National Institutes of Health

Proposed Collection; 60-Day Comment Request; Population Sciences Biospecimen Catalog

AGENCY: National Cancer Institute (NCI), National Institutes of Health (NIH), Department of Health and Human Services.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, for opportunity for public comment on proposed data collection projects, the National Cancer Institute (NCI), National Institutes of Health (NIH), will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

DATES: *Comment Due Date:* Comments regarding this information collection are best assured of having their full effect if received within 60 days of the date of this publication.

FOR FURTHER INFORMATION CONTACT: *To Submit Comments and for Further Information:* To obtain a copy of the data collection plans and instruments, submit comments in writing, or request more information on the proposed project, contact: Danielle Carrick, Program Director, Division of Cancer Control and Population Sciences (DCCPS), National Cancer Institute, 9609 Medical Center Dr., Room 4E224, Rockville, MD 20850 or call non-toll-free number (240) 276-6749 or Email your request, including your address to: Danielle.Carrick@nih.gov. Formal

requests for additional plans and instruments must be requested in writing

SUPPLEMENTARY INFORMATION: Written comments and/or suggestions from the public and affected agencies are invited on one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed Collection: Population Sciences Biospecimen Catalog (PSBC) (NCI), 0925—NEW, National Cancer Institute (NCI), National Institutes of Health (NIH).

Need and Use of Information Collection: This is a request for approval of a new collection. The National Cancer Institute (NCI) Division of Cancer Control and Population Sciences (DCCPS) has previously demonstrated that approximately 60% of population based studies funded by the division use existing biospecimens from other collections, and that those studies are more cost and time efficient than studies collecting new specimens. Yet,

it is difficult for researchers to identify potentially appropriate sources for biospecimens and accompanying epidemiologic and exposure data. Development of a searchable inventory of population-based biospecimen resources was a major recommendation resulting from an NCI think tank held in August 2013 (“Utilizing Existing Clinical and Population Biospecimen Resources for Discovery or Validation of Markers for Early Cancer Detection”) and would also be directly addressing four of the key recommendations that emerged in an NCI sponsored workshop titled “Trends in 21st Century Epidemiology: From Scientific Discoveries to Population Health” (CEBP, 2013, issue 22, page 508). In response to this, NCI DCCPS is developing a biospecimen inventory and online searchable catalog (or “Population Sciences Biospecimen Catalog (PSBC)”). The PSBC allows scientists in the research community and the NCI to locate specimens appropriate for their population based research projects. It is not NCI's intent to collect biospecimens; rather the collections are descriptions of the available data that can act as a resource and be shared with researchers and scientists who are interested. This submission is via data upload to the secure Web site in order to collect information to manage and improve a program and its resources for the use by all scientists.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 80.

ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Type of respondent	Number of respondents	Number of responses per respondent	Average time per response (in hours)	Total annual burden hour
Population Sciences Biospecimen Catalog Initial Request.	Private Sector	30	1	1	30
	State Government	30	1	1	30
Population Sciences Biospecimen Catalog Annual Update.	Private Sector	30	1	20/60	10
	State Government	30	1	20/60	10

Dated: June 12, 2015.

Karla Bailey,

NCI Project Clearance Liaison, National Institutes of Health.

National Institute of Environmental Health Sciences; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as

amended (5 U.S.C. App.), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning
