

Electronic copies of the proposed revised standards are available through <http://www.regulations.gov> by accessing Docket No. NRCS-2015-0010.

Alternatively, copies can be downloaded or printed from the following Web site: <http://go.usa.gov/TXye>. Requests for paper versions or inquiries may be directed to Emil Horvath, National Practice Standards Review Coordinator, Natural Resources Conservation Service, Central National Technology Support Center, 501 West Felix Street, Fort Worth, Texas 76115.

SUPPLEMENTARY INFORMATION: The amount of the proposed changes varies considerably for each of the conservation practice standards addressed in this notice. To fully understand the proposed changes, individuals are encouraged to compare these changes with each standard's current version as shown at: <http://www.nrcs.usda.gov/wps/portal/nrcs/detailfull/national/technical/cp/ncps/?cid=nrcs143026849>.

To aid in this comparison, following are highlights of some of the proposed revisions to each standard:

Channel Bed Stabilization (Code 584)—The proposed changes provide additional clarification regarding the conditions where the practice applies, general criteria, considerations, and technical references.

Karst Sinkhole Treatment (Code 527)—The proposed changes provide additional clarification regarding the conditions where the practice applies, general criteria, sinkhole treatment/closing and considerations.

Open Channel (Code 582)—The agency refined the definition, modified criteria, added considerations, updated requirements for plans and specifications, and updated requirements for operation and maintenance.

Pond (Code 378)—The agency refined the definition, modified criteria, updated considerations, updated requirements for plans and specifications, and updated requirements for operation and maintenance.

Surface Drain, Field Ditch (Code 607)—The agency changed the definition for clarity, along with a purpose and criteria added to allow use of this practice to collect irrigation tailwater for reuse.

Surface Drain, Main or Lateral (Code 608)—The agency removed the reference to the ambiguous phrase 'water management system' in the purpose to improve clarity. Criteria was added allowing the use of this practice as a component to collect irrigation

tailwater, for use in a Tailwater Recovery System, (Code 447) along with a reference to the two-stage channel design process in NRCS National Engineering Handbook, Part 654.1005 in areas where increased channel stability is required.

Vertical Drain (Code 630)—The agency incorporated plain language into this practice standard by adding verbiage to address potential negative effects on underground habitat, in conditions where practice applies. NRCS also added a statement in plans and specifications, focusing on documenting specific site characteristics, in relation to potential contamination sources. Finally, the agency added a references section with National Engineering Handbook 633, Chapter 26, gradation Design of Sand and Gravel Filters.

Waste Hauling (Code 321)—This is a new national conservation practice standard with a 1-year lifespan. This practice removes manure hauling from the Waste Transfer (Code 634) standard that has been utilized extensively by a number of States for several years. The Waste Transfer standard is structural and long-term in character which does not fit the hauling of manure and other agricultural waste very well. The Waste Hauling standard is short term and non-structural. Waste Hauling is the practice of moving manure or other agricultural waste products by vehicle from a region where concentration of waste production makes it very difficult to find cropland for application that does not already exhibit very high nutrient levels due to previous application. Additionally, the practice will be used to move agricultural waste in watersheds with water quality problems to markets outside the impacted watershed. The Waste Hauling contract will be with the end user of the product, and must be used in conjunction with a CPS Nutrient Management (Code 590) plan.

Signed this 13th day of July, 2015, in Washington, DC.

Chief, Natural Resources Conservation Service.
