This action includes revisions to the methods in response to comments received on a Notice published in the **Federal Register** on October 23, 2013 and finalizes the methods and guidance. In addition, the Agency is also finalizing revisions to Chapters One through Five of SW-846 and an Office of Resource Conservation and Recovery (ORCR) policy statement in the SW-846 methods compendium. The Agency is issuing this Update as

guidance since the changes in this document to the SW-846 analytical methods are not required by RCRA's hazardous waste regulations. Any required analytical methods have not been changed.

VI. Summary

II. What is the subject and purpose of this Notice?

The Agency is announcing publication of Final Update V to "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA publication SW-846, which is now part of the SW-846 methods compendium. Specifically, Update V of SW-846 contains revisions to the first five chapters of SW-846 and 23 new and modified analytical methods that the Agency has evaluated, and/or revised and determined to be appropriate and may be used for monitoring or complying with the RCRA hazardous waste regulations. Eight of the 23 methods are new methods that have been fully validated, *i.e.*, they have completed technical and Agency workgroup review and approval. In addition these eight new methods are being announced in the **Federal Register** through this notice. Since the methods have completed the approval process, they will be removed from the "Validated Methods" link at: http://www.epa.gov/epawaste/hazard/testmethods/sw846/new_meth.htm and incorporated in the SW-846 methods compendium at: <http://www.epa.gov/epawaste/hazard/testmethods/sw846/online/index.htm>.

The 15 revised methods have replaced the previous versions in the final update package and will also be placed into the SW-846 methods compendium. Because the RCRA hazardous waste regulations do not require the analytical methods contained in Update V, the Agency is issuing this update as guidance. This guidance does not add or change the RCRA regulations, and does not have any impact on existing rulemakings associated with the RCRA program. To date, the Agency has finalized Updates I, II, IIA, IIB, III, IIIA, IIIB, IVA, and IVB to the SW-846 manual, which can be found on the Agency's ORCR Web page at: <http://www.epa.gov/SW-846>.

III. Why is the Agency releasing final Update V to SW-846?

SW-846 is revised over time as new information and data become available. The Agency continually reviews advances in analytical instrumentation and techniques and periodically incorporates such advances into SW-846 as method updates by adding new methods to the manual, and replacing existing methods with revised versions of the same method. On October 23,
