

that the proposed rule changes, like other price improvement programs currently offered by competing exchanges, will benefit investors by attracting more order flow as well as increasing the frequency that Trading Permit Holders submit orders to Auction, which may result in greater opportunity for price improvement for customers. Moreover, the proposed rule change is consistent with the Rules of other exchanges. With respect to the proposed clarifying additions and typographical corrections to Rule 6.74A, the Exchange believes that the proposed changes will benefit market participants by adding additional transparency and clarity to the Rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes are meant to more fairly distribute the order allocation when there are only two counterparties to an Auction auto-match order. The Exchange does not believe that this change will discourage any market participants from entering into the AIM, as the auto-match option of the AIM is more aggressive in terms of risk and therefore, increasing the allocation to up to 50% of the remainder for the Initiating Trading Permit Holder when there is only one competing order at the final price level is a more fair and reasonable allocation mechanism and would likely only increase the number of Trading Permit Holders that select the auto-match option to initiate Auctions.

Furthermore, the Exchange notes that the proposed rule change is a competitive response to similar provisions in the price improvement auction rules of BOX, PHLX and NYSE MKT.¹⁷ The Exchange believes this proposed rule change is necessary to permit fair competition among the options exchanges and to establish more uniform price improvement auction rules on the various exchanges. The Exchange is also seeking the proposed rule change to align the allocation priorities for AIM single-price and auto-match submissions for Initiating Trading Permit Holders when there is only one competing order at the final price level within its rules. As mentioned earlier, auto-match submissions carry more risk than single-price submissions and as a result, should be given at least the same

allocation priority as single-price submissions. The Exchange believes this proposed rule change is necessary to permit fair competition among the options exchanges and to establish more uniform price improvement auction rules on the various exchanges.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

A. Significantly affect the protection of investors or the public interest;

B. impose any significant burden on competition; and

C. become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁸ and Rule 19b-4(f)(6)¹⁹ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

SSA requests respondents fill out Form SSA-8510, allowing SSA to contact a public or private custodian of records on behalf of an applicant or recipient of an SSA program to request evidence information which may support a benefit application or payment continuation. We ask for evidence information such as the following:

- Age requirements (e.g. birth certificate, court documents).

Once the respondent completes the SSA-8510, either using the paper form, or using the Modernized Supplemental Security Income Claims System (MSSICS) version, SSA uses the form as the authorization to obtain personal information regarding the respondent from third parties until the authorizing person (respondent) revokes the permission of its usage. The collection is voluntary; however, failure to verify the individuals' eligibility can prevent SSA from making an accurate and timely decision for their benefits. The respondents are individuals who may file for, or currently receive, Social Security benefits, SSI payments, or Medicare Part D subsidies.
