ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R10–OAR–2015–0398; FRL–9937–11–Region 10]

Approval of Regional Haze BART Alternative Measure: Washington

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a Best Available Retrofit Technology (BART) alternative measure for the BP Cherry Point Refinery located near Ferndale, Washington. The BART alternative measure increases the oxides of nitrogen (NO_x) emission limit from the R–1 HC Reactor Heater (R–1 Heater), a BART-eligible source currently subject to BART emission limits on NO_x. To offset the increase in NO_x emissions from this emission unit, the NO_x emission limits on the 1st Stage Hydrocracker Fractionator Reboiler (R–1 Reboiler), also a BART-eligible source subject to BART emission limits on NO_x, will be reduced. The net effect of these changes is a decrease of 10.4 tons per year (tpy) of allowable NO_x emissions from sources subject to BART at the BP Cherry Point Refinery.

DATES: Comments must be received on or before December 16, 2015.
