.604%
Administrative & General (residual)	17.419%	17.594%
Capital-related Building & Fixed Equipment	8.378%	7.910%

TABLE 1—PROPOSED CY 2012-BASED ESRDB MARKET BASKET MAJOR COST WEIGHTS—Continued

Cost category	Proposed CY 2012-based ESRDB market basket	CY 2008-based ESRDB market basket
Capital-related Machinery	3.870%	2.951%

Note: Totals may not sum to 100.000% due to rounding.

Some costs are reported on the Medicare cost report but are not included in the ESRD bundled payment. For example, we removed the expenses related to vaccine costs from total expenditures since these are excluded from the ESRD bundled payment, but reported on the Medicare cost report.

We are proposing to expand the expenditure categories developed from the Medicare cost reports to allow for more detailed expenditure decomposition. To expand these cost categories, SAS data were used because the Medicare cost reports do not collect detailed information on the items of interest. Those categories include: benefits for all employees, professional fees, telephone, utilities, and all other goods and services. We chose to separately break out these categories to more accurately reflect ESRD facility costs. We describe below how the initially computed categories and weights from the cost reports were modified to yield the final 2012 ESRDB market basket expenditure categories and weights presented in this proposed rule.

Wages and Salaries

The weight for wages and salaries for direct patient care for 2012 was initially derived from Worksheet B of the Medicare cost report. However, because

the cost center for direct patient care salaries does not include all other wage and salary costs for non-health workers and physicians, it was necessary to derive a methodology to include all salaries, not just direct patient care salaries, in order to calculate the appropriate market basket cost weight. This was accomplished in the following steps.

(1) From the trial balance of the cost report (Worksheet A), we computed the ratio of salaries to total costs in each of the following cost centers: housekeeping and operations, employee benefits for direct patient care, Administrative & General, Supplies, Laboratories, and Pharmaceuticals.

(2) We then multiplied the ratios computed in step 1 by the total costs for each corresponding cost center from Worksheet B. This provided us with an estimate of salaries other than direct-patient care for each cost center.

(3) The estimated salaries for each of the cost centers on Worksheet B estimated in step 2 were subsequently summed and added to the direct patient care salary figure (resulting in a new total salaries figure).

(4) The estimated non-direct patient care salaries (see step 2) were then subtracted from their respective cost categories to avoid double-counting their values in the total costs.

As a result of this process, we moved from an estimated Wages and Salaries cost weight of 23.242 percent (as estimated using only direct patient care salaries as a percent of total costs) to a weight of 31.839 percent (capturing both direct patient care salaries and all other salary costs and, again, dividing that by total costs found on the Medicare cost report), as seen in Table 2.

The final adjustment made to this category is to include contract labor costs. These costs appear on the Medicare cost report; however, they are embedded in the Administrative and General category and cannot be disentangled using the Medicare cost reports alone. To move the appropriate expenses from the A&G category to Wages and Salaries, we used data from the 2012 SAS, which reported 2.3 of total expenses were spent on contract labor costs. We allocated 80 percent of that figure to Wages and Salaries. At the same time, we subtracted that same amount from A&G, where the contract labor expenses would be reported on the cost report. The 80 percent figure that was used was determined by taking salaries as a percentage of total compensation (excluding contract labor) from the 2012 MCR data. The resulting cost weight for Wages and Salaries increases to 33.650 percent.

TABLE 2—ESRD WAGES & SALARIES SHARE DETERMINATION

Components	Cost share (%)
08 MCR Salaries Direct Patient Care (DPC)	22.297
08 MCR Additional Salaries Weight (other than DPC)	4.041
08 Wage & Salary Weight normalized after adding separately billable services into the bundle	- 1.373
08 Contract Labor (wages) (80% of BES CL share)	1.790
08 Final Wage & Salary Weight	26.755
12 MCR Salaries Direct Patient Care (DPC)	23.242
12 MCR Additional Salaries Weight (other than DPC)	8.597
12 Contract Labor (80% of SAS CL share)	1.811
12 Final Wage & Salary Weight	33.650

Benefits

The Benefits weight was derived from the MCR data for employee benefits for direct patient care and supplemented with data from the 2012 SAS to account for non-direct patient care benefits. The cost report only reflects health-related benefit costs associated with direct

patient care; that is, it does not reflect retirement benefits. In order to include the benefits related to non-direct patient care, we estimated this marginal increase from the SAS Benefits weight. Unlike the MCR, data the SAS benefits share includes expenses related to the retirement and pension benefits. In order to be consistent with the cost

report definitions we do not want to include the costs associated with retirement and pension benefits in the cost share weights. These costs are relatively small compared to the costs for the health related benefits, accounting for only 2.7 percent of the total benefits costs as reported on the SAS. Our method produced a Benefits

(both direct patient care and non-direct patient care) weight that was 1.824 percentage points larger (8.394 vs. 6.570) than the Benefits weight for direct patient care calculated directly from the cost reports. To avoid double-counting and to ensure all of the market basket weights still totaled 100 percent, we removed this additional 1.824 percentage point for Benefits from the residual category.

The final adjustment made to this category is to include contract labor costs. Once again, these costs appear on the Medicare cost report; however, they are embedded in the Administrative and General category and cannot be disentangled using the Medicare cost report alone. We applied 20 percent of total contract labor costs, as estimated using the SAS, to the Benefits cost weight calculated from the cost reports. The resulting cost weight for Benefits increases to 8.847 percent.

The Table 3 compares the 2008-based Benefits cost share derivation as detailed in the CY 2011 ESRD final rule (75 FR 49155–49156) to the proposed 2012-based Benefits cost share derivation as explained above.

TABLE 3—ESRD BENEFIT SHARE DETERMINATION

Components	Cost share (percent)
08 MCR Benefits	5.163
08 BES Additional Benefits Weight (Health only)	1.143
08 Contract Labor (20% of BES benefits share)	0.448
08 Final Benefit Weight	6.754
12 MCR Benefits	6.570
12 SAS Additional Benefits Weight (Health only)	1.824
12 Contract Labor (20% of SAS benefits share)	0.453
12 Final Benefit Weight	8.847

Utilities

We developed a weight for Utility expenses using the 2012 SAS data, as utilities are not separately identified on the Medicare cost report. The SAS data reports the percentage of expenses for ‘purchased fuels (except motor fuels), ‘purchased electricity’, and ‘water, sewer, refuse, and other utilities.’ We applied these ratios to the administrative and general cost share (net of contract labor and additional benefits). The resulting Electricity, Fuel (Natural Gas), and Water and Sewerage weights in the proposed 2012 ESRDB market basket are 0.973, 0.101, and 0.765 percent, respectively; together these categories yield a combined Utilities cost weight of 1.838 percent.

Pharmaceuticals

The proposed ESRDB market basket includes expenditures for all drugs, including formerly separately billable drugs and ESRD-related drugs that were covered under Medicare Part D before the ESRD PPS was implemented. We were able to calculate an expenditure weight for pharmaceuticals directly from the following cost centers on Worksheet B: columns 11 ‘Drugs Included in Composite Rate’; 12 ‘ESAs’; 13 ‘ESRD-Related Drugs; and drug expenses reported on line 5 column 10, ‘Non-ESRD related drugs.’ The Non-ESRD related drugs would include drugs and biologicals, administered during dialysis for non-ESRD related conditions as well as oral-only drugs. Since these are costs to the facility for providing ESRD treatment to the patient we propose to include them in the drug cost share weight. Vaccine expenditures, which are mandated as separately reimbursable, were excluded when calculating this cost weight. Section 1842(o)(1)(A)(iv) of the Act requires that influenza, pneumococcal, and hepatitis B vaccines described in subparagraph (A) or (B) of section 1861(s)(10) of the Act be paid based on 95 percent of average wholesale price (AWP) of the drug. Since these drugs are excluded from other prospective payment systems, we exclude them from the proposed ESRDB market basket, as well.

Finally, to avoid double-counting, the weight for the Pharmaceuticals category was reduced to exclude the estimated share of non-direct patient care salaries and benefits associated with the applicable drug cost centers referenced above. This resulted in a proposed ESRDB market basket weight for Pharmaceuticals of 16.510 percent. ESA expenditures accounted for 12.383 percentage points of the Pharmaceuticals weight, and all other drugs accounted for the remaining 4.127 percentage points (.438 percent for Drugs Included in Composite Rate, 3.534 percent for ESRD-Related Drugs, and 0.155 percent for Non-ESRD related drugs).

The 9-percentage point decrease in the pharmaceutical share between 2008 and 2012 (25.052 percent to 16.510 percent) is due largely to the drop in drug utilization. The drug percentage of the base rate used in 2011 was about 31 percent; however, the analysis conducted for the drug utilization adjustment showed that the drug portion of the base rate in 2014 would have fallen to only be 22 percent of the base rate had it been fully implemented. The cost report data corroborate the

drop in drug costs for facilities over the same time frame.

Supplies

We calculated the weight for Supplies included in the bundled rate using the costs reported in the Supplies cost center (column 7 on Worksheet B) of the Medicare cost report. This total was divided by total expenses to derive a weight for the Supplies component in the ESRDB market basket. Finally, to avoid double-counting, the weight for the Supplies category was reduced to exclude the estimated share of non-direct patient care salaries and benefits associated with this cost center. The resulting proposed 2012-based ESRDB market basket weight for Supplies is 10.097 percent.

Lab Services

We calculated the weight for Lab Services included in the bundled rate using the costs reported in the Laboratory cost center (column 8 on Worksheet B) of the Medicare cost report. This total was divided by total expenses to derive a weight for the Lab component in the ESRDB market basket. Finally, to avoid double-counting, the weight for the Lab services category was reduced to exclude the estimated share of non-direct patient care salaries and benefits associated with this cost center. The resulting proposed 2012-based ESRDB market basket weight for Lab Services is 1.532 percent.

The cost weight for lab services is substantially lower than the 2008 ESRDB market basket lab weight of 5.497 percent. This is due to the change in the method used to determine lab costs. In 2008, we relied on MCR data for the cost share weight; however, the majority of lab services were performed by labs outside of the dialysis facility and those costs were not reported on the MCR. Therefore, in the 2008 ESRDB market basket we inflated the expenses reported for labs in ESRD facilities to reflect the use from other provider types. This adjustment factor was estimated based on the lab payment to dialysis facilities relative to the lab fee payment to other providers. For the rebased ESRDB market basket, the 2012 cost report data represents the expenses under the bundled payment system, and all of the expenses related to lab fees (whether in house or contracted through an outside lab) are reported in the MCR data.

Housekeeping & Operations

We calculated the weight for Housekeeping and Operations included in the bundled rate using the costs reported on worksheet A, column 8,

lines 3 & 4 of the Medicare Cost Report. This total was divided by total expenses to derive a weight for the Housekeeping and Operations component in the ESRDB market basket. Finally, to avoid double-counting, the weight for the Housekeeping & Operations category was reduced to exclude the estimated share of non-direct patient care salaries and benefits associated with this cost center. The resulting proposed 2012-based ESRDB market basket weight for Housekeeping and Operations is 3.785 percent.

Administrative and General (A&G)

We computed the proportion of total A&G expenditures using the A&G cost center data from Worksheet B (column 9) of the Medicare cost reports. As described above, we exclude contract labor from this cost category and apportion these costs to the salary and benefits cost weights. Similar to other expenditure category adjustments, we then reduced the computed weight to exclude salaries and benefits associated with the A&G cost center and the additional benefits for non-direct patient care. The resulting A&G cost weight is 13.331 percent. This A&G cost weight is then fully apportioned to derive detailed cost weights for Utilities, Telephone, Professional Fees, and All Other Goods and Services.

Professional Fees

A separate weight for Professional Fees was developed using the 2012 SAS data. Professional fees include fees associated with the following: purchased professional & technical services (such as accounting, bookkeeping, legal, management, consulting, and other professional services fees) and purchased advertising & promotional services. To estimate professional fees, we first calculated the ratio of SAS professional fees to SAS expenses that match the A&G expenses from the cost reports. We then applied

this ratio to the A&G total cost weight to estimate the proportion of ESRD facility professional fees. The resulting weight for the proposed 2012-based ESRDB market basket is 0.617 percent. An estimated 87 percent of the expenses are considered labor-related and subsequently included in the proposed labor-related share, which is described in more detail below.

Telephone

Because telephone service expenses are not separately identified on the Medicare cost report, we developed a Telephone Services weight using the 2012 SAS expenses. We estimated a ratio of telephone services expenses to total administrative and general expenses from SAS. We applied this ratio to the total A&G cost weight from the cost reports to estimate the proportion of ESRD facility telephone expenses. The resulting proposed 2012-based ESRDB market basket cost weight for Telephone Services is 0.468 percent.

All Other Goods and Services

A separate weight for All Other Goods and Services was developed using the 2012 SAS data. All other Goods and Services include expenses for purchased software, professional liability insurance, data processing and other purchased computer services, and all other operating expenses not otherwise captured. We estimated a ratio of All Other Goods and Services expenses to Total Administrative and General expenses from SAS. We then applied this ratio to the total A&G cost weight from the cost reports to estimate the cost weight for ESRD facility All Other Goods and Services. The resulting proposed 2012-based ESRDB market basket cost weight for All Other Goods and Services is 10.407 percent.

Capital

We developed a market basket weight for the Capital category using data from

Worksheet B of the Medicare cost reports. Capital-related costs include depreciation and lease expense for buildings, fixtures, movable equipment, property taxes, insurance, the costs of capital improvements, and maintenance expense for buildings, fixtures, and machinery. Because housekeeping as well as operation & maintenance costs are included in the Worksheet B cost center for Capital-Related costs (Worksheet B, column 2), we excluded the costs for these two categories and developed a separate expenditure category for housekeeping & operations, as detailed above. Similar to the methodology used for other market basket cost categories with a salaries component, we computed a share for non-direct patient care salaries and benefits associated with the Capital-related Machinery cost center. We used Worksheet B to develop two capital-related cost categories, one for Buildings and Equipment (based on worksheet B column 2 less housekeeping & operations), and one for Machinery (based on worksheet B column 4). We reasoned this delineation was particularly important given the critical role played by dialysis machines. Likewise, because price changes associated with Buildings and Equipment could move differently than those associated with Machinery, we felt that separate price proxies would be more appropriate. The resulting proposed 2012-based ESRDB market basket weights for Capital-related Buildings and Equipment and Capital-related Machinery are 8.378 and 3.870 percent, respectively.

Table 4 lists all of the cost categories and cost weights in the proposed CY 2012 ESRDB market basket compared to the cost categories and cost weights in the CY 2008 ESRDB market basket.

TABLE 4—COMPARISON OF THE PROPOSED CY 2012–BASED ESRDB MARKET BASKET COST CATEGORIES & WEIGHTS AND THE CY 2008–BASED ESRDB MARKET BASKET COST CATEGORIES & WEIGHTS.

2008 Cost category	2008 Cost weight (percent)	Proposed 2012 cost weight (percent)	Proposed 2012 cost category
Total	100.000	100.000	Total.
Compensation	33.509	42.497	Compensation.
Wages and Salaries	26.755	33.650	Wages and Salaries.
Employee Benefits	6.754	8.847	Employee Benefits.
Utilities	1.264	1.839	Utilities.
Electricity	0.621	0.973	Electricity.
Natural Gas	0.127	0.101	Natural Gas.
Water and Sewerage	0.516	0.765	Water and Sewerage.
All Other Materials	39.765	28.139	Medical Materials and Supplies.
Pharmaceuticals	25.052	16.510	Pharmaceuticals.
Supplies	9.216	10.097	Supplies.

TABLE 4—COMPARISON OF THE PROPOSED CY 2012–BASED ESRDB MARKET BASKET COST CATEGORIES & WEIGHTS AND THE CY 2008–BASED ESRDB MARKET BASKET COST CATEGORIES & WEIGHTS.—Continued

2008 Cost category	2008 Cost weight (percent)	Proposed 2012 cost weight (percent)	Proposed 2012 cost category
Lab Services	5.497	1.532	Lab Services.
All Other Services	15.929	15.277	All Other Goods and Services.
Telephone	0.597	0.468	Telephone Service.
Housekeeping and Operations	2.029	3.785	Housekeeping and Operations.
Labor-Related Services	2.768		
Prof. Fees: Labor-related	1.549	0.617	Professional Fees (Labor-related and NonLabor-related services).
All Other Labor-related	1.219		
NonLabor-Related Services	10.535	10.407	All Other Goods and Services.
Prof. Fees: Nonlabor-related	0.224		
All Other Nonlabor-related	10.311		
Capital Costs	9.533	12.248	Capital Costs.
Capital Related-Building and Equipment	7.459	8.378	Capital Related-Building and Equipment.
Capital Related-Machinery	2.074	3.870	Capital Related-Machinery.

Note: Totals may not sum to 100.000 percent due to rounding.

ii. Proposed Price Proxies for the CY 2012 ESRDB Market Basket

After developing the cost weights for the proposed CY 2012-based ESRDB market basket, we selected the most appropriate wage and price proxies currently available to represent the rate of price change for each expenditure category. We base the price proxies on Bureau of Labor Statistics (BLS) data and group them into one of the following BLS categories:

- *Employment Cost Indexes.* Employment Cost Indexes (ECIs) measure the rate of change in employment wage rates and employer costs for employee benefits per hour worked. These indexes are fixed-weight indexes and strictly measure the change in wage rates and employee benefits per hour. ECIs are superior to Average Hourly Earnings (AHE) as price proxies for input price indexes because they are not affected by shifts in occupation or industry mix, and because they measure pure price change and are available by both occupational group and by industry. The industry ECIs are based on the North American Classification System (NAICS) and the occupational ECIs are based on the Standard Occupational Classification System (SOC).

- *Producer Price Indexes.* Producer Price Indexes (PPIs) measure price changes for goods sold in other than retail markets. PPIs are used when the purchases of goods or services are made at the wholesale level.

- *Consumer Price Indexes.* Consumer Price Indexes (CPIs) measure change in the prices of final goods and services bought by consumers. CPIs are only used when the purchases are similar to those of retail consumers rather than

purchases at the wholesale level, or if no appropriate PPIs were available.

We evaluated the price proxies using the criteria of reliability, timeliness, availability, and relevance:

- *Reliability.* Reliability indicates that the index is based on valid statistical methods and has low sampling variability. Widely accepted statistical methods ensure that the data were collected and aggregated in a way that can be replicated. Low sampling variability is desirable because it indicates that the sample reflects the typical members of the population. (Sampling variability is variation that occurs by chance because only a sample was surveyed rather than the entire population.)

- *Timeliness.* Timeliness implies that the proxy is published regularly, preferably at least once a quarter. The market baskets are updated quarterly, and therefore, it is important for the underlying price proxies to be up-to-date, reflecting the most recent data available. We believe that using proxies that are published regularly (at least quarterly, whenever possible) helps to ensure that we are using the most recent data available to update the market basket. We strive to use publications that are disseminated frequently, because we believe that this is an optimal way to stay abreast of the most current data available.

- *Availability.* Availability means that the proxy is publicly available. We prefer that our proxies are publicly available because this will help ensure that our market basket updates are as transparent to the public as possible. In addition, this enables the public to be able to obtain the price proxy data on a regular basis.

- *Relevance.* Relevance means that the proxy is applicable and representative of the cost category weight to which it is applied. The CPIs, PPIs, and ECIs that we have selected to propose in this regulation meet these criteria. Therefore, we believe that they continue to be the best measure of price changes for the cost categories to which they would be applied.

Table 7 lists all price proxies for the proposed revised and rebased ESRDB market basket. Below is a detailed explanation of the price proxies used for each cost category weight.

Wages and Salaries

We will continue using an ECI blend for wages and salaries in the proposed 2012-based ESRDB market basket. However, we are proposing to expand the number of occupation categories and associated ECIs from two to four based on FTE data from ESRD Medicare Cost Reports and the availability of ECIs from BLS. We calculated weights for the Wages and Salaries sub-categories using 2012 FTE data and associated 2012 Average Mean Wage data from the Bureau of Labor Statistics' Occupational Employment Statistics.

Wages and Salaries—Health Related

We are proposing to continue using the ECI for Wages & Salaries for Hospitals (All Civilian) (BLS series code #CIU102622000000I). Of the two health-related ECIs that we considered (“Hospitals” and “Health Care and Social Assistance”), the wage distribution within the Hospital NAICS sector (622) is more closely related to the wage distribution of ESRD facilities than it is to the wage distribution of the

Health Care and Social Assistance NAICS sector (62).

The Wages and Salaries—Health Related subcategory weight within the Wages and Salaries cost category is 80percent. The ESRD Medicare Cost Report FTE categories used to define the Wages and Salaries—Health Related subcategory include “Physicians,” “Registered Nurses,” “Licensed Practical Nurses,” “Nurses’ Aides,” “Technicians,” and “Dieticians.”

The current 2008-based ESRD Market Basket uses the ECI for Wages & Salaries for Hospitals (All Civilian) for 50 percent of Wages and Salaries.

Wages and Salaries—Management

We propose using the ECI for Wages & Salaries for Management, Business, and Financial (Private Industry) (BLS series code #CIU2020000110000I). We feel this ECI is the most appropriate price proxy to measure the price growth of management functions at ESRD facilities. Furthermore, we regularly use this ECI-wages for management, business, and financial in our other market baskets, such as the MEI.

The Wages and Salaries—Management subcategory weight within the Wages and Salaries cost category is 8 percent. The ESRD Medicare Cost Report FTE category used to define the Wages and Salaries—Management subcategory is “Management.”

Wages and Salaries—Administrative

We propose using the ECI for Wages & Salaries for Office and Administrative Support (Private Industry) (BLS series code #CIU2020000220000I). We feel this ECI is the most appropriate price proxy to measure the price growth of administrative support at ESRD facilities. Furthermore, we regularly use this ECI for administrative wages in our other market baskets, such as the MEI.

The Wages and Salaries—Administrative subcategory weight within the Wages and Salaries cost category is 7 percent. The ESRD Medicare Cost Report FTE category used to define the Wages and Salaries—Administrative subcategory is “Administrative.”

Wages and Salaries—Services

We propose using the ECI for Wages & Salaries for Service Occupations (Private Industry) (BLS series code #CIU2020000300000I). We feel this ECI is the most appropriate price proxy to measure the price growth of all other non-health related, non-management, and non-administrative service support at ESRD facilities. Furthermore, we regularly use this ECI for all other service wages in our other market baskets, such as the MEI.

The Wages and Salaries—Services subcategory weight within the Wages and Salaries cost category is 6 percent. The ESRD Medicare Cost Report FTE categories used to define the Wages and Salaries—Services subcategory are “Social Workers” and “Other.”

Table 5 lists the four ECI series and the corresponding weights used to construct the proposed ECI blend for wages and salaries. We feel this new ECI blend is the most appropriate price proxy to measure the growth of wages and salaries faced by ESRD facilities.

TABLE 5—ECI BLEND FOR WAGES AND SALARIES IN THE PROPOSED 2012 BASED ESRDB MARKET BASKET

Cost category	ECI Series	Weight (%)
Wages and Salaries—Health Related	ECI—Wages & Salaries—Hospital (All Civilian)	80
Wages and Salaries—Management	ECI—Wages & Salaries—Management, Business, and Financial (Private Industry).	7
Wages and Salaries—Administrative	ECI—Wages & Salaries—Office and Administrative Support (Private Industry)	7
Wages and Salaries—Services	ECI—Wages & Salaries—Service Occupations (Private Industry)	6

The current 2008-based ESRDB market basket uses a 50 percent/50 percent blend of the “ECI—Wages & Salaries—Hospital (All Civilian)” and the “ECI—Wages and Salaries—Healthcare and Social Assistance” for the wages and salaries ECI blend.

Benefits

We will continue using an ECI blend for Benefits in the proposed 2012-based ESRDB market basket; however, we are proposing to expand the number of occupation categories and associated ECIs from two to four based on the components of the proposed Wage and Salaries ECI blend.

Benefits—Health Related

We are proposing to continue using the ECI for Benefits for Hospitals (All Civilian) to measure price growth of this subcategory. The ECI for Benefits for Hospitals is calculated using the ECI for Total Compensation for Hospitals (BLS series code # CIU1016220000000I) and the relative importance of wages and salaries within total compensation. We believe this constructed ECI series is

technically appropriate for the reason stated above in the wages and salaries price proxy section.

Benefits—Management

We propose using the ECI for Benefits for Management, Business, and Financial (Private Industry) to measure price growth of this subcategory. The ECI for Benefits for Management, Business, and Financial is calculated using the ECI for Total Compensation for Management, Business, and Financial (BLS series code # CIU2010000110000I) and the relative importance of wages and salaries within total compensation. We believe this constructed ECI series is technically appropriate for the reason stated above in the wages and salaries price proxy section.

Benefits—Administrative

We propose using the ECI for Benefits for Office and Administrative Support (Private Industry) to measure price growth of this subcategory. The ECI for Benefits for Office and Administrative Support is calculated using the ECI for

Total Compensation for Office and Administrative Support (BLS series code # CIU2010000220000I) and the relative importance of wages and salaries within total compensation. We believe this constructed ECI series is technically appropriate for the reason stated above in the wages and salaries price proxy section.

Benefits—Services

We propose using the ECI for Benefits for Service Occupations (Private Industry) to measure price growth of this subcategory. The ECI for Benefits for Service Occupations is calculated using the ECI for Total Compensation for Service Occupations (BLS series code # CIU2030000300000I) and the relative importance of wages and salaries within total compensation. We believe this constructed ECI series is technically appropriate for the reason stated above in the wages and salaries price proxy section.

We feel the new benefits ECI blend is the most appropriate price proxy to measure the growth of prices faced by

ESRD facilities. Table 6 lists the four ECI series and the corresponding weights used to construct the proposed benefits ECI blend.

TABLE 6—BENEFITES ECI BLEND IN THE PROPOSED 2012–BASED ESRDB MARKET BASKET

Cost category	ECI Series	Weight (%)
Benefits—Health Related	ECI—Benefits—Hospital (All Civilian)	80
Benefits—Management	ECI—Benefits—Management, Business, and Financial (Private Industry)	7
Benefits—Administrative	ECI—Benefits—Office and Administrative Support (Private Industry)	7
Benefits—Services	ECI—Benefits—Service Occupations (Private Industry)	6

The current 2008-based ESRDB market basket uses a 50 percent/50 percent blend of the “ECI—Benefits—Hospital (All Civilian)” and the “ECI—Benefits—Healthcare and Social Assistance” for the benefits ECI blend.

Electricity

We propose to continue using the PPI for Commercial Electric Power (BLS series code #WPU0542) to measure the price growth of this cost category. This is the same proxy used in the current 2008-based ESRDB market basket.

Natural Gas

We propose to continue using the PPI for Commercial Natural Gas (BLS series code #WPU0552) to measure the price growth of this cost category. This is the same proxy used in the current 2008-based ESRDB market basket.

Water and Sewerage

We propose to continue using the CPI for Water and Sewerage Maintenance (BLS series code #CUUR0000SEHG01) to measure the price growth of this cost category. This is the same proxy used in the current 2008-based ESRDB market basket.

Pharmaceuticals

We propose to change the price proxy used for the pharmaceuticals cost category. A recent Health and Human Services Office of the Inspector General (OIG) report titled “Update: Medicare Payment for End Stage Renal Disease Drugs” recommended that CMS consider updating the ESRD payment bundle using a factor that takes into account drug acquisition costs. CMS had responded to this recommendation by stating that we would consider these findings in the continual evaluation of the ESRD market basket, particularly during the next rebasing and revising of the market basket index.¹

Drug acquisition cost data is neither publicly available nor the methods used to determine it transparent, and, therefore, wouldn’t meet our price proxy criteria of relevance, reliability,

transparency, and public availability. However, after considering several viable options that do meet the criteria we are proposing to use the PPI: Vitamin, Nutrient, and Hematinic Preparations (BLS series code #WPU063807). This index includes drugs that are most similar to ESAs and other drugs used in the ESRD setting, such as iron supplements. The definition of a hematinic is a medicine that increases the hemoglobin content of the blood, and these types of drugs are used to treat iron-deficiency anemia essential for normal erythropoiesis.

We believe the PPI: Vitamin, Nutrient, and Hematinic Preparations to be the most technically appropriate index available to measure the price growth of the pharmaceuticals cost category in the proposed 2012-based ESRDB market basket. The current 2008-based ESRDB market basket uses the PPI: Pharmaceuticals for Human Use.

Supplies

We propose using the PPI for Surgical and Medical Instruments (BLS series code #WPU1562) since it excludes orthopedic, prosthetic, ophthalmic, and dental type medical equipment and devices, which are not likely to be used extensively in the ESRD setting. The types of equipment under Surgical and Medical Instruments, particularly blood transfusion and IV equipment, seem most similar to the medical equipment and supplies that would be used in the ESRD setting. The current 2008-based ESRDB market basket uses the PPI for Medical, Surgical, and Personal Aid Devices.

Lab Services

We propose to continue using the PPI for Medical Laboratories (BLS series code #PCU621511621511) to measure the price growth of this cost category. This is the same proxy used in the current 2008-based ESRDB market basket.

Telephone Service

We propose to continue using the CPI for Telephone Services (BLS series code #CUUR0000SEED) to measure the price

growth of this cost category. This is the same proxy used in the current 2008-based ESRDB market basket.

Housekeeping and Operations

We propose to continue using the PPI for Cleaning and Building Maintenance Services (BLS series code #WPU49) to measure the price growth of this cost category. This is the same proxy used in the current 2008-based ESRDB market basket.

Professional Fees

We propose to continue using the ECI (Compensation) for Professional and Related Occupations (Private Industry) (BLS series code # CIU20100001200001) to measure the price growth of this cost category. This is the same proxy used in the current 2008-based ESRDB market basket.

All Other Goods and Services

We propose using the PPI for Finished Goods less Foods and Energy (BLS series code #WPUFD4131) as the price proxy for the All Other Goods and Services cost category. This PPI series is used in most of CMS’ other market baskets to measure the expenses for the residual category of all other goods and services. It is more consistent with the purchase of items at a wholesale rather than a consumer level. The current 2008-based ESRDB market basket (specifically, the “All Other Non Labor-Related Services” cost category) uses the CPI–U, All Items less Foods and Energy.

Capital-Related Building and Equipment

We propose using the PPI for Lessors of Nonresidential Buildings (BLS series code #PCU531120531120) as it represents the types of fixed capital expenses most likely faced by ESRD facilities. We also use this proxy in the MEI as the fixed capital proxy for physicians. We believe the PPI for Lessors of Nonresidential Buildings is more appropriate as fixed capital expenses in both the ESRD and physician office setting should be more congruent with trends in business office space costs rather than residential costs. The current 2008-based ESRDB market

¹ <http://oig.hhs.gov/oei/reports/oei-03-12-00550.asp>.

basket uses the CPI for Owners' Equivalent Rent of Residences.

Capital Related Machinery

We propose to continue using the PPI for Electrical Machinery and Equipment

(BLS series code #WPU117) to measure the price growth of this cost category.

This is the same proxy used in the current 2008-based ESRDB market basket.

Table 7 shows all the proposed price proxies for the proposed CY 2012-based ESRDB Market Basket.

TABLE 7—PROPOSED PRICE PROXIES FOR THE CY 2012-BASED ESRDB MARKET BASKET

Cost category	Price proxy	Cost weight %
Compensation		42.497
Wages and Salaries		33.650
Health-related Wages	ECI—Wages & Salaries—Hospital (Civilian)	26.920
Management Wages	ECI—Wages & Salaries—Management, Business, and Financial (Private)	2.356
Administrative Wages	ECI—Wages & Salaries—Office and Administrative Support (Private)	2.356
Service Wages	ECI—Wages & Salaries—Service Occupations (Private)	2.019
Employee Benefits		8.847
Health-related Benefits	ECI—Benefits—Hospital (Civilian)	7.078
Management Benefits	ECI—Benefits—Management, Business, and Financial (Private)	0.619
Administrative Benefits	ECI—Benefits—Office and Administrative Support (Private)	0.619
Service Benefits	ECI—Benefits—Service Occupations (Private)	0.531
Utilities		1.839
Electricity	PPI—Commercial Electric Power	0.973
Natural Gas	PPI—Commercial Natural Gas	0.101
Water and Sewerage	CPI—Water and Sewerage Maintenance	0.765
Medical Materials and Supplies		28.139
Pharmaceuticals	PPI—Vitamin, Nutrient, and Hematinic Preparations	16.510
Supplies	PPI—Surgical and Medical Instruments	10.097
Lab Services	PPI—Medical Laboratories	1.532
All Other Goods and Services		15.277
Telephone Service	CPI—Telephone Services	0.468
Housekeeping and Operations	PPI—Cleaning and Building Maintenance Services	3.785
Professional Fees	ECI—Compensation—Professional and Related Occupations (Private)	0.617
All Other Goods and Services	PPI—Finished Goods less Foods and Energy	10.407
Capital Costs		12.248
Capital Related Building and Equipment	PPI—Lessors of Nonresidential Buildings	8.378
Capital Related Machinery	PPI—Electrical Machinery and Equipment	3.870
Total		100.000

Note: Totals may not sum to 100.000% due to rounding.

iii. Proposed Market Basket Estimate for the CY 2015 ESRDB PPS Update

As discussed previously in this proposed rule, beginning with the CY 2015 ESRD PPS update, we are proposing to adopt the CY 2012-based ESRDB market basket as the appropriate market basket of goods and services for the ESRD PPS.

Based on the IHS Global Insight, Inc. (IGI) first quarter 2014 forecast with history through the fourth quarter of 2013, the most recent estimate of the proposed CY 2012-based ESRDB market basket for CY 2015 is 2.0 percent. IGI is a nationally recognized economic and

financial forecasting firm that contracts with CMS to forecast the components of the CMS market baskets. Based on IGI's first quarter 2014 forecast with history through the fourth quarter of 2013, the estimate of the current CY 2008-based ESRDB market basket for CY 2015 is 2.7 percent.

Table 8 compares the proposed CY 2012-based ESRDB market basket and the CY 2008-based ESRDB market basket percent changes. For the historical period between CY 2011 and CY 2013, the average difference between the two market baskets is -1.8 percentage points. This is primarily the

result of the lower pharmaceutical cost share combined with the proposed revised price proxy for the pharmaceutical cost category. For the CY 2014 and CY 2015 forecasts, the difference in the market basket forecasts are mainly driven by the same factors as in the historical period; however, it is important to note that the differences between the two market baskets are projected to be smaller as the growth in the price proxy for the pharmaceutical category are projected to grow at more similar growth rates in the projected period than the growth rates in the recent historical period.

TABLE 8—PROPOSED CY 2012-BASED ESRDB MARKET BASKET AND CY 2008 BASED ESRDB MARKET BASKET, PERCENT CHANGES: 2011–2015

Calendar Year (CY)	Proposed Rebased CY 2012-based ESRDB Market Basket	CY 2008-Based ESRDB Market Basket
Historical data:

c. Proposed Productivity Adjustment

Under section 1881(b)(14)(F)(i) of the Act, as amended by section 3401(h) of the Affordable Care Act, for CY 2012 and each subsequent year, the ESRD market basket percentage increase factor shall be reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act. The statute defines the productivity adjustment as equal to the 10-year moving average of changes in annual economy-wide private nonfarm business multifactor productivity (MFP) (as projected by the Secretary for the 10-year period ending with the applicable fiscal year, year, cost reporting period, or other annual period) (the “MFP adjustment”). The Bureau of Labor Statistics (BLS) is the agency that publishes the official measure of private nonfarm business MFP. Please see <http://www.bls.gov/mfp> to obtain the BLS historical published MFP data. We note that the proposed and final methodology for calculating and applying the MFP adjustment to the ESRD payment update is similar to the methodology used in other payment systems, as required by section 3401 of the Affordable Care Act.

The projection of MFP is currently produced by IGI. The details regarding the methodology for forecasting MFP and how it is applied to the market basket were finalized in the CY 2012

ESRD PPS final rule (76 FR 70232 through 70234). Using this method and the IGI forecast for the first quarter of 2014 of the 10-year moving average of MFP, the CY 2015 MFP factor we would have proposed is 0.4 percent. As discussed further below, however, section 1881(b)(F)(i)(III) of the Act, as added by section 217(b)(2) of PAMA, requires the Secretary to implement a 0.0 percent payment update in CY 2015.

d. Calculation of the Proposed ESRDB Market Basket Update, Adjusted for Multifactor Productivity for CY 2015

Under section 1881(b)(14)(F) of the Act, beginning in CY 2012, ESRD PPS payment amounts shall be annually increased by an ESRD market basket percentage increase factor reduced by the productivity adjustment. For CY 2015, section 1881(b)(14)(F)(i)(III) of the Act, as added by section 217(b)(2) of PAMA, requires the Secretary to implement a 0.0 percent ESRDB market basket increase to the ESRD PPS base rate. In addition, we interpret the reference to “[n]otwithstanding subclause (III)” that was added to amended section 1881(b)(14)(F)(i)(III) as precluding the application of the multifactor productivity (MFP) adjustment in 2015. As a result of these provisions, the proposed CY 2015 ESRD market basket increase is 0.0 percent. We note that if PAMA had not been enacted the

proposed 2012-based ESRDB market basket update less productivity for CY 2015 would have been 1.6 percent, or 2.0 percent less 0.4 percentage point.

e. Labor-Related Share

We define the labor-related share (LRS) as those expenses that are labor-intensive and vary with, or are influenced by, the local labor market. The labor-related share of a market basket is determined by identifying the national average proportion of operating costs that are related to, influenced by, or vary with the local labor market. The labor-related share is typically the sum of Wages and Salaries, Benefits, Professional Fees, Labor-related Services, and a portion of the Capital share from a given market basket.

We propose to use the proposed 2012-based ESRDB market basket costs to determine the proposed labor-related share for ESRD facilities of 50.673 percent, as shown in Table 9 below. These figures represent the sum of Wages and Salaries, Benefits, Housekeeping and Operations, 87 percent of the weight for Professional Fees (details discussed below), and 46 percent of the weight for Capital-related Building and Equipment expenses (details discussed below). We note that this is a similar methodology used to compute the labor-related share used from CY 2011 through CY 2014.

TABLE 9—PROPOSED CY 2015 LABOR-RELATED SHARE AND CY 2014 ESRDB LABOR-RELATED SHARE

Cost category	Proposed CY 2015 ESRDB labor-related share (percent)	CY 2014 ESRDB labor-related share (percent)
Wages	33.650	26.755
Benefits	8.847	6.754
Housekeeping and operations	3.785	2.029
Professional fees (labor-related)	0.537	2.768
Capital labor-related	3.854	3.431
Total	50.673	41.737

The labor-related share for Professional Fees (87 percent) reflects the proportion of ESRD facilities’ professional fees expenses that we believe vary with local labor market. We conducted a survey of ESRD facilities in 2008 to better understand the

proportion of contracted professional services that ESRD facilities typically purchase outside of their local labor market. These purchased professional services include functions such as accounting and auditing, management consulting, engineering, and legal

services. Based on the survey results, we determined that, on average, 87 percent of professional services are purchased from local firms and 13 percent are purchased from businesses located outside of the ESRD facility’s local labor market. Thus, we are proposing to

include 87 percent of the cost weight for Professional Fees in the labor-related share, the same percentage as used in prior years.

The labor-related share for capital-related expenses (46 percent of ESRD facilities' adjusted Capital-related Building and Equipment expenses) reflects the proportion of ESRD facilities' capital-related expenses that we believe varies with local labor market wages. Capital-related expenses are affected in some proportion by variations in local labor market costs (such as construction worker wages) that are reflected in the price of the capital asset. However, many other inputs that determine capital costs are not related to local labor market costs, such as interest rates. The 46-percent figure is based on regressions run for the inpatient hospital capital PPS in 1991 (56 FR 43375). We use a similar methodology to calculate capital-related expenses for the labor-related shares for rehabilitation facilities (70 FR 30233), psychiatric facilities, long-term care facilities, and skilled nursing facilities (66 FR 39585).

3. The Proposed CY 2015 ESRD PPS Wage Indices

a. Background

Section 1881(b)(14)(D)(iv)(II) of the Act provides that the ESRD PPS may include a geographic wage index payment adjustment, such as the index referred to in section 1881(b)(12)(D) of the Act. In the CY 2011 ESRD PPS final rule (75 FR 49117), we finalized for the ESRD PPS the use of the Office of Management and Budget's (OMB) Core-Based Statistical Areas (CBSAs)-based geographic area designations described in OMB bulletin 03-04, issued June 6, 2003 as the basis for revising the urban and rural areas and their corresponding wage index values. This bulletin, as well as subsequent bulletins, is available online at http://www.whitehouse.gov/omb/bulletins_index2003-2005.

We also finalized that we would use the urban and rural definitions used for the Medicare IPPS but without regard to geographic reclassification authorized under section 1886(d)(8) and (d)(10) of the Act. In the CY 2012 ESRD PPS final rule (76 FR 70239), we finalized that, under the ESRD PPS, we will continue to utilize the ESRD PPS wage index methodology, first established under the basic case-mix adjusted composite rate payment system, for updating the wage index values using the OMB's CBSA-

based geographic area designations to define urban and rural areas.

b. Proposed Implementation of New Labor Market Delineations

OMB publishes bulletins regarding CBSA changes, including changes to CBSA numbers and titles. In accordance with our established methodology, we have historically adopted via rulemaking CBSA changes that are published in the latest OMB bulletin. On February 28, 2013, OMB issued OMB Bulletin No. 13-01, which established revised delineations for Metropolitan Statistical Areas, Micropolitan Statistical Areas, and Combined Statistical Areas, and provided guidance on the use of the delineations of these statistical areas. A copy of this bulletin may be obtained at <http://www.whitehouse.gov/sites/default/files/omb/bulletins/2013/b-13-01.pdf>. According to OMB, "[t]his bulletin provides the delineations of all Metropolitan Statistical Areas, Metropolitan Divisions, Micropolitan Statistical Areas, Combined Statistical Areas, and New England City and Town Areas in the United States and Puerto Rico based on the standards published on June 28, 2010, in the **Federal Register** (75 FR 37246-37252) and Census Bureau data." In this CY 2015 ESRD PPS proposed rule, when referencing the new OMB geographic boundaries of statistical areas, we are using the term "delineations" rather than the term "definitions" that we have used in the past, consistent with OMB's use of the terms (75 FR 37249). Because the bulletin was not issued until February 28, 2013, with supporting data not available until later, and because the changes made by the bulletin and their ramifications needed to be extensively reviewed and verified, we were unable to undertake such a lengthy process before publication of the FY 2014 IPPS/LTCH PPS proposed rule and, thus, did not implement changes to the hospital wage index for FY 2014 based on these new CBSA delineations.

Likewise, for the same reasons, the CY 2014 ESRD PPS wage index (based upon the pre-floor, pre-reclassified hospital wage data, which is unadjusted for occupational mix) also did not reflect the new CBSA delineations. In the FY 2015 IPPS/LTCH PPS proposed rule, we proposed to implement the new CBSA delineations as described in the February 28, 2013 OMB Bulletin No. 13-01, beginning with the FY 2015 IPPS

wage index (79 FR 28054 through 28055).

Similarly, in this CY 2015 ESRD PPS proposed rule, we are proposing to implement the new CBSA delineations as described in the February 28, 2013 OMB Bulletin No. 13-01, beginning with the CY 2015 ESRD PPS wage index. We believe that the most current CBSA delineations accurately reflect the local economies and wage levels of the areas where facilities are located, and we believe that it is important for the ESRD PPS to use the latest CBSA delineations available in order to maintain an up-to-date payment system that accurately reflects the reality of populations shifts and labor market conditions. We have reviewed our findings and impacts relating to the new CBSA delineations using the most recent data available at the time of this proposed rule, and have concluded that there is no compelling reason to further delay the implementation of the CBSA delineations as set forth in OMB Bulletin 13-01.

In order to implement these changes for the ESRD PPS, it is necessary to identify the new labor market area delineation for each county and facility in the country. For example, if we adopt the new CBSA delineations, there would be new CBSAs, urban counties that would become rural, rural counties that would become urban, and existing CBSAs that would be split apart. Because the wage index of urban areas is typically higher than that of rural areas, ESRD facilities currently located in rural counties that would become urban if we adopt the new CBSA delineations would generally experience an increase in their wage index values. We have identified 105 counties and 113 facilities that would move from rural to urban status if we adopt the new CBSA delineations beginning in CY 2015. Table 10: (CY 2015 Proposed Rural to Urban CBSA Crosswalk) shows the CBSA delineations for CY 2014 and the rural wage index values proposed for CY 2015 based on those delineations, compared to the proposed CBSA delineations for CY 2015 and the proposed urban wage index values for CY 2015 based on the new delineations, and the percentage change in these values for those counties that would change from rural to urban if we adopt the new CBSA delineations. If we adopt the new OMB delineations illustrated in Table 10 below, approximately 100 facilities would experience an increase in their wage index values.

The wage index values of rural areas are typically lower than that of urban areas. Therefore, ESRD facilities located in a county that is currently designated as urban under the ESRD PPS wage index that would become rural if we adopt the new CBSA delineations may experience a decrease in their wage index values. We have identified 39 counties and 29 ESRD facilities that

would move from urban to rural status if we adopt the new CBSA delineations beginning in CY 2015. Table 11: (CY 2015 Proposed Urban to Rural CBSA Crosswalk) shows the CBSA delineations for CY 2014 and the proposed urban wage index values for CY 2015 based on those delineations, compared with the proposed CBSA delineations and wage index values for

CY 2015 based on those delineations, and the percentage change in these values for those counties that would change from urban to rural if we adopt the new CBSA delineations. If we adopted the new CBSA delineations illustrated in Table 11 below, approximately 30 facilities would experience a decrease in their wage index values.

We note that facilities in some urban CBSAs could experience a change in their wage index values even though they remain urban because an urban CBSA's boundaries and/or the counties included in that CBSA could change. Table 12 (CY 2015 Proposed Urban to a

Different Urban CBSA Crosswalk) shows the CBSA delineations for CY 2014 and urban wage index values for CY 2015 based on those delineations, compared with the proposed CBSA delineations and urban wage index values for CY 2015 based on those delineations, and

the percentage change in these values for counties that would remain urban even though the CBSA boundaries and/or counties included in that CBSA would change.

Likewise, ESRD facilities currently located in a rural area may remain rural under the new CBSA delineations but experience a change in their rural wage index value due to implementation of

the new CBSA delineations. Table 13 (CY 2015 Proposed Changes to the Statewide Rural Wage Index Crosswalk) shows the CBSA numbers for CY 2014 and the proposed rural statewide wage

index values for CY 2015, compared with the proposed statewide rural wage index values for CY 2015, and the percentage change in these values.

While we believe that the new CBSA delineations would result in wage index values that are more representative of the actual costs of labor in a given area, we also recognize that use of the new CBSA delineations would result in reduced payments to some facilities. In particular, approximately 30 facilities would experience reduced payments if we adopt the new CBSA delineations. At the same time, use of the new CBSA delineations would result in increased payments for approximately 100 facilities, while the majority of facilities would experience no change in payments due to the implementation of the new CBSA delineations. We are proposing to implement the new CBSA delineations using a 2-year transition with a 50/50 blended wage index value for all facilities in CY 2015 and 100% of the wage index based on the new CBSA delineations in CY 2016.

c. Transition Period

We considered having no transition period and fully implementing the proposed new CBSA delineations beginning in CY 2015, which would mean that all facilities would have payments based on the new delineations starting on January 1, 2015. However, because more facilities would have increased rather than decreased payments beginning in CY 2015, and because the overall amount of ESRD payments would increase slightly due to the new CBSA delineations, the wage index budget neutrality factor would be higher. This higher factor would reduce the ESRD PPS per treatment base rate for all facilities paid under the ESRD PPS, despite the fact that the majority of ESRD facilities are unaffected by the new CBSA delineations. Thus, we believe that it would be appropriate to provide for a transition period to mitigate any resulting short-term instability of a lower ESRD PPS base rate as well as any negative impacts to facilities that experience reduced

payments. In addition, we note that for CY 2015, section 1881(b)(14)(F)(i)(III), as added by section 217 of PAMA, requires a 0.0 payment update (for further discussion on this update please see section II.B.1.a.ii of this rule), and thus, there is no possibility of offsetting any reduction, even a slight reduction, to the ESRD PPS base rate in CY 2015.

Therefore, we are proposing a two-year transition blended wage index for all facilities. Facilities would receive 50 percent of their CY 2015 wage index value based on the CBSA delineations for CY 2014 and 50 percent of their CY 2015 wage index value based on the proposed new CBSA delineations. This results in an average of the two values. We propose that facilities' CY 2016 wage index values would be based 100 percent on the new CBSA delineations. We believe a two-year transition strikes an appropriate balance between ensuring that ESRD PPS payments are as accurate and stable as possible while giving facilities time to adjust to the new CBSA delineations.

In the CY 2011 ESRD PPS final rule (75 FR 49117), we finalized a policy to use the labor-related share of 41.737 percent for the ESRD PPS. For the CY 2015 ESRD PPS, we propose to use a labor-related share of 50.673 percent, which we propose to transition over a 2-year period with the labor-related share in CY 2015 based 50 percent on the old labor-related share and 50 percent on the new labor-related share, and the labor-related share in CY 2016 based 100 percent on the new labor-related share. For a complete discussion of the proposed changes in the CY 2015 ESRD PPS market basket and labor-related share, as well as the transition of the labor-related share; please see sections II.B.2.e and XII.B.1.a of this proposed rule.

4. Proposed Revisions to the Outlier Policy

Section 1881(b)(14)(D)(ii) of the Act requires that the ESRD PPS include a payment adjustment for high cost outliers due to unusual variations in the type or amount of medically necessary care, including variability in the amount of erythropoiesis stimulating agents (ESAs) necessary for anemia management. Our regulations at 42 CFR 413.237(a)(1) provide that ESRD outlier services are the following items and services that are included in the ESRD PPS bundle: (i) ESRD-related drugs and biologicals that were or would have been, prior to January 1, 2011, separately billable under Medicare Part B; (ii) ESRD-related laboratory tests that were or would have been, prior to January 1, 2011, separately billable under Medicare Part B; (iii) medical/surgical supplies, including syringes, used to administer ESRD-related drugs, that were or would have been, prior to January 1, 2011, separately billable under Medicare Part B; and (iv) renal dialysis service drugs that were or would have been, prior to January 1, 2011, covered under Medicare Part D, excluding ESRD-related oral-only drugs.

In the CY 2011 ESRD PPS final rule (75 FR 49142), we stated that for purposes of determining whether an ESRD facility would be eligible for an outlier payment, it would be necessary for the facility to identify the actual ESRD outlier services furnished to the patient by line item on the monthly claim. The ESRD-related drugs, laboratory tests, and medical/surgical supplies that we would recognize as outlier services were specified in Attachment 3 of Change Request 7064, Transmittal 2033 issued August 20, 2010, rescinded and replaced by Transmittal 2094, dated November 17, 2010. With respect to the outlier policy, Transmittal 2094 identified additional drugs and laboratory tests that may be eligible for ESRD outlier payment.

Transmittal 2094 was rescinded and replaced by Transmittal 2134, dated January 14, 2011, which was issued to correct the subject on the Transmittal page and made no other changes.

In the CY 2012 ESRD PPS final rule (76 FR 70246), we eliminated the issuance of a specific list of eligible outlier service drugs which were or would have been separately billable under Medicare Part B prior to January 1, 2011. However, we use separate guidance to continue to identify renal dialysis service drugs which were or would have been covered under Part D for outlier eligibility purposes in order to provide unit prices for calculating imputed outlier services. We also can identify, through our monitoring efforts, items and services that are incorrectly being identified as eligible outlier services in the claims data. Information about these items and services and any updates to the list of renal dialysis items and services that qualify as outlier services are made through administrative issuances, if necessary.

Our regulations at 42 CFR 413.237 specify the methodology used to calculate outlier payments. An ESRD facility is eligible for an outlier payment if its actual or imputed Medicare Allowable Payment (MAP) amount per treatment for ESRD outlier services exceeds a threshold. The MAP amount represents the average incurred amount per treatment for services that were or would have been considered separately billable services prior to January 1,

2011. The threshold is equal to the ESRD facility's predicted ESRD outlier services MAP amount per treatment (which is case-mix adjusted) plus the fixed dollar loss amount. In accordance with § 413.237(c) of the regulations, facilities are paid 80 percent of the per treatment amount by which the imputed MAP amount for outlier services (that is, the actual incurred amount) exceeds this threshold. ESRD facilities are eligible to receive outlier payments for treating both adult and pediatric dialysis patients.

In the CY 2011 ESRD PPS final rule, using 2007 data, we established the outlier percentage at 1.0 percent of total payments (75 FR 49142 through 49143). We also established the fixed dollar loss amounts that are added to the predicted outlier services MAP amounts. The outlier services MAP amounts and fixed dollar loss amounts are different for adult and pediatric patients due to differences in the utilization of separately billable services among adult and pediatric patients (75 FR 49140).

As we explained in the CY 2011 ESRD PPS final rule (75 FR 49138 and 49139), the predicted outlier services MAP amounts for a patient are determined by multiplying the adjusted average outlier services MAP amount by the product of the patient-specific case-mix adjusters applicable using the outlier services payment multipliers developed from the regression analysis to compute the payment adjustments. For CY 2014, the outlier services MAP amounts and fixed

dollar loss amounts were based on 2012 data (78FR 72180). Therefore, the outlier thresholds for CY 2014 were based on utilization of ESRD-related items and services furnished under the ESRD PPS. Because of the utilization of epoetin and other outlier services has continued to decline under the ESRD PPS, we lowered the MAP amounts and fixed dollar loss amounts for CYs 2013 and 2014 to allow for an increase in payments for ESRD beneficiaries requiring higher resources.

a. Proposed Changes to the Outlier Services MAP Amounts and Fixed Dollar Loss Amounts

For CY 2015, we are not proposing any changes to the methodology used to compute the MAP or fixed dollar loss amounts. Rather, in this proposed rule, we are updating the outlier services MAP amounts and fixed dollar loss amounts to reflect the utilization of outlier services reported on the 2013 claims using the December 2013 claims file. The impact of this update is shown in Table 14, which compares the outlier services MAP amounts and fixed dollar loss amounts used for the outlier policy in CY 2014 with the updated estimates for this proposed rule. The estimates for the proposed outlier CY 2015 outlier policy, which are included in Column II of Table 14, were inflation-adjusted to reflect projected 2015 prices for outlier services.

TABLE 14—OUTLIERPOLICY: IMPACT OF USING UPDATED DATA TO DEFINE THE OUTLIER POLICY

	Column I Final outlier policy for CY 2014 (based on 2012 data price inflated to 2014)*		Column II Proposed outlier policy for CY 2015 (based on 2013 data price inflated to 2015)*	
	Age <18	Age >=18	Age <18	Age >=18
Average outlier services MAP amount per treatment ¹	\$37.29	\$51.97	\$40.05	\$52.61
Adjustments.				
Standardization for outlier services ²	1.1079	0.9866	1.1182	0.9899
MIPPA reduction	0.98	0.98	0.98	0.98
Adjusted average outlier services MAP amount ³	\$40.49	\$50.25	\$43.89	\$51.04
Fixed dollar loss amount that is added to the predicted MAP to determine the outlier threshold ⁴	\$54.01	\$98.67	\$56.30	\$85.24
Patient months qualifying for outlier payment	6.7%	5.3%	6.2%	6.3%

* The outlier services MAP amounts and fixed dollar loss amounts were inflation adjusted to reflect updated prices for outlier services (that is, 2014 prices in Column I and projected 2015 prices in Column II).

¹ Excludes patients for whom not all data were available to calculate projected payments. The outlier services MAP amounts are based on 2013 data. The medically unbelievable edits of 400,000 units for EPO and 1,200 mcg for Aranesp that are in place under the ESA claims monitoring policy were applied.

² Applied to the average outlier MAP per treatment. Standardization for outlier services is based on existing case mix adjusters for adult and pediatric patient groups.

³ This is the amount to which the separately billable (SB) payment multipliers are applied to calculate the predicted outlier services MAP for each patient.

⁴ The fixed dollar loss amounts were calculated using 2013 data to yield total outlier payments that represent 1% of total projected payments for the ESRD PPS.

As seen in Table 14, the estimated fixed dollar loss amount that determines

the CY 2015 outlier threshold amount for adults (Column II) is lower than that

used for the CY 2014 outlier policy (Column I). The threshold is lower in

spite of the fact that the average outlier services MAP per treatment has increased. Between 2012 and 2013, the variation in outlier services across patients declined among adults. The net result is an increase in the percentage of patient-months qualifying for outlier payment (6.3 percent based on 2013 data versus 5.3 percent based on 2012 data) but a decrease in the average outlier payment per case. The estimated fixed dollar loss amount that determines the CY 2015 outlier threshold amount for pediatric patients (Column II) is higher than that used for the CY 2014 outlier policy (Column I).

For pediatric patients, there was an increase in the overall average outlier service MAP amount between 2012 (\$37.29 per treatment as shown in Column I) and 2013 (\$40.05 per treatment, as shown in Column II). In addition, there was a continuing tendency in 2013 for a relatively small percentage of pediatric patients to account for a disproportionate share of the total outlier service MAP amounts. The one percent target for outlier payments is therefore expected to be achieved based on a smaller percentage of pediatric outlier cases using 2013 data compared to 2012 data (6.2 percent of pediatric patient months are expected to qualify for outlier payments rather than 6.7 percent). These patterns led to the estimated fixed dollar loss amount for pediatric patients being higher for the outlier policy for CY 2015 compared to the outlier policy for CY 2014. Generally, there is a relatively higher likelihood for pediatric patients that the outlier threshold may be adjusted to reflect changes in the distribution of outlier service MAP amounts. This is due to the much smaller overall number of pediatric patients compared to adult patients, and therefore to the fact that the outlier threshold for pediatric patients is calculated based on data for a much smaller number of pediatric patients compared to adult patients.

We propose to update the fixed dollar loss amounts that are added to the predicted MAP amounts per treatment to determine the outlier thresholds for CY 2015 from \$98.67 to \$85.24 for adult patients and from \$54.01 to \$56.30 for pediatric patients compared with CY 2014 amounts. We estimate that the percentage of patient months qualifying for outlier payments under the current policy will be 6.3 percent and 6.2 percent for adult and pediatric patients, respectively, based on the 2013 data. The pediatric outlier MAP and fixed dollar loss amounts continue to be lower for pediatric patients than adults due to the continued lower use of outlier services (primarily reflecting

lower use of epoetin and other injectable drugs).

b. Outlier Policy Percentage

42 CFR 413.220(b)(4) stipulates that the per treatment base rate is reduced by 1 percent to account for the proportion of the estimated total payments under the ESRD PPS that are outlier payments. Based on the 2013 claims, outlier payments represented approximately 0.5 percent of total payments, again falling short of the 1 percent target due to further declines in the use of outlier services. Use of 2013 data to recalibrate the thresholds, which reflect lower utilization of EPO and other outlier services and reduced variation in outlier services among adults, is expected to result in aggregate outlier payments close to the 1 percent target in CY 2015. We believe the proposed update to the outlier MAP and fixed dollar loss amounts for CY 2015 will increase payments for ESRD beneficiaries requiring higher resource utilization and come closer to meeting our 1 percent outlier policy.

We note that recalibration of the fixed dollar loss amounts in this proposed rule for CY 2015 outlier payments results in no change in payments to ESRD facilities for beneficiaries with renal dialysis items and services that are not eligible for outlier payments, but increases payments to providers for beneficiaries with renal dialysis items and services that are eligible for outlier payments. Therefore, beneficiary co-insurance obligations would also increase for renal dialysis services eligible for outlier payments.

C. Restatement of Policy Regarding Reporting and Payment for More Than Three Dialysis Treatments per Week

1. Reporting More Than Three Dialysis Treatments per Week on Claims

Since the composite payment system was implemented in the 1980s, CMS has reimbursed ESRD facilities based upon three hemodialysis treatments per week and allowed for the payment of additional weekly dialysis treatments with medical justification. When a dialysis modality regimen requires more than three weekly dialysis treatments, such as with short, frequent hemodialysis (HD) and peritoneal dialysis (PD) modalities, we apply payment edits to ensure that Medicare payment on the monthly claim is consistent with the three times-weekly dialysis treatment payment limit, which translates to payment for 13 treatments for a 30-day month and 14 treatments for a 31-day month.

Under section 1881(b)(14)(C) of the Act, the ESRD PPS may provide for payment on the basis of renal dialysis services furnished during a week, or month, or such other appropriate unit of payment as the Secretary specifies. In the CY 2011 ESRD PPS final rule (75 FR 49064), CMS finalized the per treatment basis of payment in which ESRD facilities are paid for up to three treatments per week, unless there is medical justification for more than three treatments per week. We codified the per-treatment unit of payment under the ESRD PPS at 42 CFR 413.215(a). Also in the CY 2011 ESRD PPS final rule (75 FR 49078), we explained how we converted patient weeks to HD-equivalent sessions for PD patients. Specifically, we noted that one week of PD was considered equivalent to three HD treatments. For example, a patient on PD for 21 days would have $(21/7) \times 3$ or 9 HD-equivalent sessions. Our policy is that ESRD facilities treating patients on PD or home HD will be paid for up to three HD-equivalent sessions for each week of dialysis, unless there is medical justification for furnishing additional treatments.

Increasingly, some ESRD facilities have begun to offer dialysis modalities where the standard treatment regimen is more than three treatments per week. Also, we have observed a payment variance among Medicare Administrative Contractors (MACs) in processing claims for dialysis treatments for modalities that require more frequent dialysis, resulting in payment of more than 14 treatments per month without medical justification. Lastly, CMS has received several requests for clarification regarding Medicare payment and billing policies for dialysis treatments for modalities requiring more than three treatments per week that are furnished in-facility or in the patient's home. Specifically, ESRD facilities, renal physician groups, and MACs have requested billing guidance regarding whether all of the dialysis treatments furnished to the patient during the billing month should be reported on the claim form, even though the Medicare benefit only provides for payment of three dialysis treatments per week.

For these reasons, we are reiterating our policy with respect to payment for more than three dialysis treatments per week. We note that we are not changing our policy for reporting extra non-medically necessary dialysis sessions. ESRD facility claims should continue to include all dialysis treatments furnished during the month on claims, but payment is limited to three dialysis treatments per week through the payment edits of 13 treatments for a 30-

day month or 14 treatments for a 31-day month. For example, an ESRD facility that furnishes dialysis services to patients who dialyze using modalities requiring shorter, more frequent dialysis (for example, a dialysis regimen of 4, 5, 6 or 7 days a week in-facility or at home), should report all of the patient's dialysis treatments on the monthly claim. However, payment for these services will reflect existing claims processing system edits, and the monthly Medicare payment would mirror the Medicare ESRD benefit of three dialysis treatments per week.

2. Medical Necessity for More Than Three Treatments per Week

Under the ESRD benefit, we have always recognized that some patient conditions benefit from more than three dialysis sessions per week and as such, the Medicare policy for medically necessary additional dialysis treatments was developed. Under this policy, the MACs determine whether additional treatments furnished during a month are medically necessary. While Medicare does not define specific patient conditions that meet the requirements of medical necessity, we do furnish instructions to MACs to consider appropriate patient conditions that would result in a patient's medical need for additional dialysis treatments (for example, excess fluid of five or more pounds). When such patient conditions are indicated with the claim requesting payment, we instruct MACs to consider medical justification and the appropriateness of payment for the additional sessions.

In section 50.A of the Medicare Benefit Policy Manual (Pub. 100-02), we explained our policy regarding payment for hemodialysis-equivalent PD and payment for more than three dialysis treatments per week under the ESRD PPS. We restated that ESRD facilities are paid for a maximum of 13 treatments during a 30 day month and 14 treatments during a 31-day month unless there is medical justification for additional treatments. The only time facilities should seek payment for additional dialysis sessions, including payment for shorter, more frequent modalities, is when the patient has a medical need for additional dialysis and the facility has furnished supporting medical justification for the extra treatments. Modality choice does not constitute medical justification.

D. Delay of Payment for Oral-Only Drugs Under the ESRD PPS

As we discussed in the CY 2014 ESRD PPS final rule (78 FR 72185 through 72186), section 1881(b)(14)(A)(i) of the

Act, as added by section 153(b) of the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA), requires the Secretary to implement a payment system under which a single payment is made to a provider of services or a renal dialysis facility for "renal dialysis services" in lieu of any other payment. Section 1881(b)(14)(B) of the Act defines renal dialysis services, and subclause (iii) of that section states that these services include "other drugs and biologicals that are furnished to individuals for the treatment of ESRD and for which payment was (before the application of this paragraph) made separately under this title, and any oral equivalent form of such drug or biological[.]"

We interpreted this provision as including not only injectable drugs and biologicals used for the treatment of ESRD (other than ESAs, which are included under clause (ii) of section 1881(b)(14)(B)), but also all non-injectable oral drugs used for the treatment of ESRD furnished under title XVIII of the Act. We also concluded that, to the extent ESRD-related oral-only drugs do not fall within clause (iii) of the statutory definition of renal dialysis services, such drugs would fall under clause (iv), and constitute other items and services used for the treatment of ESRD that are not described in clause (i) of section 1881(b)(14)(B). As such, CMS finalized and promulgated the payment policies for oral-only drugs used for the treatment of ESRD in the CY 2011 ESRD PPS final rule (75 FR 49038 through 49053), and we defined "renal dialysis services" at 42 CFR 413.171(3) as including, among other things "other drugs and biologicals that are furnished to individuals for the treatment of ESRD and for which payment was (prior to January 1, 2011) made separately under Title XVIII of the Act (including drugs and biologicals with only an oral form)."

Although ESRD-related oral-only drugs are included in the definition of renal dialysis services, in the CY 2011 ESRD PPS final rule (75 FR 49044), we also finalized a policy to delay payment for these drugs under the PPS until January 1, 2014. We stated that there were certain advantages to delaying the implementation of payment for oral-only drugs, including allowing ESRD facilities additional time to make operational changes and logistical arrangements in order to furnish oral-only ESRD-related drugs and biologicals to their patients. Accordingly, 42 CFR 413.174(f)(6) provides that payment to an ESRD facility for renal dialysis service drugs and biologicals with only

an oral form is incorporated into the PPS payment rates effective January 1, 2014.

On January 3, 2013, the Congress enacted ATRA. Section 632(b) of ATRA states that the Secretary "may not implement the policy under section 413.176(f)(6) of title 42, Code of Federal Regulations (relating to oral-only ESRD-related drugs in the ESRD prospective payment system), prior to January 1, 2016." Accordingly, in the CY 2014 ESRD PPS final rule (78 FR 72185 through 72186), we delayed payment for ESRD-related oral-only drugs under the ESRD PPS until January 1, 2016, instead of on January 1, 2014, which is the original date we finalized for payment of ESRD-related oral-only drugs under the ESRD PPS. We implemented this delay by revising the effective date for providing payment for oral-only ESRD-related drugs under the ESRD PPS at 42 CFR 413.174(f)(6) from January 1, 2014 to January 1, 2016. In addition, we also changed the date when oral-only drugs would be eligible outlier services under the outlier policy described in 42 CFR 413.237(a)(1)(iv) from January 1, 2014 to January 1, 2016.

On April 1, 2014, PAMA was enacted. Section 217(a)(1) of PAMA amended section 632(b)(1) of ATRA, which now provides that the Secretary "may not implement the policy under section 413.174(f)(6) of title 42, Code of Federal Regulations (relating to oral-only ESRD drugs in the ESRD prospective payment system), prior to January 1, 2024." Accordingly, payment for ESRD-related oral-only drugs will not be made under the ESRD PPS prior to January 1, 2024 instead of on January 1, 2016, which is the date we finalized for payment of ESRD-related oral-only drugs under the ESRD PPS in the CY 2014 ESRD PPS final rule (78 FR 72186).

We propose to implement this delay by modifying the effective date for providing payment for oral-only ESRD-related drugs and biologicals under the ESRD PPS at 42 CFR 413.174(f)(6) from January 1, 2016 to January 1, 2024. We also propose to change the date in 42 CFR 413.237(a)(1)(iv) regarding outlier payments for oral-only ESRD-related drugs made under the ESRD PPS from January 1, 2016 to January 1, 2024. We continue to believe that oral-only drugs used for the treatment of ESRD are an essential part of the ESRD PPS payment bundle and should be paid for under the ESRD PPS as soon as possible, or beginning January 1, 2024.

In addition to the delay of payment for oral-only ESRD-related drugs, section 217(a)(2) of PAMA further amends section 632(b)(1) of ATRA by adding a new sentence that provides,

“[n]otwithstanding section 1881(b)(14)(A)(ii) of the Social Security Act (42 U.S.C. 1395rr(b)(14)(A)(ii)), implementation of the policy described in the previous sentence shall be based on data from the most recent year available.” We interpret this provision to mean that we are not to use per patient utilization data from 2007, 2008, or 2009 (whichever has the lowest per patient utilization) as we were required for the original ESRD PPS in implementing payment for oral-only ESRD drugs under the ESRD PPS. We will make proposals consistent with section 632(b)(1) of ATRA, as amended by section 217(a)(2) of PAMA, in future rulemaking.

Section 217(c) of PAMA requires the Secretary, as part of the CY 2016 ESRD PPS rulemaking, to establish a process

for “(1) determining when a product is no longer an oral-only drug; and (2) including new injectable and intravenous products into the bundled payment under such system.” Consistent with this statutory requirement, we plan to propose a drug designation process in our CY 2016 rulemaking cycle and we are seeking industry and stakeholder comments on the components and elements of such a process for our consideration next year.

E. ESRD Drug Categories Included in the ESRD PPS Base Rate

In the CY 2011 ESRD PPS final rule (75 FR 49050), we finalized Table 4, (Renal Dialysis Service ESRD Drug Categories Included in the Final ESRD PPS Base Rate), and have included Table 15 below for the purpose of this

discussion. In that rule, we noted that the categories of drugs and biologicals used for access management, anemia management, anti-infectives, bone and mineral metabolism and cellular management would always be considered ESRD-related drugs when furnished to an ESRD patient, and that payment for such drugs would be included in the ESRD PPS payment bundle. As such, beginning January 1, 2011, Medicare no longer makes a separate payment when a drug or biological (except for oral-only ESRD-related drugs for which we are proposing to delay payment under the ESRD PPS until January 1, 2024) identified in the categories listed in the following table is furnished to a Medicare ESRD beneficiary.

TABLE 15—RENAL DIALYSIS SERVICE ESRD DRUG CATEGORIES INCLUDED IN THE FINAL ESRD PPS BASE RATE

Drug category	Rationale for inclusion
Access Management	Drugs used to ensure access by removing clots from grafts, reverse anticoagulation if too much medication is given, and provide anesthetic for access placement.
Anemia Management	Drugs used to stimulate red blood cell production and/or treat or prevent anemia. This category includes ESAs as well as iron.
Anti-infectives	Vancomycin and daptomycin used to treat access site infections.
Bone and Mineral Metabolism	Drugs used to prevent/treat bone disease secondary to dialysis. This category includes phosphate binders and calcimimetics.
Cellular Management	Drugs used for deficiencies of naturally occurring substances needed for cellular management. This category includes levocarnitine.

In the CY 2011 ESRD PPS final rule (75 FR 49050), we noted that we included the anti-infective drugs of vancomycin and daptomycin because these drugs were routinely furnished for the ESRD-related conditions of access site infections and peritonitis. However, in the CY 2012 ESRD PPS final rule (76 FR 70242 through 70243), we responded to public comments that noted that vancomycin is a common anti-infective drug appropriate for treating infections that are both ESRD- and non-ESRD-related by modifying our policy to eliminate the payment restriction for vancomycin when it is furnished for non-ESRD related conditions. In addition, we finalized the use of CMS payment modifier AY (Item or service furnished to an End Stage Renal Disease (ESRD) patient that is not for the treatment of ESRD) and instructed facilities to append the modifier to the claim reporting vancomycin to indicate that the drug was furnished for reasons other than ESRD. The presence of the AY modifier on the claim allows the MAC to make a separate payment for the

drug when it is furnished by the facility to a Medicare beneficiary for reasons other than ESRD.

In the CY 2013 ESRD PPS final rule (77 FR 67461), we further amended this policy to allow ESRD facilities to bill separately for daptomycin when it is furnished to ESRD beneficiaries for reasons other than ESRD. Once again, we instructed facilities to append claims reporting daptomycin furnished for reasons other than ESRD with the AY modifier so that MACs would be able to make a separate payment.

Because we have removed the payment limitation for both vancomycin and daptomycin, and because we believe that anti-infectives are a drug category that may be furnished for both ESRD- and non-ESRD-related reasons, we have updated the list of drug categories that are always considered ESRD-related under the ESRD PPS by removing the drug category for anti-infectives. We have included Table 16 (Renal Dialysis Service ESRD Drug Categories Included in the ESRD PPS Base Rate and Not Separately Payable)

below to appropriately recognize the drug categories that are always considered ESRD-related and we confirm that the revised table reflects policy changes made in the CY 2012 and CY 2013 ESRD PPS rulemaking cycles and does not constitute new policy.

Over the past few years, we have received payment and billing inquiries requesting clarification for the payment for drugs represented by one of the drug categories included in the ESRD PPS, but not furnished for the treatment of ESRD. Therefore, we clarify that any drug included in the drug categories of access management, anemia management, bone and mineral metabolism and cellular management is not separately paid by Medicare regardless of why the drug is being furnished. In addition, the facility may not furnish a prescription for such drugs with the expectation that a Medicare Part D payment would be made, as the payment for the drug is included in the ESRD PPS payment bundle.

TABLE 16—RENAL DIALYSIS SERVICE ESRD DRUG CATEGORIES INCLUDED IN THE ESRD PPS BASE RATE AND NOT SEPARATELY PAYABLE

Drug category	Rationale for inclusion
Access Management	Drugs used to ensure access by removing clots from grafts, reverse anticoagulation if too much medication is given, and provide anesthetic for access placement.
Anemia Management	Drugs used to stimulate red blood cell production and/or treat or prevent anemia. This category includes ESAs as well as iron.
Bone and Mineral Metabolism	Drugs used to prevent/treat bone disease secondary to dialysis. This category includes phosphate binders and calcimimetics.
Cellular Management	Drugs used for deficiencies of naturally occurring substances needed for cellular management. This category includes levocarnitine.

The drug categories that may be separately paid by Medicare when furnished for non-ESRD patient conditions are included in Table 5 (ESRD Drug Categories Included in the ESRD PPS Base Rate But May be Used for Dialysis and non-Dialysis Purposes) (75 FR 49051). This table is included

below for the purpose of this discussion. When any drug identified in the drug categories listed in Table 17 (antiemetic, anti-infectives, antipruritic, anxiolytic, excess fluid management, fluid and electrolyte management or pain management), is furnished for the treatment of ESRD, payment for the drug

is included in the ESRD PPS payment and may not be paid separately. If a drug represented by a drug category in Table 17 is furnished for reasons other than ESRD, a separate Medicare payment is permitted when the AY modifier is indicated on the claim line reporting the drug for payment.

TABLE 17—ESRD DRUG CATEGORIES INCLUDED IN THE ESRD BASE RATE BUT MAY BE USED FOR DIALYSIS AND NON-DIALYSIS PURPOSES

Antiemetic	Used to prevent or treat nausea and vomiting secondary to dialysis. Excludes antiemetics used in conjunction with chemotherapy as these are covered under a separate benefit category.
Anti-infectives	Used to treat infections. May include antibacterial and antifungal drugs.
Antipruritic	Drugs in this classification have multiple clinical indications and are included for their action to treat itching secondary to dialysis.
Anxiolytic	Drugs in this classification have multiple actions but are included for the treatment of restless leg syndrome secondary to dialysis.
Excess Fluid Management	Drug/fluids used to treat fluid excess/overload.
Fluid and Electrolyte Management Including Volume Expanders.	Intravenous drugs/fluids used to treat fluid and electrolyte needs.
Pain Management	Drugs used to treat graft site pain and to treat pain medication overdose.

F. Low-Volume Payment Adjustment

1. Background

Section 1881(b)(14)(D)(iii) of the Act requires a payment adjustment that “reflects the extent to which costs incurred by low-volume facilities (as defined by the Secretary) in furnishing renal dialysis services exceed the costs incurred by other facilities in furnishing such services, and for payment for renal dialysis services furnished on or after January 1, 2011, and before January 1, 2014, such payment adjustment shall not be less than 10 percent.” As a result of this provision and the regression analysis conducted for the ESRD PPS, effective January 1, 2011, the ESRD PPS provides a facility-level payment adjustment of 18.9 percent to ESRD facilities that meet the definition of a low-volume facility.

Under 42 CFR 413.232(b), a low-volume facility is an ESRD facility that: (1) Furnished less than 4,000 treatments in each of the 3 cost reporting years (based on as-filed or final settled 12-consecutive month cost reports, whichever is most recent) preceding the payment year; and (2) Has not opened,

closed, or received a new provider number due to a change in ownership in the 3 cost reporting years (based on as-filed or final settled 12-consecutive month cost reports, whichever is most recent) preceding the payment year. Under § 413.232(c), for purposes of determining the number of treatments furnished by the ESRD facility, the number of treatments equals the aggregate number of treatments furnished by other ESRD facilities that are both under common ownership and 25 road miles or less from the ESRD facility in question. This geographic proximity criterion is only applicable to ESRD facilities that were Medicare certified on or after January 1, 2011.

For purposes of determining eligibility for the low-volume payment adjustment (LVPA), “treatments” means total hemodialysis (HD) equivalent treatments (Medicare and non-Medicare). For peritoneal dialysis (PD) patients, one week of PD is considered equivalent to 3 HD treatments. In the CY 2012 ESRD PPS final rule (76 FR 70236), we clarified that we base eligibility on the three years preceding the payment

year and those years are based on cost reporting periods. We further clarified that the ESRD facility’s cost reports for the cost reporting periods ending in the three years preceding the payment year must report costs for 12-consecutive months.

In order to receive the LVPA under the ESRD PPS, an ESRD facility must submit a written attestation statement to its Medicare Administrative Contractor (MAC) that it qualifies as a low-volume ESRD facility and that it meets all of the requirements specified at 42 CFR 413.232. In the CY 2012 ESRD PPS final rule (76 FR 70236), we finalized a yearly November 1 deadline for attestation submission and we revised the regulation at § 413.232(f) to reflect this date. We noted that this timeframe provides 60 days for a MAC to verify that an ESRD facility meets the LVPA eligibility criteria. Further information regarding the administration of the LVPA is provided in CMS Pub. 100–02, Medicare Benefit Policy Manual, chapter 11, section 60.B.1.

2. The United States Government Accountability Office Study on the LVPA

The Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) required the United States Government Accountability Office (the GAO) to study the LVPA. The GAO examined (1) the extent to which the LVPA targeted low-volume, high-cost facilities that appeared necessary for ensuring access to care; and (2) CMS's implementation of the LVPA, including the extent to which CMS paid the 2011 LVPA to facilities eligible to receive the adjustment. To do this work, the GAO reviewed Medicare claims, facilities' annual cost reports, and data on dialysis facilities' locations to identify and compare facilities that were eligible for the LVPA with those that received the adjustment. The GAO published a report 13–287 on March 1, 2013, entitled, "End-Stage Renal Disease: CMS Should Improve Design and Strengthen Monitoring of Low-Volume Adjustment". The report found multiple discrepancies in the identification of low-volume facilities which are summarized below.

a. The GAO's Main Findings

The GAO found that many of the facilities eligible for the LVPA were located near other facilities, indicating that they might not have been necessary for ensuring access to care. They also identified certain facilities with relatively low volume that were not eligible for the LVPA but had above-average costs and appeared to be necessary for ensuring access to care. Lastly, they stated the design of the LVPA provides facilities with an adverse incentive to restrict their service provision to avoid reaching the 4,000 treatment threshold. The GAO calculated that Medicare overpaid an estimated \$5.3 million for the LVPA to dialysis facilities that did not meet the eligibility requirements established by CMS. They indicated in their report that the guidance that CMS issued for implementation of the regulatory requirements was sometimes unclear and not always available when needed, and the misunderstanding of LVPA eligibility likely was exacerbated because CMS conducted limited monitoring of the Medicare contractors' administration of LVPA payments.

b. The GAO's Recommendations

In the conclusion of their study, the GAO provided Congress with the following recommendations: (1) To more effectively target facilities necessary for ensuring access to care,

the Administrator of CMS should consider restricting the LVPA to low-volume facilities that are isolated; (2) To reduce the incentive for facilities to restrict their service provision to avoid reaching the LVPA treatment threshold, the Administrator of CMS should consider revisions such as changing the LVPA to a tiered adjustment; (3) To ensure that future LVPA payments are made only to eligible facilities and to rectify past overpayments, the Administrator of CMS should take the following four actions: Require Medicare contractors to promptly recoup 2011 LVPA payments that were made in error; investigate any errors that contributed to eligible facilities not consistently receiving the 2011 LVPA and ensure that such errors are corrected; take steps to ensure that CMS regulations and guidance regarding the LVPA are clear, timely, and effectively disseminated to both dialysis facilities and Medicare contractors; and improve the timeliness and efficacy of CMS's monitoring regarding the extent to which Medicare contractors are determining LVPA eligibility correctly and promptly redetermining eligibility when all necessary data become available.

In response to the GAO's recommendations, we concurred with the need to ensure that the LVPA is targeted effectively at low-volume high-cost facilities in areas where beneficiaries may lack other dialysis care options. We also agreed to take action to ensure appropriate payment is made in the following ways: (1) Evaluating our policy guidance and contractor instructions to ensure appropriate application of the LVPA; (2) using multiple methods of communication to MACs and ESRD facilities to deliver clear and timely guidance; and (3) improving our monitoring of MACs and considering measures that provide specific expectations.

3. Clarification of the LVPA Policy

For CY 2015, we are not proposing to make changes to the eligibility criteria for the adjustment or to the magnitude of the adjustment value. In accordance with section 632(c) of ATRA, for CY 2016 we will assess and address other necessary LVPA policy changes when we use updated data and reevaluate all of the patient- and facility-level adjustments together in a regression analysis similar to the analysis that is discussed in the CY 2011 ESRD PPS final rule (75 FR 49083). At this time, we are not proposing to change the criteria in such a way that the number of low-volume facilities would deviate

substantially from the number of facilities originally modeled to receive the adjustment in the first year of implementation. This is because of the interaction of the LVPA with other payment adjustments under the ESRD PPS. As discussed in the CY 2011 ESRD PPS final rule (75 FR 49081), we standardized the ESRD PPS base rate to account for the payment variables and it would not be appropriate to make changes to one variable in the regression when it could potentially affect the other adjustments or the standardization factor. However, there are two clarifications under the LVPA policy (discussed below) that we can address in this year's rulemaking that we believe are responsive to stakeholder's concerns and GAO's concern that the LVPA should effectively target low-volume, high cost-facilities.

a. Hospital-Based ESRD Facilities

As stated above, for purposes of determining eligibility for the LVPA, "treatments" means total hemodialysis (HD) equivalent treatments (Medicare and non-Medicare) and for peritoneal dialysis (PD) patients, one week of PD is considered equivalent to 3 HD treatments. Once a MAC receives an attestation from an ESRD facility, it reviews the ESRD facility's cost reports to verify that the facility meets the low-volume criteria specified at 42 CFR 413.232(b). Specifically, the ESRD facility cost report is used to verify the total treatment count that an ESRD facility furnishes in its fiscal year, which includes Medicare and non-Medicare treatments. For independent ESRD facilities, this information is provided on Worksheet C of the Form CMS–265–11 form (previously Form CMS–265–94) and for hospital-based ESRD facilities, this information is on Worksheet I–4 of the Form CMS–2552–10.

After the LVPA was implemented, we began hearing concerns from multiple stakeholders, including members of Congress and rural hospital-based ESRD facilities, about the MACs' LVPA eligibility determinations. The stakeholders indicated that because hospital-based ESRD facilities are financially integrated with a hospital, their costs and treatment data are aggregated in the I-series of the hospital's cost report. This means that if there is more than one ESRD facility that is affiliated with a hospital, the cost and treatment data for all facilities are aggregated on Worksheet I–4, typically causing the facilities' treatment counts to exceed the 4,000-treatment criterion.

We have learned that some MACs accepted treatment counts from

hospital-based ESRD facilities other than those provided on the hospital's cost report and, as a result, certain hospital-based ESRD facilities received the LVPA. Other MACs solely used the aggregated treatment counts from the hospital's cost report to verify LVPA eligibility, which resulted in denials for many hospital-based facilities that would have qualified for the adjustment if the MACs had considered other supporting documentation.

We agree with stakeholders that limiting the MAC review to the hospital cost reports for verification of LVPA eligibility for hospital-based ESRD facilities places these facilities at a disadvantage and does not comport with the intent of our policy. We believe it can be necessary for MACs to use other supporting data to verify the treatment counts for individual hospital-based facilities that would meet the eligibility criteria for the LVPA if their treatment counts had not been aggregated with one or more other facilities on their hospitals' cost reports. Because LVPA eligibility is based on cost report information and the individual hospital-based facility treatment counts is the source of the aggregated treatment counts reported in the cost report, however, we continue to believe that cost report data is an integral part of the process of verifying whether a hospital-based facility meets the LVPA eligibility criteria.

For these reasons, we are clarifying that MACs may consider other supporting data, such as a hospital-based facility's total treatment count, along with the facility's cost reports and attestation, to verify it meets the low-volume eligibility criteria provided at 42 CFR 413.232(b). The attestation should continue to be configured around the parent hospital's cost reports, that is, it should be for the same fiscal periods. The MAC can consider other supporting data in addition to the total treatments reported in each of the 12-consecutive month cost reports, such as the individual facility's total treatment counts, rather than the hospital's cost report alone, to verify the number of treatments that were furnished by the individual hospital-based facility that is seeking the adjustment. Consistent with this policy clarification, hospital-based ESRD facilities' eligibility for the LVPA should be determined at an individual facility level and their total treatment counts should not be aggregated with other ESRD facilities that are affiliated with the hospital unless the affiliated facilities are commonly owned and within 25 miles.

MACs have discretion as to the format of the attestation and any supporting

data, however, the facility must provide the total number of Medicare and non-Medicare treatments for the three cost reporting years preceding the payment year for all of the hospital-based facilities for which treatment counts appear on the hospital's cost report. This will allow MACs to determine which treatments on the cost report were furnished by the individual hospital-based facility that is seeking the LVPA and which treatments were furnished by other affiliated facilities. Finally, we propose to amend the regulation text by adding a new paragraph (h)(1) to § 413.232 to reflect this clarification of current policy under which MACs can verify hospital-based ESRD facilities' eligibility for the LVPA using supporting data in addition to hospital cost reports. We are soliciting comment on the proposed changes at § 413.232(h)(1).

b. Cost Reporting Periods Used for Eligibility

In the CY 2012 ESRD PPS final rule (76 FR 70236), we clarified that for purposes of eligibility under 42 CFR 413.232(b), we base eligibility on the three years preceding the payment year and those years are based on cost reporting periods. We further clarified that the ESRD facility's cost reports for the cost reporting periods ending in the three years preceding the payment year must report costs for 12 consecutive months.

After the LVPA was implemented, we began hearing concerns from the industry that there is a conflict within our policy. Currently, our policy allows an ESRD facility to remain eligible for the LVPA when they have a change of ownership (CHOW) that does not result in a new Provider Transaction Access Number (PTAN). However, our regulations at 42 CFR 413.232(b) suggest that MACs must verify treatment counts using cost reports for 12-consecutive month cost periods even though CHOWs often result in costs reports that are nonstandard, that is, longer or shorter than 12 months. In particular, the previous owner's final cost report may not coincide with the ESRD facility's cost report fiscal year end under its new ownership, resulting in two costs reports that are not 12-consecutive month cost reports. For example, where a CHOW occurs in the middle of the cost reporting period and the new owner wishes to retain the established cost report fiscal year end, the previous owner submits a final cost report covering their period of ownership and the new owner submits a cost report covering the remainder of the cost reporting period. Alternatively,

a new owner could also choose not to retain the previous owner's established cost reporting fiscal year end, in which case the CHOW could result in a cost reports that exceed twelve months when combined. Further details regarding the policies for filing cost reports during a CHOW are available in the Provider Reimbursement Manual—Part 1, chapter 15, "Change of Ownership."

We agree with the industry that there is a conflict in the policies governing LVPA that may prevent an otherwise qualified ESRD facility from receiving the adjustment. We have always intended that if an ESRD facility has a CHOW where the new owner accepts the previous owner's assets and liabilities by retaining the facility's PTAN, they should continue to be eligible for the LVPA. However, some MACs used a strict reading of the regulatory language and denied these providers the LVPA. Other MACs added short cost reports together or prorated treatment counts for cost reporting periods spanning greater than 12 months.

In order to ensure consistent verification of LVPA eligibility, we are restating our intention that when there is a CHOW that does not result in a new PTAN but creates two non-standard cost reporting periods (that is, periods that are shorter or longer than 12 months) the MAC is either to add the two non-standard cost reporting periods together where combined they would equal 12 consecutive months or prorate the data when they would exceed 12 consecutive months to determine the total treatments furnished for a full cost reporting period as if there had not been a CHOW.

For example, prior to a CHOW, Facility A had a cost reporting period that spanned January 1 through December 31. Facility A had a CHOW mid-year that did not result in a new PTAN but caused a break in the cost reporting period. Consistent with the clarification of our policy, the MAC would add Facility A's cost report that spanned January 1 through May 31 to its cost report that spanned June 1 through December 31 to verify the total treatment count.

The other situation that could occur is when a CHOW results in a change of the original fiscal period. For example, prior to a CHOW, Facility B had a cost reporting period that spanned January 1 through December 31 and, based on its cost reports for 2012 and 2013, it met the LVPA eligibility criteria. Then, Facility B had a CHOW in the beginning of 2014 that did not result in a new PTAN, but changed its cost reporting period to that of its new owner, October

1, 2014 through September 30, 2015. This scenario would create a short and a long cost report that would not total 12 months that the MAC would need to review for verification. That is, Facility B would have a cost report that spanned January 1, 2014 through July 31, 2014 (7 months) and a cost report that spanned August 1, 2014 through September 30, 2015 (14 months).

In this situation, the MAC should combine the two non-standard cost reporting periods that in combination may exceed 12-consecutive months and prorate the data to equal a full 12-consecutive month period. Finally, we propose to amend the regulation text by adding a new paragraph (h)(2) to § 413.232 to clarify the verification process for ESRD facilities that experience a CHOW with no change in the PTAN. We are soliciting comments on the proposed changes at § 413.232(h)(2).

Section 413.232(f) requires ESRD facilities to submit LVPA attestations by November 1 of each year. However, the changes we are proposing to the LVPA regulation text would not be finalized in enough time to give the ESRD facilities the opportunity to learn about the policy clarifications and provide an attestation to their MAC by November 1, 2014. For these reasons, we are proposing to amend § 413.232(f) to extend the deadline for CY 2015 LVPA attestations until December 31, 2014. This timeframe would allow ESRD facilities to reassess their eligibility and apply for the LVPA for CY 2015. It would also give MACs an opportunity to verify any new attestations and reassess LVPA eligibility verifications made since 2011. We will issue guidance with additional detail regarding this policy clarification, which will include details about the process ESRD facilities should follow to seek the LVPA for past years.

G. Continued Use of ICD-9-CM Codes and Corrections to the ICD-10-CM Codes Eligible for the Comorbidity Payment Adjustment

Section 1881(b)(14)(D)(i) of the Act requires that the ESRD PPS include a payment adjustment based upon case mix that may take into account, among other things, patient comorbidities. Comorbidities are specific patient conditions that coexist with the patient's principal diagnosis that necessitates dialysis. The comorbidity payment adjustments recognize the increased costs associated with comorbidities and provide additional payment for certain conditions that occur concurrently with the need for dialysis. For a detailed discussion of our approach to developing the comorbidity

payment adjustment, see the CY 2011 ESRD PPS final rule (75 FR 49094 through 49108).

In the CY 2011 ESRD PPS final rule, we finalized six comorbidity categories that are eligible for a comorbidity payment adjustment, each with associated International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM) diagnosis codes (75 FR 49100). These categories include three acute, short-term diagnostic categories (pericarditis, bacterial pneumonia, and gastrointestinal tract bleeding with hemorrhage) and three chronic diagnostic categories (hereditary hemolytic sickle cell anemia, myelodysplastic syndrome, and monoclonal gammopathy). The comorbidity categories eligible for an adjustment and their associated ICD-9-CM codes were published in the Appendix of the CY 2011 ESRD PPS final rule as Table E: ICD-9-CM—Codes Recognized for the Comorbidity Payment Adjustment (75 FR 49211).

In the CY 2012 ESRD PPS final rule (76 FR 70252), we clarified that the ICD-9-CM codes eligible for the comorbidity payment adjustment are subject to the annual ICD-9-CM coding updates that occur in the hospital IPPS final rule and are effective October 1st every year. We explained that any updates to the ICD-9-CM codes that affect the categories of comorbidities and the diagnoses within the comorbidity categories that are eligible for a comorbidity payment adjustment would be communicated to ESRD facilities through sub-regulatory guidance.

Together with the rest of the healthcare industry, CMS was scheduled to implement the 10th revision of the ICD coding scheme—ICD-10—on October 1, 2014. Hence, in the CY 2014 ESRD PPS (78 FR 72175 through 72179), we finalized a policy that ICD-10-CM codes will be eligible for a comorbidity payment adjustment where they crosswalk from ICD-9-CM codes that are eligible for a comorbidity payment adjustment with two exceptions.

On April 1, 2014, PAMA was enacted. Section 212 of PAMA, titled “Delay in Transition from ICD-9 to ICD-10 Code Sets,” provides that “[t]he Secretary of Health and Human Services may not, prior to October 1, 2015, adopt ICD-10 code sets as the standard for code sets under section 1173(c) of the Social Security Act (42 U.S.C. 1320d-2(c)) and section 162.1002 of title 45, Code of Federal Regulations.” On May 1, 2014, the Secretary announced that HHS expects to issue an interim final rule

that will require use of ICD-10 beginning October 1, 2015 and continue to require use of ICD-9-CM through September 30, 2015. This announcement is available on the CMS Web site at <http://cms.gov/Medicare/Coding/ICD10/index.html>. Before the passage of PAMA, our policy required facilities to utilize ICD-10-CM codes to identify comorbidities eligible for the comorbidity payment adjustment beginning October 1, 2014. However, in light of section 212 of PAMA and the Secretary's announcement of the new compliance date for ICD-10, we are proposing to require use of ICD-10-CM to identify comorbidities beginning on October 1, 2015. Until that time, we will continue to require use of the ICD-9-CM codes to identify comorbidities eligible for the comorbidity payment adjustment. The ICD-9-CM codes that are eligible for the comorbidity payment adjustment are listed in the crosswalk tables below.

Because facilities will begin using ICD-10 during the calendar year to which this rule applies, we are correcting several typographical errors and omissions in the Tables that appeared in the CY 2015 ESRD PPS final rule. First, we are correcting one ICD-9-CM diagnosis code that was incorrectly identified due to a typographical error in Table 1—ONE ICD-9-CM CODE CROSSWALKS TO ONE ICD-10-CM CODE (78 FR 72176). In Table 2—ONE ICD-9-CM CODE CROSSWALKS TO MULTIPLE ICD-10-CM CODES (78 FR 72177), we are correcting two ICD-10-CM codes because of typographical errors and proposing two additional ICD-10-CM codes that were inadvertently omitted from the crosswalk. Lastly, in Table 3—MULTIPLE ICD-9-CM CODES CROSSWALK TO ONE ICD-10-CM CODE (78 FR 72178), we are proposing to include 9 additional ICD-10-CM crosswalk codes for eligibility for the comorbidity payment adjustment. These codes were omitted in error from the CY 2014 ESRD PPS final rule, and we have furnished an updated Table 20 below reflecting the additional codes.

We note that the ICD-10-CM codes that facilities will be required to use to identify eligible comorbidities when ICD-10 becomes the required medical data code set on October 1, 2015 are those that were finalized in the CY 2014 ESRD PPS final rule at 78 FR 72175 to 78 FR 72179 with the corrections and proposed additions included below.

Table 18— ONE ICD-9-CM CODE CROSSWALKS TO ONE ICD-10-CM CODE (78 FR 72175 through 78 FR 72176).

Table 18 lists all the instances in which one ICD-9-CM code crosswalks to one ICD-10-CM code. We finalized a policy in last year's rule that all identified ICD-10-CM codes would receive a comorbidity adjustment with

the exception of K52.81 Eosinophilic gastritis or gastroenteritis. We have since discovered that under the section titled Myelodysplastic Syndrome, ICD-9-CM code 238.7 Essential thrombocythemia was inaccurately

identified. The table below has been amended to accurately identify ICD-9-CM diagnostic code 238.71 Essential thrombocythemia.

TABLE 18—ONE ICD-9-CM CODE CROSSWALKS TO ONE ICD-10-CM CODE

ICD-9 Descriptor	ICD-10 Descriptor
Gastrointestinal Bleeding	
530.21 Ulcer of esophagus with bleeding	K22.11 Ulcer of esophagus with bleeding.
535.71 Eosinophilic gastritis, with hemorrhage	K52.81 Eosinophilic gastritis or gastroenteritis.
537.83 Angiodysplasia of stomach and duodenum with hemorrhage ..	K31.811 Angiodysplasia of stomach and duodenum with bleeding.
569.85 Angiodysplasia of intestine with hemorrhage	K55.21 Angiodysplasia of colon with hemorrhage.
Bacterial Pneumonia	
003.22 Salmonella pneumonia	A02.22 Salmonella pneumonia.
482.0 Pneumonia due to Klebsiella pneumonia	J15.0 Pneumonia due to Klebsiella pneumoniae.
482.1 Pneumonia due to Pseudomonas	J15.1 Pneumonia due to Pseudomonas.
482.2 Pneumonia due to Hemophilus influenzae [H. influenzae]	J14 Pneumonia due to Hemophilus influenzae.
482.32 Pneumonia due to Streptococcus, group B	J15.3 Pneumonia due to streptococcus, group B.
482.40 Pneumonia due to Staphylococcus, unspecified	J15.20 Pneumonia due to staphylococcus, unspecified.
482.41 Methicillin susceptible pneumonia due to Staphylococcus aureus.	J15.211 Pneumonia due to Methicillin susceptible Staphylococcus aureus.
482.42 Methicillin resistant pneumonia due to Staphylococcus aureus	J15.212 Pneumonia due to Methicillin resistant Staphylococcus aureus.
482.49 Other Staphylococcus pneumonia	J15.29 Pneumonia due to other staphylococcus.
482.82 Pneumonia due to escherichia coli [E. coli]	J15.5 Pneumonia due to Escherichia coli.
482.83 Pneumonia due to other gram-negative bacteria	J15.6 Pneumonia due to other aerobic Gram-negative bacteria.
482.84 Pneumonia due to Legionnaires' disease	A48.1 Legionnaires' disease.
507.0 Pneumonitis due to inhalation of food or vomitus	J69.0 Pneumonitis due to inhalation of food and vomit.
507.8 Pneumonitis due to other solids and liquids	J69.8 Pneumonitis due to inhalation of other solids and liquids.
510.0 Empyema with fistula	J86.0 Pyothorax with fistula.
510.9 Empyema without mention of fistula	J86.9 Pyothorax without fistula.
Pericarditis	
420.91 Acute idiopathic pericarditis	I30.0 Acute nonspecific idiopathic pericarditis.
Hereditary Hemolytic and Sickle Cell Anemia	
282.0 Hereditary spherocytosis	D58.0 Hereditary spherocytosis.
282.1 Hereditary elliptocytosis	D58.1 Hereditary elliptocytosis.
282.41 Sickle-cell thalassemia without crisis	D57.40 Sickle-cell thalassemia without crisis.
282.43 Alpha thalassemia	D56.0 Alpha thalassemia.
282.44 Beta thalassemia	D56.1 Beta thalassemia.
282.45 Delta-beta thalassemia	D56.2 Delta-beta thalassemia.
282.46 Thalassemia minor	D56.3 Thalassemia minor.
282.47 Hemoglobin E-beta thalassemia	D56.5 Hemoglobin E-beta thalassemia.
282.49 Other thalassemia	D56.8 Other thalassemias.
282.61 Hb-SS disease without crisis	D57.1 Sickle-cell disease without crisis.
282.63 Sickle-cell/Hb-C disease without crisis	D57.20 Sickle-cell/Hb-C disease without crisis.
282.68 Other sickle-cell disease without crisis	D57.80 Other sickle-cell disorders without crisis.
Myelodysplastic Syndrome	
238.71 Essential thrombocythemia	D47.3 Essential (hemorrhagic) thrombocythemia.
238.73 High grade myelodysplastic syndrome lesions	D46.22 Refractory anemia with excess of blasts 2.
238.74 Myelodysplastic syndrome with 5q deletion	D46.C Myelodysplastic syndrome with isolated del(5q) chromosomal abnormality.
238.76 Myelofibrosis with myeloid metaplasia	D47.1 Chronic myeloproliferative disease.

Table 19—ONE ICD-9-CM CODE CROSSWALKS TO MULTIPLE ICD-10-CM CODES (78 FR 72177 through 78 FR 72178).

Table 19 lists all of the instances in which one ICD-9-CM code crosswalks to multiple ICD-10-CM codes. We

finalized a policy in last year's rule that all identified ICD-10-CM codes would receive a comorbidity adjustment with the exception of D89.2 Hypergammaglobulinemia, unspecified. Under the section titled Gastrointestinal Bleeding, ICD-9-CM code 562

Diverticulosis of small intestine with hemorrhage was inaccurately identified, as the complete code number is 562.02. The table below has been amended to accurately identify ICD-9-CM diagnostic code 562.02 Diverticulosis of small intestine with hemorrhage.

Also under the section titled Gastrointestinal Bleeding, ICD–9–CM diagnostic code 562.13 Diverticulitis of colon with hemorrhage did not include a complete crosswalk to ICD–10–CM diagnostic codes. Therefore, we propose to include ICD–10–CM diagnostic codes K57.81 Diverticulitis of intestine, part unspecified, with perforation and abscess with bleeding and K57.93

Diverticulitis of intestine, part unspecified, without perforation or abscess with bleeding, in addition to the ICD–10–CM diagnostic codes K57.21, K57.33, K57.41, and K57.53, as eligible for the comorbidity payment adjustment when the use of ICD–10–CM is required, on October 1, 2015.

Under the section titled Pericarditis, ICD–10–CM code I30.1 Infective

pericarditis was inaccurately identified. The table below has been amended to accurately identify the ICD–10–CM diagnostic code I30.1 Infective pericarditis as eligible for a comorbidity payment adjustment when the use of ICD–10–CM is required, on October 1, 2015.

TABLE 19—ONE ICD–9–CM CODE CROSSWALKS TO MULTIPLE ICD–10–CM CODES

ICD–9 Descriptor	ICD–10 Descriptor
Gastrointestinal Bleeding	
562.02 Diverticulosis of small intestine with hemorrhage	K57.11 Diverticulosis of small intestine without perforation or abscess with bleeding. K57.51 Diverticulosis of both small and large intestine without perforation or abscess with bleeding.
562.03 Diverticulitis of small intestine with hemorrhage	K57.01 Diverticulitis of small intestine with perforation and abscess with bleeding. K57.13 Diverticulitis of small intestine without perforation or abscess with bleeding. K57.41 Diverticulitis of both small and large intestine with perforation and abscess with bleeding. K57.53 Diverticulitis of both small and large intestine without perforation or abscess with bleeding.
562.12 Diverticulosis of colon with hemorrhage	K57.31 Diverticulosis of large intestine without perforation or abscess with bleeding. K57.91 Diverticulosis of intestine, part unspecified, without perforation or abscess with bleeding.
562.13 Diverticulitis of colon with hemorrhage	K57.51 Diverticulosis of both small and large intestine without perforation or abscess with bleeding. K57.21 Diverticulitis of large intestine with perforation and abscess with bleeding. K57.33 Diverticulitis of large intestine without perforation or abscess with bleeding. K57.41 Diverticulitis of both small and large intestine with perforation and abscess with bleeding. K57.53 Diverticulitis of both small and large intestine without perforation or abscess with bleeding. K57.81 Diverticulitis of intestine, part unspecified, with perforation and abscess with bleeding.
K57.93 Diverticulitis of intestine, part unspecified, without perforation or abscess with bleeding.	
Bacterial Pneumonia	
513.0 Abscess of lung	J85.0 Gangrene and necrosis of lung. J85.1 Abscess of lung with pneumonia. J85.2 Abscess of lung without pneumonia.
Pericarditis	
420.0 Acute pericarditis in diseases classified elsewhere	A18.84 Tuberculosis of heart. I32 Pericarditis in diseases classified elsewhere. M32.12 Pericarditis in systemic lupus erythematosus.
420.90 Acute pericarditis, unspecified	I30.1 Infective pericarditis. I30.9 Acute pericarditis, unspecified.
420.99 Other acute pericarditis.	I30.8 Other forms of acute pericarditis. I30.9 Acute pericarditis, unspecified.
Hereditary Hemolytic and sickle cell anemia	
282.2 Anemias due to disorders of glutathione metabolism	D55.0 Anemia due to glucose-6-phosphate dehydrogenase [G6PD] deficiency. D55.1 Anemia due to other disorders of glutathione metabolism.
282.3 Other hemolytic anemias due to enzyme deficiency	D55.2 Anemia due to disorders of glycolytic enzymes. D55.3 Anemia due to disorders of nucleotide metabolism. D55.8 Other anemias due to enzyme disorders.
282.42 Sickle-cell thalassemia with crisis	D55.9 Anemia due to enzyme disorder, unspecified. D57.411 Sickle-cell thalassemia with acute chest syndrome. D57.412 Sickle-cell thalassemia with splenic sequestration.

TABLE 19—ONE ICD-9-CM CODE CROSSWALKS TO MULTIPLE ICD-10-CM CODES—Continued

ICD-9 Descriptor	ICD-10 Descriptor
282.62 Hb-SS disease with crisis	D57.419 Sickle-cell thalassemia with crisis, unspecified. D57.00 Hb-SS disease with crisis, unspecified. D57.01 Hb-SS disease with acute chest syndrome. D57.02 Hb-SS disease with splenic sequestration.
282.64 Sickle-cell/Hb-C disease with crisis	D57.211 Sickle-cell/Hb-C disease with acute chest syndrome. D57.212 Sickle-cell/Hb-C disease with splenic sequestration. D57.219 Sickle-cell/Hb-C disease with crisis, unspecified.
282.69 Other sickle-cell disease with crisis	D57.811 Other sickle-cell disorders with acute chest syndrome. D57.812 Other sickle-cell disorders with splenic sequestration. D57.819 Other sickle-cell disorders with crisis, unspecified.
Monoclonal Gammopathy	
273.1 Monoclonal paraproteinemia	D47.2 Monoclonal gammopathy. D89.2 Hypergammaglobulinemia, unspecified.
Myelodysplastic Syndrome	
238.72 Low grade myelodysplastic syndrome lesions	D46.0 Refractory anemia without ring sideroblasts, so stated. D46.1 Refractory anemia with ring sideroblasts. D46.20 Refractory anemia with excess of blasts, unspecified. D46.21 Refractory anemia with excess of blasts 1. D46.4 Refractory anemia, unspecified. D46.A Refractory cytopenia with multilineage dysplasia. D46.B Refractory cytopenia with multilineage dysplasia and ring sideroblasts.
238.75 Myelodysplastic syndrome, unspecified	D46.9 Myelodysplastic syndrome, unspecified. D46.Z Other myelodysplastic syndromes.

Table 20—MULTIPLE ICD-9-CM CODES CROSSWALK TO ONE ICD-10-CM CODE (78 FR 72178).

Table 20 displays the crosswalk where multiple ICD-9-CM codes crosswalk to one ICD-10-CM code. We finalized a policy in last year's rule that all of the ICD-10-CM codes listed in Table 3 would be eligible for the comorbidity payment adjustment. Under the section titled Gastrointestinal Bleeding, nine ICD-10-CM codes (K25.0 Acute gastric ulcer with hemorrhage, K25.2 Acute gastric ulcer with both

hemorrhage and perforation, K25.4 Chronic or unspecified gastric ulcer with hemorrhage, K25.6 Chronic or unspecified gastric ulcer with both hemorrhage and perforation, K26.0 Acute duodenal ulcer with hemorrhage, K26.2 Acute duodenal ulcer with both hemorrhage and perforation, K26.4 Chronic or unspecified duodenal ulcer with hemorrhage, K26.6 Chronic or unspecified duodenal ulcer with both hemorrhage and perforation, and K27.0 Acute peptic ulcer, site unspecified,

with hemorrhage) and the corresponding ICD-9-CM codes were inadvertently omitted from the crosswalk. We propose that these ICD-10-CM diagnostic codes—K25.0, K25.2, K25.4, K25.6, K26.0, K26.2, K26.4, K26.6, K27.0—will be eligible for the comorbidity payment adjustment beginning October 1, 2015. We also propose that the corresponding ICD-9-CM codes will be eligible for the comorbidity adjustment through September 30, 2015.

TABLE 20—MULTIPLE ICD-9-CM CODES CROSSWALK TO ONE ICD-10-CM CODE

Gastrointestinal Bleeding	
531.00 Acute gastric ulcer with hemorrhage, without mention of obstruction.	K25.0 Acute gastric ulcer with hemorrhage.
531.01 Acute gastric ulcer with hemorrhage, with obstruction.	
531.20 Acute gastric ulcer with hemorrhage and perforation, without mention of obstruction.	K25.2 Acute gastric ulcer with both hemorrhage and perforation.
531.21 Acute gastric ulcer with hemorrhage and perforation, with obstruction.	
531.40 Chronic or unspecified gastric ulcer with hemorrhage, without mention of obstruction.	K25.4 Chronic or unspecified gastric ulcer with hemorrhage.
531.41 Chronic or unspecified gastric ulcer with hemorrhage, with obstruction.	
531.60 Chronic or unspecified gastric ulcer with hemorrhage and perforation, without mention of obstruction.	K25.6 Chronic or unspecified gastric ulcer with both hemorrhage and perforation.
531.61 Chronic or unspecified gastric ulcer with hemorrhage and perforation, with obstruction.	
532.00 Acute duodenal ulcer with hemorrhage, without mention of obstruction.	K26.0 Acute duodenal ulcer with hemorrhage.
532.01 Acute duodenal ulcer with hemorrhage, with obstruction.	
532.20 Acute duodenal ulcer with hemorrhage and perforation, without mention of obstruction.	K26.2 Acute duodenal ulcer with both hemorrhage and perforation.

TABLE 20—MULTIPLE ICD-9-CM CODES CROSSWALK TO ONE ICD-10-CM CODE—Continued

532.21 Acute duodenal ulcer with hemorrhage and perforation, with obstruction.	
532.40 Chronic or unspecified duodenal ulcer with hemorrhage, without mention of obstruction.	K26.4 Chronic or unspecified duodenal ulcer with hemorrhage.
532.41 Chronic or unspecified duodenal ulcer with hemorrhage, with obstruction.	
532.60 Chronic or unspecified duodenal ulcer with hemorrhage and perforation, without mention of obstruction.	K26.6 Chronic or unspecified duodenal ulcer with both hemorrhage and perforation.
532.61 Chronic or unspecified duodenal ulcer with hemorrhage and perforation, with obstruction.	
533.00 Acute peptic ulcer of unspecified site with hemorrhage, without mention of obstruction.	K27.0 Acute peptic ulcer, site unspecified, with hemorrhage.
533.01 Acute peptic ulcer of unspecified site with hemorrhage, with obstruction.	
533.20 Acute peptic ulcer of unspecified site with hemorrhage and perforation, without mention of obstruction.	K27.2 Acute peptic ulcer, site unspecified, with both hemorrhage and perforation.
533.21 Acute peptic ulcer of unspecified site with hemorrhage and perforation, with obstruction.	
533.40 Chronic or unspecified peptic ulcer of unspecified site with hemorrhage, without mention of obstruction.	K27.4 Chronic or unspecified peptic ulcer, site unspecified, with hemorrhage.
533.41 Chronic or unspecified peptic ulcer of unspecified site with hemorrhage, with obstruction.	
533.60 Chronic or unspecified peptic ulcer of unspecified site with hemorrhage and perforation, without mention of obstruction.	K27.6 Chronic or unspecified peptic ulcer, site unspecified, with both hemorrhage and perforation.
533.61 Chronic or unspecified peptic ulcer of unspecified site with hemorrhage and perforation, with obstruction.	
534.00 Acute gastrojejunal ulcer with hemorrhage, without mention of obstruction.	K28.0 Acute gastrojejunal ulcer with hemorrhage.
534.01 Acute gastrojejunal ulcer, with hemorrhage, with obstruction.	
534.20 Acute gastrojejunal ulcer with hemorrhage and perforation, without mention of obstruction.	K28.2 Acute gastrojejunal ulcer with both hemorrhage and perforation.
534.21 Acute gastrojejunal ulcer with hemorrhage and perforation, with obstruction.	
534.40 Chronic or unspecified gastrojejunal ulcer with hemorrhage, without mention of obstruction.	K28.4 Chronic or unspecified gastrojejunal ulcer with hemorrhage.
534.41 Chronic or unspecified gastrojejunal ulcer, with hemorrhage, with obstruction.	
534.60 Chronic or unspecified gastrojejunal ulcer with hemorrhage and perforation, without mention of obstruction.	K28.6 Chronic or unspecified gastrojejunal ulcer with both hemorrhage and perforation.
534.61 Chronic or unspecified gastrojejunal ulcer with hemorrhage and perforation, with obstruction.	

Bacterial Pneumonia

482.30 Pneumonia due to Streptococcus, unspecified	J15.4 Pneumonia due to other streptococci.
482.31 Pneumonia due to Streptococcus, group A.	
482.39 Pneumonia due to other Streptococcus.	
482.81 Pneumonia due to anaerobes	J15.8 Pneumonia due to other specified bacteria.
482.89 Pneumonia due to other specified bacteria.	

III. End-Stage Renal Disease (ESRD) Quality Incentive Program (QIP)

A. Background

For more than 30 years, monitoring the quality of care provided by dialysis facilities to patients with end-stage renal disease (ESRD) has been an important component of the Medicare ESRD payment system. The ESRD Quality Incentive Program (QIP) is the most recent step in fostering improved patient outcomes by establishing incentives for dialysis facilities to meet or exceed performance standards established by CMS. The ESRD QIP is authorized by section 1881(h) of the Social Security Act (the Act), which was added by section 153(c) of the Medicare

Improvements for Patients and Providers Act (MIPPA).

Specifically, section 1881(h) requires the Secretary to establish an ESRD QIP by (i) selecting measures; (ii) establishing the performance standards that apply to the individual measures; (iii) specifying a performance period with respect to a year; (iv) developing a methodology for assessing the total performance of each facility based on the performance standards with respect to the measures for a performance period; and (v) applying an appropriate payment reduction to facilities that do not meet or exceed the established Total Performance Score (TPS). This proposed rule discusses each of these elements and our proposals for their application

to the ESRD QIP, including for PYs 2017 and 2018.

B. Considerations in Updating and Expanding Quality Measures Under the ESRD QIP

Throughout the past decade, Medicare has been transitioning from a program that pays for healthcare based on particular services furnished to a beneficiary to a program that bases payments to providers and suppliers on the quality of services they furnish. By paying for the quality of care rather than simply the quantity of care, and by focusing on better care and lower costs through improvement, prevention and population health, expanded healthcare coverage, and enterprise excellence, we are strengthening the healthcare system

while also advancing the National Strategy for Quality Improvement in Health Care (that is, the National Quality Strategy (NQS)). We are also working to update a set of domains and specific quality measures for our VBP programs, and to link the aims of the NQS with our payment policies on a national scale. We are working in partnership with beneficiaries, providers, advocacy groups, the National Quality Forum (NQF), the Measures Application Partnership, operating divisions within the Department of Health and Human Services (HHS), and other stakeholders to develop new measures where gaps exist, refine measures where necessary, and remove measures when appropriate. We are also collaborating with stakeholders to ensure that the ESRD QIP serves the needs of our beneficiaries and also advances the goals of the NQS to improve the overall quality of care, improve the health of the U.S. population, and reduce the cost of quality healthcare.²

We believe that the development of an ESRD QIP that is successful in supporting the delivery of high-quality healthcare services in dialysis facilities is paramount. We seek to adopt measures for the ESRD QIP that promote better, safer, and more coordinated care. Our measure development and selection activities for the ESRD QIP take into account national priorities such as those established by the HHS Strategic Plan (<http://www.hhs.gov/strategic-plan/priorities.html>), the NQS (<http://www.ahrq.gov/workingforquality/nqs/nqs2013annlrpt.htm>), and the HHS National Action Plan to Prevent Healthcare Associated Infections (HAIs) (<http://www.hhs.gov/ash/initiatives/hai/esrd.html>). To the extent feasible and practicable, we have sought to adopt measures that have been endorsed by a national consensus organization; recommended by multi-stakeholder organizations; and developed with the input of providers, beneficiaries, health advocacy organizations, and other stakeholders.

C. Web Sites for Measure Specifications

In an effort to ensure that facilities and the general public are able to continue accessing the specifications for the measures that are being proposed for and have been adopted in the ESRD QIP, we are now posting these measure specifications on a CMS Web site, instead of posting them on

www.dialysisreports.org as we have in the past. Measure specifications from previous years, as well as those proposed for the PY 2017 and PY 2018 programs, can be found at: http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/ESRDQIP/061_TechnicalSpecifications.html.

D. Updating the NHSN Bloodstream Infection in Hemodialysis Outpatients Clinical Measure for the PY 2016 ESRD QIP and Future Payment Years

The NHSN Bloodstream Infection in Hemodialysis Outpatients clinical measure (that is, NHSN Bloodstream Infection clinical measure) that we adopted beginning with the PY 2016 ESRD QIP is based on NQF #1460. At the time we adopted it, the measure included a risk adjustment for patients' vascular access type but did not include any reliability adjustments to account for differences in the amount of exposure or opportunity for healthcare associated infections (HAIs) among patients. On April 4, 2014, in response to a measure update proposal submitted by CDC, NQF endorsed a reliability adjustment for volume of exposure and unmeasured variation across facilities to NQF #1460. This reliability adjustment is called the Reliability-Adjusted Standardized Infection Ratio or Adjusted Ranking Metric (ARM). As a result of this change to the NQF-endorsed measure specifications, a facility's performance on NQF #1460 will be adjusted towards the mean (that is, facilities with low exposure volume will be adjusted more than facilities with high exposure volume, and the performance rate will be adjusted up or down depending on the facility estimate and mean) to account for the differences in the reliability of the infection estimates based on the number of patient-months at a facility and any unmeasured variation across facilities. Because the adjustment is based on the volume of exposure, facility scores will be adjusted more if there are fewer patient-months in the denominator, and facility scores will be adjusted less if there are many patient-months in the denominator.

We propose to adopt the same reliability adjustment for purposes of calculating facility performance on the NHSN Bloodstream Infection clinical measure, beginning with the PY 2016 ESRD QIP. We believe that the inclusion of this reliability adjustment, in addition to the risk factor adjustment, will enable us to better differentiate among facility performance on this measure, because it accounts not only for the variation in patient risk by

vascular access type, but also for variation in the number of patients a facility treats in a given month. The ARM will be incorporated into the existing risk-adjustment methodology, which will also continue to include a risk adjustment for patient vascular access type. Further information about the reliability adjustment, and the NHSN Bloodstream Infection measure specifications can be found at <http://www.cdc.gov/nhsn/PDFs/dialysis/NHSN-ARM.pdf>, <http://www.cdc.gov/nhsn/dialysis/dialysis-event.html>, and http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/ESRDQIP/061_TechnicalSpecifications.html.

E. Oral-Only Drugs Measures in the ESRD QIP

Section 217(d) of the Protecting Access to Medicare Act of 2014 (Pub. L. 113–93), enacted on April 1, 2014, amends section 1881(h)(2) of the Act to require the Secretary, for PY 2016 and subsequent years, to adopt measures (outcome-based, to the extent feasible) in the ESRD QIP that are specific to the conditions treated with oral-only drugs. We believe that the Hypercalcemia clinical measure adopted beginning with the PY 2016 program (78 FR 72200 through 72203) meets this new statutory requirement because hypercalcemia is a condition that is treated with oral-only drugs. The Hypercalcemia clinical measure is not an outcome-based measure, and we have considered the possibility of adopting outcomes-based measures that pertain to conditions treated with oral-only drugs. However, we have determined that it is not feasible to propose to adopt an outcome-based measure on this topic at this time because we are not aware of any outcome measures developed on this topic.

F. Proposed Requirements for the PY 2017 ESRD QIP

1. Proposed Revision to the Expanded ICH CAHPS Reporting Measure

For the ICH CAHPS reporting measure, we are proposing one change to the reporting requirements finalized in the CY 2014 ESRD PPS Final Rule for PY 2017. In the CY 2014 ESRD PPS final rule, we finalized that facilities would be eligible to receive a score on the measure if they treated 30 or more survey-eligible patients during the performance period (78 FR 72220 through 72221). Subsequently, we were made aware that facilities may not know whether they will have enough survey-eligible patients during the performance period to be eligible for the ICH CAHPS

² 2013 Annual Progress Report to Congress: National Strategy for Quality Improvement in Health Care, <http://www.ahrq.gov/workingforquality/nqs/nqs2013annlrpt.htm>.

measure when they are making decisions about whether or not they will contract with a vendor to administer the survey. We agree that it would be preferable if facilities knew at the beginning of the performance period if they will be eligible to receive a score on the ICH CAHPS measure, because this would allow facilities to make informed decisions about whether they should contract with a vendor to administer the survey. For this reason, we propose that beginning with the PY 2017 program, facilities will be eligible to receive a score on the ICH CAHPS measure if they treat 30 or more survey-eligible patients during the “eligibility period,” which we define as the CY before the performance period. However, even if a facility is eligible to receive a score on the measure because it has treated at least 30 survey-eligible

patients according to the ICH CAHPS Survey measure specifications during the calendar year prior to the performance period, we are proposing that the facility will still not receive a score for performance during the performance period if it cannot collect 30 survey completes during the performance period. We believe that facilities should be able to determine quickly the number of survey-eligible patients that they treated during the eligibility period, and that reaching this determination should not impact facilities’ ability to contract with a vendor in time to meet the semiannual survey administration requirements. Technical specifications for the ICH CAHPS reporting measure can be found at: <http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment->

Instruments/ESRDQIP/061_TechnicalSpecifications.html.

We seek comments on this proposal.

2. Proposed Measures for the PY 2017 ESRD QIP

a. PY 2016 Measures Continuing in PY 2017 and Future Payment Years

We previously finalized 11 measures in the CY 2014 ESRD PPS Final Rule for the PY 2016 ESRD QIP, and these measures are summarized in Table 21 below. In accordance with our policy to continue using measures unless we propose to remove or replace them (77 FR 67477), we will continue to use 10 of these 11 measures in the PY 2017 ESRD QIP. As we discuss in more detail below, we are proposing to remove one measure, Hemoglobin Greater than 12 g/dL, beginning with the PY 2017 measure set (see Table 22 below).

TABLE 21—PY 2016 ESRD QIP MEASURES BEING CONTINUED IN PY 2017

NQF #	Measure title and description
0249	Hemodialysis Adequacy: Minimum delivered hemodialysis dose. Percent of hemodialysis patient-months with spKt/V greater than or equal to 1.2.
0318	Peritoneal Dialysis Adequacy: Delivered dose above minimum. Percent of peritoneal dialysis patient-months with spKt/V greater than or equal to 1.7 (dialytic + residual) during the four month study period.
1423	Pediatric Hemodialysis Adequacy: Minimum spKt/V. Percent of pediatric in-center hemodialysis patient-months with spKt/V greater than or equal to 1.2.
0257	Vascular Access Type: AV Fistula. Percentage of patient-months on hemodialysis during the last hemodialysis treatment of the month using an autogenous AV fistula with two needles.
0256	Vascular Access Type: Catheter > 90 days. Percentage of patient-months for patients on hemodialysis during the last hemodialysis treatment of month with a catheter continuously for 90 days or longer prior to the last hemodialysis session.
N/A ¹	National Healthcare Safety Network (NHSN) Bloodstream Infection in Hemodialysis Patients. Number of hemodialysis outpatients with positive blood cultures per 100 hemodialysis patient-months. ²
1454	Hypercalcemia. Proportion of patient-months with 3-month rolling average of total uncorrected serum calcium greater than 10.2 mg/dL.
N/A ³	In-Center Hemodialysis Consumer Assessment of Healthcare Providers and Systems (ICH CAHPS) Survey Administration. Facility administers, using a third-party CMS-approved vendor, the ICH CAHPS survey in accordance with survey specifications and submits survey results to CMS.
N/A ⁴	Mineral Metabolism Reporting. Number of months for which facility reports serum phosphorus for each Medicare patient.
N/A	Anemia Management Reporting. Number of months for which facility reports ESA dosage (as applicable) and hemoglobin/hematocrit for each Medicare patient.

¹ We note that this measure is based on a current NQF-endorsed bloodstream infection measure (NQF#1460).

² We are proposing a new method of calculating performance on this measure using the ARM methodology. If we decide to finalize this proposal based on public comments, the NHSN Bloodstream Infection clinical measure description will be updated to read: “ARM of Bloodstream Infection will be calculated among inpatients receiving hemodialysis at outpatient hemodialysis centers.”

³ We note that a related measure utilizing the results of this survey has been NQF-endorsed (#0258). We are proposing to adopt NQF #0258 in the PY 2018 program.

⁴ We note that this measure is based upon a current NQF-endorsed serum phosphorus measure (NQF #0255).

TABLE 22—MEASURE PROPOSED FOR REMOVAL BEGINNING WITH THE PY 2017 ESRD QIP

NQF#	Measure title
N/A	Anemia Management: Hgb >12. Percentage of Medicare patients with a mean hemoglobin value greater than 12 g/dL.

b. Proposal To Determine When a Measure is “Topped-Out” in the ESRD QIP, and Proposal To Remove a Topped-Out Measure From the ESRD QIP, Beginning With PY 2017

In the CY 2013 ESRD PPS final rule (77 FR 67475), we finalized a list of seven criteria we would consider when making determinations about whether to remove or replace a measure: “(1) Measure performance among the majority of ESRD facilities is so high and unvarying that meaningful distinctions in improvements or performance can no longer be made; (2) performance or improvement on a measure does not result in better or the intended patient outcomes; (3) a measure no longer aligns with current clinical guidelines or practice; (4) a more broadly applicable (across settings, populations, or conditions) measure for the topic becomes available; (5) a measure that is more proximal in time to desired patient outcomes for the particular topic becomes available; (6) a measure that is more strongly associated with desired patient outcomes for the particular topic becomes available; or (7) collection or public reporting of a measure leads to negative unintended consequences.”

In the CY 2014 ESRD PPS final rule (78 FR 72192), we stated that we were in the process of evaluating all of the ESRD QIP measures against the criteria. Subsequent to the publication of the CY 2014 ESRD PPS final rule, we completed our evaluation and determined that none of the measures finalized in the PY 2016 ESRD QIP met criteria 2 through 7, as listed above. With respect to the first criterion, we are proposing to more specifically define when performance on a clinical measure is so high and unvarying that the measure no longer reflects meaningful distinctions in improvements or performance. The statistical definitions that we are proposing to adopt will align our methodology with that used by the Hospital VBP program to determine when a measure is topped out (76 FR 26496 through 26497). Under this methodology, a clinical measure is considered to be topped out if national measure data show (1) statistically indistinguishable performance levels at the 75th and 90th percentiles; and (2) a truncated coefficient of variation (CV) of less than or equal to 0.1.

To determine whether a clinical measure is topped out, we initially focused on the top distribution of facility performance on each measure and noted if their 75th and 90th percentiles were statistically indistinguishable. Then, to ensure that we properly accounted for the entire distribution of scores, we analyzed the truncated coefficient of variation (CV) for each of the clinical measures.

The CV is a common statistic that expresses the standard deviation as a percentage of the sample mean in a way that is independent of the units of observation. Applied to this analysis, a large CV would indicate a broad

distribution of individual facility scores, with large and presumably meaningful differences between hospitals in relative performance. A small CV would indicate that the distribution of individual facility scores is clustered tightly around the mean value, suggesting that it is not useful to draw distinctions between individual facility performance scores. We used a modified version of the CV, namely a truncated CV, for each clinical measure, in which the 5 percent of facilities with the lowest scores, and the 5 percent of facilities with the highest scores were first truncated (set aside) before calculating the CV. This was done to avoid undue effects of the highest and lowest outlier facilities; if included, they would tend to greatly widen the dispersion of the distribution and make the clinical measure appear to be more reliable or discerning. For example, a clinical measure for which most facility scores are tightly clustered around the mean value (a small CV) might actually reflect a more robust dispersion if there were also a number of facilities with extreme outlier values, which would greatly increase the perceived variance in the measure. Accordingly, the truncated CV of less than or equal to 0.10 was added as a criterion for determining whether a clinical measure is topped out.

We seek comments on this proposal.

We evaluated each of the clinical measures finalized in the PY 2016 ESRD QIP against these proposed statistical conditions. The full analysis is available at: http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/ESRDQIP/061_TechnicalSpecifications.html. The results of that analysis appear below in Table 23.

TABLE 23—PY 2016 CLINICAL MEASURES USING CROWNWEB AND MEDICARE CLAIMS DATA FROM JANUARY 2013—DECEMBER 2013

Measure	N	75th percentile	90th percentile	Std. error	Statistically indistin-guishable	Truncated CV	TCV <0.10
Adult HD Kt/V	5665	96.1	97.4	0.13	No	0.04	Yes.
Adult PD Kt/V	1176	92.9	94.8	0.55	No	0.15	No.
Pediatric HD Kt/V	10	94.5	97.1	2.71	Yes	0.08	Yes.
Hgb > 12	5521	0.0	0.0	0.02	Yes	< 0.01	Yes.
Fistula Use	5561	72.3	77.0	0.16	No	0.14	No.
Catheter Use	5586	5.9	2.8	0.10	No	≤ 0.01	Yes.
Hypercalcemia	5685	0.3	0.0	0.04	No	≤ 0.01	Yes.

As the information presented in Table 23 suggests, the Hemoglobin Greater than 12 g/dL measure meets the proposed criteria for determining when a clinical measure is topped-out in the ESRD QIP. Accordingly, we propose to remove the Hemoglobin Greater than 12

g/dL measure from the ESRD QIP, beginning with the PY 2017 program. We recognize that the Pediatric Hemodialysis Adequacy measure also meets the conditions for being a topped-out clinical measure in the ESRD QIP. However, we are not proposing to

remove the Pediatric Hemodialysis Adequacy measure from the ESRD QIP because we have determined that removing the measure will not be useful for dialysis facilities. There are currently very few measures available that focus on the care furnished to

pediatric patients with ESRD, and we are reticent to remove a measure that addresses the unique needs of this population. In addition, although only 10 facilities were eligible to receive a score on the Pediatric Hemodialysis Adequacy measure (based on CY 2013 data), we believe that the publicly reported performance of these facilities can influence the standard of care furnished by other facilities that treat pediatric patients, even if a facility does not treat a sufficient number of pediatric patients to be eligible to be scored on the measure.

For these reasons, we believe that the drawbacks of removing a topped out clinical measure could be outweighed by the other benefits to retaining the measure. Accordingly, we propose that even if we determine that a clinical measure is topped out according to the statistical criteria we apply, we will not remove or replace it if we determine that its continued inclusion in the ESRD QIP measure set will continue to set a high standard of care for dialysis facilities.

We seek comments on these proposals.

c. New Measures Proposed for PY 2017 and Future Payment Years

As the program evolves, we believe it is important to continue to evaluate and expand the measures selected for the ESRD QIP. Therefore, for the PY 2017 ESRD QIP and future payment years, we are proposing to adopt one new clinical measure that addresses care coordination (see Table 24).

TABLE 24—NEW MEASURE PROPOSED FOR THE PY 2017 ESRD QIP

NQF#	Measure title
N/A ¹	Standardized Readmission Ratio, a clinical measure. Risk-adjusted standardized hospital readmissions ratio.

¹We note that this measure is currently under review at NQF.

i. Proposed Standardized Readmission Ratio (SRR) Clinical Measure

Background

At the end of 2011, 615,899 patients were being dialyzed, 115,643 of whom were new (incident) patients with ESRD.³ The SRR measure assesses the rate of unplanned readmissions of ESRD

³United States Renal Data System, USRDS 2013 Annual Data Report: Atlas of Chronic Kidney Disease and End-Stage Renal Disease in the United States, National Institutes of Health, National Institute of Diabetes and Digestive and Kidney Diseases, Bethesda, MD, 2013.

patients to an acute care hospital within 30 days of an index discharge from an acute care hospital, thereby identifying potentially poor or incomplete quality of care in the dialysis facility. In addition, the SRR reflects an aspect of ESRD care that is especially resource-intensive. In 2011, the total amount paid by Medicare for the ESRD program was approximately \$34.3 billion, a 5.4 percent increase from 2010.² In particular, Medicare paid more than \$10.5 billion for costs associated with hospitalized ESRD patients in 2011. In 2011, ESRD dialysis patients were admitted to the hospital twice on average, and spent an average of 12 total days in the hospital over the year, accounting for approximately 38 percent of Medicare expenditures for patients with ESRD.² Furthermore, a substantial percentage (30 percent) of ESRD patients discharged from the hospital have an unplanned readmission within 30 days.² In the non-ESRD population, clinical studies have demonstrated that improved care coordination and discharge planning may reduce readmission rates. The literature also reports a wide range of estimates of the percentage of readmissions that may be preventable. One literature review of more than 30 studies found the median proportion of readmissions that may be preventable was 27%, with a range of 5% to 79%.⁴ Preventability varied widely across diagnoses. Readmissions were more likely to be preventable in patients with more severe conditions. Therefore, a systematic measure on unplanned readmissions is essential for controlling escalating medical costs; it can identify where readmission rates are unusually high, and help facilities to provide cost-effective healthcare.

Overview of Measure

The SRR is a one-year risk-standardized measure of a facility's 30-day, all-cause rate of unplanned hospital readmissions among Medicare-covered ESRD dialysis patients. The number of expected readmissions is determined by a risk-adjustment model that accounts for the hospital where the index discharge took place, certain patient characteristics (including age, sex, and comorbidities), and the national median expected performance for all dialysis facilities, given the same patient case mix.

We are proposing to adopt the SRR measure currently under review by NQF (NQF #2496). Section 1881(h)(2)(B)(i) of

⁴ van Walraven C, Bennett C, Jennings A, Austin PC, Forster AJ. Proportion of hospital readmissions deemed avoidable: a systematic review. CMAJ. 2011;183(7):E391-E402.

the Act requires that, unless the exception set forth in section 1881(h)(2)(B)(ii) of the Act applies, the measures specified for the ESRD QIP under section 1881(h)(2)(A)(iv) of the Act must have been endorsed by the entity with a contract under section 1890(a) of the Act (that entity currently is NQF). Under the exception set forth in section 1881(h)(2)(B)(ii) of the Act, in the case of a specified area or medical topic determined appropriate by the Secretary for which a feasible and practical measure has not been endorsed by the entity with a contract under section 1890(a) of the Act, the Secretary may specify a measure that is not so endorsed, so long as due consideration is given to measures that have been endorsed or adopted by a consensus organization identified by the Secretary.

We have given due consideration to endorsed measures, as well as those adopted by a consensus organization, and we are proposing this measure under the authority of 1881(h)(2)(B)(ii) of the Act. Although the NQF has endorsed an all-cause hospital readmission measure (NQF #1789), we do not believe it is feasible to adopt this measure in the ESRD QIP because NQF #1789 is specified for use in hospitals, not dialysis facilities. In addition, NQF #1789 is intended to evaluate readmissions across all patient types, whereas the proposed SRR measure is specified for the unique population of ESRD dialysis patients, which have a different risk profile than the general population captured in NQF #1789. Because the proposed SRR measure has been developed specifically for the dialysis-facility setting, and because the measure has the potential to improve clinical practice and decrease healthcare costs, we believe it is appropriate to adopt the SRR in the ESRD QIP at this time.

We have analyzed the measure's reliability, the results of which are provided below and in greater detail in the SRR Measure Methodology report, available at: http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/ESRDQIP/061_TechnicalSpecifications.html. The Inter-Unit Reliability (IUR) was calculated for the proposed SRR using data from 2012 and a "bootstrap" approach, which uses a resampling scheme to estimate the within-facility variation that cannot be directly estimated by the analysis of variance (ANOVA). The SRRs that we calculated for purposes of this analysis were for dialysis facilities that had at least 11 patients who had been discharged from a hospital during 2012. A small IUR (near 0) reveals that most of the variation of the measures between

facilities is driven by “random noise,” indicating the measure would not be a reliable characterization of the differences among facilities, whereas a large IUR (near 1) indicates that most of the variation between facilities is due to the real differences between facilities. The IUR for the proposed SRR measure was found to be 0.49, indicating that about one-half of the variation in the SRR can be attributed to between-facility differences, and about half to within-facility variation. This value of IUR indicates that an average-size facility would achieve a moderate degree of reliability for this measure. This level of reliability is consistent with the reliability of other outcome measures in CMS quality-reporting and VBP programs, such as the 30-day Risk-Standardized All-Cause Acute Myocardial Infarction, Heart Failure, and Pneumonia Readmission and Mortality measures used in the Hospital IQR and VBP Programs. We therefore believe that facilities can be reliably scored on the proposed SRR measure.

We convened a technical expert panel (TEP) in May 2012 for the purpose of evaluating this measure, but the TEP did not reach a final consensus and declined to support the measure. Some members of the TEP were concerned that we did not risk-adjust for the nephrologist treating the patients, because actions taken by nephrologists can impact readmission rates. After reviewing the TEP’s arguments, we determined that the suggested risk adjustment for nephrologist care would constitute a reversal of CMS policy not to risk adjust for factors related to care for which the provider is responsible. We do not think that it is appropriate to risk-adjust the measure for the nephrologist because the nephrologist is part of the facility’s multi-disciplinary team, and medical directors, as employees of the dialysis facilities, are responsible for ensuring that appropriate care is provided by a multi-disciplinary team. The Measures Application Partnership reviewed this measure in February 2013 and supported the direction of the measure, advising CMS that the measure would require additional development prior to implementation. Subsequently, we released draft specifications for the measure to the public for a 30-day comment period and, based on comments received, finalized measure specifications in September 2013. We also, on a voluntary basis, provided individual dialysis facilities with a facility-specific report that calculated their SRR measure results and compared those results to SRR measure results at

the state and national level, as well as discharge-level data upon request. Facilities also had an opportunity to submit questions to CMS regarding the measure and their reports. We therefore believe that the proposed SRR measure risk-adjusts appropriately for patient condition and comorbidities at the start of care for which the facility is not responsible. We also believe that the measure is ready for adoption because, as explained above, it achieves a moderate degree of reliability.

Data Sources

The data we will use to calculate the proposed SRR measure come from various CMS-maintained data sources for ESRD patients including the CROWNWeb database, the CMS Annual Facility Survey (Form CMS-2744), Medicare claims, the CMS Medical Evidence Form (Form CMS-2728), transplant data from the Organ Procurement and Transplant Network (OPTN), the Death Notification Form (Form CMS-2746), the Nursing Home Minimum Dataset, and the Social Security Death Master File. These data sources include all Medicare-covered patients with ESRD. Information on hospitalizations is obtained from Medicare Inpatient Claims Standard Analysis Files (SAFs) and past-year comorbidity is obtained from Medicare Claims SAFs (inpatient, outpatient, physician/supplier, home health, hospice, and skilled nursing facility claims).

Outcome

The outcome for this measure is 30-day all-cause, unplanned readmission defined as a hospital readmission for any cause beginning within 30 days of the discharge date of an index discharge, with the exclusion of planned readmissions. This 30-day readmission period is consistent with other publicly reported readmission measures endorsed by NQF and currently implemented in the Hospital Inpatient Quality Reporting Program and Hospital Readmission Reduction Program, and reflects an industry standard.

Cohort

All discharges of Medicare ESRD dialysis patients from an acute care hospital in a calendar year are considered eligible for this measure, with the exception of the exclusions listed in the next section.

Inclusion and Exclusion Criteria

The proposed SRR measure excludes from the measure cohort

hospitalizations: (1) Where the patient died during the index hospitalization; (2) where the patient dies within 30 days of the index discharge with no readmission; (3) where the patient is discharged against medical advice; (4) where the patient was admitted with a primary diagnosis of certain conditions related to cancers, mental health conditions, or rehabilitation procedures (because these patients possess radically different risk profiles, and therefore cannot reasonably be compared to other patients discharged from hospitals); (5) where the patient is discharged from a PPS-exempt cancer hospital (because these hospitals care for a unique population of patients that cannot reasonably be compared to the patients admitted to other hospitals); (6) where the patient is transferred to another acute care hospital; and (7) where the patient has already been discharged 12 times during the same calendar year (to respond to concerns raised by the TEP that patients who are hospitalized this frequently during a calendar year could unduly skew the measure rates for small facilities).

Risk Adjustment

The measure adjusts for differences across facilities with regard to their patient case mix. Consistent with NQF guidelines, the model does not adjust for socioeconomic status or race, because risk adjusting for these characteristics would hold facilities with a large proportion of patients who are minorities and/or who have low socioeconomic status to a different standard of care than other facilities. One goal of this measure is to illuminate quality differences that such risk adjustment would obscure. As with the Hospital-Wide Readmission measure employed by the Hospital Readmissions Reduction program, the SRR employs a hierarchical logistic regression model to estimate the expected number of readmissions to an acute care hospital, taking into account the performance of all dialysis facilities, the discharging hospital, and the facility’s patient case-mix.

Although the SRR risk-adjustment model is generally aligned with the Hospital-Wide Readmission measure risk-adjustment methodology, we are proposing to modify it to account for comorbidities and patient characteristics relevant to the ESRD population. The proposed SRR measure includes the following patient characteristics as risk adjusters, which are obtained from the following data sources:

Risk adjustor	Data source
Sex	CMS Form 2728.
Age	REMIS database.
Years on ESRD	CMS Form 2728.
Diabetes as cause of ESRD	CMS Form 2728.
BMI at incidence of ESRD	CMS Form 2728.
Days hospitalized during index admission	Part A Medicare Inpatient Claims SAFs.
23 past-year comorbidities (e.g., cardiorespiratory failure/shock; drug and alcohol disorders).	Medicare Claims SAFs: Part A Inpatient, home health, hospice, and skilled nursing facility; and Part B Outpatient.
Discharged with any of 11 high-risk conditions (for example, cystic fibrosis, and hepatitis).	Part A Medicare Inpatient Claims SAFs.

More details on the risk-adjustment calculations, and the rationale for selecting these risk adjustors and not others, can be found at: http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/ESRDQIP/061_TechnicalSpecifications.html. We are proposing to risk adjust the proposed SRR measure based on sex, because we have determined that patients' sex affects the measure in ways that are beyond the control of dialysis facilities. We reached this determination by examining the effects of the risk adjusters, both independently and in combination, on rates of unplanned readmissions. This analysis yielded two conclusions. First, the analysis indicated that females are generally more likely than males to experience an unplanned readmission, even when accounting for the other risk adjusters. Second, the disparate effects of gender were substantially impacted by the effects of age: Females aged 15 to 45 were much more likely to experience an unplanned readmission than males of the same age, but this disparity was significantly reduced for men and women younger than 15 and older than 45. Based on these two conclusions, we believe that women in the 15–45 age range face a greater risk of experiencing an unplanned readmission, as compared to men of the same age with similar risk profiles. This does not appear to be a consequence of facility performance, however, because the disparity is not generally applicable to women, but only to a limited age group. We therefore believe it is essential to risk-adjust for sex to ensure that facilities with larger numbers of women aged 15 to 45 are not inappropriately disadvantaged, because not risk-adjusting for sex would potentially incentivize facilities to deny access to these individuals.

As indicated in the table above, the measure is risk-adjusted, in part, based on 23 comorbidities that develop in the year prior to the index hospitalization, as well as 11 high-risk conditions that are present at the time of the index discharge. These data are taken from Medicare claims submitted by hospitals,

dialysis facilities, and other types of long-term and post-acute care facilities.

We believe that this proposed approach to risk-adjusting the SRR measure is consistent with NQF guidelines for measure developers. NQF evaluates measures on the basis of four criteria: Importance, scientific acceptability, feasibility, and usability. The validity and reliability of a measure's risk-adjustment calculations fall under the "scientific acceptability" criterion, and Measure Evaluation Criterion 2b4 specifies NQF's preferred approach for risk-adjusting outcome measures (http://www.qualityforum.org/docs/measure_evaluation_criteria.aspx#scientific). This criterion states that patient comorbidities should only be included in risk-adjustment calculations if they are (1) present at the start of care and (2) not indicative of disparities or deficiencies in the quality of care provided. As indicated in the "Inclusion and Exclusion Criteria" subsection above, as well as the measure specifications that are currently under review at NQF, the start of care is defined as the index hospitalization. Accordingly, we believe that NQF Measure Evaluation Criterion 2b4 supports risk adjusting the proposed SRR measure on the basis of patient comorbidity data collected in the year prior to the index hospitalization, because these comorbidities are likely present at the start of care (that is, the date(s) that the patient spends in the hospital during the index hospitalization). For these reasons, we believe that the risk-adjustment methodology for the proposed SRR measure is consistent with NQF guidelines for measure developers and is appropriate for this measure.

Full documentation of the SRR risk-adjustment methodology is available at: http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/ESRDQIP/061_TechnicalSpecifications.html.

Calculating the SRR Measure

The SRR measure is calculated as the ratio of the number of observed

unplanned readmissions to the number of expected unplanned readmissions. Facilities that have more unplanned readmissions than would be expected for an average facility with a similar case-mix would have a ratio greater than one. Facilities having fewer unplanned readmissions than would be expected for an average facility with a similar case-mix would have a ratio less than one. This ratio calculation is consistent with that employed by one NQF-endorsed outcome measure for ESRD, the Standardized Hospitalization Ratio (NQF #1463).

Hospitalizations are counted as events in the numerator if they meet the definition of unplanned readmission—which is that they (a) occurred within 30 days of the index discharge and (b) are not preceded by a "planned" readmission that also occurred within 30 days of the index discharge. Planned readmissions are defined as readmissions that do not bear on the quality of care furnished by the dialysis facility, that occur as a part of ongoing appropriate care of patients, or that involve elective care. Building on the algorithm developed for the Hospital-Wide Readmission measure (NQF #1789), the proposed planned readmission list incorporates minor changes appropriate to the ESRD population as suggested by technical experts. The full planned readmission list and algorithm are available at: http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/ESRDQIP/061_TechnicalSpecifications.html. In general, a readmission is considered "planned" under two scenarios.

1. The patient undergoes a procedure that is always considered planned (example, bone marrow transplant) or has a primary diagnosis that always indicates the hospitalization is planned (for example, maintenance chemotherapy).

2. The patient undergoes a procedure that may be considered planned if it is not accompanied by an acute diagnosis. For example, a hospitalization involving a heart-valve procedure accompanied by

a primary diagnosis of acute myocardial infarction would be considered unplanned, whereas a hospitalization involving a heart-valve procedure accompanied by a primary diagnosis of diabetes would be considered planned (because acute myocardial infarction is a plausible alternative acute indication for hospitalization).

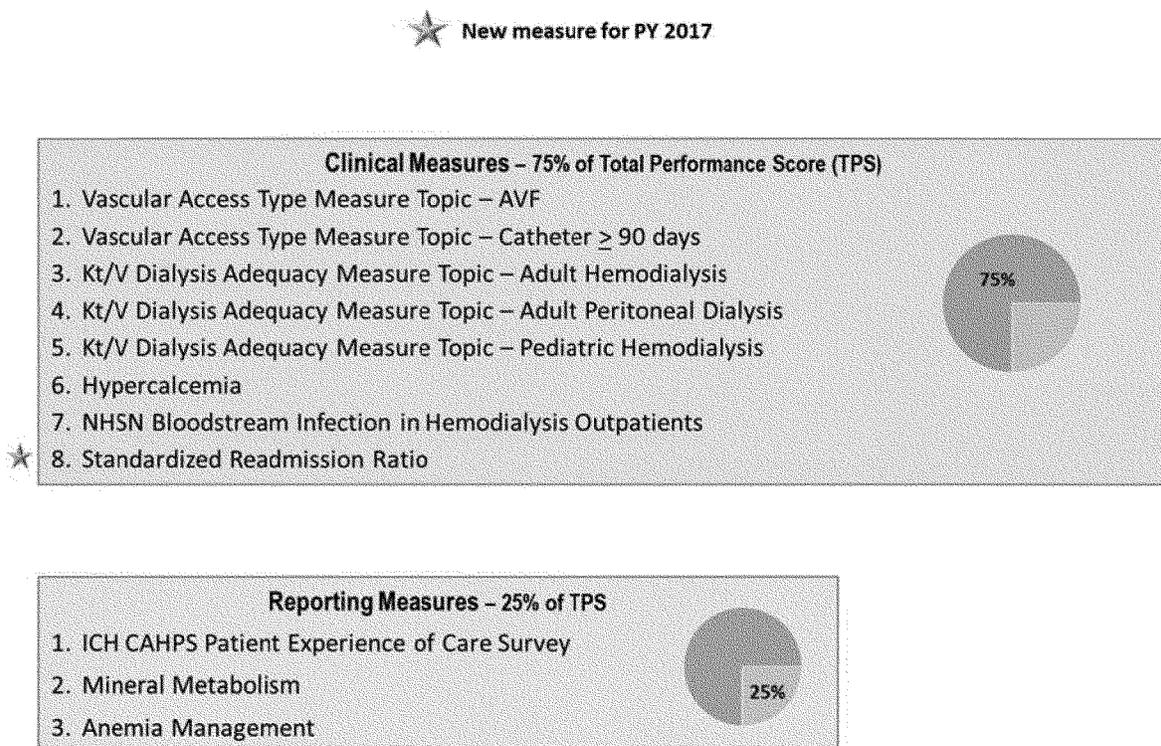

The expected number of readmissions is calculated using hierarchical logistic modeling (HLM). This approach accounts for the hospital from which the patient was discharged and the patient case mix (as defined by factors such as

age, sex, and patient comorbidities), as well as the national median performance of all dialysis facilities. The HLM is an appropriate statistical approach to measuring quality based on patient outcomes when patients are clustered within facilities (and therefore the patients' outcomes are not statistically independent), and when the number of qualifying patients for the measure varies from facility to facility. The HLM approach is also currently used to calculate readmission and mortality measures that are used in several quality-reporting and VBP

programs by CMS, such as the Heart Failure and Pneumonia Mortality measures in the Hospital IQR and Hospital VBP Programs.

The proposed SRR measure is a point estimate—the best estimate of a facility's readmission rate based on the facility's case mix. For more information on the proposed calculation methodology, please refer to our Web site at: http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/ESRDQIP/061_TechnicalSpecifications.html.

Figure 1: Summary of Proposed PY 2017 Measure Set

3. Proposed Performance Period for the PY 2017 ESRD QIP

Section 1881(h)(4)(D) of the Act requires the Secretary to establish the performance period with respect to a payment year, and that the performance period occur prior to the beginning of such year. In the CY 2013 ESRD PPS Final Rule (77 FR 67500), we stated our belief that, for most measures, a 12-month performance period is the most appropriate for the program because this period accounts for any potential seasonal variations that might affect a facility's score on some of these measures, and also provides adequate incentive and feedback for facilities and

Medicare beneficiaries. CY 2015 is the latest period of time during which we can collect a full 12 months of data and still implement the PY 2017 payment reductions. Therefore, we propose to establish CY 2015 as the performance period for PY 2017 ESRD QIP.

We seek comments on this proposal.

4. Proposed Performance Standards, Achievement Thresholds, and Benchmarks for the PY 2017 ESRD QIP

We are proposing to adopt performance standards for the PY 2017 ESRD QIP measures similar to those we finalized for PY 2016 (78 FR 72211 through 72213). Section 1881(h)(4)(A) of the Act provides that “the Secretary

shall establish performance standards with respect to measures selected . . . for a performance period with respect to a year.” Section 1881(h)(4)(B) of the Act further provides that the “performance standards . . . shall include levels of achievement and improvement, as determined appropriate by the Secretary.” We use the performance standards to establish the minimum score a facility must achieve to avoid a Medicare payment reduction. We use achievement thresholds and benchmarks to calculate scores on the clinical measures.

a. Proposed Performance Standards, Achievement Thresholds, and Benchmarks for the Clinical Measures in the PY 2017 ESRD QIP

With the exception of the NHSN Bloodstream Infection clinical measure, we propose to set the performance standards, achievement thresholds, and benchmarks for the PY 2017 clinical measures at the 50th, 15th, and 90th percentile, respectively, of national performance in CY 2013, because this will give us enough time to calculate and assign numerical values to the proposed performance standards for the PY 2017 program prior to the beginning of the performance period. We continue to believe that these standards will provide an incentive for facilities to continuously improve their performance, while not reducing incentives to facilities that score at or

above the national performance rate for the clinical measures. As stated in the CY 2014 ESRD PPS Final Rule (78 FR 72213 through 72215), CY 2014 is the first year for which we will have data for the NHSN Bloodstream Infection clinical measure. Accordingly, we propose to set the performance standard, achievement threshold, and benchmark for the NHSN Bloodstream Infection clinical measure based on the 50th, 15th, and 90th percentiles, respectively, of national performance in CY 2014.

We seek comments on these proposals.

b. Estimated Performance Standards, Achievement Thresholds, and Benchmarks for the Clinical Measures Proposed for the PY 2017 ESRD QIP

At this time, we do not have the necessary data to assign numerical

values to the proposed performance standards, achievement thresholds, and benchmarks for the clinical measures, because we do not yet have complete data from CY 2013. Nevertheless, we are able to estimate these numerical values based on the most recent data available. For all of the proposed clinical measures except the proposed SRR measure, this partial data comes from the period of January through December 2013. For the proposed SRR measure, this partial data comes from the period of January through December 2012. In Table 25, we have provided the estimated numerical values for all of the proposed PY 2017 ESRD QIP clinical measures except the NHSN Bloodstream Infection clinical measure. We will publish updated values for the clinical measures, using data from the first part of CY 2014, in the CY 2015 ESRD PPS final rule.

TABLE 25—ESTIMATED NUMERICAL VALUES FOR THE PERFORMANCE STANDARDS FOR THE PY 2017 ESRD QIP CLINICAL MEASURES USING THE MOST RECENTLY AVAILABLE DATA

Measure	Performance standard	Achievement threshold	Benchmark
Vascular Access Type:			
%Fistula	64.49%	52.43%	78.64%
%Catheter	9.9%	18.36%	3.21%
Kt/V:			
Adult Hemodialysis	93.65%	86.97%	97.55%
Adult Peritoneal Dialysis	87.50%	70.42%	95.74%
Pediatric Hemodialysis	92.48%	79.55%	97.98%
Hypercalcemia	1.32%	4.78%	0.00%
NHSN Bloodstream Infection	50th percentile of eligible facilities' performance during CY 2014.	15th percentile of eligible facilities' performance during CY 2014.	90th percentile of eligible facilities' performance during CY 2014.
Standardized Readmission Ratio ..	0.996	1.242	0.658

We believe that the ESRD QIP should not have lower performance standards than in previous years. In accordance with our statements in the CY 2012 ESRD PPS final rule (76 FR 70273), if the final numerical value for a performance standard, achievement threshold, and/or benchmark is worse than it was for that measure in the PY 2016 ESRD QIP, then we propose to substitute the PY 2016 performance standard, achievement threshold, and/or benchmark for that measure.

We seek comments on this proposal.

c. Proposed Performance Standards for the PY 2017 Reporting Measures

In the CY 2014 ESRD PPS Final Rule, we finalized performance standards for the Anemia Management, Mineral Metabolism, and ICH CAHPS reporting measures (78 FR 72213). We are proposing to continue to use these performance standards for these measures in the PY 2017 ESRD QIP. We seek comments on this proposal.

5. Proposal for Scoring the PY 2017 ESRD QIP Measures

a. Scoring Facility Performance on Clinical Measures Based on Achievement

In the CY 2014 ESRD PPS Final Rule, we finalized a policy for scoring performance on clinical measures based on achievement (78 FR 72215). In determining a facility's achievement score for each measure under the PY 2017 ESRD QIP, we propose to continue using this methodology for all clinical measures. Under this methodology, facilities receive points along an achievement range based on their performance during the proposed performance period for each measure, which we define as a scale between the achievement threshold and the benchmark.

b. Scoring Facility Performance on Clinical Measures Based on Improvement

In the CY 2014 ESRD PPS Final Rule, we finalized a policy for scoring

performance on clinical measures based on improvement (78 FR 72215 through 72216). In determining a facility's improvement score for each measure under the PY 2017 ESRD QIP, we propose to continue using this methodology for all clinical measures. Under this methodology, facilities receive points along an improvement range, defined as a scale running between the improvement threshold and the benchmark. We propose to define the improvement threshold as the facility's performance on the measure during CY 2014. The facility's improvement score would be calculated by comparing its performance on the measure during CY 2015 (the proposed performance period) to its performance rate on the measure during CY 2014.

6. Weighting the Total Performance Score

We continue to believe that while the reporting measures are valuable, the clinical measures evaluate actual patient care and therefore justify a higher

combined weight (78 FR 72217). We are therefore not proposing to change our policy, finalized most recently in the CY 2014 ESRD PPS (78 FR 72217), to weight clinical measures as 75 percent and reporting measures as 25 percent of the TPS. We are also not proposing any changes to the policy that facilities must be eligible to receive a score on at least one reporting measure and at least one clinical measure to be eligible to receive a TPS, or the policy that a facility's TPS will be rounded to the nearest integer, with half of an integer being rounded up.

7. Proposed Minimum Data for Scoring Measures for the PY 2017 ESRD QIP and Proposal for Changing Attestation Process for Patient Minimums

For the same reasons described in the CY 2013 ESRD PPS final rule (77 FR 67510 through 67512), for PY 2017 we propose to only score facilities on clinical and reporting measures for which they have a minimum number of qualifying patients during the performance period. Our current policy is that a facility must treat at least 11 qualifying patients during the performance period in order to be scored on a clinical measure (77 FR 67510 through 67511). We are not proposing any changes to this policy.

However, with respect to the proposed SRR measure, we propose that facilities with fewer than 11 index discharges will not be eligible to receive a score on that measure. We considered proposing to adopt the 11 qualifying patient minimum that we use for the other clinical measures. We decided, however, to base facility eligibility for the measure on the number of index discharges attributed to a facility, because the measure calculations are determined by the number of index discharges, adjusted for patient case-mix. We decided to set the minimum number of index discharges at 11 because this is consistent with reporting for the proposed SRR measure during the dry run conducted earlier this year, as well as with the implementation of outcome measures in the Hospital Readmission Reduction Program, which

base case minimums on the number of index discharges attributable to the facility.

Additionally, for the proposed SRR measure, we propose to apply the small-facility adjuster to facilities that treat 41 or fewer index discharges because we determined that this was the minimum number of index discharges needed to achieve an IUR of 0.4 (that is, moderate reliability) for the proposed SRR measure. Because the small-facility adjuster gives facilities the benefit of the doubt when measure scores can be unduly influenced by a few outlier patients, we believe that setting the threshold at 41 index discharges will not unduly penalize facilities that treat small numbers of patients.

In the CY 2014 ESRD PPS Final Rule, we finalized that the case minimum for the Mineral Metabolism and Anemia Management reporting measures is one, and that facilities that treat one qualifying patient could attest to this in CROWNWeb in order to avoid being scored on the measures (78 FR 72197 through 72199 and 72220 through 72221). In the process of responding to questions from facilities about the attestation requirements for the PY 2015 program, however, we found that facilities were confused by this requirement. For this reason, we propose to remove the option for facilities to attest that they did not meet the case minimum for these measures. Accordingly, facilities that meet the case minimum of one qualifying patient would be scored on these measures, facilities with between 2 and 11 qualifying patients would be required to report data for all but one qualifying patient, and facilities with 11 or more qualifying patients would be required to report data for all patients. Due to facility confusion with the attestation process, we also propose to remove the option for facilities to attest that they did not meet the case minimum for the ICH CAHPS survey reporting measure. As we stated above, we are not proposing any further changes to the 30 survey-eligible case minimum for this measure. We are proposing that the ESRD QIP program will determine

facility eligibility for these measures based on available data submitted to CROWNWeb, in Medicare claims, and to other CMS administrative data sources.

We seek comments on this proposal.

We are proposing to continue our policies that govern when a newly opened facility would be eligible to be scored on measures as follows.

- Facilities with a CCN open date on or after July 1 of the performance period (for PY 2017, this would be July 1, 2015) are not eligible to be scored on any reporting measures except the ICH CAHPS reporting measure.

- Facilities with a CCN open date on or after January 1 of the performance period (for PY 2017, this would be January 1, 2015) are not eligible to receive a score on the ICH CAHPS reporting measure in the PY 2017 program, due to the time it takes to contract with a CMS-approved third-party vendor to administer the survey.

- Facilities are eligible to receive a score on all of the clinical measures except the NHSN Bloodstream Infection clinical measure if they have a CCN open date at any time before the end of the performance period.

- Facilities with a CCN open date after January 1 of the performance period (for PY 2017, this would be January 1, 2015) are not eligible to receive a score on the NHSN Bloodstream Infection clinical measure, due to the need to collect 12 months of data to accurately score the measure.

We are also proposing to continue our policy that a facility will not receive a TPS unless it receives a score on at least one clinical measure and at least one reporting measure. We note that as a result, facilities will not be eligible for a payment reduction under the PY 2017 ESRD QIP if they have a CCN open date on or after July 1, 2015.

We seek comments on these proposals.

Table 26 displays the proposed patient minimum requirements for each of the reporting measures, as well as the CCN open dates after which a facility will not be eligible to receive a score on a reporting measure.

TABLE 26—PROPOSED MINIMUM DATA REQUIREMENTS FOR THE PY 2017 ESRD QIP

Measure	Minimum data requirements	CCN Open date	Small facility adjuster
Adult Hemodialysis Adequacy (Clinical).	11 qualifying patients	N/A	11–25 patients.
Adult Peritoneal Dialysis Adequacy (Clinical).	11 qualifying patients	N/A	11–25 patients.
Pediatric Hemodialysis Adequacy (Clinical).	11 qualifying patients	N/A	11–25 patients.

TABLE 26—PROPOSED MINIMUM DATA REQUIREMENTS FOR THE PY 2017 ESRD QIP—Continued

Measure	Minimum data requirements	CCN Open date	Small facility adjuster
Vascular Access Type: Catheter (Clinical).	11 qualifying patients	N/A	11–25 patients.
Vascular Access Type: Fistula (Clinical).	11 qualifying patients	N/A	11–25 patients.
Hypercalcemia (Clinical)	11 qualifying patients	N/A	11–25 patients.
NHSN Bloodstream Infection (Clinical).	11 qualifying patients	On or before January 1, 2015.	11–25 patients.
SRR (Clinical)	11 index discharges	N/A	11–41 index discharges.
ICH CAHPS (Reporting)	Facilities with 30 or more survey-eligible patients during the calendar year preceding the performance period must submit survey results. Facilities will not receive a score if they do not obtain a total of at least 30 completed surveys during the performance period.	Before January 1, 2015	N/A.
Anemia Management (Reporting).	Facilities with 11 or more qualifying patients must report data for all patients. Facilities with between 2 and 11 qualifying patients must report data on all but 1 qualifying patient. Facilities with 1 qualifying patient must report for that patient.	Before July 1, 2015	N/A.
Mineral Metabolism (Reporting).	Facilities with 11 or more qualifying patients must report data for all patients. Facilities with between 2 and 11 qualifying patients must report data on all but 1 qualifying patient. Facilities with 1 qualifying patient must report for that patient.	Before July 1, 2015	N/A.

8. Proposed Payment Reductions for the PY 2017 ESRD QIP

Section 1881(h)(3)(A)(ii) of the Act requires the Secretary to ensure that the application of the scoring methodology results in an appropriate distribution of payment reductions across facilities, such that facilities achieving the lowest TPSs receive the largest payment reductions. For PY 2017, we are proposing that a facility will not receive a payment reduction if it achieves a minimum TPS that is equal to or greater than the total of the points it would have received if:

- It performed at the performance standard for each clinical measure;
- It received zero points for each clinical measure that does not have a numerical value for the performance standard established through the rulemaking process before the beginning of the PY 2017 performance period; and
- It received 10 points (which is the 50th percentile of facility performance on the PY 2015 reporting measures) for each reporting measure.

We recognize that these conditions are more stringent than the conditions used to establish the minimum TPS in the PY 2016 ESRD QIP, because this proposal increases the number of points a facility would have to receive on each reporting measure from 5 to 10. The PY 2015 program is the most recent year for which we will have calculated final measure scores before the beginning of the proposed performance period for PY 2017 (i.e., CY 2015). We note that facility performance on the Anemia

Management, Mineral Metabolism, NHSN Dialysis Event, and ICH CAHPS reporting measures in the PY 2015 program is so high that the median score on each of the measures was 10 points. We are proposing to increase the number of points a facility would have to achieve for each reporting measure to the 50th percentile of facility performance on the PY 2015 reporting measures (i.e., the average of the median scores for each reporting measure), because a score of 5 on each of these reporting measures is indicative of a below-average performance, and we want to incentivize facilities to provide above-average care.

We seek comments on this proposal. Section 1881(h)(3)(A)(ii) of the Act requires that facilities achieving the lowest TPSs receive the largest payment reductions. In the CY 2014 ESRD PPS Final Rule (78 FR 72223 through 72224), we finalized a payment reduction scale for PY 2016 and future payment years, such that for every 10 points a facility falls below the minimum TPS, the facility would receive an additional 0.5 percent reduction on its ESRD PPS payments, with a maximum reduction of 2.0 percent. We are not proposing any changes to this policy at this time.

Because we are not yet able to calculate the performance standards for each of the clinical measures, we are likewise not able to calculate the minimum TPS at this time. Based on the estimated performance standards listed above, we estimate that a facility must meet or exceed a minimum TPS of 58

for PY 2017. For all of the clinical measures except the NHSN Bloodstream Infection clinical measure, these data come from CY 2013. For the NHSN Bloodstream Infection clinical measure, we set the performance standard to zero for purposes of this estimate, because we are not able to establish a numerical value for the performance standard through the rulemaking process before the beginning of the PY 2017 performance period. We are proposing that facilities failing to meet the minimum TPS, as established in the CY 2015 ESRD PPS Final Rule, will receive payment reductions based on the estimated TPS ranges indicated in Table 27 below.

TABLE 27—ESTIMATED PAYMENT REDUCTION SCALE FOR PY 2017 BASED ON THE MOST RECENTLY AVAILABLE DATA FROM CY 2013

Total performance score	Reduction (%)
100–58	0
57–48	0.5
47–38	1.0
37–28	1.5
27–0	2.0

9. Proposal for Data Validation

One of the critical elements of the ESRD QIP's success is ensuring that the data submitted to calculate measure scores and TPSs are accurate. We began a pilot data-validation program in CY 2013 for the ESRD QIP, and we have

procured the services of a data-validation contractor that is tasked with validating a national sample of facilities' records as they report CY 2014 data to CROWNWeb. Our first priority was to develop a methodology for validating data submitted to CROWNWeb under the pilot data-validation program, and this continues to be our goal. Once this methodology has been fully developed, we will propose to adopt it through the rulemaking process. For the PY 2016 ESRD QIP (78 FR 72223 through 72224), we finalized a requirement to sample approximately 10 records from 300 randomly selected facilities; these facilities will have 60 days to comply once they receive requests for records. We are proposing to continue this pilot for the PY 2017 ESRD QIP. Under this continued validation study, we will sample the same number of records (approximately 10 per facility) from the same number of facilities (that is, 300) during CY 2015. If a facility is randomly selected to participate in the pilot validation study but does not provide CMS with the requisite medical records within 60 days of receiving a request, then we propose to deduct 10 points from the facility's TPS. Once we have developed and adopted a methodology for validating the CROWNWeb data, we intend to consider whether payment reductions under the ESRD QIP should be based, in part, on whether a facility has met our standards for data validation.

We seek comments on this proposal.

We are also proposing a feasibility study for validating data reported to CDC's NHSN Dialysis Event Module for the NHSN Bloodstream Infection clinical measure. HAIs are relatively rare, and we are proposing that the feasibility study would target records with a higher probability of including a dialysis event, because this would enrich the validation sample while reducing the burden on facilities. The methodology for this proposed feasibility study would resemble the methodology used by the Hospital Inpatient Quality Reporting Program to validate the central line-associated bloodstream infection measure, the catheter-associated urinary tract infection measure, and the surgical site infection measure (77 FR 53539 through 53553).

Specifically, we propose to randomly select nine facilities to participate in the feasibility study. A CMS contractor will send these facilities quarterly requests for lists of all positive blood cultures drawn from its patients during the quarter, including any positive blood cultures that were collected from the facility's patients on the day of, or the

day following, their admission to a hospital. Facilities will have 60 days to respond to quarterly requests for lists of positive blood cultures. A CMS contractor will then develop a methodology for determining when a positive blood culture qualifies as a "candidate dialysis event," and is therefore appropriate for further validation. Once the contractor determines a methodology for identifying candidate dialysis events, the contractor will analyze the records of patients who had a positive blood culture in order to determine if the facility reported dialysis events for those patients in accordance with the NHSN Dialysis Event Protocol. If the contractor determines that additional medical records are needed from a facility to validate whether the facility accurately reported the dialysis events, then the contractor will send a request for additional information to the facility, and the facility will have 60 days from the date of the letter to respond to the request. Overall, we estimate that, on average, quarterly lists will include two positive blood cultures per facility, but we recognize these estimates may vary considerably from facility to facility. If a facility is randomly selected to participate in the feasibility study but does not provide CMS with the requisite lists of positive blood cultures or the requisite medical records within 60 days of receiving a request, then we propose to deduct 10 points from the facility's TPS.

The goals of the proposed feasibility study will be five-fold: (1) To estimate the burden and associated costs to facilities of validating the NHSN Bloodstream Infection clinical measure; (2) to assess the costs to CMS to validate this measure; (3) to develop a methodology for identifying candidate dialysis events from lists of positive blood cultures; (4) to develop a methodology for determining whether a facility accurately reported dialysis events under the NHSN Bloodstream Infection clinical measure; and (5) to reach some preliminary conclusions about whether facilities are accurately reporting data under the NHSN Bloodstream Infection clinical measure. Based on the results of this study, we will consider the feasibility of proposing in future rulemaking to validate the NHSN Bloodstream Infection clinical measure for all facilities.

We seek comments on this proposal.

10. Proposal To Monitor Access to Dialysis Facilities

Public comments on the proposal to adopt the Standardized Hospitalization Ratio measure in the PY 2014 ESRD QIP

(76 FR 70267) expressed concerns that "the measure may lead to 'cherry-picking' of patients based on their risk of hospitalizations, causing access to care issues for patients with more severe illness." We share commenters' concerns about the SHR measure, and we believe that these concerns equally apply to other outcome measures proposed for the ESRD QIP. We recognize that, in general, inadequate risk adjustment in outcome measure calculations can create an incentive for facilities to deny services to sicker patients, because these patients' illnesses would not be properly accounted for in the risk-adjustment calculations. We believe that outcome measures proposed and adopted for the ESRD QIP properly risk adjust for patients with severe illnesses, but we remain concerned that misperceptions to the contrary might negatively impact access to dialysis therapy.

Since we are proposing to adopt the SRR clinical measure for the PY 2017 program, and below we are proposing to adopt the STR clinical measure for the PY 2018 program, we propose to initiate a monitoring program focused on access to dialysis therapy. This program would compare dialysis data before and after the adoption of an outcome measure, looking for changes in admission and discharge practices, as well as changes in rates and patterns of involuntary discharges. Specifically, this program would assess and analyze the characteristics of beneficiaries admitted to dialysis centers (stratified by location, size, and setting) in order to determine when and if selective admission and discharge practices are coupled with negative patient attributes and trends over time. We believe this program will enable us to identify patterns that are indicative of diminished access to dialysis therapy.

We seek comments on this proposal.

11. Proposed Extraordinary Circumstances Exception

Many comments on the CY 2014 ESRD PPS proposed rule included the recommendation to exempt a facility from all the requirements of the ESRD QIP clinical and reporting measures during the time the facility was forced to close temporarily due to a natural disaster or other extraordinary circumstances. In response to these comments, we agreed that "there are times when facilities are unable to submit required quality data due to extraordinary circumstances that are not within their control, and we do not wish to penalize facilities for such circumstances or unduly increase their

burden during these times” (78 FR 72209).

Section 1881(h)(3)(A)(i) of the Act states, “[T]he Secretary shall develop a methodology for assessing the total performance of each provider of services and renal dialysis facility based on performance standards with respect to the measures selected under paragraph (2) for a performance period established under paragraph (4)(D).” Given the possibility that facilities could be unfairly penalized for circumstances that are beyond their control, we believe the best way to implement an extraordinary circumstances exception is under the authority of this section. We are therefore proposing to interpret section 1881(h)(3)(A)(i) of the Act to enable us to configure the methodology for assessing facilities’ total performance such that we will not require a facility to submit, nor penalize a facility for failing to submit, data on any ESRD QIP quality measure data from any month in which a facility is granted an extraordinary circumstances exception.

Under this policy, we propose that, in the event of extraordinary circumstances not within the control of the facility (such as a natural disaster), for the facility to receive consideration for an exception from all ESRD QIP requirements during the period in which the facility was closed, the facility would need to submit a CMS Disaster Extension/Exception Request Form through www.qualitynet.org within 90 calendar days of the date of the disaster or extraordinary circumstance. We are proposing that the facility would need to provide the following information on the form:

- Facility CCN;
- Facility name;
- CEO name and contact information;
- Additional contact name and contact information;
- Reason for requesting an exception;
- Dates affected;
- Date facility will start submitting data again, with justification for this date; and
- Evidence of the impact of the extraordinary circumstances, including but not limited to photographs, newspaper, and other media articles.

Incomplete forms will be returned to the facility without further review of their content. We will evaluate the request and provide the facility with a response. If we determine that the facility was, in fact, closed for a period of time due to extraordinary circumstances, then we will exempt the facility from the ESRD QIP requirements for any month during which the facility was closed due to the extraordinary circumstances. As such, a facility

granted a temporary exception will be scored on each measure only for the months during a performance period not covered by the exception. For example, if a facility is granted an extraordinary circumstances exception for the time period between January 15 and February 15, 2015, then the facility will not be required to report, and will not be penalized for not reporting, data on any ESRD QIP measure data for January and February of CY 2015. The effect of this proposal is that if a facility, because it has been granted an exception, cannot meet the reporting requirements that apply to a measure, the facility will not receive a score on the measure. For example, if a facility is granted an extraordinary circumstances exception for February 2015, then that facility would not be scored on the NHSN Bloodstream Infection clinical measure for the applicable payment year, because this measure requires facilities to submit 12 months of data in order to avoid receiving zero points on the measure.

This policy does not preclude us from granting exceptions to facilities that have not requested them when we determine that an extraordinary circumstance (for example, a hurricane or other act of nature) affects an entire region or locale. If we make the determination to grant an exception to facilities in a region or locale, then we propose to communicate this decision through routine communication channels to facilities, vendors, and Networks, including but not limited to issuing memoranda, emails, and notices on a CMS-approved Web site.

We seek comments on this proposal.

G. Proposed Requirements for the PY 2018 ESRD QIP

1. Proposal To Modify the Mineral Metabolism Reporting Measure Beginning in PY 2018

In the CY 2013 ESRD QIP, we adopted a reporting measure focused on mineral metabolism, which was based in part on NQF #0255 (77 FR 67487 through 67487). In the CY 2014 ESRD PPS, we finalized two revisions to the Mineral Metabolism reporting measure: (1) To include home peritoneal dialysis patients in the measure; and (2) to remove serum calcium reporting from the measure because of its reporting under the Hypercalcemia clinical measure (78 FR 72197 through 72198). Accordingly, in order to meet the requirements for the Mineral Metabolism reporting measure, facilities currently must report serum phosphorus values for each qualifying patient

treated at the facility on a monthly basis.

Since the publication of the CY 2014 ESRD PPS final rule, members of the renal community requested an ad hoc NQF review of measure #0255, focusing in particular on whether the measure should be updated to allow for the reporting of plasma phosphorus data. The NQF Consensus Standards Approval Committee (CSAC) reviewed the measure and recommended that the phosphorus reporting measure (NQF #0255) be modified to allow for the reporting of plasma phosphorus data as an alternative to serum phosphorus data. Although our TEP reviewed this issue and concluded that measure #0255 should remain unchanged, we concur with the CSAC’s recommendation due to the CSAC’s ad hoc review of lab data demonstrating the equivalency of plasma and serum measurements of phosphorus, as well as an additional concurrent internal review of the data by CMS and our measure development contractor. We are in agreement with the CSAC that readings of phosphorus using either plasma or serum are appropriate for the measure. As the measure developer for NQF #255, we are also in the process of revising the specifications for that measure and plan to submit the revised measure specifications to the NQF for endorsement. We believe the change to these specifications is non-substantive because plasma readings are an alternative method of reporting on phosphorus data and, as we state above, are roughly equivalent to serum phosphorus readings.

We considered proposing to allow facilities to report plasma phosphorus data for the Mineral Metabolism reporting measure in the PY 2017 program, but we have determined that it is not operationally feasible to configure the relevant data fields in CROWNWeb to accept plasma phosphorus readings prior to January 1, 2015, the beginning of the performance period for that program year. For this reason, we propose to modify the measure specifications for the Mineral Metabolism reporting measure to allow facilities to report either serum phosphorus data or plasma phosphorus data, beginning with the PY 2018 program. We further clarify that we are not proposing any other changes to the measure specifications for the Mineral Metabolism reporting measure.

2. Proposed New Measures for the PY 2018 ESRD QIP and Future Payment Years

For the PY 2018 ESRD QIP, we are proposing to continue to use all of the

measures proposed for the PY 2017 ESRD QIP, with the exception of the ICH CAHPS reporting measure, which we are proposing to convert to a clinical measure. We are also proposing to adopt
