The universe of information collection proposed for HPOG Next Gen includes the HPOG Next Gen Participant Accomplishment and Grant Evaluation System (PAGES). PAGES is a performance management system that will collect information from all grantees on their programs and

participants on a semi-annual basis over the grant period of performance and intake information on eligible applicants (both treatment and control) through baseline data collection. The data system will meet the performance data needs of the HPOG Next Gen grantees and of the ACF Office of Family Assistance to monitor the performance of the grants and prepare the report to Congress on the grants, as well as support an impact study, a

coordinated Tribal evaluation, and other future research and evaluation efforts sponsored by ACF.

Respondents: Grantee- and participant-level data to be collected by program staff in the approximately 40 grantee organizations (higher education institutions, workforce investment boards, private training institutions, nonprofit organizations, and tribal entities). Applicants at the 40 grantee organizations.
