

Frequency of response: Initially, occasionally, semiannually and annually.

Total estimated burden: 2,800 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$285,000 (per year), includes \$0 for both annualized capital and operation & maintenance costs.

Changes in the Estimates: There is a small adjustment decrease in burden from the previous ICR because we have modified the calculation methodology associated with the five-year repeat performance test requirement. The previous ICR assumed all 14 sources will have to conduct the performance test during the ICR renewal period. Since this requirement only occurs once every five years, we have revised the estimates to reflect this frequency: (14 sources)/(5 years) = 2.8 sources per year. This results in a decrease in the respondent burden.

There is also an increase of six responses due to a correction. The previous ICR did not account for the five-year performance test notifications and reports in calculating the number of responses.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "NESHAP for Inorganic Arsenic Emissions from Glass Manufacturing Plants (40 CFR part 61, subpart N) (Renewal)" (EPA ICR No. 1081.11, OMB Control No. 2060-0043) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through May 31, 2015. Public comments were previously requested via the **Federal**

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 61, subpart A, and any changes, or additions to the General Provisions specified at 40 CFR part 61, subpart N. Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to

maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities: Glass manufacturing plants.

Respondent's obligation to respond: Mandatory (40 CFR part 61, subpart N).

Estimated number of respondents: 16 (total).

Frequency of response: Initially, occasionally, semiannually and annually.

Total estimated burden: 3,100 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$365,000 (per year), includes \$56,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in the respondent burden hours in this ICR compared to the previous ICR. However, there is an adjustment increase in the estimated labor costs from using more updated labor rates. In addition, there is an adjustment increase in the Agency burden due to a correction. The previous ICR underestimated the number of uncontrolled arsenic emission rate reports reviewed by the Agency. These reports are submitted by 15 of the 16 subject sources. This ICR assumes the Agency reviews reports submitted by all 15 sources.
