SUPPLEMENTARY INFORMATION:

I. Background

Under Title 30 U.S. Code of Federal Regulations (30 CFR) Parts 7 and 15, the Mine Safety and Health Administration (MSHA) evaluates and approves explosive materials and blasting units as permissible for use in the mining industry. However, since there are no permissible explosives or blasting units available that have adequate blasting capacity for some metal and nonmetal gassy mines, 30 CFR 57.22606(a) outlines the procedures for mine operators to follow when using nonapproved explosive materials and blasting units. The standard requires mine operators of Class III metal or nonmetal mines to notify MSHA in writing prior to their use of nonapproved explosive materials and blasting units. MSHA then evaluates the non-approved explosive materials and determines whether they are safe for use in a gassy environment.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Explosive Materials and Blasting Units (pertains only to metal and nonmetal underground mines deemed to be gassy). MSHA is particularly interested in comments that:
