SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Diesel-Powered Equipment in Underground Coal Mines information collection requirements codified in regulations 30 CFR part 75. The MSHA requires a mine operator to provide important safety and health protection to an underground coal miner who works on and around diesel-powered equipment. Engines powering diesel equipment are potential contributors to fires and explosion hazards in the confined environment of an underground coal mine where combustible coal dust and explosive methane gas are present. In addition, diesel equipment operating in an underground coal mine can pose serious health risks to miners from exposure to diesel exhaust emissions, including diesel particulates, oxides of nitrogen, and carbon monoxide. Diesel exhaust is a lung carcinogen in animals.

This information collection pertains to diesel equipment maintenance and use; tests and maintenance of fire suppression systems on both the equipment and at fueling stations; and exhaust gas sampling. Records are required to document essential testing and maintenance of diesel-powered equipment are conducted regularly by a qualified person; any corrective action is taken; and a person performing covered maintenance, repairs, examinations, or tests is trained and qualified to perform such tasks.

The subject information collection requirements are found in regulations 30 CFR 75.1901(a), Diesel fuel requirements; 75.1904(b)(4)(i), Underground diesel fuel tanks and safety cans; 75.1906(d), Transport of diesel fuel; 75.1911(j), Fire suppression systems for diesel-powered equipment and fuel transportation units; 75.1912(i), Fire suppression systems for permanent underground diesel fuel storage facilities; 75.1914(f)(2), (g), (b)(1), and (h)(2), Maintenance of diesel-powered equipment; sections 75.1915(b)(5), (c)(1), and (c)(2), Training and qualification of persons working on diesel-powered equipment. Federal Mine Safety and Health Act of 1977 sections 801(a) and 803(h) authorize this information collection. See 30 U.S.C. 811(a), 813(h).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1205–0119.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on August 31, 2015. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information
