Project Description

Tennessee proposes to abandon in place and remove from service approximately 964 miles of Tennessee’s existing pipelines that run from the Gulf of Mexico region to the Northeast markets. The proposed Project would occur on Tennessee’s existing 100 and 200 Lines. In order to replace capacity that would be lost due to the abandonment, Tennessee would modify and construct certain facilities along the existing pipelines not proposed for abandonment including four new midpoint compressor stations in Ohio, a new 7.7-mile-long pipeline loop in Kentucky, and modifications to existing compressor stations in Kentucky. The Project would also require the removal of certain crossovers, taps, valves and miscellaneous pipe, and the relocation and/or installation of new taps to complete the physical separation of the abandoned line from Tennessee’s retained pipelines.

Background

On April 17, 2015, the Commission issued a Notice of Intent To Prepare an Environmental Assessment for the Proposed Abandonment and Capacity Restoration Project and Request for Comments on Environmental Issues (NOI). The NOI was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other

1 A pipeline loop is a segment of pipe constructed parallel to an existing pipeline to increase capacity.
