SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new collection of information.

The objective of the study is to collect information on the earnings and expenditures of Atlantic Highly Migratory Species (HMS) tournament operators and participants. The study will use two survey instruments to collect information from tournament operators and participants. One survey will ask tournament operators to characterize and quantify their operating costs and income sources in addition to describing their tournament participants. The other survey instrument will ask fishing tournament participants to estimate their expenditures associated with travel to, entering, and participating in the tournament.

The National Marine Fisheries Service (NMFS) will collect cost and earnings data from all tournaments registered within the year (approximately 260 based on recent years' tournament registration data). In addition, NMFS will select fifty percent of registered tournaments to distribute expenditure surveys to anglers registered for those tournament events. The Atlantic HMS Management Division is currently consulting with tournament organizers and participants to design the survey instruments to ensure NMFS captures data on all relevant expenditures.

As specified in the Magnuson-Stevenson Fishery Conservation and Management Act of 1996 (and reauthorized in 2007), NMFS is required to enumerate the economic impacts of the policies it implements on fishing participants and coastal communities. The cost and earnings data collected in this survey will be used to estimate the economic contributions and impacts of Atlantic HMS tournaments regionally.

II. Method of Collection

The primary data collection vehicle will be paper and/or internet-based survey forms delivered at tournament events. Telephone and personal interviews may be employed to supplement and verify written survey responses.
