

making this decision to send 6 MT of surplus plutonium to WIPP for disposal. A schedule for shipment of the 6 MT of surplus non-pit plutonium to WIPP has not been established. Shipments of this surplus non-pit plutonium to WIPP, after it is operational, will be placed in the queue of waste to be shipped to WIPP. DOE anticipates resuming limited waste disposal operations at WIPP in 2016 when it is safe to do so. Significant improvements are being implemented to enhance the safety environment at WIPP including enhancements to fire suppression and unground ventilation and improvements in underground stability. DOE provides regular updates and detailed information on the status of recovery activities at WIPP on the WIPP Web site (<http://www.wipp.energy.gov/wipprecovery/recovery.html>). These safety changes and improvements are being implemented regardless of the decision to dispose of 6 MT of surplus plutonium at WIPP.

Topic F—Cost: Commentors were concerned about the cost of the surplus plutonium disposition alternatives and that adequate funding be provided such that DOE can move forward with disposition of the 6 MT of surplus non-pit plutonium at WIPP.

Discussion: As described in this Record of Decision, DOE/NNSA has decided to prepare 6 MT of surplus non-pit plutonium for disposal at WIPP. This would allow the DOE/NNSA to continue progress on the disposition of surplus weapon-usable plutonium in furtherance of the policies of the United States to ensure that surplus plutonium is never again readily used in a nuclear weapon, and to remove surplus plutonium from the State of South Carolina. Scheduling and implementation of surplus plutonium disposition activities are subject to the availability of funds as appropriated by Congress.

With respect to cost considerations, implementing the WIPP Disposal Alternative for the disposition of 6 MT of surplus non-pit plutonium would rely on existing facilities (with additional glovebox capability in an existing facility), structures, and pads, and when compared to the other alternatives evaluated in the *SPD Supplemental EIS*, would reduce the potential need for constructing and equipping additional facilities, and consequently reduce the need for future facility deactivation and decommissioning at SRS. Blending with inert materials for disposal at WIPP is a proven process that is ongoing at SRS for disposition of plutonium material from the DOE-STD-3013 surveillance process and other non-pit plutonium.
