FEDERAL REGISTER

Vol. 81 Thursday,

No. 222 November 17, 2016

Pages 80989–81640

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Equal Access to Housing in HUD's Native American and Native Hawaiian Programs—Regardless of Sexual Orientation or Gender Identity

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: As the Nation's housing agency, HUD has the unique charge to promote the Federal goal of providing decent housing and a suitable living environment for all. In February 2012, HUD issued a final rule requiring HUD programs to make eligibility determinations for individuals seeking admission to HUD-assisted or -insured housing without regard to sexual orientation, gender identity, or marital status. The 2012 rule did not, however, cover HUD's Native American and Native Hawaiian programs. Through this final rule, HUD revises its Native American and Native Hawaiian program regulations to ensure all eligible individuals and families, regardless of sexual orientation, gender identity, or marital status, have access to these programs. This final rule seeks to provide consistency across HUD programs and restates the Department's commitment that eligibility for admission and continued occupancy in HUD-assisted and -insured housing is not based on sexual orientation, gender identity, or marital status.

DATES: *Effective:* December 19, 2016.

FOR FURTHER INFORMATION CONTACT: Heidi J. Frechette, Deputy Assistant Secretary, Office of Native American Housing Programs, Office of Public and Indian Housing, 451 7th Street SW., Room 4126, Washington, DC 20410–4000; telephone number 202–402–6321 (this is not a toll-free number). Persons with hearing or speech impairments may access this number through TTY by calling the Federal Relay Service at 800–877–8339 (this is a toll-free number).

SUPPLEMENTARY INFORMATION:

I. Background—Tribal Consultation and the May 9, 2016, Proposed Rule

On February 3, 2012, at 77 FR 5662, HUD issued a final rule entitled ''Equal Access to Housing in HUD Programs Regardless of Sexual Orientation or Gender Identity,'' which required that HUD-assisted and -insured housing be made available in accordance with program eligibility requirements and without regard to sexual orientation, gender identity, or marital status, but excluded HUD's Native American and Native Hawaiian programs. HUD committed in the 2012 rule's preamble to engage in tribal consultation before applying these same requirements to its Native American and Native Hawaiian programs. HUD engaged in tribal consultation, in the form of a ''Dear Tribal Leader Letter,'' before proceeding with this rulemaking.

On May 9, 2016, HUD published a proposed rule, at 81 FR 28037, to amend its Native American and Native Hawaiian program regulations to require that access be provided without regard to actual or perceived sexual orientation, gender identity, or marital status in housing assisted or insured under these programs. The proposed rule sought to add the equal access provisions in 24 CFR 5.105(a)(2) and adopt the definitions of ''sexual orientation'' and ''gender identity'' provided in § 5.100 to the Native American and Native Hawaiian programs. Specifically, the proposed rule sought to amend regulations for the following: Native American Housing Activities, at 24 CFR part 1000; Community Development Block Grants for Indian Tribes and Alaska Native Villages, at 24 CFR part 1003; the Section 184 Indian Home Loan Guarantee Program, at 24 CFR part 1005; the Native Hawaiian Housing Block Grant Program, at 24 CFR part 1006; and Section 184A Loan Guarantees For Native Hawaiian Housing, at 24 CFR part 1007. HUD also proposed to make conforming amendments to § 5.105(a)(2) to make explicit that the requirements in § 5.105(a)(2) apply to housing with loans guaranteed or insured under one of HUD's Native American or Native Hawaiian housing programs, and not solely to loans insured by the Federal Housing Administration (FHA). A detailed description of the proposed amendments can be found in the preamble to the proposed rule available at *https://www.gpo.gov/fdsys/granule/FR-2016-05-09/2016-10753*.

II. Final Rule

This final rule follows publication of the May 9, 2016, proposed rule and takes into consideration the public comments received. The public comment period closed on July 8, 2016, and HUD received 13 distinct comments relating to the proposed rule. HUD received public comments from individuals, tribal nations, housing authorities, nonprofit social service providers, and lesbian, gay, bisexual and transgender (LGBT) advocacy organizations. Section III of this preamble responds to the comments received on the proposed rule. HUD has decided to adopt the proposed rule and makes a minor change to § 5.105(a)(2) to clarify that all loans insured by HUD are subject to the equal access provisions, not only loans insured by FHA. This final rule ensures that eligibility determinations for housing-assisted or -insured under HUD's Native American or Native Hawaiian housing programs are made without regard to actual or perceived sexual orientation, gender identity, or marital status.

HUD notes that in adopting this final rule with the cross-references to § 5.105(a)(2), the changes to § 5.105(a) that were adopted in HUD's final rule entitled ''Equal Access in Accordance with an Individual's Gender Identity in Community Planning and Development Programs'' (the CPD Equal Access Rule), at 81 FR 64763, will apply to HUD's Native American or Native Hawaiian housing programs. Those changes include amended definitions of ''gender identity'' and ''sexual orientation'' and the removal of the prohibition of inquiries provision that was previously at § 5.105(a)(2)(ii). The amended ''gender identity'' definition states that gender identity ''means the gender with which a person identifies, regardless of the sex assigned to that person at birth and regardless of the person's perceived gender identity. Perceived gender

identity means the gender with which a person is perceived to identify based on that person's appearance, behavior, expression, other gender related characteristics, or sex assigned to the individual at birth or identified in documents.'' The amended ''sexual orientation'' definition states that sexual orientation ''means one's emotional or physical attraction to the same and/or opposite sex (*e.g.,* homosexuality, heterosexuality, or bisexuality).'' See 81 FR 64763 for further information.

III. Public Comments Submitted on Proposed Rule and HUD's Responses

HUD received 13 distinct comments relating to the proposed rule. Most commenters were very supportive and appreciative of HUD's efforts to ensure access in HUD's Native American and Native Hawaiian programs for LGBT individuals. Although the majority of commenters supported the rule as important to protect the rights of LGBT individuals, some expressed different opinions on the way the rule could be improved to ensure that vulnerable populations are protected. Many of the commenters stated that the rule's language needed to be clarified to ensure greater protections for the LGBT population. Commenters provided their overall views regarding the rule, as well as specific comments on HUD's regulatory text. All comments can be viewed at *https://www.regulations.gov/.*[1]

HUD appreciates all of the comments offered in response to HUD's proposed rule.

Comment: Applying this rule to Native American and Native Hawaiian communities promotes consistent policies throughout all of HUD's programs. Commenters stated that it is important to ensure consistency where there is overlap between HUD's Native American and Native Hawaiian programs and other HUD programs, which are already subject to the requirements of the Equal Access Rule. Many commenters wrote that the rule is a strong step in the direction of alleviating discrimination against LGBT persons in Native American and Native Hawaiian populations and promoting the Federal goal of providing decent housing and a suitable living environment for all.

HUD Response: As the Nation's housing agency, it is important that HUD maintain consistent policies across its programs, inclusive of Native American and Native Hawaiian programs. HUD issued guidance to assist LGBT individuals and families facing housing discrimination. (See *http://portal.hud.gov/hudportal/HUD?src=/program_offices/fair_housing_equal_opp/LGBT_Housing_Discrimination*). In addition to the guidance, HUD initiated Equal Access rule rulemaking to make clear that HUD's rental housing and homeownership programs are open to all eligible persons regardless of sexual orientation, gender identity, or marital status. This rule furthers HUD's goal of equal treatment for all individuals who are eligible for HUD-assisted or -insured housing.

Comment: The rule is aligned with traditional Native tribal beliefs. Commenters stated that Native nations have not historically discriminated against those who are LGBT. Commenters stated that Native nations believe in acceptance of all persons, no matter their differences, and that traditional practices teach them that no one is to be excluded or homeless because of their sexual orientation. Another commenter stated that promulgating the rule demonstrates respect for the values of the Native American and Native Hawaiian communities and American society as a whole. A commenter provided sources that demonstrate that Native American tribes ''respected'' and ''highly revered'' LGBT people historically and that Native Hawaiians likely accepted LGBT individuals prior to colonization by Western and Christian influences. Commenters described their own and others' experiences with Native cultures and how inclusion of all, including the LGBT community, was not in violation of Native values.

HUD Response: HUD appreciates the comments stating that the Equal Access rule, as applied to Native American and Native Hawaiian HUD-assisted or -insured housing, is consistent with Native tribal beliefs.

Comment: Social stigma against LGBT individuals is not uncommon and has caused disparities in housing access for LGBT Native members. Commenters cited statistics that indicated access to safe housing for members of the LGBT communities may be hard to find—citing that between 20 and 40 percent of youth experiencing homelessness identify as LGBT, questioning, intersex, or two spirit; and 26 percent of LGBT youth were forced from their home upon revealing their sexual identity to their parents. Commenters also noted that it is difficult to fully assess the impact of housing discrimination in the LGBT community because of a lack of nationwide data collection. Commenters cited general statistics outside of Native communities from a 2001 Kaiser Family Foundation study that shows that 34 percent of LGB people reported having experienced, or knowing someone who had experienced, housing discrimination on the basis of their sexual orientation. Further, commenters cited a 2006 Michigan housing study showing that 27 percent of same-sex test couples inquiring about renting or buying housing in Michigan encountered discrimination on the basis of their sexual orientation.

HUD Response: The exclusion of an individual or family from HUD housing due to that individual's sexual orientation or gender identity is inconsistent with HUD's mission to ensure decent housing and a suitable living environment for all. The housing discrimination, harassment, and homelessness that LGBT persons face in the United States is part of what precipitated HUD's rulemaking in this area. Accordingly, it is incumbent on HUD to ensure that the regulations governing its Native American and Native Hawaiian housing programs provide the same protections for LGBT persons as HUD's other programs.

Comment: Research reveals that the transgender community is even more vulnerable to housing discrimination. Commenters cited the National Transgender Discrimination Survey, which found that 47 percent of American Indians and American Natives reported having been denied a home or apartment because they were transgender or gender nonconforming. The survey also found that 19 percent of transgender respondents reported being refused a home or apartment due to their sexual orientation and 11 percent of transgender respondents reported being evicted because of their gender identity or expression. The commenters further said that one in five respondents (19 percent) have experienced homelessness as a result of discrimination or mistreatment because of their gender identity or expression, and that discrimination was particularly pronounced for transgender people of color.

HUD Response: HUD is aware of the significant challenges that transgender persons face in Native American and Native Hawaiian communities when attempting to access housing and shelter. HUD understands that housing discrimination and equal access are critical issues for transgender and gender nonconforming individuals, as they are for everyone, and HUD's rulemaking in this area is in direct response. HUD believes that by

[1] Please note, *www.regulations.gov* assigns numbers to the comments starting with 0002. The number 0001 is reserved for the **Federal Register** publication (the November 20, 2015, proposed rule).

requiring equal access for LGBT individuals, including gender nonconforming persons, in this regulation, HUD will be better able to address concerns of access to HUD-assisted and -insured housing in its Native American and Hawaiian Native programs.

Comment: The current definition of gender identity under § 5.100, providing that gender identity means ''actual or perceived gender-related characteristics'' is unclear. Commenters stated that this definition could cause difficulty in enforcement of the proposed rule and that HUD should specify how it intends to determine ''the gender with which a person identifies,'' in order to prevent misinterpretation by agency employees. One commenter stated the rule's language needs to be unequivocally clear and that the difference between ''actual'' and ''perceived'' characteristics is ambiguous. The commenter stated that the definition of gender identity must be clear, so that programs are able to refrain from discriminatory practices when making placement decisions and not be in violation of the Equal Access Rule. Many commenters supported the adoption of the revised definitions of gender identity and perceived gender identity set forth in the CPD Equal Access Rule and use of the definitions in all applications of HUD's Equal Access Rules.

A commenter stated that the current ''gender identity'' language under § 5.100 states that gender identity refers to ''actual or perceived gender-related characteristics,'' and proposed a change to the language to state that gender identity is ''the gender with which a person identifies, regardless of the sex assigned to that person at birth or perceived gender identity.''

HUD Response: HUD appreciates the suggested revisions to the definition of ''gender identity'' offered by the commenters, and HUD agrees that a consistent definition across its programs makes sense. Therefore, as noted above, HUD will apply the amended definition of ''gender identity'' as provided in the CPD Equal Access Rule to HUD's Native American and Native Hawaiian programs.

Comment: HUD should expressly reinforce the broad definition of ''family'' that was included in the final version of the Equal Access Rule adopted in 2012. Commenters stated that the provision in the Equal Access Rule of 2012 that an eligible family, including an individual, may not be excluded from housing programs because of actual or perceived sexual orientation, gender identity, or marital status was one of the core advancements of that critically important rule, and it should apply equally to the extension of the rule to HUD's Native American and Native Hawaiian programs. Commenters noted that despite the Supreme Court's affirmation of marriage equality nationwide, key challenges for two spirit and LGBT families remain, including impediments to two spirit and LGBT people creating legal relationships with their children, which makes the application of a broad and inclusive definition of ''family'' essential. Commenters stated that the final rule should be updated to make the definition of ''family'' in HUD's Native American and Native Hawaiian programs consistent with the definition of family currently provided in § 5.403, including clarifying that the definition applies ''regardless of actual or perceived sexual orientation, gender identity, or marital status.''

HUD Response: Certain regulations governing the Native American and Native Hawaiian housing programs covered by this rule already include a definition of the term ''family.'' The regulatory definitions are derived directly from corresponding statutory definitions of the term ''family.'' For instance, section 4(6) of the Native American Housing Assistance and Self-Determination Act (NAHASDA) (25 U.S.C. 4101 *et seq.*) provides a definition of family. The definition in the implementing program regulation at § 1000.10 mirrors that statutory definition. Although the Native American and Native Hawaiian housing programs' statutory and regulatory definitions of family vary from the definition of family in § 5.403, the substantive rights and protections in § 5.105(a)(2) apply without regard to actual or perceived sexual orientation, gender identity, or marital status. Therefore, HUD does not believe it is necessary to amend the definition of family in the regulations governing these programs in order to provide these substantive rights and protections.

Comment: This rule encroaches upon sovereignty and self-determination of Indian tribes. A commenter stated that the final rule encroaches upon the sovereignty and self-determination of Indian tribes, which the Federal Government has committed to uphold, which is in violation of Executive Order 13175. The commenter stated that the final rule is adverse to Indian tribes' ability to self-govern their own internal affairs, including the governance of domestic relations. The same commenter also stated that some tribes require cohabiting couples to be married, other tribes consider it a criminal offense for cohabiting couples not to be married, other tribes do not have a preference, and that due to differing beliefs tribes should have the right to govern domestic relations and not be forced to adopt the Equal Access in Native American and Native Hawaiian final rule.

HUD Response: HUD's rule does not violate of Executive Order 13175 entitled ''Consultation with Indian Tribal Governments.'' HUD's rule only pertains to the administration of HUD's housing programs and does not regulate domestic relations and the recognition of marriage. The rule simply establishes program requirements that ensure that Native American and Native Hawaiian families receiving assistance under these programs are afforded the same protections as all other families receiving assistance under HUD's other programs. A tribe that participates in HUD's programs, and a lender that chooses to become an approved lender under HUD's loan guarantee programs, must comply with all program requirements established by HUD. HUD reaffirms its commitment to ensure the furtherance of tribal sovereignty and self-determination, and HUD emphasizes that this rule ensures that Native American families are afforded equal access to its Native American housing programs.

Comment: HUD must follow Executive Order 13175. Some commenters stated that HUD did not follow the requirements of Executive Order 13175, which requires that agencies consult and coordinate with Indian tribes in the development of policies that impact Indian communities, when implementing this proposed rule. Commenters stated that HUD's attempt to engage tribes regarding the proposed rule via comments, in response to **Federal Register** notices, and letters does not translate to a collaborative effort between HUD and tribal communities, nor do HUD's actions exemplify a good faith effort to consult with tribes. One commenter stated HUD should have engaged in more meaningful government-to-government consultations with tribal entities that commented on HUD's January 2015 letter about their concerns. The same commenter wrote that HUD does not know how to engage in meaningful consultation within Native communities, citing that HUD's January 2015 letter was addressed to tribal leaders, while HUD's May 2016 letter was addressed to Native American & Native Hawaiian Leaders. In contrast, other commenters stated that HUD's consultation was fully adequate and reached the necessary standard level of

''consultation'' under Executive Order 13175.

HUD Response: HUD's tribal consultation policy (81 FR 40893) is to consult with Indian tribes early in the rulemaking process on matters that have tribal implications. HUD uses a wide variety of methods to conduct tribal consultation with Indian tribes, including sending letters to tribal leaders requesting feedback on proposed policies. Accordingly, on January 28, 2015, HUD sent letters to tribal leaders informing them that HUD was considering whether to revise the regulations governing HUD's Native American housing programs to provide Native American families participating in these programs with the same equal access protections as families receiving assistance under HUD's other programs. HUD requested the opinions of tribal leaders in order to inform its decision to proceed with the rulemaking. HUD received two comments and considered these comments before proceeding with this rulemaking. The same day that HUD published the proposed rule in the **Federal Register**, May 9, 2016, HUD sent a second letter to inform tribal leaders of the rule's publication and strongly encouraged tribal leaders to provide feedback through the public comment period. HUD believes that the process it has undertaken meets the requirements of Executive Order 13175.

Comment: HUD must use negotiated rulemaking to make regulatory changes. A commenter stated that HUD is incorrect in asserting that the agency is not required to undergo negotiated rulemaking under section 106(b)(2)(A) of NAHASDA (25 U.S.C. 4166(b)(2)(A)) to implement this final rule. Specifically, the commenter stated that HUD's regulations at § 1000.12 provide that other nondiscrimination requirements do not apply to actions under NAHASDA by federally recognized tribes and their tribally designated housing entities (TDHEs) and that HUD should follow the same course that it pursued in the past, when dealing with issues of nondiscrimination, by initiating negotiated rulemaking to consider whether § 5.105(a)(2)(i) should be applicable to federally recognized tribes and their TDHEs. The commenter also wrote that this provision will impact how other NAHASDA statutory requirements are impacted and how the rights of participants are protected.

HUD Response: As HUD stated in the proposed rule, the requirement to undertake negotiated rulemaking pertains to regulations that are required to implement NAHASDA statutory requirements. See 25 U.S.C. 4116(b)(2)(A). This rule pertains to HUD's general cross-cutting nondiscrimination requirements that apply across HUD and does not pertain to regulations that are required to implement NAHASDA statutory requirements. Therefore, HUD asserts that such requirements are not subject to negotiated rulemaking under NAHASDA. The commenter cited § 1000.12 as supporting the reason why nondiscrimination requirements should be implemented through negotiated rulemaking. However, the requirements at § 1000.12 either mirror the nondiscrimination requirements in section 201 of NAHASDA, or restate the applicability of Federal nondiscrimination statutes that apply on their face to programs authorized under NAHASDA. HUD finds the reference to the manner in which § 1000.12 was issued to be unpersuasive here.

IV. Findings and Certifications

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. This final rule does not impose any new costs, or modify existing costs, applicable to HUD grantees. Rather, the purpose of this final rule is to ensure equal access to HUD's Native American and Native Hawaiian programs, regardless of sexual orientation or gender identity. Accordingly, the undersigned certifies that this rule will not have a significant economic impact on a substantial number of small entities.

Environmental Impact

This final rule sets forth nondiscrimination standards. Accordingly, under 24 CFR 50.19(c)(3), this rule is categorically excluded from environmental review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321).

Executive Order 13132, Federalism

Executive Order 13132 (entitled ''Federalism'') prohibits an agency from publishing any rule that has federalism implications if the rule either: (i) Imposes substantial direct compliance costs on State and local governments and is not required by statute or (ii) preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. This final rule would not have federalism implications and would not impose substantial direct compliance costs on State and local governments or preempt State law within the meaning of the Executive order.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) (UMRA) establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and on the private sector. This final rule would not impose any Federal mandates on any State, local, or tribal governments or on the private sector within the meaning of the UMRA.

List of Subjects

24 CFR Part 5

Administrative practice and procedure, Aged, Claims, Drug abuse, Drug traffic control, Grant programs—housing and community development, Grant programs—Indians, Individuals with disabilities, Loan programs—housing and community development, Low and moderate income housing, Mortgage insurance, Pets, Public housing, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 1000

Aged, Community development block grants, Grant programs—housing and community development, Grant programs—Indians, Indians, Individuals with disabilities, Public housing, Reporting and recordkeeping requirements.

24 CFR Part 1003

Alaska, Community development block grants, Grant programs—housing and community development, Grant programs—Indians, Indians, Reporting and recordkeeping requirements.

24 CFR Part 1005

Indians, Loan programs—Indians, Reporting and recordkeeping requirements.

24 CFR Part 1006

Community development block grants, Grant programs—housing and community development, Grant programs—Indians, Hawaiian Natives, Low and moderate income housing, Reporting and recordkeeping requirements.

24 CFR Part 1007

Hawaiian Natives, Loan programs—housing and community development,

Loan programs—Indians, Reporting and recordkeeping requirements.

Accordingly, for the reasons stated in the preamble, HUD amends 24 CFR parts 5, 1000, 1003, 1005, 1006, and 1007, as follows:

PART 5—GENERAL HUD PROGRAM REQUIREMENTS; WAIVERS

■ 1. The authority citation for part 5 continues to read as follows:

Authority: 42 U.S.C. 1437a, 1437c, 1437d, 1437f, 1437n, 3535(d), Sec. 327, Pub. L. 109–115, 119 Stat. 2936, and Sec. 607, Pub. L. 109–162, 119 Stat. 3051.

■ 2. In § 5.105, revise paragraph (a)(2) to read as follows:

§ 5.105 Other Federal requirements.

* * * * *

(a) * * *

(2) *Equal access to HUD-assisted or -insured housing.* A determination of eligibility for housing that is assisted by HUD or subject to a mortgage insured by HUD shall be made in accordance with the eligibility requirements provided for such program by HUD, and such housing shall be made available without regard to actual or perceived sexual orientation, gender identity, or marital status.

* * * * *

PART 1000—NATIVE AMERICAN HOUSING ACTIVITIES

■ 3. The authority citation for part 1000 continues to read as follows:

Authority: 25 U.S.C. 4101 *et seq.;* 42 U.S.C. 3535(d).

■ 4. In § 1000.12, add paragraph (e) to read as follows:

§ 1000.12 What nondiscrimination requirements are applicable?

* * * * *

(e) The equal access to HUD-assisted or -insured housing requirements in 24 CFR 5.105(a)(2).

PART 1003—COMMUNITY DEVELOPMENT BLOCK GRANTS FOR INDIAN TRIBES AND ALASKA NATIVE VILLAGES

■ 5. The authority citation for part 1003 continues to read as follows:

Authority: 42 U.S.C. 3535(d) and 5301 *et seq.*

■ 6. In § 1003.601, add paragraph (c) to read as follows:

§ 1003.601 Nondiscrimination.

* * * * *

(c) A grantee shall comply with the equal access to HUD-assisted or -insured housing requirements in 24 CFR 5.105(a)(2).

PART 1005—LOAN GUARANTEES FOR INDIAN HOUSING

■ 7. The authority citation for part 1005 continues to read as follows:

Authority: 12 U.S.C. 1715z–13a; 15 U.S.C. 1639c; 42 U.S.C. 3535(d).

■ 8. Add § 1005.115 to read as follows:

§ 1005.115 Equal Access.

The equal access to HUD-assisted or -insured housing requirements in 24 CFR 5.105(a)(2) apply to this part.

PART 1006—NATIVE HAWAIIAN HOUSING BLOCK GRANT PROGRAM

■ 9. The authority citation for part 1006 continues to read as follows:

Authority: 25 U.S.C. 4221 *et seq.;* 42 U.S.C. 3535(d).

■ 10. In § 1006.355, revise the introductory paragraph and add paragraph (d) to read as follows:

§ 1006.355 Nondiscrimination requirements.

Program eligibility under the Act and this part may be restricted to Native Hawaiians. Subject to the preceding sentence, no person may be discriminated against on the basis of race, color, national origin, religion, sex, familial status, or disability, or excluded from program eligibility because of actual or perceived sexual orientation, gender identity, or marital status. The following nondiscrimination requirements are applicable to the use of NHHBG funds:

* * * * *

(d) The equal access to HUD-assisted or -insured housing requirements in 24 CFR 5.105(a)(2).

PART 1007—SECTION 184A LOAN GUARANTEES FOR NATIVE HAWAIIAN HOUSING

■ 11. The authority citation for part 1007 continues to read as follows:

Authority: 12 U.S.C. 1715z–13b; 15 U.S.C. 1639c; 42 U.S.C. 3535(d).

■ 12. Amend § 1007.45 by revising the section heading, redesignating the undesignated paragraph as paragraph (a), and adding paragraph (b) to read as follows:

§ 1007.45 Nondiscrimination.

* * * * *

(b) The equal access to HUD-assisted or -insured housing requirements in 24 CFR 5.105(a)(2) apply to this part.

Dated: November 4, 2016.

Lourdes Castro Ramirez,

Principal Deputy Assistant Secretary for Public and Indian Housing.

Nani A. Coloretti,

Deputy Secretary.

Liabilities Recognized as Recourse Partnership Liabilities Under Section 752; Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Correcting amendment.

SUMMARY: This document contains corrections to final and temporary regulations (TD 9788) that were published in the **Federal Register** on Wednesday, October 5, 2016 (81 FR 69282). The final and temporary regulations provide rules concerning how liabilities are allocated for purposes of section 707 of the Internal Revenue Code and when certain obligations are recognized for purposes of determining whether a liability is a recourse partnership liability under section 752.

DATES: This correction is effective November 17, 2016 and is applicable on and after January 3, 2017.

FOR FURTHER INFORMATION CONTACT: Caroline E. Hay or Deane M. Burke (202) 317–5279 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final and temporary regulations (TD 9788) that are the subject of this correction are under sections 707 and 752 of the Internal Revenue Code.

Need for Correction

As published, the final and temporary regulations (TD 9788) contain errors that may prove to be misleading and are in need of clarification.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Correction of Publication

Accordingly, 26 CFR part 1 is corrected by making the following correcting amendments:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.707–5T also issued under 26 U.S.C. 707(a)(2)(B).

■ **Par. 2.** Section 1.707–5T is amended by revising paragraph (a)(2)(i); and paragraph (f) *Example 7* (i) is amended by revising the second to last sentence. The revisions read as follows:

§ 1.707–5T Disguised sales of property to partnership; special rules relating to liabilities (temporary).

(a) * * *

(2) * * *

(i) *In general.* For purposes of § 1.707–5, a partner's share of a liability of a partnership, as defined in § 1.752–1(a) (whether a recourse liability or a nonrecourse liability) is determined by applying the same percentage used to determine the partner's share of the excess nonrecourse liability under § 1.752–3(a)(3) (as limited in its application to this paragraph (a)(2)), but such share shall not exceed the partner's share of the partnership liability under section 752 and applicable regulations (as limited in the application of § 1.752–3(a)(3) to this paragraph (a)(2)).

* * * * *

(f) * * *

Example 7. * * *

(i) * * * For disguised sale purposes, assume that G's and H's share of liability 1 is $2,000 each in accordance with paragraph (a)(2) of this section (which determines a partner's share of a liability using the percentage under § 1.752–3(a)(3), but not exceeding the partner's share of the liability under section 752 and applicable regulations). * * *

* * * * *

Martin V. Franks,

Chief, Publications and Regulations Branch, Legal Processing Division, Associate Chief Counsel, (Procedure and Administration).

Civil Penalty Inflation Adjustment

AGENCY: Bureau of Safety and Environmental Enforcement, Interior.

ACTION: Final rule.

SUMMARY: This final rule adjusts the level of the civil monetary penalty contained in the Bureau of Safety and Environmental Enforcement (BSEE) regulations pursuant to the Outer Continental Shelf Lands Act (OCSLA), the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, and Office of Management and Budget (OMB) guidance.

DATES: Effective November 17, 2016.

I. Background

This final rule was initiated as a BSEE Interim Final Rule ''Civil Penalty Inflation Adjustment,'' which was published in the **Federal Register** on June 28, 2016. (81 FR 41801). The Interim Final Rule (IFR) adjusted the level of the maximum civil monetary penalty contained in BSEE regulations pursuant to OCSLA, the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, and OMB guidance. The IFR was effective July 28, 2016, and the IFR comment period closed on August 29, 2016. No comments were received and BSEE is finalizing the IFR as published.

OCSLA directs the Secretary of the Interior to adjust the OCSLA maximum civil penalty amount at least once every three years to reflect any increase in the Consumer Price Index (CPI) to account for inflation. (43 U.S.C. 1350(b)(1)). The Federal Civil Penalties Inflation Adjustment Act of 1990 (Pub. L. 104–410) (FCPIA of 1990) required that all civil monetary penalties, including the OCSLA maximum civil penalty amount, be adjusted at least once every 4 years. Pursuant to OCSLA and the FCPIA of 1990, the OCSLA maximum civil penalty amount was last adjusted in 2011. (*See* 76 FR 38294 (June 30, 2011)). In 2014 and 2015, BSEE performed computations to determine if it should increase the existing OCSLA maximum civil penalty amount to account for inflation. After performing those computations, BSEE determined that adjustments of the OCSLA maximum civil penalty amounts were not warranted in 2014 and 2015.

On November 2, 2015, the President signed into law the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Sec. 701 of Pub. L. 114–74) (FCPIA of 2015). The FCPIA of 2015 requires Federal agencies to adjust the level of civil monetary penalties with an initial ''catch-up'' adjustment, if warranted, through rulemaking and then to make subsequent annual adjustments for inflation. The purpose of these adjustments is to maintain the deterrent effect of civil penalties and to further the policy goals of the underlying statutes.

Pursuant to OCSLA and the FCPIA of 2015, this rule adjusts the following maximum civil monetary penalty (per day per violation):

CFR Citation	Description of the Penalty	Current Maximum Penalty	Multiplier	Adjusted Maximum Penalty
30 CFR 250.1403	Failure to comply per day	$40,000	1.05042	$42,017

II. Calculation of Adjustment

On February 24, 2016, OMB issued guidance on calculating the civil monetary penalty adjustments pursuant to the FCPIA of 2015. (*See* Memorandum for the Heads of Executive Departments and Agencies, from Shaun Donovan, Director, OMB, re: *Implementation of the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015*). Based on this guidance, the Department of the Interior identified applicable civil monetary penalties and calculated the necessary adjustments. A civil monetary penalty is any assessment with a dollar amount that is levied for a violation of a Federal civil statute or regulation, and is assessed or enforceable through a civil action in Federal court or an administrative proceeding. A civil monetary penalty does not include a penalty levied for violation of a criminal statute, or fees for services, licenses, permits, or other regulatory review. The initial calculated adjustment is based on the percent change between the CPI for all Urban Consumers for the month of October in the year of the previous adjustment (or in the year of establishment, if no adjustment has been made) and the October 2015 CPI.

For 2016, OCSLA and the FCPIA of 2015 required that BSEE adjust the OCSLA maximum civil penalty amount and provide for the adjustment timing. In computing the new OCSLA maximum civil penalty amount, in accordance with the OMB guidance, BSEE divided the October 2015 CPI by the October 2011 CPI (237.838/226.421) since BSEE last adjusted the maximum civil penalty amount in 2011. This resulted in a multiplying factor of 1.05042. The existing maximum civil penalty amount ($40,000) was multiplied by the multiplying factor ($40{,}000 \times 1.05042 = 42{,}016.8$). The FCPIA of 2015 requires that the OCSLA maximum civil penalty amount be rounded to the nearest $1.00 at the end of the calculation process. Accordingly, the adjusted OCSLA maximum civil penalty is $42,017. This increase in the OCSLA maximum civil penalty amount does not exceed 150 percent of the OCSLA maximum civil penalty amount as of November 2, 2015, as stipulated by the FCPIA of 2015. Also, pursuant to the FCPIA of 2015, the increase in the OCSLA maximum civil penalty amount applies to civil penalties assessed after the date the increase took effect (July 28, 2016), even when the associated violation(s) predate(s) such increase.

III. Comments Received on the Interim Final Rule

Although the IFR was effective as of July 28, 2016, the IFR included a request for public comments. The public comment period closed on August 29, 2016. BSEE received no comments on the IFR and is therefore finalizing this rulemaking as originally implemented by the IFR.

IV. Procedural Matters

A. Regulatory Planning and Review (E.O. 12866 and 13563)

Executive Order (E.O.) 12866 provides that the OMB Office of Information and Regulatory Affairs will review all significant rules. The Office of Information and Regulatory Affairs has determined that this rule is not significant.

E.O. 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. E.O. 13563 directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible,

and consistent with regulatory objectives. E.O. 13563 further emphasizes that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this rule in a manner consistent with these requirements.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) requires an agency to prepare a regulatory flexibility analysis for all rules unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. The RFA applies only to rules for which an agency is required to first publish a proposed rule. (*See* 5 U.S.C. 603(a) and 604(a)). Because the FCPIA of 2015 requires agencies to adjust penalties for the catch-up adjustment through an interim final rulemaking, agencies are not required to complete a notice and comment process prior to promulgation. Thus, the RFA does not apply to this rulemaking.

C. Small Business Regulatory Enforcement Fairness Act

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule:

(1) Does not have an annual effect on the economy of $100 million or more.

(2) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

(3) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

D. Unfunded Mandates Reform Act

This rule does not impose an unfunded mandate on State, local, or tribal governments, or the private sector of more than $100 million per year. The rule does not have a significant or unique effect on State, local, or tribal governments or the private sector. Therefore, a statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

E. Takings (E.O. 12630)

This rule does not effect a taking of private property or otherwise have takings implications under E.O. 12630. Therefore, a takings implication assessment is not required.

F. Federalism (E.O. 13132)

Under the criteria in section 1 of E.O. 13132, this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement. Therefore, a federalism summary impact statement is not required.

G. Civil Justice Reform (E.O. 12988)

This rule complies with the requirements of E.O. 12988. Specifically, this rule:

(1) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and

(2) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

H. Consultation With Indian Tribes (E.O. 13175 and Departmental Policy)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian tribes through a commitment to consultation with Indian tribes and recognition of their right to self-governance and tribal sovereignty. We have evaluated this rule under the Department of the Interior's consultation policy, under Departmental Manual Part 512 Chapters 4 and 5, and under the criteria in E.O. 13175. We have determined that it has no substantial direct effects on federally recognized Indian tribes and that consultation under the Department of the Interior's tribal consultation policy is not required.

I. Paperwork Reduction Act

This rule does not contain information collection requirements, and a submission to the OMB under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) is not required. We may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number.

J. National Environmental Policy Act

This rule does not constitute a major Federal action significantly affecting the quality of the human environment. A detailed statement under the National Environmental Policy Act of 1969 (NEPA) is not required because the rule is covered by a categorical exclusion (see 43 CFR 46.210(i)). This rule is excluded from the requirement to prepare a detailed statement because it is a regulation of an administrative nature. We have also determined that the rule does not involve any of the extraordinary circumstances listed in 43 CFR 46.215 that would require further analysis under NEPA.

K. Effects on the Energy Supply (E.O. 13211)

This rule is not a significant energy action under the definition in E.O. 13211. Therefore, a Statement of Energy Effects is not required.

List of Subjects in 30 CFR Part 250

Administrative practice and procedure, Continental shelf, Environmental impact statements, Environmental protection, Government contracts, Incorporation by reference, Investigations, Oil and gas exploration, Penalties, Pipelines, Continental Shelf—mineral resources, Continental Shelf—rights-of-way, Reporting and recordkeeping requirements, Sulfur.

Amanda C. Leiter,

Acting Assistant Secretary, Land and Minerals Management.

PART 250—OIL AND GAS AND SULPHUR OPERATIONS IN THE OUTER CONTINENTAL SHELF

■ Accordingly, the interim rule amending 30 CFR part 250 which was published at 81 FR 41801 on June 28, 2016, is adopted as a final rule without change.

[FR Doc. 2016–27503 Filed 11–16–16; 8:45 am]

BILLING CODE 4310–MR–P

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 188

[Docket ID: DOD–2013–OS–0230]

RIN 0790–AJ16

DoD Environmental Laboratory Accreditation Program (ELAP)

AGENCY: Under Secretary of Defense for Acquisition, Technology, and Logistics, DoD.

ACTION: Final rule.

SUMMARY: This final rule establishes policy, assigns responsibilities, and provides procedures to be used by DoD personnel for the operation and management of the DoD ELAP. The DoD ELAP provides a unified DoD program through which commercial environmental laboratories can voluntarily demonstrate competency and document conformance to the international quality systems standards as they are implemented by DoD.

DATES: This rule is effective on December 19, 2016.

FOR FURTHER INFORMATION CONTACT: Edmund Miller, 571–372–6904.

SUPPLEMENTARY INFORMATION: On October 15, 2015 (80 FR 61997–62003), the Department of Defense published a proposed rule in the **Federal Register** titled ''DoD Environmental Laboratory Accreditation Program (ELAP)'' for a 60-day public comment period. After the 60-day public comment period had completed, no public comments were received. As a result, no changes were made to the rule text.

Executive Summary

The purpose of this regulatory action is to document the procedures for the operation and management of the DoD Environmental Laboratory Accreditation Program (ELAP). The legal authority for the regulatory action is Section 515, Treasury and General Government Appropriations Act for Fiscal Year 2001 (Public Law 106–554), which directed the Office of Management and Budget (OMB) to issue government-wide guidelines that ''provide policy and procedural guidance to Federal Agencies for ensuring and maximizing the quality, objectivity, utility, and integrity of information (including statistical information) disseminated by Federal Agencies.'' OMB guidelines, provided by FR Volume 67, Number 36, page 8452 (February 22, 2002) required federal agencies to maintain a basic standard of quality and take appropriate steps to incorporate information quality criteria into DoD public information dissemination practices. The guidance further provided that DoD Components shall adopt standards of quality that are appropriate to the nature and timeliness of the information they disseminate. The DoD ELAP provides the standards for ensuring the quality, objectivity, utility, and integrity of definitive environmental testing data disseminated by DoD for the Defense Environmental Restoration Program (DERP).

This rule includes a general overview of DoD ELAP and establishment of standard operating procedures. It utilizes the baseline quality systems requirements of The NELAC Institute (TNI) and ISO/IEC 17025 standards, but alone neither of these standards meet the testing and analysis needs for DERP. Therefore the DoD Quality Systems Manual (QSM) for environmental laboratories serves as the standard for DoD ELAP accreditation. The QSM contains the minimum requirements DoD considers essential to ensure the generation of definitive environmental data of know quality, appropriate for their intended uses. These minimal needs are not met by TNI or ISO 17025 standards alone. The DoD ELAP includes procedures on how to evaluate and recognize 3rd party accreditation bodies; perform and document government oversight of the DoD ELAP to ensure ongoing compliance with program requirements and to identify opportunities for continual improvement; conduct project-specific laboratory approvals for specific tests not addressed in the DoD ELAP; and handle specific complaints concerning the processes established by the DoD ELAP or the QSM.

Past DoD laboratory assessment programs were specific to each DoD Component and limited to available resources. This created an overlap in assessments and fewer opportunities for laboratories to participate on DoD contracts. This rule proposes to establish a program to allow qualified laboratories to received third-party accreditation and become eligible to provide environmental sampling and testing services for DoD. It will be a voluntary program open to any qualified laboratories wishing to participate, thereby promoting fair and open competition among commercial laboratories.

Since laboratories fund their own participation in the accreditation process, it will allow DoD to focus its resources on providing oversight of laboratory contracts. By proposing to replace separate DoD Component-specific laboratory approval programs, the DoD ELAP will eliminate redundant assessments, promote interoperability across the Department, streamline the process for DoD to identify and procure competent providers of environmental laboratory services, and provide more opportunities for commercial laboratories to participate in DoD environmental sampling and testing contracts.

The scope of accreditation under ELAP includes specific laboratory services such as the test methods used, type of material tested (soil, water, etc.), and type of contaminants measured. The evaluation of a test method also includes the use of internal laboratory standard operating procedures.

Statement of Legal Authority: 15 U.S.C. 3701 promotes transfer and utilization of science and technology resources of the Federal government. Public Law 106–554 requires the Federal government to ensure the quality and integrity of information disseminated by Federal agencies. In response, the DoD ELAP sets forth requirements on environmental laboratories conducting analytical testing for DoD to generate documented quality data capable of being reproduced in accordance with commonly accepted scientific standards and practices.

Regulatory Procedures

Executive Order 12866, ''Regulatory Planning and Review'' and Executive Order 13563, ''Improving Regulation and Regulatory Review''

Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distribute impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a ''significant regulatory action,'' because it does not: (1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy; a section of the economy; productivity; competition; jobs; the environment; public health or safety; or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another Agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in these Executive Orders.

Sec. 202, Public Law 104–4, ''Unfunded Mandates Reform Act''

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Pub. L. 104–4) requires agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2014, that threshold is approximately $141 million. This rule will not mandate any requirements for State, local, or tribal governments, nor will it affect private sector costs.

Public Law 96–354, ''Regulatory Flexibility Act'' (5 U.S.C. 601)

The Department of Defense does not expect this final rule would have a significant economic impact on a substantial number of small entities

within the meaning of the Regulatory Flexibility Act (5 U.S.C. 601, et. seq.). The rule establishes a policy to provide a unified DoD program for commercial environmental laboratories to voluntarily demonstrate competency and document conformance to the international quality system standards already implemented by DoD. The Department's experience with these laboratories indicates that the professional skill and technical requirements of the accreditation program limits the numbers of entities that are likely to be impacted by this rule to approximately 100 entities. Therefore, the Regulatory Flexibility Act, as amended, does not require that DoD prepare a regulatory flexibility analysis.

Public Law 96–511, ''Paperwork Reduction Act'' (44 U.S.C. Chapter 35)

It has been certified that 32 CFR part 188 does not impose reporting or recordkeeping requirements under the Paperwork Reduction Act of 1995. The requirements in this rule do not require OMB approval under the Paperwork Reduction Act as the information is collected by the four accreditation bodies and not the Department. These accreditation bodies accredit the laboratories to meet DoD standards for environmental sampling and testing.

Executive Order 13132, ''Federalism''

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. This rule will not have a substantial effect on State and local governments.

List of Subjects in 32 CFR Part 188

Laboratories, Oversight.

■ Accordingly, 32 CFR part 188 is added to read as follows:

PART 188—DOD ENVIRONMENTAL LABORATORY ACCREDITATION PROGRAM (ELAP)

Sec.
188.1 Purpose.
188.2 Applicability.
188.3 Definitions.
188.4 Policy.
188.5 Responsibilities.
188.6 Procedures.

Authority: 15 U.S.C. 3701; Pub. L. 106–554, 114 Stat. 2763.

§ 188.1 Purpose.

This part implements policy, assigns responsibilities, and provides procedures to be used by DoD personnel for the operation and management of the DoD ELAP.

§ 188.2 Applicability.

This part applies to Office of the Secretary of Defense, the Military Departments, the Office of the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Combatant Commands, the Office of the Inspector General of the Department of Defense, the Defense Agencies, the DoD Field Activities, and all other organizational entities within the DoD (referred to collectively in this part as the ''DoD Components'').

§ 188.3 Definitions.

Unless otherwise noted, these terms and their definitions are for the purposes of this part.

Accreditation. Third-party attestation conveying formal demonstration of a laboratory's competence to carry out specific tasks.

Accreditation body (AB). Authoritative organization that performs accreditation.

Assessment. Process undertaken by an AB to evaluate the competence of a laboratory, based on requirements contained in the DoD Quality Systems Manual for Environmental Laboratories (QSM), for a defined scope of accreditation.

Change. A reissuance of the DoD QSM containing minor changes to requirements or clarifications of existing requirements necessary to ensure consistent implementation.

Complaint. Defined in International Organization for Standardization/International Electrotechnical Commission (ISO/IEC) 17025:2005, ''General Requirements for the Competence of Testing and Calibration Laboratories'' (available for purchase at *http://www.iso.org/iso/store.htm*).

Contractor project chemist. Defined in Under Secretary of Defense for Acquisition, Technology, and Logistics Memorandum, ''Acquisitions Involving Environmental Sampling or Testing Services'' (available at *http://www.acq.osd.mil/dpap/dars/dfars/changenotice/2008/20080303/223.7.pdf*).

Corrective action response. Description, prepared by the laboratory, of specific actions to be taken to correct a deficiency and prevent its reoccurrence.

Deficiency. An unauthorized deviation from requirements.

Definitive data. Defined in DoD Instruction 4715.15, ''Environmental Quality Systems'' (available at *http://www.dtic.mil/whs/directives/corres/pdf/471515p.pdf*).

Environmental Data Quality Workgroup (EDQW) component principal. A voting member of the DoD EDQW.

Errata sheet. A document prepared by the EDQW and issued by the EDQW chair, defining minor ''pen and ink'' changes that apply to the most recently issued version of the DoD QSM. Errata will be corrected in the next change or revision of the DoD QSM.

Government chemist. Defined in USD(AT&L) Memorandum, ''Acquisitions Involving Environmental Sampling or Testing Services.''

Government oversight. The set of activities performed by or on behalf of the DoD EDQW to provide assurance that ABs and assessors are providing thorough, consistent, objective, and impartial assessments within the specified scopes of accreditation and to identify opportunities for continual improvement of the DoD QSM and DoD ELAP.

International Laboratory Accreditation Cooperation (ILAC) mutual recognition arrangement (MRA). An arrangement through which ABs are evaluated and accepted by their peers for conformance to ILAC rules and procedures. To be accepted into the ILAC MRA, the AB must become a signatory to its requirements; specifically, it must commit to maintain conformance with the current version of Deputy Secretary of Defense Memorandum, ''Ensuring Quality of Information Disseminated to the Public by the Department of Defense'') and ensure that the laboratories it accredits comply with ISO/IEC 17025:2005.

ILAC MRA peer evaluation. The process through which ABs are assessed by other ABs and receive or maintain acceptance into the ILAC MRA.

Project-specific laboratory approval. The set of activities undertaken by the DoD EDQW to assess whether a laboratory is competent to perform specific tests, in the case where no DoD–ELAP accredited laboratory is able to perform the required tests.

Quality system. Defined in ISO/IEC 17025:2005.

Recognition. The acceptance of an AB by the EDQW based on its demonstrated commitment to maintain signatory status in the ILAC MRA and accept the DoD ELAP conditions and criteria for recognition.

Revision. A reissuance of the DoD QSM containing significant changes in requirements or scope. A significant change is one that could reasonably be expected to affect a laboratory's ability to comply with the requirement (*i.e.,* the laboratory is likely to have to make a change in its quality system or technical

procedures in order to maintain compliance).

Scope of accreditation. Specific laboratory services, stated in terms of test method, matrix, and analyte, for which accreditation is sought or has been granted.

§ 188.4 Policy.

It is DoD policy, in accordance with DoD Instruction 4715.15, to implement the DoD ELAP for the collection of definitive data in support of the Defense Environmental Restoration Program (DERP) at all DoD operations, activities, and installations, including government-owned, contractor-operated facilities and formerly used defense sites.

§ 188.5 Responsibilities.

(a) *Secretaries of the Military Departments and Director, Defense Logistics Agency (DLA).* The Director, DLA, is under the authority, direction, and control of the USD(AT&L), through the Assistant Secretary of Defense for Logistics and Materiel Readiness. The Secretaries of the Military Departments and Director, DLA:

(1) Provide resources to support project-specific government oversight for the collection of definitive data in support of the DERP.

(2) Provide resources to support project-specific laboratory approvals, if required.

(b) *Secretary of the Navy.* In addition to the responsibilities in paragraph (a) of this section, the Secretary of the Navy plans, programs, and budgets for DoD EDQW activities necessary to support government oversight of the DoD ELAP.

§ 188.6 Procedures.

(a) *DoD ELAP Overview*—(1) *Introduction.* (i) DoD ELAP provides a unified DoD program through which commercial environmental laboratories can voluntarily demonstrate competency and document conformance to the international standard established in ISO/IEC 17025:2005 as implemented by the Deputy Under Secretary of Defense for Environmental Security Memorandum, ''DoD Quality Systems Manual for Environmental Laboratories'' (available at *http://www.denix.osd.mil/edqw/upload/QSM-V4-2-Final-102510.pdf*) (referred to in this part as the ''DoD Quality Systems Manual for Environmental Laboratories (QSM)''). The DoD QSM provides minimum quality systems requirements, based on ISO/IEC 17025:2005, for environmental laboratories performing testing for DoD.

(ii) DoD ELAP was developed in compliance with 15 U.S.C. 3701 (also known as the ''National Technology Transfer and Advancement Act''). Support and guidance was provided by the National Institute of Standards and Technology, following procedures used to establish similar programs for other areas of testing. The DoD ELAP supports implementation of section 515 of Public Law 106–554, ''Treasury and General Government Appropriations Act, 2001'' and Office of Management and Budget Guidance, ''Guidelines for Ensuring and Maximizing the Quality, Objectivity, Utility, and Integrity of Information Disseminated by Federal Agencies'' (67 FR 8452) as implemented by Deputy Secretary of Defense Memorandum, ''Ensuring Quality of Information Disseminated to the Public by the Department of Defense.''

(iii) Using third party ABs operating in accordance with the international standard ISO/IEC 17011:2004(E), ''Conformity Assessment—General Requirements for Accreditation Bodies Accrediting Conformity Assessment Bodies'' (available for purchase at *http://www.iso.org/iso/store.htm*), the DoD ELAP:

(A) Promotes interoperability among the DoD Components.

(B) Promotes fair and open competition among commercial laboratories.

(C) Streamlines the process for identifying and procuring competent providers of environmental laboratory services.

(D) Promotes the collection of data of known and documented quality.

(2) *Authority.* Operation of the DoD ELAP is authorized by DoD Instruction 4715.15.

(3) *Program requirements.* (i) Pursuant to DoD Instruction 4715.15, laboratories seeking to perform testing in support of the DERP must be accredited in accordance with DoD ELAP.

(ii) The DoD ELAP applies to:

(A) Environmental programs at DoD operations, activities, and installations, including government-owned, contractor-operated facilities and formerly used defense sites.

(B) Permanent, temporary, and mobile laboratories regardless of their size, volume of business, or field of accreditation that generate definitive data.

(iii) Participation in the program is voluntary and open to all laboratories that operate under a quality system conforming to ISO/IEC 17025:2005 and Deputy Under Secretary of Defense for Environmental Security Memorandum, ''DoD Quality Systems Manual for Environmental Laboratories.'' Laboratories may seek accreditation for any method they perform in accordance with documented procedures, including non-standard methods. Laboratories are free to select any participating AB for accreditation services.

(iv) To participate in DoD ELAP, ABs must be U.S.-based signatories to the ILAC MRA and must operate in accordance with ISO/IEC 17011:2004(E).

(4) *Program oversight.* In accordance with Assistant Deputy Under Secretary of Defense for Installations and Environment Memorandum, ''DoD Environmental Data Quality Workgroup Charter'' (available at *http://www.denix.osd.mil/edqw/upload/USA004743-10-Signed-Memo-to-DASs-DLA-DoD-Envir-Data-Quality-Workgroup-Charter-1Oct10-1.pdf*), the DoD EDQW:

(i) Provides coordinated responses to legislative and regulatory initiatives.

(ii) Responds to requests for DoD Component information.

(iii) Develops and recommends department-wide policy related to sampling, testing, and quality assurance for environmental programs.

(iv) Implements and provides oversight for the DoD ELAP.

(v) Includes technical experts from the Military Services and DLA as well as an EDQW component principal (voting) member from each of the Military Services.

(vi) Specifies the EDQW Navy principal, Director of Naval Sea Systems Command (NAVSEASYSCOM) 04XQ(LABS), serve as EDQW chair.

(b) *Maintaining the DoD QSM*—(1) *General.* The DoD EDQW will maintain and improve the DoD QSM to ensure that:

(i) The DoD QSM remains current in accordance with ISO/IEC 17025:2005.

(ii) Minimum essential requirements are met.

(iii) Requirements are clear, concise, and auditable.

(iv) The DoD QSM will efficiently and effectively support the DoD ELAP.

(2) *Procedures.*— (i) *Annual review.* At a minimum, the DoD EDQW will perform an annual review of the DoD QSM, based on feedback received from participants in DoD ELAP (*e.g.,* DoD Components, commercial laboratories, and ABs). The review will also address any revisions to ISO/IEC 17025:2005.

(ii) *Ongoing review.* As received, the DoD EDQW will respond to questions submitted through the Defense Environmental Network Information Exchange (DENIX) concerning the interpretation of DoD QSM requirements. DoD EDQW participants will forward all questions through their EDQW component principal to the DoD EDQW chair.

(iii) *Issuances.* The DoD EDQW chair will prepare DoD QSM updates:

(A) *Correspondence.* The DoD EDQW chair, in consultation with the EDQW component principals, will prepare correspondence (email or memorandum) providing responses to all written requests for clarification and interpretation of the DoD QSM. Depending on the significance of the issue, as determined by the EDQW chair, the response may also result in a posting to the frequently asked question (FAQ) section of the appropriate Web sites.

(B) *Errata sheets.* Minor corrections to the DoD QSM, such as typographical errors, may be made by the issuance of an errata sheet defining ''pen and ink'' changes that apply to the current version of the DoD QSM. Following concurrence by all EDQW component principals, errata sheets will be issued as needed by the DoD EDQW chair. Errata will be corrected in the next change or revision to the DoD QSM.

(C) *Changes.* Changes to the DoD QSM will be issued as necessary to reflect minor changes to requirements or clarifications of existing requirements that are necessary to ensure consistent implementation. Following concurrence by the EDQW component principals, changes will be issued by the DoD EDQW chair in the form of a complete DoD QSM.

(*1*) The first change to DoD QSM Version 4 will be numbered Version 4.1, the second change will be Version 4.2, etc.

(*2*) Changes to the DoD QSM will be posted on DENIX in place of the previous version or change of the DoD QSM.

(D) *Revisions.* A revision will be issued if one or more of the proposed changes could reasonably be expected to affect a laboratory's ability to comply with the requirement (*i.e.,* the laboratory is likely to have to make a change in its quality system or technical procedures).

(*1*) Once EDQW component principals have reached consensus on the proposed revision, the DoD EDQW chair will forward the proposed revision to all participating DoD ELAP-accredited laboratories and ABs for review.

(*2*) The DoD EDQW will review and respond to comments received from the DoD ELAP-accredited laboratories and ABs within the designated comment period.

(*3*) Following concurrence by the EDQW component principals, revisions will be issued by the DoD EDQW chair in the form of a complete DoD QSM.

(*4*) A revision of Version 4 will be issued as Version 5, a revision of Version 5 will be issued as Version 6, etc.

(*5*) The final revised version of the DoD QSM will be posted on DENIX in place of the previous version including any DoD QSM updates.

(3) *Continual improvement.* The DoD EDQW will meet with the ABs on an annual basis to review lessons learned and identify additional opportunities for continual improvement of the DoD ELAP and the DoD QSM.

(4) *Data and records management.* Through NAVSEASYSCOM, the DoD EDQW will maintain all DoD QSM updates in accordance with Secretary of the Navy Manual M–5210.1, ''Department of the Navy Records Management Program: Records Management Manual'' (available at *http://doni.daps.dla.mil/SECNAV%20Manuals1/5210.1.pdf*).

(c) *Recognizing ABs.*—(1) *General.* (i) The DoD EDQW will:

(A) Use the procedures in this paragraph to evaluate and recognize third-party ABs in support of the DoD ELAP.

(B) Develop and maintain the application for recognition, the conditions and criteria for recognition and related forms, and review submitted AB applications for completeness and compliance with DoD ELAP requirements.

(ii) The DoD EDQW chair, following consultation with and concurrence by the EDQW component principals, grants or revokes AB recognition in accordance with this paragraph.

(2) *Limitations.* Candidate ABs must be U.S.-based signatories in good standing to the ILAC MRA. ABs must maintain ILAC recognition to maintain DoD ELAP recognition. Because the EDQW continually monitors AB performance, no pre-defined limits are placed on the duration of recognition; however, the EDQW may revoke recognition at any time, for cause, in accordance with paragraph (c)(3)(vii) of this section.

(3) *Procedures.* (i) Upon receipt of an application for recognition, the DoD EDQW will review the application package for completeness. A complete application package must include:

(A) Application for recognition.

(B) Signed acceptance of the conditions and criteria for DoD ELAP recognition.

(C) Electronic copy of the AB's quality systems documentation.

(D) Copy of the most recent ILAC MRA peer evaluation documentation.

(ii) If necessary to complete the review, the DoD EDQW will request additional documentation from the applicant.

(iii) The EDQW component principals will review the application package for compliance with requirements. Prior to granting recognition, the EDQW component principals must unanimously concur that all application requirements have been met.

(iv) Once the EDQW component principals have completed review of the application package, the DoD EDQW chair will notify the AB, either granting recognition or citing specific reasons for not doing so (*i.e.,* indicating which areas of the application package are deficient).

(v) Once recognition has been granted, the DoD EDQW chair will post the name and contact information of the AB on DENIX.

(vi) With unanimous concurrence, the EDQW component principals may revoke recognition if the AB:

(A) Violates any of the conditions or criteria for recognition.

(B) Fails to operate in accordance with its documented quality system.

(vii) Should it become necessary to revoke an AB's recognition, the DoD EDQW chair will notify the AB stating specific reasons for the revocation and remove the AB's name from the list of DoD ELAP-recognized ABs.

(viii) If recognition is revoked, the AB must immediately cease to perform all DoD ELAP assessments.

(ix) ABs who have been denied recognition, or ABs whose recognition has been revoked, may appeal that decision.

(A) Within 15 calendar days of its receipt of a notice denying or revoking recognition, the AB must submit to the DoD EDQW chair a written statement with supporting documentation contesting the denial or revocation.

(B) The submission must demonstrate that:

(*1*) Clear, factual errors were made by the DoD EDQW during the review of the AB's application for recognition; or

(*2*) The decision to revoke recognition was based on clear, factual errors, and that the AB would have been determined to meet all requirements for recognition if those errors had been corrected.

(x) The DoD EDQW will have up to 30 calendar days to review the appeal and provide written notice to the AB either accepting the appeal and granting, or restoring, recognition, or explaining the basis for denying the appeal.

(4) *Continual improvement.* The DoD EDQW will meet with ABs on an annual basis to review lessons learned and identify additional opportunities for continual improvement of the DoD ELAP. On a 5-year cycle, at minimum, the DoD EDQW will evaluate whether the process for evaluating and

recognizing ABs is continuing to meet DoD needs.

(5) *Data and records management.* Through NAVSEASYSCOM, the DoD EDQW, will maintain copies of all application packages and associated documentation in accordance with Secretary of the Navy Manual M–5210.1.

(d) *Performing government oversight*—(1) *General.* DoD personnel will use the procedures in this paragraph to perform and document government oversight of the DoD ELAP. Government oversight will include monitoring the performance of AB assessors during laboratory assessments, reviewing laboratory assessment reports, observing ILAC MRA peer evaluations, and evaluating AB Web sites for content on accredited laboratories.

(2) *Limitations.* (i) DoD personnel performing oversight must observe, but must not participate in, laboratory assessments or ILAC MRA peer evaluations. Specifically, DoD personnel must not:

(A) Offer specific advice to the laboratory regarding the development or implementation of quality systems or technical procedures;

(B) Offer specific advice or direction to assessors or peer evaluators regarding accreditation processes, assessment procedures, or documentation of findings; or

(C) Impede assessors, peer reviewers, or laboratory personnel in any way during the performance of their work, including technical procedures, document reviews, observations, interviews, and meetings.

(ii) If, during the course of an assessment, questions by laboratory personnel or assessors are directed to DoD personnel, personnel must limit responses to specific text from the DoD QSM or published FAQs. DoD personnel must not render opinions regarding interpretation of the DoD QSM. If there are questions about the DoD QSM that require interpretation, DoD personnel must advise the assessor to contact the AB who may, if necessary, contact the DoD EDQW chair for a coordinated response.

(iii) If DoD personnel observe any evidence of inappropriate practices on the part of assessors or laboratory personnel during the course of the assessment, they must record the observations and notify the DoD EDQW chair immediately (inappropriate practices are identified in the DoD QSM). DoD personnel must not call either the laboratory's or the assessor's attention to the specific practice in question.

(3) *Personnel qualifications.* DoD personnel or contractors performing oversight must:

(i) Meet the government chemist or contractor project chemist requirements contained in the USD(AT&L) Memorandum, ''Acquisitions Involving Environmental Sampling or Testing Services.''

(ii) Have a working knowledge of the DoD QSM requirements and be familiar with environmental test methods and instrumentation.

(iii) Obey all laboratory instructions regarding health and safety precautions while in the laboratory.

(4) *Procedures.* (i) The DoD EDQW will maintain an up-to-date calendar of scheduled assessments and peer evaluations based on input from the ABs, peer evaluators, and assigned oversight personnel.

(ii) Once an assessment or peer review has been scheduled, the EDQW component principals will determine if DoD oversight of the activity will be performed. The goal will be to observe a representative number of activities for each AB.

(iii) The EDQW component principals will provide the DoD EDQW chair the names of personnel from their respective DoD Components who will participate in the oversight.

(iv) The DoD EDQW chair will provide the AB with contact information for the oversight personnel.

(v) If two or more DoD personnel are scheduled to monitor the assessment, the DoD EDQW chair will designate a lead that will be responsible for compiling an oversight report.

(vi) The lead for the oversight activity will request a copy of the assessment plan from the AB's lead assessor and distribute it to other oversight personnel.

(vii) The lead will review the assessment plan to determine the scope of accreditation and ensure that oversight personnel are assigned to monitor a cross-section of the assessment.

(viii) Persons performing oversight will review previous oversight reports, if available, for the particular AB and assessors performing the assessment.

(ix) Observing all health and safety protective measures, oversight personnel must accompany the assessor(s) as they witness procedures and conduct interviews, taking care not to interfere with the assessment.

(5) *Reporting.* Within 15 calendar days of the onsite assessment, the lead for the oversight activity will complete an oversight report and forward the completed report through the appropriate EDQW component principal to the DoD EDQW chair.

(i) The DoD EDQW chair will provide copies of the report to the EDQW component principals for review.

(ii) After review by the EDQW component principals, the DoD EDQW chair will provide a summary of the oversight report to the AB performing the assessment.

(6) *Handling disputes.* Laboratories must follow the AB's dispute resolution process for all disputes concerning the assessment or accreditation of the laboratory, including disagreements involving an interpretation of the DoD QSM arising during the accreditation process.

(i) In the event the laboratory and the AB are unable to resolve a disagreement concerning the interpretation of the DoD QSM, either the laboratory or the AB may request the DoD EDQW provide an interpretation of the DoD QSM. The DoD EDQW chair will provide a written response to the laboratory and the AB providing the DoD authoritative interpretation of the DoD QSM. No review of this interpretation will be available to the laboratory or the AB.

(ii) The DoD EDQW will not consider or take a position on requests by either a laboratory or an AB on a dispute concerning accreditation of the laboratory.

(7) *Continual improvement.* The DoD EDQW will:

(i) Review the ABs' assessment reports and the DoD oversight reports to evaluate the thoroughness, consistency, objectivity, and impartiality of the DoD ELAP assessments.

(ii) Compare assessment reports across laboratories, ABs, and assessors.

(iii) Compare DoD ELAP findings to findings from previous assessments.

(iv) Identify opportunities for continual improvement of the DoD ELAP.

(v) Meet with ABs on an annual basis to review lessons learned and identify additional opportunities for continual improvement of the DoD ELAP.

(8) *Data and records management.* Through NAVSEASYSCOM, the DoD EDQW will maintain copies of all oversight reports in accordance with Secretary of the Navy Manual M–5210.1.

(e) *Conducting project-specific laboratory approvals*—(1) *General.* The DoD EDQW will use the procedures in this paragraph to conduct project-specific laboratory approvals for specific tests in the rare instances when DoD is unable to identify a DoD ELAP-accredited laboratory capable of providing the required services. This will ensure that competent laboratories

are used to support DoD environmental projects. Examples of these rare instances include:

(i) The required method, matrix, or analyte is not included in the scope of accreditation for any existing DoD ELAP-accredited laboratories.

(ii) The required method, matrix, and analyte combination is included in the scope of accreditation for an existing accredited laboratory; however, the laboratory is unable to meet one or more of the project-specific measurement performance criteria.

(2) *Limitations.* (i) Project-specific laboratory approvals are not to be used as substitutes for the required DoD ELAP-accreditation.

(ii) The DoD EDQW will not perform project-specific laboratory approvals in cases where one or more DoD ELAP-accredited laboratories capable of meeting project-specific requirements are available.

(iii) The project-specific laboratory approval is a one-time approval, the specific terms of which will be outlined in the approval notice issued by the DoD EDQW.

(3) *Personnel qualifications.* DoD personnel and contractors assessing laboratories for the purpose of performing project-specific laboratory approvals must meet the government chemist or contractor project chemist requirements contained in USD(AT&L) Memorandum, ''Acquisitions Involving Environmental Sampling or Testing Services.'' Personnel must have a working knowledge of the DoD QSM requirements and be familiar with required environmental test methods and instrumentation.

(4) *Procedures.* (i) If a project-specific laboratory approval is requested, the DoD EDQW will request and review a copy of the project's quality assurance project plan (QAPP).

(ii) If, after review of the QAPP, the DoD EDQW determines that an existing DoD ELAP-accredited laboratory is available to provide the required services, the laboratory contact information will be provided to the project manager requesting assistance.

(iii) If, after review of the QAPP, the DoD EDQW determines that no existing DoD ELAP-accredited laboratory is available to provide the required services, the DoD EDQW will:

(A) Work with the project team to determine whether the use of alternative procedures by an existing DoD ELAP-accredited laboratory is feasible;

(B) Determine if the required services can be added to the scope of accreditation of an existing DoD ELAP-accredited laboratory; or

(C) Work with the project team to identify a candidate laboratory for project-specific laboratory approval.

(iv) If a project-specific approval is needed, the DoD EDQW will:

(A) Determine the type of assessment required (on-site, document review, etc.).

(B) Determine if additional funding is required to support the assessment. If additional funding is required, the DoD EDQW will provide a cost estimate and work with the project manager to establish funding.

(v) If the DoD EDQW determines that a project-specific laboratory approval is warranted and resources (including funding and technical expertise) are available to support the assessment, the DoD EDQW chair will coordinate with the EDQW component principals to appoint an assessment team with appropriate technical backgrounds.

(vi) The DoD EDQW chair will designate an assessment team leader. The assessment team leader will:

(A) Request the documentation needed to perform the assessment.

(B) Assign responsibilities for individual members of the assessment team, if appropriate.

(C) Coordinate the document reviews.

(D) Lead the assessment team in the performance of the on-site assessment, if required.

(E) Provide a report to the DoD EDQW chair. The report will identify whether:

(*1*) The laboratory is capable of meeting all project-specific requirements.

(*2*) Documentation procedures are in place to provide data that are scientifically valid, defensible, and reproducible.

(*3*) Any deficiencies must be corrected prior to granting the project-specific laboratory approval.

(vii) The DoD EDQW chair, with concurrence by the EDQW component principals, will issue a report to the project manager and laboratory detailing the results of the assessment and any deficiencies that must be corrected prior to granting a project-specific laboratory approval.

(viii) Upon receipt of the laboratory's corrective action response, if required, the assessment team will:

(A) Review the laboratory's corrective action response for resolving the deficiencies.

(B) Provide the EDQW component principals with a final report describing the resolution of findings and containing recommendations on whether to grant the project-specific laboratory approval.

(ix) The DoD EDQW chair, with concurrence by the EDQW component principals, will prepare a report for the DoD project manager describing the results of the assessment and the status and terms of the project-specific laboratory approval. Information about project-specific laboratory approvals will not be posted on Web sites listing DoD ELAP-accredited laboratories.

(5) *Continual improvement.* The EDQW component principals will review project-specific laboratory assessment reports to evaluate the thoroughness, consistency, objectivity, and impartiality of project-specific assessments and make recommendations for continual improvement of the DoD QSM and the DoD ELAP.

(6) *Data and records management.* Through NAVSEASYSCOM, the DoD EDQW will maintain copies of all laboratory records and project-specific assessment reports in accordance with Secretary of the Navy Manual M–5210.1.

(f) *Handling complaints*—(1) *General.* The DoD EDQW will use the procedures in this paragraph to handle complaints concerning the processes established in the DoD ELAP or the DoD QSM. The DoD EDQW will document and resolve complaints promptly through the appropriate channels, consistently and objectively, and identify and implement any necessary corrective action arising from complaints. Complaints generally fall into one of four categories:

(i) Complaints by any party against an accredited laboratory.

(ii) Complaints by any party against an AB.

(iii) Complaints by any party concerning any assessor acting on behalf of the AB.

(iv) Complaints by any party against the DoD ELAP itself.

(2) *Limitations.* The procedures in this paragraph:

(i) Do not address appeals by laboratories regarding accreditation decisions by ABs. Appeals to decisions made by ABs regarding the accreditation status of any laboratory must be filed directly with the AB in accordance with agreements in place between the laboratory and the AB.

(ii) Are not designed to handle allegations of unethical or illegal actions as described in paragraph (d)(2)(iii) of this section.

(iii) Do not address complaints involving contractual requirements between a laboratory and its client. All contracting issues must be resolved with the contracting officer.

(3) *Procedures.* (i) All complaints must be filed in writing to the EDQW chair. All complaints must provide the basis for the complaint (*i.e.,* the specific

process or requirement in the DoD ELAP or the DoD QSM that has not been satisfied or is believed to need changing) and supporting documentation, including descriptions of attempts to resolve the complaint by the laboratory or the AB.

(ii) Upon receipt of the complaint, the DoD EDQW chair will assign a unique identifier to the complaint, send a notice of acknowledgement to the complainant, and forward a copy of the complaint to the EDQW component principals.

(iii) In consultation with the EDQW component principals, the DoD EDQW chair will make a preliminary determination of the validity of the complaint. Following preliminary review, the actions available to the DoD EDQW chair include:

(A) If the DoD EDQW chair determines the complaint should be handled directly between the complainant and the subject of the complaint, the DoD EDQW will refer the complaint to the laboratory, or AB, as appropriate. The DoD EDQW will notify the complainant of the referral, but will take no further action with respect to investigation of the complaint. The subject of the complaint will be expected to respond to the complainant in accordance with their established procedures and timelines. A copy of the response will be provided to the DoD EDQW.

(B) If insufficient information has been provided to determine whether the complaint has merit, the DoD EDQW will return the complaint to the complainant with a request for additional supporting documentation.

(C) If the complaint appears to have merit and the parties to the complaint have been unable to resolve it, the DoD EDQW will investigate the complaint and recommend actions for its resolution.

(D) If available information does not support the complaint, the DoD EDQW may reject the complaint.

(E) If the complaint alleges inappropriate laboratory practices or other misconduct, the DoD EDQW chair will consult legal counsel to determine the recommended course of action.

(iv) In all cases, the DoD EDQW will notify the complainant and any other entity involved in the complaint and explain the response of the EDQW to the complaint.

(4) *Continual improvement.* The DoD EDQW will look into root causes and trends in complaints to help identify actions that should be taken by the DoD EDQW, or any parties involved with DoD ELAP, to prevent recurrence of problems that led to the complaints.

(5) *Data and records management.* Through NAVSEASYSCOM, the DoD EDQW will maintain copies of all complaint documentation in accordance with Secretary of the Navy Manual M–5210.1.

Dated: November 14, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2016–27645 Filed 11–16–16; 8:45 am]

BILLING CODE 5001–06–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2016–0675]

RIN 1625–AA87

Security Zone; Potomac River and Anacostia River, and Adjacent Waters; Washington, DC

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a series of security zones in the National Capital Region (NCR) on specified waters of the Potomac River and Anacostia River, and adjacent waters during increased security events. This action is necessary to prevent terrorist acts and incidents immediately before, during, and after events held within the NCR, whenever such an event exists, as determined by the Captain of the Port Maryland-National Capital Region. This rule prohibits vessels and persons from entering the security zone and requires vessels and persons in the security zone to depart the security zone, unless specifically exempt under the provisions in this rule or granted specific permission from the Coast Guard Captain of the Port Maryland-National Capital Region. The regulations will enhance the safety and security of persons and property within the Nation's Capital, while minimizing, to the extent possible, the impact on commerce and legitimate waterway use.

DATES: This rule is effective December 19, 2016.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type USCG–2016–0675 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Mr. Ronald L. Houck, at Sector Maryland-National Capital Region Waterways Management Division, U.S. Coast Guard; telephone 410–576–2674, email *Ronald.L.Houck@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

On September 2, 2016, the Coast Guard published a notice of proposed rulemaking (NPRM) titled ''Security Zone; Potomac River and Anacostia River, and adjacent waters; Washington, DC'' in the **Federal Register** (81 FR 60663). There we stated why we issued the NPRM, and invited comments on our proposed regulatory action related to this security zone. During the comment period that ended November 1, 2016, we received no comments.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 33 U.S.C. 1231. The COTP determined that it is necessary to establish a series of security zones within the NCR. The purpose of these security zones is to ensure the safety of vessels and the relevant navigable waters before, during, and after the event.

IV. Discussion of Comments, Changes, and the Rule

As noted above, we received no comments on our NPRM published on September 2, 2016. There are no changes in the regulatory text of this rule from the proposed rule in the NPRM.

This rule establishes a series of security zones on specified waters of the Potomac River, Anacostia River and adjacent waters. The security zones cover specified navigable waters within the NCR whenever an event that requires increased security is taking place. The duration of the zone is intended to ensure the safety of vessels and these navigable waters before, during, and after the event. No vessel or person would be permitted to enter the security zone without obtaining permission from the COTP or a designated representative. The COTP Maryland-National Capital Region will notify the maritime community, via

Broadcast Notice to Mariners (BNM), of the location and duration of the security zone as the increased security event dictates. The security zone established for a specific increased security event will consist of one or more of the security zones categorized below.

Security zone one includes all navigable waters of the Potomac River, from shoreline to shoreline, bounded to the north by the Francis Scott Key (US–29) Bridge, at mile 113, and bounded to the south by a line drawn from the Virginia shoreline at Ronald Reagan Washington National Airport, at 38°51′21.3″ N., 077°02′00.0″ W., eastward across the Potomac River to the District of Columbia shoreline at Hains Point at position 38°51′24.3″ N., 077°01′19.8″ W., including the waters of the Boundary Channel, Pentagon Lagoon, Georgetown Channel Tidal Basin, and Roaches Run. Events that typically require enforcement of the zone include activities associated with the U.S. Presidential Inauguration and State funerals for former Presidents of the U.S.

Security zone two includes all navigable waters of the Anacostia River, from shoreline to shoreline, bounded to the north by the John Philip Sousa (Pennsylvania Avenue) Bridge, at mile 2.9, and bounded to the south by a line drawn from the District of Columbia shoreline at Hains Point at position 38°51′24.3″ N., 077°01′19.8″ W., southward across the Anacostia River to the District of Columbia shoreline at Giesboro Point at position 38°50′52.4″ N., 077°01′10.9″ W., including the waters of the Washington Channel. Events that typically require enforcement of the zone include activities associated with the U.S. Presidential Inauguration and State funerals for former Presidents of the U.S.

Security zone three includes all navigable waters of the Potomac River, from shoreline to shoreline, bounded to the north by a line drawn from the Virginia shoreline at Ronald Reagan Washington National Airport, at 38°51′21.3″ N., 077°02′00.0″ W., eastward across the Potomac River to the District of Columbia shoreline at Hains Point at position 38°51′24.3″ N., 077°01′19.8″ W., thence southward across the Anacostia River to the District of Columbia shoreline at Giesboro Point at position 38°50′52.4″ N., 077°01′10.9″ W., and bounded to the south by the Woodrow Wilson Memorial (I–95/I–495) Bridge, at mile 103.8. Events that typically require enforcement of the zone include activities associated with the U.S. Presidential Inauguration and State funerals for former Presidents of the U.S.

The above zones may also be enforced for unplanned events requiring increased security, including but not limited to presidential nominating conventions; international summits and conferences; and meetings of international organizations.

Security zone four includes all navigable waters of the Georgetown Channel of the Potomac River, 75 yards from the eastern shore measured perpendicularly to the shore, between the Long Railroad Bridge (the most eastern bridge of the 5-span, Fourteenth Street Bridge Complex) to the Theodore Roosevelt Memorial Bridge and all waters in between, totally including the waters of the Georgetown Channel Tidal Basin. This zone is enforced annually from 12:01 a.m. to 11:59 p.m. local time on July 4.

Security zone five includes all navigable waters in the Potomac River, including the Boundary Channel and Pentagon Lagoon, bounded on the west by a line running north to south from points along the shoreline at 38°52′50″ N./077°03′25″ W., thence to 38°52′49″ N./077°03′25″ W.; and bounded on the east by a line running from points at 38°53′10″ N./077°03′30″ W., thence northeast to 38°53′12″ N./077°03′26″ W., thence southeast to 38°52′31″ N./077°02′34″ W., and thence southwest to 38°52′28″ N./077°02′38″ W. This zone will be enforced on three days each year: Memorial Day (observed), September 11, and November 11. Specifically, the zone will be enforced from 10 a.m. until 1 p.m. on Memorial Day (observed); from 8 a.m. until 11:59 a.m. on September 11; and from 10 a.m. until 1 p.m. on November 11.

Security zone six includes all navigable waters of the Potomac River, from shoreline to shoreline, bounded on the north by the Francis Scott Key (U.S. Route 29) Bridge at mile 113.0, downstream to and bounded on the south by the Woodrow Wilson Memorial (I–95/I–495) Bridge, at mile 103.8, including the waters of the Boundary Channel, Pentagon Lagoon, Georgetown Channel Tidal Basin, and Roaches Run; and all waters of the Anacostia River, from shoreline to shoreline, bounded on the north by the John Philip Sousa (Pennsylvania Avenue) Bridge, at mile 2.9, downstream to and bounded on the south by its confluence with the Potomac River. This zone will be enforced annually for the State of the Union Address, starting at 9 a.m. on the day of the State of the Union Address through 2 a.m. the following day.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, it has not been reviewed by the Office of Management and Budget.

This regulatory action determination is based on the size, location, duration and time of year of the security zones. The Coast Guard determined that this rulemaking would not be a significant regulatory action for the following reasons: Security zones one, two and three are expected to be enforced for only a week or two at a time and on only a few occasions per year. Additionally, the Coast Guard designed the areas for security zones one, two and three to cover only a portion of the navigable waterways while still sustaining the flow of commerce, and mariners may request permission from the COTP Maryland-National Capital Region or the designated representative to transit the zone. Security zones four and five are expected to be enforced for only less than 24 hours at a time and on only a few occasions per year. Additionally, the Coast Guard designed the areas for security zones four and five to cover only a small portion of the navigable waterways, waterway users may transit the Potomac River around the areas, and mariners may request permission from the COTP Maryland-National Capital Region or the designated representative to transit the zone. Security zone six is expected to be enforced for only less than 24 hours at a time and on only on one occasion per year when vessel traffic is normally low. Additionally, the Coast Guard designed the area for security zone six to cover only a portion of the navigable waterways while still sustaining the flow of commerce, and mariners may request permission from the COTP Maryland-National Capital Region or the

designated representative to transit the zone. Moreover, the Coast Guard would issue a Broadcast Notice to Mariners via VHF–FM marine channel 16 about the zone, and the rule would allow vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard received no comments from the Small Business Administration on this rulemaking. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves security zones that would prohibit entry on specified waters of the Potomac River and Anacostia River, and adjacent waters, during increased security events. It is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Revise § 165.508 to read as follows:

§ 165.508 Security Zone; Potomac River and Anacostia River, and adjacent waters; Washington, DC.

(a) *Location.* Coordinates used in this paragraph are based on NAD83. The following areas are security zones:

(1) *Zone 1.* All navigable waters of the Potomac River, from shoreline to shoreline, bounded to the north by the Francis Scott Key (US–29) Bridge, at mile 113, and bounded to the south by a line drawn from the Virginia shoreline at Ronald Reagan Washington National Airport, at 38°51′21.3″ N., 077°02′00.0″ W., eastward across the Potomac River to the District of Columbia shoreline at Hains Point at position 38°51′24.3″ N., 077°01′19.8″ W., including the waters of the Boundary Channel, Pentagon Lagoon, Georgetown Channel Tidal Basin, and Roaches Run;

(2) *Zone 2.* All navigable waters of the Anacostia River, from shoreline to shoreline, bounded to the north by the John Philip Sousa (Pennsylvania Avenue) Bridge, at mile 2.9, and bounded to the south by a line drawn from the District of Columbia shoreline at Hains Point at position 38°51′24.3″

N., 077°01′19.8″ W., southward across the Anacostia River to the District of Columbia shoreline at Giesboro Point at position 38°50′52.4″ N., 077°01′10.9″ W., including the waters of the Washington Channel;

(3) *Zone 3.* All navigable waters of the Potomac River, from shoreline to shoreline, bounded to the north by a line drawn from the Virginia shoreline at Ronald Reagan Washington National Airport, at 38°51′21.3″ N., 077°02′00.0″ W., eastward across the Potomac River to the District of Columbia shoreline at Hains Point at position 38°51′24.3″ N., 077°01′19.8″ W., thence southward across the Anacostia River to the District of Columbia shoreline at Giesboro Point at position 38°50′52.4″ N., 077°01′10.9″ W., and bounded to the south by the Woodrow Wilson Memorial (I–95/I–495) Bridge, at mile 103.8.

(4) *Zone 4.* All navigable waters of the Georgetown Channel of the Potomac River, 75 yards from the eastern shore measured perpendicularly to the shore, between the Long Railroad Bridge (the most eastern bridge of the 5-span, Fourteenth Street Bridge Complex) to the Theodore Roosevelt Memorial Bridge; and all waters in between, totally including the waters of the Georgetown Channel Tidal Basin.

(5) *Zone 5.* All navigable waters in the Potomac River, including the Boundary Channel and Pentagon Lagoon, bounded on the west by a line running north to south from points along the shoreline at 38°52′50″ N., 077°03′25″ W., thence to 38°52′49″ N., 077°03′25″ W.; and bounded on the east by a line running from points at 38°53′10″ N., 077°03′30″ W., thence northeast to 38°53′12″ N., 077°03′26″ W., thence southeast to 38°52′31″ N., 077°02′34″ W., and thence southwest to 38°52′28″ N., 077°02′38″ W.

(6) *Zone 6.* All navigable waters described in paragraphs (a)(1) through (a)(3) of this section.

(b) *Regulations.* The general security zone regulations found in 33 CFR 165.33 apply to the security zones created by this section, § 165.508.

(1) Entry into or remaining in a zone listed in paragraph (a) in this section is prohibited unless authorized by the Coast Guard Captain of the Port Maryland-National Capital Region. Public vessels and vessels already at berth at the time the security zone is implemented do not have to depart the security zone. All vessels underway within the security zone at the time it is implemented are to depart the zone at the time the security zone is implemented.

(2) Persons desiring to transit the area of the security zone must first obtain authorization from the Captain of the Port Maryland-National Capital Region or his or her designated representative. To seek permission to transit the area, the Captain of the Port Maryland-National Capital Region and his or her designated representatives can be contacted at telephone number 410–576–2693 or on Marine Band Radio, VHF–FM channel 16 (156.8 MHz). The Coast Guard vessels enforcing this section can be contacted on Marine Band Radio, VHF–FM channel 16 (156.8 MHz). Upon being hailed by a U.S. Coast Guard vessel, or other Federal, State, or local agency vessel, by siren, radio, flashing light, or other means, the operator of a vessel shall proceed as directed. If permission is granted, all persons and vessels must comply with the instructions of the Captain of the Port Maryland-National Capital Region or his designated representative and proceed at the minimum speed necessary to maintain a safe course while within the zone.

(3) The U.S. Coast Guard may be assisted in the patrol and enforcement of the security zones listed in paragraph (a) in this section by Federal, State, and local agencies.

(c) *Definitions.* As used in this section:

Captain of the Port Maryland-National Capital Region means the Commander, U.S. Coast Guard Sector Maryland-National Capital Region or any Coast Guard commissioned, warrant or petty officer who has been authorized by the Captain of the Port to act on his or her behalf.

Designated representative means any Coast Guard commissioned, warrant, or petty officer who has been authorized by the Captain of the Port Maryland-National Capital Region to assist in enforcing the security zones described in paragraph (a) of this section.

Public vessel means a vessel that is owned or demise-(bareboat) chartered by the government of the United States, by a State or local government, or by the government of a foreign country and that is not engaged in commercial service.

(d) *Enforcement.* (1) In addition to the specified times in paragraphs (d)(2) through (4) of this section, the security zones created by this section will be enforced only upon issuance of a notice of enforcement by the Captain of the Port Maryland-National Capital Region. The Captain of the Port Maryland-National Capital Region will cause notice of enforcement of these security zones to be made by all appropriate means to the affected segments of the public of the enforcement dates and times of the security zones including publication in the **Federal Register**, in accordance with 33 CFR 165.7(a). Such means of notification may also include, but are not limited to Broadcast Notice to Mariners or Local Notice to Mariners.

(2) Security Zone 4, established in paragraph (a)(4) of this section, will be enforced annually, from 12:01 a.m. to 11:59 p.m. on July 4.

(3) Security Zone 5, established in paragraph (a)(5) of this section, will be enforced annually on three dates: Memorial Day (observed), September 11, and November 11. Security Zone 5 will be enforced from 10 a.m. until 1 p.m. on Memorial Day (observed); from 8 a.m. until 11:59 a.m. on September 11; and from 10 a.m. until 1 p.m. on November 11.

(4) Security Zone 6, established in paragraph (a)(6) of this section, will be enforced annually on the day the State of the Union Address is delivered. Security Zone 6 will be enforced from 9 a.m. on the day of the State of the Union Address until 2 a.m. on the following day.

(e) *Suspension of enforcement.* (1) The Captain of the Port Maryland-National Capital Region may suspend enforcement of the enforcement period in paragraphs (d)(1) through(4) in this section earlier than listed in the notice of enforcement. Should the Captain of the Port Maryland-National Capital Region suspend the zone earlier than the duration listed, he or she will make the public aware of this suspension by Broadcast Notice to Mariners and/or on-scene notice by his or her designated representative.

Dated: November 9, 2016.

Lonnie P. Harrison, Jr.,

Captain, U.S. Coast Guard, Captain of the Port Maryland-National Capital Region.

Correction

In rule document 2016–24856 beginning on page 75494 in the issue of Monday, October 31, 2016, make the following correction:

On page 75494, in the first column, the **DATES** section should read as follows:

DATES: The regulations in 34 CFR part 612 are effective November 30, 2016.

The amendments to part 686 are effective on July 1, 2017, except for amendatory instructions 4.A., 4.B., 4.C.iv., 4.C.x. and 4.C.xi., amending 34 CFR 686.2(d) and (e), which are effective on July 1, 2021.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 271

[EPA–R07–RCRA–2016–0637; FRL–9955–25–Region 7]

State of Nebraska; Authorization of State Hazardous Waste Management Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: Nebraska has applied to the Environmental Protection Agency (EPA) for final authorization of revisions to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). EPA has determined that these revisions satisfy all requirements needed to qualify for final authorization and is authorizing Nebraska's revisions through this direct final rule.

DATES: This final authorization will become effective on January 17, 2017, unless EPA receives adverse written comments by December 19, 2016. If EPA receives such comments, we will publish a timely withdrawal of this direct final rule in the **Federal Register** informing the public that this rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R07–RCRA–2016–0637, to *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Lisa Haugen, EPA Region 7, Enforcement Coordination Office, 11201 Renner Boulevard, Lenexa, Kansas 66219, phone number: (913) 551–7877, and email address: *haugen.lisa@epa.gov.*

SUPPLEMENTARY INFORMATION: In the ''Proposed Rules'' section of this **Federal Register**, we are publishing a separate document that will serve as the proposal to authorize the revisions. EPA believes this action is not controversial and does not expect comments that oppose it. Unless EPA receives written comments that oppose this authorization during the comment period, the decision to authorize Nebraska's revisions to its hazardous waste program will take effect. If EPA receives comments that oppose this action, EPA will publish a document in the **Federal Register** withdrawing today's direct final rule before it takes effect.

Authorization of State-Initiated Changes

A. Why are revisions to State programs necessary?

States which have received final authorization from EPA under RCRA section 3006(b), 42 U.S.C. 6926(b), must maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the Federal hazardous waste program. As the Federal program is revised, the states must change their programs and ask the EPA to authorize the changes. Changes to state hazardous waste programs may be necessary when Federal or state statutory or regulatory authority is modified or when certain other changes occur. Most commonly, states must change their programs because of changes to EPA's regulations in 40 Code of Federal Regulations (CFR) parts 124, 260 through 268, 270, 273 and 279. States can also initiate their own changes to their hazardous waste program and these changes must then be authorized.

B. What decisions have we made in this rule?

EPA concludes that Nebraska's application to revise its authorized program meets all of the statutory and regulatory requirements established by RCRA. Therefore, EPA is granting Nebraska final authorization to operate its hazardous waste program with the revisions described in the authorization application. Nebraska has responsibility for permitting Treatment, Storage, and Disposal Facilities (TSDFs) within its borders (except in Indian Country) and for carrying out the aspects of the RCRA program described in its revised program application, subject to the limitations of the Hazardous and Solid Waste Amendments of 1984 (HSWA). New Federal requirements and prohibitions imposed by Federal regulations that EPA promulgates under the authority of HSWA take effect in authorized states before they are authorized for the requirements. Thus, EPA will implement those requirements and prohibitions in Nebraska, including issuing permits, until Nebraska is granted authorization to do so.

C. What is the effect of this authorization decision?

The effect of this decision is that a facility in Nebraska subject to RCRA will now have to comply with the authorized state requirements instead of the equivalent Federal requirements in order to comply with RCRA. Nebraska has enforcement responsibilities under its state hazardous waste program for violations of such program, but EPA retains its authority under RCRA sections 3007, 3008, 3013, and 7003, which include, among others, authority to: (1) Perform inspections, and require monitoring, tests, analyses, or reports; and (2) Enforce RCRA requirements and suspend or revoke permits. This action does not impose additional requirements on the regulated community because the regulations for which Nebraska is being authorized by this direct final action are already effective and are not changed by this action.

D. Why wasn't there a proposed rule before this rule?

Along with this direct final rule, EPA is publishing a separate document in the ''Proposed Rules'' section of this **Federal Register** that serves as the proposal to authorize these state program revisions. EPA did not publish a proposal before this direct final action because EPA views this action as a routine program change and does not expect comments that oppose its approval. EPA is providing an opportunity for public comment now, as described in Section E of this document.

E. What happens if EPA receives comments that oppose this action?

If EPA receives comments that oppose this authorization, we will withdraw this rule by publishing a document in the **Federal Register** before the rule

becomes effective. EPA will base any further decision on the authorization of Nebraska's program revisions on the proposal mentioned in the previous section, after considering all comments received during the comment period. EPA will then address all such comments in a later final rule. You may not have another opportunity to comment. If you want to comment on this authorization, you must do so at this time.

If EPA receives comments that oppose only the authorization of a particular revision to the State hazardous waste program, we will withdraw only that part of this action, and the authorization of the program revisions that the comments do not oppose will become effective on the date specified above. The **Federal Register** withdrawal document will specify which part of the authorization will become effective and which part is being withdrawn.

F. For what has Nebraska previously been authorized?

Nebraska initially received final authorization on January 24, 1985, effective February 7, 1985 (50 FR 3345), to implement the RCRA hazardous waste management program. Nebraska received authorization for revisions to its program on October 4, 1985, effective December 3, 1988 (53 FR 38950); June 25, 1996, effective August 26, 1996 (61 FR 32699); April 10, 2003, effective June 9, 2003 (68 FR 17553); October 4, 2004, effective December 3, 2004 (69 FR 59139); and December 30, 2008, effective September 24, 2010 (75 FR 58328).

G. What changes are we authorizing with this action?

On September 21, 2016, Nebraska submitted its final application seeking authorization of hazardous waste program revisions in accordance with 40 CFR 271.21. The State's authorization package includes an updated Program Description, a General Memorandum of Agreement (MOA), a Corrective Action MOA between the EPA and the Nebraska Department of Environmental Quality (NDEQ), a copy of title 128 of the Nebraska Administrative Code, as amended on July 6, 2016, and an Attorney General's Statement. The State has made amendments to the provisions listed in the table which follows. The State's laws and regulations, amended by these provisions, provide authority which remains equivalent to, no less stringent than, and not broader in scope than the Federal laws and regulations. Nebraska's regulatory references are to title 128 or title 129, as noted, of the Nebraska Administrative Code, as amended on July 6, 2016. We are granting Nebraska final authorization to carry out the following provisions of the State's program in lieu of the Federal program.

H. Where are the revised State rules different from the Federal rules?

1. State clarification of Federal rules. These clarifications do not affect the enforcement status of the rule, but simply improves clarity for the regulated community.

(a) Nebraska chose not to publish the note in 40 CFR 268.42 because all the information formerly contained in 40 CFR 268.42/tables 2 and 3 are now contained in title 128, chapter 20, section 009/table 9 and section 010/table 10. By omitting the note, the State eliminated a source of possible confusion.

(b) Nebraska chose not to publish the note in 40 CFR 268.43 because all the information formerly contained in 40 CFR 268.43/table CCW is now contained in title 128, chapter 20, section 009/table 9. By omitting the note, the State eliminated a source of possible confusion.

(c) Nebraska chose not to publish the note in 40 CFR 268.46 because all the information formerly contained in 40 CFR 268.46 is now contained in title 128, chapter 20, section 009/table 9. By omitting the note, the State eliminated a source of possible confusion.

2. More Stringent Nebraska Rules. The Nebraska hazardous waste program contains some provisions that are more stringent than is required by the RCRA program as codified in the July 1, 2015, edition of the title 40 of the Code of Federal Regulations. These more stringent provisions are being recognized as a part of the Federally-authorized program.

The specific more stringent provisions are also noted in Nebraska's authorization application. They include, but are not limited to, the following:

(a) 40 CFR 268.7(a)(1) and (a)(2) include parenthetical provisions, beginning with ''Alternatively,'' which allow a generator of hazardous waste to send the waste to a RCRA-permitted hazardous waste treatment facility *without* determining whether the hazardous waste has to be treated before it can be land disposed. This allowance shifts the determination requirement to the treatment facility. Nebraska omits these parenthetical provisions and is therefore more stringent than the Federal regulations by keeping the responsibility for determining if the hazardous waste meets LDR treatment standards with the generator.

(b) At 20–005.01B1, Nebraska requires specific language for a contaminated soil certification statement. The Federal rules do not specify required language, therefore the State is more stringent.

(c) In title 128, chapter 20, the table—Treatment Standards for Hazardous Waste—Nebraska includes the chemical 1,3-Phenylenediamine under the F039 listing. This chemical is not included in the table located at 40 CFR 268.40. Therefore the State is more stringent.

(d) At 21–006, Nebraska adopts and incorporates by reference 40 CFR part 264, subpart F, pertaining to releases from solid waste management units. Nebraska adds a provision at 21–006.01, which requires groundwater monitoring wells to be designed according to ASTM Standard D5092–90. In addition, any groundwater monitoring well to be placed in a stratigraphic unit composed of loessal sediment must be designed and sampled in a manner approved by NDEQ intended to minimize turbidity in samples taken from the well. The Federal regulations do not have these specific requirements, therefore Nebraska is more stringent.

(e) At 40 CFR 270.60(b)(3), the Federal rules the owner/operator of an injection well disposing of hazardous waste is considered to have RCRA permit if they have a UIC permit issued after November 8, 1984 and meet the conditions listed at 270.60(b)(3)(i) and (ii). Hazardous waste injection wells are expressly prohibited under title 122, Nebraska Administrative Code, Rules and Regulations for Underground Injection and Mineral Production Wells, chapter 3, section 003. Through this prohibition, the State rule is more stringent than the Federal rule.

(f) At 22–006, Nebraska adopts and incorporates by reference 40 CFR part 265, subpart F, pertaining to groundwater monitoring. Nebraska adds a provision at 22–006.01, which requires groundwater monitoring wells to be designed according to ASTM Standard D5092–90. In addition, any groundwater monitoring well to be placed in a stratigraphic unit composed of loessal sediment must be designed and sampled in a manner approved by NDEQ intended to minimize turbidity in samples taken from the well. The Federal regulations do not have these specific requirements, therefore Nebraska is more stringent.

(g) At 22–006, Nebraska adopts and incorporates by reference 40 CFR part 265, subpart F, pertaining to groundwater monitoring. At 22–006.03, Nebraska adds a provision which requires sampling during the initial four consecutive quarters for all analytes listed in 40 CFR 265.92(b), as incorporated by reference at 22–006. This requirement is more stringent than the Federal rules.

The 40 CFR 265.92(b)(1)–(3) outlines criteria required, Nebraska adds a provision at 22–006.03, which requires groundwater monitoring wells to be designed according to ASTM Standard D5092–90. In addition, any groundwater monitoring well to be placed in a stratigraphic unit composed of loessal sediment must be designed and sampled in a manner approved by NDEQ intended to minimize turbidity in samples taken from the well. The Federal regulations do not have these specific requirements, therefore Nebraska is more stringent.

(h) At 22–006, Nebraska adopts and incorporates by reference 40 CFR part 265, subpart F, pertaining to groundwater monitoring. At 40 CFR 265.93(d)(7)(ii), the Federal regulations state that determinations may cease if the groundwater quality assessment plan was implemented during the post-closure care period. At 22–006.04, the State regulations allow these determinations to cease only if the facility is operating under an approved Post Closure Plan. Therefore the State regulations are more stringent than the Federal rules.

(i) At 22–006, Nebraska adopts and incorporates by reference 40 CFR part 265, subpart F, pertaining to groundwater monitoring. Under 265.93(f), the owner or operator must report the results of analyses annually. At 22–006.05, Nebraska requires the analyses to be submitted within 45 days following the end of the quarter in which the sample was taken. Therefore, the State is more stringent.

(j) The Federal regulations at 273.32(b)(4) require a large quantity

handler of universal waste to send written notification of universal waste management to the regulating authority. Nebraska requires the generator to list the type of waste being generated. Therefore, the state rule is more stringent than the Federal rule.

(k) At 261.2(c)(3), and in column 3 of 261.2(c)(4) table 1, the Federal regulations list the exclusion cited at 261.4(a)(17). Nebraska did not adopt this exclusion. Therefore, the state is more stringent than the Federal regulations.

3. Broader in scope. EPA considers the following state requirements to be beyond the scope of the Federal program, and therefore EPA is not authorizing these requirements and cannot enforce them. Entities must comply with these requirements in accordance with state law, but they are not RCRA requirements. The specific broader in scope provisions include, but are not limited to, the following:

(a) At 22–006, Nebraska adopts and incorporates by reference 40 CFR part 265, subpart F, pertaining to groundwater monitoring. At 40 CFR 265.92(b), the owner or operator must determine the concentration or value of the listed parameters in ground-water samples. At 22–006.02, Nebraska includes sampling for volatile organic compounds (VOCs) at the discretion of the Director on a case-by-case basis. The VOCs shall be analyzed in accordance with a method approved by the Director. This requirement is broader in scope than the Federal rules.

(b) Title 128 chapter 25 contains Nebraska's ''Standards for Universal Waste Management.'' The state adds an additional waste stream ''electronic items'' to the list of types of universal waste subject to these regulations. 40 CFR part 273, the Federal ''Standards for Universal Waste Management'' do not include ''electronic items'' as an identified waste stream. Therefore, any references or requirements for managing the ''electronic items'' waste stream universal waste are broader in scope and not enforceable by EPA.

I. Who handles permits after the authorization takes effect?

Nebraska will issue permits for all the provisions for which it is authorized and will administer the permits it issues. EPA will continue to administer and enforce any RCRA hazardous waste permits or portions of permits which EPA issued prior to the effective date of this authorization until they expire or are terminated. EPA will not issue any more permits, or new portions of permits, for the provisions listed in the table above after the effective date of this authorization. EPA will continue to implement and issue permits for HSWA requirements for which Nebraska is not yet authorized.

J. How does this action affect Indian Country (18 U.S.C. 1151) in Nebraska?

Nebraska is not authorized to carry out its Hazardous Waste Program in Indian Country within the State. This authority remains with EPA. Therefore, this action has no effect in Indian Country.

K. What is codification and is EPA codifying Nebraska's Hazardous Waste Program as authorized in this rule?

Codification is the process of placing the State's statutes and regulations that comprise the State's authorized hazardous waste program into the Code of Federal Regulations. We do this by referencing the authorized State rules in 40 CFR part 272. EPA is not codifying the authorization of Nebraska's changes at this time. However, we reserve the amendment of 40 CFR part 272, subpart CC for the authorization of Nebraska's program changes at a later date.

L. Administrative Requirements

The Office of Management and Budget (OMB) has exempted this action from the requirements of Executive Order 12866 (58 FR 51735, October 4, 1993), and therefore, this action is not subject to review by OMB. This action authorizes State requirements for the purpose of RCRA 3006 and imposes no additional requirements beyond those imposed by State law. Accordingly, I certify that this action will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.).* Because this action authorizes pre-existing requirements under State law and does not impose any additional enforceable duty beyond that required by State law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). For the same reason, this action also does not significantly or uniquely affect the communities of Tribal governments, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely authorizes State requirements as part of the State RCRA hazardous waste program without altering the relationship or the distribution of power and responsibilities established by RCRA. This action also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant and it does not make decisions based on environmental health or safety risks. This action is not subject to Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use'' (66 FR 28355, May 22, 2001) because it is not a significant regulatory action under Executive Order 12866.

Under RCRA 3006(b), EPA grants a state's application for incorporation by reference as long as the State meets the criteria required by RCRA. It would thus be inconsistent with applicable law for the EPA, when it reviews a state authorization application, to require the use of any particular voluntary consensus standard in place of another standard that otherwise satisfies the requirements of RCRA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard affected conduct. EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the ''Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings'' issued under the executive order. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States prior to publication in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2). This action will be effective January 17, 2017, unless objections to this authorization are received.

List of Subjects in 40 CFR Part 271

Environmental protection, Administrative practice and procedure, Confidential business information, Hazardous waste, Hazardous waste transportation, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements.

Authority: This action is issued under the authority of Sections 2002(a), 3006, and 7004(b) of the Solid Waste Disposal Act, as amended, 42 U.S.C. 6912(a), 6926, 6974(b).

Dated: November 3, 2016.

Mark Hague,

Regional Administrator, Region 7.

[FR Doc. 2016–27680 Filed 11–16–16; 8:45 am]

BILLING CODE 6560–50–P

Proposed Rules

Federal Register
Vol. 81, No. 222
Thursday, November 17, 2016

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 272

RIN 0584–AE51

Supplemental Nutrition Assistance Program: Civil Rights Update to the Federal-State Agreement

AGENCY: Food and Nutrition Service (FNS), USDA.

ACTION: Proposed rule.

SUMMARY: The proposed action would update civil rights assurance language contained in Supplemental Nutrition Assistance Program (SNAP) regulations on the Federal-State Agreement (FSA). The rule does not contain any new requirements and would codify protections already required by Federal law and existing policy.

DATES: Written comments must be received on or before January 17, 2017 to be assured of consideration.

ADDRESSES: The Food and Nutrition Service, USDA, invites interested persons to submit written comments on this proposed rule. Comments may be submitted in writing by one of the following methods:

- *Preferred Method:* Federal eRulemaking Portal: Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail:* Send comments to Sasha Gersten-Paal, Branch Chief, Certification Policy Branch, Program Development Division, FNS, 3101 Park Center Drive, Alexandria, Virginia 22302, 703–305–2507.

All written comments submitted in response to this proposed rule will be included in the record and made available to the public. Please be advised that the substance of comments and the identity of individuals or entities submitting the comments will be subject to public disclosure. FNS will make written comments publicly available online at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Sasha Gersten-Paal, Branch Chief, Certification Policy Branch, Program Development Division, Food and Nutrition Service, 3101 Park Center Drive, Alexandria, Virginia 22302, 703–305–2507.

SUPPLEMENTARY INFORMATION: The Food and Nutrition Act of 2008, as amended (the Act), requires that each State operating SNAP have a State Plan of Operation (State Plan) specifying details as to how the State conducts the program. The State Plan contains forms, plans, agreements and policy descriptions required by Federal regulation and is cleared under OMB No. 0584–0083, Expiration date 4/30/2017. Current SNAP regulations at 7 CFR 272.2(a)(2) include the FSA as one such required component of the State Plan. The FSA is the legal agreement between the Department of Agriculture (Department) and the State agency through which the State elects to operate SNAP and to administer the program in accordance with the Act, SNAP regulations and the State Plan. Although both the Department and the State agency may mutually agree to modify or supplement the language, the regulations at 7 CFR 272.2(b)(1) contain standard FSA language for State agencies operating SNAP.

As a Federal program, civil rights protections for SNAP applicants and recipients are important and essential. The standard FSA language contained in the regulations at 7 CFR 272.2(b)(1) already requires State agencies administering SNAP to agree to assure compliance with civil rights requirements, including Title VI of the Civil Rights Act of 1964, section 11(c) of the Food Stamp Act of 1977 (now the Food and Nutrition Act of 2008, as amended), and the Department's regulatory nondiscrimination requirements.

Since the publication of the final rule establishing the standard FSA language, additional civil rights legislation has been passed and more uniform administrative procedures have been established to support effective enforcement of the civil rights protections. Further, the U.S. Department of Justice (DOJ) recommended the addition of updated references in the Department's civil rights-related materials. The Department understands that similar language has been incorporated into agreements in other Federal agencies, and has incorporated very similar language in agreements in the Department's Child Nutrition Program and Women, Infants and Children programs. We note, by way of background, that the FSA in SNAP is unique within the Department's programs in that most other comparable agreements are not contained in the Federal regulations but in forms formally approved by the Office of Management and Budget (OMB).

This proposed rule would incorporate references to additional civil rights legislation into the standard FSA language at section 272.2. Those references include Title IX of the Education Amendments of 1972 (20 U.S.C. 1681 *et seq.*), the Age Discrimination Act of 1975 (42 U.S.C. 6101 *et seq.*), Title II and Title III of the Americans with Disabilities Act (ADA), and Executive Order 13166, ''Improving Access to Persons with Limited English Proficiency.'' This proposed rule would incorporate those provisions into the regulations at 7 CFR 272.2(b)(1). The rule would also require States to comply with Department instructions, policy guidance, and other written directions as well as current regulatory nondiscrimination regulations located at 7 CFR part 15 *et seq.* and 7 CFR 272.6 (Nondiscrimination Compliance for participating State agencies). Again, these additions would codify protections already required by Federal law, regulations and existing policy.

FSAs, once signed by a State's Governor or authorized designee, are valid indefinitely under 7 CFR 272.2(e)(1) until they are terminated. Section 272.2(e)(1) also provides that the FSA must be signed and submitted to FNS within 120 days after the publication of the regulations in final form and shall remain in effect until terminated. Although initially included in the regulations with other regulatory FSA requirements, the same procedure would apply to this update. That is, upon publication of this proposed rule as final, all State agencies administering SNAP would be required to sign a new FSA with the updated language and provide a copy of the same to the Department within 120 days after publication of the regulations in final form. Although State agencies are already required to abide by the new

civil rights language as stated above, the Department believes it is important to incorporate the updated language at section 272.2(b)(1) in the FSA itself.

The rule also proposes additional items be added to the FSA standard language. The other items allow for the Department to track, analyze and enforce the civil rights protections in the FSA. First, this proposed rule would add that the State agency's agreement to follow civil rights requirements in the FSA is made in consideration of and for the purposes of obtaining Federal financial assistance. Second, the rule would incorporate into the FSA the State agency's obligation to compile data, maintain records, and submit records and reports as required to allow for effective enforcement of the civil rights provisions. This would include an assurance to allow Department personnel to review and access records, access facilities and interview personnel to ascertain compliance with nondiscrimination laws. The rule would also codify procedures to support enforcement of the nondiscrimination protections by updating the FSA to include a provision that the Department may seek judicial enforcement for violations of the FSA, and add assurances that the State agency and its successors are bound by the FSA. Again, these provisions would not only be responsive to DOJ's suggestions regarding nondiscrimination compliance language but also mirror language in other USDA programs.

Procedural Matters

Executive Order 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility.

This proposed rule has been determined to be not significant and was not reviewed by the OMB in conformance with Executive Order 12866.

Regulatory Impact Analysis

This rule has been designated as not significant by the Office of Management and Budget, therefore, no Regulatory Impact Analysis is required.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires Agencies to analyze the impact of rulemaking on small entities and consider alternatives that would minimize any significant impacts on a substantial number of small entities. Pursuant to that review, it has been certified that this rule would not have a significant impact on a substantial number of small entities.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local and Tribal governments and the private sector. Under section 202 of the UMRA, the Department generally must prepare a written statement, including a cost benefit analysis, for proposed and final rules with ''Federal mandates'' that may result in expenditures by State, local or Tribal governments, in the aggregate, or the private sector, of $146 million or more (when adjusted for inflation; GDP deflator source: Table 1.1.9 at *http://www.bea.gov/iTable*) in any one year. When such a statement is needed for a rule, Section 205 of the UMRA generally requires the Department to identify and consider a reasonable number of regulatory alternatives and adopt the most cost effective or least burdensome alternative that achieves the objectives of the rule.

This proposed rule does not contain Federal mandates (under the regulatory provisions of Title II of the UMRA) for State, local and Tribal governments or the private sector of $146 million or more in any one year. Thus, the rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Executive Order 12372

State administrative matching grants for SNAP are listed in the Catalog of Federal Domestic Assistance Programs under 10.561. For the reasons set forth in the final rule in 7 CFR part 3015, subpart V, and related Notice (48 FR 29114, June 24, 1983), this program is included in the scope of Executive Order 12372, which requires intergovernmental consultation with State and local officials. The Department issued guidance in June 2016 to State agencies as part of a larger effort to help States ensure their State Plans are complete and up to date, which in part included direction to State agencies to incorporate updated civil rights provisions as an addendum to existing FSAs. The Department's Food and Nutrition Service SNAP Regional Offices individually discussed these issues directly with State agencies during policy calls and meetings.

Federalism Summary Impact Statement

Executive Order 13132 requires Federal agencies to consider the impact of their regulatory actions on State and local governments. Where such actions have federalism implications, agencies are directed to provide a statement for inclusion in the preamble to the regulations describing the agency's considerations in terms of the three categories called for under Section (6)(b)(2)(B) of Executive Order 13121. The Department has considered the impact of this rule on State and local governments and has determined that this rule does not have significant federalism implications. State agencies will be required to update the standard language contained in FSAs once. This agreement will then be binding until otherwise terminated. Therefore, under section 6(b) of the Executive Order, a federalism summary is not required.

Executive Order 12988, Civil Justice Reform

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is intended to have preemptive effect with respect to any State or local laws, regulations or policies that conflict with its provisions or that would otherwise impede its full and timely implementation. This rule is not intended to have retroactive effect unless so specified in the **EFFECTIVE DATES** section of the final rule. Prior to any judicial challenge to the provisions of the final rule, all applicable administrative procedures must be exhausted.

Civil Rights Impact Analysis

The changes to SNAP regulations in this proposed rule are to incorporate references to additional civil rights legislation into the standard FSA language.

Impact on State agencies: State agencies would be required to submit to the Department an updated FSA within 120 days upon publication of this proposed rule as final. The FSA would include the updated language, signed by a State's Governor or authorized designee. State agencies would also have to agree to certain administrative procedures that ensure effective enforcement of the added protections, such as maintaining data and complying with Federal reviews.

Impact on Households: The updated FSA language would emphasize existing nondiscrimination protections for SNAP households to the effect that no person

in the United States shall, on the grounds of sex, race, color, age, political belief, religious creed, disability, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subject of discrimination under SNAP.

Training and Outreach: The proposed rule highlights protections that already exist and are required by Federal law, regulations, and existing policy. The Department issued guidance in June 2016 to State agencies as part of a larger effort to help States ensure their State Plans are complete and up to date. It included direction to State agencies to incorporate the updated civil rights provisions as an addendum to existing FSAs to guarantee they were highlighted immediately.

FNS also maintains a public Web site that provides basic information on each program, including SNAP. Interested persons, including potential applicants, applicants, and participants can find information about their right to be treated fairly and the protections they are guaranteed. The Web site also includes information on how to report when an individual feels his or her rights were violated and not treated in accordance with this provision.

Finding and Conclusion: After careful review of the rule's intent and provisions, and the characteristics of SNAP households and individual participants, the Department has determined that this proposed rule will not have a disparate impact on any group or class of persons.

Executive Order 13175

Executive Order 13175 requires Federal agencies to consult and coordinate with Tribes on a government-to-government basis on policies that have Tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. The Department notes that the regulatory changes proposed in this rule impact program applicants and participants equally regardless of tribal status or residence. We are unaware of any current Tribal laws that could be in conflict with the final rule.

To share information on the proposed rule with Indian Tribes, FNS discussed the proposed rule at a tribal consultation meeting on August 17, 2016.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. Chap. 35; 5 CFR 1320) requires OMB to approve all collections of information by a Federal agency before they can be implemented. Respondents are not required to respond to any collection of information unless it displays a current valid OMB control number.

The provisions in this proposed rule do not contain new information collection requirements subject to approval by OMB under the Paperwork Reduction Act of 1994. The Department anticipates that this rule would have no to minimal time and cost impacts on the Federal government and State agencies. State agencies are already required to follow the requirements contained in the added nondiscrimination references. Any time and cost burden would be related to administrative obligations to sign an updated Federal-State Agreement and ensure appropriate recordkeeping to support enforcement of the nondiscrimination provisions as cleared under OMB Number 0584–0083. FNS provides 50 percent of SNAP's administrative cost reimbursement and so a portion of any minimal administrative costs would be offset by federal funding.

Since State agencies are already required to have these agreements, the impact of this provision is negligible. Other minimal burdens imposed on State agencies by this proposed rule are usual and customary within the course of their normal business activities.

E-Government Act Compliance

The Department is committed to complying with the E-Government Act of 2002, to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

List of Subjects

7 CFR Part 272

Alaska, Civil rights, Supplemental Nutrition Assistance Program, Grant programs—social programs, Penalties, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 272 is proposed to be amended as follows:

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

■ 1. The authority citation for Part 272 continues to read as follows:

Authority: 7 U.S.C. 2011–2036.

■ 2. Revise § 272.2(b)(1) to read as follows:

§ 272.2 Plan of operation.

* * * * *

(b) * * *

(1) The wording of the Federal/State Agreement is as follows:

The State of ____ and the Food and Nutrition Service (FNS), U.S. Department of Agriculture (USDA), hereby agree to act in accordance with the provisions of the Food and Nutrition Act of 2008, as amended, implementing regulations, instructions, policy guidance, and other written directions interpreting Federal law and regulations applicable to this program, and the FNS-approved State Plan of Operation. The State and FNS USDA further agree to fully comply with any changes in Federal law and regulations. This agreement may be modified with the mutual written consent of both parties.

Provisions

The State agrees to:

1. Administer the program in accordance with the provisions contained in the Food and Nutrition Act of 2008, as amended, and in the manner prescribed by regulations issued pursuant to the Act; and to implement the FNS-approved State Plan of Operation.

2. Assurance of Civil Rights Compliance: Comply with Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d *et seq.*), Title IX of the Education Amendments of 1972 (20 U.S.C. 1681 *et seq.*), the Age Discrimination Act of 1975 (42 U.S.C. 6101 *et seq.*), section 11(c) of the Food and Nutrition Act of 2008, as amended (7 U.S.C. 2020), Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), Title II and Title III of the Americans with Disabilities Act (ADA) of 1990 as amended by the ADA Amendment Act of 2008 (42 U.S.C. 12131–12189) as implemented by Department of Justice regulations at 28 CFR part 35 and 36, Executive Order 13166, ''Improving Access to Services for Persons with Limited English Proficiency'' (August 11, 2000), and all requirements imposed by the regulations, instructions, policy guidance, and other written directions issued by the Department of Agriculture to the effect that, no person in the United States shall, on the grounds of sex, race, color, age, political belief, religious creed, disability, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subject to discrimination under SNAP. This includes program-specific requirements found at 7 CFR part 15 *et seq.* and 7 CFR 272.6.

This assurance is given in consideration of and for the purpose of obtaining any and all Federal assistance extended to the State by USDA under the authority of the Food and Nutrition Act of 2008, as amended. Federal financial assistance includes grants, and loans of Federal funds; reimbursable expenditures, grants, or donations of Federal property and interest in property; the detail of Federal personnel; the sale, lease of, or permission to use Federal property or interest in such property; the furnishing of services without consideration, or at a nominal consideration, or at a consideration that is reduced for the purpose of assisting the recipient or in recognition of the public interest to be served by such sale, lease, or furnishing of services to the recipient; or any improvements made with Federal financial assistance extended to the State by USDA. This assistance also includes any Federal agreement, arrangement, or other contract that has as one of its purposes the provision of cash assistance for the purchase of food, cash assistance for purchase or rental of food service equipment or any other financial assistance extended in reliance on the representations and agreements made in this assurance.

By accepting this assurance, the State agency agrees to compile data, maintain records, and submit records and reports as required, to permit effective enforcement of nondiscrimination laws and permit authorized USDA personnel during hours of program operation to review and copy such records, books, and accounts, access such facilities and interview such personnel as needed to ascertain compliance with the nondiscrimination laws. If there are any violations of this assurance, USDA, FNS, shall have the right to seek judicial enforcement of this assurance. This assurance is binding on the State agency, its successors, transferees and assignees as long as it receives assistance or retains possession of any assistance from USDA. The person or persons whose signatures appear below are authorized to sign this assurance on behalf of the State agency.

3. (For States with Indian Reservations only). Implement the Program in a manner that is responsive to the special needs of American Indians on reservations and consult in good faith with tribal organizations about that portion of the State's Plan of Operation pertaining to the implementation of the Program for members of the tribe on reservations.

4. FNS agrees to: 1. Pay administrative costs in accordance with the Food and Nutrition Act of 2008, implementing regulations, and an approved Cost Allocation Plan.

2. Carry out any other responsibilities delegated by the Secretary in the Food and Nutrition Act of 2008, as amended.

[Docket No. FAA–2016–9389; Directorate Identifier 2014–NM–153–AD]

RIN 2120–AA64

Airworthiness Directives; Fokker Services B.V. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new Airworthiness Directive (AD) for all Fokker Services B.V. Model F28 Mark 0100 series airplanes. This proposed AD was prompted by an evaluation by the design approval holder (DAH) indicating that certain wing fuel tank access panels are subject to widespread fatigue damage (WFD). This proposed AD would require replacement of affected access panels and modification of the coamings of the associated access holes. We are proposing this AD to prevent the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by January 3, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone: +31 (0)88–6280–350; fax: +31 (0)88–6280–111; email: *technicalservices@fokker.com;* Internet: *http://www.myfokkerfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9389; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Tom Rodriguez, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone: 425–227–1137; fax: 425–227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9389; Directorate Identifier 2014–NM–153–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

Fatigue damage can occur locally, in small areas or structural design details,

or globally, in widespread areas. Multiple-site damage is widespread damage that occurs in a large structural element such as a single rivet line of a lap splice joining two large skin panels. Widespread damage can also occur in multiple elements such as adjacent frames or stringers. Multiple-site damage and multiple-element damage cracks are typically too small initially to be reliably detected with normal inspection methods. Without intervention, these cracks will grow, and eventually compromise the structural integrity of the airplane. This condition is known as widespread fatigue damage. It is associated with general degradation of large areas of structure with similar structural details and stress levels. As an airplane ages, WFD will likely occur, and will certainly occur if the airplane is operated long enough without any intervention.

The FAA's WFD final rule (75 FR 69746, November 15, 2010) became effective on January 14, 2011. The WFD rule requires certain actions to prevent structural failure due to WFD throughout the operational life of certain existing transport category airplanes and all of these airplanes that will be certificated in the future. For existing and future airplanes subject to the WFD rule, the rule requires that DAHs establish a limit of validity (LOV) of the engineering data that support the structural maintenance program. Operators affected by the WFD rule may not fly an airplane beyond its LOV, unless an extended LOV is approved.

The WFD rule (75 FR 69746, November 15, 2010) does not require identifying and developing maintenance actions if the DAHs can show that such actions are not necessary to prevent WFD before the airplane reaches the LOV. Many LOVs, however, do depend on accomplishment of future maintenance actions. As stated in the WFD rule, any maintenance actions necessary to reach the LOV will be mandated by airworthiness directives through separate rulemaking actions.

In the context of WFD, this action is necessary to enable DAHs to propose LOVs that allow operators the longest operational lives for their airplanes, and still ensure that WFD will not occur. This approach allows for an implementation strategy that provides flexibility to DAHs in determining the timing of service information development (with FAA approval), while providing operators with certainty regarding the LOV applicable to their airplanes.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2016–0125, dated June 21, 2016, which supersedes EASA AD 2014–0158, dated July 7, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for all Fokker Services B.V. Model F28 Mark 0100 series airplanes. The MCAI states:

> Based on findings on test articles, fatigue-induced cracks may develop in the coamings of certain wing fuel tank access panels Part Number (P/N) D12395–403 and P/N D12450–403, installed on Fokker F28 Mark 0100 aeroplanes.
>
> To ensure the continued structural integrity with respect to fatigue, repetitive inspections were included in the Airworthiness Limitations Section (ALS) of the Instructions for Continued Airworthiness. Fokker Services also developed precautionary measures to reduce stress loads in the affected areas by replacement of the affected access panels with new panels, P/N D19701–401 and P/N D19701–403, having thinner skin, and a modification by introducing internal patches to the coamings of the affected access holes.
>
> These precautionary measures were introduced with Service Bulletins (SB) SBF100–57–027 and SBF100–57–028. As part of the Widespread Fatigue Damage re-evaluation, it was concluded that repetitive inspections through the ALS do not provide a sufficient level of protection against the fatigue-induced cracks.
>
> This condition, if not corrected, would affect the structural integrity of the lower wing skins of both outer wings in the areas surrounding the affected fuel tank access panels.
>
> For the reasons described above, this [EASA] AD requires replacement of the affected access panels and modification of the coamings of these access holes.
>
> Post-modification inspection requirements depend on the actual number of flight cycles accumulated at the moment of modification. Related detailed information is provided in SBF100–57–027 and SBF100–57–028, as well as in Fokker Services ALS Report SE–623 Issue 12.
>
> Fokker Services All Operators Message AOF100.178#05 provides additional information concerning the subject addressed by this [EASA] AD.

You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9389.

Related Service Information Under 1 CFR Part 51

Fokker Services B.V. has issued the following service information:

- Fokker Service Bulletin SBF 100–57–027, Revision 2, dated December 11, 2013. This service information provides instructions to replace certain fuel tank access panels.
- Fokker Service Bulletin SBF 100–57–028, Revision 2, dated December, 11, 2013. This service information provides instructions to modify the coamings of certain fuel tank access holes.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

Differences Between This Proposed AD and the MCAI or Service Information

In the ''Required Action(s) and Compliance Times'' section of the MCAI, paragraphs (3) and (4) specify to incorporate or comply with certain maintenance tasks (repetitive inspections). These actions are not included in this proposed AD. Since EASA AD 2014–0158, dated July 7, 2014, was issued, EASA issued AD 2016–0125, dated June 21, 2016, which includes a requirement to incorporate those maintenance tasks. We are considering further rulemaking to require the actions specified in EASA AD 2016–0125, dated June 21, 2016.

Costs of Compliance

We estimate that this proposed AD affects 15 airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Replacement and Modification	510 work-hours × $85 per hour = $43,350 per airplane.	$45,500	$88,350	$1,325,250

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Fokker Services B.V.: Docket No. FAA–2016–9389; Directorate Identifier 2014–NM–153–AD.

(a) Comments Due Date

We must receive comments by January 3, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Fokker Services B.V. Model F28 Mark 0100 series airplanes, certificated in any category, all serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

(e) Reason

This AD was prompted by an evaluation by the design approval holder (DAH) indicating that certain wing fuel tank access panels are subject to widespread fatigue damage (WFD). We are issuing this AD to prevent fatigue cracking in the wing structure, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Modification and Replacement

Within 63,000 flight cycles since first flight of the airplane, or within 90 days after the effective date of this AD, whichever occurs later, accomplish the actions specified in paragraphs (g)(1) and (g)(2) of this AD, as applicable.

(1) For airplanes identified in Fokker Service Bulletin SBF100–57–028, Revision 2, dated December 11, 2013: Modify the coamings of the fuel tank access holes at the access panel locations identified in, and in accordance with the Accomplishment Instructions of Fokker Service Bulletin SBF100–57–028, Revision 2, dated December 11, 2013.

(2) For airplanes identified in Fokker Service Bulletin SBF100–57–027, Revision 2, dated December 11, 2013: Replace access panels having part number D12395–403 and D12450–403 with new panels having part number D19701–401 and D19701–403, at the access panel locations identified in, and in accordance with the Accomplishment Instructions of Fokker Service Bulletin SBF100–57–027, Revision 2, dated December 11, 2013.

(h) Parts Installation Prohibition

(1) For airplanes that, on the effective date of this AD, have an access panel with part number D12395–403 or D12450–403 installed at any of the affected locations: After accomplishing the actions required by paragraphs (g)(1) and (g)(2) of this AD, as applicable, no person may install, on any airplane, access panels having part number D12395–403 or D12450–403 at any access panel location as identified in Fokker Service Bulletin SBF100–57–027, Revision 2, dated December 11, 2013.

(2) For airplanes that, on the effective date of this AD, do not have an access panel with part number D12395–403 or D12450–403 installed at any of the affected locations: As of the effective date of this AD, no person may install, on any airplane, access panels having part number D12395–403 or D12450–403 at any access panel location as identified in Fokker Service Bulletin SBF100–57–027, Revision 2, dated December 11, 2013.

(i) Credit for Previous Actions

(1) This paragraph provides credit for actions required by paragraph (g)(1) of this AD, if those actions were performed before the effective date of this AD using the service information specified in paragraph (i)(1)(i) or (i)(1)(ii) of this AD.

(i) Fokker Service Bulletin SBF100–57–028, dated May 2, 1994.

(ii) Fokker Service Bulletin SBF100–57–028, Revision 1, dated November 1, 1994.

(2) This paragraph provides credit for actions required by paragraph (g)(2) of this AD, if those actions were performed before the effective date of this AD using the service information specified in paragraph (i)(2)(i) or (i)(2)(ii) of this AD.

(i) Fokker Service Bulletin SBF100–57–027, dated September 13, 1993.

(ii) Fokker Service Bulletin SBF100–57–027, Revision 1, dated May 2, 1994.

(j) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19.

In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Tom Rodriguez, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone: 425–227–1137; fax: 425–227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or European Aviation Safety Agency (EASA); or Fokker Services B.V.'s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(k) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD 2014–0158, dated July 7, 2014, for related information. This MCAI may be found in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9389.

(2) For service information identified in this AD, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone: +31 (0)88–6280–350; fax: +31 (0)88–6280–111; email: *technicalservices@fokker.com;* Internet: *http://www.myfokkerfleet.com.* You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on November 7, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. FAA–2016–9384; Directorate Identifier 2016–NM–154–AD]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain The Boeing Company Model 777–300ER series airplanes. This proposed AD was prompted by a report that certain galley tripod mount assemblies were not connected to the tie rods in the overhead support structure. This proposed AD would require an inspection of certain galleys for the presence of the hardware that connects the tripod mount assembly to the tie rods in the overhead support structure, and corrective actions if necessary. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by January 3, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740; telephone 562–797–1717; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9384.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9384; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Eric Brown, Aerospace Engineer, Cabin Safety and Environmental Systems Branch, ANM–150S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6476; fax: 425–917–6590; email: *eric.m.brown@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9384; Directorate Identifier 2016–NM–154–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We have received a report that the T53 and T52 tie rods to the tripod mount assembly in the A2 and A3 galleys were found unattached during a routine production inspection of certain airplanes before delivery. The cause was determined to be a change to the galley installation sequence. This changed installation sequence did not include a robust method to make sure that the tie rods were attached to the galley before delivery. Since this unsafe condition was found, Boeing has implemented a new improved process to ensure that the hardware that attaches the T53 and T52 tie rods to the tripod mount assembly in the A2 and A3 galleys is attached. A galley tripod mount assembly that is unconnected to the tie rods in the overhead support structure can cause a galley to come loose under a high dynamic load causing a risk of serious injury to passengers and the blocking of evacuation routes.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin 777–25A0677, dated April 25,

2016. The service information describes procedures for doing an inspection of the area above the A2 and A3 galleys to make sure the hardware (*i.e.,* pin assembly or bolt assembly) that connects the tripod mount assembly to the applicable T53 and T52 tie rods is installed; and corrective actions. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require accomplishing the actions specified in the service information described previously, except as discussed under ''Differences Between this Proposed AD and the Service Information.'' For information on the procedures and compliance times, see this service information at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9384.

The phrase ''corrective actions'' is used in this proposed AD. Corrective actions correct or address any condition found. Corrective actions in an AD could include, for example, repairs.

Differences Between This Proposed AD and the Service Information

This proposed AD requires a detailed inspection for specific hardware instead of the general visual inspection specified in Boeing Alert Service Bulletin 777–25A0677, dated April 25, 2016.

Costs of Compliance

We estimate that this proposed AD affects 4 airplanes of U.S. registry. We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	1 work-hour × $85 per hour = $85	$0	$85	$340

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this proposed AD.

According to the manufacturer, some of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all available costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

The Boeing Company: Docket No. FAA–2016–9384; Directorate Identifier 2016–NM–154–AD.

(a) Comments Due Date

We must receive comments by January 3, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 777–300ER series airplanes, certificated in any category, as identified in Boeing Alert Service Bulletin 777–25A0677, dated April 25, 2016.

(d) Subject

Air Transport Association (ATA) of America Code 25, Equipment/furnishings.

(e) Unsafe Condition

This AD was prompted by a report that certain galley tripod mount assemblies were not attached to the tie rods in the overhead support structure. We are issuing this AD to detect and correct an unconnected galley tripod mount assembly to the tie rods in the overhead support structure, which can cause a galley to come loose under a high dynamic load causing a risk of serious injury to passengers and the blocking of evacuation routes.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Inspection and Corrective Actions

Within 12 months after the effective date of this AD: Do a detailed inspection of the area above the A2 and A3 galleys to make sure the hardware (*i.e.,* pin assembly or bolt assembly) that connects the tripod mount assembly to the applicable T53 and T52 tie rods is installed, and do all applicable corrective actions, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 777–25A0677, dated April 25, 2016. Do all applicable corrective actions before further flight.

(h) Definition of Detailed Inspection

For the purposes of this AD, a detailed inspection is an intensive examination of a specific item, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at an intensity deemed appropriate. Inspection aids such as mirror, magnifying lenses, etc., may be necessary. Surface cleaning and elaborate procedures may be required.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (j)(1) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) For service information that contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (i)(4)(i) and (i)(4)(ii) of this AD apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. If a step or substep is labeled ''RC Exempt,'' then the RC requirement is removed from that step or substep. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

(j) Related Information

(1) For more information about this AD, contact Eric Brown, Aerospace Engineer, Cabin Safety and Environmental Systems Branch, ANM–150S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6476; fax: 425–917–6590; email: *eric.m.brown@faa.gov.*

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740; telephone 562–797–1717; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on November 2, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF THE TREASURY

Alcohol and Tobacco Tax and Trade Bureau

27 CFR Part 4

[Docket No. TTB–2016–0011; Notice No. 165]

RIN 1513–AC24

Proposed Addition of New Grape Variety Names for American Wines

AGENCY: Alcohol and Tobacco Tax and Trade Bureau, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Alcohol and Tobacco Tax and Trade Bureau (TTB) proposes to amend its wine labeling regulations by adding a number of new names to the list of grape variety names approved for use in designating American wines. TTB also proposes to remove one existing entry and replace it with a slightly different name, and to correct the spelling of another existing entry. The proposed amendments would allow wine bottlers to use these additional approved grape variety names on wine labels and in wine advertisements.

DATES: TTB must receive written comments on or before January 17, 2017.

ADDRESSES: Please send your comments on this proposed rule to one of the following addresses:

- *Internet: https://www.regulations.gov* (via the online comment form for this notice as posted within Docket No. TTB–2016–0011 at ''*Regulations.gov*,'' the Federal e-rulemaking portal);
- *U.S. Mail:* Director, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Box 12, Washington, DC 20005; or
- *Hand delivery/courier in lieu of mail:* Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Suite 400E, Washington, DC 20005.

See the Public Participation section of this notice for specific instructions and requirements for submitting comments, and for information on how to request a public hearing.

You may view copies of this proposed rule and any comments TTB receives about this proposal at *https://www.regulations.gov* within Docket No. TTB–2016–0011. A link to that docket is posted on the TTB Web site at *https://www.ttb.gov/wine/wine-rulemaking.shtml* under Notice No. 165. You also may view copies of this proposed rule and any comments TTB receives about this proposal by appointment at the TTB Information Resource Center, 1310 G Street NW., Washington, DC 20005. Please call 202–453–2270 to make an appointment.

FOR FURTHER INFORMATION CONTACT: Jennifer Berry, Alcohol and Tobacco Tax and Trade Bureau, Regulations and Rulings Division; telephone 202–453–1039, ext. 275.

SUPPLEMENTARY INFORMATION:

Background

TTB Authority

Section 105(e) of the Federal Alcohol Administration Act (FAA Act), 27 U.S.C. 205(e), authorizes the Secretary of the Treasury to prescribe regulations for the labeling of wine, distilled spirits, and malt beverages. The FAA Act requires that these regulations, among other things, prohibit consumer deception and the use of misleading statements on labels, and ensure that labels provide the consumer with adequate information as to the identity and quality of the product.

The Alcohol and Tobacco Tax and Trade Bureau (TTB) administers the regulations promulgated under the FAA Act pursuant to section 1111(d) of the Homeland Security Act of 2002, codified at 6 U.S.C. 531(d). The Secretary has delegated various authorities through Treasury Department Order 120–01 (dated

December 10, 2013, superseding Treasury Order 120–01 (Revised), ''Alcohol and Tobacco Tax and Trade Bureau,'' dated January 24, 2003), to the TTB Administrator to perform the functions and duties in the administration and enforcement of these laws.

Use of Grape Variety Names on Wine Labels

Part 4 of the TTB regulations (27 CFR part 4) sets forth the standards promulgated under the FAA Act for the labeling and advertising of wine. Section 4.23 of the TTB regulations (27 CFR 4.23) sets forth rules for varietal (grape type) labeling. Paragraph (a) of that section sets forth the general rule that the names of one or more grape varieties may be used as the type designation of a grape wine only if the wine is labeled with an appellation of origin as defined in § 4.25. Under paragraphs (b) and (c), a wine bottler may use the name of a single grape variety on a label as the type designation of a wine if not less than 75 percent of the wine (or 51 percent in certain limited circumstances) is derived from grapes of that variety grown in the labeled appellation of origin area. Under paragraph (d), a bottler may use two or more grape variety names as the type designation of a wine if all the grapes used to make the wine are of the labeled varieties and if the percentage of the wine derived from each grape variety is shown on the label (and with additional rules in the case of multicounty and multistate appellations of origin). Paragraph (e) of § 4.23 provides that only a grape variety name approved by the TTB Administrator may be used as a type designation for an American wine and states that a list of approved grape variety names appears in subpart J of part 4.

Within subpart J of part 4, the list of grape variety names and their synonyms approved for use as type designations for American wines appears in § 4.91 (27 CFR 4.91). Alternative grape variety names temporarily authorized for use are listed in § 4.92 (27 CFR 4.92). Finally, § 4.93 (27 CFR 4.93) sets forth rules for the approval of grape variety names.

Approval of New Grape Variety Names

Section 4.93 provides that any interested person may petition the TTB Administrator for the approval of a grape variety name and that the petition should provide evidence of the following:

- That the new grape variety is accepted;
- That the name for identifying the grape variety is valid;
- That the variety is used or will be used in winemaking; and
- That the variety is grown and used in the United States.

Section 4.93 further provides that documentation submitted with the petition may include:

- A reference to the publication of the name of the variety in a scientific or professional journal of horticulture or a published report by a professional, scientific, or winegrowers' organization;
- A reference to a plant patent, if patented; and
- Information pertaining to the commercial potential of the variety, such as the acreage planted and its location or market studies.

Section 4.93 also places certain eligibility restrictions on the approval of grape variety names. TTB will not approve a new name:

- If it has been used previously for a different grape variety;
- If it contains a term or name found to be misleading under § 4.39 (27 CFR 4.39); or
- If it contains the term ''Riesling.'' (See T.D. ATF–370, 61 FR 522, published 1/8/96.)

Typically, if TTB determines that the evidence submitted with a petition supports approval of the new grape variety name, TTB will send a letter of approval to the petitioner advising the petitioner that TTB will propose to add the grape variety name to the list of approved grape variety names in § 4.91 at a later date. Those letters are considered administrative approvals, and they are posted on TTB's Web site once a grape variety is approved. After one or more approvals have been issued, a notice of proposed rulemaking will be prepared for publication in the **Federal Register** proposing to add the name(s) to the § 4.91 list, with opportunity for public comment. In the event that one or more comments or other information demonstrate the inappropriateness of an approval action, TTB will determine not to add the grape variety name in question to the list and will advise the original petitioner that the name is no longer approved.

Since the last revision of the approved grape variety names list in § 4.91, (T.D. TTB–95, 76 FR 66625, published October 27, 2011), TTB has received and administratively approved a number of petitions for new grape variety names. In this notice, TTB is proposing to add a number of grape variety names to the list of names in § 4.91 to reflect those approvals. The evidence that the petitioners submitted in support of each name—and that formed the basis for the TTB approval—is summarized below. TTB is requesting comments on the appropriateness of these names for use on American wine labels.

TTB is also requesting comments on one petitioned-for grape name that TTB did not approve administratively. The petition for this name—Phoenix—is also discussed below. In addition, TTB has received a petition requesting that one grape variety name currently listed in § 4.91—Geneva Red 7—be removed from the list and replaced with the name ''Geneva Red.'' TTB is requesting comments on this petition.

Grape Name Petitions

Amigne

White Heron Cellars, Quincy, Washington, petitioned TTB to add ''Amigne'' to the list of approved grape variety names. Amigne is a white *Vitis vinifera* grape variety long grown in Switzerland, but relatively new to the United States. The petitioner stated that it has grown the variety since the 1990s, and submitted written verification from a plant pathologist identifying its vines as Amigne. As evidence of the variety's acceptance, name validity, and usage, the petitioner also submitted references to Amigne from a Swiss publication ''Principaux cépages cultivés en Suisse'' (Principle Varieties Cultivated in Switzerland), published by the Swiss Federal Agricultural Research Station at Changins. Based on this evidence, TTB proposes to add Amigne to the list of grape variety names in § 4.91.

Arandell

Jessica Lyga, Plant Varieties & Germplasm Licensing Associate, Center for Technology Enterprise and Commercialization, Cornell University, petitioned TTB to add ''Arandell'' to the list of approved grape varieties. Arandell, a red wine grape developed at Cornell, is a cross between two interspecific hybrid selections from Cornell's grape breeding program. According to a Cornell University bulletin submitted by the petitioner, Arandell is a ''grape characterized by a high degree of natural disease resistance and producing dark red wines with clean, berry aromas.'' The petitioner also submitted Arandell's listing in the National Grape Registry, published by the University of California at Davis (UC Davis), which notes the variety is available for sale at two commercial nurseries in New York. Based on this evidence, TTB proposes to add Arandell to the list of grape variety names in § 4.91.

Aromella

Jessica Lyga, Plant Varieties & Germplasm Licensing Associate, Center for Technology Enterprise and Commercialization, Cornell University, petitioned TTB to add ''Aromella'' to the list of approved grape varieties. Aromella is a white wine grape developed at Cornell from a cross between Traminette and Ravat 34. According to a Cornell University bulletin submitted by the petitioner, Aromella is ''a winter-hardy white wine grape with high potential productivity and excellent aromatic muscat wine characteristics.'' The petitioner also submitted Aromella's listing in UC Davis's National Grape Registry, which notes the variety is available for sale at three commercial nurseries in New York and California. Based on this evidence, TTB proposes to add Aromella to the list of grape variety names in § 4.91.

Arvine

White Heron Cellars, Quincy, Washington, petitioned TTB to add ''Arvine'' to the list of approved grape variety names. Arvine is a white *Vitis vinifera* variety originally from Switzerland and northern Italy. The petitioner stated that it has grown Arvine since the 1990s, having obtained its vines from Foundation Plant Services (FPS) at UC Davis. FPS currently sells the variety. As evidence of the variety's acceptance, name validity, and usage, the petitioner also submitted references to Arvine from a Swiss publication ''Principaux cépages cultivés en Suisse'' (Principle Varieties Cultivated in Switzerland), published by the Swiss Federal Agricultural Research Station at Changins. Based on this evidence, TTB proposes to add Arvine to the list of grape variety names in § 4.91.

Bianchetta trevigiana

Laraneta Winery, Templeton, California, petitioned TTB to add ''Bianchetta trevigiana'' to the list of approved grape variety names. Bianchetta trevigiana is a white *Vitis vinifera* variety originally from northern Italy. To satisfy the requirements of § 4.93, the petitioner submitted a letter from UC Davis's FPS stating that DNA testing done on one of the petitioner's vines showed it to be of the Bianchetta trevigiana variety. According to UC Davis's National Grape Registry, the variety is available for sale at two California nurseries. Based on this evidence, TTB proposes to add Bianchetta trevigiana to the list of grape variety names in § 4.91.

Black Spanish

Majek Vineyard and Winery, San Antonio, Texas, petitioned TTB to add ''Black Spanish'' to the list of approved grape variety names as a synonym for the currently listed ''Lenoir.'' Black Spanish is a hybrid red wine grape grown in Texas and other southern States. As evidence of the validity of the name ''Black Spanish'' to identify the variety, the petitioner submitted links to several Web sites that refer to the variety by that name. These links include one to UC Davis's National Grape Registry, which lists ''Black Spanish'' as a common synonym for Lenoir, and three links to nursery Web sites that list the variety by the name ''Black Spanish.'' If Black Spanish is approved, it will appear as a synonym for Lenoir in § 4.91. TTB believes that the evidence warrants the approval of Black Spanish as a valid name commonly used in the United States for this variety. However, we welcome comments on this issue. Based on the above evidence, TTB proposes to add the name ''Black Spanish'' to the list of grape variety names in § 4.91 to be identified with its synonym ''Lenoir.'' TTB also received a petition for approval of the name ''Jacquez,'' another synonym for Lenoir (see discussion below under ''Jacquez'').

Bluebell

Clover Meadow Winery, Shell Lake, Wisconsin, petitioned TTB to add ''Bluebell'' to the list of approved grape variety names. Bluebell is an interspecific cross developed at the University of Minnesota in 1944. A very cold-hardy variety, it is commonly used for table grapes, juice, and jelly. The petitioner, however, produces wine from the variety. To satisfy the requirements of § 4.93, the petitioner submitted Web site references to Bluebell from the University of Minnesota and UC Davis's National Grape Registry, which lists five nurseries selling the variety. Based on this evidence, TTB proposes to add the name ''Bluebell'' to the list of grape variety names in § 4.91.

Bourboulenc

Tablas Creek Vineyard, Paso Robles, California, petitioned TTB to add ''Bourboulenc'' to the list of approved grape variety names. Bourboulenc is a white *Vitis vinifera* variety associated with the Rhône region of France, where it is one of the thirteen authorized varieties permitted in the Châteauneuf-du-Pape appellation of origin. As part of the petition, Tablas Creek submitted a letter of support from the director of FPS at UC Davis, Dr. Deborah Golino. In her letter, Dr. Golino states that Bourboulenc plant material was imported from France to FPS, where it was tested and found to be free of viruses, then planted in FPS's Russell Ranch Foundation Vineyard. The variety is currently available for sale to the public at FPS. In addition to the letter from Dr. Golino, the petitioner also submitted several published references to Bourboulenc. Based on this evidence, TTB proposes to add Bourboulenc to the list of grape variety names in § 4.91.

Brachetto

Pete Anderson of Eusinus Vineyard and Witch Creek Winery, Carlsbad, California, petitioned TTB to add ''Brachetto'' to the list of approved grape variety names. Brachetto is a red *Vitis vinifera* variety originally from the Piedmont region of Italy. The petitioner states he has grown Brachetto for several years at his Eusinus Vineyard and is aware of one other California winery growing and producing wine from the variety. To satisfy the requirements of § 4.93, the petitioner submitted a letter from FPS at UC Davis stating that its DNA analysis of his vine sample showed it to be a match for samples of Brachetto held by the National Clonal Germplasm Repository at UC Davis. Based on this evidence, TTB proposes to add Brachetto to the list of grape variety names in § 4.91.

By George

Girouard Vines, Tulsa, Oklahoma, petitioned TTB to add ''By George'' to the list of approved grape variety names. By George is a red wine grape developed by George E. Girouard by crossing Ruby Cabernet with *Vitis aestivalis* JG #3. As evidence of the grape's acceptance and name validity, the petitioner submitted a listing for By George from the May 2012 HortScience's Register of New Fruit and Nut Cultivars. The petitioner states that the variety is currently grown in Oklahoma and California, and it planned to release a wine made from By George in 2015. Based on this evidence, TTB proposes to add By George to the list of grape variety names in § 4.91.

Caladoc

RBZ Vineyards, Templeton, California, petitioned TTB to add ''Caladoc'' to the list of approved grape variety names. Caladoc is a red *Vitis vinifera* grape developed in France in 1958 as a crossing of Grenache and Malbec. To satisfy the requirements of § 4.93, the petitioner submitted a listing for Caladoc from UC Davis's National Grape Registry, which indicates that the variety is for sale from FPS. The

petitioner also submitted pages from a California nursery catalogue indicating that it sells the variety. Additionally, the petitioner states that it and several other U.S. vineyards grow Caladoc. Based on this evidence, TTB proposes to add Caladoc to the list of grape variety names in § 4.91.

Caprettone

Belle Fiore Winery, Ashland, Oregon, petitioned TTB to add ''Caprettone'' to the list of approved grape variety names. Caprettone is a white *Vitis vinifera* originally from southern Italy. As evidence of the grape's acceptance and name validity, the petitioner submitted a listing for Caprettone from UC Davis's National Grape Registry. According to this listing, Caprettone was initially released by UC Davis's FPS under the name ''Coda di Volpe''; however, subsequent DNA testing correctly identified the variety as Caprettone. The National Grape Registry currently lists three nurseries selling the variety. Based on this evidence, TTB proposes to add Caprettone to the list of grape variety names in § 4.91.

Chisago

Wine Haven, Inc., Chisago City, Minnesota, petitioned TTB to add ''Chisago'' to the list of approved grape variety names. Chisago is a red wine variety developed by the petitioner from a crossing of St. Croix and Swenson Red. Noteworthy for its winter hardiness, the variety can survive temperatures that reach minus 40 degrees Fahrenheit. To satisfy the requirements of § 4.93, the petitioner submitted copies of its U.S. Plant Patent and U.S. Trademark Registration for Chisago, along with two articles referencing the variety and a list of wine competition awards won by its Chisago wine. According to the petitioner, several other Minnesota vineyards also are growing Chisago, and two nurseries planned to sell the variety in 2012. Based on this evidence, TTB proposes to add Chisago to the list of grape variety names in § 4.91.

Coda di Volpe

Pete Anderson of Eusinus Vineyard and Witch Creek Winery, Carlsbad, California, petitioned TTB to add ''Coda di Volpe'' to the list of approved grape variety names. Coda di Volpe is a white *Vitis vinifera* variety originally from the Campania region of Italy. To satisfy the requirements of § 4.93, the petitioner cited three published references to Coda di Volpe and notes that UC Davis's Foundation Plant Services imported Coda di Volpe vines in 2000. According to the petitioner, five California vineyards and wineries grow or make wine from the variety. UC Davis's National Grape Registry lists three California nurseries that sell Coda di Volpe vines to the public. Based on this evidence, TTB proposes to add Coda di Volpe to the list of grape variety names in § 4.91.

Diana

John H. Brahm III, winemaster at Arbor Hill Winery, Naples, New York, petitioned TTB to add ''Diana'' to the list of approved grape variety names. Diana is a red hybrid variety that has grown in the Finger Lakes region since the mid-1800s. To satisfy the requirements of § 4.93, the petitioner submitted an excerpt from the 1908 book ''The Grapes of New York,'' which describes Diana as a seedling of Catawba that ripens early and is thus good for cold climates. The petitioner also submitted a photo of a Widmer's Wine Cellars label for a Diana wine, vintage 1942. The petitioner states that Arbor Hill has recently produced a Diana wine which it intends to release for sale. TTB notes that the U.S. Department of Agriculture's Plant Genetic Resources Unit in Geneva, New York, maintains Diana in its collection and distributes the variety. Based on this evidence, TTB proposes to add Diana to the list of grape variety names in § 4.91.

Esprit

Deja Vine Vineyards & Winery, Martelle, Iowa, petitioned TTB to add ''Esprit'' to the list of approved grape variety names. Esprit, a white interspecific hybrid, was developed by Elmer Swenson as a cross between Villard blanc and Edelweiss. To satisfy the requirements of § 4.93, the petitioner submitted two publications from Iowa State University describing the viticultural characteristics of Esprit and the quality of its wine. Esprit is also listed in UC Davis's National Grape Registry, which notes that a New York nursery sells the variety. Based on this evidence, TTB proposes to add Esprit to the list of grape variety names in § 4.91.

Falanghina

Pete Anderson of Eusinus Vineyard and Witch Creek Winery, Carlsbad, California, petitioned TTB to add ''Falanghina'' to the list of approved grape variety names. Falanghina is a white *Vitis vinifera* grape variety originally from the Campania region of Italy. As evidence, the petitioner cited a number of wine publications that reference Falanghina. The variety is also listed in UC Davis's National Grape Registry, which names four nurseries selling the variety. According to the petitioner, four California vineyards and wineries are either growing Falanghina or producing wine from the variety. Based on this evidence, TTB proposes to add Falanghina to the list of grape variety names in § 4.91.

Geneva Red/Geneva Red 7

Jessica Lyga of Cornell University petitioned TTB to change the currently approved grape variety name ''Geneva Red 7'' to ''Geneva Red.'' Geneva Red 7 was added to § 4.91 by T.D. TTB–95 as the result of a petition from a New York winery (see 76 FR 66625, October 27, 2011). The Geneva Red petition states that Cornell University, the developer and owner of the grape variety, does not endorse the use of the name ''Geneva Red 7'' and notes that the petition for that name was submitted without its approval. The petition states that Cornell is concerned that the ''7'' in ''Geneva Red 7'' is confusing and leads the consumer to question whether there are similarly named grape varieties, such as Geneva Red 1, 2, 3, etc.

As evidence for the name Geneva Red, the petitioner submitted a 2003 Cornell publication referencing the variety as ''Geneva Red,'' along with the variety's entry from UC Davis' National Grape Registry which lists the variety as ''Geneva Red.'' Based on this evidence, TTB granted administrative approval to the name ''Geneva Red'' as a valid synonym for ''Geneva Red 7,'' but advised the petitioner that it could not remove the name ''Geneva Red 7'' from § 4.91 without rulemaking. The petitioner has subsequently submitted a list of four commercial vineyards and wineries that use the name ''Geneva Red'' for the grape variety on their Web sites. Because the evidence indicates that this is the name currently used in the marketplace for the variety, TTB proposes to remove the name ''Geneva Red 7'' from § 4.91 and replace it with ''Geneva Red.'' However, TTB welcomes comments on the validity of the name, Geneva Red, as an approved name for this grape variety.

TTB further proposes to allow the use of the grape variety name ''Geneva Red 7'' for a period of 1 year after publication of a final rule on this matter if Geneva Red 7 is removed based on sufficient evidence from comments received. If this proposal is adopted as a final rule, those holding a certificate of label approval (COLA) with the name ''Geneva Red 7'' would have sufficient time to obtain new labels. At the end of the 1-year period, holders of approved ''Geneva Red 7'' labels would be required to discontinue their use as their COLA approval will be revoked by operation of the final rule (see 27 CFR

13.51 and 13.72(a)(2)). TTB believes the 1-year period will provide such label holders with adequate time to use up their supply of previously approved ''Geneva Red 7'' labels. This proposal appears in a new paragraph (e) of 27 CFR 4.92.

Godello

California American Terroirs, Sonoma, California, petitioned TTB to add ''Godello'' to the list of approved grape variety names. Godello is a white *Vitis vinifera* variety native to Spain and Portugal. To satisfy the requirements of § 4.93, the petitioner cited several published references to the Godello variety in professional journals and wine reference books. These include the article ''Prospection and identification of grapevine varieties cultivated in north Portugal and northwest Spain,'' J.P. MARTÍN, et al., from the journal ''Vitis,'' 50 (1), pp. 29–33 (2011), and ''Wine Grapes,'' Jancis Robinson, ed. (2012), p. 413. The petitioner also submitted evidence that a California nursery sells the variety. According to the petitioner, a number of wineries in California and Oregon grow Godello. Based on this evidence, TTB proposes to add Godello to the list of grape variety names in § 4.91.

Gros Manseng

Tablas Creek Vineyard, Paso Robles, California, petitioned TTB to add ''Gros Manseng'' to the list of approved grape variety names. Gros Manseng is a white *Vitis vinifera* variety of French origin. As evidence of the variety's acceptance and name validity, the petitioner submitted several published references to Gros Manseng, including the ''Oxford Companion to Wine'' (1999 edition) and Pierre Galet's ''Cépage et Vignobles de France.'' Tablas Creek Vineyards imported Gros Manseng into the New York Agricultural Experiment Station in Geneva, New York, in 2000. After it was indexed and declared virus free in 2003, it was shipped bare root to the petitioner. The petitioner states it has provided Gros Manseng budwood to a California nursery, and TTB is aware of two other nurseries selling the variety. Based on this evidence, TTB proposes to add Gros Manseng to the list of grape variety names in § 4.91.

Humagne Rouge

White Heron Cellars, Quincy, Washington, petitioned TTB to add ''Humagne Rouge'' to the list of approved grape variety names. Humagne Rouge is a red *Vitis vinifera* grape variety long grown in Switzerland, but relatively new to the United States. The petitioner stated that it obtained its Humagne Rouge vines from UC Davis's FPS in the 1990s, and the petition included an entry for the variety from a 1997 FPS catalogue showing that the variety was sold in the United States. As evidence of the variety's acceptance, name validity, and usage, the petitioner also submitted references to Humagne Rouge from a Swiss publication, ''Principaux cépages cultivés en Suisse'' (Principle Varieties Cultivated in Switzerland), published by the Swiss Federal Agricultural Research Station at Changins. Based on this evidence, TTB proposes to add Humagne Rouge to the list of grape variety names in § 4.91.

Jacquez

Haak Vineyards & Winery, Santa Fe, Texas, petitioned TTB to add ''Jacquez'' to the list of approved grape variety names as a synonym for the currently listed ''Lenoir.'' Jacquez is a hybrid red wine grape grown in Texas and other southern States, where it is also known by the name ''Black Spanish.'' The petitioner states it has used the name ''Jacquez'' on its wine labels since 2003; as a result, its customers identify the wine by that name. As evidence of the validity of the name ''Jacquez'' to identity the variety, the petitioner submitted an entry for Jacquez from UC Davis's National Grape Registry, which lists ''Black Spanish'' and ''Lenoir'' as synonyms. The petitioner also cites a number of wine reference books that refer to the variety as ''Jacquez,'' including Hugh Johnson's ''Story of Wine'' (2002 edition, p. 439).

TTB also received a petition for ''Black Spanish.'' (See discussion above under ''Black Spanish.'') If Jacquez and Black Spanish are both approved, three names for one variety will appear in § 4.91. TTB believes that the evidence warrants the approval of Jacquez and Black Spanish as they are both valid names commonly used in the United States for this variety. However, we welcome comments on this issue. Based on the above evidence, TTB proposes to add the name ''Jacquez'' to the list of grape variety names in § 4.91 to be identified with its synonyms ''Black Spanish'' and ''Lenoir.''

Jupiter

Yamhalis Vineyard, Yamhill, Oregon, petitioned TTB to add ''Jupiter'' to the list of approved grape variety names. Jupiter is a hybrid grape developed by the University of Arkansas and released for commercial production in 1999. Although it is most commonly used as a table grape, the petitioner states it produces a good dry red wine. To satisfy the requirements of § 4.93, the petitioner submitted an article on Jupiter in the scientific journal HortScience (Vol. 43 (7)), a copy of the plant patent for Jupiter, and a letter from Dr. John R. Clark, one of Jupiter's breeders. According to UC Davis's National Grape Registry, the variety is available from at least four U.S. nurseries. Based on this evidence, TTB proposes to add the name ''Jupiter'' to the list of grape variety names in § 4.91.

King of the North

Clover Meadow Winery, Shell Lake, Wisconsin, petitioned TTB to add ''King of the North'' to the list of approved grape variety names. A black grape, King of the North is an interspecific hybrid of unknown origin. Although it is most frequently grown for table grapes, juice, and jelly, it is also used to produce red wine by the petitioners and other wineries. As supporting evidence, the petitioner submitted Web site references to King of the North from Iowa State University and UC Davis's National Grape Registry, which lists three nurseries selling the variety. Based on this evidence, TTB proposes to add the name ''King of the North'' to the list of grape variety names in § 4.91.

Lambrusca di Alessandria

Pete Anderson of Witch Creek Winery, Carlsbad, California, petitioned TTB to add ''Lambrusca di Alessandria'' to the list of approved grape variety names. Lambrusca di Alessandria is a red *Vitis vinifera* variety of Italian origin. According to the petitioner, Lambrusca di Alessandria is a different variety from the Lambrusco currently listed in § 4.91. He cites as evidence a March–April 2006 article from the Italian publication ''Italus Hortus,'' titled ''Lambruschi from Piedmont: Historical investigations, fingerprinting and genetic relationships with other autochthonous Italian grapes (*Vitis vinifera* L.),'' by D. Torello Marinoni; S. Raimondi; P. Boccacci; and A. Schneider. The petitioner also cites ''Vitigni d'Italia,'' by Antonio Calò, Attilio Scienza, and Angelo Costacurta (2001) as a reference book that names and identifies the variety as distinctive from other Lambruschi varieties. Additionally, the petitioner notes that Lambrusca di Alessandria is maintained, by that name, in the collection of the U.S. Department of Agriculture's National Clonal Germplasm Repository in Davis, California.

When the petitioner submitted a grapevine sample that he thought was of the Nebbiolo variety to UC Davis's FPS for DNA analysis, he was informed that the sample was actually Lambrusca di

Alessandria. This result was subsequently confirmed by Dr. Anna Schneider of the Istituto di Virologia Vegetale Sezione di Grugliasco, Torino, Italy. The petitioner reports that seven vineyards and wineries in California are currently growing Lambrusca di Alessandria or producing wine from it. Based on this evidence, TTB proposes to add the name ''Lambrusca di Alessandria'' to the list of grape variety names in § 4.91.

Loureiro

Lehrman Beverage Law petitioned TTB to add ''Loureiro'' to the list of approved grape variety names. Loureiro is a white *Vitis vinifera* variety originally cultivated in Spain and Portugal. To satisfy the requirements of § 4.93, the petitioner submitted the listing for Loureiro in UC Davis's National Grape Registry, along with evidence that at least two California nurseries sell the variety and a number of California wineries produce wine from it. Based on this evidence, TTB proposes to add Loureiro to the list of grape variety names in § 4.91.

Madeleine Sylvaner

Comfort Farm and Vineyard, Langley, Washington, petitioned TTB to add ''Madeleine Sylvaner'' to the list of approved grape variety names. Madeleine Sylvaner is a white *Vitis vinifera* variety that grows well in cooler climates. As evidence, the petitioner cited a Washington State University publication entitled ''Growing Grapes for Wine and Table in the Puget Sound Region'' that discusses Madeleine Sylvaner as a variety well suited to the Puget Sound climate. The petitioner states that it has grown the variety for 12 years and provided Madeleine Sylvaner grapes to other wineries in the Puget Sound region. TTB is aware of other Washington wineries producing wine from this variety. Based on this evidence, TTB proposes to add Madeleine Sylvaner to the list of grape variety names in § 4.91.

Marquis

Wyldewood Cellars Winery, Mulvane, Kansas, petitioned TTB to add ''Marquis'' to the list of approved grape variety names. Marquis is a white hybrid variety developed at Cornell University as a cross of the Athens and Emerald Seedless varieties. To satisfy the requirements of § 4.93, the petitioner submitted a copy of Cornell's 1999 plant patent for Marquis, a 1996 bulletin on Marquis issued by Cornell, and an article about the variety from the journal HortScience (Vol. 32 (1)). Marquis is also listed in UC Davis's National Grape Registry and is available from at least four commercial nurseries. Based on this evidence, TTB proposes to add Marquis to the list of grape variety names in § 4.91.

Marselan

RBZ Vineyards, Templeton, California, petitioned TTB to add ''Marselan'' to the list of approved grape variety names. Marselan is a red *Vitis vinifera* variety developed in France as a crossing of Cabernet Sauvignon and Grenache noir. The petitioner submitted a listing for Marselan from UC Davis's National Grape Registry, which indicates that the variety is available for sale from FPS. The petitioner also submitted pages from a California nursery catalogue indicating that it also sells the variety. Additionally, the petitioner states that it and several other U.S. vineyards grow Marselan. Based on this evidence, TTB proposed to add Marselan to the list of grape variety names in § 4.91.

Mustang

Natalia Winery, Natalia, Texas, petitioned TTB to add ''Mustang'' to the list of approved grape names. Mustang (*Vitis mustangensis*) is a variety native to the United States that grows wild in areas of Texas, Oklahoma, Arkansas, Louisiana, and Alabama. To satisfy the requirements of § 4.93, the petitioner cited a number of internet Web sites that reference the Mustang variety, including that of the U.S. Department of Agriculture's Natural Resources Conservation Service and Texas A & M University's Department of Horticulture. The petitioner states that it harvests ½ ton of Mustang grapes with which it produces a 100% Mustang wine. Additionally, TTB has found evidence that at least one Texas nursery sells Mustang vines. Based on this evidence, TTB proposes to add Mustang to the list of grape variety names in § 4.91.

Petite Pearl

Tom Plocher of Plocher Vines, Hugo, Minnesota, petitioned TTB to add ''Petite Pearl'' to the list of approved grape names. Petite Pearl, a red hybrid known for its cold hardiness, was developed by Mr. Plocher from a 1996 cross of MN 1094 and E.S. 4–7–26. To satisfy the requirements of § 4.93, the petitioner submitted a January 2013 article about Petite Pearl published by Midwest Wine Press entitled ''Coming Soon: A New Red Wine That's a Pearl,'' along with evidence that two nurseries (in Minnesota and Vermont) sell the variety. He also named four wineries producing Petite Pearl wine. Based on this evidence, TTB proposes to add Petite Pearl to the list of grape variety names in § 4.91.

Phoenix

King's Raven Winery, Oregon City, Oregon, petitioned TTB to add ''Phoenix'' to the list of approved grape names. Phoenix is a white *Vitis vinifera* variety developed in Germany as a cross of Bacchus weiss and Villard blanc. The petitioner submitted a number of published references to Phoenix, including a listing in UC Davis's National Grape Registry, along with evidence that two other American vineyards grow the variety.

Although TTB believes that the petition contains sufficient evidence under § 4.93 to approve the name ''Phoenix,'' TTB opted to propose adding the name to the list of grape variety names through rulemaking action rather than approve it administratively due to potential conflicts with existing COLAs. An electronic search of TTB's COLAs online database for the word ''Phoenix'' disclosed 174 COLAS that use the word ''Phoenix'' on a wine label as part of a brand or fanciful name. Of these, 40 have been approved since 2012 for 12 different wineries. The use of a grape variety name in a brand name potentially could be misleading and prohibited under § 4.39. If the name Phoenix is approved as a grape variety name, these labels potentially could be misleading, particularly if they do not also contain a grape varietal designation. Because of this potential impact on current labels, TTB believes that the label holders should be given an opportunity to comment on this proposal. Those comments will better inform TTB as to whether the grape variety name should be approved and thus added to the list of approved names in § 4.91.

Picardan

Tablas Creek Vineyard, Paso Robles, California, petitioned TTB to add ''Picardan'' to the list of approved grape variety names. Picardan is a white *Vitis vinifera* variety associated with the Rhône region of France, where it is one of the thirteen authorized varieties permitted in the Châteauneuf-du-Pape appellation of origin. As part of the petition, Tablas Creek submitted a letter of support for approval of the name from the director of FPS, Dr. Deborah Golino. In her letter, Dr. Golino states that Picardan plant material was imported from France to FPS, where it was tested and found to be free of viruses, then planted in FPS's Classic Foundation Vineyard. The variety is currently available for sale to the public

at FPS. In addition to the letter from Dr. Golino, the petitioner also submitted several published references to Picardan. Based on this evidence, TTB proposes to add Picardan to the list of grape variety names in § 4.91.

Pinot Bianco

Rodrigue Molyneaux Winery, Livermore, California, petitioned TTB to add ''Pinot bianco'' to the list of approved grape variety names as a synonym for the currently listed ''Pinot blanc.'' Pinot bianco is the Italian name for this white wine variety, while Pinot blanc is the French name. The petitioner, who specializes in Italian grape varieties, believes that it would be confusing to customers if it labeled its Pinot bianco wines with the French name for the variety. As evidence of the validity of the synonym ''Pinot bianco,'' the petitioner cited a Web site about Italian varieties grown in California that refers to the variety by that name (see *http://www.cal-italia.org/wine.html).* Additionally, two wine reference books state that Pinot bianco is the Italian name for Pinot blanc, ''The Oxford Companion to Wine'' (Robinson, 1999 edition, p. 533) and ''Oz Clarke's Encyclopedia of Grapes'' (2001, p. 171). Based on this evidence, TTB proposes to add Pinot bianco to the list of grape variety names in § 4.91 as a synonym of Pinot blanc.

Plymouth

Girouard Vines, Tulsa, Oklahoma, petitioned TTB to add ''Plymouth'' to the list of approved grape variety names. Plymouth is a red wine grape developed by George E. Girouard by crossing Merlot with *Vitis aestivalis* JG #3. As evidence of the grape's acceptance and name validity, the petitioner submitted a listing for Plymouth from the May 2012 HortScience's Register of New Fruit and Nut Cultivars. The petitioner states that the variety is currently grown in Oklahoma and California, and it plans to release a wine made from Plymouth in 2015. Based on this evidence, TTB proposes to add Plymouth to the list of grape variety names in § 4.91.

Ribolla Gialla

Vare Vineyards, Napa, California, petitioned TTB to add ''Ribolla Gialla'' to the list of approved grape variety names. Ribolla Gialla is a white *Vitis vinifera* variety that has long grown in the Friuli region of Italy and in Slovenia. The petitioner states it has grown the variety and produced wine from it since 2004. The petitioner further states it sold grapes from the 2009 harvest to seven other wineries. As additional evidence, the petitioner cited a number of wine reference books that refer to the variety. Ribolla Gialla is also listed in UC Davis's National Grape Registry, which at the time of the petition listed three California nurseries selling the variety. Based on this evidence, TTB proposes to add Ribolla Gialla to the list of grape variety names in § 4.91.

Rieslaner

Mokelumne Glen Vineyards, Lodi, California, petitioned TTB to add ''Rieslaner'' to the list of approved grape variety names. Rieslaner is a white *Vitis vinifera* variety developed in Germany in 1921 as a cross of Riesling and Silvaner. According to the petitioner, it obtained its Rieslaner as cuttings from the New York State Agricultural Experiment Station many years ago and has been using it in wine blends. To satisfy the requirements of § 4.93, the petitioner cited a number of wine reference books that refer to Rieslaner, including ''The Oxford Companion to Wine'' (Robinson, 2006 edition, p. 577), and ''Production of Grapes and Wines in Cool Climates'' (David Jackson and Danny Schuster, 1986, p. 108). Based on this evidence, TTB proposes to add Rieslaner to the list of grape variety names in § 4.91.

Riverbank

Wild Grape Vineyards, Kindred, North Dakota, petitioned TTB to add ''Riverbank'' to the list of approved grape variety names. Riverbank (*Vitis riparia*) is a red variety native to North America that grows wild in the central and northeastern sections of the United States and Canada. To satisfy the requirements of § 4.93, the petitioner submitted evidence that at least one North Dakota nursery sells Riverbank vines and that at least one South Dakota winery sells wine produced from the variety. The petitioner also noted that the University of Minnesota has used the Riverbank variety in its grape breeding program to breed varieties with cold tolerance (see *http://www.arboretum.umn.edu/grapesandwine.aspx*). Based on this evidence, TTB proposes to add Riverbank to the list of grape variety names in § 4.91.

Rose of Peru

Galleano Winery, Mira Loma, California, petitioned TTB to add ''Rose of Peru'' to the list of approved grape variety names. Rose of Peru is a red *Vitis vinifera* variety, long grown in California, that DNA evidence has disclosed to be identical to the Mission variety, which is currently approved under § 4.91. To satisfy the requirements of § 4.93, the petitioner submitted a number of published references to the name ''Rose of Peru,'' including a February 12, 2007, article from Wine Spectator magazine entitled ''Researchers Uncover Identity of Historic California Grape'' about the Mission grape variety. According to this article, DNA research conducted at the Centro Nacional de Biotecnologia in Spain found the Rose of Peru variety to be identical to Mission. The results of this research were published in the article ''Determining the Spanish Origin of Representative Ancient American Grapevine Varieties'' (Tapia, *et al.*) from the June 2007 American Journal of Enology & Viticulture (vol. 58, no. 2, pp. 242–251). Based on this evidence, TTB proposes to add Rose of Peru to the list of grape variety names in § 4.91 as a synonym for Mission.

Saperavi

Standing Stone Vineyards, Hector, New York, petitioned TTB to add ''Saperavi'' to the list of approved grape variety names. Saperavi is a red *Vitis vinifera* variety that originates from the country of Georgia. To satisfy the requirements of § 4.93, the petitioner cited several published references to Saperavi. These include ''The Concise Atlas of Wine'' (Hugh Johnson and Jancis Robinson, 2009, pp. 227–229), and an article from the trade journal Vineyard & Winery Management entitled ''(The Republic of) Georgia on Their Minds'' (November/December 2010), which notes that a number of vineyards in the Northeastern United States are growing Saperavi. According to evidence submitted by the petitioner, three wineries in the Finger Lakes region of New York (including the petitioner) are growing the variety and producing wine from it. In addition, a New York nursery sells Saperavi, and the variety is listed in UC Davis's National Grape Registry. Based on this evidence, TTB proposes to add Saperavi to the list of grape variety names in § 4.91.

Schönburger

Plum Hill Vineyards, Gaston, Oregon, petitioned TTB to add ''Schönburger'' to the list of approved grape variety names. Schönburger is a *Vitis vinifera* variety with pink berries developed in Germany in 1979 from a crossing of Pinot Noir, Chasselas Rosé, and Muscat Hamburg. A cool climate variety, it is currently grown in Germany, England, and the U.S. and Canadian Pacific Northwest. To satisfy the requirements of § 4.93, the petitioner cited a number of published references to Schönburger, including

''The Oxford Companion to Wine'' (Robinson, 2006 edition, p. 622). UC Davis's National Grape Registry lists Schönburger and notes that two Washington State University facilities sell the variety to the public. The petitioner states it has 1.5 acres of Schönburger from which it plans to produce 600 cases of wine. Based on this evidence, TTB proposes to add Schönburger to the list of grape variety names in § 4.91.

Sheridan

Blackhawk Winery, Sheridan, Indiana, petitioned TTB to add ''Sheridan'' to the list of approved grape variety names. Sheridan, an interspecific cross of Herbert and Worden, was bred at the New York State Agricultural Experiment Station and released in 1921. Black in color, it is often used as a table grape. Sheridan is listed in UC Davis's National Grape Registry, and is available for sale at two New York nurseries. At the time of the petition, the petitioner was growing Sheridan and planning to produce wine from it. Based on this evidence, TTB proposes to add Sheridan to the list of grape variety names in § 4.91.

Southern Cross

Girouard Vines, Tulsa, Oklahoma, petitioned TTB to add ''Southern Cross'' to the list of approved grape variety names. Southern Cross is a red wine grape developed by George E. Girouard by crossing Merlot with *Vitis aestivalis* JG #3. As evidence of the grape's acceptance and name validity, the petitioner submitted a listing for Southern Cross from the May 2012 HortScience's Register of New Fruit and Nut Cultivars. The petitioner stated that the variety is currently grown in Oklahoma and California, and it plans to release a wine made from Southern Cross in 2015. Based on this evidence, TTB proposes to add Southern Cross to the list of grape variety names in § 4.91.

Terret Noir

Tablas Creek Vineyard, Paso Robles, California, petitioned TTB to add ''Terret Noir'' to the list of approved grape variety names. Terret Noir is a red *Vitis vinifera* variety associated with the Rhône region of France, where it is one of the 13 authorized varieties permitted in the Châteauneuf-du-Pape appellation of origin. As part of the petition, Tablas Creek submitted a letter of support for approval of the Terret Noir variety from the director of FPS, Dr. Deborah Golino. In her letter, Dr. Golino states that Terret Noir plant material was imported from France to FPS, where it was tested and found to be free of viruses, then planted in FPS's vineyards. The variety is currently available for sale to the public at FPS. In addition to the letter from Dr. Golino, the petitioner also submitted several published references to Terret Noir as evidence of the variety's acceptance and name validity. Based on this evidence, TTB proposes to add Terret Noir to the list of grape variety names in § 4.91.

Tinta Amarela

Abacela Winery, Roseburg, Oregon, petitioned TTB to add ''Tinta Amarela'' to the list of approved grape variety names. Tinta Amarela is a black *Vitis vinifera* grape that originated in Portugal, where it is commonly used in port. To satisfy the requirements of § 4.93, the petitioner submitted several published references to Tinta Amarela from wine reference books and wine Web sites. The petitioner also noted that the entry for Tinta Amarela in UC Davis's National Grape Registry lists eight U.S. nurseries that sell the variety. Based on this evidence, TTB proposes to add Tinta Amarela to the list of grape variety names in § 4.91.

Tinta Cao

Cypher Winery, Paso Robles, California, petitioned TTB to add ''Tinta Cao'' to the list of approved grape variety names. Tinta Cao is a synonym for ''Tinto cão,'' a name already listed in § 4.91. As evidence that Tinta Cao is a valid name for the variety, the petitioner submitted a copy of the 2008 California Grape Crush Report, issued by the California Department of Food and Agriculture. The publication, referring to ''Tinta Cao,'' reports that 408.6 tons of the grape were crushed in California that year. Additionally, UC Davis's National Grape Register lists ''Tinta Cao'' as a synonym for Tinto cão and TTB is aware of at least one California vineyard selling the variety by the proposed name. Based on this evidence, TTB proposes to add Tinta Cao to the list of grape variety names in § 4.91 as a synonym for Tinto cão.

Tinta Roriz

Cypher Winery, Paso Robles, California, petitioned TTB to add ''Tinta Roriz'' to the list of approved grape variety names. Tinta Roriz is a synonym for ''Tempranillo'' and ''Valdepeñas,'' names already listed in § 4.91. As evidence that Tinta Roriz is a valid name for the variety, the petitioner submitted a copy of the 2008 California Grape Crush Report, which refers to Tinta Roriz as a synonym for Tempranillo and Valdepeñas. UC Davis's National Grape Registry contains a separate listing for Tinta Roriz, but notes that it is a Portuguese name for the grape variety known in Spain as Tempranillo. If the name ''Tinta Roriz'' is approved, three names for this variety will appear in § 4.91. TTB believes that the evidence warrants the approval of Tinta Roriz. However, we welcome comments on this issue. Based on the above evidence, TTB proposes to add Tinta Roriz to the list of grape variety names in § 4.91.

Touriga Nacional

Cypher Winery, Paso Robles, California, petitioned TTB to add ''Touriga Nacional'' to the list of approved grape variety names. Touriga Nacional is a black *Vitis vinifera* grape variety originally from Portugal. To satisfy the requirements of § 4.93, the petitioner submitted a copy of the 2008 California Grape Crush Report, issued by the California Department of Food and Agriculture. This publication reports that 914.5 tons of Touriga Nacional were crushed in California that year. Also, UC Davis's National Grape Registry contains an entry for Touriga Nacional, and it lists 12 nurseries selling the variety. Based on this evidence, TTB proposes to add Touriga Nacional to the list of grape variety names in § 4.91.

The name ''Touriga'' is currently listed in § 4.91, which the petitioner contends is similar to listing ''Cabernet Sauvignon'' as ''Cabernet.'' However, the petitioner did not request the removal of ''Touriga'' from the list, nor did it submit any evidence for such a removal. TTB is aware that there are other grape variety names that include ''Touriga'' as part of the name (the National Grape Registry also lists ''Touriga Franca'' and ''Touriga Brasileira''). Because bottlers of wines produced from these grapes may be utilizing the name ''Touriga,'' TTB proposes to keep the name on the list for now. However, we welcome comments regarding the accuracy of the name ''Touriga.''

Vaccarèse

Tablas Creek Vineyard, Paso Robles, California, petitioned TTB to add ''Vaccarèse'' to the list of approved grape variety names. Vaccarèse is a red *Vitis vinifera* variety associated with the Rhône region of France, where it is one of the 13 authorized varieties permitted in the Châteauneuf-du-Pape appellation of origin. As part of the petition, Tablas Creek submitted a letter of support from the director of FPS, Dr. Deborah Golino. In her letter, Dr. Golino states that Vaccarèse plant material was imported from France to FPS, where it was tested and found to be free of viruses, then

planted in FPS's Russell Ranch Foundation Vineyard. The variety is currently available for sale to the public at FPS. In addition to the letter from Dr. Golino, the petitioner also submitted several published references to Vaccarèse. Based on this evidence, TTB proposes to add Vaccarèse to the list of grape variety names in § 4.91.

Valjohn

Girouard Vines, Tulsa, Oklahoma, petitioned TTB to add ''Valjohn'' to the list of approved grape variety names. Valjohn is a red wine grape developed by George E. Girouard by crossing Cabernet Franc with *Vitis aestivalis* JG # 3. To satisfy the requirements of § 4.93, the petitioner submitted a listing for Valjohn from the May 2012 HortScience's Register of New Fruit and Nut Cultivars. The petitioner stated that the variety is currently grown in Oklahoma and California, and that it plans to release a wine made from Valjohn in 2015. Based on this evidence, TTB proposes to add Valjohn to the list of grape variety names in § 4.91.

Verdejo

Berryessa Gap Vineyards, Winters, California, petitioned TTB to add ''Verdejo'' to the list of approved grape variety names. Verdejo is a white *Vitis vinifera* variety that has grown for centuries in the Rueda region of Spain. To satisfy the requirements of § 4.93, the petitioner cites a number of published references to Verdejo, including in ''The Oxford Companion to Wine'' (Robinson, 2006 edition) and the American Journal of Enology and Viticulture. Separately, TTB received a letter of support for the petition from the director of FPS, Dr. Deborah Golino. She reports that FPS imported the variety in 2000 and since 2006 has distributed more than 750 Verdejo cuttings or plants to California vineyards. According to UC Davis's National Grape Registry, five nurseries sell Verdejo to the public. Based on this evidence, TTB proposes to add Verdejo to the list of grape variety names in § 4.91.

Technical Correction

TTB has become aware of a technical error in § 4.91 in that the grape variety name ''Madeleine Angevine'' is currently misspelled as ''Madeline Angevine.'' TTB proposes to correct this error in this document. TTB also proposes to allow the use of the spelling ''Madeline Angevine'' for a period of 1 year after publication of a final rule on this matter so that anyone holding a COLA with the misspelling has sufficient time to obtain new labels. If this proposal is adopted as a final rule, at the end of the 1-year period, holders of approved ''Madeline Angevine'' labels must discontinue their use as their certificates of label approval will be revoked by operation of the final rule (see 27 CFR 13.51 and 13.72(a)(2)). TTB believes the 1-year period will provide such label holders with adequate time to use up their supply of previously approved ''Madeline Angevine'' labels. This proposal appears in a new paragraph (e) of 27 CFR 4.92.

Public Participation

Comments Sought

TTB requests comments from members of the public, particularly any person whose use of an approved label might be impacted by final approval of the grape variety names that are the subject of this proposed rule. TTB is also interested in comments that might bring into question whether an added grape name is accurate and appropriate for the designation of American wines. TTB is particularly interested in comments concerning the grape name discussed above that TTB did not approve by letter, Phoenix, as well as Geneva Red 7, the grape name we are proposing to replace with the name ''Geneva Red.'' Finally, TTB invites comment on any other issue raised by this notice of proposed rulemaking. Please support your comment with specific information about the grape varietal name in question.

Submitting Comments

You may submit comments on this notice by using one of the following three methods:

- *Federal e-Rulemaking Portal:* You may send comments via the online comment form posted with this proposed rule within Docket No. TTB–2016–0011 on ''*Regulations.gov,*'' the Federal e-rulemaking portal, at *https://www.regulations.gov.* A direct link to that docket is available under Notice No. 165 on the TTB Web site at *https://www.ttb.gov/wine/wine-rulemaking.shtml.* Supplemental files may be attached to comments submitted via *Regulations.gov.* For complete instructions on how to use *Regulations.gov,* click on the site's ''Help'' tab.
- *U.S. Mail:* You may send comments via postal mail to the Director, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Box 12, Washington, DC 20005.
- *Hand Delivery/Courier:* You may hand-carry your comments or have them hand-carried to the Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Suite 400E, Washington, DC 20005.

Please submit your comments by the closing date shown above in this proposed rule. Your comments must reference Notice No. 165 and include your name and mailing address. Your comments also must be made in English, be legible, and be written in language acceptable for public disclosure. TTB does not acknowledge receipt of comments and considers all comments as originals.

In your comment, please clearly state if you are commenting for yourself or on behalf of an association, business, or other entity. If you are commenting on behalf of an entity, your comment must include the entity's name as well as your name and position title. In your comment via *Regulations.gov,* please enter the entity's name in the ''Organization'' blank of the online comment form. If you comment via postal mail or hand delivery/courier, please submit your entity's comment on letterhead.

You may also write to the Administrator before the comment closing date to ask for a public hearing. The Administrator reserves the right to determine whether to hold a public hearing.

Confidentiality

All submitted comments and attachments are part of the public record and subject to disclosure. Do not enclose any material in your comments that you consider to be confidential or inappropriate for public disclosure.

Public Disclosure

TTB will post, and you may view, copies of this proposed rule and any online or mailed comments received about this proposal within Docket No. TTB–2016–0011 on the Federal e-rulemaking portal. A direct link to that docket is available on the TTB Web site at *https://www.ttb.gov/wine/wine-rulemaking.shtml* under Notice No. 165. You may also reach the relevant docket through the *Regulations.gov* search page at *https://www.regulations.gov.* For information on how to use *Regulations.gov,* click on the site's ''Help'' tab.

All posted comments will display the commenter's name, organization (if any), city, and State, and, in the case of mailed comments, all address information, including email addresses. TTB may omit voluminous attachments or material that it considers unsuitable for posting.

You may view copies of this proposed rule and any electronic or mailed

comments TTB receives about this proposal by appointment at the TTB Information Resource Center, 1310G Street NW., Washington, DC 20005. You may also obtain copies for 20 cents per 8.5- x 11-inch page. Contact TTB's information specialist at the above address or by telephone at 202–453–2270 to schedule an appointment or to request copies of comments or other materials.

Regulatory Flexibility Act

TTB certifies that this proposed regulation, if adopted, will not have a significant economic impact on a substantial number of small entities. The decision of a grape grower to petition for a grape variety name approval, or the decision of a wine bottler to use an approved name on a label, is entirely at the discretion of the grower or bottler. This proposed regulation does not impose any new reporting, recordkeeping, or other administrative requirements. Accordingly, a regulatory flexibility analysis is not required.

Executive Order 12866

It has been determined that this proposed rule is not a significant regulatory action as defined by Executive Order 12866 of September 30, 1993. Therefore, no regulatory assessment is required.

Drafting Information

Jennifer Berry of the Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, drafted this document.

List of Subjects in 27 CFR Part 4

Administrative practice and procedure, Advertising, Customs duties and inspection, Imports, Labeling, Packaging and containers, Reporting and recordkeeping requirements, Trade practices, Wine.

Proposed Regulatory Amendment

For the reasons discussed in the preamble, TTB proposes to amend 27 CFR, chapter I, part 4 as set forth below:

PART 4—LABELING AND ADVERTISING OF WINE

■ 1. The authority citation for 27 CFR part 4 continues to read as follows:

Authority: 27 U.S.C. 205, unless otherwise noted.

■ 2. In § 4.91, the list of grape variety names following the introductory text is amended by removing the entries for ''Geneva Red 7,'' ''Lenoir,'' ''Madeline Angevine,'' ''Mission,'' ''Pinot blanc,'' ''Tempranillo (Valdepeñas),'' ''Tinto cão,'' and ''Valdepeñas (Tempranillo),'' and by adding new entries in alphabetical order to read as follows:

§ 4.91 List of approved names.

BILLING CODE 4810–31–P

DEPARTMENT OF THE INTERIOR

Bureau of Safety and Environmental Enforcement

30 CFR Part 250

[Docket ID: BSEE–2016–0003; 17XE1700DX EEEE500000 EX1SF0000.DAQ000]

RIN 1014–AA31

Adjustments to Cost Recovery Fees Relating to the Regulation of Oil, Gas, and Sulfur Activities on the Outer Continental Shelf

AGENCY: Bureau of Safety and Environmental Enforcement, Interior.

ACTION: Proposed rule.

SUMMARY: The Bureau of Safety and Environmental Enforcement (BSEE) currently charges a fee for 31 different services (hereafter ''cost recovery fees'') it provides to non-Federal recipients. The services were identified by BSEE's predecessor agency, the Minerals Management Service (MMS). This proposed rule would revise and clarify the existing fees; add new fees for certain services; revise and codify the existing conditions for refunding fees; and clarify the acceptable methods of fee payment. This proposed rule would enable BSEE to recover its full costs associated with providing these services to recipients of special benefits beyond those accruing to the general public.

DATES: BSEE will consider all comments received by January 17, 2017. BSEE may not consider comments received after this date. Submit comments to the Office of Management and Budget (OMB) on the information collection burden in this proposed rule by December 19, 2016.

ADDRESSES: You may submit comments on the proposed rule by any of the following methods. Please use the Regulatory Identifier Number (RIN) 1014–AA31 as an identifier to your message. *See also* Public Availability of Comments under Procedural Matters.

- *Submit comments electronically.* Go to *http://www.regulations.gov* and search for ''BSEE–2016–0003.'' Follow the instructions to submit public comments and view supporting and related materials available for this rulemaking. BSEE will post all relevant comments.
- Mail or hand-carry comments to the Department of the Interior (DOI); Bureau of Safety and Environmental Enforcement; Attention: Regulations and Standards Branch; 45600 Woodland Road, Sterling, VA 20166. Please reference *Adjustment of Service Fees Relating to the Regulation of Oil, Gas, and Sulfur Activities on the Outer Continental Shelf, AA31* in your comments and include your name and return address.
- Comments on the information collection contained in this proposed rule are separate from those on the substance of the proposed rule. Send comments on the information collection burden in this rule to: OMB, Interior Desk Officer, 202–395–5806 (fax); email *OIRA_submissions@omb.eop.gov*. Please also send a copy to BSEE at *regs@bsee.gov*, fax number (703) 787–1546, or by the address listed above.
- *Public Availability of Comments*—Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

FOR FURTHER INFORMATION CONTACT: Kimberly Monaco, Budget Analyst, Office of Budget at (703) 787–1658, *Kimberly.Monaco@bsee.gov*.

II. Procedural Matters

I. Background

A. BSEE Statutory and Regulatory Authority

In accordance with the Independent Offices Appropriation Act, 1952, 31 U.S.C. 9701 and the Office of Management and Budget (OMB) Circular A–25,[1] BSEE is required to assess a charge against each identifiable non-Federal recipient of special benefits derived from BSEE services beyond those received by the public at large. The charge BSEE assesses is legally sufficient if it recovers BSEE's full cost to provide the service.

OMB Circular A–25 requires a Federal agency to conduct a biennial review of its user charges to determine whether adjustments are necessary and to review other agency programs to determine whether new fees should be established for any services it provides. BSEE reviewed its 31 services and pre-production site visits along with the associated cost recovery fees to determine whether the cost of providing each of the services supports the existing fee structure in the existing regulations. BSEE's methodology for calculating its direct and indirect costs to perform the 31 services and the pre-production site visits is found later in this document. Results from the direct and indirect cost calculations indicate that 17 fees should be increased, eight fees reduced, and six fees subdivided into two tiers by complexity, with six of the subdivided fees increasing above the existing undivided fee, and six decreasing. The results also indicate that the existing pre-production site visit fees for two of the facility production safety system applications should be decreased for visits to facilities offshore and increased for visits to facilities while in a shipyard. Finally, the results suggest that new pre-production site visit fees should be implemented for the four facility production safety system applications that did not previously include site visit fees. The details of these proposed fees are shown in the Service Fee Table later in this document.

The fees are codified in BSEE's regulations at 30 CFR 250.125(a). This proposed rule would: (1) Amend 31 of the cost recovery fees in existing § 250.125; (2) establish two tiers of fees within the Deepwater Operations Plans (DWOPs), New Pipeline Applications, Pipeline Modification Applications for both Lease Term and Right-of-way (ROW) Pipelines, ROW Pipeline Grant Applications, and Unitization Revisions fee categories; (3) add four new pre-production site visit cost recovery fees to the existing two pre-production site visit fees to support the review and approval, if necessary, of production

[1] Office of Management and Budget (OMB) Circular A–25 Revised, User Charges, July 8, 1993, and Transmittal Memorandum 1.

safety system applications; (4) revise the two existing pre-production site visit cost recovery fees; (5) amend and codify conditions for granting fee payment refunds in the existing Notice to Lessees and Operators (NTL) No. 2009–N09; [2] (6) amend § 250.126 to provide clarification on the payment of cost recovery fees and the acceptable payment methods; and 7) include descriptions of the two complexity-based levels of service fees in 30 CFR 250.292 (DWOPs), § 250.1000 (Applications to install or modify lease term pipelines), § 250.1015 (Applications for pipeline ROW grants)), and § 250.1303 (Requests for voluntary unitization).

In addition to BSEE's in-depth review of the bureau's existing cost recovery fees, the need for adjustments is further supported by the fact that, with the exception of adjustments for inflation, BSEE's cost recovery fees have not been adjusted since the 2005 and 2006 rulemakings establishing the fees (*see* 70 FR 49871 (August 25, 2005) and 71 FR 40904 (July 19, 2006)). Over the last ten years, offshore operations have moved into deeper, more complex, and more hostile environments. This evolution of offshore operations has resulted in increasingly technical and more complex requests submitted by operators. Reviewing and approving these requests requires extensive communication and collaboration between offshore operators, BSEE engineers, and BSEE subject matter experts (SMEs) who are knowledgeable about the safety and environmental aspects of the current technologies and operational challenges, which require additional time and more experienced, senior-level individuals at higher pay grades to review and approve. In addition, the Consolidated Appropriations Act of 2012 authorized BSEE to ''establish higher minimum rates of basic pay for employees of the Department of the Interior in the Gulf of Mexico Region in the Geophysicist (GS–1313), Geologist (GS–1350), and Petroleum Engineer (GS–0881) job series at grades 5 through 15 at rates no greater than 25 percent above the minimum rates of basic pay normally scheduled . . .'' Public Law 112–74, sec. 121(c) (Dec. 23, 2011). In August 2015, the Office of Personnel Management (OPM) increased the special pay for the job series identified in Public Law 112–74, sec. 121(c) (Dec. 23, 2011) to 35 percent above basic pay and also used its authority to establish the same 35 percent special pay rate for the Inspectors (GS–1801) job series. These special pay rates have allowed the Bureau to be competitive with the oil and gas industry in attracting and retaining qualified personnel, but have increased the bureau's personnel costs. For these reasons, BSEE's costs to provide certain services have increased over the levels set out in the existing regulations including, but not limited to, the costs to process applications for permits to drill and applications for permits to modify. For other services, the proposed fees may be lower than the existing fees due to an overall reduced cost to provide those services (*i.e.,* efficiencies).

The proposed adjustments are based on an analysis of BSEE's costs for providing services from fiscal year (FY) 2013 to FY 2015. The proposed fee adjustments are necessary to more accurately align fees with the cost of BSEE's services provided to the non-Federal recipients. BSEE invites comments on each of the proposed fee adjustments described later in this document.

B. Summary of Existing Cost Recovery Fees Regulations and Basis for Proposed Amendments

Existing §§ 250.125 and 250.126 set out the amount of cost recovery fees for each BSEE service and provide instructions for making payments. Section 250.125(a) lists the 31 cost recovery fees currently imposed by BSEE for specific services. Section 250.125(b) requires that payment of the applicable fee(s) must accompany the request for service and provides that all fees are non-refundable. Section 250.125(c) requires the submission of a written request and accompanying payment within 72 hours of a BSEE verbal approval. Section 250.126 requires that all cost recovery fees be paid electronically through *www.pay.gov*.

BSEE proposes to amend § 250.125 by revising the fees for specific services based on its in-depth review and incorporating guidance from NTL No. 2009–N09 regarding conditions for granting fee payment refunds. BSEE proposes amendments to § 250.126 to provide clarification on the payment of cost recovery fees and the acceptable payment methods. BSEE also proposes to amend the following other sections of 30 CFR part 250 that are subject to the proposed § 250.125 amendments in this document: § 250.292 (DWOPs); § 250.1000 (Applications to install or modify lease term pipelines); § 250.1015 (Applications for pipeline ROW grants); and § 250.1303 (Requests for voluntary unitization).

What Fees Would This Proposed Rule Adjust?

BSEE is proposing adjustments to its 31 existing cost recovery fees to fully account for the costs of providing the services listed in the Service Fee Table below. Additionally, BSEE is proposing to amend § 250.125(a) to:

1. Subdivide into two categories and add different fee levels for six types of cost recovery fees (DWOPs, New Pipeline Applications, Pipeline Modification Applications for both Lease Term and ROW Pipelines, ROW Pipeline Grant Applications, and Unitization Revisions) to accurately reflect the varying levels of complexity of the requested services and the corresponding levels of costs to BSEE from providing those services; [3] and

2. Add four new pre-production site visit fees and revise the two existing pre-productions site visit fees to support the review and approval of production safety system applications, if a site visit is deemed necessary. These new and revised site visit fees are proposed to be included in §§ 250.125(a)(5)–(10).

The following table lists the type of service to be performed by BSEE when it receives a plan, application, permit, or other request; the associated regulatory citation for each type of request; the existing and proposed fee; and the proposed acceptable payment type for each service. The proposed payment types are credit card and electronic check through the Automated Clearing House (ACH-debit). Because the current U.S. Treasury limit on credit card payments is $24,999.99, an ACH-debit must be used for payments of $25,000 or more.

In the Service Fee Table below, the existing regulations are in regular font; *proposed text is in italic font;* and new fees are in bold font. The fifth column, payment type, is provided to explain the options for payment for a particular service.

[2] Minerals Management Service, MMS Policy on Refund Requests for Service Fees, NTL No. 2009–N09, November 1, 2009.

[3] The complexity-based fees for these services are specified in proposed §§ 250.125(a)(2), (15)–(17), (19), and (28) and in the Service Fee Table in this document.

SERVICE FEE TABLE

Service—processing of the following:	30 CFR citation	Existing fee	Proposed fee	Payment type
(1) Suspension of Operations/Suspension of Production (SOO/SOP) Request.	§ 250.171(e)	$2,123	$3,055	Credit Card or ACH-debit.
(2) Deepwater Operations Plan	§ 250.292(q)	$3,599.		
(a) Deepwater Operations Plan—Simple.			$14,290	Credit Card or ACH-debit.
(b) Deepwater Operations Plan-Complex (New Technology).			$70,333	ACH-debit Only.
(3) Application for Permit to Drill (APD; Form BSEE–0123).	§ 250.410(d); § 250.513(b); § 250.1617(a).	$2,113	$10,420	Credit Card or ACH-debit.
(4) Application for Permit to Modify (APM; Form BSEE–0124).	§ 250.465(b); § 250.513(b); § 250.613(b); § 250.1618(a); § 250.1704(g).	$125	$1,680	Credit Card or ACH-debit.
(5) New Facility Production Safety System Application for Facility with More than 125 Components.	§ 250.842	$5,426 $14,280 additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and $7,426 for an inspection of a facility while in a shipyard. A component is a piece of equipment or an ancillary system that is protected by one or more of the safety devices required by American Petroleum Institute (API) Recommended Practice (RP) 14C (as incorporated by reference in § 250.198).	$3,976 $13,534 additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and $14,567 for an inspection of a facility while in a shipyard. A component is a piece of equipment or an ancillary system that is protected by one or more of the safety devices required by API RP 14C (as incorporated by reference in § 250.198).	Credit Card or ACH-debit.
(6) New Facility Production Safety System Application for Facility with 25–125 Components.	§ 250.842	$1,314 $8,967 additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and $5,141 for an inspection of a facility while in a shipyard.	$548 $8,508 additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and $9,818 for an inspection of a facility while in a shipyard.	Credit Card or ACH-debit.
(7) New Facility Production Safety System Application for Facility with Fewer than 25 Components.	§ 250.842	$652	$463 **$4,338** *additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and* **$1,967** *for an inspection of a facility while in a shipyard.*	Credit Card or ACH-debit.
(8) Production Safety System Application—Modification with More than 125 Components Reviewed.	§ 250.842	$605	$1,278 **$9,313** *additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and* **$8,100** *for an inspection of a facility while in a shipyard.*	Credit Card or ACH-debit.
(9) Production Safety System Application—Modification with 25–125 Components Reviewed.	§ 250.842	$217	$439 **$6,765** *additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and* **$7,326** *for an inspection of a facility while in a shipyard.*	Credit Card or ACH-debit.
(10) Production Safety System Application—Modification with Fewer than 25 Components Reviewed.	§ 250.842	$92	$386 **$4,513** *additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and* **$2,141** *for an inspection of a facility while in a shipyard.*	Credit Card or ACH-debit.
(11) Platform Application—Installation—Under the Platform Verification Program.	§ 250.905(l)	$22,734	$28,311	ACH-debit Only.
(12) Platform Application—Installation—Fixed Structure Under the Platform Approval Program.	§ 250.905(l)	$3,256	$1,914	Credit Card or ACH-debit.
(13) Platform Application—Installation—Caisson/Well Protector.	§ 250.905(l)	$1,657	$1,914	Credit Card or ACH-debit.
(14) Platform Application—Modification/Repair.	§ 250.905(l)	$3,884	$1,975	Credit Card or ACH-debit.
(15) New Pipeline Application (Lease Term).		$3,541.		

SERVICE FEE TABLE—Continued

Service—processing of the following:	30 CFR citation	Existing fee	Proposed fee	Payment type
(a) New Pipeline Application (Lease Term)—Shallow Water (less than 1000 ft.).	§ 250.1000(b)		**$1,584**	Credit Card or ACH-debit.
(b) New Pipeline Application (Lease Term)—Deepwater (greater than 1000 ft.).			**$3,663**	Credit Card or ACH-debit.
(16) Pipeline Application—Modification (Lease Term).		$2,056.		
(a) Pipeline Application—Modification (Lease Term)—Minor.	§ 250.1000(b)		**$651**	Credit Card or ACH-debit.

(b) Unitization Revision—Exhibit C			**$3,255**	Credit Card or ACH-debit.
(29) Application to Remove a Platform or Other Facility.	§ 250.1727	$4,684	$2,846	Credit Card or ACH-debit.
(30) Application to Decommission a Pipeline (Lease Term).	§ 250.1751(a) or § 250.1752(a).	$1,142	$857	Credit Card or ACH-debit.
(31) Application to Decommission a Pipeline (ROW).	§ 250.1751(a) or § 250.1752(a)	$2,170	$980	Credit Card or ACH-debit.

How did BSEE determine the costs to be recovered by the proposed fees?

Federal agency policy covering full cost recovery through user charges is outlined in OMB Circular A–25. According to OMB Circular A–25, BSEE should assess fees to recover the bureau's full costs of providing the services to the offshore oil and gas industry, rather than market price, because BSEE is acting on behalf of the United States to issue offshore oil and gas permits, approve DWOPs, and provide the other listed services. Therefore, BSEE used the full cost recovery approach, described in paragraph 6.d.1 of OMB Circular A–25, to assess the cost of each process.

For each of the services provided by BSEE, the process begins with the submission of an application, plan, permit, or other request by an operator. BSEE typically provides the service requested when an operator submits a request and the associated user fee. The output of each service is BSEE's issuance of the permit or application/plan approval or denial.

In order to determine the current cost of BSEE's services, BSEE assessed and itemized its services through data collection and dialogue with BSEE personnel in its Gulf of Mexico Regional Office (GOMR) and other BSEE SMEs. This process included the identification of each task undertaken by BSEE to review and approve each type of plan, application, permit, or other request. These tasks include: The initiating event or BSEE's receipt of a request for service; the identification of personnel to perform the review of the plan, application, permit, or other request; the review of the plan, application, permit, or other request; and the issuance of the permit or approval/denial of the application/plan. This information and the time spent performing each task were used to calculate BSEE's service costs, consistent with the procedures in OMB Circular A–25, as explained in the following discussion.

How were the direct costs calculated?

The direct costs assessed as part of the full cost recovery analysis are direct labor costs, *e.g.,* direct salary costs and fringe benefits for BSEE staff performing the requested services. Direct labor costs were established using the average work time provided by BSEE staff members for each task. The average time was then multiplied by the 2016 Office of Personnel Management's (OPM) General Schedule (GS) pay grade hourly rate for the employee responsible for completing that task. The GS pay grade was calculated at a step 5 level, which was estimated to be the average step within each pay grade. A range of GS pay grades are involved in certain actions (*i.e.,* specific tasks might be accomplished by either a GS–7, 9, or 11 employee). In this case, BSEE averaged the hourly rate for a step 5 at all the grade levels that could accomplish the task to create an average hourly rate for that specific task.

The following 2016 OPM GS rate tables were used to identify the appropriate hourly rate for the employee responsible for completing each task:

(1) For any task completed by a petroleum engineer, OPM's 2016 special rate tables 711 and 712 were utilized. These tables provide petroleum engineers in GOMR and the Pacific OCS Region (POCSR) with a 35 percent increase above OPM's ''Base'' pay rate.

(2) For any task completed by a geologist or geophysicist, OPM's 2016 special rate table 711 was utilized. This table provides geologists and geophysicists in Jefferson, LA and Camarillo, CA with a 35 percent increase above OPM's ''Base'' pay rate. Jefferson, LA includes the GOMR New Orleans District where the majority of these positions are located.

(3) For all other tasks not covered by (1) or (2) above, the GS ''REST OF UNITED STATES'' 2016 rate table was used.

Along with direct labor salary costs, OMB Circular A–25 requires the collection of direct labor costs classified as fringe benefits, which usually includes paid leave, medical insurance, and retirement. Historically, BSEE has calculated the fringe benefits as 28 percent of the direct salary costs and refers to that percentage as the ''fringe benefit factor.'' The fringe benefit factor was applied to all labor categories and grades for all cost recovery fee calculations.

How were the indirect costs calculated?

In accordance with OMB Circular A–25, indirect costs include personnel fringe benefits, all physical overhead costs, and management and supervisory costs. In accordance with OMB Circular A–25, BSEE assessed indirect costs for all headquarters, Regional, and District personnel and operations involved in the provision of services that are the subject of this proposed rule. These indirect costs include salaries and fringe benefits of personnel providing ancillary support functions, material and supply costs, utilities, and other costs that are allocated across all services provided by BSEE. BSEE has an extensive activity-based costing code table and cost capture database (Cost and Performance Management Tool (CPMT)) that categorizes all BSEE costs as either direct or indirect. Data from CPMT, going back to FY 2007, were analyzed to develop an appropriate methodology for estimating the indirect costs component of the cost recovery fees.

Indirect costs were estimated using the historical ratio of indirect to direct costs observed at the headquarters, Regional, or District levels. From FY 2007 through FY 2015, the ratio was consistently between 51 and 56 percent. An average ratio of 53.51 percent was used. This percentage was applied to each service's direct cost to derive an indirect cost estimate for each service. The following table provides the indirect to direct cost data and ratios for BSEE and the Bureau of Ocean Energy Management's (BOEM) predecessor agencies, MMS and the Bureau of Ocean Energy Management, Regulation, and Enforcement, from FY 2007–FY 2011 and for BSEE from FY 2013–FY 2015.[4] FY 2012 data were not included due to inaccurate tracking that occurred as BSEE and BOEM were established at the beginning of that fiscal year.

DIRECT AND INDIRECT COST DATA [1]

Fiscal year	Direct total cost ($ millions)	Indirect total cost ($ millions)	Indirect/direct cost ratio (percent)
2007	205.62	110.75	53.86
2008	203.42	114.35	56.22
2009	219.36	120.14	54.77
2010	222.91	114.88	51.54
2011	244.25	135.10	55.31
2013	113.27	58.26	51.43
2014	138.21	74.50	53.91
2015	159.97	81.68	51.06
Average	.....	.....	53.51

Why are two fee levels proposed for some service categories?

Two fee levels are proposed for certain applications, plans, permits, and other requests for BSEE services (*e.g.,* simple DWOP vs. complex DWOP, or shallow water pipeline application (lease term) vs. deepwater pipeline application (lease term)) based on the varying levels of complexity, and resulting costs, associated with processing those requests. The six categories of BSEE services for which two tiers of complexity-based fees are proposed are identified in the following list, along with clarification for operators on which fee is more appropriate with regard to an application, plan, permit, or other request for these services:

1. DWOP: The complexity of processing a DWOP varies and depends on whether it includes new or unusual technology, as well as the scope and scale of the proposed development project.

a. DWOP—Complex: An operator would submit payment for this service when a DWOP meets any of the following criteria:

[4] BSEE and BOEM were created on October 1, 2011 as part of the DOI reorganization and division of responsibilities formerly exercised by MMS.

• The plan contains new or unusual technology, as defined in 30 CFR 250.200(b), and the new or unusual technology:

—requires a high degree of specialized knowledge;

—exceeds the limits of existing engineering standards;

—conflicts with existing engineering standards; or

—warrants an additional level of review due to the risk associated with implementation; or

• The plan includes installation of a new floating production facility.

b. DWOP—Simple: An operator would submit payment for this service for all DWOPs that do not meet the criteria for Deepwater Operation Plans—Complex. This includes, but is not limited to:

• A new or unusual technology as defined in 30 CFR 250.200(b) that does not require a high degree of specialized knowledge.

• A new or unusual technology that is a modification or repair to an existing floating production facility or project.

• A subsea tieback to a new or existing floating production facility.

• A material change, addition or revision to an existing, previously approved project.

• A subsea tieback/additional well(s) for which only minor or no updates for subsea production safety system are necessary.

• Addition of a new subsea development to a new or existing floating production facility.

2. New Pipeline Application (Lease Term): The complexity of processing an application varies and is dependent on the water depth of the pipeline.

a. New Pipeline Application (Lease Term)—Shallow Water: An operator would submit payment for this service when the pipeline in a New Pipeline Application (Lease Term) is located in its entirety in water depths less than or equal to 1,000 feet (ft.).

b. New Pipeline Application (Lease Term)—Deepwater: An operator would submit payment for this service when any portion of the pipeline in a New Pipeline Application (Lease Term) is located in water depths greater than 1,000 ft.

3. Pipeline Application—Modification (Lease Term): The complexity of processing an application varies and is dependent on the complexity of the modification.

a. Pipeline Application—Modification (Lease Term)—Major: An operator would submit payment for this service when a Pipeline Application—Modification (Lease Term) contains a route modification request. Actions which constitute a ''route modification'' include, but are not limited to, changing a pipeline route, installing a new portion of pipeline, decommissioning a portion of pipeline, and changing service or flow direction of a pipeline.

b. Pipeline Application—Modification (Lease Term)—Minor: An operator would submit payment for this service for all other Pipeline Applications—Modification (Lease Term) requests (*i.e.,* for all Pipeline Applications—Modification (Lease Term) requests that do not contain a route modification).

4. Pipeline Application—Modification (ROW): The complexity of processing an application varies and is dependent on the complexity of the modification.

a. Pipeline Application—Modification (ROW)—Major. An operator would submit payment for this service when a Pipeline Application—Modification (ROW) contains a route modification request. Actions that constitute a ''route modification'' include, but are not limited to, changing a pipeline route, installing a new portion of pipeline, decommissioning a portion of pipeline, and changing service or flow direction of a pipeline.

b. Pipeline Application—Modification (ROW)—Minor: An operator would submit payment for this service for all other Pipeline Applications—Modification (ROW) requests (*i.e.,* for all Pipeline Applications—Modification (ROW) requests that do not contain a route modification). An example is an ROW Grant Modification request for cessation of operations.

5. Pipeline ROW Grant Application: The complexity of processing an application varies and is dependent on the water depth of the pipeline.

a. Pipeline ROW Grant Application—Shallow Water: An operator would submit payment for this service when the pipeline in a Pipeline ROW Grant Application is located in its entirety in water depths less than or equal to 1,000 ft.

b. Pipeline ROW Grant Application—Deepwater: An operator would submit payment for this service when any portion of the pipeline in a Pipeline ROW Grant Application is located in water depths greater than 1,000 ft.

6. Unitization Revision: BSEE currently charges one fee for the review of a Unitization Revision; however, the complexity of processing the application and resulting cost vary based on the specific exhibits being revised in the signed unit agreement. Typical unitization applications contain an Exhibit A, which is the lease plat identifying the unit area; Exhibit B, which is a listing of the component leases and ownership of each; and Exhibit C, which is a listing of the participation and allocation by lease. Payment for unitization revision services are as follows:

a. Unitization Revision—Exhibit A, Exhibit B, and Designation of Successor Unit Operator/Sub-operator: The Unit Operator would submit payment for this service when a Unitization Revision is submitted for approval that revises Exhibit A and/or Exhibit B of the signed unit agreement or designates a Successor Unit Operator and/or Successor Unit Sub-operator.

b. Unitization Revision—Exhibit C: The Unit Operator would submit payment for this service when a Unitization Revision is submitted for approval that revises Exhibit C of the signed unit agreement.

Why are there proposed new and adjusted fees for some services that involve BSEE site visits?

In accordance with existing § 250.800, production must not commence until the production safety system has been approved and a pre-production inspection has been requested by the lessee. If a BSEE application reviewer decides that a pre-production inspection is necessary as part of the production safety system application review and approval process, then a team of engineers and inspectors visits the facility offshore (*e.g.,* a mobile offshore drilling unit) or at a shipyard.

Existing §§ 250.125(a)(5) and (6) establish fees for visiting a facility offshore or in a shipyard for two of the six production safety system applications, when necessary, as part of the BSEE review and approval process. Visits to an offshore facility or a shipyard can become necessary in order to verify that safety devices are in the proper locations or to identify if they are missing when compared with the associated application submitted for approval. Any necessary corrections to production safety systems can typically be handled more easily while construction work is ongoing in a shipyard, rather than when the facility is offshore.

BSEE's costs for travel to offshore facilities and shipyard locations and for services, as part of the application review process, can be recovered in accordance with OMB Circular A–25. Estimates for BSEE's costs for these services include costs for transportation, lodging, and labor hours for each labor category involved.

As illustrated in the Service Fee Table, under §§ 250.125(a)(7)–(a)(10), BSEE proposes four new fees for production safety system visits to

offshore facilities or shipyards. BSEE also proposes to amend the two existing fees for production safety system inspection visits to offshore facilities or shipyards under §§ 250.125(a)(5) and 250.125(a)(6). The proposed new and amended fees would affect:

1. New Facility Production Safety System Application for Facility with more than 125 components;
2. New Facility Production Safety System Application for Facility with 25–125 components;
3. New Facility Production Safety System Application for Facility with fewer than 25 components;
4. Production Safety System Application—Modification with more than 125 components reviewed;
5. Production Safety System Application—Modification with 25–125 components reviewed; and
6. Production Safety System Application—Modification with fewer than 25 components reviewed.

Why are the adjustments to BSEE's cost recovery fees necessary?

As previously mentioned, offshore operations have changed dramatically over the last ten years, which has led to adjustments in the review and approval process for a large portion of the services BSEE provides to industry. BSEE proposes the listed fee levels based on the assessment of the bureau's full costs to provide the associated services using the methodology described above. However, this full-cost methodology is not entirely comparable to the methodologies used in the 2005 and 2006 rulemakings that initially established the fees. The following examples provide the general rationale for some of the fee adjustments as compared to the fees in existing regulations.

1. BSEE's assessment of its costs for processing complex DWOPs indicates that six employees, ranging in grades from GS–5 through GS–14, will spend between 310 and 1,094 hours reviewing, analyzing, and processing these plans. As previously discussed, the increased complexity of offshore operations has required additional senior-level employees to spend added time reviewing and approving these plans. This is particularly true with regard to the increased processing time of DWOPs and the associated increased costs to BSEE. In addition, the existing $3,599 fee for processing both complex and simple DWOPs does not account for the special pay that many BSEE employees receive for reviewing and approving these plans and the higher indirect cost ratio. The fee assessed for DWOP review has also not been adjusted since a 2006 rulemaking that established the existing fee. The adjusted fee is the result of calculations performed with input from BSEE Regional Offices and takes into account the increased complexity of submitted DWOPs due to the use of new or unusual technologies and the increased scope or scale of proposed plans. Based on its assessment, BSEE proposes to subdivide the DWOP processing fees and assess a $70,333 fee for processing complex DWOPs in 250.125(a)(2)(ii).

2. Similarly, BSEE proposes subdividing the fees for processing unitization revisions based on its assessment of the bureau's direct and indirect costs. Typically, seven BSEE positions, ranging in grades from GS–5 through GS–15, spend between 6.6 and 29.7 hours processing unitization revisions impacting exhibits A and B, while six BSEE positions spend between 8.5 to 71.9 hours processing unitization revisions impacting exhibit C. As is the case with the existing DWOP fee, the existing $896 fee for processing unitization revisions does not account for the special pay that many BSEE employees receive for reviewing and approving these documents and the higher indirect cost ratio. Based on its assessment, BSEE proposes a $1,683 fee for processing a unitization revision related to exhibits A and B and a $3,255 fee for processing a unitization revision related to exhibit C in 250.125(a)(28)(i) and (ii).

3. BSEE is also proposing to reduce some existing fees based on its assessment of the bureau's full costs to process applications and requests. For example, BSEE's assessment indicated that five BSEE employees, ranging in grades from GS–5 through GS–14, will spend between 5.8 and 12.5 hours processing an application for a minor lease term pipeline modification, resulting in $651 in full bureau costs. Since the existing fee of $2,056 was established, efficiencies have resulted in lower costs to process applications and requests (*e.g.,* a technician now performs certain steps in the process previously performed by an engineer). Based on this assessment, BSEE proposes to subdivide and reduce the existing fee for processing both major and minor applications for lease term pipeline modifications in § 250.125(a)(16)(i).

C. Request for Comments on Potential Future Fees

Due to the large number of revised applications received by BSEE and the associated costs to BSEE to process them, BSEE is currently evaluating the need for additional fees for revised applications for permits to drill (R–APD) and revised applications for permits to modify (R–APM). Accordingly, BSEE requests comments on whether separate fee levels for R–APD and R–APM should be proposed in a future rulemaking. BSEE also requests comments on the factors that should be the basis for determining the separate fee levels for R–APDs and R–APMs (*e.g.,* complexity, water depth, etc.).

II. Procedural Matters

Regulatory Planning and Review (Executive Orders (E.O.) 12866 and 13563)

E.O. 12866 provides that OMB, Office of Information and Regulatory Affairs (OIRA), will review all significant rules. BSEE has determined that this proposed rule is not a significant regulatory action as defined by section 3(f) of E.O. 12866 because:

—It is not expected to have an annual effect on the economy of $100 million or more;
—It would not adversely affect in a material way the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;
—It would not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
—It would not alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights or obligations of their recipients; and
—It would not raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in E.O. 12866.

Accordingly, BSEE has not prepared an economic analysis, and OIRA has not reviewed this proposed rule.

E.O. 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the Nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. E.O. 13563 directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. It also emphasizes that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. BSEE is developing this rule in a manner consistent with these requirements.

Regulatory Flexibility Act

The DOI certifies that this proposed rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (RFA). The RFA, at 5 U.S.C. 603, requires agencies to prepare an initial regulatory flexibility analysis to determine whether a regulation would have a significant economic impact on a substantial number of small entities. Further, under the Small Business Regulatory Enforcement Fairness Act of 1996, at section 212 of Public Law 104–121 (March 29, 1996), an agency is required to produce compliance guidance for small entities if the rule would have a significant economic impact.

The Initial Regulatory Flexibility Analysis prepared by BSEE assessed the impact of this proposed rule on small entities, as defined by the applicable Small Business Administration (SBA) size standards. BSEE has determined that this proposed rule potentially affects operators and holders of Federal oil and gas leases, as well as right-of-way holders, on the OCS. This includes an estimated 99 businesses with active operations. Businesses that operate under this rule fall under the SBA's North American Industry Classification System (NAICS) codes 211111 (Crude Petroleum and Natural Gas Extraction) and 213111 (Drilling Oil and Gas Wells). For these NAICS classifications, a small business is defined as one with fewer than 1,251 employees (for NAICS 211111) and fewer than 1,001 (for NAICS 213111). Based on these criteria, 54 of the potentially impacted businesses are considered small and 45 are considered large businesses. BSEE considers that a rule has an impact on a ''substantial number of small entities'' when the total number of small entities impacted by the rule is equal to or exceeds 10 percent of the relevant universe of impacted entities. Approximately 55% of the businesses that would be affected by this rule are considered small; therefore, BSEE has determined that this rule would impact a substantial number of small businesses under the RFA.

BSEE's analysis estimates the incremental costs for small operators, lease holders, and right-of-way holders in the offshore oil and natural gas industry. Costs already incurred as a result of existing fees were not considered as costs of this proposed rule because they are part of the baseline. Among the 54 small businesses involved in offshore operations, the average annual corporate sales volume, from the latest available data, for the year 2014, is $186 million, which is approximately $192 million in 2016 dollars.

The following ''Change in Cost per Small Entity'' table provides an analysis and derivation of the estimated average cost, per small firm, that would be incurred per year as a result of the proposed rule. The first column of the table displays the list of services provided, as they appeared earlier in the Service Fee Table. The second column displays an estimate of the total counts of these services expected over the three fiscal year period 2016–2018. The third and fourth columns show the existing fee, and the proposed fee, respectively, for each service provided. The fifth column then displays, for each service, the expected change in total costs over the three-year period, on the basis of the data in the previous columns (the change in fees and the counts of services). The sixth column reflects the estimated proportion of the change in cost per small firm based on BSEE's data regarding counts of services across firms from FY 2013 to FY 2015. Finally, the seventh column reflects the estimated change in cost per small firm per fiscal year, by taking the annualized product of columns five and six. The estimated additional costs of the proposed rule from service fee changes totals approximately $8,875 per small firm per year, or an estimated 0.0046 percent of an average small business's sales.

[2] Numbers may not add up due to rounding.

BSEE has concluded the additional costs of the proposed rule would impose an insignificant, negligible burden on small entities.

Small Business Regulatory Enforcement Fairness Act

The proposed rule is not a major rule under the Small Business Regulatory Enforcement Fairness Act, 5 U.S.C. 804(2). This proposed rule:

(a) Would not have an annual effect on the economy of $100 million or more;

(b) Would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and

(c) Would not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

The requirements would apply to all entities operating on the Outer Continental Shelf (OCS) regardless of company designation as a small business. For more information on costs affecting small businesses, see the *Regulatory Flexibility Act* portion of this document.

Your comments are important. The Small Business and Agriculture Regulatory Enforcement Ombudsman and 10 Regional Fairness Boards were established to receive comments from small businesses about federal agency enforcement actions. The Ombudsman will annually evaluate the enforcement activities and rate each agency's responsiveness to small business. If you wish to comment on the actions of BSEE, call 1–888–734–3247. You may comment to the SBA without fear of retaliation. Allegations of discrimination/retaliation filed with the SBA will be investigated for appropriate action.

Unfunded Mandates Reform Act of 1995

This proposed rule would not impose an unfunded mandate on State, local, or tribal governments or the private sector of more than $100 million per year. The proposed rule would not have a significant or unique effect on State, local, or tribal governments or the private sector. Therefore, a statement containing the information required by the Unfunded Mandates Reform Act, 2 U.S.C. 1501 *et seq.,* is not required.

Takings Implication Assessment (E.O. 12630)

Under the criteria in E.O. 12630, this proposed rule does not have significant takings implications. The proposed rule is not a governmental action capable of interference with constitutionally protected property rights. Therefore, a Takings Implication Assessment is not required.

Federalism (E.O. 13132)

Under the criteria in E.O. 13132, this proposed rule does not have federalism implications. This proposed rule would not substantially and directly affect the relationship between the Federal and State governments. To the extent that State and local governments have a role in OCS activities, this proposed rule would not affect that role. A federalism assessment is not required.

Civil Justice Reform (E.O. 12988)

This proposed rule complies with the requirements of E.O. 12988. Specifically, this proposed rule:

(1) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and

(2) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

Consultation With Indian Tribal Governments (E.O. 13175)

Under the criteria in E.O. 13175 and the Department's tribal consultation policy, we have evaluated this proposed rule and have determined that it has no substantial direct effects on federally recognized Indian tribes, or on the relationship or distribution of power and responsibilities between the Federal Government and Indian tribes, and that consultation under the Department's tribal consultation policy is not required.

Paperwork Reduction Act (PRA) of 1995

This proposed rule contains a collection of information that will be submitted to OMB for review and approval under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). As part of our continuing effort to reduce paperwork and respondent burdens, BSEE invites the public and other Federal agencies to comment on any aspect of the non-hour cost burden. If you wish to comment on the information collection (IC) aspects of this proposed rule, you may send your comments directly to OMB and send a copy of your comments to the Regulations and Standards Branch (*see* the **ADDRESSES** section of this proposed rule). Please reference *Adjustments to Cost Recovery Fees Relating to the Regulation of Oil, Gas, and Sulfur Activities on the Outer Continental Shelf,* 1014—NEW, in your comments. BSEE specifically requests comments concerning: The need for the information, its practical utility, the accuracy of the agency's burden estimate, and ways to minimize the burden. You may obtain a copy of the supporting statement for the new collection of information by contacting the Bureau's Information Collection Clearance Officer at (703) 787–1607. To see a copy of the entire IC request (ICR) submitted to OMB, go to *http://www.reginfo.gov* (select Information Collection Review, Currently Under Review).

The PRA provides that an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. OMB is required to make a decision concerning the collection of information contained in these proposed regulations 30 to 60 days after publication of this document in the **Federal Register**. Therefore, a comment to OMB is best assured of having its full effect if OMB receives it by December 19, 2016.

The title of the collection of information for this rule is 30 CFR part 250, *Adjustments to Cost Recovery Fees.* The proposed regulations pertain to BSEE updating its 31 cost recovery fees, including additional fees for site visits if deemed necessary. These proposed changes are designed to recover the full cost BSEE incurs for providing these services.

Potential respondents comprise Federal OCS oil, gas, and sulfur operators and lessees, as well as pipeline ROW holders. Responses to this collection of information are required to obtain or retain a benefit and are mandatory. The frequency of response varies depending upon the requirement. The IC does not include questions of a sensitive nature. BSEE will protect proprietary information according to the Freedom of Information Act (5 U.S.C. 552) and DOI's implementing regulations (43 CFR part 2), 30 CFR 250.197, *Data and information to be made available to the public or for limited inspection,* and 30 CFR part 252, *OCS Oil and Gas Information Program.*

OMB approved the IC burden of the existing 30 CFR part 250 regulations under Control Numbers 1014–0022, Subpart A (84,391 hour burden, $1,371,458 non-hour cost burden; expiration 8/31/17); 1014–0024, Subpart B ($39,589 non-hour cost burden; expiration 11/30/2018); 1014–0025 Applications for Permit to Drill ($862,104 non-hour cost burden, expiration 4/30/2017); 1014–0026, Applications for Permit to Modify ($361,625 non-hour cost burden, expiration 5/31/2017); 1014–0003, Subpart H ($323,481 non-hour cost burden; expiration 12/31/2017); 1014–0011, Subpart I, ($392,874 non-hour cost burden, expiration 5/31/2017); 1014–0016, Subpart J ($1,508,968 non-hour cost burden, expiration 8/31/2018); 1014–0019, Subpart K ($1,361,176 non-hour cost burden, expiration 1/31/2019); 1014–0002, Subpart L ($322,479 non-hour cost burden, expiration 10/31/16); 1014–0015, Subpart M ($138,188 non-hour cost burden, expiration 12/31/2017); and 1014–0010, Subpart Q ($1,686,396 non-hour cost burden, expiration 10/31/2016), respectively.

If this proposed rule is finalized and codified, the various non-hour cost burdens and one new hour burden will be removed from this collection of information and consolidated with their primary information collection burden under their respective OMB Control Numbers.

Hour burdens are included in the regulatory requirements of various OMB-approved ICRs, of which only one is changing and discussed in this ICR.

HOUR BURDEN TABLE

Citation 30 CFR 250	Reporting and recordkeeping requirements	Hour burden	Average number of annual responses	Annual burden hours
Subpart A				
125; 126; 292; 1000; 1015; 1303.	Cost recovery fees, applications, confirmation receipts, etc., verbal approvals pertaining to fees.	Cost Recovery Fees and related items are covered individually throughout Part 250		0.
125(c)	Request refund, including a reason for the refund, within 150 days of the initial payment.	3 min.	200 requests	10.
Total			200 responses	10 hours.

BSEE currently receives approximately $7,000,000 in cost recovery fees (non-hour cost burdens) annually. This proposed rulemaking would increase that total by approximately $9,000,000 for a total of $16,000,000 in cost recovery fees. The following table provides a breakdown of the non-hour cost burdens for this proposed rulemaking.

[Existing non-hour cost burden/cost recovery fees are in regular font; *proposed non-hour cost burden/cost recovery fees and text are in italic font;* new fees are in bold font]

NON–HOUR COST BURDEN TABLE

Citation 30 CFR part 250	Service/cost recovery fee	Non-hour cost burdens

	Pipeline Repair Notification	*$557 × 156 notifications = $86,892.*
1015(a)	Pipeline ROW Grant Application	$2,771 × 62 applications = $171,802.
	Pipeline ROW Grant Application—Shallow Water (less than 1,000 ft.).	*$1,662 × 38 ROWs in shallow water = $63,156.*
	Pipeline ROW Grant Application—Deepwater (greater than 1,000 ft.).	*$3,796 × 24 ROWs in Deepwater = $91,104.*
1015(a)	Pipeline Conversion of Lease Term to ROW	$236 × 15 applications = $3,540.
		$494 × 15 applications = $7,410.
1018(b)	Pipeline ROW Assignment	$201 × 275 P/L ROW requests = $55,275.
		$397 × 275 P/L ROW requests = $109,175.
Subpart K		
1156(a)	500 Feet From Lease/Unit Line Production Request	$3,892 × 20 requests = $77,840.
		$5,440 × 20 requests = $108,800.
1157	Gas Cap Production Request	$4,953 × 22 requests = $108,966.
		$11,962 × 22 requests = $263,164.
1158(a)	Downhole Commingling Request	$5,779 × 30 requests = $173,370.
		$14,064 × 30 requests = $421,920.
Subpart L		
1202(a); 1203(b); 1204(a)	Complex Surface Commingling and Measurement Application.	$4,056 × 67 applications = $271,752.
		$8,205 × 67 applications = $549,735.
1202(a); 1203(b); 1204(a)	Simple Surface Commingling and Measurement Application.	$1,371 × 37 applications = $50,727.
		$3,514 × 37 applications = $130,018.
Subpart M		
1303(d)	Voluntary Unitization Proposal or Unit Expansion	$12,619 × 8 requests = $100,952.
		$27,288 × 8 requests =$218,304.
	Unitization Revision	$896 × 41 revisions = $36,736.
	Unitization Revision—Exhibit A, Exhibit B, and Successor Unit Operator/Sub-operator.	*$1,683 × 36 Exhibit A/B = $60,588.*
	Unitization Revision—Exhibit C	*$3,255 × 5 Exhibit C = $16,275.*
Subpart Q		
1727	Application to Remove a Platform or Other Facility	$4,684 × 240 applications = $1,124,160.
		$2,846 × 240 applications = $683,040.
1751(a); 1752(a)	Application to Decommission a Pipeline (Lease Term)	$1,142 × 213 applications = $243,246.
		$857 × 213 applications = $182,541.
1751(a); 1752(a)	Application to Decommission a Pipeline (ROW)	$2,170 × 147 applications = $318,990.
		$980 × 147 applications = $144,060.
NEW NON-HOUR COST BURDEN.		$44,463.
REVISED NON-HOUR COST BURDEN.		*$15,943,324.*
TOTAL NEW and Revised Non-Hour Cost Burdens.		*$15,987,787.*

Although the total new and revised Non-Hour Cost Burdens are estimated to be $16 million based on 3-year averages of the number of plans, applications, and permits, due to recent declines in the number of these submissions, BSEE anticipates that collections will more closely approximate $11 million in FY 2018.

For further information on this non-hour burden estimation process, refer to 5 CFR 1320.3(b)(1) and (2), or contact the BSEE Information Collection Clearance Officer at (703) 787–1607.

National Environmental Policy Act (NEPA) of 1969

This proposed rule meets the criteria set forth in 516 Departmental Manual (DM) 15.4C(1) for a categorical exclusion because it involves modification of existing regulations, the impacts of which would be limited to administrative or economic effects with minimal environmental impacts. BSEE also analyzed this proposed rule to determine if extraordinary circumstances, set forth in 43 CFR 46.215, exist that would require BSEE to prepare an environmental assessment or an environmental impact statement for actions otherwise eligible for a categorical exclusion. BSEE concluded that this proposed rule does not trigger any of the criteria for extraordinary circumstances and, therefore, has not prepared an environmental assessment or an environmental impact statement.

Data Quality Act

In developing this proposed rule, we did not conduct or use a study, experiment, or survey requiring peer review under the Data Quality Act (Pub. L. 106–554 § 515).

Effects on the Nation's Energy Supply (E.O. 13211)

This proposed rule is not a significant energy action under the definition in E.O. 13211 because:

—It is not a significant regulatory action under E.O. 12866;
—It is not likely to have a significant adverse effect on the supply, distribution, or use of energy; and
—It has not been designated as a significant energy action by the Administrator of OIRA.

Clarity of This Regulation

We are required by E.O. 12866, E.O. 12988, E.O. 13563, and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

—Be logically organized;
—Use the active voice to address readers directly;
—Use clear language rather than jargon;
—Be divided into short sections and sentences; and
—Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in the **ADDRESSES** section. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that you find unclear, which sections or sentences are too long, the sections where you feel lists or tables would be useful, *etc.*

List of Subjects in 30 CFR Part 250

Administrative practice and procedure, Continental Shelf, Environmental impact statements, Environmental protection, Government contracts, Investigations, Oil and gas exploration, Penalties, Reporting and recordkeeping requirements, Sulfur.

Dated: October 31, 2016.

Amanda C. Leiter,

Acting Assistant Secretary, Land and Minerals Management.

For the reasons stated in the preamble, the Bureau of Safety and Environmental Enforcement (BSEE) proposes to amend 30 CFR part 250 as follows:

PART 250—OIL AND GAS AND SULFUR OPERATIONS IN THE OUTER CONTINENTAL SHELF

■ 1. Authority citation for part 250 continues to read as follow:

Authority: 30 U.S.C. 1751; 31 U.S.C. 9701, 33 U.S.C. 1321(j)(1)(C), 43 U.S.C. 1334.

■ 2. Revise § 250.125 by:

■ a. Revising the table in paragraph (a) to read as follows;

■ b. Redesignating paragraph (c) as paragraph (d);

■ c. Removing paragraph (b) and adding new paragraphs (b) and (c) to read as follows:

§ 250.125 Service fees.

(a) * * *

SERVICE FEE TABLE

Service—processing of the following:	Fee amount	30 CFR citation
(1) Suspension of Operations/Suspension of Production (SOO/SOP) Request.	$3,055	§ 250.171(e).
(2) Deepwater Operations Plan:		
(i) Deepwater Operations Plan—Simple	$14,290	§ 250.292(q).
(ii) Deepwater Operations Plan—Complex (New Technology).	$70,333.	
(3) Application for Permit to Drill (APD; Form BSEE–0123).	$10,420	§ 250.410(d); § 250.513(b); § 250.1617(a).
(4) Application for Permit to Modify (APM; Form BSEE–0124).	$1,680	§ 250.465(b); § 250.513(b); § 250.613(b); § 250.1618(a); § 250.1704(g).
(5) New Facility Production Safety System Application for Facility with More than 125 Components.	$3,976 $13,534 additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and $14,567 for an inspection of a facility while in a shipyard. A component is a piece of equipment or an ancillary system that is protected by one or more of the safety devices required by API RP 14C (as incorporated by reference in § 250.198).	
(6) New Facility Production Safety System Application for Facility with 25–125 Components.	$548 $8,508 additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and $9,818 for an inspection of a facility while in a shipyard.	§ 250.842.
(7) New Facility Production Safety System Application for Facility with Fewer than 25 Components.	$463 $4,338 additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and $1,967 for an inspection of a facility while in a shipyard.	§ 250.842.

SERVICE FEE TABLE—Continued

Service—processing of the following:	Fee amount	30 CFR citation
(8) Production Safety System Application—Modification with More than 125 Components Reviewed.	$1,278 $9,313 additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and $8,100 for an inspection of a facility while in a shipyard.	§ 250.842.
(9) Production Safety System Application—Modification with 25–125 Components Reviewed.	$439 $6,765 additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and $7,326 for an inspection of a facility while in a shipyard.	§ 250.842.
(10) Production Safety System Application—Modification with Fewer than 25 Components Reviewed.	$386 $4,513 additional fee will be charged if BSEE conducts a pre-production inspection of a facility offshore, and $2,141 for an inspection of a facility while in a shipyard.	§ 250.842.
(11) Platform Application—Installation—Under the Platform Verification Program.	$28,311	§ 250.905(l).
(12) Platform Application—Installation—Fixed Structure Under the Platform Approval Program.	$1,914	§ 250.905(l).
(13) Platform Application—Installation—Caisson/Well Protector.	$1,914	§ 250.905(l).
(14) Platform Application—Modification/Repair	$1,975	§ 250.905(l).
(15) New Pipeline Application (Lease Term):		
(i) New Pipeline Application (Lease Term)—Shallow Water (less than 1,000 ft.).	$1,584	§ 250.1000(b).
(ii) New Pipeline Application (Lease Term)—Deepwater (greater than 1,000 ft.).	$3,663	
(16) Pipeline Application—Modification (Lease Term):		
(i) Pipeline Application—Modification (Lease Term)—Minor.	$651	§ 250.1000(b).
(ii) Pipeline Application—Modification (Lease Term)—Major.	$1,696	
(17) Pipeline Application—Modification Right-of-Way (ROW):		
(i) Pipeline Application—Modification (ROW)—Minor.	$455	§ 250.1000(b).
(ii) Pipeline Application—Modification (ROW)—Major.	$1,800	
(18) Pipeline Repair Notification	$557	§ 250.1008(e).
(19) Pipeline ROW Grant Application:		
(i) Pipeline ROW Grant Application—Shallow Water (less than 1,000 ft.).	$1,662	§ 250.1015(a).
(ii) Pipeline ROW Grant Application—Deepwater (greater than 1,000 ft.).	$3,796	
(20) Pipeline Conversion of Lease Term to ROW	$494	§ 250.1015(a).
(21) Pipeline ROW Assignment	$397	§ 250.1018(b).
(22) 500 Feet From Lease/Unit Line Production Request.	$5,440	§ 250.1156(a).
(23) Gas Cap Production Request	$11,962	§ 250.1157.
(24) Downhole Commingling Request	$14,064	§ 250.1158(a).
(25) Complex Surface Commingling and Measurement Application.	$8,205	§ 250.1202(a); § 250.1203(b); § 250.1204(a).
(26) Simple Surface Commingling and Measurement Application.	$3,514	§ 250.1202(a); § 250.1203(b); § 250.1204(a).
(27) Voluntary Unitization Proposal or Unit Expansion.	$27,288	§ 250.1303(d).
(28) Unitization Revision:		
(i) Unitization Revision—Exhibit A, Exhibit B, and Successor Unit Operator/Sub-operator.	$1,683	§ 250.1303(d).
(ii) Unitization Revision—Exhibit C	$3,225.	
(29) Application to Remove a Platform or Other Facility.	$2,846	§ 250.1727.
(30) Application to Decommission a Pipeline (Lease Term).	$857	§ 250.1751(a) or § 250.1752(a).
(31) Application to Decommission a Pipeline (ROW).	$980	§ 250.1751(a) or § 250.1752(a).

(b) Fees specified in paragraph (a) must be paid electronically using one of the methods required by § 250.126. Proof of payment of the fees listed in paragraph (a) must accompany the submission of the application or other request for service. Once a fee is paid, it is nonrefundable, except as provided in paragraph (c). If your application is returned to you as incomplete, you are not required to submit a new fee with the amended application.

(c) BSEE will issue a refund in certain situations.

(1) You are eligible for a refund if you submit:

(i) More than one payment with a single request;

(ii) An incorrect fee or fee amount; or

(iii) A payment without submitting any application or other request and the matter does not proceed further.

(2) If you meet the criteria for a refund, you must submit a completed Refund Request form, which can be found at *http://www.bsee.gov/About-BSEE/Fees-for-Services/*. On the Refund Request form, in the ''*Memo (reason requesting refund)'' section, you must list the reason for the refund. You must use the information from your original proof of payment to prepare your refund request.

(3) You must submit all refund requests to BSEE within 150 days of the initial service fee payment. If you do not submit your request within the 150-day timeframe, BSEE will not issue a refund.

(4) If you have any questions pertaining to refund eligibility or to the preparation of the refund request, contact the appropriate Regional Office.

* * * * *

■ 3. Revise § 250.126 to read as follows:

§ 250.126 Electronic payment instructions.

(a) You must file all payments under any provision of this part electronically, as provided in paragraphs (a)(1) or (a)(2) of this section.

(1) If you submit an application through the eWell Web site at *https://ewell.bsee.gov/ewell/*, you must use the interactive payment feature in that system, which directs you through pay.gov to make a payment. A copy of your pay.gov payment confirmation or pay.gov receipt serves as proof of your payment.

(2) For applications not submitted through eWell, you may make a payment through the Fees for Services page on the BSEE Web site at *http://www.bsee.gov/About-BSEE/Fees-for-Services/* or directly through the pay.gov Web site. A copy of your pay.gov payment confirmation or pay.gov receipt serves as proof of your payment and must accompany the submission of the application or other request for service.

(b) Payments at or below the current U.S. Treasury credit card limit may be made using a credit card or through the automated clearing house (ACH-debit). Payments above the current U.S. Treasury credit card limit must be made through ACH-debit.

(c) BSEE does not accept wire transfer electronic payments.

■ 4. In § 250.292, revise paragraph (q) to read as follows:

§ 250.292 What must the DWOP contain?

* * * * *

(q) Payment of the service fee listed in § 250.125. The service fee is divided into two levels based on the complexity of the plan, as shown in the following table.

Application type	Description
(1) Complex plans	Plans containing: i. ''new or unusual technology'' as defined by § 250.200 and such technology: A. requires a high degree of specialized knowledge; B. exceeds the limits of existing engineering standards; C. conflicts with existing engineering standards; or D. warrants an additional level of review due to the risk associated with implementation. ii. installation of a new floating production facility.
(2) Simple plans	All other plans.

■ 5. Revise § 250.1000 by:

■ a. Redesignating paragraphs (c) through (e) as paragraphs (e) through (g); and

■ b. Adding new paragraphs (c) and (d) to read as follows:

§ 250.1000 General requirements

* * * * *

(c) The service fee for a New Pipeline Application (Lease Term) is divided into two levels based on water depth, as shown in the following table:

Application type	Description
(1) Shallow water applications	Applications for new lease term pipelines that will be located in their entirety within water depths of 1,000 feet or less.
(2) Deepwater applications	Applications for new lease term pipelines, any portion of which will be located in water depths greater than 1,000 feet.

(d) The service fee for a Pipeline Application—Modification (Lease Term) and a Pipeline Application—Modification (Right-of-way) are divided into two levels based on complexity, as shown in the following table:

Application type	Description
(1) Major Applications	Applications containing a route modification.
(2) Minor Applications	All other applications.

* * * * *

■ 6. In § 250.1015, revise paragraph (a) to read as follows:

§ 250.1015 Applications for pipeline right-of-way grants

(a) You must submit to the Regional Supervisor an original and three copies of an application for a new or modified pipeline ROW grant. The application must address those items required by §§ 250.1007(a) or (b) of this subpart, as applicable. It must also state the primary purpose for which you will use the ROW grant. If the ROW has been used before the application is made, the application must state the date such use began, by whom, and the date the applicant obtained control of the ROW. When you file your application, you must pay the rental required under § 250.1012 of this subpart, as well as the

service fees listed in § 250.125 of this part for a pipeline ROW grant to install a new pipeline, or to convert an existing lease term pipeline into an ROW pipeline. An application to modify an approved ROW grant must be accompanied by the additional rental required under § 250.1012, if applicable. You must file a separate application for each ROW. The service fee for a pipeline ROW grant application is divided into two levels based on water depth, as shown in the following table:

Application type	Description
(1) Shallow water applications	Applications for a pipeline ROW grant for pipelines that will be located in their entirety within water depths of 1,000 feet or less.
(2) Deepwater applications	Applications for a pipeline ROW grant for pipelines, any portion of which will be located in water depths greater than 1,000 feet.

* * * * *

■ 7. In § 250.1303, revise paragraph (d) to read as follows:

§ 250.1303 How do I apply for voluntary unitization?

* * * * *

(d) You must pay the service fee listed in § 250.125 of this part with your request for a voluntary unitization proposal or the expansion of a previously approved voluntary unit to include additional acreage. Additionally, you must pay the service fee listed in § 250.125 with your request for unitization revision. The service fee for a request for unitization revision is divided into two levels, as shown in the following table:

Application type	Description
(1) Exhibits A and B	Applications for revisions to Exhibit A and/or Exhibit B or designation of Successor Unit Operators and/or Successor Unit Sub-operators.
(2) Exhibit C	Applications for revisions to Exhibit C.

[FR Doc. 2016–27500 Filed 11–16–16; 8:45 am]

BILLING CODE 4310–VH–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2015–0653; FRL–9954–65]

Chlorpyrifos; Tolerance Revocations; Notice of Data Availability and Request for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is announcing and inviting comment on additional information obtained and developed by EPA in conjunction with the proposed tolerance revocation for chlorpyrifos. This information includes the revised human health risk assessment and the drinking water assessment. It also includes EPA's issue paper and supporting analyses presented to the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) Scientific Advisory Panel's (SAP) meeting in April 2016 that addressed chlorpyrifos biomonitoring data and adverse neurodevelopmental outcomes, public comments received during the meeting, the FIFRA SAP's meeting minutes and the FIFRA SAP report. EPA is specifically soliciting comments on the validity and propriety of the use of all the new information, data, and analyses. EPA is accepting comment on the information and analysis, as well as reopening comment on any other aspect of the proposal or the underlying support documents that were previously available for comment. The EPA continues to seek comment on possible mitigation strategies, namely, use deletions, which might allow the EPA to retain a small subset of existing chlorpyrifos food uses. Commenters need not resubmit comments previously submitted. EPA will consider those comments, as well as comments in response to this notice, in taking a final action.

DATES: Submit comments on or before January 17, 2017.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2015–0653, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Dana Friedman, Pesticide Re-Evaluation Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (703) 347–8827; email address: *friedman.dana@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. How should I submit Confidential Business Information (CBI) to the Agency?

Do not submit this information to EPA electronically. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

II. Purpose of This Document

EPA is reopening the comment period on the proposed rule: Entitled ''Chlorpyrifos; Tolerance Revocations'' (80 FR 69080, November 6, 2015) (FRL–

9935–92), herein referred to as the ''proposed rule,'' for the purpose of obtaining public comment on the additional information and analyses announced in this document and which may be relevant to the development of a final action. EPA is also accepting comment on any other aspect of the proposal or the underlying support documents that were previously available for comment. As explained in the proposed rule, the timing of EPA's issuance of the proposal was dictated by an August 10, 2015 order by the U.S. Court of Appeals for the Ninth Circuit in *Pesticide Action Network North America (PANNA)* v. *EPA,* No. 14–72794. The *PANNA* decision directed EPA to respond by October 31, 2015 to PANNA and the Natural Resource Defense Council's (NRDC) petition to revoke all chlorpyrifos tolerances and cancel all chlorpyrifos registrations. As a result of that timing, EPA had not yet completed portions of its scientific assessment when it issued the proposed rule. Specifically, EPA noted that it issued the proposed rule in advance of completing a refined drinking water assessment and without conducting additional analysis of the hazard from chlorpyrifos in response to comments received on EPA's December 2014 Revised Human Health Risk Assessment. Accordingly, EPA noted in the proposed rule that it would update the proposal with any new or modified analyses, as EPA completed additional work after the proposal and, to the extent practicable, EPA would provide the public an opportunity to comment on that work prior to issuing a final rule. Consistent with that commitment, EPA is today seeking comment on the following documents that were not available for public comment during the prior comment period on the proposed rule: *Chlorpyrifos: Revised Human Health Risk Assessment for Registration Review (2016);* the materials and final report from the 2016 Chlorpyrifos SAP; and *Chlorpyrifos Registration Review Drinking Water Assessment.*

EPA's revised analyses do not result in a change to the EPA's proposal to revoke all tolerances but it does modify the methods and risk assessment used to support that finding in accordance with the advice of the SAP. The revised analysis indicates that expected residues of chlorpyrifos on most individual food crops exceed the ''reasonable certainty of no harm'' safety standard under the Federal Food, Drug, and Cosmetic Act (FFDCA). In addition, the majority of estimated drinking water exposures from currently registered uses, including water exposures from non-food uses, continue to exceed safe levels even taking into account more refined drinking water exposures. Accordingly, based on current labeled uses, the agency's analysis provided in this notice continues to indicate that the risk from the potential aggregate exposure does not meet the FFDCA safety standard. EPA can only retain chlorpyrifos tolerances if it is able to conclude that such tolerances are safe. EPA has not identified a set of currently registered uses that meets the FFDCA safety standard because it is likely only a limited number of food uses alone, and in combination with predicted drinking water exposures, would meet the standard. Further, EPA has not received any proposals for mitigation that registrants may be willing to undertake that would allow the EPA to retain any of the tolerances subject to this rulemaking. EPA continues to seek comment on possible mitigation strategies, namely, use deletions, which might allow the EPA to retain a small subset of existing chlorpyrifos food uses.

EPA consulted the FIFRA SAP for scientific advice on its analysis of biomonitoring data at a meeting on April 19–21, 2016, at which time, the public also had an opportunity to provide comment. The FIFRA SAP was asked to address the use of the epidemiological study *The Mothers and Newborn Study of North Manhattan and South Bronx* performed by the Columbia Children's Center for Environmental Health (CCCEH) at Columbia University to establish a new toxicological endpoint and associated point of departure for chlorpyrifos based on observed adverse neurodevelopmental outcomes in children resulting from prenatal exposure to chlorpyrifos. While the residential uses that resulted in chlorpyrifos exposures in the CCCEH study were cancelled in 2000, EPA believes this study remains relevant in evaluating risks from exposure to currently registered uses. In its presentation to the SAP, EPA proposed to use biomonitoring data (cord blood concentrations) identified in the CCCEH study (Rauh *et al.,* 2006 and Rauh *et al.,* 2011) as the basis for its point of departure. The FIFRA SAP provided feedback indicating that it did not believe using the cord blood data from that study was appropriate to establish a new point of departure. The SAP's primary criticism was that there was not enough data on the relationship between cord blood concentrations at birth to exposures at and around the time of chlorpyrifos application to support its use in quantitative risk assessment. Further, the FIFRA SAP noted that EPA's assessment did not identify a particular window of exposure within the prenatal period linked to the effects reported. Generally, however, the FIFRA SAP agreed with the overall conclusion of the CCCEH study, *i.e.* the association between prenatal chlorpyrifos exposure and neurodevelopmental outcomes in children.

The final FIFRA SAP report provides a detailed account of the uncertainties associated with the agency's April 2016 proposed approach to selecting the point of departure and its use in quantitative risk assessment. It also outlines the SAP's concern that ''epidemiology and toxicology studies suggest there is evidence for adverse health outcomes associated with chlorpyrifos exposures below levels that result in 10% red blood cell (RBC) acetylcholinesterase (AChE) inhibition'' (FIFRA SAP, 2016, p. 18). The FIFRA SAP recommended that EPA should derive the point of departure for neurodevelopmental effects using the ''estimated peak blood concentration or time weighted average blood concentration within the prenatal period'' (FIFRA SAP, 2016, p. 42).

After careful consideration of public comments and the SAP's recommendations, EPA has concluded the most appropriate path for reconciling the SAP's concerns is to follow through on the SAP's recommendation to use a time weighted average approach. The agency agrees with the 2016 FIFRA SAP (and previous SAPs) that there is a potential for neurodevelopmental effects associated with chlorpyrifos exposure to occur at levels below 10% RBC AChE inhibition, and that EPA's existing point of departure (which is based on 10% AChE inhibition), is therefore not sufficiently health protective.

As detailed in *Chlorpyrifos: Revised Human Health Risk Assessment for Registration Review (2016),* in order to follow up on the SAP's recommendation that the point of departure should be based on blood concentrations at the time of exposure to chlorpyrifos (rather than based on cord blood at the time of delivery), EPA evaluated the most likely chlorpyrifos application method to determine peak exposures to the CCCEH study cohort experiencing neurodevelopmental effects in children. EPA contacted the technical pest advisor responsible for overseeing New York City's housing authority in order to confirm the application method used at the time the CCCEH study was conducted. Based on those conversations and a review of the

registered uses available during that period, EPA concluded that crack and crevice treatments were the most likely exposure pattern among those use patterns registered at the time of the study and therefore has used these exposures as the basis for a new point of departure.

EPA generally selects the dose at which no toxicological effects are demonstrated to ensure our regulatory endpoint reflects a level of exposure that does not present a risk concern. However, the CCCEH study only supported the determination of a lowest observed adverse effects level (LOAEL). In situations where the agency selects a POD from a study where a no observed adverse effects level (NOAEL) has not been identified, EPA generally will retain the Food Quality Protection Act (FQPA) safety factor of 10X to account for the uncertainty in using a LOAEL. The 2016 revised risk assessment retains this uncertainty factor for chlorpyrifos and also applies a 10X uncertainty factor for intraspecies variability because of the lack of sufficient information to reduce or remove this factor.

The external exposure was calculated based on the assumptions and methods outlined in the EPA's 2012 Standard Operating Procedures (SOPs) for Residential Pesticide Exposure Assessment and chemical-specific exposure data, where available. Specifically, the 2012 Residential SOPs, which were peer reviewed by the FIFRA SAP in October 2009, were used to predict the potential exposures which could have occurred to individuals in the cohort for the indoor crack and crevice pesticide use pattern.

EPA then used the chlorpyrifos physiologically based pharmacokinetic (PBPK) model to estimate the study cohort mothers' systemic dose related to the LOAEL by (1) determining time-weighted average (TWA) blood levels from women exposed to chlorpyrifos from indoor exposures to the cancelled crack and crevice use and (2) using the crack and crevice TWA blood level as the internal dose for determining points of departure for infants, children, and adults exposed to chlorpyrifos using current exposure potential. The use of the PBPK model to assess internal dosimetry from various exposure scenarios continues to be supported by the SAP. This applies to the crack and crevice scenario identified as the most likely exposure pattern in the CCCEH study, where women were potential exposed via the dermal, oral, and inhalation routes. The detailed rationale is presented in *Chlorpyrifos: Revised Human Health Risk Assessment for Registration Review (2016).*

EPA has also completed, and is making available for public comment, *Chlorpyrifos Registration Review Drinking Water Assessment.* EPA conducted a national screening level drinking water assessment in 2014. Because of the court decision ordering EPA to respond to the PANNA–NRDC Petition by October 31, 2015, EPA was not able to complete a more refined drinking water assessment for chlorpyrifos in advance of the proposed rule. Since that time EPA conducted the refined drinking water assessment with the intention of providing a basis for supporting a more tailored approach to risk mitigation. In the proposal, EPA proposed revoking all tolerances largely because the agency could not make a safety finding based on drinking water exposure in highly-vulnerable watersheds. EPA reasoned if it could better identify where such vulnerable areas might be, it could be possible for registrants to amend product labeling in ways that might make unnecessary some number of the proposed tolerance revocations.

Chlorpyrifos Registration Review Drinking Water Assessment serves to combine, update and complete the work presented in the 2011 and 2014 drinking water assessments for chlorpyrifos as part of the registration review process. This document specifically focuses on the exposure estimates for surface water. The 2014 assessment presented an approach for deriving more regionally-specific estimated drinking water exposure concentrations for chlorpyrifos and chlorpyrifos-oxon for two water resource regions, hydrologic unit code (HUC)-02. This assessment updates those exposure assessments and provides estimates for the remaining (*i.e.,* 19) HUC-02 regions. Urban uses, which had not previously been assessed, are included in this update. This assessment also includes statistical analysis of all available monitoring data for chlorpyrifos and chlorpyrifos-oxon. While this drinking water assessment is more refined than the previous assessments, as a general matter, the results did not allow for identification of many areas where potential exposures of concern to drinking water can be ruled out. As a result, this assessment does not significantly alter the conclusions in the proposed rule regarding drinking water exposure and continues to indicate potential exposure to chlorpyrifos or chlorpyrifos-oxon in finished drinking water across the country based on currently labeled uses. This is supported by both model estimated concentrations as well as measured chlorpyrifos concentrations in surface water across the United States.

Section IV of this Notice of Data Availability (NODA) describes all additional data and analyses and how they impact the EPA's proposal. Note, however, that this NODA does not provide an exhaustive presentation of the additional data and analysis that EPA is placing in the associated docket and seeking comment on. All the information subject to this notice can be accessed as described in section III of this notice.

EPA is providing notice on these additional analyses to provide an opportunity for the public to submit additional data or information for the agency's consideration as it develops the final rule. Since EPA is still in the process of deliberating the provisions of a final rule, EPA cannot definitively state whether this information will provide support for any provision of the final rule, or that the agency has determined that it is appropriate to rely on this information in developing the final rule.

On December 10, 2015, the Ninth Circuit issued a further order requiring EPA to complete any final rule and fully respond to the PANNA and NRDC petition by December 30, 2016. On June 30, 2016, EPA sought a 6-month extension to that deadline in light of the SAP's recommendation at the meeting and in order to allow EPA to fully consider the SAP's written report. The FIFRA SAP report was finalized and made available for EPA consideration on July 20, 2016. The court rejected EPA's request for a 6-month extension and ordered EPA to complete its final action by March 31, 2017 (an extension of 3 months). The court also announced that no further extensions to that date would be granted.

III. Where can the information identified in this document be found?

The information that EPA is be made available for public review and comment can be found in the following dockets: EPA–HQ–OPP–2015–0653, the docket for the proposed tolerance revocations, and EPA–HQ–OPP–2016–0062, the FIFRA SAP docket, which contains the Chlorpyrifos Issue Paper and supporting materials. Both dockets can be accessed through *http://www.regulations.gov.* As noted, EPA is also reopening the comment period to allow for comment on any aspect of the proposed revocation published on November 6, 2015 (80 FR 69080) (FRL–9935–92).

IV. What analysis and data are being noticed?

1. EPA is seeking comment on the following updates to the chlorpyrifos human health risk assessment: (1) Use of the crack and crevice scenario to derive an exposure level for women in the Columbia study; (2) using the LOAEL from the Columbia study and PBPK modeling to derive an endpoint for use in quantitative risk assessment; (3) use of the 10X uncertainty factor for intraspecies variability; (4) use of the 10X FQPA safety factor for LOAEL to NOAEL extrapolation (please include your rationale for any alternative values suggested for this factor). Its analysis is included in the *Chlorpyrifos: Revised Human Health Risk Assessment for Registration Review (2016),* which is available in the chlorpyrifos tolerance revocation docket (EPA–HQ–OPP–2015–0653).

2. EPA is also making available for comment the issue paper and associated materials presented to the April 2016 FIFRA SAP and the final report of the SAP. The FIFRA SAP materials and final report are available in the FIFRA SAP docket (EPA–HQ–OPP–2016–0062).

3. EPA is also seeking comment on *Chlorpyrifos Registration Review Drinking Water Assessment,* a highly refined drinking water assessment that updates and completes the agency's examination of exposure through drinking water for all registered uses of chlorpyrifos. This assessment integrates regionally specific (*i.e.,* spatially relevant) estimated drinking water concentrations and an extensive evaluation of available surface water monitoring data for chlorpyrifos and chlorpyrifos-oxon. The assessment considers both agricultural and non-agricultural uses of chlorpyrifos, a sensitivity analysis for model estimated concentrations, and statistical evaluation of surface water monitoring data.

State of Nebraska; Authorization of State Hazardous Waste Management Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: Nebraska has applied to the Environmental Protection Agency (EPA) for final authorization of revisions to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). EPA is proposing to grant final authorization to Nebraska.

DATES: Comments on this proposed action must be received in writing by December 19, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R07–RCRA–2016–0637, to *http://www.regulations.gov*. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets*.

FOR FURTHER INFORMATION CONTACT: Lisa Haugen, EPA Region 7, Enforcement Coordination Office, 11201 Renner Boulevard, Lenexa, Kansas 66219, phone number: (913) 551–7877, or email address: *haugen.lisa@epa.gov*.

SUPPLEMENTARY INFORMATION: In the final rules section of the **Federal Register**, EPA is authorizing the revisions by a direct final rule. EPA did not make a proposal prior to the direct final rule because we believe this action is not controversial and do not expect comments that oppose it. We have explained the reasons for this authorization in the preamble of the direct final rule. If no relevant adverse comments are received in response to this action, no further activity is contemplated in relation to this action. If EPA receives relevant adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed action. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on part of this rule and if that part can be severed from the remainder of the rule, EPA may adopt as final those parts of the rule that are not the subject of an adverse comment. For additional information, see the direct final rule which is located in the rules section of this **Federal Register**.

Dated: November 3, 2016.

Mark Hague,

Regional Administrator, Region 7.

Federal Register
Vol. 81, No. 222
Thursday, November 17, 2016

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Natural Resources Conservation Service

[Docket No. NRCS–2016–0009]

Notice of Implementation of the Water Erosion Prediction Project (WEPP) Technology for Soil Erodibility System Calculations for the Natural Resources Conservation Service

AGENCY: Natural Resources Conservation Service (NRCS), U.S. Department of Agriculture (USDA).

ACTION: Notice of availability of WEPP for soil erodibility system calculations scheduled for implementation for public review and comment.

SUMMARY: Notice is hereby given of the intention of NRCS to implement the WEPP technology to replace the use of the Revised Universal Soil Loss Equation, Version 2 (RUSLE2), where applicable.

DATES: *Effective Date:* This is effective November 17, 2016.

Comment Date: Submit comments on or before December 19, 2016. The final version of the new WEPP water erosion prediction technology will be adopted after the close of the 30-day period, and after consideration of all comments.

ADDRESSES: You may submit comments, identified by Docket Number NRCS–2016–0009, using any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Mail or hand-delivery:* Norman Widman, National Agronomist, Ecological Sciences Division, Natural Resources Conservation Service, 1400 Independence Avenue Southwest, Room 6150, Washington, DC 20250.
- *Email: norm.widman@wdc.usda.gov*.

NRCS will post all comments on *http://www.regulations.gov*. In general, personal information provided with comments will be posted. If your comment includes your address, phone number, email, or other personal identifying information, your comments, including personal information, may be available to the public. You may ask in your comment that your personal identifying information be withheld from public view, but this cannot be guaranteed.

FOR FURTHER INFORMATION CONTACT: Norman Widman, National Agronomist, Ecological Sciences Division, Natural Resources Conservation Service, 1400 Independence Avenue Southwest, Room 6153, Washington, DC 20250.

SUPPLEMENTARY INFORMATION: The RUSLE2, an empirical erosion prediction model for calculating sheet and rill water erosion, is being replaced by WEPP technology for selected highly erodible compliance applications. The WEPP model is for use where water erosion is the primary causal factor for comparing the annual level of erosion before conservation system application to the expected annual level of erosion after conservation system application (*i.e.,* substantial reduction for highly erodible land conservation). The use of the Universal Soil Loss Equation (USLE) to calculate potential erodibility remains unchanged. The regulation for USLE is located at 7 CFR 610.14.

The implementation of the WEPP technology does not affect the highly erodible soil map unit list contained in the NRCS Field Office Technical Guide as of January 1, 1990. The factor values from the 1990 list will continue to be used for all erodibility index calculations, including sodbuster determinations and review of previous determinations.

The WEPP technology computer model is a process-based, daily time-step model that predicts soil erosion by simulating the fundamental processes controlling water erosion. WEPP calculates sheet and rill erosion rates and sediment deposition and delivery. The WEPP model also provides the user with spatial information regarding soil flux, deposition, and loss from specific regions of a field over time. The model is intended for conservation planning, assessing water erosion for NRCS' National Resources Inventory, and aiding the development of regional and national policy.

The WEPP modular design is amenable to incorporation of new features; thus, WEPP utility also is for estimating long-term soil productivity, the effect of climate change on crop growth and erosion, sediment depositional loading of lakes and streams, and ephemeral erosion prediction.

Further, WEPP aids in calculating onsite and offsite economic costs of erosion and assessing impacts of management strategies on public lands when used in conjunction with other models.

A complete summary of the processes utilized by the WEPP model can be seen in ''WEPP Model Documentation'' on the USDA Agricultural Research Service Web page at *http://www.ars.usda.gov/Research/docs.htm?docid=10621*. Additional WEPP documents also are also available on this Web page.

The proposed implementation timeframe for WEPP in each NRCS field office with a water erosion concern is December 1, 2016. Section 1201(a)(11)(C) of the Food Security Act of 1985, as amended, (16 U.S.C. 3801(a)(11)(C)) requires NRCS to make available for public review and comment all proposed changes to equations to carry out the highly erodible land provisions of the law in a manner consistent with section 553 of title 5.

Signed this 4th day of October, 2016, in Washington, DC.

Jason A. Weller,

Chief, Natural Resources Conservation Service.

BILLING CODE 3410–16–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Kansas Advisory Committee To Discuss the Committee's Draft Report Regarding Voting Rights in the State, as Well as Other Civil Rights Issues for Future Inquiry

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the

Federal Advisory Committee Act that the Kansas Advisory Committee (Committee) will hold a meeting on Monday, December 12, 2016, at 11:00 a.m. CST. The meeting will include a discussion of a (partial) draft report on voting rights in the state, and a discussion of other current civil rights concerns in Kansas for future study.

DATES: The meeting will take place on Monday, December 12, 2016, at 11:00 a.m. CST.

ADDRESSES: Public Call Information: Dial: 888–397–5335, Conference ID: 6723214.

FOR FURTHER INFORMATION CONTACT: Melissa Wojnaroski, DFO, at *mwojnaroski@usccr.gov* or 312–353–8311.

SUPPLEMENTARY INFORMATION: Members of the public can listen to the discussion. This meeting is available to the public through the following toll-free call-in number: 888–397–5335, conference ID: 6723214. Any interested member of the public may call this number and listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. The conference call operator will ask callers to identify themselves, the organization they are affiliated with (if any), and an email address prior to placing callers into the conference room. Callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–977–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are also entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be mailed to the Regional Programs Unit, U.S. Commission on Civil Rights, 55 W. Monroe St., Suite 410, Chicago, IL 60615. They may also be faxed to the Commission at (312) 353–8324, or emailed to Corrine Sanders at *csanders@usccr.gov.* Persons who desire additional information may contact the Regional Programs Unit at (312) 353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Unit Office, as they become available, both before and after the meeting. Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Kansas Advisory Committee link (*http://www.facadatabase.gov/committee/meetings.aspx?cid=249*). Persons interested in the work of this Committee are directed to the Commission's Web site, *http://www.usccr.gov,* or may contact the Regional Programs Unit at the above email or street address.

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Minnesota Advisory Committee To Begin Preparations for a Public Hearing To Gather Testimony Regarding Civil Rights and Policing Practices in Minnesota

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Minnesota Advisory Committee (Committee) will hold a meeting on Thursday, December 08, 2016, at 1:00pm CST for the purpose of preparing for a public hearing to gather testimony regarding civil rights and policing practices in Minnesota.

DATES: The meeting will be held on Thursday, December 8, 2016, at 1:00 p.m. CST.

Public Call Information: Dial: 877–857–6161, Conference ID: 6681139.

FOR FURTHER INFORMATION CONTACT: Melissa Wojnaroski, DFO, at *mwojnaroski@usccr.gov* or 312–353–8311.

SUPPLEMENTARY INFORMATION: Members of the public can listen to the discussion. This meeting is available to the public through the following toll-free call-in number: 877–857–6161, conference ID: 6681139. Any interested member of the public may call this number and listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. The conference call operator will ask callers to identify themselves, the organization they are affiliated with (if any), and an email address prior to placing callers into the conference room. Callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–977–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are also entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be mailed to the Regional Programs Unit Office, U.S. Commission on Civil Rights, 55 W. Monroe St., Suite 410, Chicago, IL 60615. They may also be faxed to the Commission at (312) 353–8324, or emailed to Carolyn Allen at *callen@usccr.gov.* Persons who desire additional information may contact the Regional Programs Unit at (312) 353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Unit Office, as they become available, both before and after the meeting. Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Minnesota Advisory Committee link (*http://www.facadatabase.gov/committee/meetings.aspx?cid=256*). Persons interested in the work of this Committee are directed to the Commission's Web site, *http://www.usccr.gov,* or may contact the Regional Programs Unit at the above email or street address.

BILLING CODE 6335–01–P

DEPARTMENT OF COMMERCE

Economics and Statistics Administration

Request for Nominations of Member To Serve on the Commerce Data Advisory Council (CDAC)

AGENCY: Economics and Statistics Administration (ESA), Department of Commerce.

ACTION: Notice of Request for Nominations to the CDAC.

SUMMARY: The Secretary of Commerce is requesting nomination of individuals to the Commerce Data Advisory Council. The Secretary will consider nominations received in response to this notice, as well as from other sources. The **SUPPLEMENTARY INFORMATION** section of this notice provides committee and membership criterial.

DATES: The Economics and Statistics Administration must receive nominations for members by midnight December 1, 2016.

ADDRESSES: Please submit nominations to the email account *DataAdvisoryCouncil@doc.gov,* this account is specifically set up to receive Data Advisory Council applications. Nominations may also be submitted by postal delivery to Burton Reist, Director of External Affairs, Economics and Statistics Administration/DFO CDAC, Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Burton Reist, Director of External Affairs, Economics and Statistics Administration, Department of Commerce, at (202) 482–3331 or email *BReist@doc.gov,* also at 1401 Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Commerce (Department) collects, compiles, analyzes, and disseminates a treasure trove of data, including data on the Nation's economy, population, and environment. This data is fundamental to the Department's mission and is used for the protection of life and property, for scientific purposes, and to enhance economic growth. However, the Department's capacity to disseminate the increasing amount of data held and to disseminate it in formats most useful to its customers is significantly constrained.

In order to realize the potential value of the data the Department collects, stores, and disseminates, the Department must minimize barriers to accessing and using the data. Consistent with privacy and security considerations, the Department is firmly committed to unleashing its untapped data resources in ways that best support downstream information access, processing, analysis, and dissemination.

The Commerce Data Advisory Council (CDAC) provides advice and recommendations, to include process and infrastructure improvements, to the Secretary on ways to make Commerce data easier to find, access, use, combine and disseminate. The aim of this advice shall be to maximize the value of Commerce data to all users including governments, businesses, communities, academia, and individuals.

The Secretary will draw CDAC membership from the data industry academia, non-profits and state and local governments with a focus on recognized expertise in collection, compilation, analysis, and dissemination. As privacy concerns span the entire data lifecycle, expertise in privacy protection also will be represented on the Council. The Secretary will select members that represent the entire spectrum of Commerce data including demographic, economic, scientific, environmental, patent, and geospatial data. The Secretary will select members from the information technology, business, non-profit, and academic communities, and state and local governments. Collectively, their knowledge will include all types of data Commerce distributes and the full lifecycle of data collection, compilation, analysis, and dissemination.

II. Description of Duties

The Council shall advise the Secretary on ways to make Commerce data easier to find, access, use, combine, and disseminate. Such advice may include recommended process and infrastructure improvements. The aim of this advice shall be to maximize the value of Commerce data to governments, businesses, communities, and individuals.

In carrying out its duties, the Council may consider the following:

—Data management practices that make it easier to track and disseminate integrated, interoperable data for diverse users;

—Best practices that can be deployed across Commerce to achieve common, open standards related to taxonomy, vocabulary, application programming interfaces (APIs), metadata, and other key data characteristics;

—Policy issues that arise from expanding access to data, including issues related to privacy, confidentiality, latency, and consistency;

—Opportunities and risks related to the combination of public and private data sources and the development of joint data products and services resulting from public-private partnerships;

—External uses of Commerce data and similar federal, state, and private data sets by businesses; and,

—Methods to enhance communication and collaboration between stakeholders and subject-matter experts at Commerce on data access and use.

The Council meets up to four times a year, budget permitting. Special meetings may be called when appropriate.

Federal Advisory Committee Act (5 U.S.C. Appendix 2), which sets forth standards for the formation and use of advisory committees, is the governing instrument for the CDAC.

III. Membership

1. The Council shall consist of up to 20 members.

2. The Secretary shall select and appoint members and members shall serve at the pleasure of the Secretary.

3. Members shall represent a cross-section of business, academic, non-profit, and non-governmental organizations.

4. The Secretary will choose members of the Council who ensure objectivity and balance, a diversity of perspectives, and guard against potential for conflicts of interest.

5. Members shall be prominent experts in their fields, recognized for their professional and other relevant achievements and their objectivity.

6. In order to ensure the continuity of the Commerce Data Advisory Council, the Council shall be appointed so that each year the terms expire of approximately one-third of the members of the Council.

7. Council members serve for terms of two years and may be reappointed to any number of additional terms. Initial appointments may be for 12-, 18-and 24-month increments to provide staggered terms.

8. Nominees must be able to actively participate in the tasks of the Council, including, but not limited to regular

meeting attendance, Council meeting discussant responsibilities, and review of materials, as well as participation in conference calls, webinars, working groups, and special Council activities.

9. Should a council member be unable to complete a two-year term and when vacancies occur, the Secretary will select replacements who can best either replicate the expertise of the departing member or provide the CDAC with a new, identified needed area of expertise. An individual chosen to fill a vacancy shall be appointed for the remainder of the term of the member replaced or for a two-year term as deemed. A vacancy shall not affect the exercise of any power of the remaining members to execute the duties of the Council.

10. No employee of the federal government can serve as a member of the Census Scientific Advisory Committee.

All members of the Commerce Data Advisory Council shall adhere to the conflict of interest rules applicable to Special Government Employees as such employees are defined in 18 U.S.C. 202(a). These rules include relevant provisions in 18 U.S.C. related to criminal activity, Standards of Ethical Conduct for Employees of the Executive Branch (5 CFR part 2635), and Executive Order 12674 (as modified by Executive Order 12731).

IV. Compensation

1. Membership is under voluntary circumstances and therefore members do not receive compensation for service on the Commerce Data Advisory Council.

2. Members shall receive per diem and travel expenses as authorized by 5 U.S.C. 5703, as amended, for persons employed intermittently in the Government service.

V. Nominations Information

The Secretary will consider nominations of all qualified individuals to ensure that the CDAC includes the areas of subject matter expertise noted above (see ''Background and Membership''). Individuals may nominate themselves or other individuals, and professional associations and organizations may nominate one or more qualified persons for membership on the CDAC. Nominations shall state that the nominee is willing to serve as a member of the Council.

A nomination package should include the following information for each nominee:

1. A letter of nomination stating the name, affiliation, and contact information for the nominee, the basis for the nomination (*i.e.,* what specific attributes recommend him/her for service in this capacity), and the nominee's field(s) of expertise;

2. A biographical sketch of the nominee and a copy of his/her resume or curriculum vitae; and

3. The name, return address, email address, and daytime telephone number at which the nominator can be contacted.

The Department of Commerce is committed to equal opportunity in the workplace and seeks diverse Committee membership. The Department has special interest in assuring that women, minority groups, and the physically disabled are adequately represented on advisory committees; and therefore, extends particular encouragement to nominations for appropriately qualified female, minority, or disabled candidates. The Department of Commerce also encourages geographic diversity in the composition of the Council. All nomination information should be provided in a single, complete package and received by the stated deadline, December 1, 2016. Interested applicants should send their nomination package to the email or postal address provided above.

Potential candidates will be asked to provide detailed information concerning financial interests, consultancies, research grants, and/or contracts that might be affected by recommendations of the Council to permit evaluation of possible sources of conflicts of interest. Finally, nominees will be required to certify that they are not subject to the Foreign Agents Registration Act (22 U.S.C. 611) or the Lobbying Disclosure Act (2 U.S.C. 1601 *et seq.*).

Dated: November 4, 2016.

Austin Durrer,

Chief of Staff for Under Secretary for Economic Affairs.

[FR Doc. 2016–27668 Filed 11–16–16; 8:45 am]

BILLING CODE P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–46–2016]

Foreign-Trade Zone (FTZ) 189—Kent/Ottawa/Muskegon Counties, Michigan, Authorization of Production Activity, Adient US LLC, Subzone 189D, (Motorized Seat Adjusters for Motor Vehicles), Holland and Zeeland, Michigan

On July 13, 2016, Adient US LLC (Adient), owned by Johnson Controls, Inc., submitted a notification of proposed production activity to the Foreign-Trade Zones (FTZ) Board for its facility within FTZ 189D, at sites in Holland and Zeeland, Michigan.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (81 FR 49619, July 28, 2016). The FTZ Board has determined that no further review of the activity is warranted at this time. The production activity described in the notification is authorized, subject to the FTZ Act and the Board's regulations, including Section 400.14.

Elizabeth Whiteman,

Acting Executive Secretary.

[FR Doc. 2016–27665 Filed 11–16–16; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–76–2016]

Foreign-Trade Zone 12—McAllen, Texas; Application for Reorganization Under Alternative Site Framework

An application has been submitted to the Foreign-Trade Zones (FTZ) Board by the McAllen Foreign Trade Zone, Inc., grantee of FTZ 12, requesting authority to reorganize the zone under the alternative site framework (ASF) adopted by the FTZ Board (15 CFR Sec. 400.2(c)). The ASF is an option for grantees for the establishment or reorganization of zones and can permit significantly greater flexibility in the designation of new subzones or ''usage-driven'' FTZ sites for operators/users located within a grantee's ''service area'' in the context of the FTZ Board's standard 2,000-acre activation limit for a zone. The application was submitted pursuant to the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally docketed on November 10, 2016.

FTZ 12 was approved by the FTZ Board on October 23, 1970 (Board Order 84, 35 FR 16962, November 3, 1970), and expanded on May 2, 1984 (Board Order 254, 49 FR 22842, June 1, 1984), on June 19, 1990 (Board Order 469, 55 FR 26225, June 27, 1990), on April 29, 1996 (Board Order 819, 61 FR 21157, May 9, 1996), and on January 21, 2003 (Board Order 1266, 68 FR 5271–5272, February 3, 2003).

The current zone includes the following sites: *Site 1* (865 acres total, four parcels)—McAllen Southwest Industrial Area located at FM 1016 and

Ware Road (80 acres), at FM 1016 between Bentsen Road and Shary Road (695 acres), at 3801 West Military Highway (50 acres), and at 6800 South Ware Road (40 acres) in McAllen; and, *Site 2* (8.5 acres)—McAllen Miller International Airport Air Cargo Facility located south of Uvalde Street and East of FM 1926 in McAllen.

The grantee's proposed service area under the ASF would be Hidalgo County, Texas, as described in the application. If approved, the grantee would be able to serve sites throughout the service area based on companies' needs for FTZ designation. The application indicates that the proposed service area is within and adjacent to the Hidalgo/Pharr Customs and Border Protection port of entry.

The applicant is requesting authority to reorganize its existing zone to include all of the existing sites as ''magnet'' sites. The ASF allows for the possible exemption of one magnet site from the ''sunset'' time limits that generally apply to sites under the ASF, and the applicant proposes that Site 1 be so exempted. No subzones/usage-driven sites are being requested at this time. The application would have no impact on FTZ 12's previously authorized subzone.

In accordance with the FTZ Board's regulations, Camille Evans of the FTZ Staff is designated examiner to evaluate and analyze the facts and information presented in the application and case record and to report findings and recommendations to the FTZ Board.

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary at the address below. The closing period for their receipt is January 17, 2017. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to January 31, 2017.

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the ''Reading Room'' section of the FTZ Board's Web site, which is accessible via *www.trade.gov/ftz.*

For further information, contact Camille Evans at *Camille.Evans@trade.gov* or (202) 482–2350.

Dated: November 10, 2016.

Elizabeth Whiteman,

Acting Executive Secretary.

Certain Cold-Rolled Steel Flat Products From the People's Republic of China: Initiation of Anti-Circumvention Inquiries on the Antidumping Duty and Countervailing Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: In response to requests from ArcelorMittal USA LLC, Nucor Corporation, United States Steel Corporation, and AK Steel Corporation, as well as Steel Dynamics, Inc. and California Steel Industries, (collectively, Domestic Producers), the Department of Commerce (the Department) is initiating anti-circumvention inquiries to determine whether imports of certain cold-rolled steel flat products (CRS), which are produced in the Socialist Republic of Vietnam (Vietnam) from hot-rolled steel produced in the People's Republic of China (PRC), are circumventing the antidumping duty (AD) and countervailing duty (CVD) orders on CRS from the PRC.

DATES: Effective November 17, 2016.

FOR FURTHER INFORMATION CONTACT: John K. Drury or Victoria Cho, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0195 or (202) 482–5075, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 28, 2015, AK Steel Corporation, ArcelorMittal USA EEC, Nucor Corporation, Steel Dynamics, Inc., and the United States Steel Corporation (collectively, Petitioners) filed petitions seeking the imposition of antidumping and countervailing duties on imports of CRS from Brazil, the People's Republic of China, India, Japan, the Republic of Korea, the Netherlands, Russia, and the United Kingdom. Following the Department's final affirmative determinations of dumping and countervailable subsidies,[1] and the U.S. International Trade Commission (ITC)'s finding of material injury,[2] the Department issued AD and CVD orders on imports of CRS from the PRC.[3]

On September 22, 2016, pursuant to section 781(b) of the Tariff Act of 1930, as amended (the Act) and 19 CFR 351.225(h), Steel Dynamics, Inc. and California Steel Industries submitted a request for the Department to initiate anti-circumvention inquiries to determine whether producers of CRS in Vietnam are circumventing the *Orders* by exporting to the United States CRS which is completed or assembled in Vietnam using hot-rolled steel (HRS) sourced from the PRC.[4] On September 27, 2016, ArcelorMittal USA LLC, Nucor Corporation, United States Steel Corporation, and AK Steel Corporation also submitted a request for the Department to initiate anti-circumvention inquiries and issue preliminary determinations of circumvention to suspend liquidation of imports of CRS from Vietnam.[5] On October 13, 2016, we received comments supporting the allegation from the United Steelworkers.[6] Domestic Producers request that the Department treat CRS imports from Vietnam as subject merchandise under the scope of the *Orders* and impose cash deposit requirements on all imports of CRS from Vietnam.

On October 17, 2016, we received comments objecting to the allegation from Metallia U.S.A., LLC, Metallia, A Division of Hartree Partners, LP, Nippon Steel and Sumiken Bussan Americas Inc., Mitsui & Co. (U.S.A.), Inc., and Marubeni-Itochu Steel America Inc. (MISA).[7] Also on October 17, 2016, we

received comments objecting to the allegation from Minmetals, Inc. (Minmetals).[8] On October 17, 2016, we also received comments objecting to the allegation from POSCO-Vietnam Co., Ltd. (POSCO Vietnam).[9] On October 21, 2016, we received comments objecting to the allegation from China Steel Sumikin Vietnam Joint Stock Company.[10] Also on October 26, 2016, we received comments objecting to the allegation from Summit Global Trading, a Subsidiary of Sumitomo Corporation of Americas (Sumitomo).[11] On October 28, 2016, we received comments objecting to the allegation from thyssenkrupp Materials NA, Inc. (thyssenkrupp).[12] On October 31, 2016, we also received comments objecting to the allegation on behalf of Hoa Sen Group (HSG) [13] and Maruichi Sun Steel Joint Stock Company (Maruichi).[14] On November 1, 2016, we received comments objecting to the allegation from behalf of from Vietnam Competition Authority.[15]

Scope of the Orders

The products covered by the orders are certain cold-rolled (cold-reduced), flat-rolled steel products, whether or not annealed, painted, varnished, or coated with plastics or other nonmetallic substances. The products covered do not include those that are clad, plated, or coated with metal. The products covered include coils that have a width or other lateral measurement (''width'') of 12.7 mm or greater, regardless of form of coil (*e.g.,* in successively superimposed layers, spirally oscillating, *etc.*). The products covered also include products not in coils (*e.g.,* in straight lengths) of a thickness less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products covered also include products not in coils (*e.g.,* in straight lengths) of a thickness of 4.75 mm or more and a width exceeding 150 mm and measuring at least twice the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process, *i.e.,* products which have been ''worked after rolling'' (*e.g.,* products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above, and

(2) where the width and thickness vary for a specific product (*e.g.,* the thickness of certain products with non-rectangular cross-section, the width of certain products with nonrectangular shape, *etc.*), the measurement at its greatest width or thickness applies.

Steel products included in the scope of the orders are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten (also called wolfram), or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium (also called columbium), or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium

Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

For example, specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, motor lamination steels, Advanced High Strength Steels (AHSS), and Ultra High Strength Steels (UHSS). If steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. Motor lamination steels contain micro-alloying levels of elements such as silicon and aluminum. AHSS and UHSS are considered high tensile strength and high elongation steels, although AHSS and UHSS are covered whether or not they are high tensile strength or high elongation steels.

Subject merchandise includes cold-rolled steel that has been further processed in a third country, including but not limited to annealing, tempering, painting, varnishing, trimming, cutting, punching, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the orders if performed in the country of manufacture of the cold-rolled steel.

All products that meet the written physical description, and in which the chemistry quantities do not exceed any one of the noted element levels listed above, are within the scope of the orders unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of the orders:

- Ball bearing steels; [16]
- Tool steels; [17]

[16] Ball bearing steels are defined as steels which contain, in addition to iron, each of the following elements by weight in the amount specified: (i) Not less than 0.95 nor more than 1.13 percent of carbon; (ii) not less than 0.22 nor more than 0.48 percent of manganese; (iii) none, or not more than 0.03 percent of sulfur; (iv) none, or not more than 0.03 percent of phosphorus; (v) not less than 0.18 nor more than 0.37 percent of silicon; (vi) not less than 1.25 nor more than 1.65 percent of chromium; (vii) none, or not more than 0.28 percent of nickel; (viii) none, or not more than 0.38 percent of copper; and (ix) none, or not more than 0.09 percent of molybdenum.

[17] Tool steels are defined as steels which contain the following combinations of elements in the quantity by weight respectively indicated: (i) More than 1.2 percent carbon and more than 10.5 percent chromium; or (ii) not less than 0.3 percent carbon and 1.25 percent or more but less than 10.5 percent chromium; or (iii) not less than 0.85 percent carbon

- Silico-manganese steel; [18]
- Grain-oriented electrical steels (GOES) as defined in the final determination of the U.S. Department of Commerce in *Grain-Oriented Electrical Steel From Germany, Japan, and Poland*.[19]
- Non-Oriented Electrical Steels (NOES), as defined in the antidumping orders issued by the U.S. Department of Commerce in *Non-Oriented Electrical Steel From the People's Republic of China, Germany, Japan, the Republic of Korea, Sweden, and Taiwan*.[20]

The products subject to the orders are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7209.15.0000, 7209.16.0030, 7209.16.0060, 7209.16.0070, 7209.16.0091, 7209.17.0030, 7209.17.0060, 7209.17.0070, 7209.17.0091, 7209.18.1530, 7209.18.1560, 7209.18.2510, 7209.18.2520, 7209.18.2580, 7209.18.6020, 7209.18.6090, 7209.25.0000, 7209.26.0000, 7209.27.0000, 7209.28.0000, 7209.90.0000, 7210.70.3000, 7211.23.1500, 7211.23.2000, 7211.23.3000, 7211.23.4500, 7211.23.6030, 7211.23.6060, 7211.23.6075, 7211.23.6085, 7211.29.2030, 7211.29.2090, 7211.29.4500, 7211.29.6030, 7211.29.6080, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7225.50.6000, 7225.50.8015, 7225.50.8085, 7225.99.0090, 7226.92.5000, 7226.92.7050, and 7226.92.8050.

The products subject to the orders may also enter under the following HTSUS numbers: 7210.90.9000, 7212.50.0000, 7215.10.0010, 7215.10.0080, 7215.50.0016, 7215.50.0018, 7215.50.0020, 7215.50.0061, 7215.50.0063, 7215.50.0065, 7215.50.0090, 7215.90.5000, 7217.10.1000, 7217.10.2000, 7217.10.3000, 7217.10.7000, 7217.90.1000, 7217.90.5030, 7217.90.5060, 7217.90.5090, 7225.19.0000, 7226.19.1000, 7226.19.9000, 7226.99.0180, 7228.50.5015, 7228.50.5040, 7228.50.5070, 7228.60.8000, and 7229.90.1000.

The HTSUS subheadings above are provided for convenience and customs purposes only. The written description of the scope of the orders is dispositive.

Merchandise Subject to the Anti-Circumvention Inquiries

These anti-circumvention inquiries cover CRS exported from Vietnam produced from HRS exported from the PRC.

Initiation of Anti-Circumvention Inquiries

Section 781(b)(1) of the Act provides that the Department may find circumvention of an AD or CVD order when merchandise of the same class or kind subject to the order is completed or assembled in a foreign country other than the country to which the order applies. In conducting an anti-circumvention inquiry, under section 781(b)(1) of the Act, the Department relies on the following criteria: (A) Merchandise imported into the United States is of the same class or kind as any merchandise produced in a foreign country that is the subject of an antidumping or countervailing duty order or finding; (B) before importation into the United States, such imported merchandise is completed or assembled in another foreign country from merchandise which is subject to the order or merchandise which is produced in the foreign country that is subject to the order; (C) the process of assembly or completion in the foreign country referred to in section (B) is minor or insignificant; (D) the value of the merchandise produced in the foreign country to which the AD or CVD order applies is a significant portion of the total value of the merchandise exported to the United States; and (E) the administering authority determines that action is appropriate to prevent evasion of such order or finding. As discussed below, Domestic Producers provided evidence with respect to these criteria.

A. Merchandise of the Same Class or Kind

Domestic Producers claim that CRS exported to the United States is the same class or kind as that covered by the *Orders* in these inquiries.[21] Domestic Producers provided evidence to show that the merchandise from Vietnam enters the United States under the same tariff classification as subject merchandise.[22]

B. Completion of Merchandise in a Foreign Country

Domestic Producers note that section 781(b)(l)(B)(ii) of the Act requires that ''the Department must also determine whether, prior to importation into the United States, the merchandise in the third country is completed from merchandise produced in the country subject to the antidumping or countervailing duty order.'' [23] Domestic Producers presented evidence showing after the publication of the preliminary affirmative CVD determination in December 2015, how the imports of CRS from Vietnam to the United States more than tripled than the previous two years combined. Additionally, Domestic Producers provide evidence that no capacity currently exists in Vietnam to produce HRS and, thus, they contend any CRS manufactured in Vietnam must use imported HRS.[24] Domestic Producers also provide information reflecting that imports into the United States of CRS from the PRC significantly decreased after the imposition of the *Orders,* and imports into the United States of CRS from Vietnam, as well as imports into Vietnam of Chinese HRS, also increased significantly.[25] Finally, Domestic Producers state that Minmetals, a U.S. trading company, currently has arrangements to ship HRS from the PRC to Vietnam and convert

and 1 percent to 1.8 percent, inclusive, manganese; or (iv) 0.9 percent to 1.2 percent, inclusive, chromium and 0.9 percent to 1.4 percent, inclusive, molybdenum; or (v) not less than 0.5 percent carbon and not less than 3.5 percent molybdenum; or (vi) not less than 0.5 percent carbon and not less than 5.5 percent tungsten.

[18] Silico-manganese steel is defined as steels containing by weight: (i) Not more than 0.7 percent of carbon; (ii) 0.5 percent or more but not more than 1.9 percent of manganese, and (iii) 0.6 percent or more but not more than 2.3 percent of silicon.

[19] *Grain-Oriented Electrical Steel From Germany, Japan, and Poland: Final Determinations of Sales at Less Than Fair Value and Certain Final Affirmative Determination of Critical Circumstances,* 79 FR 42,501, 42,503 (Dep't of Commerce, July 22, 2014). This determination defines grain-oriented electrical steel as ''a flat-rolled alloy steel product containing by weight at least 0.6 percent but not more than 6 percent of silicon, not more than 0.08 percent of carbon, not more than 1.0 percent of aluminum, and no other element in an amount that would give the steel the characteristics of another alloy steel, in coils or in straight lengths.''

[20] *Non-Oriented Electrical Steel From the People's Republic of China, Germany, Japan, the Republic of Korea, Sweden, and Taiwan: Antidumping Duty Orders,* 79 FR 71,741, 71,741–42 (Dep't of Commerce, Dec. 3, 2014). The orders define NOES as ''cold-rolled, flat-rolled, alloy steel products, whether or not in coils, regardless of width, having an actual thickness of 0.20 mm or more, in which the core loss is substantially equal in any direction of magnetization in the plane of the material. The term 'substantially equal' means that the cross grain direction of core loss is no more than 1.5 times the straight grain direction (*i.e.,* the rolling direction) of core loss. NOES has a magnetic permeability that does not exceed 1.65 Tesla when tested at a field of 800 A/m (equivalent to 10 Oersteds) along (*i.e.,* parallel to) the rolling direction of the sheet (*i.e.,* B800 value). NOES contains by weight more than 1.00 percent of silicon but less than 3.5 percent of silicon, not more than 0.08 percent of carbon, and not more than 1.5 percent of aluminum. NOES has a surface oxide coating, to which an insulation coating may be applied.''

the HRS to CRS for export to the United States with the purpose of evading the *Orders.*[26]

C. Minor or Insignificant Process

Domestic Producers maintain that the process for completing CRS from HRS is minor or insignificant. Under section 781(b)(2) of the Act, the Department considers five factors to determine whether the process of assembly or completion is minor or insignificant. Domestic Producers allege that the production of HRS in the PRC, which is subsequently further processed into CRS in Vietnam, comprises the majority of the value associated with the merchandise imported into the United States, and that the processing of HRS into CRS in Vietnam adds relatively little value.

(1) Level of Investment

Domestic Producers contend that the level of investment necessary to construct a factory which can produce CRS from HRS in Vietnam is insignificant. In support of its contention, Domestic Producers compare the investment necessary to install a re-rolling facility with the investment necessary to produce HRS using a fully-integrated production process for melting iron and making steel.[27] Domestic Producers estimate that the investment necessary to construct a re-rolling facility in Vietnam that uses HRS substrate to produce CRS would be between $28 million at $70 million.[28] In contrast, Domestic Producers estimate that the investment necessary to construct a fully integrated steel production facility, including a blast furnace and basic oxygen furnace, in the PRC would be between $295 million and $10.1 billion.[29] Domestic Producers also argue that using investment levels in the PRC for a basic steel making, including a blast furnace and basic oxygen furnace, as opposed to an electric arc furnace, is appropriate as approximately 90 percent of the steel production in the PRC comes from fully integrated steel mills.[30]

(2) Level of Research and Development

Domestic Producers assert that the level of research and development in Vietnam is either minimal or non-existent. Domestic Producers state that Vietnam is importing technology from other sources, rather than developing its own technology.[31] As an example of the importation of technology into Vietnam, Domestic Producers provided evidence that ''Dong A, a Vietnamese steel company, recently announced that it is installing European and Japanese equipment in a new facility that includes a pickling line and a cold-rolling mill.'' [32]

(3) Nature of Production Process

According to Domestic Producers, the production process undertaken by Vietnamese producers of CRS is less complex than steelmaking, and minimal in nature.[33] Citing to a report from the ITC,[34] Domestic Producers describe the process to produce HRS as consisting of three distinct states: Melting and refining, casting molten steel into semi-finished forms, and hot-rolling the semi-finished forms into HRS.[35] In contrast, Domestic Producers provide information indicating that the production of CRS from HRS involves only cleaning and pickling, rolling, annealing, and tempering.[36]

(4) Extent of Production Facilities in Vietnam

Domestic Producers provide information indicating that production facilities in Vietnam are more limited compared to facilities in the PRC.[37] As noted above, Domestic Producers maintain that Vietnam has no HRS capacity. Domestic Producers claim that Vietnam has fewer than a dozen large producers of flat steel products. Moreover, Domestic Producers indicate that Vietnam has limited production facilities that would allow for production of CRS to support the significant increase of imports into the United States from Vietnam.[38]

(5) Value of Processing in Vietnam

Domestic Producers assert that producing HRS in the PRC accounts for a large percentage of the total value of CRS that is produced in Vietnam using HRS from the PRC. Using information from the recent CRS investigation by the ITC, Domestic Producers state that the price of HRS is consistently between 80 percent and 90 percent of the value of CRS.[39] Using another approach, focusing solely on the cost of production in Vietnam, Domestic Producers estimate that the cost of manufacture for the CRS operations value added in Vietnam is less than ten percent.[40] As noted above, Domestic Producers argue that the vast majority of the processing and value of CRS comes from HRS. The value of processing CRS in Vietnam is a minor part of the total cost of manufacture, unlikely to exceed 20 percent of the total value. Thus, the value of the merchandise produced in China is estimated to be at least 80 percent of the total value of the merchandise shipped to the United States.[41]

D. Additional Factors To Consider in Determining Whether Action Is Necessary

Section 781(b)(3) of the Act directs the Department to consider additional factors in determining whether to include merchandise assembled or completed in a foreign country within the scope of the order, such as: ''(A) the pattern of trade, including sourcing patterns, (B) whether the manufacturer or exporter of the merchandise . . . is affiliated with the person who uses the merchandise. . . to assemble or complete in the foreign country the merchandise that is subsequently imported into the United States, and (C) whether imports into the foreign country of the merchandise. . . have increased after the initiation of the investigation which resulted in the issuance of such order or finding.''

(1) Pattern of Trade

Domestic Producers provide information reflecting that at the time the petitions were filed for the original investigations of CRS from the PRC, Vietnam was not a source of U.S. imports of CRS in 2014. Domestic

[41] *See* Kelley Drye Request, at 19.

Producers provide information reflecting imports of CRS from Vietnam to the United States through July 2015 were low.[42] However, subsequent to the preliminary injury determination by the ITC, the final quarter of 2015 saw increased imports of CRS from Vietnam to the United States.[43] Domestic Producers provide information demonstrating that after the Department's preliminary affirmative CVD determination for CRS from the PRC in December 2015, imports of CRS from Vietnam into the United States surged dramatically.[44] Domestic Producers further provide evidence that imports of CRS from the PRC to the United States decreased substantially over the same time period.[45] No other factual information on the record contradicts this claim.

(2) Affiliation

Domestic Producers have not provided any allegation of affiliation between producers of HRS in the PRC and producers of CRS in Vietnam.

(3) Increase of HRS Shipments From the PRC to Vietnam After Initiations of the AD and CVD Investigations of CRS From the PRC

Domestic Producers presented evidence indicating that imports of HRS from the PRC to Vietnam have increased since the initiation of the investigations of CRS from the PRC.[46] No other factual information on the record contradicts this claim.

Analysis of the Allegations

Based on our analysis of Domestic Producers anti-circumvention allegations and the information provided therein, the Department determines that anti-circumvention inquiries of the AD and CVD orders on CRS from the PRC are warranted.

With regard to whether the merchandise from Vietnam is of the same class or kind as the merchandise produced in the PRC, Domestic Producers presented information to the Department indicating that, pursuant to section 781(b)(1)(A) of the Act, the merchandise being produced in and/or exported from Vietnam is of the same class or kind as CRS produced in the PRC, which is subject to the *Orders.*[47] Consequently, the Department finds that Domestic Producers provided sufficient information in their requests regarding the class or kind of merchandise to support the initiation of these anti-circumvention inquiries.

With regard to completion or assembly of merchandise in a foreign country, pursuant to section 781(b)(1)(B) of the Act, Domestic Producers also presented information to the Department indicating that the CRS exported from Vietnam to the United States is produced in Vietnam using HRS from the PRC.[48] We find that the information presented by Domestic Producers regarding this criterion supports its request to initiate these anti-circumvention inquiries.

The Department finds that Domestic Producers sufficiently addressed the factors described in section 781(b)(1)(C) and 781(b)(2) of the Act regarding whether the process of assembly or completion of CRS in Vietnam is minor or insignificant. In particular, information in Domestic Producers' submission indicates that: (1) The level of investment in re-rolling facilities is minimal when compared with the level of investment for basic steel making facilities; (2) there is little or no research and development taking place in Vietnam; (3) the CRS production processes involve the simple processing of HRS from a country subject to the *Orders;* (4) the CRS production facilities in Vietnam are more limited compared to facilities in the PRC; and (5) the value of the processing performed in Vietnam is a small proportion of the value of the CRS imported into the United States, as the production of HRS in the PRC accounts for 80 to 90 percent of the value of finished CRS.

With respect to the value of the merchandise produced in the PRC, pursuant to section 781(b)(1)(D) of the Act, Domestic Producers relied on published sources, a simulated cost structure for producing CRS in Vietnam, and arguments in the ''minor or insignificant process'' portion of its anti-circumvention allegation to indicate that the value of the key material, HRS, produced in the PRC may be significant relative to the total value of the CRS exported to the United States. We find that this information adequately meets the requirements of this factor, as discussed above, for the purposes of initiating these anti-circumvention inquiries.

Finally, with respect to the additional factors listed under section 781(b)(3) of the Act, we find that Domestic Producers presented evidence indicating that shipments of CRS from Vietnam to the United States increased since the imposition of the *Orders* and that shipments of HRS from the PRC to Vietnam also increased since the *Orders* took effect, further supporting initiation of these anti-circumvention inquiries. Accordingly, we are initiating a formal anti-circumvention inquiry concerning the AD and CVD Orders on CRS from the PRC, pursuant to section 781(b) of the Act.

In connection with these anti-circumvention inquiries, in order to determine, (1) the extent to which PRC-sourced HRS is further processed into CRS in Vietnam before shipment to the United States, (2) the extent to which a country-wide finding applicable to all exports might be warranted, as alleged by Domestic Producers, and (3) whether the process of turning PRC-sourced HRS into CRS is minor or insignificant, the Department intends to issue questionnaires to solicit information from interested parties. The Department intends to issue questionnaires to solicit information from the Vietnamese producers and exporters concerning their shipments of CRS to the United States and the origin of the imported HRS being processed into CRS. A company's failure to respond completely to the Department's requests for information may result in the application of partial or total facts available, pursuant to section 776(a) of the Act, which may include adverse inferences, pursuant to section 776(b) of the Act.

While we believe sufficient factual information has been submitted by Domestic Producers supporting their request for inquiries, we do not find that the record supports the simultaneous issuance of a preliminary ruling. Such inquiries are by their nature typically complicated and can require information regarding production in both the country subject to the order and the third country completing the product. As noted above, the Department intends to request additional information regarding the statutory criteria to determine whether shipments of CRS from Vietnam are circumventing the AD and CVD orders on CRS from the PRC. Thus, with further development of the record required before a preliminary ruling can be issued, the Department does not find it appropriate to issue a preliminary ruling at this time.

Notification to Interested Parties

In accordance with 19 CFR 351.225(e), the Department finds that the issue of whether a product is

included within the scope of an order cannot be determined based solely upon the application and the descriptions of the merchandise. Accordingly, the Department will notify by mail all parties on the Department's scope service list of the initiation of these anti-circumvention inquiries. In addition, in accordance with 19 CFR 351.225(f)(1)(i) and (ii), in this notice of initiation issued under 19 CFR 351.225(e), we have included a description of the product that is the subject of these anti-circumvention inquiries (*i.e.,* CRS that contains the characteristics as provided in the scope of the *Orders*) and an explanation of the reasons for the Department's decision to initiate an anti-circumvention inquiry, as provided above.

In accordance with 19 CFR 351.225(l)(2), if the Department issues a preliminary affirmative determination, we will then instruct U.S. Customs and Border Protection to suspend liquidation and require a cash deposit of estimated antidumping and countervailing duties, at the applicable rate, for each unliquidated entry of the merchandise at issue, entered or withdrawn from warehouse for consumption on or after the date of initiation of the inquiry. The Department will establish a schedule for questionnaires and comments on the issues. In accordance with section 781(f) of the Act and 19 CFR 351.225(f)(5), the Department intends to issue its final determination within 300 days of the date of publication of this initiation.

This notice is published in accordance with 19 CFR 351.225(f).

Dated: November 4, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Welded Stainless Pressure Pipe From India: Antidumping Duty and Countervailing Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: Based on affirmative final determinations by the Department of Commerce (''Department'') and the International Trade Commission (''ITC''), the Department is issuing antidumping duty (''AD'') and countervailing duty (''CVD'') orders on welded stainless pressure pipe (''WSPP'') from India.

DATES: Effective November 17, 2016.

FOR FURTHER INFORMATION CONTACT: Alex Rosen at (202) 482–7814 or Mandy Mallot at (202) 482–6430, AD/CVD Operations, Office III, Enforcement and Compliance, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

In accordance with sections 705(d) and 735(d) of the Tariff Act of 1930, as amended (''Act''), on September 29, 2016, the Department published its affirmative final determination of sales at less than fair value (''LTFV'') and its affirmative final determination that countervailable subsidies are being provided to producers and exporters of WSPP from India.[1] On November 9, 2016, the ITC notified the Department of its final affirmative determination that an industry in the United States is materially injured by reason of LTFV imports and subsidized imports of WSPP from India, within the meaning of sections 735(b)(1)(A)(i) and 705(b)(1)(A)(i) of the Act.[2]

Scope of the Orders

The merchandise covered by these orders is circular welded austenitic stainless pressure pipe not greater than 14 inches in outside diameter. For purposes of this scope, references to size are in nominal inches and include all products within tolerances allowed by pipe specifications. This merchandise includes, but is not limited to, the American Society for Testing and Materials (''ASTM'') A–312 or ASTM A–778 specifications, or comparable domestic or foreign specifications. ASTM A–358 products are only included when they are produced to meet ASTM A–312 or ASTM A–778 specifications, or comparable domestic or foreign specifications.

Excluded from the scope are: (1) Welded stainless mechanical tubing, meeting ASTM A–554 or comparable domestic or foreign specifications; (2) boiler, heat exchanger, superheater, refining furnace, feedwater heater, and condenser tubing, meeting ASTM A–249, ASTM A–688 or comparable domestic or foreign specifications; and (3) specialized tubing, meeting ASTM A–269, ASTM A–270 or comparable domestic or foreign specifications.

The subject imports are normally classified in subheadings 7306.40.5005, 7306.40.5040, 7306.40.5062, 7306.40.5064, and 7306.40.5085 of the Harmonized Tariff Schedule of the United States (''HTSUS''). They may also enter under HTSUS subheadings 7306.40.1010, 7306.40.1015, 7306.40.5042, 7306.40.5044, 7306.40.5080, and 7306.40.5090. The HTSUS subheadings are provided for convenience and customs purposes only; the written description of the scope of these orders is dispositive.

Antidumping Duty Order

In accordance with sections 735(b)(1)(A)(i) and 735(d) of the Act, the ITC has notified the Department of its final determination that an industry in the United States is materially injured by reason of imports of WSPP that are subsidized by the government of India and sold in the United States at LTFV. Therefore, in accordance with section 735(c)(2) of the Act, we are publishing this antidumping duty order. Because the ITC determined that imports of WSPP from India are materially injuring a U.S. industry, unliquidated entries of such merchandise from India, entered or withdrawn from warehouse for consumption, are subject to the assessment of antidumping duties.

In accordance with section 736(a)(1) of the Act, the Department will direct U.S. Customs and Border Protection (''CBP'') to assess, upon further instruction by the Department, antidumping duties equal to the amount by which the normal value of the merchandise exceeds the export price (or constructed export price) of the merchandise, for all relevant entries of WSPP from India. Antidumping duties will be assessed on unliquidated entries of WSPP from India entered, or withdrawn from warehouse, for consumption on or after May 10, 2016, the date of publication of the *AD Preliminary Determination,*[3] but will not include entries occurring after the expiration of the provisional measures period and before publication of the

[1] *See Welded Stainless Pressure Pipe from India: Final Determination of Sales at Less Than Fair Value,* 81 FR 66921 (September 29, 2016) (''*AD Final Determination*''). *See also Countervailing Duty Investigation of Welded Stainless Pressure Pipe from India: Final Affirmative Determination,* 81 FR 66925 (September 29, 2016) (''*CVD Final Determination*'').

[2] *See* Letter to Christian Marsh, Deputy Assistant Secretary, from Irving Williamson, Chairman of the U.S. International Trade Commission, regarding antidumping and countervailing duty investigations concerning imports of welded stainless pressure pipe from India (Investigation Nos 701–TA–548 and 731–TA–1298), dated November 9, 2016 (''ITC Letter'').

[3] *See Welded Stainless Pressure Pipe from India: Affirmative Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination,* 81 FR 28824 (May 10, 2016) (''*AD Preliminary Determination*'').

ITC's final injury determination, as further described below.

Provisional Measures (AD)

Section 733(d) of the Act states that instructions issued pursuant to an affirmative preliminary determination may not remain in effect for more than four months, except where exporters representing a significant proportion of exports of the subject merchandise request the Department to extend that four-month period to no more than six months. At the request of exporters that account for a significant proportion of WSPP from India, the Department extended the four-month period to six months.[4] In the underlying investigation, the Department published the *AD Preliminary Determination* on May 10, 2016.[5] Therefore, the extended period, beginning on the date of the publication of the *AD Preliminary Determination,* ended on November 5, 2016. Furthermore, section 737(b) of the Act states that definitive duties are to begin on the date of publication of the ITC's final injury determination.

Therefore, in accordance with section 733(d) of the Act and our practice,[6] we will instruct CBP to terminate the suspension of liquidation and to liquidate, without regard to antidumping duties, unliquidated entries of WSPP from India entered, or withdrawn from warehouse, for consumption after November 5, 2016, until and through the day preceding the date of publication of the ITC's final injury determination in the **Federal Register**. Suspension of liquidation will resume on the date of publication of the ITC's final determination in the **Federal Register**.

Continuation of Suspension of Liquidation (AD)

In accordance with section 735(c)(1)(B) of the Act, we will instruct CBP to continue to suspend liquidation on entries of subject merchandise from India. These instructions suspending liquidation will remain in effect until further notice.

We will also instruct CBP to require cash deposits equal to the amounts as indicated below, except for Sunrise Stainless Pvt. Ltd. and Sun Mark Stainless Pvt. Ltd. (collectively, ''Sunrise Group''), which are adjusted for certain countervailable subsidies, where appropriate, as described below.[7] Because Sunrise Group has an estimated weighted-average final dumping margin of zero, we are directing CBP to terminate suspension of liquidation of entries of WSPP produced and exported by this entity. In addition, subject merchandise produced and exported by Sunrise Group will be excluded from the antidumping duty order. Accordingly, effective on the date of publication of the ITC's final affirmative injury determination, CBP will require, at the same time as importers would normally deposit estimated duties on this subject merchandise, a cash deposit equal to the estimated duties on this subject merchandise, a cash deposit equal to the estimated weighted-average dumping margins listed below. The ''All Others'' rate applies to all exporters of subject merchandise not specifically listed. For the purpose of determining cash deposit rates, the estimated weighted-average dumping margins for imports of subject merchandise have been adjusted, as appropriate, for export subsidies found in the final determination of the companion countervailing duty investigation of this merchandise.[8]

Estimated Weighted-Average Antidumping Duty Margin

The weighted-average antidumping duty margin percentages are as follows:

Exporter/producer	Weighted-average margin (%)	Cash-deposit rate (%)
Steamline Industries Ltd	12.66	10.17
All Others	12.66	8.35

Countervailing Duty Order

In accordance with sections 705(b)(1)(A)(i) and 705(d) of the Act, the ITC notified the Department of its final determination that the industry in the United States producing WSPP is materially injured by reason of subsidized imports of WSPP from India.[9] Therefore, in accordance with section 705(c)(2) and 706(a) of the Act, we are publishing this countervailing duty order.

Pursuant to section 706(a) of the Act, the Department will direct CBP to assess, upon further instruction by the Department, countervailing duties on unliquidated entries of WSPP entered, or withdrawn from warehouse, for consumption on or after March 11, 2016, the date on which the Department published its affirmative preliminary countervailing duty determination in the **Federal Register**,[10] and before July 9, 2016, the effective date on which the Department instructed CBP to discontinue the suspension of liquidation in accordance with section 703(d) of the Act.[11] Section 703(d) of the Act states that the suspension of liquidation pursuant to a preliminary determination may not remain in effect for more than four months. Therefore, entries of WSPP made on or after July 9, 2016, and prior to the date of publication of the ITC's final determination in the **Federal Register** are not liable for the assessment of countervailing duties, due to the Department's discontinuation, effective July 9, 2016, of the suspension of liquidation.

Suspension of Liquidation (CVD)

In accordance with section 706 of the Act, the Department will direct CBP to reinstitute suspension of liquidation, effective on the date of publication of the ITC's notice of final determination in the **Federal Register**, and to assess, upon further instruction by the Department pursuant to section 706(a)(1) of the Act, countervailing

duties for each entry of the subject merchandise in an amount based on the net countervailable subsidy rates for the subject merchandise. The Department will also direct CBP to require a cash deposit for each entry of subject merchandise in an amount equal to the net countervailable subsidy rates listed below. The all-others rate applies to all producers and exporters of subject merchandise not specifically listed.

Exporter/producer	Subsidy rate (%)
Steamline Industries Limited	3.13
Sunrise Stainless Private Limited/Sun Mark Stainless Pvt. Ltd./Shah Foils Ltd.[12]	6.22
All-Others	4.65

Notification to Interested Parties

This notice constitutes the AD and CVD orders with respect to WSPP from India pursuant to sections 736(a) and 706(a) of the Act. Interested parties can find an updated list of orders currently in effect by either visiting *http://enforcement.trade.gov/stats/iastats1.html* or by contacting the Department's Central Records Unit, Room B8024 of the main Commerce Building.

These orders are published in accordance with sections 706(a), 736(a), and 777(i) of the Act, and 19 CFR 351.211(b).

Dated: November 14, 2016.

Glycine From the People's Republic of China: Initiation of Antidumping Duty Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: In response to a request from Salvi Chemical Industries Ltd. (Salvi), the Department of Commerce (the Department) is initiating a changed circumstances review of the antidumping duty order on glycine from the People's Republic of China (PRC).

DATES: Effective November 17, 2016.

FOR FURTHER INFORMATION CONTACT: Dena Crossland or Brian Davis, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–3362 or (202) 482–7924, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 18, 2016, the Department received a request from Salvi to initiate a changed circumstances review in order for the Department to determine that the glycine produced by Salvi is no longer processed from PRC-origin glycine.[1] Additionally, Salvi requests that the Department determine that importers of glycine from Salvi are eligible to participate in a certification process.[2] Salvi refers to an anti-circumvention inquiry, where the Department determined that Salvi was processing Chinese glycine, and that glycine processed in India of Chinese origin does not change country of origin, and, therefore, Salvi had circumvented the *Order*.[3] As part of our determination, we stated that Salvi could not take part in a certification process, whereby Salvi's importers could certify that they had not imported Chinese-origin glycine and would not be subject to the antidumping duty rate for Chinese glycine.[4] This certification process was established to ensure that merchandise entering the United States from India was properly identified as subject or non-subject merchandise. However, we also stated that Salvi could request an administrative review or a changed circumstances review to show that it is no longer processing PRC-glycine and exporting such glycine from India.[5] If the Department determined that Salvi is no longer processing PRC-origin glycine, and instead is producing glycine from raw materials of non-PRC origin, the Department could allow the importers of Salvi's product to certify that the glycine being produced and exported is not processed PRC-origin glycine.[6]

On July 26, 2016, the Department received comments from domestic interested party, GEO Specialty Chemicals, Inc. (GEO), regarding Salvi's request.[7] On August 29, 2016, we extended the deadline to initiate until October 17, 2016, in order to collect information and legible exhibits from Salvi, because it did not submit a sufficient response, and to consider interested parties' comments.[8] On September 9, 2016, we issued a questionnaire to Salvi, to which it responded on September 26, 2016.[9] On October 6, 2016, GEO submitted comments on Salvi's questionnaire response.[10] On October 13, 2016, we determined that we had a sufficient request from Salvi and that the deadline for initiating a changed circumstances review should be November 10, 2016.[11] On October 20, 2016, Salvi placed on the record certain information issued by the Department in the recently completed 2014–2015 administrative review under this antidumping duty order.[12] On October 27, 2016, GEO

provided comments on Salvi's October 20, 2016 submission.[13]

Scope of the Order

The product covered by this antidumping duty order is glycine, which is a free-flowing crystalline material, like salt or sugar. Glycine is produced at varying levels of purity and is used as a sweetener/taste enhancer, a buffering agent, reabsorbable amino acid, chemical intermediate, and a metal complexing agent. This proceeding includes glycine of all purity levels. Glycine is currently classified under subheading 2922.49.4020 of the Harmonized Tariff Schedule of the United States (HTSUS).[14] Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the merchandise under the order is dispositive.[15]

Initiation of Changed Circumstances Review

Pursuant to section 751(b)(1) of the Tariff Act of 1930, as amended (the Act), the Department will conduct a changed circumstances review upon receipt of information concerning, or a request from an interested party of, an antidumping duty order which shows changed circumstances sufficient to warrant a review of the order. In accordance with 19 CFR 351.216(d), based on the information provided by Salvi, the Department finds that there is sufficient information to initiate a changed circumstances review. Therefore, we are initiating a changed circumstances review pursuant to section 751(b)(1) of the Act and 19 CFR 351.216(d) to determine whether Salvi is no longer processing PRC-origin glycine, and instead is producing glycine from raw materials of non-PRC origin, and whether it should be able to participate in the certification process described in the Final Scope Ruling. The Department intends to publish in the **Federal Register** a notice of preliminary results of the antidumping duty changed circumstances review in accordance with 19 CFR 351.221(b)(4) and 19 CFR 351.221(c)(3)(i), which will set forth the Department's preliminary factual and legal conclusions. The Department will issue its final results of review in accordance with the time limits set forth in 19 CFR 351.216(e).

This notice is in accordance with section 751(b)(1) of the Act.

Dated: November 10, 2016.

Christian Marsh,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Green Sturgeon ESA 4(d) Rule Take Exceptions and Exemptions.

OMB Control Number: 0648–0613.

Form Number(s): None.

Type of Request: Regular (extension of a currently approved information collection).

Number of Respondents: 46.

Average Hours per Response: Written notification describing research, monitoring or habitat restoration activities, 40 hours; development of fisheries management and evaluation plans or state 4(d) research programs, 40 hours; reports, 5 hours; development of a tribal fishery management plan, 20 hours.

Burden Hours: 1,760.

Needs and Uses: This request is for an extension of a currently approved information collection.

The Southern Distinct Population Segment of North American green sturgeon (*Acipenser medirostris;* hereafter, ''Southern DPS'') was listed as a threatened species in April 2006. Protective regulations under section 4(d) of the ESA were promulgated for the species on June 2, 2010 (75 FR 30714) (the final ESA 4(d) Rule). To comply with the ESA and the protective regulations, entities must obtain take authorization prior to engaging in activities involving take of Southern DPS fish unless the activity is covered by an exception or exemption. Certain activities described in the ''exceptions'' provision of 50 CFR 223.210(b) are not subject to the take prohibitions if they adhere to specific criteria and reporting requirements. Under the ''exemption'' provision of 50 CFR 223.210(c), the take prohibitions do not apply to scientific research, scientific monitoring, and fisheries activities conducted under an approved 4(d) program or plan; similarly, take prohibitions do not apply to tribal resource management activities conducted under a Tribal Plan for which the requisite determinations described in 50 CFR 223.102(c)(3) have been made.

To ensure that activities qualify under exceptions to or exemptions from the take prohibitions, local, state, and federal agencies, non-governmental organizations, academic researchers, and private organizations are asked to voluntarily submit detailed information regarding their activity on a schedule to be determined by National Marine Fisheries Service (NMFS) staff. This information is used by NMFS to (1) track the number of Southern DPS fish taken as a result of each action; (2) understand and evaluate the cumulative effects of each action on the Southern DPS; and (3) determine whether additional protections are needed for the species, or whether additional exceptions may be warranted. NMFS designed the criteria to ensure that plans meeting the criteria would adequately limit impacts on threatened Southern DPS fish, such that additional protections in the form of a federal take prohibition would not be necessary and advisable.

Affected Public: Not-for-profit institutions; State, Local, or Tribal government; business or other for-profit organizations.

Frequency: On occasion, annually and biennially.

Respondent's Obligation: Required to obtain or retain benefits.

This information collection request may be viewed at *reginfo.gov.* Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395–5806.

Dated: November 14, 2016.

Sarah Brabson,

NOAA PRA Clearance Officer.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XF031

Revised National Environmental Policy Act Implementing Procedures

AGENCY: National Oceanic and Atmospheric Administration, Department of Commerce.

ACTION: Notice of availability; request for comments.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA) publishes this notice to request comments on its draft Companion Manual to NOAA Administrative Order NAO 216–6A (''Companion Manual'') containing policy and procedures for implementing the National Environmental Policy Act (NEPA) and related authorities. Included in the Companion Manual are NOAA's proposed revised categorical exclusions (CE) and related extraordinary circumstances. Pursuant to Council on Environmental Quality (CEQ) regulations, NOAA is soliciting comments on its proposed procedures from members of the interested public. Additionally, in this notice, NOAA is providing a synopsis of the proposed changes to NOAA's CEs to assist the public in reviewing those changes.

DATES: Comments on the revised NEPA procedures must be received by December 19, 2016.

ADDRESSES: Comments on NOAA's proposed NEPA procedures may be submitted through one of these methods: (1) *Electronic Submission of Comments:* Submit electronic comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-HQ-2016-0145,* click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments; (2) *Mail:* Send to NOAA NEPA Coordinator, Attention Katherine Renshaw, 1315 East-West Highway, Room 15132, Silver Spring, MD 20910.

Instructions: NOAA may not consider comments if they are sent by any other method, to any other address or individual, or received after the comment period ends. All comments received are a part of the public record and NOAA will generally post for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender is publicly accessible. NOAA will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous). NOAA will make this notice and the draft Companion Manual available online for public inspection at *http://www.nepa.noaa.gov.*

FOR FURTHER INFORMATION CONTACT: Please send questions by email to *noaa.nepa@noaa.gov;* or contact Rachel Lipsy at 301–427–8247.

SUPPLEMENTARY INFORMATION:

Background

NEPA (42 U.S.C. 4321 *et seq.*) declares a national policy to promote efforts that will prevent or eliminate damage to the environment, stimulate the health and welfare of man, and enrich the understanding of the ecological systems and natural resources important to the United States. NEPA also established the CEQ to, among other things, analyze and interpret environmental trends and information, to review and appraise programs and activities of the Federal government in light of NEPA's purpose, and to develop policies to promote the improvement of environmental quality. As part of these responsibilities, the CEQ promulgated regulations to implement NEPA (*see* 40 CFR part 1500 *et seq.*). Those regulations direct Federal agencies to adopt procedures for implementing NEPA and to review and revise those policies and procedures as necessary to ensure full compliance with the purposes and provisions of NEPA.

NEPA and the CEQ implementing regulations provide for environmental review of a proposed government action in the form of an Environmental Assessment (EA), Environmental Impact Statement (EIS), or Categorical Exclusion (CE). A CE is ''a category of actions which do not individually or cumulatively have a significant effect on the human environment,'' and, based on the agency's past experience, does not require further NEPA review in the form of either an EA or EIS. *See* 40 CFR 1508.4, CEQ, ''Final Guidance for Federal Departments and Agencies on Establishing, Applying, and Revising Categorical Exclusions Under the National Environmental Policy Act'' (75 FR 75628; December 6, 2010). A CE does not exempt an action from NEPA review; rather, it is one form of environmental review under NEPA. *See* 75 FR 75631. A CE may be applied to a proposed action after the decision maker has carefully reviewed the description of the action and determined that it fits within the category of actions encompassed by the CE. *See* 40 CFR 1508.4. In making this determination, the decision maker must also consider whether extraordinary circumstances apply, which would lead to a normally categorically excluded action to have the potential for significant impacts. Thus, a CE does not eliminate environmental review of a proposed action but reduces paperwork and delay and allows an agency to efficiently focus its resources on proposed actions with the potential for significant environmental effects.

On April 22, 2016, NOAA issued NOAA Administrative Order 216–6A (NAO 216–6A), which updated NOAA's policy for compliance with NEPA, the CEQ NEPA regulations, and other related authorities, including Executive Order (EO) 12114, *Environmental Effects Abroad of Major Federal Actions;* EO 11988, *Floodplain Management;* and EO 11990, *Protection of Wetlands.* The NAO authorized the development of a Companion Manual entitled *Policy and Procedures for Compliance with the National Environmental Policy Act and Related Authorities* (''Companion Manual''). The draft Companion Manual includes NOAA's proposed revised CEs as an appendix. NAO 216–6A superseded NOAA Administrative Order NAO 216–6 dated May 20, 1999 (1999 NAO), with the exception of those provisions implementing CEQ regulation 40 CFR 1507.3(b), including the NOAA's CEs and related provision for extraordinary circumstances. Those provisions temporarily remain in effect until superseded by revised CEs and the authorized Companion Manual. Additionally, the National Marine Fisheries Service's February 23, 2016 supplement to NAO 216–6, entitled ''Revised and Updated NEPA Procedures for Magnuson-Stevens Fishery Management Actions,'' remains in effect. The supplement sets forth the policies and procedures for NEPA compliance for such actions. For convenience, the supplement is reproduced as Appendix C to the Companion Manual. Decision makers for such actions may also consider and apply the guidance in the Companion Manual to the extent it is consistent with the policies and procedures in the supplement.

Process

NOAA last updated its NEPA Procedures in 1999. In order to ensure that its procedures, including CEs and

extraordinary circumstances, remain appropriate to ensure full compliance with the purposes and provisions of NEPA, NOAA began an extensive review process. As part of its process for revising the agency's NEPA procedures, NOAA convened a Working Group composed of representatives across NOAA's Staff and Line Offices. The Working Group members conducted significant scoping within their respective offices to assess the need for revised NEPA procedures, the need for revised CEs, and to gather information relevant to proposed new CEs, including information necessary to support the proposed changes. Throughout the revision process, NOAA also conducted outreach with other agencies with similar missions, and consulted extensively with CEQ. S*ee* 40 CFR 1507.3.

Upon review of NOAA's overall NEPA procedures, the agency determined that its existing procedures would benefit from clarifying revisions and that NOAA's CEs would benefit from revisions to clarify the scope and applicability and that several new CEs were appropriate to improve NEPA review by categorically excluding actions that, based on NOAA's experience, have no potential to significantly impact the human environment. In some instances, NOAA determined that providing additional language to describe the categories of actions covered by an existing CE was necessary to clarify the intended scope of that CE. In other cases, NOAA determined that the scope of a CE was unclear because it covered too many disparate activities with few meaningful limitations. The Working Group determined that breaking out components of these CEs into discrete CEs that accurately described the category of actions to be excluded from further NEPA review and including appropriately limiting language clarified the proper scope and application of the CE for the decision maker. Additionally, NOAA identified CEs that either lacked adequate substantiation or were no longer necessary because of mission changes. Accordingly, NOAA proposes to eliminate these types of CEs.

NOAA proposes to substantiate its new and revised CEs by benchmarking other agencies' CEs, relying on previously implemented actions, and/or relying on the expert opinions of NOAA's professional staff, all of which are methods recommended by CEQ to substantiate proposed new or revised CEs. *See* 75 FR 75633–34. Benchmarking means that NOAA is substantiating a CE based on other agencies' experience with a comparable CE and the administrative record developed by other agencies when they established their own CEs. To ensure the CEs that NOAA proposes to benchmark properly support NOAA's proposed CEs, NOAA analyzed the actions encompassed by other agencies' CEs by considering the characteristics of the actions, methods of implementing the actions, frequency of the actions, applicable standard operating procedures or implementing guidance, and timing and context to determine that the actions analyzed by these agencies are sufficiently similar to those covered by the proposed CE to offer support for NOAA's conclusion that these actions will not result in individually or cumulatively significant impacts on the human environment under normal circumstances.

Additionally, and where appropriate, NOAA relied on its professional staff to analyze the activities encompassed by the proposed CEs and explain the expert's conclusion that those activities have no potential for significant effects on the environment. Finally, NOAA relied on its own experience with previously implemented actions (*e.g.,* EAs that resulted in Findings of No Significant Impacts) to determine that the analyses of those actions and the resulting absence of environmental effects of those actions support the proposed CE.

Synopsis of Proposed Changes to CEs

Applicable Terms

Certain terms appear frequently in the language of NOAA's proposed CEs to limit their scope and ensure they are applied properly and limited to those activities that NOAA has determined have no potential for significant impacts. The following list presents and describes these terms:

(1) ''Previously disturbed ground'' refers to land that has been changed such that its functioning ecological processes have been and remain substantially altered by human activity. The term encompasses areas that have been transformed from natural cover to non-native species or a developed state, including but not limited to, utility and electrical power transmission corridors and rights-of-way, paved and unpaved roads, and construction footprints.

(2) ''Minor'' and ''small-scale'' are terms NOAA considers in the context of the particular proposal, including its proposed location. In assessing whether a proposed action is small, in addition to the actual magnitude of the proposal, NOAA considers factors such as industry norms and the relationship of the proposed action to similar types of development or activity in the vicinity of the proposed action. When considering the size of a proposed facility, for example, NOAA would review the surround land uses, the scale of the proposed action relative to existing development, and the capacity of existing roads and other infrastructure to support the proposed action. When these limiting terms are used within a specific CE, the administrative record for that CE provides further explanation of their meaning in the context of the activity addressed by that CE.

(3) ''Negligible'' refers to a level of impact that is below significant to the point of being hardly detectable. Factors for consideration include: Procedures that employ generally accepted industry standards or best management practices that have been tested and verified at the time an activity is proposed; whether an activity has understood or well-documented impacts at the time an activity is proposed; whether control and quality measures are in place (*e.g.,* monitoring and verification; emergency plans and preparedness); the direct, indirect, and cumulative effects of the proposed activity on a resource; and the context and intensity of expected discharges or deposits and disturbances to resources, like the submerged lands of any sanctuary, corals, and other living, cultural, and historical resources.

Categorical Exclusions

NOAA's proposed revised CEs are organized into eight series, based on the types of activities encompassed by each group. Series A encompasses CEs that pertain to Trust Resource Management Actions. B pertains to Trust Resource Authorization and Permitting Actions. C pertains to Habitat Restoration Actions. D pertains to Additional External Funding. E pertains to Research Actions. F pertains to Real and Personal Property Improvement, Maintenance, and Construction Actions. G pertains to Operational Actions. Finally, H pertains to Acquisition and Leasing Actions.

The following list presents NOAA's proposed CEs, followed by a description of the CE's relationship to the existing CEs from the 1999 NAO and an explanation of how and why a CE was revised or developed.

Trust Resource Management Actions

[A1]. ''An action that is a technical correction or a change to a fishery management action or regulation, which does not result in a substantial change in any of the following: Fishing location, timing, effort, authorized gear types, access to fishery resources or harvest levels.''

NOAA proposes to consolidate components of several CEs from the 1999 NOA: 6.03a.3(b)(1), 6.03a.3(b)(2), 6.03d.4(a), and 6.03d.4(b). NOAA realized in implementing NEPA since 1999 that there were several very similar CEs that frequently served the same purpose. NOAA also determined that it would be most helpful for practitioners to address different types of management plans in separate CEs so that limitations to ensure that the category of actions would not result in significant impacts were appropriate to the types of management plan in place. Accordingly, consolidating these classes of actions into a single CE for fishery management actions and regulations clarified the CE's scope and applicability for decision makers. The proposed revision limits the scope of the CE so that any corrections or changes to which the CE is to be applied may not result in a substantial change in fishing location, timing, effort, authorized gear types, access to fishery resources or harvest levels. The proposed changes and revisions do not result in a substantial change in scope or applicability from the listed CEs in the 1999 NAO.

[A2]. ''Preparation of a recovery plan pursuant to section 4(f)(1) of the ESA. Such plans are advisory documents that provide consultative and technical assistance in recovery planning and do not implement site-specific or species-specific management actions. However, implementation of specific tasks identified in a recovery plan may require an EA or EIS depending on the nature of the action.''

NOAA proposes to revise CE 6.03e.3(a) by adding ''and do not direct site-specific or species-specific management actions'' to the definition of consultative. NOAA's use of the language ''. . . *advisory documents that provide consultative and technical assistance in recovery planning and do not direct site-specific or species-specific management actions. However, implementation of specific tasks identified in a recovery plan may require additional NEPA analysis depending on the nature of the action*'' further clarifies the proper use of the CE and ensures that it is not employed to cover specific management actions. The proposed changes and revisions clarify the scope and applicability of the CE and do not result in any change in scope or applicability from the CE in the 1999 NAO.

[A3.] ''Temporary fishery closures or extensions of closures under section 305(c)(3)(C) of the Magnuson-Stevens Fishery Conservation and Management Act to ensure public health and safety.''

NOAA proposes a new CE to cover temporary fishery closures or extensions of closures under section 305(c)(3)(C) of the Magnuson-Stevens Fishery Conservation and Management Act to ensure public health and safety following a public health emergency or an oil spill.

[A4.] ''Minor updates to existing national marine sanctuary management plans. This CE does not apply to sanctuary designations, expansions, changes in terms of designation, or new sanctuary management plans.''

NOAA proposes to consolidate components of two CEs from the 1999 NOA: 6.03a.3(b)(1) and 6.03a.3(b)(2). NOAA realized in implementing NEPA since 1999 that there were several very similar CEs that frequently served the same purpose. NOAA also determined that discrete CEs with appropriately limiting language specific to different types of management plans would be most helpful to decision makers. Accordingly, consolidating these classes of actions into a single CE for minor updates to existing national marine sanctuary management plans clarified the CE's scope and applicability for decision makers. NOAA proposes to explicitly limit the use of this CE by not allowing the category to be applied to actions that are amendments or changes to a management plan that affect sanctuary boundaries or to new sanctuary management plans. The National Marine Sanctuaries Act (16 U.S.C. 1431 *et seq.*) mandates that the Secretary of Commerce (as delegated to NOAA) prepare an environmental impact statement for sanctuary designations and boundary changes. The proposed changes and revisions do not result in a substantial change in scope or applicability from the listed CEs in the 1999 NAO.

[A5.] ''Updates to existing National Estuarine Research Reserve (NERR) management plans, provided that the update does not change NERR boundaries or add or significantly change allowable uses, uses requiring a permit, or restrictions on uses. This CE does not apply to new NERR management plans, or to the execution of any specific action subsequently funded to support the updated NERR management plan.''

NOAA proposes to consolidate components of two CEs from the 1999 NOA: 6.03a.3(b)(1) and 6.03a.3(b)(2). NOAA realized in implementing NEPA since 1999 that there were several very similar CEs that frequently served the same purpose. NOAA also determined that discrete CEs with appropriately limiting language specific to different types of management plans would be most helpful to decision makers. Accordingly, consolidating these classes of actions into a single CE for updates to existing NERR management plans clarified the CE's scope and applicability for decision makers. The CE is limited so that it may not be applied to actions where the update changes reserve boundaries and the change adds or significantly changes allowable uses requiring a permit, or restrictions on uses. Additionally the CE is limited in that it does not apply to new NERR management plans, or to the execution of any specific action subsequently funded to support the updated NERR management plan. The proposed changes and revisions do not result in a substantial change in scope or applicability from the listed CEs in the 1999 NAO.

[A6.] ''Review and approval of changes to state coastal management programs under the Coastal Zone Management Act (CZMA) § 306(e) (16 U.S.C. 1455(e)) and NOAA's regulations at 15 CFR part 923.''

NOAA proposes to consolidate components of two CEs: 6.03a.3(b)(1) and 6.03a.3(b)(2). NOAA realized in implementing NEPA since 1999 that there were several very similar CEs that frequently served the same purpose. NOAA also determined that discrete CEs with appropriately limiting language specific to different types of management plans would be most helpful to decision makers. Accordingly, consolidating these classes of actions into a single CE for review and approval of changes to state coastal management programs under the CZMA 16 U.S.C. 1455(e) and NOAA's regulations at 15 CFR part 923 clarified the CE's scope and applicability for decision makers. The Working Group determined that these statutory and regulatory limitations appropriately limited the scope of the CE so that activities encompassed by the CE have no potential for significant effects on the environment under normal circumstances.

Trust Resource Authorization and Permitting Actions

[B1.] ''Issuance of permits or permit modifications under section 10(a)(1)(A) of the ESA for take, import, or export of endangered species for scientific purposes or to enhance the propagation or survival of the affected species, or in accordance with the requirements of an ESA section 4(d) regulation for threatened species.''

NOAA proposes to make minor revisions to CE 6.03e.3(b) by adding section 4(d) of the ESA to the text of the CE. The intent and purpose of Sections

10(a)(1)(a) and 4(d) of the ESA to issue permits for scientific or enhancement purposes. The proposed changes and revisions do not result in any change in scope or applicability from the CE in the 1999 NAO.

[B2.] ''Issuance of permits or permit amendments under section 104 of the MMPA for take or import of marine mammals for scientific research, enhancement, commercial or educational photography or public display purposes; and issuance of Letters of Confirmation under the General Authorization for scientific research involving only Level B harassment.''

NOAA proposes to revise CE 6.03f.2(a) by removing section 101(a)(1) of the MMPA from the text of the CE. The reference to section 101(a)(1) was incorrect in the 1999 version and the revision corrects this error. The proposed revision does not result in any change in the scope or applicability of the CE.

[B3.] ''Issuance of, and amendments to, ''low effect'' Incidental Take Permits and their supporting ''low effect'' Habitat Conservation Plans under section 10(a)(1)(B) of the ESA.''

NOAA proposes minor text edits to revise CE 6.03e.3(d) for clarification and readability. The proposed revision does not result in a substantial change on the scope or applicability of the CE.

[B4.] ''Issuance of incidental harassment authorizations under section 101(a)(5)(A) and (D) of the MMPA for the incidental, but not intentional, take by harassment of marine mammals during specified activities and for which no serious injury or mortality is anticipated.''

NOAA proposes to maintain CE 6.03f.2(b) and revise the language to clarify the proper scope and application of the CE. The 1999 NAO included an error that referred to only section 101(a)(5)(A) of the Marine Mammal Protection Act—this error has been corrected in this revision, which now properly refers to both sections 101(a)(5)(A) and 101(a)(5)(D). Additionally, the 1999 version of the CE required authorizations to be ''tiered from a programmatic environmental review'' and this requirement has been removed. NOAA currently reviews small take incidental harassment authorizations under NEPA without the need for a ''tiering'' process. Accordingly, the proposed revision does not result in a substantial change in scope or applicability from the CEs in the 1999 NAO.

NOAA proposes four new CEs—B5, B6, B7, and B8—to cover the issuance of, or amendments to general permits, special use permits, authorizations, and certifications for activities conducted within National Marine Sanctuaries. Previously, NOAA had applied CEs 6.03c.3(a), 6.03c.3(c), 6.03c.3(d), and 6.03c.(3)(i) to address these actions. The Working Group determined that proposing new CEs that specifically encompass the actions described in B5, B6, B7, B8, B9, and B10 clarified the scope and applicability of the CEs for decision makers. Each CE is limited by conditions to ensure that activities encompassed by the CEs have no potential for significant effects on the environment under normal circumstances.

[B5.] ''Issuance of, or amendments to, general permits for activities that are included in established permit categories at 15 CFR part 922 and that meet the regulatory review criteria at 15 CFR part 922, that limit any potential impacts so that the proposed activity will be conducted in a manner compatible with the National Marine Sanctuaries Act's primary objective of resource protection.''

[B6.] ''Issuance of, or amendments to, special use permits for activities in a national marine sanctuary that are necessary to either establish conditions of access to and use of any sanctuary resource or promote public use and understanding of a sanctuary resource and must be conducted in a manner that does not destroy, cause the loss of, or injure sanctuary resources in accordance with the National Marine Sanctuaries Act.''

[B7.] ''Issuance of or amendments to, authorizations for activities allowed by a valid federal, regional, state, local or tribal government approval (*e.g.,* leases, permits and licenses) issued after the effective date of sanctuary designation or expansion, so long as such authorizations are based upon a consideration of the regulatory review criteria at 15 CFR part 922, and will only result in negligible effects to sanctuary resources.''

[B8.] ''Issuance of, or amendments to certifications for pre-existing activities authorized by a valid federal, regional, state, local, or tribal government approval (*e.g.,* leases, permits and licenses) or rights of subsistence use or access in existence on the date of the designation or expansion of any national marine sanctuary where the Office of National Marine Sanctuaries issues terms and conditions that are either ministerial or prescribe avoidance, minimization, or mitigation measures designed to ensure negligible effects to sanctuary resources.''

[B9.] ''Issuance of, or amendments to Papahānaumokuākea Marine National Monument (as established by Presidential Proclamation 8031) permits for activities that are included in established permit categories (50 CFR part 404) and that meet the regulatory review criteria at (50 CFR 404.11), that limit any potential impacts so that the proposed activity will be conducted in a manner compatible with the monument's primary objective of resource protection.''

NOAA proposes a new CE to cover the issuance of, or amendments to Papahānaumokuākea Marine National Monument permits for activities that are included in established permit categories under 50 CFR part 404 and that meet the regulatory review criteria under 50 CFR 404.11.

[B10.] ''Issuance of, or amendments to, Papahānaumokuākea Marine National Monument special ocean use permits for activities or use of the monument that are engaged in to generate revenue or profits for one or more of the persons associated with the activity or use, and do not destroy, cause the loss of, or injure monument resources.''

NOAA proposes a new CE to cover the issuance of, or amendments to Papahānaumokuākea Marine National Monument special ocean use permits for activities or use of the monument that are engaged in to generate revenue or profits for one or more of the persons associated with the activity or use, and do not destroy, cause the loss of, or injure monument resources.

[B11.] ''Issuance of Exempted Fishing Permits (EFPs) under the authority of the Magnuson-Stevens Act and Scientific Research Permits (SRPs) and other permits for research that may impact species regulated under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) and the Atlantic Tunas Convention Act (ATCA). This includes permitted research of limited size, magnitude or duration with negligible individual or cumulative impacts, which requires temporary relief of fishery management regulations.''

NOAA proposes a new CE to cover the issuance of, or amendments to permits or authorizations for activities that are conducted within Marine National Monuments other than Papahānaumokuākea that are limited in scope so that the potential impacts of the proposed activities will be conducted in a manner compatible with a monument's primary objective of resource protection, and do not destroy, cause the loss of, or injure monument resources.

[B12.] ''Issuance of Exempted Fishing Permits (EFPs) under the authority of

the Magnuson-Stevens Act and Scientific Research Permits (SRPs) and other permits for research that may impact species regulated under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) and the Atlantic Tunas Convention Act (ATCA). This includes permitted research of limited size, magnitude or duration with negligible individual or cumulative impacts, which requires temporary relief of fishery management regulations. ''

NOAA proposes a new CE to cover the issuance of Exempted Fishing Permits (EFPs) under the authority of the Magnuson-Stevens Act and Scientific Research Permits (SRPs) and other permits for research that may impact species regulated under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) and the Atlantic Tunas Convention Act (ATCA). These revisions are intended to encompass activities regarding the issuance of EFPs and SRPs for research activities within the scope of the CE and conducted for the benefit of fisheries and the environment.

Habitat Restoration Actions

[C1.] ''Habitat restoration actions, provided that such action: (1) Transplants only organisms currently or formerly present at the site or in its immediate vicinity (if transplant is a component of the action); (2) does not require substantial placement of fill or dredging; (3) does not involve any removal of debris, excavation, or conditioning of soils unless such removal of debris, excavation, or conditioning of soils is geographically limited to the impact area such that site conditions will not impede or negatively alter natural processes, is in compliance with all permit and disposal requirements,), and will not impact critical aquifers or recharge areas; and (4) does not involve an added risk of human or environmental exposure to toxic or hazardous substances, pathogens, or radioactive materials.

Notes: If applicable, limitations and mitigation measures identified in the NOAA Restoration Center Programmatic Environmental Impact Statement for Habitat Restoration Actions must be followed. This CE includes, but is not limited to, response or restoration actions under CERLCA, OPA, or NMSA, if such actions are intended to restore an ecosystem, habitat, biotic community, or population of living resources to a determinable pre-impact condition prior to the incident leading to the response or restoration.''

NOAA proposes to revise the version of CE 6.03b.2 by removing the condition that actions encompassed by this CE ''are intended to restore an ecosystem, habitat, biotic community, or population of living resources to a determinable pre-impact condition.'' NOAA determined that removing the requirement ''(1) are intended to restore an ecosystem, habitat, biotic community, or population of living resources to a determinable pre-impact condition'' clarified the applicability of this CE. Previously, the condition limited the CE's application to circumstances where NOAA was able to determine the pre-impact condition of the resource to be restored and this created confusion as to the scope and applicability of the CE. NOAA also added criteria that limit the scope of the CE. These four limitations were developed and reviewed by the Working Group and included to ensure that this category of actions is properly limited in context and intensity such that there is no potential for individual or cumulative significant effects on the human environment under normal circumstances. Finally, NOAA added the requirement that, if applicable, limitations and mitigation measures identified in the NOAA Restoration Center Programmatic Environmental Impact Statement for Habitat Restoration Actions (June 2015) (RC PEIS) must be followed.

Additional External Funding

[D1.] ''Financial activities for the following financial services: (1) Loans for purchase, refinancing, or reconstruction of fishing vessels and purchase or refinancing of individual fishing quota through the Fisheries Finance Program; (2) Deferred tax program provided to fishermen to construct, reconstruct, or acquire fishing vessels through the Capital Construction Fund Program; and (3) Compensation to fishermen for economic and property losses caused by oil and gas obstructions on the U.S. Outer Continental Shelf under the Fishermen's Contingency Fund.''

NOAA proposes to break out a portion of CE 6.03c.3(b) to explicitly cover only the limited financial activities for specific financial services under the Fisheries Finance Program, the Capital Construction Fund Program, and the Fisherman's Contingency Fund. The Working Group determined that for the vast majority of financial assistance and financial services actions, decision makers should look at whether the underlying activity to be funded falls within one of the established CEs. The activities addressed in proposed D1, however, while appropriate for a CE, were not separately addressed in any of the other NOAA CEs and thus are proposed here as a separate financial activities category. The proposed revision clarifies the scope and applicability of the CE.

[D2.] ''Provision of a grant, a contract or other financial assistance to a State, Fishery Management Council or Marine Fisheries Commission under 16 U.S.C. 1881a(d).''

NOAA proposes to break out a portion of CE 6.03c.3(d) to explicitly cover the provision of a grant, contract, or other financial assistance to a State, Fishery Management Council or Marine Fisheries Commission under 16 U.S.C. 1881a(d). Similar to the activities addressed in D1, the Working Group determined that the specific provision of funding pursuant to 16 U.S.C. 1881(a)(d) was appropriately addressed in a CE and not otherwise covered by other NOAA proposed CEs. The proposed revision clarifies the scope and applicability of the CE.

Research Actions

NOAA proposes to break out a portion of CEs 6.03c.3(a) and 6.03c.3(d) to explicitly cover a variety of research activities with no potential for individual or cumulative significant effects under normal circumstances. The Working Group determined that it would be more appropriate to address research programs and projects with more specificity than the existing 1999 CE, which broadly covers all ''research programs or projects of limited size and duration or with only short-term, minor effects on the human environment.'' Instead, after an internal scoping process evaluating the types of research activities that were routinely and appropriately relying on the existing CE, the Working Group developed the following categories of activities in proposed CEs E1–E8. For each of the proposed research CEs, the Working Group proposed limitations appropriate to the category of activities to ensure that the activities covered by each CE have no potential for significant effects on the environment under normal circumstances.

[E1.] ''Activities conducted in laboratories and facilities where research practices and safeguards prevent environmental impacts.''

[E2.] ''Social science projects and programs, including economic, political science, human geography, demography, and sociology studies, including information collection activities in support of studies.''

[E3.] ''Activities to collect aquatic, terrestrial, and atmospheric data in a non-destructive manner.''

[E4.] ''Activities that survey or observe living resources in the field with little to no potential to adversely affect the environment or interfere with organisms or habitat.''

[E5.] ''Activities involving invasive techniques or methods that are conducted for scientific purposes, when such activities are conducted in accordance with all applicable provisions of the Endangered Species Act, Marine Mammal Protection Act, Migratory Bird Treaty Act, and Magnuson-Stevens Fishery Conservation and Management Act. Such activities will be limited to impacting living resources on a small scale relative to the size of the populations, and limited to methodologies and locations to ensure that there are no long-term adverse impacts to benthic habitats, essential fish habitat, critical habitat, or listed species.''

[E6.] ''Research that involves the development and testing of new and modified fishing gear and technology in order to reduce adverse effects from fishing gear on non-target species.''

[E7.] ''Collection of data and biological samples on fishing vessels or dockside as part of previously authorized commercial and/or recreational fishing activities.''

[E8.] ''Biological, chemical, or toxicological research conducted in closed system mesocosm/aquaculture facilities that are conducted according to recommended protocols that provide containment and disposal of chemicals, toxins, non-native species, etc., in compliance with established Federal and state regulatory guidelines, and best management practices.''

Real and Personal Property Improvement, Maintenance, and Construction Actions

[F1.] ''Siting, construction (or modification), and operation of support buildings and support structures (including, but not limited to, trailers and prefabricated buildings) within or contiguous to an already developed area (where active utilities and currently used roads are readily accessible).''

NOAA proposes a new CE to cover activities to place and operate trailers, modular buildings, storage buildings, or shipping units within or contiguous to an already developed area.

[F2.] ''In-kind replacement of personal property and fixtures and other components of real property when such activities do not result in a substantial change in the existing construction footprint. In-kind replacement includes installation of new components to replace outmoded components if the replacement does not result in a substantial change to the design capacity, or function of the facility.''

NOAA proposes to make minor revisions to CE 6.03c.3(e) by breaking out a component of this CE into a separate CE. NOAA's use of the language ''*In-kind replacement includes installation of new components to replace outmoded components if the replacement does not result in a substantial change to the design capacity, or function of the facility*'' further clarifies the CE. The proposed changes and revisions do not result in any change in scope or applicability from the CEs in the 1999 NAO.

[F3.] ''(a) Routine repair, maintenance, and improvement of real and personal property, where such activities are required to maintain and preserve buildings, structures, infrastructures, vehicles, and equipment in a condition suitable to be used for its designed purpose.

(b) New construction, expansion and/or improvement of facilities where all of the following conditions are met:

(1) The site is in a developed area and/or a previously disturbed site;

(2) The structure and proposed use are compatible with applicable Federal, Tribal, State, and local planning and zoning standards and consistent with Federally approved State coastal management programs and the National Historic Preservation Act;

(3) The proposed use will not substantially increase the number of motor vehicles, marine vessels, or aircraft at the facility or in the area;

(4) The site and scale of construction or improvement are consistent with those of existing, adjacent, or nearby buildings;

(5) The construction or improvement will not result in uses that exceed existing infrastructure capacities (*e.g.,* electrical, roads, sewer, water, parking);

(6) The construction or improvement will not result in operational uses that adversely affect the surrounding community (*e.g.,* noise); and

(7) The community-valued view sheds are not adversely affected.

(c) Installation, repair, maintenance, and enhancement of public access facilities and infrastructure, if the activity:

(1) Is small-scale and nondestructive;

(2) Is consistent with applicable right-of-way conditions and approved land use plans; and

This CE does not apply where the project must be submitted to the National Capital Planning Commission (NCPC) for review and NCPC determines that it does not have an applicable Categorical Exclusion.''

NOAA proposes to break out and merge several portions of the following CEs: 6.03c.3(c) ''minor improvements to an existing site (*e.g.,* fences, roads, picnic facilities, etc.)''; 6.03c.3(e) ''routine facility maintenance and repair''; 6.03c.3(f); 6.03c.3(g); and, 6.03c.3(i) ''routine maintenance.'' The proposed changes and revisions clarify the scope and applicability of the CE.

[F4]. ''Routine groundskeeping and landscaping activities where ground disturbance is limited to previously disturbed areas (*e.g.,* previously filled paved, or cleared areas).''

NOAA proposes to make minor revisions to CE 6.03c.3(e) by breaking out a portion of this CE into a separate CE. These types of actions are already covered in the portion of CE 6.03c.3(e) in ''grounds-keeping activities.'' The CE is limited to activities where ground disturbance is limited to previously disturbed areas. The proposed revisions do not result in a substantial change in scope or applicability from the CE in the 1999 NAO.

[F5.] ''Installation, operation, maintenance, improvements, repair, upgrade, removal, and/or replacement of instruments or instrument systems in or on:

1. An existing structure or object (*e.g.,* tower, antenna, building, pier, buoy, terrestrial vehicle, or bridge) or

2. On previously disturbed (*e.g.,* filled, paved, or cleared) ground, or

3. On undisturbed ground, if the equipment installation, operation, and removal will require no or minimal ground disturbance.''

Microwave/radio communications towers and antennas must be limited to 200 feet in height without guy wires. NOAA proposes a new CE to cover activities of installing, operating, repairing, maintaining, upgrading, removing and/or replacing instruments or instrument systems in or on an existing structure or object, or on previously disturbed ground or on undisturbed ground that involve either no or minimal ground disturbance.

[F6.] ''The determination that real property is excess to the needs of the Agency, when the real property is excessed in conformity with General Services Administration procedures or is legislatively authorized to be excessed.''

NOAA proposes a new CE to cover declarations of real property as excess in conformance with General Services Administration procedures or as legislatively authorized.

[F7.] ''The disposal, demolition or removal of real property and related improvements, buildings and structures, including associated site restoration,

and the disposal of personal property and debris in accordance with all applicable agency procedures and legal requirements.''

NOAA proposes a new CE to cover the disposal, demolition or removal of real property and related improvements, buildings and structures, including associated restoration, and the disposal of property and debris in accordance with all applicable Agency procedures.

Operation Actions

[G1.] ''Routine administrative actions such as (1) program planning, direction and evaluation, (2) administrative tasks, services and support including personnel and fiscal management, advisory services, document and policy preparation, and records management, and (3) development, establishment, and revisions to documents including, but not limited to interagency agreements, memoranda of understanding, memoranda of agreement, cooperative agreements, and university agreements. This CE does not include any associated activities proposed in these documents beyond the administrative task of creating and establishing the document. Actions subsequently funded by or undertaken pursuant to the approved documents may require additional NEPA review at the time those actions are proposed.''

NOAA proposes to break out a portion of CE 6.03c.3(d) to explicitly cover program planning, direction and evaluation; administrative tasks; development, establishment and revisions to administrative documents, including interagency agreements, memoranda of understanding, memoranda of agreement, cooperative agreements, and university agreements. Many of these types of activities are already covered in the portion of the 1999 NAO 6.03c.3(d) in ''program planning and budgeting, including strategic planning and operational planning . . . executive direction; administrative services.'' The proposed revision to break out a portion of the 1999 CE does not result in a significant change in scope or applicability from the CE in the 1999 NAO.

[G2.] ''Routine movement of mobile assets, such as vessels and aircraft, for homeport reassignments or repair/overhaul, where no new support facilities are required.''

NOAA proposes to break out a portion of CE 6.03c.3(d) to explicitly cover routine movement of mobile assets. These types of activities are already covered in the portion of the 1999 NAO 6.03c.3(d) in ''ship and aircraft operations.'' The CE is limited to the routine movement of mobile assets for homeport reassignments or repair/overhaul, where no new support facilities to ensure that activities encompassed by the CE have no potential for significant effects on the environment under normal circumstances.

[G3.] ''Topographic, bathymetric, land use and land cover, geological, hydrologic mapping, charting, and surveying services that do not involve major surface or subsurface land disturbance and involve no permanent physical, chemical, or biological change to the environment.''

NOAA proposes to break out and revise a portion of CE 6.03c.3(d) to cover certain mapping and surveying services and activities. Many of these types of activities are already covered in the portion of the 1999 NAO 6.03c.3(d) in ''mapping, charting, and surveying services.'' The CE is limited to activities that do not involve major surface or subsurface land disturbance and involve no permanent physical, chemical, or biological change to environment. The Working Group determined these limitations were necessary to ensure the activities encompassed by the CE have no potential for significant effects on the environment under normal circumstances.

[G4.] ''Basic environmental services and monitoring, such as weather observations, communications, analyses, and predictions; environmental satellite operations and services; digital and physical environmental data and information services; air and water quality observations and analysis, and IT operations. All such activities must be conducted within existing facilities.''

[G4.] ''Basic environmental services and monitoring, such as weather observations, communications, analyses, and predictions; environmental satellite operations and services; digital and physical environmental data and information services; air and water quality observations and analysis, and IT operations. All such activities must be conducted within existing facilities.''

NOAA proposes to break out a portion of CE 6.03c.3(d) to explicitly cover environmental satellite and environmental data and information service activities, environmental service activities, and air quality observations and analysis activities. These types of activities are already covered in the portion of the 1999 NAO 6.03c.3(d) in ''basic environmental services and monitoring, such as weather observations, communications, analyses, and predictions; environmental satellite services; environmental data and information services;'' and ''air quality observations and analysis.'' The proposed revision to break out a portion of the 1999 CE does not result in any change in scope of applicability from the CE in the 1999 NAO.

[G5.] ''Enforcement operations conducted under legislative mandate such as the MSA, ESA, MMPA, the Lacey Act Amendments of 1981 (Lacey), and/or the National Marine Sanctuaries Act. This does not include bringing judicial or administrative civil or criminal enforcement actions which are outside the scope of NEPA in accordance with 40 CFR 1508.18(a).''

NOAA proposes to break out a portion of CE 6.03c.3(d) to explicitly cover enforcement operations. These types of actions are already covered in the portion of the 1999 NAO 6.03c.3(d) in ''enforcement operations.'' As noted in the language of the CE, 40 CFR 1508.18(a) provides that major federal actions subject to NEPA do not include ''bringing judicial or administrative civil or criminal enforcement actions.'' Accordingly, this CE only covers those enforcement operations outside of this scope that would not otherwise be excluded from NEPA. The proposed revision to break out a portion of the 1999 CE does not result in any change in scope or applicability from the CE in the 1999 NAO.

[G6.] ''Actions that change the NEXRAD radar coverage patterns that do not lower the lowest scan elevation and do not result in direct scanning of previously non-scanned terrain by the NEXRAD main beam.''

NOAA proposes no substantive changes to CE 6.03c.3(h). The phrase ''actions that'' was added for grammatical reasons. The proposed revision to break out a portion of the 1999 CE does not result in any change in scope or applicability from the CE in the 1999 NAO.

[G7.] ''Preparation of policy directives, rules, regulations, and guidelines of an administrative, financial, legal, technical, or procedural nature, or for which the environmental effects are too broad, speculative or conjectural to lend themselves to meaningful analysis and will be subject later to the NEPA process, either collectively or on a case-by-case basis.''

NOAA proposes to break out a portion of CE 6.03c.3(i) to explicitly cover policy directives, order, regulations, and guidance. These types of activities are already covered in the portion of the 1999 NAO 6.03c.3(i) in ''preparation of regulations, Orders, manuals or other guidance that implement, but do not substantially change these documents''

and ''policy directives, regulations, and guidelines of an administrative financial, legal, technical, or procedures nature, or the environmental effects of which are too broad, speculative, or conjectural to lend themselves to meaningful analysis and will be subject later to the NEPA process, either collectively or case-by-case.'' The proposed revision to break out a portion of the 1999 CE does not result in any change in scope or applicability from the CE in the 1999 NAO.

[G8.] ''Activities that are educational, informational, or advisory to other agencies, public and private entities, visitors, individuals, or the general public, including training exercises and simulations.''

NOAA proposes to break out a portion of CE 6.03c.3(i) to explicitly cover educational, informational, advisory, and consultative activities. These types of activities are already covered in the portion of the 1999 NAO 6.03c.3(i) in ''activities which are educational, informational, advisory, or consultative to other agencies, public and private entities, visitors, individuals or the general public.'' The Working Group determined that expressly including training exercises and simulations in the text of the CE clarified its scope and applicability for decision makers. The proposed revision to break out a portion of the 1999 CE does not result in any change in scope or applicability from the CE in the 1999 NAO.

[G9.] ''Actions taken to identify, determine sources of, assess, prevent, reduce, remove, dispose, or recycle marine debris when removal is undertaken in a non-destructive manner and actions are in accordance with Federal, State, and local laws and regulations for environmental protection, and where all relevant regulatory consultation, and/or permit requirements have been satisfied.''

NOAA proposes a new CE to cover actions taken to identify, determine sources of, assess, prevent, reduce, remove, dispose, or recycle marine debris. The CE is limited by the requirement that actions encompassed by the CE must be undertaken in a non-destructive manner and in accordance with Federal, State, and local laws and regulations for environmental protection and all relevant regulatory consultation and/or permit requirements have been satisfied.

Acquisition and Leasing Actions

[H1.] ''Procurement of labor, equipment, materials, data and software needed to execute mission requirements in accordance with applicable procurement regulations, executive orders, and policies. This includes, but is not limited to, procurement of mobile and portable equipment that is stored in existing structures or facilities.''

NOAA proposes to break out a portion of CE 6.03c.3(e) and broaden the coverage of the CE to include activities to procure labor, equipment, materials, and software necessary to execute NOAA's mission, including, but not limited to the purchase of mobile and portable equipment to be stored in existing structures or facilities. A portion of these activities are already covered in the portion of the 1999 NAO 6.0303.c(e) in ''procurement contracts for NEPA documents.''

[H2.] ''Procurement of space by purchase or lease of or within an existing facility or structure in accordance with applicable procurement regulations, executive orders, and policies when there is no change in the general type of use, no new construction of buildings or utilities, and minimal change in design from the previous occupancy level.''

NOAA proposes to break out a portion of CE 6.03c.3(e) to explicitly cover procurement by purchase or lease of space within a previously occupied structure. These types of activities are already covered in the portion of the 1999 NAO 6.03c.3(e) in ''acquisitions of space within an existing previously occupied structure, either by purchase or lease, where no change in the general type or use and minimal change from previous occupancy level is proposed.'' The proposed revision to break out a portion of the 1999 CE does not result in any change in scope or applicability from the CE in the 1999 NAO.

[H3.] ''Outgranting of government-controlled property in accordance with applicable regulations, executive orders, and policies to a Federal entity for any purpose consistent with the existing land or facility use or to a non-Federal entity, when the use will remain substantially the same.''

NOAA proposes to break out a portion of the CE in the 1999 NAO 6.03c.3(e) to explicitly cover outgranting of government-controlled space. These types of activities are already covered in the portion of the 1999 NAO 6.03c.3(e) in ''out-lease or license of government-controlled space, or sublease of government-leased space to a non-Federal tenant when the use will remain substantially the same.'' The proposed revision to break out a portion of the 1999 CE does not result in any change in scope or applicability from the CE in the 1999 NAO; the change in terminology from ''out-lease'' to outgranting is intended to more accurately capture the type of action covered.

[H4.] ''Acquisition of real property (including fee simple estates, leaseholds, and easements) that is not acquired through condemnation of a lease interest, and will not result in significant change in use and does not involve construction or modification.''

NOAA proposes to break out a portion of the CE in the 1999 NAO 6.03c.3(e) to explicitly cover procurement and lease of land. These types of activities are already covered in the portion of the 1999.

NAO 6.03c.3(e) in ''acquisition of land which is not in a floodplain or other environmentally sensitive area and does not result in condemnation.'' NOAA proposes to remove the portion of the CE explicitly stating ''which is not in a floodplain or other environmentally sensitive area.'' NOAA revised its extraordinary circumstances to include environmental, historic, or cultural unique areas and floodplains, and therefore no longer required the text to be explicit within this CE. The proposed revision to break out a portion of the 1999 CE does not result in any change in scope or applicability from the CE in the 1999 NAO.

[H5.] ''Granting easements or rights of entry to use NOAA controlled property for activities that, if conducted by NOAA, could be categorically excluded. Grants of easements or rights-of-way for the use of NOAA controlled real property complementing the use of existing rights-of-way or real property use for use by vehicles (not to include significant increases in vehicle loading); electrical, telephone, and other transmission and communication lines; water, wastewater, stormwater, and irrigation pipelines, pumping stations, and facilities; and similar utility and transportation uses.''

NOAA proposes to create a new categorical exclusion to encompass the activity of granting an easement or right of entry to use NOAA-controlled property for activities that could be categorically excluded if conducted by NOAA.

[H6.] ''Relocation of employees into existing Federally-owned or commercially leased office space within the same metropolitan area not involving a substantial increase in the number of motor or other vehicles at a facility.''

NOAA proposes to break out a portion of CE 6.03c.3(e) to explicitly cover relocation of employees. These types of actions are already covered in the portion of the 1999 NAO 9.03c.3(e) in ''relocation of employees into existing Federally-owned or commercially

leased office space within the same metropolitan area not involving a substantial number of employees or a substantial increase in the number of motor vehicles at a facility.'' The proposed revision to break out a portion of the 1999 CE does not result in any change in scope or applicability from the CE in the 1999 NAO.

[H7.] ''Transferring real property to a non-Federal entity, an agency other than GSA, as well as to States, local agencies and Indian Tribes, including return of public domain lands to the Department of the Interior.''

NOAA proposes a new CE to cover the transfer of real property to a federal agency other than the General Services Administration as well as to a non-Federal entity, including States, local agencies, and Indian tribes. This proposed CE also applies to the return of public domain lands to the Department of the Interior.

Dated: November 9, 2016.

Lois J. Schiffer,

General Counsel, National Oceanic and Atmospheric Administration.

National Oceanic and Atmospheric Administration

[Docket No. 121120640–6943–02]

RIN 0648–XC365

Endangered and Threatened Wildlife; Determination on Whether To List the Harbor Seals in Iliamna Lake, Alaska as a Threatened or Endangered Species

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a listing determination.

SUMMARY: We, NMFS, have completed our review of the status of eastern North Pacific harbor seals (*Phoca vitulina richardii*) in Iliamna Lake, Alaska. Our review was in response to a petition to list these seals as threatened or endangered under the Endangered Species Act (ESA). Based on the best scientific and commercial information available, we conclude that the seals in Iliamna Lake do not constitute a species, subspecies, or distinct population segment (DPS) under the ESA. As a result, we conclude that listing the harbor seals in Iliamna Lake, Alaska is not warranted.

DATES: This listing determination is made as of November 17, 2016.

ADDRESSES: This finding and supporting information are available on our Web page at: *https://alaskafisheries.noaa.gov/pr/harbor-seals*. Supporting documentation used in preparing this listing determination is available for public inspection, by appointment, during normal business hours at the office of NMFS Alaska Region, Protected Resources Division, 709 West 9th Street, Room 461, Juneau, AK 99801. This documentation includes the petition, the Biological Review Team's DPS report, information provided by the public and interested parties, and scientific and commercial data gathered for the review.

FOR FURTHER INFORMATION CONTACT: Mandy Migura, NMFS Alaska Region, (907) 271–1332; Jon Kurland, NMFS Alaska Region, (907) 586–7638; or Lisa Manning, NMFS Office of Protected Resources, (301) 427–8466.

SUPPLEMENTARY INFORMATION:

Background

On November 19, 2012, we received a petition submitted by the Center for Biological Diversity (CBD) to list the harbor seals in Iliamna Lake, Alaska as a threatened or endangered species under the ESA, and to designate critical habitat concurrent with listing. CBD asserted that the harbor seals found in Iliamna Lake constitute a DPS of Pacific harbor seals and contended that the seals in Iliamna Lake face threats warranting protection as a listed species under the ESA. Iliamna Lake is the largest freshwater lake in Alaska and is connected to the Bristol Bay region of the Bering Sea by the Kvichak River.

On May 17, 2013 (78 FR 29098), we found that the petition presented substantial information indicating that listing the seals in Iliamna Lake under the ESA may be warranted, and we requested comments from the public to inform our status review, and to help us determine whether these seals should be listed as threatened or endangered. To assist with our status review, we convened a Biological Review Team (BRT), composed of federal scientists with expertise in marine mammal biology and marine mammal genetics, to review the available information about the status of the species, and provide an assessment regarding the seals in Iliamna Lake. The BRT compiled information about the harbor seals in Iliamna Lake in a DPS Report (Boveng *et al.,* 2016).

In this notice, we announce our finding that the petitioned action to list harbor seals in Iliamna Lake under the ESA as either threatened or endangered is not warranted because the seals do not constitute a distinct population segment (DPS) and thus are not a separate ''species,'' as the ESA defines that term. Speficically, while we conclude that the seals are a discrete population, the best scientific and commercial data available suggest that they are not significant to the greater taxon to which they belong, *i.e.,* the eastern North Pacific harbor seal subspecies (*Phoca vitulina richardii*).

ESA Statutory, Regulatory, and Policy Considerations

Section 3 of the ESA defines a ''species'' as ''any subspecies of fish or wildlife or plants, and any distinct population segment of any species of vertebrate fish or wildlife which interbreeds when mature.'' Section 3 of the ESA further defines an endangered species as ''any species which is in danger of extinction throughout all or a significant portion of its range'' and a threatened species as one ''which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.'' Thus, we interpret an ''endangered species'' to be one that is presently in danger of extinction. A ''threatened species,'' on the other hand, is not presently in danger of extinction, but is likely to become so in the foreseeable future. In other words, the primary statutory difference between a threatened and endangered species is the timing of when a species may be in danger of extinction, either presently (endangered) or in the foreseeable future (threatened).

Under section 4(a)(1) of the ESA, we must determine whether a species is threatened or endangered because of any one or a combination of the following factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) inadequacy of existing regulatory mechanisms; or (E) other natural or human-made factors affecting its continued existence. We must make this determination based solely on the best scientific and commercial data available after conducting a review of the status of the species and taking into account those efforts being made by states or foreign governments to protect the species.

The first step in determining whether the harbor seals in Iliamna Lake warrant listing under the ESA is to assess if they meet the ESA's definition of ''species.'' Although there has been speculation

regarding the taxonomy of the seals in Iliamna Lake (*i.e.,* whether they are harbor seals, spotted seals, or hybrids), recent genetic analyses (O'Corry-Crowe 2013) provide a high degree of confidence these seals are harbor seals (*Phoca vitulina*). The data available are insufficient to suggest the seals in Iliamna Lake, Alaska are a separate subspecies of harbor seal apart from the subspecies *P. v. richardii* (Boveng *et al.,* 2016), which ranges from Mexico to Alaska. Therefore, we assessed whether the harbor seals in Iliamna Lake constitute a distinct population segment of *P. v. richardii*.

The U.S. Fish and Wildlife Service (USFWS) and NMFS (the ''Services'') adopted the Policy Regarding the Recognition of Distinct Vertebrate Population Segments under the ESA (the DPS Policy, 61 FR 4722; February 7, 1996) to clarify the Services' interpretation of the term ''distinct population segment'' for the purposes of listing, delisting, and reclassifying vertebrates under the ESA. The DPS Policy establishes two criteria that must be met for a population or group of populations to be considered a DPS: (1) The population segment must be discrete in relation to the remainder of the species (or subspecies) to which it belongs; and (2) the population segment must be significant to the remainder of the species (or subspecies) to which it belongs. In this case, harbor seals in Iliamna Lake would need to be both discrete from and significant to the eastern North Pacific subspecies of harbor seals (*P. v. richardii*), to be designated as a DPS.

If the seals in Iliamna Lake were found to meet the DPS criteria, we would then conduct a status review and determine whether they are threatened or endangered because of any one or a combination of the factors from section 4(a)(1) of the ESA. Such a determination would be based solely on the best scientific and commercial data available. Here, because we concluded that the seal population in Iliamna Lake is not a DPS, we did not conduct a status review of the population under section 4(a)(1) of the ESA.

Harbor Seal Biology and Life History

Physical Description

Harbor seals (*Phoca vitulina*) range in length and size from 1.5–1.9 meters (m) and 75–180 kilograms (kg) for males, and 1.4–1.7 m and 60–145 kg for females, with weights varying seasonally (Sease 1992). At birth, harbor seal pups are approximately 0.75–1.0 m in length and weigh 10–20 kg (Sease 1992). There is a large amount of natural variation in harbor seal coats with coloration ranging from tan/brown to light gray/black with patterns of spots, rings, and blotches that vary between individuals (Shaughnessy and Fay 1977; Kelly 1981). Variable patterns in seal coats have been well documented and may be a result of the age or sex of the animal, season, location, or the environment they inhabit (Shaughnessy and Fay 1977; Kelly 1981; Moss 1992; Caro *et al.,* 2012). The stage of molting also has an impact on the appearance of their coats.

Life History

On average, harbor seals reach sexual maturity at the age of five for both females and males; however, females exhibit a larger range of age at maturity (Calkins and Pitcher 1979). The variation depends on population size and trend, body condition, and prey resources (Pitcher and Calkin 1979; Mclaren and Smith 1985; Atkinson 1997). Harbor seals in the eastern North Pacific subspecies also exhibit natural variation in the timing of pupping, ranging from March to September (Bigg 1969; Temte *et al.,* 1991; Searse 1992), depending in part on general geographic location. Aerial surveys of harbor seals in Iliamna Lake since 2010 have documented that pupping occurs in the lake, with pups observed during aerial surveys in June, July, and August (Burns *et al.,* 2012; Burns *et al.,* 2013; Boveng *et al.,* 2016; NMML unpubl. data).

Harbor seals molt annually following pupping (Pitcher and Calkins 1979). Molting usually lasts 1–2 months, during which time seals spend a large amount of time hauled-out (Pitcher and Calkins 1979; Daniel *et al.,* 2003). Molting occurs in stages across the body, affecting coloration and pattern of the coat throughout the molt.

Harbor seals are considered opportunistic foragers and feed on a wide variety of prey found in marine, estuarine, and fresh waters (Carretta *et al.,* 2015). Since they inhabit coastal waters, harbor seal dives are often less than 50 m and last 2–5 minutes (Bowen *et al.,* 1999; Frost *et al.,* 2001, 2006) which influences the prey species available for foraging. Alaskan harbor seals have been documented to forage on pollock, Pacific cod, Pacific sand lance, sculpins, Pacific salmon, trout, char, graylings, flatfishes, capelin, eulachon, smelt, and Pacific herring (Hobson *et al.,* 1997; Iverson *et al.,* 1997; Houser *et al.,* 2008; Geiger *et al.,* 2013). Power and Gregoire (1978) report harbor seal diet in Lower Seal Lake, Quebec being dominated by lake and brook trout. Harbor seals have also been documented to follow salmon and other anadromous fish up rivers and into freshwater lakes where they may remain for extended periods (*e.g.* Bigg 1969a, 1981, and Hoover 1988 *as cited in* Sease 1992; Middlemas *et al.,* 2006). One of the largest sockeye salmon populations in the world run up the Kvichak River into Iliamna Lake annually in June and July. Harbor seals have been observed to follow these fish runs seasonally from Bristol Bay, although whether those seals enter Iliamna Lake has not been documented.

Distribution and Abundance

Harbor seals are one of the most widespread pinniped species and are found throughout the northern hemisphere, ranging from temperate to polar regions. As of 2008, the worldwide harbor seal population was estimated between 350,000 and 500,000 mature individuals (Thompson and Härkönen 2008). Currently, there are five recognized subspecies of harbor seals: *P. v. vitulina* in the eastern Atlantic; *P. v. concolor* in the western Atlantic; *P. v. mellonae* in some lakes and rivers draining into eastern Hudson Bay; *P. v. richardii* in the eastern North Pacific; and *P. v. stejnegeri* (also known as *P. v. kurilensis)* in the western North Pacific (Rice 1998; Berta and Churchill 2012).

The harbor seals found in Iliamna Lake are classified as part of the subspecies *P. v. richardii,* also commonly referred to as eastern North Pacific harbor seals. Eastern North Pacific harbor seals range from Mexico to Alaska (Carretta *et al.,* 2015), with an estimated abundance of 360,000 individuals (DFO 2010). More than 205,000 harbor seals occur in Alaska (Muto and Angliss 2015).

Eastern North Pacific harbor seals in Alaska are divided into 12 separate stocks under the Marine Mammal Protection Act; however, these stocks do not represent taxonomic delineations, and all 12 stocks are part of the subspecies *P. v. richardii*. Harbor seals in Iliamna Lake are part of the Bristol Bay stock, which was estimated at approximately 32,350 individuals based on a 2011 survey (Muto and Angliss 2015), an increase from the estimated 18,577 seals in 2005 (Allen and Angliss 2014).

Aerial surveys of harbor seals in Iliamna Lake have primarily been conducted in the summer and have consistently documented fewer than 350 animals (Mathisen and Kline 1992; Small 2001; Withrow and Yano 2009; Burns *et al.,* 2012; Burns *et al.,* 2013; NMML unpubl. data). The standard protocol for harbor seal aerial surveys is that only seals on land are counted and

seals in the water are not counted (Burns *et al.,* 2011; Burns *et al.,* 2013). It is likely that not all seals haul-out at the same time and some seals present in the water were not counted during the surveys of Iliamna Lake. Thus, the actual number of seals in Iliamna Lake at the time of these surveys may have been greater than the number of seals reported during the aerial surveys. To estimate abundance and trends in seal numbers in Iliamna Lake, a simple demographic model was developed (Boveng *et al.,* in prep *as reported in* Boveng *et al.,* 2016). That model indicates that the number of seals in the lake, about 400, has been relatively stable from 1984–2013 with little to no evidence of a trend over the past 5,10, and 15-year horizons. In 2011, household surveys of local residents from six communities in the Iliamna Lake region were conducted. Based upon a synthesis of the information provided by this local traditional knowledge (LTK) of Iliamna Lake residents, the population size of seals in the lake was believed to be approximately 329 individuals, with a general belief that the population was increasing (Burns *et al.,* 2013).

Habitat Use and Movements

Harbor seals typically inhabit near-shore coastal waters, but are well known for their use of estuaries and rivers, and have been recorded over 200 kilometers (km) upstream (*see review in* COSEWIC 2007). Harbor seals are known to haul-out on a variety of natural and manmade substrates which include beaches, sandbars, rocks, islands, ice, docks, piers, and boats. Their varied haul-out substrates are an example of the behavioral plasticity of harbor seals to adapt to a range of environmental settings and conditions (Komers 1997; Vincent *et al.,* 2010).

Harbor seals are often described as a sedentary, non-migratory species, with considerable site fidelity to one or a few haul-outs, with large scale movements being rare. Traditional thinking is that harbor seals generally stay within 50 km of a primary haul-out site (*e.g.,* see Peterson *et al.,* 2012). However, Burns (2002) states this is a ''gross oversimplification'' and instead states that harbor seals move quite extensively in some cases, including movements characterized as ''migrations, juvenile dispersal, seasonal shifts, shifts related to breeding activity, responses to seals habitat exclusion, responses to acute or chronic disturbance, and immigration/emigration, occasionally on a relatively large scale.'' Satellite tagging studies document that harbor seals have large home ranges with haul-out sites that vary seasonally and by individual, with some seals migrating hundreds of km between breeding and post-breeding habitats (*e.g.,* Lowry *et al.,* 2001; Lesage *et al.,* 2004; Peterson *et al.,* 2012; Womble and Gende 2013). These studies also report strong evidence of site fidelity by harbor seals to their breeding or locations where they were tagged during summer. In the St. Lawrence estuary in Canada, over half of the satellite tagged harbor seals left their summer haul-out areas once solid ice formed within the bays of the estuary, and migrated between 65 km and 520 km to over-wintering sites (Lesage *et al.,* 2004). In the Pacific Northwest region of the United States, Hardee (2008) reported that harbor seal movements up to 100 km from the tagging site occurred most frequently outside of the breeding season, and that some adult males made trips in excess of 200 km roundtrip that lasted 1–8 weeks between April and August. Hardee (2008) observed long-distance and long-duration movements by harbor seals throughout the study period, with males making multiple roundtrip movements greater than 200 km that were not associated with a migratory over-wintering behavior. Hardee's (2008) study, as well as a study of harbor seals from the Wadden Sea, Denmark (Tougaard *et al.,* 2003 *as cited in* Hardee 2008), contradict the traditional view that harbor seals reside in a limited geographic area and do not leave that home area for extended periods of time. Peterson *et al.* (2012) documented adult male harbor seals in the Pacific Northwest moving rapidly between haul-outs, at times traveling over 100 km in about two days. That study also concluded that some adult male harbor seals had secondary haul-out sites greater than 100 km from the primary haul-out site; that the locations of, and distances between, primary and secondary haul-outs varied by seal; and that seasonal migrations over 100 km by adult male seals were more common than previously believed. In Alaska, Lowry *et al.* (2001) reported juvenile harbor seal movements of 300–500 km, and Womble and Gende (2013) documented extensive migrations of harbor seals from Glacier Bay during the post-breeding season, with some females traveling to Prince William Sound, a distance up to 900 km one way. A harbor seal tagged in the Egegik and Ugashik region of eastern Bristol Bay traveled in excess of 470 km, and 8 of 14 tagged harbor seals traveled in excess of 100 km from a major haul-out site (ADF&G unpubl. data).

There is also variation in individual movements of harbor seals within a population, with some seals traveling great distances seasonally while others stay within a smaller area year-round. Womble and Gende (2013) noted that some harbor seals in Glacier Bay, Alaska, were residents year-round whereas others were migratory. For the migrating harbor seals, there was a high degree of site fidelity back to Glacier Bay the following pupping/breeding season despite the extensive migration away from the breeding area during the post-breeding season (Womble and Gende 2013). Lesage *et al.* (2004) documented that half of the tagged harbor seals in the St. Lawrence estuary in Canada left their summer haul-out areas and migrated up to 520 km to over-wintering sites, whereas the other half stayed year-round. Peterson *et al.* (2012) concluded that some harbor seals in the Pacific Northwest had spatially separated primary and secondary haul-outs, while other seals stayed relatively close to a primary haul-out year-round. Sharples *et al.* (2012) documented highly variable individual harbor seal movements for seals tagged in the British Isles. This study also concluded that region and season better explained the variation in foraging movements than the individual seal's sex, size, and body condition (Sharples *et al.* 2012), suggesting the local habitat conditions and distance to profitable feeding grounds may influence the foraging movements of the seals.

No harbor seals in Iliamna Lake have been satellite tagged, thus there are no data available about harbor seals movements in Iliamna Lake comparable to those discussed in the preceding paragraphs. Data on habitat use and movements of harbor seals in Iliamna Lake are from aerial surveys documenting locations where harbor seals were hauled-out (*e.g.,* Mathisen and Kline 1992; Small 2001; Withrow and Yano 2009; Burns *et al.,* 2012; Burns *et al.,* 2013), and the LTK of residents, including Alaska Native subsistence hunters around Iliamna Lake (*e.g.,* Burns *et al.,* 2013; Van Lanen *et al.,* 2013). In Iliamna Lake, hauled-out harbor seals are observed primarily in the northeastern portion of the lake, but some local residents report seeing seals in the southwestern portion of the lake, especially near the Kvichak River and Igiugig (Burns *et al.,* 2013). The majority of aerial surveys of Iliamna Lake were conducted during the summer/ice-free season, with a small number of recent (2010–2013) surveys also flown during the winter/ice-present season. The recent aerial surveys documented

seasonal variations in seal presence and abundance in the lake, with significantly greater numbers of seals observed hauled-out during the summer pupping and molting periods (*e.g.,* 237 seals observed August 4, 2013) than during the winter (*e.g.,* 9 seals observed April 4, 2013) (Burns *et al.,* 2011; Withrow *et al.,* 2012; Burns *et al.,* 2012; Burns *et al.,* 2013; NMML unpubl. data).

While harbor seals are known to haul-out on ice, recent aerial surveys have documented few seals hauled-out during winter surveys in Iliamna Lake. For example, an aerial survey flown in April 2010, when the lake was almost completely frozen-over, documented only 11 seals; observers reported they ''did not see any areas that could support the several hundred seals that have been documented in the summer'' (Withrow *et al.,* 2011). Another aerial survey in April 2013 observed only nine hauled-out seals (NMML unpubl. data). Although fewer seals are documented during winter months, there has been some speculation, primarily by some local residents (Burns *et al.,* 2013; Van Lanen *et al.,* 2013), that all the seals remain in the lake year-round and are undetectable during winter aerial surveys. It is possible seals present in the lake in winter are not observed because they are either in the water or they are under the ice in areas with air pockets, which may become accessible along shorelines when the lake's water level drops after a heavy layer of ice has formed at the surface. The particular environmental condition of under-ice air pockets has been scientifically documented in the Lacs des Loups Marins in Canada (Twomey 1939 *as cited in* Smith and Horonowitsch 1987; Smith and Horonowitsch 1987). The Lacs des Loups Marins are home to harbor seals in subspecies *P.* v. *mellonae,* who reside in freshwater lakes year-round and are believed to use under ice haul-outs when the lakes are iced-over (Smith and Horonowitsch 1987; Smith 1997; DFO 2016). While neither this environmental condition nor the use of under-ice air pockets by harbor seals have been scientifically assessed in Iliamna Lake, the use of under ice air pockets or chambers could explain why fewer seals are observed in Iliamna Lake when it is frozen compared to when it is not. However, this theory does not explain why only eight seals were counted in November 2010 (Burns *et al.,* 2011) when the lake was not iced-over. There currently is no scientific evidence available to determine whether air chambers or haul-outs are used by seals under the ice in Iliamna Lake during the winter; however, local residents have reported hearing seals under the ice in such spaces (Burns *et al.,* 2013). Regardless of the number of seals present in winter, the aerial surveys provide scientific evidence of some level of year-round presence of harbor seals in Iliamna Lake.

Conclusions drawn from recent aerial surveys suggest that some harbor seals may be year-round residents of Iliamna Lake whereas other harbor seals may seasonally migrate to and from the lake (Burns *et al.,* 2011; Withrow *et al.,* 2011; Burns *et al.,* 2012; Burns *et al.,* 2013). Some of the LTK regarding the migration patterns of seals in Iliamna Lake are inconsistent, and collectively they do not provide clarity (see Burns *et al.,* 2013). Some LTK reports indicate harbor seals migrate between Iliamna Lake and Bristol Bay and are frequently seen traversing the Kvichak River (*e.g.,* Alvarez 2013; Burns *et al.,* 2013; Igiugig Tribal Village Council 2013; Mohr 2013; Wilson 2013), while other reports indicate that the seals do not migrate and are present in the lake year-round (*e.g.,* Burns *et al.,* 2013; Jacko 2013; Mohr 2013). Local residents around Iliamna Lake indicate that observations of harbor seals in the Kvichak River are typically made beginning in spring, peak during mid-summer, and decline to zero in the winter months; however, some residents of Levelock on the Kvichak River have observed seals in the river in the winter (Burns *et al.,* 2013). This suggests that the Kvichak River may be used seasonally as a migration route between Iliamna Lake and Bristol Bay.

No scientific data are available to determine whether enough fish remain in Iliamna Lake to support hundreds of seals during winter. Some LTK indicates that the lake may not have sufficient food available to support the number of seals observed in summer months on a year-round basis. A local seal hunter recently noted that two seals harvested during two consecutive winters in the lake had not ''one drop of food in the stomach or intestines'' (Burns *et al.,* 2013). Another seal hunter recollected shooting a seal in March one year that was very skinny and had no fat on it, and speculated that during cold winters there was inadequate food for the seals (Burns *et al.,* 2013). However, the hunter also mentioned that it was very rare to find a skinny seal in Iliamna Lake. During our public comment period we received a comment that provided calculations of the abundance of non-salmonid freshwater fish available during the overwinter period and indicated that a population of approximately 300 seals could not be sustained on the levels of freshwater fish available in the winter. We have no information to support or refute the calculations provided by the commenter.

Alternatively, there may be adequate abundance of prey available in the lake year-round, but some seals could leave the lake in winter for other reasons. In the St. Lawrence estuary, a study of satellite-tagged harbor seals found that seals left summer haul-out areas when solid ice formed within the bays of the estuary despite ''evidence of high abundance of potential prey for harbor seals in the estuary during winter'' (Lesage *et al.,* 2004). This study concluded that availability of prey in winter ''is not the primary factor which influences the movement and distribution patterns of harbor seals'' (Lesage *et al.,* 2004). As discussed earlier, harbor seals have been documented to have spatially separated home ranges which vary seasonally (*e.g.* Lowry *et al.,* 2001; Lesage *et al.,* 2004; Peterson *et al.,* 2012; Womble and Gende 2013), but also high site fidelity to breeding locations. Thus, it is plausible that some harbor seals from Bristol Bay seasonally follow the salmon to Iliamna Lake and return to Bristol Bay for winter, but there are no data available either to support or refute this scenario.

Whether seals migrate seasonally between Iliamna Lake and Bristol Bay has not been scientifically investigated, with the exception of a few recent aerial surveys of Iliamna Lake and the Kvichak River. Aerial surveys of the Kvichak River (five complete or partial river surveys conducted from 2008–2013) have failed to document harbor seal presence in the river (Burns *et al.,* 2013), but it is possible that seals in the river may have been missed during the surveys or that the surveys were conducted when seals were not using the river. For example, during an aerial survey in 2011, the survey crew received a report of seals in a tributary of the Kvichak River near Kastinak Flats, but the survey crew was unable to locate the seals when they flew over the area approximately 30 minutes later (Burns *et al.,* 2013; D. Withrow, NMML, pers. comm.). Additionally, Burns *et al.,* (2013) postulated that seals present in the Kvichak River may not be accounted for as a result of the survey methodology, which only counts seals hauled-out, not those in the water. Other reports suggest harbor seals are regularly seen throughout the Kvichak River (Burns *et al.,* 2013; Van Lanen *et al.,* 2013; ADF&G unpubl. data). Of 14 harbor seals satellite tagged in Egegik and Ugashik Bays within eastern Bristol

Bay in 2000 and 2001, none were documented in the Kvichak River or Iliamna Lake (ADF&G unpubl. data). However, the sample size is too small to conclude that migration between Bristol Bay and Iliamna Lake does not occur. We did not find any scientific evidence to conclude the harbor seals in Iliamna Lake constitute a closed population with no migration between the lake and marine waters, and the documented LTK on this question was inconsistent. In the absence of persuasive evidence of a closed population, for purposes of our DPS assessment, we assumed that harbor seal migration between Iliamna Lake and Bristol Bay (or beyond) is possible.

Subsistence Harvest

Harbor seals are an important resource for Alaska Native communities surrounding Iliamna Lake. Harbor seals are not only a food source, but also provide materials that can be used for clothing, handicrafts, and cultural traditions. Reports of harvesting harbor seals by indigenous people around Iliamna Lake date back to the early 1800s and LTK suggests that seals have inhabited the lake for many centuries (Fall *et al.,* 2006; Van Lanen 2012; Burns *et al.,* 2013). The majority of hunting occurs during February and March; however, some animals have been harvested in summer and occasionally in winter (Burns *et al.,* 2013). Seven communities around Iliamna Lake and along the Kvichak River were surveyed regarding their harvest of marine mammals: Pedro Bay, Pope-Vannoy Landing, Kokhanok, Newhalen, Igiugig, Iliamna, and Levelock (Burns *et al.,* 2013). Between 1982 and 2011, approximately 150 seals were harvested in Iliamna Lake; however, there is a marked difference in the number of seals harvested each of those years (Burns *et al.,* 2013). For instance, there were no reported harvests of seals in 1982 and 1996, yet 33 were harvested in 1991. The most recent survey in 2011 reported that 44 percent of households surveyed from these seven communities used ''freshwater'' harbor seal products and 13 percent used ''saltwater'' harbor seal products in some capacity, resulting from an estimated harvest of 29 seals (five ''saltwater'' and 24 ''freshwater'') (Burns *et al.,* 2013).

Distinct Population Segment (DPS) Assessment

As described above, only species, subspecies, and DPSs are eligible for listing as a threatened or endangered species under the ESA. A DPS is a population or group of populations of a vertebrate species that meet both the ''discreteness'' and ''significance'' criteria of our DPS policy (61 FR 4722; February 7, 1996). If a population segment is found to be discrete and significant, it is a DPS and is considered a ''species'' under the ESA. If the population is not both discrete and significant, it does not meet the criteria for designation as a DPS and does not qualify as a ''species'' as defined by the ESA; thus, we need not evaluate its status relative to the factors in section 4(a)(1) of the ESA because it cannot be listed as a threatened or endangered species. Our assessment first addresses the discreteness of the harbor seals found in Iliamna Lake, and then addresses whether these seals are significant to *P. v. richardii,* as these terms are defined in our DPS policy (61 FR 4722; February 7, 1996).

As discussed above, we know from formal scientific studies and LTK that at least some harbor seals are present in the lake year-round; *i.e.* are residents of Iliamna Lake. What is not clear from the science or LTK is whether harbor seals from Bristol Bay migrate to Iliamna Lake. The BRT considered four scenarios: (1) The population of seals in Iliamna Lake is self-sustaining with seals being year-round residents of the lake, and no migration of seals from Bristol Bay into the lake occurs; (2) there are resident seals in the lake, and some seals from Bristol Bay migrate to the lake during the summer, but there is no interbreeding of seals from the two regions and the Bristol Bay seals do not stay in the lake during winter; (3) Iliamna Lake contains a mix of seals born in the lake and those born in the marine environment but who migrated to the lake (either temporarily or permanently), and these seals are interbreeding; or (4) there is no self-sustaining population of seals in the lake and migration is necessary to sustain the population of seals in the lake. The BRT found three of the four scenarios to be plausible, favoring explanations 1 and 2, but not ruling out 3. None of the BRT members considered the forth scenario likely (Boveng *et al.,* 2016). For our DPS analyses, we recognize that questions remain regarding whether there is migration, and references below to seals in or from Iliamna Lake are not meant to imply that their birth location (either in Iliamna Lake or the marine environment) is known, but rather are an indication of the seals' location in Iliamna Lake at time of observation or sampling.

Discreteness

We first sought to determine whether the harbor seal population in Iliamna Lake is discrete in relation to the remainder of the taxon to which it belongs (*i.e.,* the eastern North Pacific harbor seal subspecies, *P. v. richardii*). A population segment of a vertebrate species may be considered discrete if it satisfies either one of the following conditions specified in our DPS policy: ''(1) it is markedly separated from other populations of the same taxon as a consequence of physical, physiological, ecological, or behavioral factors. Quantitative measures of genetic or morphological discontinuity may provide evidence of this separation; or (2) it is delimited by international governmental boundaries within which differences in control of exploitation, management of habitat, conservation status, or regulatory mechanisms exist that are significant in light of section 4(a)(1)(D) of the ESA.'' Because Iliamna Lake is entirely within the United States, the second discreteness criterion identified above is not relevant. Thus, we focused our assessment of discreteness on whether the harbor seals in Iliamna Lake are markedly separated from other harbor seals in the subspecies *P. v. richardii,* with emphasis on the nearest harbor seal stock in adjacent Bristol Bay. In addition to examining four categories of factors (*i.e.,* physical, physiological, ecological, or behavioral factors) as mechanisms with the potential for providing marked separation by limiting the dispersal of breeders between populations, the BRT recognized that dispersal rates often cannot be directly measured in natural populations. As such, the BRT also decided to separately review the available genetic information for evidence of separation.

Physical Factors: Iliamna Lake is located at the base of the Alaska Peninsula, where it drains through the Kvichak River into Bristol Bay. Thus, harbor seal habitat in Iliamna Lake is separated from the nearest habitat commonly used by harbor seals in Bristol Bay by the Kvichak River. Reports regarding the length of the Kvichak River vary, with some older documents reporting the river is approximately 80 km (50 mi) in length (*e.g.,* Orth 1971; BLM 2004), whereas more recent reports suggest it is closer to 115–120 km (71–75 mi) (*e.g.,* Withrow and Yano 2009; Boveng *et al.,* 2016; validated by a measurement of the river path between Kogging and Iliamna Lake using a high resolution topographic map). The discrepancy in reported distances of the river could be explained by changes in the river itself over time, variances in the starting and ending measurement points, or by using

straight-line measurements on a map versus tracing the path of the river.

Although seals are found predominantly in the northeast region of Iliamna Lake, the most recent studies indicate harbor seals are found throughout Iliamna Lake, in rivers draining into the lake (Iliamna, Newhalen, and Gilbralter rivers), and throughout the Kvichak River (Alvarez 2013; Burns *et al.,* 2011; Burns *et al.,* 2012; Burns *et al.,* 2013; Igiugig Tribal Village Council 2013; Mohr 2013; Van Lanen *et al.,* 2013; Wilson 2013). The distance that seals would have to travel from the lake to Bristol Bay is well within the known distances that harbor seals travel (see previous discussion in ''Habitat Use and Movements''). Thus, the evidence available does not indicate that the length of the Kvichak River nor the distance to the northeast region of Iliamna Lake (approximately 180 km from Bristol Bay) would be a physical barrier separating seals in Iliamna Lake from those in Bristol Bay.

Physical factors that could impede harbor seal passage in the Kvichak River include shallow braided sandbars and ice cover during winter. Although poorly adapted for travel on land, harbor seals in other areas have been suspected to cross land up to 0.15 km long and on inclines as steep as 25 degrees to get from one body of water to another (COSEWIC 2007), so it is reasonable to assume harbor seals have the capability to cross shallow braided sandbars in the Kvichak River.

Millions of sockeye salmon enter Iliamna Lake from marine waters annually via the Kvichak River along with other species of anadromous salmon. Also, another marine mammal species has been reported to travel to Iliamna Lake via the Kvichak River. Beluga whales, which are less agile and much larger than harbor seals, have been documented in the Kvichak River (Frost *et al.,* 1983; Quakenbush 2002) in the spring, summer, and fall (Chythlook and Coiley 1994) and have been observed near Igiugig (Burns *et al.,* 2013; Wilson 2013) and in Iliamna Lake (Mohr 2013). Thus, the available evidence suggests the Kvichak River is passable for harbor seals, at least part of the year when the river is not frozen over.

Individual BRT members were not in agreement regarding the scientific support for discreteness due to physical factors, but concluded ''no strong evidence was found either for or against marked separation by physical barriers between harbor seals in Iliamna Lake and those in Bristol Bay'' (Boveng *et al.,* 2016). When we considered the best available information indicating that there is access between Iliamna Lake and Bristol Bay via the Kvichak River, which is passable at least part of the year, and that the distance between the two locations is within documented migration distances of harbor seals, along with with the opinion of the BRT, we concluded that the best available information does not support a conclusion that there is separation due to physical factors. As such, we find that harbor seals in Iliamna Lake are not markedly separated from other harbor seals of the subspecies *P. v. richardii* as a consequence of physical factors.

Physiological Factors: Unlike the Lacs des Loups Marins harbor seals in Canada, a landlocked population that lives exclusively in freshwater lakes and rivers and has documented physiological differences from the adjacent harbor seal population in marine waters (Smith *et al.,* 1994), no studies exist suggesting there are statistically significant morphological or physiological differences between harbor seals in Iliamna Lake and other members of the subspecies *P. v. richardii*. Consequently, our discreteness analysis considered other types of evidence which may suggest physiological differences. Specifically, we considered observations obtained primarily from those with LTK of seals in Iliamna Lake having a different size, taste, pelage, and timing of pupping as compared to seals in Bristol Bay.

The concentration and availability of salmon to seals in Iliamna Lake in the summer may account for perceived differences reported by LTK in size and taste of seals in Iliamna Lake compared to seals in Bristol Bay. For example, several respondents of a recent LTK survey indicated that the ''physical size of the seals grows every year following the salmon runs'' (Burns *et al.,* 2013), suggesting high availability and consumption of energy-rich salmon results in growth of seals during the summer. While the well-fed seals may have experienced salmon-fueled growth, the flavor of the harvested seals has been reported to become less desirable after the salmon runs, which is reportedly why seals in Iliamna Lake are not normally hunted in fall (Burns *et al.,* 2013). The LTK perception of differences in pelage pattern and coloration is conflicting (see Burns *et al.,* 2013), and no formal studies have been conducted to determine if there are significant differences in pelage patterns for harbor seals in Iliamna Lake versus elsewhere. Burns *et al.,* (2013) speculate that the timing of the harvest of harbor seals in relation to the timing of the annual molt may play a role in the perceptions of difference in pelage texture or coloration. The observed variances in taste, body size, and pelage traits are more likely a reflection of seasonal diet, normal phenotypic plasticity, and individual variation rather than an indication that the seals in Iliamna Lake are physiologically distinct from those in the adjacent marine environment.

The timing of pupping for eastern North Pacific harbor seals ranges from March to September (Bigg 1969; Temte *et al.,* 1991; Sease 1992). In Iliamna Lake, LTK reports about the timing of pupping are variable, with some reports of seal pups born on the lake ice during March and April, and other reports indicating pups are born during the first half of June (Burns *et al.,* 2013). LTK observations of seal pup sightings in Iliamna Lake ranged from February to September, with the majority of pup sightings between April and August (Burns *et al.,* 2013). Between 2009 and 2013, aerial surveys of Iliamna Lake documented newborn pups in June, July, and August (Burns *et al.,* 2013). Both aerial survey observations and local resident observations of newborn seal pups in Iliamna Lake are within the normal range of pupping dates for the eastern North Pacific harbor seal subspecies.

Jemison and Kelly (2001) and Reijnders *et al.* (2010) showed that the timing of harbor seal pupping in the same location can shift by as much as several weeks over the course of a few decades. A review of data from 1975–2006 for harbor seals in Nanvek Bay, Alaska, (which is the main location within Bristol Bay for which harbor seal pupping data are available) indicates that the average peak pupping date can vary by a couple of weeks over just a few years (*e.g.,* June 18 in 2002 vs. July 3 in 2006; see Table 1 in Boveng *et al.,* 2016). This observed natural variation in timing of harbor seal pupping, along with scarcity of available data, may account for seemingly conflicting information in the scientific literature about the timing of pupping in Iliamna Lake relative to other harbor seals in Alaska (*e.g.,* Burns *et al.,* 2013 states ''when compared to Bristol Bay seals only, the timing of pupping in Iliamna does not appear to be substantially delayed'' versus Withrow *et al.* (2011) which states ''Elsewhere in Alaska we observe harbor seals pupping much earlier, in May and June''). According to the BRT report (Boveng *et al.,* 2016), the latest peak pupping date estimated for the Nanvek Bay region of Bristol Bay was July 5 (1990). Iliamna Lake aerial surveys flown in 2010, 2011, and 2013 indicate that the earliest peak pupping date was July 9 (2010). Sparse data

about pupping dates in both Bristol Bay and Iliamna Lake lead us to conclude that while we do not know the precise timing of peak pupping of harbor seals in either region, we do know that timing of peak pupping can vary by a couple of weeks among years within a given location. Therefore, an overlap of the timing of pupping between seals in Bristol Bay and Iliamna Lake is possible, even though there may be a 15-day delay in the average peak pupping date in Iliamna Lake (July 12) versus the average peak pupping date in Nanvek Bay (June 27) (see Boveng *et al.,* 2016). Burns *et al.* (2013) also concluded that compared to Bristol Bay, the timing of pupping in Iliamna Lake does not appear to be substantially delayed. A model developed to estimate the abundance and trend of harbor seals in Iliamna Lake (Boveng *et al.,* in prep *as cited in* Boveng *et al.,* 2016) predicted a peak pupping date of July 20 (versus the July 12 peak pupping date suggested by a simple average of the dates of maximum pup counts presented in Table 1 of the BRT Report); however, there was substantial imprecision in the model's estimate for the peak of pup counts in the lake.

Individual BRT members were not all in agreement regarding the degree of scientific support for discreteness based upon marked separation due to physiological factors. Regarding differences in physiological traits such as pelage coloration or texture and seal size and taste, the BRT report stated ''whether any of these differences truly reflect physiological differences or separation is not clear, and the BRT was unaware of any documentation that these traits are heritable and would indicate separation or novel genetic diversity'' (Boveng *et al.,* 2016). Regarding physiological separation based on the notion that pupping in Iliamna Lake is potentially delayed by two to six weeks when compared to nearby populations, the BRT stated, ''The sparsity of information currently available for Iliamna Lake, imprecision in determining the timing for any of the comparison populations, and the length of the harbor seal pupping period (approximately 6–10 weeks), reduce the confidence that can be placed on the apparent difference'' (Boveng *et al.,* 2016).

When we considered all the evidence currently available to us, including the lack of direct measures of physiological factors, the possibility that perceived differences in seals' appearance may be the result of natural individual variation, the imprecision of estimating pupping dates due to limited data, the potential overlap of pupping seasons between Iliamna Lake and Bristol Bay, and the large timeframe (March to September) for typical pupping times across the eastern North Pacific harbor seal taxon, we concluded that the available information is too weak for us to make a determination that there is separation based on physiological factors. As such, based on the available evidence, we find that harbor seals in Iliamna Lake are not markedly separated from other harbor seals of the subspecies *P. v. richardii* as a consequence of physiological factors.

Ecological Factors: Harbor seals are known to pursue and aggregate around concentrations of anadromous prey, particularly salmon (*e.g.,* London *et al.,* 2001, Orr *et al.,* 2004, and Wright *et al.,* 2007, *as cited in* Peterson *et al.,* 2012; Middlemas *et al.,* 2006; Hauser *et al.,* 2008). Changes in distribution of seasonally abundant prey in the Pacific Northwest have been suggested as a possible explanation for seasonal movements of harbor seals in that area (Peterson *et al.,* 2012), as harbor seals may move deliberately to exploit regions of higher prey availability (Hardee 2008). In Alaska, movements of 125 km by adult female harbor seals have coincided with seasonal eulachon runs in the Copper River Delta (Lowry *et al.,* 2001). Savarese and Burns (2010) documented peak harbor seal numbers coincident with peaks in regional salmon abundance in the Bering Glacier region, and contended the salmon attracted large numbers of harbor seals to the region. Peterson *et al.* (2012) speculated that the observations of harbor seals using spatially separated haul-out sites on a seasonal basis may be related to seasonal changes in prey distribution and foraging opportunities.

Hauser *et al.* (2008) examined foraging by harbor seals in Iliamna Lake during July and August, when salmon are very abundant in the lake, and reported that the seals predominately fed on large salmonids (salmon, trout, char, and graylings) during the summer months. In addition to salmonids, Hauser *et al.* (2008) documented lampreys, smelts, sculpins, whitefishes, sticklebacks, and other unidentified prey items in the scat samples of harbor seals in Iliamna Lake. Thus, harbor seals in Iliamna Lake appear to be opportunistic feeders, consistent with the general pattern of harbor seals foraging on a wide variety of fish and invertebrate prey across their range, with regional differences in diet diversity (Jemison 2001; COSEWIC 2007). The prey items and seasonal concentration of salmon in the diet of seals in Iliamna Lake are consistent with those documented for harbor seals in other freshwater systems. For example, Middlemas *et al.* (2006) documented a summer peak in the contribution of salmonid prey to the diet of harbor seals observed in a Scottish river system; Beck *et al.* (1970) documented a seal in Edehon Lake, Canada with both trout and whitefish in its stomach; and Power and Gregoire (1978) reported that harbor seals in lakes ate various freshwater fish present in the lakes, including trout. Smith *et al.* (1996) examined stomachs of four harbor seals from the Lacs des Loups Marins which contained in large part lake whitefish, lake trout, and brook trout. Scat collected in the Nanvak Bay region of Bristol Bay also showed that harbor seals have a diverse diet, including some of the same types of prey species consumed in Iliamna Lake (*e.g.,* salmon, smelts, sculpins) as well as other prey species (*e.g.,* codfishes, herring, squid/octopus) (Jemison 2001).

Stable isotope analyses of whiskers and muscle tissue can provide some insights about harbor seal diets from several months prior to the date the samples were collected. Samples collected from a small number of subsistence harvested harbor seals from Iliamna Lake provide preliminary evidence that those specific seals consumed freshwater fish during the previous winter (Burns *et al.,* 2013). These preliminary data and the typical timing of ice melt in the Kvichak River and Iliamna Lake (May–June) suggest that these samples were most likely collected from seals which had overwintered in the lake. However, these preliminary stable isotope data are not especially revealing due to the lack of data on whisker growth rates, tissue turnover times, and direct measures of the isotopic signature of potential prey resources (Burns *et al.,* 2013).

If ecological factors prevented harbor seals in Iliamna Lake from mixing with other harbors seals during mating season, then there could be marked separation as a result of lack of opportunities for interbreeding. However, when considering the timing of the annual ice melt in the Kvichak River and Iliamna Lake, the sockeye salmon runs into Iliamna Lake, and the presumed mating seasons of seals in Bristol Bay and in Iliamna Lake, the BRT concluded that the timing of these events would not preclude opportunities for interbreeding by seals migrating from Bristol Bay to Iliamna Lake (Boveng *et al.,* 2016).

The BRT members were in general agreement regarding the degree of scientific support for discreteness based upon marked separation due to ecological factors, and concluded there

was ''no strong evidence for separation'' as a result of any of the ecological factors considered. Based on the available evidence, we find that harbor seals in Iliamna Lake are not markedly separated from other harbor seals of the subspecies *P. v. richardii* as a result of ecological factors.

Behavioral Factors: There are no scientific or LTK data available to assess whether mating behaviors (*e.g.,* vocalizations or mate attraction displays) differ for seals in Iliamna Lake relative to those in Bristol Bay or other areas of the eastern North Pacific harbor seal range. Absent data available regarding mating behaviors of harbor seals in Iliamna Lake, the BRT construed the selection of relatively remote pupping sites in the northeastern region of Iliamna Lake (nearly 200 km from pupping sites in Bristol Bay) to be a behavior, and suggested the selection of the unusual location was evidence of some degree of separation, especially given harbor seals' site fidelity to breeding locations. The selection of distant pupping sites could be interpreted to mean that harbor seals in Iliamna Lake are not freely breeding with harbor seals in Bristol Bay, and lead to a conclusion there is marked separation. However, even a small amount of breeding dispersal from marine populations of harbor seals into Iliamna Lake could render the degree of genetic differentiation insignificant (Boveng *et al.,* 2016), suggesting there may not be marked separation. The available LTK does not resolve this question, as opinions vary regarding whether seals in the lake are residents, migrants, or a mix of both (see Burns *et al.,* 2013).

Previously we mentioned that harbor seals commonly follow anadromous prey into freshwater environments, such as rivers and lakes. Thus, we do not consider the mere presence of harbor seals in Iliamna Lake to be a behavioral adaptation suggestive of marked separation from harbor seals in the marine environment. However, some Alaska Natives in the Iliamna Lake region, including subsistence hunters, have postulated that the seals overwinter in the lake by using under-ice air gaps and haul-outs (Burns *et al.,* 2013), although such winter habitats have not been documented in Iliamna Lake. Lack of data complicates a determination of whether use of under-ice shelters would be a special, learned behavioral adaptation that is unique to harbor seals over-wintering in freshwater environments, or if this behavior would be one that any harbor seal in a similar environment may adopt. Similar under-ice habitats in the Lacs des Loups Marins in Canada have been suggested as potential harbor seal lairs or breathing chambers (*e.g.,* Smith and Horonowitsch 1987; COSEWIC 2007). This, in turn, suggests that use of such under-ice habitats may be an example of the behavioral plasticity that results in harbor seals using a range of behaviors and habitats in response to environmental conditions (Komers 1997; Vincent *et al.,* 2010).

The Lacs des Loups Marins harbor seal population has shown evidence of modifying typical harbor seal behavior and adapting to its environment. It is postulated that, because no pups have been observed being born on the ice during that species' pupping time period (April, when the lakes are frozen), the Lacs des Loups Marins harbor seals have learned and adapted to their situation by whelping in under-ice shelters similar to subnivean birth lairs (snow caves) used by ringed seals (Consortium Gilles Shooner & Associes *et al.,* 1991 *as cited in* Smith 1997). On the contrary, Burns *et al.* (2013) include information from local residents near Iliamna Lake who suggest some harbor seal pups may be born in Iliamna Lake in March and April, when the lake is still frozen, but pup on the ice, not under it. Due to this reported on-ice pupping, even if the harbor seals in Iliamna Lake utilize under-ice habitats as shelters or breathing chambers, such behavior would not be an adaptation necessary for successful pupping by seals that use the lake. Thus, unlike the Lacs des Loups Marins harbor seals, the evidence suggests that harbor seals in Iliamna Lake have not developed novel behaviors to facilitate pupping in a lake environment.

The BRT members were in general agreement regarding the degree of scientific support for discreteness based upon marked separation due to behavioral factors, as determined by selection of pupping locations far from those in Bristol Bay, and the ambiguity regarding the degree of migration and breeding dispersal (if any). Their judgment suggests behavioral separation is possible, but the available evidence is not strong, or is contradicted by other evidence. Our review of behavioral factors indicates that the observed harbor seal behaviors in Iliamna Lake are not uncommon; harbor seals in Iliamna Lake have not been documented to display behaviors outside the range of normal harbor seal behaviors (*e.g.,* no unique mating, pupping, or foraging behaviors reported), although there are unresolved questions about migration and use of under ice shelters. There is no information available to suggest that harbor seals living in ice conditions year-round in a freshwater system would require different behavioral adaptations from harbor seals living in ice conditions in a saltwater or estuarine system. Despite the lack of these obvious indications of potential behavioral separation, we recognize the possibility that the selection of pupping locations distant from other known pupping locations could be construed as a behavior and indicate marked separation as a result of the selection of pupping sites limiting the potential for interbreeding. Therefore, we find that the best available evidence is not conclusive but indicates that harbor seals in Iliamna Lake may be markedly separated from other harbor seals of the subspecies *P. v. richardii* as a consequence of behavioral factors.

Genetics: To further consider whether harbor seals in Iliamna Lake are markedly separated from other populations of eastern North Pacific harbor seals as a consequence of physical, physiological, ecological, or behavioral factors, we examined available genetic evidence which may be indicative of separation. Genetic samples available from harbor seals in Iliamna Lake were compared to genetic samples available from harbor seals in the Egegik and Ugashik regions of eastern Bristol Bay. Bristol Bay has the nearest concentration of seals to Iliamna Lake, and the BRT determined ''the seals in eastern Bristol Bay would be expected to be the most similar to the Iliamna Lake seals if there is breeding dispersal between the two areas, and therefore would be expected to pose the most stringent test for demonstrating discreteness'' (Boveng *et al.,* 2016).

Genetic samples have been collected and analyzed from 13 harbor seals in Iliamna Lake collected in six years from 1996 through 2012. The mitochondrial DNA (mtDNA) analysis revealed that 11 of 13 seals sampled from Iliamna Lake exhibited the same mtDNA haplotype (O'Corry-Crowe 2013), meaning all 11 seals had the same group of genes inherited from their female parent. The remaining two DNA samples did not yield results for this test. This specific mtDNA haplotype (Pvit-Hap#7) is the most common haplotype found in harbor seals sampled from Bristol Bay and is observed in roughly 21 percent of harbor seals from the Egegik and Ugashik regions of Bristol Bay (Burns *et al.,* 2013; O'Corry-Crowe 2013). Thus, this haplotype is not unique to harbor seals in Iliamna Lake.

The identification of only one mtDNA haplotype in harbor seals from Iliamna Lake appears to suggest unusually low genetic diversity. For comparison, 76 harbor seals sampled from the Egegik

and Ugashik regions of eastern Bristol Bay exhibited 33 different mtDNA haplotypes (O'Corry-Crowe 2013; Burns *et al.,* 2013). If seals from the Egegik and Ugashik regions were immigrating into the lake and staying year-round, there would be almost an 80 percent likelihood that one of the other mtDNA haplotypes, not Pvit-Hap#7, would be seen in samples collected from Iliamna Lake (O'Corry-Crowe 2013). However, because mtDNA is inherited from the mother, mtDNA diversity analysis cannot determine if male seals are migrating to and from the lake and breeding with resident female seals. Hardee (2008) recognized similar limitations of mtDNA given observations of male harbor seals in the Pacific Northwest traveling larger distances than previously believed, possibly to mate in a separate geographic region before returning to their home site. Therefore, conclusive results about the level of genetic diversity require analyses using nuclear DNA (nDNA; which also provides information from the male parent), and more formal analyses of mtDNA with statistical comparisons to harbor seals sampled from other regions within the range of the taxon (O'Corry-Crowe 2013). These more stringent data regarding genetic diversity do not exist.

In addition to examining the existing genetic diversity of the samples, analyses were conducted to examine the extent of genetic differentiation between harbor seals sampled in Iliamna Lake from those sampled in the Egegik and Ugashik regions of eastern Bristol Bay. The results of analyses examining genetic differentiation using both mtDNA and nDNA suggest that the harbor seals sampled in Iliamna Lake were genetically differentiated from harbor seals sampled in the Egegik and Ugashik regions of eastern Bristol Bay (Burns *et al.,* 2013; O'Corry-Crowe 2013). The results of these analyses also suggest that male and female-mediated dispersal between the Egegik and Ugashik regions of eastern Bristol Bay and Iliamna Lake was restricted (Burns *et al.,* 2013; O'Corry-Crowe 2013). Although no directed comparisons were conducted between Iliamna Lake samples and genetic samples collected from harbor seals in other areas of Bristol Bay or other portions of the range of the taxon, the measure of mtDNA genetic differentiation between seals in Iliamna Lake and those in eastern Bristol Bay yielded results showing substantially greater genetic differentiation than all previous pairwise comparisons between the other major centers of harbor seal abundance in Alaska (O'Corry-Crowe 2012; Boveng *et al.,* 2016). These genetic differentiation results are suggestive of the presence of a small, isolated population of harbor seals in Iliamna Lake.

O'Corry-Crowe (2013) identifies several limitations of the findings for the Iliamna Lake samples. He cautions that the sample size is extremely small and that questions regarding the patterns of kinship among the collected samples remain unresolved (*i.e.,* if some of the samples were from related individuals, then the data could be skewed and not representative of a random sampling of the population), and indicates that genetic differentiation may be enhanced in small populations when there is a rapid rate of genetic drift, even when there is continued gene flow. Although the 13 genetic samples from seals in Iliamna Lake were collected between 1996 and 2012, most samples were collected during months when seasonal migrants would not be expected to be in the lake, thus the power to detect seasonal migrants may be low. Conversely, the timing of the samples may be benficial for considering if the resident seals in the lake are discrete from their marine counterparts because for most samples seasonal migrants would not be expected to be present in the lake. O'Corry-Crowe (2013) also provides recommendations for future genetic research to resolve lingering issues, including analyzing 20 microsatellite loci (only 9–11 loci were analyzed) and updating the techniques used for the analyses to newer technologies, which would increase the power to resolve genetic questions. We also note that the tests for genetic differentiation compared the Iliamna Lake samples solely against samples collected from the Egegik and Ugashik regions of eastern Bristol Bay. Thus, the samples used for the comparison group may not be representative of all the seals that could migrate to Iliamna Lake.

The genetic data available suggest the harbor seals sampled in Iliamna Lake have low mtDNA diversity, possess the most common mtDNA haplotype found in Bristol Bay harbor seals, and are genetically differentiated from harbor seals sampled in the Egegik and Ugashik regions of eastern Bristol Bay. Given the concerns about the limited nature of the available genetic information previously discussed here and by O'Corry-Crowe (2013), ambiguity remains regarding the degree of separation, and hence discreteness, of harbor seals in Iliamna Lake. However, in the absence of more samples collected from a greater number of seals in Iliamna Lake and the Kvichak River, to include the potential migration season, and/or completion of additional tests such as those recommended by O'Corry-Crowe (2013), we consider the existing genetic results to be the best available data upon which to base our determination. These genetic results support a decision that harbor seals in Iliamna Lake are markedly separated from harbor seals in eastern Bristol Bay, and by assumption, from the remainder of the taxon.

Discreteness Conclusion

We find the available evidence for discreteness based on physical, physiological, or ecological factors to be unconvincing. The available evidence based on behavioral factors is not conclusive, but the selection of pupping locations distant from other known pupping locations could be construed as a behavior and indicate marked separation as a result of the selection of pupping sites limiting the potential for interbreeding. The strongest evidence for discreteness derives from 13 genetic samples collected from seals in Iliamna Lake. Analyses of these samples strongly indicate the seals from Iliamna Lake are genetically differentiated from seals sampled in two locations within Bristol Bay (Ugashik and Egegik), the nearest concentration of seals to Iliamna Lake with genetic data available. Genetic comparisons of samples for the entire taxon do not exist, but this region within Bristol Bay was expected to provide the most stringent comparison for discreteness if there is breeding dispersal between the two regions. The BRT was in strong agreement that the genetic data reflect marked separation, although the BRT acknowledged that the mechanism of such separation is unknown and the data are limited. It is possible that the limited available genetic data may accurately represent the situation in both Iliamna Lake and all of Bristol Bay, or that additional genetic analysis from *P. v. richardii* animals sampled from elsewhere in their range or from additional seals in Iliamna Lake, could result in a different conclusion. Nonetheless, the best available genetic information leads us to conclude that some portion, and perhaps all, of the harbor seals in Iliamna Lake likely constitute a resident population that is genetically differentiated from harbor seals in eastern Bristol Bay, and thus meet the criteria for consideration as a discrete entity per our DPS policy (61 FR 4722; February 7, 1996).

Significance

Having determined that resident seals from Iliamna Lake are likely discrete, at

least from harbor seals in the Egegik and Ugashik regions of nearby Bristol Bay, we next sought to determine whether they are significant to the *P. v. richardii* subspecies.

In carrying out the significance examination per our DPS policy (61 FR 4722; February 7, 1996), we are to consider available scientific evidence of the population's importance to the taxon to which it belongs. This consideration may include, but is not limited to, the following: (1) Persistence of the discrete population segment in an ecological setting unusual or unique for the taxon; (2) evidence that loss of the discrete population segment would result in a significant gap in the range of the taxon; (3) evidence that the discrete population segment represents the only surviving natural occurrence of a taxon that may be more abundant elsewhere as an introduced population outside its historic range; or (4) evidence that the discrete population segment differs markedly from other populations of the species in its genetic characteristics.

This determination, however, is highly fact specific and may consider factors besides those enumerated above. Further, significance of the discrete population segment is not necessarily determined by existence of one of these classes of information standing alone. Information analyzed under these and any other applicable considerations is evaluated relative to the biological and ecological importance of the discrete population to the taxon as a whole. Accordingly, all relevant and available biological and ecological information is analyzed. As we explained in the DPS policy, ''the principal significance to be considered in a potential DPS will be the significance to the taxon to which it belongs'' (61 FR 4722, 4724; February 7, 1996). Finally,we assessed the biological and ecological significance of the seals in Iliamna Lake to the *P. v. richardii* (the eastern North Pacific harbor seal) taxon in light of Congressional guidance that the authority to list DPSs be used ''sparingly'' while conserving the genetic diversity of the species (see Senate Report 151, 96th Congress, 1st Session).

Persistence in an Unusual or Unique Ecological Setting: In assessing the ''persistence of the discrete population segment in an ecological setting unusual or unique for the taxon,'' we considered whether specific characteristics of the Iliamna Lake environment are unusual or unique; whether persistence in the Iliamna Lake environment is unusual or unique; and whether there are adaptations as a result of persistence in an unusual or unique environment which would result in the discrete population being biologically or ecologically significant to the taxon *P. v. richardii.*

The diet of harbor seals in Iliamna Lake is consistent with what we would expect for the species occupying a freshwater system dominated by anadromous salmon. Hauser *et al.* (2008) indicate that harbor seals in Iliamna Lake consumed large amounts of sockeye salmon when they were seasonally abundant, and also fed on trout, char, graylings, lampreys, smelts, sculpins, whitefishes, sticklebacks, and other unidentified prey items. Burns *et al.* (2013) examined eight harbor seal stomachs collected from seals harvested from Iliamna Lake in 2011 and 2012; only three had identifiable prey items and the remaining five stomach were either empty, only had worms, or had unidentifiable contents. An examination of the identifiable prey items found that these seals had consumed small or young salmonids (salmon and/or trout), threespine stickleback, and Arctic grayling or lake whitefish (Burns *et al.,* 2013). The variety and types of prey items in the diet of these sampled seals in Iliamna Lake reflects harbor seals being opportunistic feeders (Carretta *et al.,* 2015), and the available data suggest no unusual or unique prey for the habitat occupied.

We also considered whether the habitat available for use by seals in Iliamna Lake is unusual or unique. Harbor seals commonly use reefs, sand and gravel beaches, sand and mud bars, island beaches, and ice (glacial ice, pan ice, sea ice, or icebergs) as haul-out sites. Harbor seals in Iliamna Lake are known to haul-out on rocky and sandy substrates, sand bars, small islands, and ice near pressure cracks or polynas (Burns *et al.,* 2011; Burns *et al.,* 2012). None of these haul-out substrates are unique or unusual for harbor seals. Harbor seals in Iliamna Lake are reported to pup both on ice (Burns *et al.* 2013) and other haul-outs in the absence of ice. There is no evidence of seals in Iliamna Lake pupping in air pockets beneath the ice, which would be unusual. Such use has been hypothesized for the harbor seals in the Lacs des Loups Marins (Consortium Gilles Shooner & Associes *et al.* 1991 *as cited in* Smith 1997; DFO 2016). According to LTK, pupping in Iliamna Lake likely occurs at island beaches or sandbars in the northeastern portion of the lake, which is consistent with the types of substrates upon which aerial surveys documented pups (*i.e.,* on low-lying islands and sand spits; Burns *et al.,* 2013). Nothing suggests that harbor seals in Iliamna Lake display unusual or unique pupping behaviors (including habitat usage).

Smith and Horonowitsch (1987) studied the ice at one location within the Lacs des Loups Marins and documented what they refer to as ''shoreline ice-steps'' which they speculated could be used as breathing chambers for over-wintering seals in the lake. LTK suggests the presence and use of similar under-ice haul-outs in Iliamna Lake (Burns *et al.,* 2013). While this would represent unusual habitat use for harbor seals in general, and unique habitat for harbor seals of *P. v. richardii,* it would be consistent with the general observation that harbor seals exhibit wide variation in habitat use, rather than being indicative of an adaptation by seals in Iliamna Lake that would be significant to the *P. v. richardii* taxon as a whole (see further discussion of habitat adaptation below).

Harbor seals have the broadest distribution and occur in more different habitats than any other pinniped species (Burns 2002; COSEWIC 2007), and are frequently and commonly observed in freshwater systems (Burns 2002). Mansfield (1967) provides information about sightings of harbor seals in rivers and lakes in Arctic Canada (referencing Doutt 1942 and Harper 1961 for detailed summaries of Arctic harbor seals' freshwater distribution), indicating that harbor seals have ''a strong liking for fresh water'' and are often found in estuaries and freshwater habitats ''far from the sea.'' Beck *et al.,* (1970) report harbor seals in the Thlewiaza River system and associated lakes west of Hudson Bay. Smith *et al.* (1994) and Smith (1997) provide an extensive list of reports of harbor seals documented in freshwater systems. Smith *et al.* (1996) conducted analyses involving both the Lacs des Loups Marins harbor seals as well as a second group of ''lacustrine'' harbor seals from Kasegalik Lake in Canada's Northwest Territory. Middlemas *et al.* (2006) provide documentation of harbor seals in a Scottish river system. The Committee on the Status of Endangered Wildlife in Canada (COSEWIC) reports that harbor seals occasionally ascend the St. Lawrence River to the Great Lakes (COSEWIC 2007). In the Bristol Bay region, harbor seals have been observed in other lakes in addition to Iliamna Lake, such as Lake Becharof and Naknek Lake (Mathisen and Kline 1992). Thus, the presence of harbor seals in freshwater systems or lakes, including Iliamna Lake, is not unusual or unique for the species.

Year-round persistence of harbor seals in a lake is less common. Besides the unknown number of harbor seals

occupying Iliamna Lake through the winter, the Lacs des Loups Marins harbor seals are the only other documented instance of harbor seals persisting in freshwater systems year-round. However, a review of available literature suggests the possibility this scenario may be more prevalent than just these two groups of harbor seals. For example, Mansfield (1967) states that the population of freshwater harbor seals in the Upper and Lower Seal Lakes east of Hudson Bay (a.k.a. the Lacs des Loups Marins) is not unique given reports of harbor seals found in other freshwater systems of Canada. Beck *et al.* (1970) postulated that harbor seals may live in the Thlewiaza River and associated lakes year-round, and documented a pup in the Edehon Lake, leading them to conclude that harbor seal reproduction is successful in that freshwater habitat. Beck *et al.* (1970) also concluded that individual seals in those lakes may be born and spend most or all of their lives in freshwater, but there was no reason to believe they were an isolated population. In Alaska, winter aerial surveys led Savarese and Burns (2010) to suggest that harbor seals are present year-round in Vitus Lake, a tidally-influenced lake near the Bering Glacier. No pups were documented during that study and diet and genetic data indicated seals from various stocks moved into Vitus Lake to take advantage of local salmon runs (Savarese and Burns 2010). These reports of potential year-round presence of harbor seals in various freshwater systems are sporadic, and do not confirm self-sustaining populations exist in those other freshwater systems. Therefore, it is reasonable to conclude that the year-round persistence of a discrete population of harbor seals in the freshwater environment of Iliamna Lake is at least unusual, if not unique, to the *P. v. richardii* harbor seal taxon.

The BRT considered whether the persistence of the population of harbor seals in this setting is important to the taxon as a whole (see discussion in Boveng *et al.,* 2016). Specifically, the BRT considered whether harbor seals in Iliamna Lake exhibit any adaptations to the environment which would be biologically or ecologically significant to the *P. v. richardii* harbor seal taxon. The evidence of such adaptations is not necessarily required to demonstrate significance; however, the BRT examined such evidence here in light of harbor seals' widespread and diverse habitat and diet. The BRT considered the physiology of the seals in Iliamna Lake as well as their over-wintering strategy as possible indicators of adaptations of potential importance for the taxon.

As previously discussed, some local residents of the Iliamna Lake region have suggested they think the harbor seals harvested from Iliamna Lake taste, look, or feel different (*e.g.,* seals are fatter; pelage is softer) from those harvested in the marine environment (Burns *et al.,* 2013). There was, however, a lack of consensus regarding the perceived differences (*e.g.,* some say seals from Iliamna Lake are darker than marine counterparts, others say the seals are lighter) among the local residents interviewed. Moreover, attributes such as fatness and softness of the coat, or the way the seals taste when consumed, are not necessarily inherited traits and could be acquired during time spent in the lake. Unlike other lake seal species, there are no data available to document whether morphological (*e.g.,* craniometric) differences exist; if such morphological differences are present, they are not distinct enough to be generally recognized in traditional knowledge of Alaska Native residents in the area (see discussion in Boveng *et al.,* 2016). There is no evidence to suggest these reported physical differences in fatness, softness, or taste are adaptations that would convey significance of these seals to the taxon.

The use of air gaps under the ice in winter is a potential adaptation to freshwater life in sub-Arctic regions, and is only documented among harbor seals in one location (*P. v. mellonae* of Lacs des Loups Marins). Whether the use of under-ice shelters would be a true adaptation to a freshwater environment which freezes over, or would simply be a response to habitat conditions that may be used by any harbor seal exposed to those conditions, remains uncertain. On the importance of this particular behavior relative to significance of seals in Iliamna Lake to the *P. v. richardii* subspecies, the BRT concluded any assessment would ''be in the realm of judgment or even speculation'' (Boveng *et al.,*2016). Even though harbor seals in Iliamna Lake cope with the extensive ice cover in winter, there is no indication they have adapted or modified their breeding, whelping, or pup-rearing behaviors in a manner unusual for, or of significance to, the taxon.

The BRT members were in strong agreement that harbor seals persisting year-round and breeding in a freshwater lake that freezes over almost completely nearly every year is unique for the subspecies *P. v. richardii,* and unusual for the harbor seal species. However, there was a lack of consensus amongst BRT members whether the available evidence reflects physical, life-history, or other adaptations as a result of persisting in an unusual or unique ecological setting which would make the harbor seal population in Iliamna Lake biologically or ecologically significant to the broader taxon. The discrepancies in opinion stemmed from ''differences in assessing the weights of several lines of qualitative and indirect evidence'' (Boveng *et al.,* 2016). The BRT also concluded (1) seals from the marine population would be able to persist in the Iliamna Lake setting, and (2) even if seals from the marine population were unable to persist in Iliamna Lake, the ''lack of 'ecological exchangeability' is not important to the persistence of the taxon as a whole'' (Boveng *et al.,* 2016). Ultimately, the BRT's assessment favored ''a conclusion that the evidence does not support significance'' (Boveng *et al.,* 2016). We agree that persistence of a population of harbor seals in the unusual or unique ecological setting of Iliamna Lake in and of itself does not confer significance of that population to the taxon. The absence of evidence suggesting the harbor seals in Iliamna Lake have adaptations to their environment which would benefit the taxon to which they belong leads us to determine that the persistence of a population of harbor seals in Iliamna Lake is not significant to the subspecies *P. v. richardii.*

Evidence That Loss Would Result in Significant Gap in Range: Eastern North Pacific harbor seals range from Mexico northward along the coastlines of the continental U.S. and Canada and much of Alaska. In Alaska, harbor seals of this subspecies are distributed almost continuously throughout the southern coastal waters in the region surrounding Iliamna Lake. In assessing whether the loss of harbor seals in Iliamna Lake would result in a significant gap in the range, we considered a scenario whereby all the seals in the lake were extirpated and there was no migration into the lake, either because there is no migration currently occurring or because a future physical barrier prevents migration. Given the extensive and continuous range of the eastern North Pacific harbor seals, the loss of the small proportion of habitat in Iliamna Lake would not result in a significant gap in the range. Furthermore, the evidence indicating possible seasonal movement of some harbor seals from Bristol Bay to Iliamna Lake suggests that the habitat in this portion of the range could be reoccupied.

The loss of harbor seals in Iliamna Lake would not have a detrimental impact to other harbor seal populations

that comprise the subspecies *P. v. richardii,* as this is not an interstitial population of harbor seals whose loss would isolate another population from the main group. Additionally, there are only an estimated 400 harbor seals in Iliamna Lake (Boveng *et al.,* 2016), so this population represents a minute fraction of the total population ofeastern North Pacific harbor seals, estimated at 360,000 (DFO 2010).

The BRT was in strong agreement that the evidence is clear that the loss of the Iliamna Lake segment would not result in a significant gap in the range of the taxon, and we agree.

Evidence of Only Surviving Natural Occurrence: Harbor seals in taxon *P. v. richardii* are currently found throughout their historic range along the coasts from Baja California, Mexico, northward to Alaska, and west through the Gulf of Alaska and Aleutian Islands, and in the Bering Sea north to Cape Newenham and the Pribilof Islands. There are no known introductions of this species to any place outside its historic range, thus it is naturally occurring wherever it occurs. The BRT was unanimous in its assessment that harbor seals in Iliamna Lake are not the only surviving natural occurrence of the taxon. We concur in that determination.

Evidence of Marked Difference in Genetic Characteristics: As discussed above, the limited genetic data available from seals in Iliamna Lake indicate 11 of 13 (2 samples did not yield results) sampled seals had the same mtDNA haplotype, an indication of possible low genetic diversity (O'Corry-Crowe 2013). Unlike the Lacs des Loups Marins harbor seals, which exhibit mtDNA haplotypes that are only found in seals from the Lacs des Loups Marins (Smith 1997), the single mtDNA haplotype exhibited in the harbor seals in Iliamna Lake is not unique to Iliamna Lake. Rather, it is the most common mtDNA haplotype found in samples from harbor seals in Bristol Bay (O'Corry-Crowe 2013; Van Lanen *et al.,* 2013). One plausible explanation for the single haplotype found in all the harbor seal samples from Iliamna Lake is that these seals are simply a genetic subset of seals from Bristol Bay, and have lost rather than gained substantial amounts of genetic diversity since isolation. An alternative explanation is the seals in Iliamna Lake have been isolated a long time, during which they may have accumulated genetic differences at other loci (not currently examined) via mutation, especially for loci under selective pressure (*i.e.,* adaptation). However, as previously discussed, only a small number of genetic loci were tested and the sample size was small, so the reason for a single mtDNA haplotype is undeterminable at this time. We conclude that the best scientific and commercial data available, a single mtDNA haplotype which is commonly found in other populations of the taxon and the data used to assess discreteness of the population, do not indicate that harbor seals in Iliamna Lake have novel genes which could be significant to the taxon as a whole.

There is no strong evidence to indicate the existence of phenotypic differences between harbor seals in Iliamna Lake and those in other portions of the taxon's range. Although there have been some LTK reports that the seals in Iliamna Lake may taste different or have pelage of varying appearance from seals in Bristol Bay, there have been no studies assessing whether these perceived differences are the result of significant differences in genetics. The BRT members did not reach consensus regarding this issue, with a slight preponderance of opinion favoring the conclusion that the genetic characteristics of seals in Iliamna Lake did not convey significance to these seals in regards to *P. v. richardii.* Some members considered the data available as mostly insufficient for drawing a conclusion regarding significance, and some considered the evidence against significance slightly more persuasive than the evidence for significance. Accordingly, we find that the genetic characteristics (*i.e.,* mtDNA haplotype) found in seals from Iliamna Lake do not differ markedly from those found in Bristol Bay and therefore determine that the best available genetic data, albeit limited, supports a conclusion that harbor seals in Iliamna Lake do not have genetic characteristics that are significant to the taxon as a whole.

Overall Significance to the Taxon: We considered several factors that could indicate whether harbor seals in Iliamna Lake may be biologically and ecologically significant to the taxon as a whole. Of the four factors delinated in the 1996 DPS policy, we conclude that there is evidence of only one: The population persists in an unusual or unique setting for the taxon. As we explained in our policy, ''occurrence in an unusual ecological setting is potentially an indication that a population segment represents a significant resource of the kind sought to be conserved by the'' ESA and in ''any actual case of a DPS recognized in part on this basis, the Services will describe in detail the nature of this significance when accepting a petition or proposing a rule'' (61 FR at 4724). While year-round persistence in the freshwater environment of Iliamna Lake is unique to the taxon *P. v. richardii* and unusual for the entire species, we agree with the BRT (Boveng *et al.,* 2016) that the best scientific and commercial data available are limited and suggest that the persistence of the seals in Iliamna Lake is not significant to the taxon as a whole. The loss of the Iliamna Lake segment would not result in a gap in the range of the taxon, and the harbor seals in Iliamna Lake are not the only surviving natural occurrence of the taxon; thus harbor seals in Iliamna Lake do not demonstrate significance to the taxon based on these factors. Further, available genetic data suggest that harbor seals in Iliamna Lake are not significant to the larger taxon. Although the best available genetic data indicate that at least some of the seals in Iliamna Lake are distinct from harbor seals in the eastern regions of nearby Bristol Bay, the genetic characteristics (*e.g.,* the single mtDNA observed in samples from seals in Iliamna Lake is the most common haplotype found in seals frim Bristol Bay) do not appear to differ in ways that would convey significance to the *P. v. richardii* subspecies.

Individual BRT members were not in agreement regarding the degree of scientific support overall for or against the significance of seals in Iliamna Lake to the *P. v. richardii* subspecies, but stated ''the slight majority judgment against significance of the population segment . . . summarized a diversity of views about how much weight to place on the various lines of mostly weak and qualitative evidence'' and that ''the evidence itself must be characterized as mostly indirect, qualitative rather than quantitative, and equivocal for the purpose of demonstrating biological or ecological importance to the broader taxon'' (Boveng *et al.,* 2016). Taking into consideration the totality of all the information discussed above regarding the possible significance of harbor seals in Iliamna Lake to the *P. v. richardii* taxon, including the qualitative and equivocal nature of the available information, along with the guidance from legislative history to identify DPSs ''sparingly,'' we find that the available evidence supports a conclusion that the harbor seals in Iliamna Lake are not significant to the remainder of the taxon.

DPS Conclusion

Based on the best scientific and commercial data available, we find the evidence for marked separation of harbor seals in Iliamna Lake from the remainder of the taxon based on physical, physiological, ecological or behavioral factors to be unconvincing or

weak. The strongest support for marked separation comes from the best available genetic data which, although limited and preliminary, support a conclusion that at least some of the harbor seals in Iliamna Lake are likely isolated from harbor seals in the Egegik and Ugashik regions of eastern Bristol Bay. Thus, we conclude that the harbor seal population in Iliamna Lake is separated from other populations of the taxon and meet the discreteness criterion of our DPS policy (61 FR 4722; February 7, 1996).

Per the second component of our DPS Policy, we are to consider available scientific evidence of the discrete population's importance to the taxon to which it belongs (61 FR 4722; February 7, 1996). Our review of the best available information suggests the only characteristic which may make this population of harbor seals unique within its taxon is the fact that they persist year-round in a freshwater system which freezes over to some degree in most winters. While that characteristic is unique within the subspecies *P. v. richardii,* we determined such persistence is not biologically or ecologically important to the taxon as a whole. Furthermore, the information available supports a conclusion that loss of this population would not be detrimental to the persistence of the taxon or constitute a gap in the range of the taxon; this population is not the only natural surviving population; and there are no unique genetic characteristics conveying significance of this population to the taxon. After reviewing the best available data as they apply to the significance criterion, we conclude that the harbor seals in Iliamna Lake are not significant to the taxon *P. v. richardii.*

Under our DPS Policy, both the discreteness and significance elements must be met to qualify as a DPS. Our review has determined that the seals persisting year-round in Iliamna Lake are discrete but not significant; therefore, the harbor seals in Iliamna Lake do not qualify as a DPS and are not a listable entity under the ESA.

Finding

In assessing whether the actions in the petition are warranted, we reviewed the best available scientific and commercial information available, including the BRT report, the petition and literature cited in the petition, published and grey literature relevant to the topic, correspondence with experts in academic and government institutions, documentation of LTK, and public comments. On the basis of this review, we have determined that harbor seals in Iliamna Lake meet the criteria for discreteness but do not meet the criteria for significance. As such, the harbor seals in Iliamna Lake do not meet all the criteria necessary to constitute a DPS, and thus are not a listable entity under the ESA. Therefore, we find that the petitioned actions to list the harbor seals in Iliamna Lake as a threatened or endangered species under the ESA, and to designate critical habitat, are not warranted.

In our 90-day finding (78 FR 29098; May 17, 2013), we indicated we were commencing a status review of the harbor seals in Iliamna Lake. To assist our evaluation of whether the seals in Iliamna Lake constitute a DPS, the BRT prepared a report which compiled background information about the harbor seals in Iliamna Lake and evaluated the scientific information relevant to the DPS criteria (Boveng *et al.,* 2016). Upon our determination that the DPS criteria were not met and the seals in Iliamna Lake are not a ''species'' under the ESA, there is no need to complete the status review by conducting a threats assessment or extinction risk assessment in light of the factors in section 4(a)(1) of the ESA.

In some instances, where we find a petitioned action is not warranted because the petitioned population does not constitute a ''species'' under the ESA, we have initiated a status review of a related or larger population (*e.g.,* the 12-month determination that the petitioned action to list Lynn Canal Pacific herring was not warranted, followed by a status review of the Southeast Alaska population of Pacific herring; 73 FR 19824; April 11, 2008). Here, the scope of the petition was limited to the seals in Iliamna Lake, and since the most recent abundance data for the Bristol Bay harbor seal stock (the stock that includes seals in Iliamna Lake) indicates this stock increased from an estimated 18,577 seals in 2005 to an estimated 32,350 seals in 2011 (Allen and Angliss 2014; Muto and Angliss 2015), we are not initiating a status review of the Bristol Bay harbor seal stock at this time.

BILLING CODE 3510–22–P

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 17–C0001]

PetSmart, Inc., Provisional Acceptance of a Settlement Agreement and Order

AGENCY: Consumer Product Safety Commission

ACTION: Notice.

SUMMARY: It is the policy of the Commission to publish settlements which it provisionally accepts under the Consumer Product Safety Act in the **Federal Register** in accordance with the terms of the Consumer Product Safety Commission's regulations. Published below is a provisionally-accepted Settlement Agreement with PetSmart, Inc., containing a civil penalty in the amount of four million, two hundred fifty thousand dollars ($4,250,000) within thirty (30) days of service of the Commission's final Order accepting the Settlement Agreement.

DATES: Any interested person may ask the Commission not to accept this agreement or otherwise comment on its contents by filing a written request with the Office of the Secretary by December 2, 2016.

ADDRESSES: Persons wishing to comment on this Settlement Agreement should send written comments to the Comment 17–C0001, Office of the Secretary, Consumer Product Safety Commission, 4330 East-West Highway, Room 820, Bethesda, Maryland 20814–4408.

FOR FURTHER INFORMATION CONTACT: Philip Z. Brown, Trial Attorney, Division of Compliance, Office of the General Counsel, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, Maryland 20814–4408; telephone (301) 504–7645.

SUPPLEMENTARY INFORMATION: The text of the Agreement and Order appears below.[1]

[1] The Commission voted (4–1) to provisionally accept the Settlement Agreement and Order regarding PetSmart, Inc. Chairman Kaye, Commissioner Adler, Commissioner Robinson and Commissioner Mohorovic voted to provisionally accept the Settlement Agreement and Order. Commissioner Buerkle voted to reject the Settlement Agreement and Order.

Dated: November 14, 2016.

Todd A. Stevenson,

Secretary.

UNITED STATES OF AMERICA CONSUMER PRODUCT SAFETY COMMISSION

In the Matter of: PETSMART, INC. CPSC Docket No.: 17–C0001

SETTLEMENT AGREEMENT

1. In accordance with the Consumer Product Safety Act, 15 U.S.C. 2051 − 2089 (''CPSA'') and 16 CFR 1118.20, PetSmart, Inc. (''PetSmart''), and the United States Consumer Product Safety Commission (''Commission''), through its staff, hereby enter into this Settlement Agreement (''Agreement''). The Agreement and the incorporated attached Order resolve staff's charges set forth below.

THE PARTIES

2. The Commission is an independent federal regulatory agency, established pursuant to, and responsible for, the enforcement of the CPSA, 15 U.S.C. 2051 − 2089. By executing the Agreement, staff is acting on behalf of the Commission, pursuant to 16 CFR 1118.20(b). The Commission issues the Order under the provisions of the CPSA.

3. PetSmart is a corporation, organized and existing under the laws of the state of Delaware, with its principal place of business in Phoenix, AZ.

STAFF CHARGES

4. Between April 2009 and September 2013, PetSmart imported and offered for sale in the United States, approximately 127,444 ''Great Choice'' or ''Top Fin'' brand 1.75 gallon, brandy snifter-style glass fish bowls (''Fish Bowls'' or ''Subject Products'') .

5. The Fish Bowls are a ''consumer product,'' ''distribut[ed] in commerce,'' as those terms are defined or used in sections 3(a)(5) and (8) of the CPSA, 15 U.S.C. 2052(a)(5) and (8). PetSmart is an ''importer,'' ''manufacturer'' and ''retailer'' of the Fish Bowls, as such terms are defined in sections 3(a)(11) and (13) of the CPSA, 15 U.S.C. 2052(a)(11) and (13).

Violation of CPSA Section 19(a)(4)

6. The Fish Bowls contain a defect which could create a substantial product hazard and create an unreasonable risk of serious injury because they can crack, shatter, or break during normal use, posing a laceration hazard to consumers.

7. Between August 2011 and January 2014, PetSmart received at least 19 incident reports of Fish Bowls cracking, breaking, or shattering during normal use, which, in at least 12 instances, resulted in serious injuries, including deep lacerations requiring stitches and severed tendons necessitating surgery.

8. PetSmart received at least three reports of consumers sustaining serious injuries during normal use of the Fish Bowls between August 2011 and September 2011 but neither initiated an investigation into the Subject Products in response to these reports of serious injury nor immediately reported to the Commission.

9. In May 2013, after receiving additional reports, including two reports of serious injuries to consumers, PetSmart initiated an investigation and evaluation of the defect and risk associated with the Fish Bowls. That investigation, which concluded in July 2013, identified deficiencies in the thickness and distribution of the glass in the Fish Bowls. During its investigation, PetSmart continued to receive reports of serious injury caused by the Fish Bowls. Firms may conduct a reasonably expeditious investigation, not normally exceeding 10 days, to evaluate their reporting obligations. *See* 16 CFR 1115.14(d). PetSmart's investigation took over two months to complete.

10. PetSmart stopped sale of the Fish Bowls in September 2013. At the time PetSmart stopped sale of the Fish Bowls, PetSmart had received at least 12 reports of consumers being injured during normal use of the Subject Products.

11. PetSmart did not file a Full Report with the Commission until January 31, 2014, pursuant to 15 U.S.C. 2064(b). PetSmart and the Commission jointly announced a recall of 10,200 Fish Bowls on April 24, 2014.

12. PetSmart's Full Report contained information on only 10,211 Fish Bowls imported and sold between February 2013 and September 2013. However, information produced by PetSmart during staff's civil penalty investigation revealed that PetSmart had actually sold a total of 91,500 Fish Bowls between March 2010 and September 2013 that posed the same laceration hazard. PetSmart and the Commission jointly announced an expanded recall of 91,500 Fish Bowls on November 17, 2015.

13. By the date of the expanded recall, PetSmart received at least 32 reports of Fish Bowls cracking, breaking or shattering during normal use, including 18 reports of injury. PetSmart received at least six of these reports of injury after the first recall.

14. Despite having information that the Fish Bowls contained a defect and created an unreasonable risk of serious injury, PetSmart did not notify the Commission immediately of such defect or risk, as required by sections 15(b)(3) and (4) of the CPSA, 15 U.S.C. 2064(b)(3) and (4), in violation of section 19(a)(4) of the CPSA, 15 U.S.C. 2068(a)(4).

15. Because the information in PetSmart's possession constituted actual and presumed knowledge, PetSmart knowingly violated section 19(a)(4) of the CPSA, 15 U.S.C. 2068(a)(4), as the term ''knowingly'' is defined in section 20(d) of the CPSA, 15 U.S.C. 2069(d).

16. Pursuant to Section 20 of the CPSA, 15 U.S.C. 2069, PetSmart is subject to civil penalties for its knowing violation of section 19(a)(4) of the CPSA, 15 U.S.C. 2068(a)(4).

Violation of CPSA Section 19(a)(13)

17. PetSmart's January 31, 2014 Full Report identified the Subject Products as 10,211 Fish Bowls, sold between February 2013 and September 2013, which posed a laceration hazard to consumers. The Full Report did not identify an additional 81,300 units of Subject Products that were sold prior to February 2013 that posed the same hazard and had been the subject of incident and injury reports received by PetSmart.

18. By failing to identify the correct amount and distribution dates of the Subject Products in PetSmart's Full Report, PetSmart knowingly misrepresented the scope of consumer products subject to an action required under section 15 of the CPSA. As a result of PetSmart's misrepresentation, the April 24, 2014 CPSC press release announcing the recall inaccurately stated that ''[a]bout 10,200'' Fish Bowls were affected by the hazard posed by the Fish Bowls. An expansion of the recall was announced on November 17, 2015.

19. By knowingly misrepresenting the scope of consumer products subject to an action under section 15 of the CPSA, PetSmart knowingly violated section 19(a)(13) of the CPSA, 15 U.S.C. 2068(a)(13), as the term ''knowingly'' is defined in section 20(d) of the CPSA, 15 U.S.C. 2069(d).

20. Pursuant to section 20 of the CPSA, 15 U.S.C. 2069, PetSmart is subject to civil penalties for its knowing violation of section 19(a)(13) of the CPSA, 15 U.S.C. 2068(a)(13).

RESPONSE OF PETSMART

21. PetSmart's settlement of this matter does not constitute an admission of staff's charges in paragraphs 4 through 20 above.

22. Between November 2013 and January 2014, PetSmart corresponded with CPSC staff regarding certain Fish

Bowl incidents. In this correspondence, PetSmart clearly stated that it first began selling the Fish Bowls in 2009. PetSmart also stated that it believed any product issues were limited to Fish Bowls manufactured for sale in 2013. CPSC staff did not ask PetSmart anything further regarding PetSmart's determination that the issues were limited to Fish Bowls sold between February 2013 and September 2013.

23. Following this correspondence, in January 2014, PetSmart provided the Commission with its report under section 15(b) of the CPSA, 15 U.S.C. 2064(b) concerning PetSmart's receipt of complaints and incident reports about the Fish Bowls. PetSmart's report provided information related only to Fish Bowls manufactured for sale in 2013, consistent with its communications to CPSC staff. CPSC staff did not ask PetSmart anything further regarding Fish Bowls sold prior to 2013.

24. On April 24, 2014, in conjunction with the Commission, PetSmart voluntarily announced a recall of Fish Bowls sold at PetSmart between February 2013 and September 2013.

25. PetSmart conducted the April 24, 2014, voluntary recall of the Fish Bowls, as well as the section 15(b) reporting, out of an abundance of caution and without PetSmart having concluded that the Fish Bowls contained a defect, posed a substantial product hazard, or created an unreasonable risk of serious injury or death.

26. On November 17, 2015, in conjunction with the Commission, PetSmart voluntarily expanded the recall of Fish Bowls to include units sold at PetSmart between March 2010 and February 2013. PetSmart disputes Staff's allegation that PetSmart had information that the Fish Bowls manufactured prior to 2013 contained a defect and created an unreasonable risk of serious injury.

27. PetSmart denies Staff's allegations that PetSmart knowingly misrepresented the scope of consumer products subject to an action under section 15 of the CPSA and that PetSmart knowingly violated section 19(a)(13).

AGREEMENT OF THE PARTIES

28. Under the CPSA, the Commission has jurisdiction over the matter involving the Fish Bowls and over PetSmart.

29. The parties enter into the Agreement for settlement purposes only. The Agreement does not constitute an admission by PetSmart or a determination by the Commission that PetSmart violated the CPSA's reporting requirements.

30. In settlement of staff's charges, and to avoid the cost, distraction, delay, uncertainty, and inconvenience of protracted litigation or other proceedings, PetSmart shall pay a civil penalty in the amount of four million, two hundred fifty thousand dollars ($4,250,000) within thirty (30) calendar days after receiving service of the Commission's final Order accepting the Agreement. All payments to be made under the Agreement shall constitute debts owing to the United States and shall be made by electronic wire transfer to the United States via: *http://www.pay.gov,* for allocation to, and credit against, the payment obligations of PetSmart under this Agreement. Failure to make such payment by the date specified in the Commission's final Order shall constitute Default.

31. All unpaid amounts, if any, due and owing under the Agreement, shall constitute a debt due and immediately owing by PetSmart to the United States, and interest shall accrue and be paid by PetSmart at the federal legal rate of interest set forth at 28 U.S.C. 1961(a) and (b) from the date of Default, until all amounts due have been paid in full (hereinafter ''Default Payment Amount'' and ''Default Interest Balance''). PetSmart shall consent to a Consent Judgment in the amount of the Default Payment Amount and Default Interest Balance, and the United States, at its sole option, may collect the entire Default Payment Amount and Default Interest Balance, or exercise any other rights granted by law or in equity, including, but not limited to, referring such matters for private collection, and PetSmart agrees not to contest, and hereby waives and discharges any defenses to, any collection action undertaken by the United States, or its agents or contractors, pursuant to this paragraph. PetSmart shall pay the United States all reasonable costs of collection and enforcement under this paragraph, respectively, including reasonable attorney's fees and expenses.

32. After staff receives this Agreement executed on behalf of PetSmart, staff shall promptly submit the Agreement to the Commission for provisional acceptance. Promptly following provisional acceptance of the Agreement by the Commission, the Agreement shall be placed on the public record and published in the **Federal Register**, in accordance with the procedures set forth in 16 CFR 1118.20(e). If the Commission does not receive any written request not to accept the Agreement within fifteen (15) calendar days, the Agreement shall be deemed finally accepted on the 16th calendar day after the date the Agreement is published in the **Federal Register**, in accordance with 16 CFR 1118.20(f).

33. This Agreement is conditioned upon, and subject to, the Commission's final acceptance, as set forth above, and it is subject to the provisions of 16 CFR 1118.20(h). Upon the later of: (i) Commission's final acceptance of this Agreement and service of the accepted Agreement upon PetSmart, and (ii) the date of issuance of the final Order, this Agreement shall be in full force and effect, and shall be binding upon the parties.

34. Effective upon the later of: (i) the Commission's final acceptance of the Agreement and service of the accepted Agreement upon PetSmart, and (ii) and the date of issuance of the final Order, for good and valuable consideration, PetSmart hereby expressly and irrevocably waives and agrees not to assert any past, present, or future rights to the following, in connection with the matter described in this Agreement: (i) an administrative or judicial hearing; (ii) judicial review or other challenge or contest of the Commission's actions; (iii) a determination by the Commission of whether PetSmart failed to comply with the CPSA and the underlying regulations; (iv) a statement of findings of fact and conclusions of law; and (v) any claims under the Equal Access to Justice Act.

35. PetSmart represents and agrees that it has enhanced its compliance program to ensure compliance with the CPSA with respect to any consumer product imported, manufactured, distributed or sold by the Firm and will maintain said compliance program. PetSmart represents that the ongoing compliance program contains: (i) written standards, policies and procedures including those designed to ensure that information that may relate to or impact CPSA compliance (including information obtained by quality control personnel) is conveyed effectively to personnel responsible for CPSA compliance, whether or not an injury is referenced; (ii) a mechanism for confidential employee reporting of compliance-related questions or concerns to either a compliance officer or to another senior manager with authority to act as necessary; (iii) effective communication of company compliance-related policies and procedures regarding the CPSA to all applicable employees through training programs or otherwise; (iv) management oversight of and responsibility for compliance; and (v) retention of all CPSA compliance-related records for at

least five (5) years, and availability of such records to staff upon reasonable request.

36. PetSmart represents and agrees that it has designed and implemented internal controls and procedures designed to ensure that, with respect to all consumer products imported, manufactured, distributed or sold by PetSmart: (i) information required to be disclosed by PetSmart to the Commission is recorded, processed and reported in accordance with applicable law; (ii) all reporting made to the Commission is timely, truthful, complete, accurate and in accordance with applicable law; and (iii) prompt disclosure is made to PetSmart's management of any significant deficiencies or material weaknesses in the design or operation of such internal controls that are reasonably likely to affect adversely, in any material respect, PetSmart's ability to record, process and report to the Commission in accordance with applicable law.

37. Upon reasonable request of staff, PetSmart shall provide written documentation of its internal controls and procedures, including, but not limited to, the effective dates of the procedures and improvements thereto. PetSmart shall cooperate fully and truthfully with staff and shall, upon reasonable notice make available all non-privileged information and materials, and personnel with direct involvement in such procedures and deemed necessary by staff to evaluate PetSmart's compliance with the terms of the Agreement.

38. The parties acknowledge and agree that the Commission may publicize the terms of the Agreement and the Order.

39. PetSmart represents that the Agreement: (i) is entered into freely and voluntarily, without any degree of duress or compulsion whatsoever; (ii) has been duly authorized; and (iii) constitutes the valid and binding obligation of PetSmart, enforceable against PetSmart in accordance with its terms. PetSmart will not directly or indirectly receive any reimbursement, indemnification, insurance related payment, or other payment in connection with the civil penalty to be paid by PetSmart pursuant to the Agreement and Order. The individuals signing the Agreement on behalf of PetSmart represent and warrant that they are duly authorized by PetSmart to execute the Agreement.

40. The signatories represent that they are authorized to execute this Agreement.

41. The Agreement is governed by the laws of the United States.

42. The Agreement and the Order shall apply to, and be binding upon, PetSmart and each of its successors, transferees, and assigns; and a violation of the Agreement or Order may subject PetSmart, and each of its successors, transferees, and assigns, to appropriate legal action.

43. The Agreement and the Order constitute the complete agreement between the parties on the subject matter contained therein.

44. The Agreement may be used in interpreting the Order. Understandings, agreements, representations, or interpretations apart from those contained in the Agreement and the Order may not be used to vary or contradict their terms. For purposes of construction, the Agreement shall be deemed to have been drafted by both of the parties and shall not, therefore, be construed against any party, for that reason, in any subsequent dispute.

45. The Agreement may not be waived, amended, modified, or otherwise altered, except as in accordance with the provisions of 16 CFR 1118.20(h). The Agreement may be executed in counterparts.

46. If any provision of the Agreement or the Order is held to be illegal, invalid, or unenforceable under present or future laws effective during the terms of the Agreement and the Order, such provision shall be fully severable. The balance of the Agreement and the Order shall remain in full force and effect, unless the Commission and PetSmart agree in writing that severing the provision materially affects the purpose of the Agreement and the Order.

UNITED STATES OF AMERICA CONSUMER PRODUCT SAFETY COMMISSION

In the Matter of: PETSMART, INC. CPSC Docket No.: 17–C0001

ORDER

Upon consideration of the Settlement Agreement entered into between PetSmart, Inc. (''PetSmart''), and the U.S. Consumer Product Safety Commission (''Commission''), and the Commission having jurisdiction over the subject matter and over PetSmart, and it appearing that the Settlement Agreement and the Order are in the public interest, it is:

ORDERED that the Settlement Agreement be, and is, hereby, accepted; and it is

FURTHER ORDERED that PetSmart shall comply with the terms of the Settlement Agreement and shall pay a civil penalty in the amount of four million, two hundred fifty thousand dollars ($4,250,000), within thirty (30) days after service of the Commission's final Order accepting the Settlement Agreement. The payment shall be made by electronic wire transfer to the Commission via: *http://www.pay.gov.* Upon the failure of PetSmart to make the foregoing payment when due, interest on the unpaid amount shall accrue and be paid by PetSmart at the federal legal rate of interest set forth at 28 U.S.C. 1961(a) and (b). If PetSmart fails to make such payment or to comply in full with any other provision of the Settlement Agreement, such conduct will be considered a violation of the Settlement Agreement and Order.

Provisionally accepted and provisional Order issued on the 14th day of November, 2016.

BY ORDER OF THE COMMISSION:

_____

Todd A. Stevenson, Secretary
U.S. Consumer Product Safety Commission

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 14795–001]

Shell Energy North America (US), L.P.; Notice of Intent To File License Application, Filing of Pre-Application Document, and Approving Use of the Traditional Licensing Process

a. *Type of Filing:* Notice of Intent to File License Application and Request to Use the Traditional Licensing Process.

b. *Project No.:* 14795–001.

c. *Date Filed:* October 3, 2016.

d. *Submitted By:* Shell Energy North America (US), L.P.

e. *Name of Project:* Hydro Battery Pearl Hill Project.

f. *Location:* On the Columbia River and Rufus Woods Lake, near Bridgeport, Douglas County, Washington. The project would be located on state lands and the lower reservoir and power generation and pumping equipment would be located on Rufus Woods Lake, a reservoir operated by the Army Corps of Engineers.

g. *Filed Pursuant to:* 18 CFR 5.3 of the Commission's regulations.

h. Potential *Applicant Contact:* Mr. Brian Johansen, Vice President Power Trading West, Shell Energy North America (US), L.P., 601 W. 1st Ave., Suite 1700, Spokane, Washington 99201; phone: (509) 688–6000.

i. *FERC Contact:* Ryan Hansen at (202) 502–8074; or email at *ryan.hansen@ferc.gov*.

j. Shell Energy North America (US), L.P. (Shell Energy) filed its request to use the Traditional Licensing Process on October 3, 2016. Shell Energy provided public notice of its request on October 13, 2016. In a letter dated November 9, 2016, the Director of the Division of Hydropower Licensing approved Shell Energy's request to use the Traditional Licensing Process.

k. With this notice, we are designating Shell Energy as the Commission's non-federal representative for carrying out informal consultation pursuant to section 7 of the Endangered Species Act and section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act; and consultation pursuant to section 106 of the National Historic Preservation Act.

l. Shell Energy filed a Pre-Application Document (PAD; including a proposed process plan and schedule) with the Commission, pursuant to 18 CFR 5.6 of the Commission's regulations.

m. A copy of the PAD is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site (*http://www.ferc.gov*), using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at *FERCONlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). A copy is also available for inspection and reproduction at the address in paragraph h.

n. Register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filing and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

Dated: November 9, 2016.

Kimberly D. Bose,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project Nos. 2593–031; 2823–020]

Algonquin Power (Beaver Falls), LLC; Notice of Scoping Meetings and Environmental Site Review and Soliciting Scoping Comments

Take notice that the following hydroelectric applications have been filed with the Commission and are available for public inspection:

a. *Type of Application:* Subsequent Licenses.

b. *Project Nos.:* 2593–031 and 2823–020.

c. *Date filed:* December 30, 2015.

d. *Applicant:* Algonquin Power (Beaver Falls), LLC.

e. *Name of Project:* Upper Beaver Falls Hydroelectric Project and Lower Beaver Falls Hydroelectric Project.

f. *Location:* On the Beaver River in Lewis County, New York. The projects are not located on federal lands.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Robert A. Gates, Executive Vice President, Eagle Creek Renewable Energy, 116 N. State Street, P.O. Box 167, Neshkoro, WI 54960–0167; (973) 998–8403; *bob.gates@eaglecreekre.com.*

i. *FERC Contact:* Andy Bernick, (202) 502–8660 or *andrew.bernick@ferc.gov*.

j. *Deadline for filing scoping comments:* January 12, 2017.

The Commission strongly encourages electronic filing. Please file scoping comments using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket numbers P–2593–031 and P–2823–020.

The Commission's Rules of Practice and Procedure require all interveners filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. These applications are not ready for environmental analysis at this time.

l. *The existing project works are as follows:*

The Upper Beaver Falls Project consists of: (1) A 328-foot-long, 25-foot-high concrete gravity dam with an uncontrolled overflow spillway; (2) a 48-acre reservoir with a storage capacity of 800 acre-feet at elevation 799.4 feet North American Vertical Datum of 1988 (NAVD 88); (3) a 17-foot-high, 26.5-foot-wide, 27.5-foot-long intake structure with a steel trash rack with 2 5/8-inch clear spacing; (4) a 90-foot-long, 16-foot-wide, 8-foot-high concrete penstock; (5) a powerhouse containing one turbine-generator with a nameplate rating of 1,500 kilowatts (kW); (6) a tailrace excavated in the riverbed; (7) a 2,120-foot-long, 2.4-kilovolt (kV) overhead and underground transmission line connecting to an existing substation; and (8) other appurtenances. The project generates about 8,685 megawatt-hours (MWh) annually.

The Lower Beaver Falls Hydroelectric Project consists of: (1) A 400-foot-long concrete gravity dam with a maximum height of 14 feet, including: (i) A 240-foot-long non-overflow section containing an 8-foot-wide spillway topped with flashboards ranging from 6 to 8 inches in height and (ii) a 160-foot-long overflow section with an ice sluice opening; (2) a 4-acre reservoir with a storage capacity of 27.9 acre-feet at a normal elevation of 769.6 feet NAVD 88; (3) an intake structure with a steel trash rack with 1 3/4-inch clear spacing, integral with a powerhouse containing two 500-kW turbine and generator units; (4) a tailrace; (5) a 505-foot-long, 2.4-kV transmission line connected to the Upper Beaver Falls powerhouse; and (6) appurtenant facilities. The project generates about 5,617 MWh annually.

The Lower Beaver Falls Project is located approximately 600 feet downstream of the Upper Beaver Falls Project. The dams and existing project facilities for both projects are owned by the applicant. The applicant proposes

no new project facilities or operational changes, but proposes that both projects be combined under a single license.

m. A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support. A copy is also available for inspection and reproduction at the address in item h above.

You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

n. *Scoping Process:* The Commission intends to prepare an environmental assessment (EA) on the projects in accordance with the National Environmental Policy Act. The EA will consider both site-specific and cumulative environmental impacts and reasonable alternatives to the proposed action.

Scoping Meetings

FERC staff will conduct one agency scoping meeting and one public meeting. The agency scoping meeting will focus on resource agency and non-governmental organization (NGO) concerns, while the public scoping meeting is primarily for public input. All interested individuals, organizations, and agencies are invited to attend one or both of the meetings, and to assist the staff in identifying the scope of the environmental issues that should be analyzed in the EA. The times and locations of these meetings are as follows:

Agency Scoping Meeting

Date: Tuesday, December 13, 2016.
Time: 9:00 a.m.
Place: Croghan Volunteer Fire Department.
Address: 6860 Fire Hall Street, Croghan, New York.

Public Scoping Meeting

Date: Tuesday, December 13, 2016.
Time: 7:00 p.m.
Place: Croghan Volunteer Fire Department.
Address: 6860 Fire Hall Street, Croghan, New York.

Copies of the Scoping Document (SD1) outlining the subject areas to be addressed in the EA were distributed to the parties on the Commission's mailing list. Copies of the SD1 will be available at the scoping meeting or may be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link (see item m above).

Environmental Site Review

The Applicant and FERC staff will conduct a project Environmental Site Review beginning at 1:00 p.m. on December 13, 2016. All interested individuals, organizations, and agencies are invited to attend. All participants should meet at the Upper Beaver Falls Project facility, located at 9692 New York State Route 126, Castorland, New York. All participants are responsible for their own transportation to the site and during the site visit. Anyone with questions about the Environmental Site Review should contact Mr. Jeff Kirch, Northern New York Regional Operator for Algonquin Power (Beaver Falls) LLC, at 315–783–5854 or *Jeffrey.kirch@eaglecreekre.com.*

Objectives

At the scoping meetings, the staff will: (1) Summarize the environmental issues tentatively identified for analysis in the EA; (2) solicit from the meeting participants all available information, especially quantifiable data, on the resources at issue; (3) encourage statements from experts and the public on issues that should be analyzed in the EA, including viewpoints in opposition to, or in support of, the staff's preliminary views; (4) determine the resource issues to be addressed in the EA; and (5) identify those issues that require a detailed analysis, as well as those issues that do not require a detailed analysis.

Procedures

The meetings are recorded by a stenographer and become part of the formal record of the Commission proceeding on the projects.

Individuals, organizations, and agencies with environmental expertise and concerns are encouraged to attend the meeting and to assist the staff in defining and clarifying the issues to be addressed in the EA.

Dated: November 9, 2016.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP16–472–000]

Northern Natural Gas Company; Notice of Availability of the Environmental Assessment for the Proposed Northern Lights 2017 Expansion Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Northern Lights 2017 Expansion Project, proposed by Northern Natural Gas Company (Northern) in the above-referenced docket. Northern requests authorization to construct, operate, and maintain new natural gas facilities in Sherburne, Isanti, and Rice counties, Minnesota, to provide for approximately 76,000 dekatherms per day to serve increased markets for industrial, commercial, and residential uses.

The EA assesses the potential environmental effects of the construction and operation of the Northern Lights 2017 Expansion Project in accordance with the requirements of the National Environmental Policy Act. The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The Northern Lights 2017 Expansion Project includes the following facilities:

- Approximately 2 miles of 8-inch-diameter pipeline loop [1] in Sherburne County;
- approximately 2.8 miles of 12-inch-diameter pipeline loop in Isanti County; and
- an additional 15,900-horsepower compression unit at Northern's existing Faribault Compressor Station in Rice County.

The FERC staff mailed copies of the EA to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the project area. In addition, the EA is available for public viewing on the FERC's Web site (*www.ferc.gov*) using the eLibrary link. A limited number of copies of the EA are available for distribution and public inspection at:

[1] A pipeline ''loop'' is a segment of pipe installed adjacent to an existing pipeline and connected to the existing pipeline at both ends.

Federal Energy Regulatory Commission, Public Reference Room, 888 First Street NE., Room 2A, Washington, DC 20426, (202) 502–8371.

Any person wishing to comment on the EA may do so. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that the Commission has the opportunity to consider your comments prior to making its decision on this project, it is important that we receive your comments in Washington, DC on or before on or before Friday, December 9, 2016.

For your convenience, there are three methods you can use to file your comments to the Commission. In all instances, please reference the project docket number (CP16–472–000) with your submission. The Commission encourages electronic filing of comments and has expert staff available to assist you at (202) 502–8258 or *efiling@ferc.gov.*

(1) You can file your comments electronically using the eComment feature on the Commission's Web site (*www.ferc.gov*) under the link to Documents and Filings. This is an easy method for submitting brief, text-only comments on a project;

(2) You can also file your comments electronically using the eFiling feature on the Commission's Web site (*www.ferc.gov*) under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''eRegister.'' You must select the type of filing you are making. If you are filing a comment on a particular project, please select ''Comment on a Filing''; or

(3) You can file a paper copy of your comments by mailing them to the following address: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Room 1A, Washington, DC 20426.

Any person seeking to become a party to the proceeding must file a motion to intervene pursuant to Rule 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.214).[2] Only intervenors have the right to seek rehearing of the Commission's decision. The Commission grants affected landowners and others with environmental concerns intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which no other party can adequately represent. Simply filing environmental comments will not give you intervenor status, but you do not need intervenor status to have your comments considered.

Additional information about the proposed project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC Web site (*www.ferc.gov*) using the eLibrary link. Click on the eLibrary link, click on ''General Search,'' and enter the docket number excluding the last three digits in the Docket Number field (*i.e.,* CP16–472). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to *www.ferc.gov/docs-filing/esubscription.asp.*

Dated: November 9, 2016.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2335–039–ME]

Brookfield White Pine Hydro LLC; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the application for a new license for the Williams Hydroelectric Project, located on the Kennebec River in Somerset County, Maine, and has prepared an Environmental Assessment (EA). The project does not occupy any federal land.

The EA contains the staff's analysis of the potential impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* at (866) 208–3676 (toll free), or (202) 502–8659 (TTY).

You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this project or other pending projects. For assistance, contact FERC Online Support.

Any comments should be filed within 30 days from the date of this notice. The Commission strongly encourages electronic filing. Please file comments using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support. In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P–2335–039.

For further information, contact Amy Chang at (202) 502–8250 or *amy.chang@ferc.gov.*

Dated: November 9, 2016.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP17–6–000]

Texas Eastern Transmission, LP; Notice of Application

Take notice that on October 28, 2016, Texas Eastern Transmission, LP (Texas Eastern), 5400 Westheimer Court, Houston, Texas 77056, filed an application pursuant to section 7(b) of the Natural Gas Act (NGA) and Part 157 of the Commission's Regulations requesting authority to abandon a total of approximately 165 miles of its Line 1 pipeline that has been previously removed from active gas service, along with other associated facilities, in Ohio, West Virginia and Pennsylvania. Texas Eastern states that the facilities proposed for abandonment are not required to meet current firm service obligations and that their abandonment will eliminate the need for future operating and maintenance expenditures.

The filing may be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Any questions concerning this application should be directed to Lisa A. Connolly, General Manager, Rates and Certificates, Texas Eastern Transmission, LP, P.O. Box 1642, Houston, Texas 77251, phone: (713) 627–4102, Fax: (713) 627–5947 or email: *laconnolly@spectraenergy.com.*

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding, or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 5 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy regulatory Commission, 888 First Street NE., Washington, DC 20426.

Comment Date: 5:00 p.m. Eastern time on November 30, 2016.

Dated: November 9, 2016.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP17–8–000]

Florida Gas Transmission Company, LLC; Notice of Application

Take notice that on October 31, 2016, Florida Gas Transmission Company, LLC (FGT), 1300 Main Street, Houston, Texas 77002, filed in Docket No. CP17–8–000 an application pursuant to section 7(c) of the Natural Gas Act (NGA) for authorization to construct and operate: (i) 13.17 miles of 12-inch-diameter pipeline and a meter station in Matagorda and Wharton Counties, Texas; (ii) 11.01 miles of 16-inch-diameter pipeline and a meter station in Jefferson County, Texas; (iii) 0.5 miles of pipeline and a meter station in Acadia Parish, Louisiana; (iv) a meter station in Calcasieu Parish, Louisiana; and (v) to modify station piping at Compressor Station 6 in Orange County, Texas (East-West Project). The East-West Project is designed to deliver 275 million British thermal units per day of firm service. The estimated cost of the proposed project is approximately $68.9 million, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Any questions concerning this application may be directed to Stephen

T. Veatch, Senior Director of Certificates & Reporting, Florida Gas Transmission Company, LLC, 1300 Main Street, Houston, Texas 77002, by telephone at (713) 989–2024, by fax at (713) 989–1205, or by email at *stephen.veatch@energytransfer.com.*

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit seven copies of filings made in the proceeding with the Commission and must mail a copy to the applicant and to every other party. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy regulatory Commission, 888 First Street NE., Washington, DC 20426.

Comment Date: 5:00 p.m. Eastern Time November 30, 2016.

Dated: November 9, 2016.

Kimberly D. Bose,

Secretary.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; Notification of Chemical Exports—TSCA Section 12(b)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has submitted the following information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (PRA): ''Notification of Chemical Exports—TSCA Section 12(b)'' and identified by EPA ICR No. 0795.15 and OMB Control No. 2070–0030. The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized in this document. EPA has addressed the comments received in response to the previously provided public review opportunity issued in the **Federal Register** on October 28, 2015 (80 FR 66000). With this submission, EPA is providing an additional 30 days for public review.

DATES: Comments must be received on or before December 19, 2016.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2015–0435, to both EPA and OMB as follows:

- To EPA online using *http://www.regulations.gov* (our preferred method) or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460.
- To OMB via email to *oira_submission@omb.eop.gov.* Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Colby Lintner, Environmental Assistance Division (7408M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

Docket: Supporting documents, including the ICR that explains in detail the information collection activities and the related burden and cost estimates that are summarized in this document, are available in the docket for this ICR. The docket can be viewed online at *http://www.regulations.gov* or in person at the EPA Docket Center, West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is (202) 566–1744. For

additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

ICR Status: OMB approval for this ICR expired on September 1, 2016, due to administrative error. This action is a request to reinstate OMB approval for the information collection activities outlined in this document.

Under PRA, 44 U.S.C. 3501 *et seq.,* an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Section 12(b) of the Toxic Substances Control Act (TSCA) requires any person who exports or intends to export a chemical substance or mixture that is regulated under TSCA sections 4, 5, 6 and/or 7 to notify EPA of such export or intent to export. This requirement is described in more detail in the Code of Federal Regulations (CFR) at 40 CFR part 707, subpart D. Upon receipt of notification, EPA advises the government of the importing country of the U.S. regulatory action that required the notification with respect to that substance. EPA uses the information obtained from the submitter via this collection to advise the government of the importing country. This information collection addresses the burden associated with industry reporting of export notifications.

EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Respondents/Affected Entities: Entities potentially affected by this ICR are companies that export chemical substances or mixtures from the United States to foreign countries.

Respondent's Obligation To Respond: Responses to the collection of information are mandatory (see 40 CFR part 707, subpart D). Respondents may claim all or part of a notice confidential.

Estimated Total Number of Potential Respondents: 240.

Frequency of Response: On occasion.

Estimated Total Burden: 4,032 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Estimated Total Costs: $278,118 (per year), includes no annualized capital investment or maintenance and operational costs.

Changes in the Estimates: There is an increase of seven hours in the total estimated respondent burden compared with that identified in the ICR previously approved by OMB. This increase reflects EPA's correction of arithmetic errors in the previous submission. This change is an adjustment.

Authority: 44 U.S.C. 3501 *et seq.*

Courtney Kerwin,

Director, Regulatory Support Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Boat Manufacturing (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), ''NESHAP for Boat Manufacturing (40 CFR part 63, subpart VVVV) (Renewal)'' (EPA ICR No. 1966.06, OMB Control No. 2060–0546), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through November 30, 2016. Public comments were previously requested via the **Federal Register** (81 FR 26546) on May 3, 2016, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 19, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OECA–2013–0339, to: (1) EPA online using *www.regulations.gov* (our preferred method), or by email to *docket.oeca@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to *oira_submission@omb.eop.gov.* Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564–2970; fax number: (202) 564–0050; email address: *yellin.patrick@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: *http://www.epa.gov/dockets.*

Abstract: Owners and operators of affected facilities are required to comply with reporting and recordkeeping requirements for the General Provisions (40 CFR part 63, subpart A), as well as for the standards at 40 CFR part 63, subpart VVVV. This includes submittal initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring systems is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Boat manufacturing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart VVVV).

Estimated number of respondents: 144 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 23,500 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $2,430,000 (per year), includes $800 in annualized

capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. However, there is an adjustment increase in the respondent burden costs due to an increase in labor rates. This ICR uses updated labor rates from the Bureau of Labor Statistics to calculate burden costs. This ICR also rounds all calculated total values to 3 significant figures.

Courtney Kerwin,

Director, Regulatory Support Division.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OW–2015–0714; FRL–9955–26–OW]

Notice of a Public Meeting of the National Drinking Water Advisory Council

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of a public meeting, new Designated Federal Officer and NDWAC membership.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is announcing a meeting of the National Drinking Water Advisory Council (NDWC), as authorized under the Safe Drinking Water Act. The meeting is scheduled for December 6 and 7, 2016. EPA is also announcing Ms. Tracey Ward as EPA's new Designated Federal Officer (DFO) for the NDWAC, Ms. Carrie Lewis as the NDWAC Chairperson, and Ms. June Anne Swallow, P.E., as a new member of NDWAC. The NDWAC typically considers issues associated with drinking water protection and public drinking water systems. During this meeting, the NDWAC will focus discussions on developing recommendations for the EPA Administrator on the Lead and Copper National Primary Drinking Water Regulation—Long Term Revisions.

DATES: The meeting on December 6, 2016, will be held from 9:30 a.m. to 4:15 p.m., eastern time; and December 7, 2016, from 8:30 a.m. to noon, eastern time.

ADDRESSES: The public meeting will be held in the City of Washington, District of Columbia. The exact location of the meeting will be noticed in the **Federal Register** no later than the week before the meeting, posted at *http://water.epa.gov/drink/ndwac/* and posted at *www.regulations.gov* under Docket ID No. EPA–HQ–OW–2015–0714.

FOR FURTHER INFORMATION CONTACT: For more information about this meeting or to request written materials, contact Tracey M. Ward of the Office of Ground Water and Drinking Water, U.S. Environmental Protection Agency, by phone at (202) 564–3796 or by email at *ward.tracey@epa.gov.* For additional information about the NDWAC meeting, please visit *http://water.epa.gov/drink/ndwac/* or *www.regulations.gov* (search for Docket ID No. EPA–HQ–OW–2015–0714).

SUPPLEMENTARY INFORMATION:

Details about Participating in the Meeting: Teleconferencing will be available during the meeting. The number of teleconference connections available for the meeting is limited and will be offered on a first-come, first-served basis. The teleconference number is (1) 866–299–3188; when prompted, enter conference code (202) 564–3796.

To ensure adequate time for public involvement, individuals or organizations interested in presenting an oral statement should notify Tracey M. Ward by November 22, 2016, by email at *ward.tracey@epa.gov* or by phone at (202) 564–3796. The NDWAC will allocate 45 minutes for the public's input (from 10:45 a.m. to 11:30 a.m., eastern time) at the meeting on December 7, 2016. Oral statements will be limited to three minutes at the meeting. It is preferred that only one person present a statement on behalf of a group or organization. Any person who wishes to file a written statement can do so before or after the NDWAC meeting. Written statements intended for the meeting must be received before November 22, 2016, to be distributed to all members of the NDWAC before any final discussion or vote is completed. Any statement received on or after the date specified will become part of the permanent file for the meeting and will be forwarded to the NDWAC members for their information.

National Drinking Water Advisory Council: The NDWAC was created by Congress on December 16, 1974, as part of the Safe Drinking Water Act (SDWA) of 1974, Public Law 93–523, 42 U.S.C. 300j–5, and is operated in accordance with the provisions of the Federal Advisory Committee Act (FACA), 5 U.S.C. App. 2. The NDWAC was established under the SDWA to provide practical and independent advice, consultation and recommendations to the EPA Administrator on the activities, functions, policies and regulations required by the SDWA.

Special Accommodations: For information on access or services for individuals with disabilities, please contact Tracey Ward at (202) 564–3796 or by email at *ward.tracey@epa.gov.* To request an accommodation for a disability, please contact Tracey Ward at least 10 days prior to the meeting to give the hosting facility as much time as possible to process your request.

Dated: November 9, 2016.

Jennifer McLain,

Acting Director, Office of Ground Water and Drinking Water.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9955–30–OEI]

Privacy Act of 1974; System of Records

AGENCY: Office of Environmental Information, Environmental Protection Agency (EPA).

ACTION: Notice of amended Privacy Act system of records final.

SUMMARY: The FOIA Request and Appeal File system of records is being amended to include all information and data elements that are being collected by the Environmental Protection Agency (EPA) and participating agencies as it relates to FOIA requests, appeals and responses. This information is being removed from the Federal Docket Management System (FDMS) system of records and being added to the FOIA Request and Appeal File (EPA–9) system of records. The FOIA Request and Appeal File system of records is also being amended to provide an additional routine use for the system. The additional routine use being added to this system of records, will allow the National Archives and Records Administration (NARA), Office of Government Information Services (OGIS), and the EPA to share information in the FOIA Request and Appeal File system in order to mediate and resolve disputes between requesters and administrative agencies without delay. OGIS will work directly with each agency using FOIAonline to access case level information that is not

publically available in order to perform mediation services.

Records are stored in a secure, password protected electronic system that utilizes security hardware and software to include multiple firewalls, active intruder detection and role-based accessed controls. Additional safeguards vary by participating agencies. EPA also has records from the period prior to its use of the FOIAonline system which are stored in file folders in lockable file cabinets. The FOIA Request and Appeal File system is maintained under the authority of the Freedom of Information Act, 5 U.S.C. 552.

DATES: Persons wishing to comment on this system or records notice must do so by December 27, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OEI–2015–0758, by one of the following methods:

www.regulations.gov: Follow the online instructions for submitting comments.

Email: oei.docket@epa.gov.

Fax: 202–566–1752.

Mail: OEI Docket, Environmental Protection Agency, Mailcode: 2822T, 1200 Pennsylvania Ave. NW., Washington, DC 20460.

Hand Delivery: OEI Docket, EPA/DC, WJC West Building, Room 3334, 1301 Constitution Ave. NW., Washington, DC. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–HQ–OEI–2015–0758. The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information for which disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *www.regulations.gov.* The *www.regulations.gov* Web site is an ''anonymous access'' system, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *www.regulations.gov* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about the EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: All documents in the docket are listed in the *www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information for which disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *www.regulations.gov* or in hard copy at the OEI Docket, EPA/DC, WJC West Building, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OEI Docket is (202) 566–1752.

FOR FURTHER INFORMATION CONTACT: Larry Gottesman, FOIA, Library and Accessibility Division, Office of Environmental Information, Office, (202) 566–2162, U.S. EPA, Office of Environmental Information, MC 2282T, 1200 Pennsylvania Ave. NW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION: The Freedom of Information Act (FOIA) Request and Appeal File (EPA–9) system contains a copy of each FOIA request and appeal received by the EPA and a copy of all correspondence related to the request, including name, affiliation address, telephone numbers, and other information about a requester. FOIAonline is managed and used by the EPA and other agencies to process, track and respond to FOIA requests and appeals. The FOIAonline system provides the EPA and partner agencies with a secure, password protected Web site to electronically receive, process, track and store requests from the public for federal records; post responsive records to a Web site; collect data for annual reporting requirements to the Department of Justice and manage internal FOIA administration activities. In addition, the FOIA system allows the public to submit and track FOIA requests and appeals; access requests and responsive records online and obtain the status of requests filed with the EPA and partner agencies. FOIAonline is a software application used by the EPA and other agencies. Social security numbers and other types of personally identifiable information may be provided in requests or in responsive documents. In some cases, agencies may require this information to fulfill a request. All participating agencies will ensure that sensitive PII is not made publicly available. The name of a FOIA requester may be publicly available and searchable by the public based on an agency's policies. With the exception of a requester's name, any other personally identifiable information provided by a requester during the process of completing the online request form or creating an online account (*e.g.,* home addresses, email address and contact information) will not be posted to the Web site, nor will it be searchable by the public. Personally identifiable information determined to be publicly releasable and contained in documents released to the public under FOIA (*e.g.,* the names and official contact information of government employees or the names of agency correspondents) will be publicly available and searchable by the public if posted by a participating agency. Individuals accessing the system are FOIA Officers, FOIA coordinators, subject matter experts and members of the public. Computer records are maintained in a secure, password protected computer system that operates in compliance with Federal Security Information Modernization Act (FISMA) moderate level requirements located at EPA's National Computer Center located at 109 T.W. Alexander Drive, Durham, NC 27709. All records are maintained in secure, access-controlled areas or buildings. The system is maintained in the EPA's Office of Environmental Information, Headquarter Program Offices, Regional Offices and the Office of General Counsel.

Dated: October 21, 2016.

Ann Dunkin,

Chief Information Officer.

EPA–9

SYSTEM NAME AND NUMBER:

Freedom of Information Act (FOIA) Request and Appeal File.

SYSTEM LOCATION:

EPA's National Computer Center located at 109 T.W. Alexander Drive, Durham, NC 27709.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Freedom of Information Act, 5 U.S.C. 552.

PURPOSE(S):

To provide the public a single location to submit and track FOIA requests and appeals filed with the EPA and participating agencies, to manage internal FOIA administration activities and to collect data for annual reporting requirements to the Department of Justice.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All persons requesting information or filing appeals under the Freedom of Information Act.

CATEGORIES OF RECORDS IN THE SYSTEM:

A copy of each Freedom of Information Act (FOIA) request received by the EPA and other participating agencies and a copy of all correspondence related to the request, including individuals' names, mailing addresses, email addresses, phone numbers, social security numbers, dates of birth, alias(es) used by the requester, alien numbers assigned to travelers crossing national borders, requesters' parents' names, user names and passwords for registered users, FOIA tracking numbers, dates requests are submitted and received, related appeals and agency responses. Records also include communications with requesters, internal FOIA administrative documents (*e.g.,* billing invoices) and responsive records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

General routine uses A, E, F, G, H, K, and L apply to this system. Records may also be disclosed to:

1. Another federal agency (a) with an interest in the record in connection with a referral of a Freedom of Information Act (FOIA) request to that agency for its views or decision on disclosure, or (b) in order to obtain advice and recommendations concerning matters on which the agency has specialized experience or particular competence that may be useful to an agency in making required determinations under the FOIA.

2. To the National Archives and Records Administration, Office of Government Information Services (OGIS), to the extent necessary to fulfill its responsibilities in 5 U.S.C. 552(h), to review administrative agency policies, procedures and compliance with the Freedom of Information Act (FOIA), and to facilitate OGIS' offering of mediation services to resolve disputes between persons making FOIA requests and administrative agencies.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are stored in file folders in lockable file cabinets. Records are also stored in a secure, password protected electronic system that utilizes security hardware and software to include multiple firewalls, active intruder detection and role-based accessed controls. Additional safeguards vary by participating agencies.

POLICIES AND PRACTICES FOR RETRIEVABILITY OF RECORDS:

Requests are retrieved from the system by numerous data elements and key word searches, including name, agency, dates, subject, FOIA tracking number and other information retrievable with full-text searching capability.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Each federal agency handles its records in accordance with its records schedule as approved by NARA. FOIA records are covered under NARA General Record Schedule 14—Information Services Records unless a participating agency's records are managed under other record schedules approved by NARA.

PHYSICAL, PROCEDURAL, AND ADMINISTRATIVE SAFEGUARDS:

Computer records are maintained in a secure, password protected computer system. Paper records are maintained in lockable file cabinets. All records are maintained in secure, access-controlled areas or buildings.

SYSTEM MANAGER(S):

Tim Crawford, *crawford.tim@epa.gov,* U.S. EPA, Office of Environmental Information, MC 2822T, 1200 Pennsylvania Ave. NW., Washington, DC 20460.

RECORD ACCESS PROCEDURES:

Individuals seeking access to their own personal information in this system of records is required to provide adequate identification (*e.g.,* driver's license, military identification card, employee badge or identification card). Additional identity verification procedures may be required as warranted. Requests must meet the requirements of EPA regulations at 40 CFR part 16.

CONTESTING RECORD PROCEDURES:

Requests for correction or amendment must identify the record to be changed and the corrective action sought. Requests must be submitted to the agency contact indicated on the initial document for which the related contested record was submitted.

NOTIFICATION PROCEDURE:

Any individual who wants to know whether this system of records contains a record about him or her, should make a written request to the EPA Privacy Officer, MC 2822T, 1200 Pennsylvania Avenue NW., Washington, DC 20460.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NSPS for Magnetic Tape Coating Facilities (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), ''NSPS for Magnetic Tape Coating Facilities (40 CFR part 60, subpart SSS) (Renewal)'' (EPA ICR No. 1135.12, OMB Control No. 2060–0171), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through November 30, 2016. Public comments were previously requested via the **Federal Register** (81 FR 26546) on May 3, 2016 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 19, 2016.

ADDRESSES: Submit your comments, referencing Docket ID EPA–HQ–OECA–2013–0318, to: (1) EPA online using *www.regulations.gov* (our preferred method), or by email to *docket.oeca@epa.gov*, or by mail to: EPA Docket

Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to *oira_submission@omb.eop.gov.* Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564–2970; fax number: (202) 564–0050; email address: *yellin.patrick@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: *http://www.epa.gov/dockets.*

Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 60, subpart A), as well as for the specific requirements at 40 CFR part 60, subpart SSS. This includes submitting initial notification reports, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form Numbers: None.

Respondents/affected entities: Magnetic tape coating facilities constructed or modified after January 22, 1986.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart SSS).

Estimated number of respondents: 6 (total).

Frequency of response: Initially, quarterly and semiannually.

Total estimated burden: 2,030 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $295,000 (per year), includes which $86,400 in annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the respondent labor hours as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. Instead, the change in labor hour and cost estimates occurred because of a change in assumption. This ICR assumes all existing sources will have to re-familiarize with the regulatory requirements each year.

Courtney Kerwin,

Director, Regulatory Support Division.

Drinking Water Contaminant Candidate List 4—Final

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is publishing a final list of contaminants that are currently not subject to any proposed or promulgated national primary drinking water regulation. These contaminants are known or anticipated to occur in public water systems and may require regulation under the Safe Drinking Water Act (SDWA). This list is the Fourth Contaminant Candidate List (CCL 4) published by EPA since the SDWA amendments of 1996. This Final CCL 4 includes 97 chemicals or chemical groups and 12 microbial contaminants.

FOR FURTHER INFORMATION CONTACT: For information on chemical contaminants contact Meredith Russell, Office of Ground Water and Drinking Water, Standards and Risk Management Division, at (202) 564–0814 or email *russell.meredith@epa.gov.* For information on microbial contaminants contact Hannah Holsinger, Office of Ground Water and Drinking Water, Standards and Risk Management Division, at (202) 564–0403 or email *holsinger.hannah@epa.gov.* For general information contact the EPA Safe Drinking Water Hotline at (800) 426–4791. The Safe Drinking Water Hotline is open Monday through Friday, excluding legal holidays, from 10 a.m. to 4 p.m. eastern time.

I. General Information

A. Does this action apply to me?

The Final CCL 4 will not impose any requirements on anyone. Instead, this action notifies interested parties of the EPA's Final CCL 4 of unregulated drinking water contaminants and provides a summary of the major comments received on the February 4, 2015, Draft CCL 4 **Federal Register** notice and EPA's responses (80 FR 6076 (USEPA, 2015a)).

B. How can I get copies of this document and other related information?

1. Docket

EPA has established a docket for this action under Docket ID No. EPA–HQ–OW–2012–0217. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Water Docket, EPA/DC, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC 20004. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the EPA Docket Center is (202) 566–2426.

2. Electronic Access

You may access this **Federal Register** document electronically from the Government Publishing Office under the **Federal Register** listings at FDsys (*http://www.gpo.gov/fdsys/browse/collection.action?collectionCode=FR).*

C. What is the purpose of this action?

The Safe Drinking Water Act (SDWA), as amended in 1996, requires EPA to publish a list every five years of currently unregulated contaminants that may pose risks for drinking water (referred to as the Contaminant Candidate List, or CCL). This list is subsequently used to make regulatory determinations on whether or not to regulate at least five contaminants from the CCL with national primary drinking water regulations (NPDWRs) ((SDWA section 1412(b)(1)). The purpose of today's action is to present EPA's final list of contaminants on the CCL 4, a summary of the major public comments received on the Draft CCL 4 and EPA's responses. Today's action only addresses the Final CCL 4. Regulatory Determination (RD) for contaminants on the CCL is a separate agency action.

D. Statutory Requirements for CCL, Regulatory Determination and Unregulated Contaminant Monitoring

1. Interrelationship of the CCL, Regulatory Determination and Unregulated Contaminant Monitoring

Under the 1996 amendments to SDWA, Congress established a risk-based approach for determining which contaminants would become subject to drinking water standards. The approach includes three components, the CCL, the Unregulated Contaminant Monitoring Rule (UCMR), and RD. In preparing the CCL, EPA screens and evaluates unregulated contaminants to identify those that may require future drinking water regulations. Inclusion on the CCL does not mean that any particular contaminant will necessarily be regulated in the future. The UCMR provides a mechanism to obtain nationally representative occurrence data for unregulated contaminants. The data provided by UCMR is one of the primary sources of occurrence information used to evaluate contaminants in the RD process.

Under the RD process, EPA evaluates UCMR and other occurrence data along with health effects data for contaminants on the CCL to see which ones present the greatest public health concern and have sufficient information for the agency to make a regulatory determination. EPA must make regulatory determinations for at least five contaminants listed on the CCL every five years. Today's action addresses only the CCL 4 and not the UCMR or RD stages of the SDWA contaminant regulatory development process.

2. Contaminant Candidate List

Section 1412(b)(1) of the SDWA, as amended in 1996, requires EPA to publish the CCL every five years. The SDWA specifies that the list must include contaminants that are not subject to any proposed or promulgated NPDWRs, are known or anticipated to occur in public water systems (PWSs), and may require regulation under the SDWA. The unregulated contaminants considered for listing shall include, but not be limited to, hazardous substances identified in section 101(14) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and substances registered as pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act.

The SDWA directs the agency to consider the health effects and occurrence information for unregulated contaminants to identify those contaminants that present the greatest public health concern related to exposure from drinking water. The statute further directs the agency to take into consideration the effect of contaminants upon subgroups that comprise a meaningful portion of the general population (such as infants, children, pregnant women, the elderly and individuals with a history of serious illness or other subpopulations) that are identifiable as being at greater risk of

adverse health effects due to exposure to contaminants in drinking water than the general population. Additionally, EPA's 1995 *Policy on Evaluating Health Risks to Children* states that the agency will consider the risks to infants and children consistently and explicitly as a part of risk assessments generated during its decision-making process, including the setting of standards to protect public health (USEPA, 1995a). EPA considers age-related subgroups as ''lifestages'' in reference to a distinguishable time frame in an individual's life, characterized by unique and relatively stable behavioral and/or physiological characteristics that are associated with development and growth. Thus, childhood is viewed as a sequence of lifestages, from conception through fetal development, infancy and adolescence (see *http://www.epa.gov/children/early-life-stages*).

3. Unregulated Contaminant Monitoring

Section 1445(a)(2) of the SDWA mandates that EPA promulgate regulations (known as the Unregulated Contaminant Monitoring Rule or UCMR) to establish criteria for a monitoring program for unregulated contaminants. This section, as amended in 1996, requires that once every five years, EPA issue a list of no more than 30 unregulated contaminants to be monitored by PWSs. SDWA requires that EPA enter the monitoring data into the agency's publicly available National Contaminant Occurrence Database. EPA's UCMR program must ensure that systems serving a population larger than 10,000 people, as well as a nationally representative sample of PWSs serving 10,000 or fewer people, are required to monitor.

4. Regulatory Determination

Section 1412(b)(1)(B)(ii) of the SDWA, as amended in 1996, requires EPA at five year intervals, to make determinations of whether or not to regulate no fewer than five contaminants from the CCL. EPA evaluates the CCL contaminants with sufficient health effects and occurrence information to determine whether a regulation is required or not required. The 1996 SDWA Amendments specify three criteria to determine whether a contaminant may require regulation:

- The contaminant may have an adverse effect on the health of persons;
- the contaminant is known to occur or there is a substantial likelihood that the contaminant will occur in PWSs with a frequency and at levels of public health concern; and
- in the sole judgment of the Administrator, regulation of such contaminant presents a meaningful opportunity for health risk reduction for persons served by PWSs.

If EPA determines that these three statutory criteria are met and makes a final determination to regulate a contaminant, the agency has 24 months to publish a proposed maximum contaminant level goal [1] (MCLG) and NPDWR.[2] After the proposal, the agency has 18 months to publish and promulgate a final MCLG and NPDWR (SDWA section 1412(b)(1)(E)).[3] For those contaminants without sufficient information to allow the agency to make a regulatory determination, EPA encourages research to provide the information needed to determine whether to regulate the contaminant.

E. Where can I find information on previous CCLs, UCMRs, and Regulatory Determinations

1. Summary of previous CCLs, UCMRs, and Regulatory Determinations

A brief summary of CCL 1, CCL 2, Regulatory Determination 1 (RD 1) and Regulatory Determination 2 (RD 2) was published in the **Federal Register** for the Draft CCL 4 notice (80 FR 6076, February 4, 2015 (USEPA, 2015a)). Information on previous UCMRs, can be found at the following Web site: *https://www.epa.gov/dwucmr.*

2. Summary of the CCL 3

The CCL 3 included 104 chemicals or chemical groups and 12 microbiological contaminants. In developing the CCL 3, EPA implemented an improved process from the process used for CCL 1 and CCL 2. This new process built on evaluations used for previous CCLs and was based on substantial expert input and recommendations from the National Academy of Sciences' National Research Council (NRC) and the National Drinking Water Advisory Council (NDWAC). EPA used a multi-step CCL process to identify contaminants for inclusion on the Final CCL 3. The key steps included:

- Identifying a broad universe of potential drinking water contaminants (called the CCL 3 Universe). EPA initially considered approximately 7,500 potential chemical and microbial contaminants (more information on the identification of the CCL 3 Universe can be found in USEPA, 2009a and USEPA, 2009b).
- Applying screening criteria to the universe, EPA identified almost 600 of those contaminants that should be further evaluated (the preliminary CCL or PCCL) based on a contaminant's potential to occur in PWSs and the potential for public health concern (more information on the CCL 3 screening process can be found in USEPA, 2009c and USEPA, 2009d).
- Selecting the final list of 116 contaminants from the PCCL to include on the CCL based on more detailed evaluation of occurrence and health effects and expert judgment as well as public input (this step of the CCL 3 process is called the classification process and more information can be found in USEPA, 2009e and USEPA, 2009f).

The CCL 3 interpreted the criterion that contaminants are known or anticipated to occur in public water systems broadly. In evaluating this criterion, EPA considered not only public water system monitoring data, but also data on concentrations in ambient surface and ground waters, releases to the environment (*e.g.,* Toxics Release Inventory (TRI)), and production. While such data may not establish conclusively that contaminants are known to occur in public water systems, EPA believes these data are sufficient to anticipate that contaminants may occur in public water systems and support their inclusion on the CCL. The agency considered adverse health effects that may pose a greater risk to life stages and other sensitive groups which represent a meaningful portion of the population. Adverse health effects associated with infants, children, pregnant women, the elderly, and individuals with a history of serious illness were evaluated as part of the screening and classification processes. A detailed summary of the CCL 3 process can be found in the Draft CCL 3 (73 FR 9628, February 21, 2008 (USEPA, 2008a) and Final CCL 3 (74 FR 51850, October 8, 2009 (USEPA, 2009a)) **Federal Register** notices.

3. Summary of the Regulatory Determination 3

EPA published the Announcement of Final Regulatory Determinations for Contaminants on CCL 3 in the **Federal Register** on January 4, 2016 (81 FR 13

[1] The MCLG is the ''maximum level of a contaminant in drinking water at which no known or anticipated adverse effect on the health of persons would occur, and which allows an adequate margin of safety. MCLGs are non-enforceable health goals.'' (40 CFR 141.2; 42 U.S.C. 300g–1)

[2] An NPDWR is a legally enforceable standard that applies to public water systems. An NPDWR sets a legal limit (called a maximum contaminant level or MCL) or specifies a certain treatment technique for public water systems for a specific contaminant or group of contaminants. The MCL is the highest level of a contaminant that is allowed in drinking water and is set as close to the MCLG as feasible, using the best available treatment technology and taking cost into consideration.

[3] The statute authorizes a nine month extension of this promulgation date.

(USEPA, 2016a)). The agency made final determinations not to regulate four contaminants: 1, 3-dinitrobenzene; dimethoate; terbufos; and terbufos sulfone. The agency delayed the final regulatory determination for strontium in order to consider additional data and decide whether there is a meaningful opportunity for health risk reduction by regulating strontium in drinking water. These five contaminants are not included on the Final CCL 4.

This section provides an overview of the process used for the Third Regulatory Determination (RD 3). A summary of the process can be found in the **Federal Register** notice announcing the preliminary regulatory determinations (79 FR 62716, October 24, 2014 (USEPA, 2014a)), and a detailed explanation of this process can be found in the ''Protocol for the Regulatory Determination 3'' support document (USEPA, 2014b). This overview of the RD process is provided to give an understanding of how contaminants have previously been evaluated after they have been listed on past CCLs. The RD 4 process may continue to follow this process although it is possible that some modifications may be made to this process. The RD process occurs subsequent to a Final CCL, and is a separate agency action. The RD 3 process, was divided into three phases: (1) The Data Availability Phase, (2) the Data Evaluation Phase and (3) the Regulatory Determination Assessment Phase.

The purpose of the first phase, the Data Availability Phase, was to determine if the agency may have sufficient data to characterize the potential health effects and known or likely occurrence in drinking water. With regard to sufficient health effects data used to identify potential adverse health effect(s), the agency considered whether a peer reviewed health risk assessment was available or in process from an EPA or a comparable non-EPA source. In regard to sufficient occurrence data, the agency considered the availability of nationally representative finished water data and whether other finished water data were available that indicated known and/or likely occurrence in PWSs. After conducting the health and occurrence data availability assessments, the agency identified those contaminants and contaminant groups that meet the following Phase 1 data availability criteria:

(a) A peer reviewed health assessment is available or in process, and

(b) A widely available analytical method for monitoring exists, and

(c) Either nationally representative finished water occurrence data are available, or other finished water occurrence data shows occurrence at levels greater than one-half of the CCL 3 health reference level (HRL).

If a contaminant met these three criteria, it was placed on a ''short list'' and proceeded to Phase 2. From the 116 CCL 3 contaminants, the agency identified a short list of 37 contaminants (35 CCL 3 contaminants and two non-CCL 3 contaminants [4]) to further evaluate in the second phase.

During the second phase, the Data Evaluation Phase, the agency further evaluated each of the 37 contaminants on the short list to identify those that had sufficient data (or were expected to have sufficient data) for EPA to assess the three statutory criteria listed in section I.D.4 of this notice.

To identify the contaminants that present the greatest public health concern, the agency specifically focused its efforts on identifying those contaminants or contaminant groups that are occurring or have substantial likelihood to occur at levels and frequencies of public health concern, based on the best available peer reviewed data. In addition to health and occurrence information data assessed in Phase 1, the agency collected additional health and occurrence data and more thoroughly evaluated this information to identify a list of contaminants that should proceed to Phase 3. If the agency found that sufficient data were not available or not likely to be available to evaluate the three statutory criteria during the first and second phases, then the contaminant was not considered a candidate for making a regulatory determination during the current cycle, and the agency will conduct research, collect information or find other avenues to fill the data and information gaps. For these contaminants, additional data that becomes available in the future may be considered for future CCLs and RDs.

If sufficient data were available for a contaminant to characterize the potential health effects and known or likely occurrence in drinking water, the contaminant was evaluated against the three statutory criteria (listed in section I.D.4) in the third phase of the process, the Regulatory Determination Assessment Phase.

II. What is on EPA's Drinking Water Contaminant Candidate List 4?

The Final CCL 4 and a Cross-Walk of Contaminants Between the CCL 4, Regulatory Determination 3, and UCMRs

The Final CCL 4 includes 97 chemicals or chemical groups and 12 microbes listed in Exhibit 1. Exhibit 1 also shows chemical abstract service registry numbers (CASRNs) of the contaminants on the Final CCL 4 and their status across other EPA programs related to CCL (*i.e.,* RD and UCMR). The list of contaminants is presented by CASRN when available, common name, or by aggregate groupings (*e.g.,* cyanotoxins). Further data and information for the contaminants included on the CCL 4 are available in the technical support documents and Contaminant Information Sheets available on EPA's CCL 4 Web site and in the docket for this action (EPA–HQ–OW–2012–0217). All contaminants listed on the Final CCL 4 were also included on CCL 3, with the exception of manganese and nonylphenol, which were nominated by the public and added to the CCL 4. Twenty-eight CCL 4 chemicals that were carried forward from CCL 3 had been further analyzed and evaluated under the RD 3 process and included on the RD 3 Short List (further described in section I.E.3. of this notice). The RD 3 process also included an evaluation of occurrence data from the UCMR 2 for 13 CCL 4 chemicals. Twenty-one CCL 4 contaminants were monitored under UCMR 3 (19 chemicals and 2 microbes). The UCMR data will be used to further evaluate CCL 4 contaminants during the RD 4 process. In addition, EPA has proposed gathering occurrence data for 16 individual CCL 4 chemicals and several cyanotoxins, including anatoxin-a, cylindrospermopsin, nodularin, total microcystin and several microcystin congeners under the proposed UCMR 4.

[4] The non-CCL 3 contaminants, N-Nitroso-di-n-butylamine (NDBA) and N-Nitrosomethylethylamine (NMEA), were included because they are part of a larger group (nitrosamines) that also includes a number of CCL 3 contaminants.

76–87–9	Triphenyltin hydroxide (TPTH)					
51–79–6	Urethane					
7440–62–2	Vanadium		X		X	
50471–44–8	Vinclozolin					
137–30–4	Ziram					

[a] Anatoxin-a, cylindrospermopsin, nodularin, total microcystin and several microcystin congeners are proposed for monitoring under UCMR 4.

[b] The organization that nominated ''nonylphenol'' for CCL 4 provided the CASRN of 25451–52–3. The name ''nonylphenol'' does not allow for a definitive identification of chemical structure since nonylphenol can exhibit two forms of isomerism. There are at least five CASRNs known to be associated with ''nonylphenol'': In addition to 25154–52–3 (which represents n-nonylphenol with the ortho-, meta-, or para-substitution unspecified), other CASRNs include: 104–40–5 (4-n-nonylphenol); 84852–15–3 (4-nonylphenol, branched); 91672–41–2 (2-nonylphenol, branched); and 139–84–4 (3-n-nonylphenol). None of these five CASRNs is adequately general enough to represent both forms of isomerism. For the sake of consistency, the CASRN provided by the nominator was selected and the additional possible CASRNs and structures are delineated here.

Microbe *	CCL 4 nomination	UCMR 3
Adenovirus	X	
Caliciviruses		X
Campylobacter jejuni		
Enterovirus		X
Escherichia coli (O157)		
Helicobacter pylori		
Hepatitis A virus		
Legionella pneumophila		
Mycobacterium avium		
Naegleria fowleri	X	
Salmonella enterica		
Shigella sonnei		

* There were no CCL 4 microbes monitored under UCMR 2, and none are proposed for monitoring under UCMR 4. The UCMR 4 Candidate Contaminants Information Compendium (USEPA, 2015b) provides a rationale for why contaminants, including microbes, were not included in the proposed UCMR 4. No CCL 4 microbes were included in the RD 3 Short List. Norovirus, a member of the calicivirus family, was included on UCMR 3 pre-screen testing.

III. Summary of the Approach Used To Identify and Evaluate Candidates for the Draft CCL 4

The Draft CCL 4 was published in the **Federal Register** on February 4, 2015 (80 FR 6076 (USEPA, 2015a)). EPA used a three step evaluation and selection process to identify candidates for the Draft CCL 4: (1) Carry forward CCL 3 contaminants (except those with regulatory determinations), (2) seek and evaluate nominations from the public for additional contaminants to consider, (3) evaluate any new data for those contaminants with previous negative regulatory determinations from CCL 1 or CCL 2 for potential inclusion on the CCL 4. The CCL 3 process is summarized in section I.E.2. A brief summary of steps 1–3 that were used to develop the Draft CCL 4 is provided in the section that follows, and a more detailed summary is provided in the Draft CCL 4 **Federal Register** notice (80 FR 6076 (USEPA, 2015a)). A summary of the public comments on the Draft CCL 4 and EPA's responses can be found in section IV.

A. Carry Forward of CCL 3 Contaminants to the Draft CCL 4

EPA carried forward all contaminants listed on CCL 3 to the Draft CCL 4 with the exception of perchlorate, for which the agency made a positive regulatory determination, and the five CCL 3 contaminants with preliminary regulatory determinations at that time, pending their final regulatory determinations. This carry forward process is consistent with that previously used in CCL 2. The agency took this approach based on the following considerations: (1) In developing the CCL 3, the agency implemented a robust process recommended by the NRC and the NDWAC to screen and score the universe of potential contaminants; (2) EPA used the best available, peer reviewed data and information to evaluate contaminants for CCL 3; and (3) Carrying forward CCL 3 contaminants allowed the agency to focus resources on evaluating contaminants nominated by the public for CCL 4 and review new data for CCL 1 or CCL 2 contaminants with previous negative regulatory determinations (68 FR 42897, July 18, 2003 (USEPA, 2003); 73 FR 44251, July 30, 2008 (USEPA, 2008b)). Carrying forward CCL 3 contaminants also allowed EPA to focus resources on UCMR 3 monitoring and analysis and RD 3 analyses.

B. Summary and Evaluation of CCL 4 Nominated Contaminants

1. CCL 4 Nominations Summary

EPA sought public nominations in a **Federal Register** notice on May 8, 2012 (77 FR 27057), for contaminants to be considered for possible inclusion in the CCL 4 (USEPA, 2012)). EPA received nominations for 59 unique contaminants for the CCL 4, including 54 chemical and five microbial contaminants. After carefully reviewing and evaluating the information and data for the nominated contaminants, EPA added two of the nominated chemicals (manganese and nonylphenol) to the Draft CCL 4. Detailed information on the nominations is contained in the ''Summary of Nominations for the Fourth Contaminant Candidate List'' support document (USEPA, 2016b).

2. How Nominated Contaminants Were Evaluated for the Draft CCL 4

Four nominated contaminants were already covered by a proposed or existing NPDWR and were not eligible for the CCL 4 since the SDWA specifies that the CCL only include those contaminants without any proposed or promulgated NPDWRs. Seven of the nominated contaminants were on CCL 3 and were carried forward to the Draft CCL 4. EPA reviewed the nominations and supporting information to determine if any new data were provided that had not been previously evaluated for CCL 3. The agency also collected and evaluated additional data for the nominated contaminants, when it was available, including the seven nominated contaminants carried forward from CCL 3. The additional data was obtained from both updated CCL 3 data sources and from new data sources that were not available at the time the agency finalized CCL 3. These data sources are listed in the ''Data Sources for the Contaminant Candidate List 4'' support document (USEPA, 2016c).

Nominated contaminants with new data were screened and scored using the same process used in CCL 3. Through this analysis, EPA added manganese and nonylphenol to the Draft CCL 4 because, as discussed in more detail in the Draft CCL 4 **Federal Register** notice (80 FR 6076 (USEPA, 2015a)), EPA determined that the new and updated health effects information and additional occurrence data merited listing the contaminants. Detailed information on the data used to screen the nominated contaminants to determine whether or not they were included in the PCCL 4 is available in the ''Screening Document for the PCCL 4 Nominated Contaminants'' (USEPA, 2016d). More detailed information on the process and the data used to evaluate nominated contaminants for listing on the CCL 4 can be found in the ''Contaminants Information Sheets (CISs) for the Final Contaminant Candidate List 4 (CCL 4)'' support documents (USEPA, 2016e).

C. Evaluation of Previous Negative Regulatory Determinations for the Draft CCL 4

EPA evaluated the 20 contaminants from CCL 1 and CCL 2 for which the agency made negative regulatory determinations. EPA collected and evaluated new or updated data for the previous negative regulatory determination chemicals. Since RD 3 was recently published using the best available data, EPA did not include the RD 3 negative regulatory determinations in this evaluation. The agency concluded there was not sufficient new information for 19 of the 20 contaminants with previous negative regulatory determinations to justify including them on the Draft CCL 4. Because commenters also did not identify such information, EPA has not included these contaminants on the Final CCL 4. EPA added manganese, a previous negative regulatory determination from RD 1, to the Draft and Final CCL 4 as previously discussed in section III.B.

IV. What comments did EPA receive on the Draft CCL 4 and how did the Agency respond?

EPA requested comment on the Draft CCL 4 and how to further improve upon the selection process developed for CCL 3 as a tool for future CCLs. The agency received 27 public comment letters on the Draft CCL 4. EPA considered all public comments and evaluated the data and information provided by commenters in selecting the Final CCL 4. EPA used the same process used in the CCL 3 to screen and score any contaminants with new data or information provided by commenters. EPA prepared responses to all public comments that are in the ''Comment Response Document for the Fourth Drinking Water Contaminant Candidate List (Categorized Public Comments)'' document, which is available in the docket for this action (USEPA, 2016f).

Based on the analyses conducted as a result of public comments, EPA determined not to list three cancelled pesticides (disulfoton, fenamiphos, and molinate) on the Final CCL 4 that were included on the Draft CCL 4 because, as discussed more fully in the following sections, these chemicals are not known or anticipated to occur in PWSs and are not anticipated to require regulation. With the exception of these three pesticides, all of the contaminants listed on the Draft CCL 4 are listed on the Final CCL 4.

A summary of some of the key public comments received, recommendations from EPA's Science Advisory Board (SAB) on the CCL 4, and EPA's responses are provided in this section. Data used to evaluate the contaminants for the CCL 4 can be found in the Contaminant Information Sheets (CISs) for the Final Fourth Contaminant Candidate List (CCL 4) (USEPA, 2016e), which can be found in the docket for this action available at *www.regulations.gov* by searching for docket EPA–HQ–OW–2012–0217.

A. Recommendations From the EPA Science Advisory Board

The EPA SAB and its Drinking Water Committee (DWC) reviewed the Draft CCL 4 and provided recommendations to the Administrator on January 11, 2016, in their report ''Review of the EPA's Draft Fourth Drinking Water Contaminant Candidate List (CCL 4)'' (USEPA, 2016g). On April 29–30, 2015, the SAB DWC held a public meeting to discuss responses to EPA charge

questions. During this meeting, EPA provided an overview of the process used to develop the Draft CCL 4 and answered questions from the Committee.

The SAB's recommendations and comments on the overall CCL 4 process and documentation are summarized in the following bullet points:

- The SAB stated that the general protocol used to evaluate contaminants on the CCL 4 is well described and conceptually clear. They concluded the transparency and clarity of the process has improved since CCL 3 was finalized.
- The SAB said that the documentation for CCL 4 lacked specific information necessary in order to follow the decision-making process for listing an individual contaminant on the Draft CCL 4. Specific suggestions to improve transparency and clarity of the support documents include:
  - Develop a summary table that consolidates summary information on all carried forward and nominated contaminants.
  - Display results of the CCL 4 screening and classification process in a manner that explicitly outlines the scoring schemes used and the scientific rationale in applying the selection criteria.
  - Provide examples for both microbial and chemical contaminants that display the process of how contaminants were included on or eliminated from the Draft CCL 4.
  - Clearly describe and improve the process for removing contaminants from prior CCLs, where appropriate, when such lists serve as the basis for a new CCL.
  - Explain the evaluation of CCL contaminants during the RD process.
- The SAB recommended that EPA should utilize data from UCMR 3 monitoring as it becomes available.
- The SAB stated that the CCL 4 list includes a number of contaminants carried forward from the CCL 3 without providing a sense of the relative priority of the listed chemicals. The SAB recommended EPA prioritize the list to inform future regulatory decision-making and to help researchers focus their efforts.

EPA Response: EPA has provided a more detailed response to the SAB in the document, ''Response to SAB recommendations on the Draft CCL 4'' (USEPA, 2016h), which can be found in the docket for this action available at *www.regulations.gov* by searching for docket EPA–HQ–OW–2012–0217. This section summarizes EPA's response to some of the key SAB recommendations.

The agency has updated the technical support documents for the CCL 4 to increase the transparency of its decisions relative to the contaminants included on the Final CCL 4. For instance, the CIS support document provides examples showing the criteria and process for including or excluding chemical and microbial contaminants from the CCL 4. Additionally, a summary table in the same support document presents factors used to determine how the CCL 4 contaminants were selected. The agency also summarizes the process used to evaluate contaminants under RD 3 in section I.E.3 of this notice.

While EPA agrees with the SAB about the importance of using UCMR data to inform the CCL, the agency does not believe it is appropriate to use preliminary UCMR 3 data to make final CCL 4 decisions. The UCMR 3 data set was not finalized within the timeframe for use and analysis under CCL 4. The UCMR 3 monitoring period ended in December 2015 and results are reported to EPA through 2016. After the monitoring period is completed, the results undergo review for quality assurance and are subject to change following further review by the analytical laboratory, the PWS, the State and EPA. The agency will perform further analysis of both the health effects and occurrence of contaminants monitored under UCMR 3 during the RD 4 and CCL 5 development process.

EPA identified the current occurrence, health effects and analytical methods data needs of CCL 4 contaminants for RD 4 evaluations in section V of this notice. This data needs table is presented to provide a sense of relative priority for listed contaminants by identifying those contaminants likely to have sufficient data for further evaluation under the next RD and those that have research needs. As the agency continues to evaluate contaminants on the CCL 4, EPA will work with agency and non-EPA scientists to develop and collect the best available science to support decision-making for future determinations.

B. Public Comments

1. General Comments on CCL 4

EPA received comments, both in support of and against the carry forward of contaminants from the CCL 3 to the Draft CCL 4. One commenter asked for more information on the decision to carry forward CCL 3 contaminants to the Draft CCL 4. Commenters not in support of the carry forward of CCL 3 contaminants thought EPA should reassess the science on all the CCL 3 contaminants. One commenter also thought EPA should limit the number of contaminants on the CCL so that research for the contaminants could be completed between one CCL and the next. One commenter supported the carry forward approach because the CCL 3 contaminants already have data available that shows there may be a potential public health impact. They also suggested that EPA should continue to evaluate these contaminants until enough data are collected to support a regulatory determination.

EPA response: The reasons for carrying forward contaminants from the CCL 3 to the CCL 4 are presented in section III.A of this notice. EPA has continued to collect data and further evaluate the science for many of the contaminants that were carried forward from the CCL 3 to the CCL 4. For example, since the listing of contaminants on CCL 3, EPA has monitored and collected occurrence data for several CCL contaminants through the UCMR program. EPA has also further analyzed and evaluated many of the CCL 3 contaminants that were carried forward to CCL 4 under the RD 3 process. Exhibit 1 in section II.A of this notice lists CCL 4 contaminants that were evaluated under these other agency efforts. Although EPA carried forward contaminants from the CCL 3 to the CCL 4, EPA intends to collect new data and conduct further evaluations of unregulated contaminants for CCL 5.

EPA does not agree that the CCL should be limited to a certain number of contaminants. The CCL identifies contaminants that are ''known, or anticipated to occur in PWSs,'' and is the first step in identifying contaminants that may require regulation. Some of the contaminants on the list may have sufficient information to make regulatory determinations in the near term and some of the contaminants on the list need additional data in order to determine the appropriate agency action. While the SDWA does not limit the CCL to a particular number of contaminants, the agency recognizes the need to communicate data needs for contaminants included on the Final CCL 4. Therefore, EPA has provided a summary of the current data needs for RD 4 evaluations in section V of this notice. The agency will continue to evaluate data needs through the RD 4 process and will continue to work with internal and external researchers to discuss research needs and priorities.

2. Chemical Contaminants

a. Contaminants With Release Data

EPA received comments that several contaminants listed based on

environmental release data for evaluating occurrence (*e.g.,* ethylene oxide, ethylene glycol, and toluene diisocyanate) should not be on the CCL 4 because one or more of their intrinsic physical or chemical properties would result in limited occurrence in water. Commenters cited the hydrolysis and biodegradation rate, or quick volatilization from water as reasons these chemicals should be removed from the Final CCL 4. Additionally, commenters noted that some of these contaminants have relatively short half-lives in water or may not be long-lived in the environment and thus should not be listed on the Final CCL 4.

EPA Response: EPA is including ethylene oxide, ethylene glycol, and toluene diisocyanate on the Final CCL 4 because these contaminants may be anticipated to occur in PWSs and may require regulation. Although no occurrence information in finished or ambient water is available for these contaminants, to be consistent with the CCL 4 protocol, EPA used total environmental release data reported in the TRI to evaluate and score the occurrence attributes. In response to comments citing that EPA should consider physical and chemical properties, EPA conducted additional analyses that considers physical and chemical properties and environmental fate parameters to provide an alternate score for the magnitude attribute. For this additional analysis on the specific contaminants commented on (*e.g.,* ethylene oxide, ethylene glycol, and toluene diisocyanate), EPA used the persistence and mobility scoring protocol (which is the protocol used for those chemicals with only production data) as the basis for scoring the magnitude attribute as described in the Final CCL 3: Classification of the PCCL to the CCL (USEPA, 2009e), available in the docket for this action. The model results for these contaminants using this alternate magnitude score still indicated that the contaminants should be listed (for a summary of how the classification model results were used to select contaminants for CCL 4, please see USEPA, 2016e, available in the docket for this action). These additional analyses are further described in the ''Comment Response Document for the Fourth Drinking Water Contaminant Candidate List (Categorized Public Comments)'' document, which is available in the docket for this action (USEPA, 2016f). Additionally, as the SAB (USEPA, 2016h) noted, ''contaminants with a half-life in drinking water sources of days to weeks may still pose a public health concern.''

Considering the comments received on the Draft CCL 4, in future CCLs, EPA may refine analyses to consider if physical and chemical properties can be incorporated into the evaluations of contaminants listed based on environmental release data for occurrence.

b. Cyanotoxins

EPA received comments supporting the inclusion of cyanotoxins on the CCL 4. Some comments requested that cyanotoxins be listed by individual toxins rather than including cyanotoxins as a group on the Final CCL 4 in order to prioritize research on health effects, analytical methods, occurrence and treatment. Comments specifically requested listing the key variants of microcystins, cylindrospermopsin, anatoxin-a, saxitoxin and euglenophycin.

EPA Response: EPA agrees that cyanotoxins should be included on the CCL 4, and has included cyanotoxins as a group on the Final CCL 4. The group of cyanotoxins includes all toxins produced by cyanobacteria including but not limited to microcystins, cylindrospermopsin, anatoxin-a and saxitoxin. EPA has provided CIS sheets for microcystin-LR, cylindrospermopsin, anatoxin-a and saxitoxin. Under CCL 3, cyanotoxins were listed as a group and EPA released CIS sheets for microcystin-LR, cylindrospermopsin and anatoxin-a. Based on data submitted in public comments, EPA updated previous CIS sheets and developed a CIS sheet for saxitoxin. EPA was unable to develop a CIS sheet for euglenophycin due to insufficient information on health and occurrence. EPA acknowledges the comments to list specific cyanotoxin compounds on the CCL instead of listing cyanotoxins as a group. However, because of the similar sources of cyanotoxins (*i.e.,* cyanobacteria) their management may be similar. Furthermore, due to significant information gaps for some cyanotoxins (*e.g.,* euglenophycin and nodularin and many microcystin congeners), EPA has determined it most appropriate to continue to list cyanotoxins as a group at this time. EPA agrees that microcystins, cylindrospermopsin, anatoxin-a and saxitoxin can be of concern for drinking water supplies. EPA acknowledges associated data gaps for euglenophycin as well as those for other cyanotoxins. EPA included total microcystins and six microcystin congeners (-LA, -LF, -LR, -LY, -RR, and -YR), cylindrospermopsin, anatoxin-a and nodularin on the proposed UCMR 4 for monitoring by PWSs. The occurrence information collected under the UCMR 4 will be used to further evaluate the appropriate agency regulatory determination and research actions.

c. Perfluorinated Compounds (PFOA and PFOS)

EPA received a comment supporting the inclusion of perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS) on the CCL 4. EPA also received comments that PFOS and/or PFOA should not be listed on the Final CCL 4. The commenter supporting inclusion of these chemicals on the CCL 4 cited their persistence in the environment and toxicological effects as reasons to include them on the Final CCL 4, and encouraged EPA to consider these chemicals for drinking water regulation. Commenters supporting removal of PFOA and/or PFOS from the CCL 4 cited the low frequency of detections of PFOA and/or PFOS under the UCMR 3 monitoring as of January 2015. Additional reasons cited by commenters that these chemicals should not be listed on the Final CCL 4 are the voluntary efforts by manufacturers to reduce emissions and work towards elimination of these chemicals from products.

EPA Response: EPA is including PFOA and PFOS on the Final CCL 4 because these contaminants are known to occur in drinking water, are persistent in the environment and in the human body, have shown to be toxic in animal studies and may require regulation.

As discussed in the summary of EPA responses to the SAB in this section (IV.A) of the notice, EPA did not use preliminary UCMR 3 monitoring results for the CCL 4.

EPA acknowledges the industry commitments to voluntarily reduce the use and production of PFOA and PFOS; however, there are still a limited number of ongoing uses of PFOA and PFOS. Additionally, these chemicals are persistent in the environment and in the human body, which indicates they may be present in water or migrate to drinking water sources even after uses and production have been reduced or ceased, and therefore potential exposure may still be of concern.

In May 2016, EPA released lifetime health advisories for PFOA and PFOS (USEPA, 2016i, available in the docket for today's action) and Health Effects Support Documents based on the agency's assessment of the latest peer reviewed science. The health advisories provide federal, state, tribal and local officials with information on the health risks of these chemicals, occurrence,

analytical methods and treatment technologies so that they can determine what actions to take to protect consumers.

In accordance with the SDWA, EPA will consider the occurrence data from the final UCMR 3 data set, along with the peer reviewed health effects assessments supporting the May 2016 PFOA and PFOS Health Advisories, to make a regulatory determination whether or not PFOA and PFOS require NPDWRs.

d. Pesticides

Several public commenters requested that specific pesticides be removed from the Final CCL 4. EPA agrees with commenters that three of these pesticides (disulfoton, fenamiphos, and molinate) should not be listed on the Final CCL 4; therefore, EPA is removing them from the Final CCL 4. The evaluation of these three pesticides is summarized in the following paragraphs.

(i) Disulfoton

EPA received a comment from the public that disulfoton should not be included on the Final CCL 4. The commenter noted that disulfoton had zero or very few detections nationally on any previous round of UCMR monitoring and therefore does not warrant national regulation.

EPA Response: EPA agrees with the commenter that disulfoton should not be included on the Final CCL 4. Disulfoton sales and distribution were cancelled in the U.S., effective December 31, 2010, with remaining product stocks to be used until depleted (74 FR 48551, September 23, 2009 (USEPA, 2009g)). The UCMR 1 finished water screening survey (SS) found no detections of disulfoton in 2,300 samples from 295 PWSs. The United States Geological Survey (USGS) has detected disulfoton infrequently in ambient water. During the 1992–2001 USGS National Water-Quality Assessment (NAWQA) Program monitoring, disulfoton was detected in only 17 sites out of 7,118 ambient water sites sampled (see the CIS for this contaminant (USEPA, 2016e)). Out of the 17 sites with detections, only two sites had detects at levels greater than the health reference level of potential concern for drinking water. Given that disulfoton was detected in those two sites prior to its cancellation, the agency expects that any potential disulfoton occurrence in water will likely continue to decrease in the future. Although persistent environmental contaminants may occur in a PWS after its uses are cancelled, based on its physical and chemical properties, disulfoton has low to moderate mobility in water and it is only moderately persistent in the environment (see the CIS for this contaminant (USEPA, 2016e), which can be found in the docket for this action). Therefore its occurrence is expected to decrease over time.

EPA is not including disulfoton on the Final CCL 4 because it is not known or anticipated to occur in drinking water. Disulfoton likely has low potential for public health concern based on its cancellation status, zero detections in PWSs (from UCMR 1 data), and very few detections in ambient water from a large number of sites sampled (by the USGS NAWQA program).

(ii) Fenamiphos

EPA received a comment from the public that fenamiphos should not be included on the Final CCL 4. The commenter stated that the registrant for fenamiphos agreed to cancel all uses, and all existing stocks are to be used by October 6, 2017. The commenter stated that very limited uses remain of products containing fenamiphos in the U.S. and use will be discontinued after 2017.

EPA Response: EPA agrees with the commenter that fenamiphos should not be included on the Final CCL 4 because it is not anticipated to occur in drinking water and is not likely to require regulation. Fenamiphos product registrations were cancelled, and the sale and distribution of fenamiphos by the registrant was prohibited on May 31, 2007. This cancellation followed a five-year phase-out period, beginning in 2003, intended to limit and reduce production of fenamiphos. The sale and distribution of any remaining stocks will be prohibited after October 6, 2017 (79 FR 59262, October 1, 2014; USEPA, 2014c). Fenamiphos was not monitored under UCMR, thus no national scale monitoring has been conducted in PWSs. While fenamiphos was not included in the USGS NAWQA national-scale ambient water monitoring (1992–2001), based on the USGS Pesticide National Synthesis Project (USGS, 2012), fenamiphos use is estimated to have steadily declined. The USGS estimated a usage level of approximately 1.0 million pounds/year of widespread use in certain regions per year in 1992, which declined to an estimated 0.2 million pounds/year in 2002 and further declined to an estimated 0.03 million pounds/year of limited regional uses in 2012. EPA expects fenamiphos occurrence in water will likely continue to decrease due to the declining trend in usage for many years and the prohibition on usage of existing stocks in the U.S. effective after October 6, 2017.

In summary, due to its registration cancellation status, significant decline in usage (based on estimated data from 1992–2013), moderate persistence in the environment, and the prohibition of existing stocks (effective after October 6, 2017), EPA does not anticipate fenamiphos to occur in PWSs or to require regulation, therefore, it is not included on the Final CCL 4.

(iii) Molinate

EPA received a comment from the public that molinate should not be included on the Final CCL 4. The commenter noted that molinate had zero or very few detections nationally on any previous round of UCMR monitoring and therefore does not warrant national regulation.

EPA Response: EPA agrees with the commenter that molinate should not be included on the Final CCL 4. The UCMR 1 finished water assessment monitoring found only one sample with a detection of molinate out of 33,799 samples taken from 3,873 PWSs. The single sample detection was below the health reference level of potential concern for molinate in drinking water. Further, molinate sales and distribution were cancelled in the U.S. effective July 1, 2009, with remaining stocks required to be used by August 31, 2009, (73 FR 44261, July 30, 2008 (USEPA, 2008c)). This cancellation action concluded a six-year scheduled phaseout of molinate. The agency is not including molinate on the Final CCL 4 because it is not anticipated to occur in PWSs at levels of public health concern. The agency expects the potential for molinate to occur in water will likely continue to decrease due to the prohibition on product use in the U.S. since 2009.

e. Manganese

EPA received four comments that support the inclusion of manganese and two comments that do not support the inclusion of manganese on CCL 4. Commenters supporting the inclusion of manganese on CCL 4 cited recent studies that showed neurological effects in children and infants exposed to excess manganese via drinking water. Commenters also noted manganese frequently occurs in water and should be included on CCL 4 so that national occurrence data can be obtained through UCMR monitoring. Commenters who did not support the inclusion of manganese on the CCL 4 cited that the primary route of human exposure to manganese is through food, not drinking

water. Also, commenters question the link between the consumption of drinking water and developmental neurotoxicity from manganese exposure to warrant inclusion on the CCL 4.

EPA Response: EPA agrees with the commenters that support manganese inclusion on the CCL 4, and is including manganese on the Final CCL 4 because it is known to occur in PWSs and may require regulation. The evidence from the studies provided by commenters indicate that exposure to excess manganese may present a substantial health threat to children and infants. EPA is continuing to evaluate the potential risks to children and infants based on over 30 recent studies cited by the public during the nomination and comment period including those by Bouchard et al. (2011), Oulhote et al. (2014) and Kern and colleagues (2010, 2011), whom have indicated neurological effects stemming from the exposure to excess manganese.

EPA also agrees with the commenters assertion that manganese is known to occur in PWSs. EPA has included the occurrence data used to evaluate manganese in the CIS for this contaminant. This data includes USGS monitoring of ambient water, as well as drinking water data from several states. The data indicates that manganese is known to occur in public drinking water supply wells and supports the previous information from the National Inorganics and Radionuclides Survey (NIRS). EPA has proposed to monitor manganese under UCMR 4.

EPA has reviewed all of the current data submitted by commenters on the manganese health effects and found that the existing 2004 Health Advisory could warrant an update. Since manganese is not a regulated contaminant in drinking water, the Secondary Maximum Contaminant Level of 0.05 mg/L is not mandatory and does not require monitoring. The current IRIS assessment for manganese dates to 1995 (USEPA, 1995b) and the Health Advisory to 2004. The Agency for Toxic Substances and Disease Registry 2012 Toxicological Profile did not establish guidelines that applied to oral exposures and the Institute of Medicine (2001) provides Tolerable Upper Intake Levels for developmental lifestages and adults. The database of health effects studies for oral manganese exposures has expanded considerably since the last EPA assessment, therefore manganese is a good candidate for re-evaluation. EPA intends to evaluate the new toxicological findings and UCMR 4 monitoring data and will use this information in future regulatory decision-making, and to revise the current Health Advisory, if appropriate. More detailed evaluations of the routes of exposure usually occur in the regulatory determination and regulatory development processes.

f. Nonylphenol

EPA received two comments supporting the inclusion of nonylphenol and three comments that nonylphenol should not be included on the Final CCL 4. The commenters supporting inclusion of nonylphenol on the CCL 4 cited new health effects and occurrence data as reasons to include them on the Final CCL 4 and stated that EPA has adequate justification to include nonylphenol on the CCL based on this information. The commenters requesting that nonylphenol not be included on the Final CCL 4 cited a surface water monitoring study from 2002 and industry efforts to reduce surfactant usage as reasons nonylphenol should not be listed on the Final CCL 4. The main use of nonylphenol is in the manufacture of nonylphenol ethoxylates, which have been used in a wide range of industrial applications and consumer products including laundry detergents, cleaners, degreasers, paints and coatings and other uses (79 FR 59186, October 1, 2014 (USEPA, 2014d)).

EPA Response: EPA is including nonylphenol on the Final CCL 4 as proposed because it is anticipated to occur in drinking water, has potential adverse health effects (Bontje et al., 2005), and may require regulation. EPA evaluated the 2002 USGS reconnaissance study (Kolpin et al., 2002) identified by the commenter and used it to evaluate the occurrence of nonylphenol. While there were more recent finished water studies available, EPA considers the 2002 USGS study as the most appropriate study to evaluate the occurrence of nonylphenol for CCL 4 given the greater number of samples and larger geographic scale. Additionally, more recent studies indicate that nonylphenol has been detected in drinking water. While EPA appreciates the information from commenters on reduced usage of nonylphenol, we believe measured occurrence data from water sources are preferred over production or usage information when evaluating the likelihood of occurrence in drinking water.

3. Microbial Contaminants

a. Overall Process Comments

EPA received comments arguing that the follow-through on the microbes listed in previous CCLs has been inadequate, that EPA should identify high priority pathogens on the CCL 4 and identify information gaps and barriers to obtaining information associated with each pathogen. EPA received comments requesting an open process for prioritizing and collecting information, to adopt a collaborative method development process and to rank microbes by treatability. EPA also received comments to focus priorities on distribution and plumbing system biofilm concerns and to evaluate microbial contaminants in the context of diverse water supplies such as drinking water sources from water reuse treatment facilities.

EPA Response: EPA's criteria for evaluating and prioritizing pathogens for inclusion in the CCL 3 included health effects, waterborne disease outbreaks (WBDO) and occurrence information (73 FR 9628 (USEPA, 2008a)). EPA developed and implemented a systematic strategy and set of criteria for selecting the pathogens for CCL 3. This is the screening and scoring process described in detail in the support documents in the docket of the Final CCL 3 (*e.g.,* see the Final Contaminant Candidate List 3 Microbes: PCCL to CCL Process for more information on all of the scores). The CCL 3 and CCL 4 processes provided multiple opportunities for public input (*e.g.,* nominations, public comment) to allow for an open process. In order to provide additional clarity to the scoring process, EPA is including an example schematic describing the process of evaluating a pathogen for inclusion on the list and a pathogen for exclusion from the list. This schematic can be found in the CIS's for the Final Fourth Contaminant Candidate List (USEPA, 2016e). EPA acknowledges the request to identify information gaps; therefore, data needs are described in section V of this **Federal Register** notice.

The EPA's Office of Water coordinates with EPA's Office of Research and Development to discuss research needs and priorities. Research on distribution system and premise plumbing biofilm concerns has been incorporated into EPA's strategic research plan. EPA acknowledges the comments on diverse water supplies and method development and will consider these comments as it develops future research priorities.

b. Pathogens for Inclusion

EPA received comments supporting the proposed inclusion of *Mycobacterium avium, Legionella pneumophila, Naegleria fowleri,* enteroviruses and Heterotrophic Plate Count (HPC). EPA also received

comments requesting recommendations for *Legionella pneumophila* management.

EPA Response: EPA included *Mycobacterium avium, Legionella pneumophila, Naegleria fowleri,* and enteroviruses on the Final CCL 3 and were therefore carried forward to the draft and Final CCL 4. While the broader issue of the management of *Legionella pneumophila* is outside the scope of today's action, the agency agrees it is of great importance and *Legionella* remains a risk to building water systems. In September 2016, EPA released a document reviewing the available technology to treat *Legionella* titled *Technologies for Legionella Control in Premise Plumbing Systems: Scientific Literature Review* (USEPA, 2016j). This document provides information to state and local decision-makers about how they might utilize treatment as part of their efforts to manage *Legionella* risks in building water systems.

EPA disagrees that HPC should be included on CCL 4. The group of HPC usually includes a diverse group of microorganisms that are part of the natural environment in water. Available epidemiological evidence shows no relationship between gastrointestinal illness and HPC bacteria in drinking water (Calderon, 1988; Calderon and Mood, 1991; Payment et al., 1997; Bartram J et al., 2003). Thus, EPA considers the potential health risk of HPC bacteria in drinking water as likely negligible and is not including HPC on the Final CCL 4. In addition, HPC bacteria are addressed under the Surface Water Treatment Rule as a treatment technique where they can be monitored in lieu of a disinfectant residual because HPC is an alternative method of determining disinfectant residual levels.

c. Pathogens for Exclusion

EPA received comments not supporting the proposed inclusion of *Escherichia coli* O157 and *Helicobacter pylori,* noting these pathogens were unlikely to occur in treated drinking water.

EPA Response: EPA's criteria for evaluating and prioritizing pathogens for inclusion in the Draft CCL 3 **Federal Register** notice, included health effects, WBDO and occurrence information (73 FR 9628 (USEPA, 2008a)). Treatability was not part of the scoring criteria considered for CCL 3 inclusion. Although some of the microbes listed in the Draft CCL 4 may be well controlled by drinking water treatment (*i.e.,* disinfection), not all PWSs in the U.S. are required to treat. For example, approximately thirty percent of the 40,000 community ground water systems do not have disinfection treatment (USEPA, 2013). For the reasons discussed in detail in the Draft CCL 3 **Federal Register** notice (73 FR 9628 ((USEPA, 2008a)), EPA did not preclude pathogens from CCL 3 and CCL 4 based on their potential to be controlled by existing treatment technique regulations.

V. Data Needs for CCL 4 Contaminants

After the listing process, the CCL 4 contaminants will be further evaluated in a separate action called Regulatory Determination 4 (RD 4). The process used to previously evaluate CCL 3 contaminants under RD 3 is described in section I.E.3 of this notice. EPA anticipates using a similar process to evaluate CCL 4 contaminants under RD 4, although it is possible that some modifications may be made to this process. In the initial phases of this process, EPA determines if sufficient data are available to meet the three RD criteria set forth in SDWA section 1412(b)(1) and previously outlined in section I.D.4 of this notice. If sufficient data are available to meet all three statutory criteria, a regulatory determination may be made. As discussed in section I.D.4, SDWA requires EPA to make regulatory determinations every five years on at least five CCL contaminants.

The SAB and other commenters have recommended additional prioritization of the CCL 4 contaminants to communicate research needs, help focus efforts for researchers, and inform future regulatory decision-making. EPA acknowledges that many contaminants on the CCL 4 have substantial data and information needs to fulfill in order for the agency to make a regulatory determination in accordance with SDWA 1412 (b)(1)(A). These current data needs are described in the following section, and are presented in Exhibit 2. By identifying those contaminants that need additional research and information, EPA is communicating to stakeholders both research priorities and gaps for these contaminants.

Categorization of Contaminants

EPA assessed the data and information gathered on the CCL 4 contaminants and generated a table (Exhibit 2) to help identify data/information needs for further evaluation under RD 4. To develop this table, EPA began with the information contained in the data availability/Phase 1 table included in Appendix D of the Protocol for the RD 3 (USEPA, 2014b), which describes the status of the best available occurrence data and health effects assessments for CCL 3 contaminants. EPA updated the occurrence data needs for CCL 4 contaminants by including which contaminants were monitored on the UCMR 3, and updated the health effects data needs based on available EPA or other non-EPA peer reviewed assessments as of May 2016. Since manganese and nonylphenol were nominated and added to the CCL 4 (not carried forward from CCL 3), data collected under CCL 4 was included in the Contaminant Information Sheets (USEPA, 2016e) for these contaminants and was used to assess the data needs. EPA characterized each chemical contaminant included on the Final CCL 4 based on their health effects, occurrence and analytical methods data needs.

EPA then categorized contaminants into six categories depending upon the availability of their occurrence data and health assessment. Contaminants in Group A have nationally representative finished drinking water data and a peer reviewed health assessment and are likely to have sufficient data available to be placed on a short list for further assessment under RD 4. Contaminants in Group B have finished drinking water data that is not nationally representative and peer reviewed health assessments. These contaminants may have sufficient data to be placed on a short list for further assessment under RD 4, particularly if the non-nationally representative occurrence data shows detections at levels of public health concern. Contaminants in groups C, D, E, and F of Exhibit 2 that lack either a peer reviewed health assessment or finished water data have more substantial data needs and are unlikely to have sufficient information to allow further assessment under the RD 4. For these contaminants, EPA plans to identify them as research priorities and work to fill their research needs such as evaluating the potential for monitoring under the UCMR or identifying those contaminants as priorities for health effects research. The health effects and occurrence data sources used to classify data needs are featured in Appendix 6 of the CISs for the Final Fourth CCL in the docket (USEPA, 2016e). The following sections describe the types of data or information gaps outlined in Exhibit 2 and provide examples.

A. Health Effects

Under the RD process, EPA relies on external peer-reviewed health assessments to determine if and at what level a contaminant ''may have an adverse effect on the health of persons.'' Health effects data sources evaluated for

RD 3 included EPA health assessments, or peer reviewed health assessments developed by other organizations such as the National Academy of Sciences, the Agency for Toxic Substances and Disease Registry, World Health Organization, the California EPA's Office of Environmental Health Hazard Assessment, Registry of Toxic Effects of Chemical Substances, and/or supplemental data from a single study, if the health assessment is peer reviewed and uses comparable methods, standards and guidelines to an EPA health assessment.

As shown in Exhibit 2, EPA categorized the health effects data needs in the following way:

1. If a peer reviewed health assessment is available or is in the process of being revised, the contaminant is considered to have health effects data available.

2. If a peer reviewed health assessment is not available, then the contaminant is considered to not have health effects data currently available.

B. Occurrence

For RD evaluations, the occurrence data availability assessment is used to identify contaminants that may have sufficient data and information to characterize their status as known or likely to occur in PWSs. EPA uses data from many sources to evaluate occurrence for contaminants considered for RD (see Appendix C of USEPA, 2014b for occurrence data sources evaluated under RD 3). For this evaluation, EPA prefers to have nationally representative finished drinking water occurrence data, but finished drinking water data that are not nationally representative may also be used to determine if the contaminant occurs frequently at levels of public health concern. In addition, the agency evaluates supplemental sources of information (*e.g.,* ambient/source water occurrence, production/use and environmental release data). For the purposes of identifying current data needs for RD 4, as shown in Exhibit 2, EPA categorized the occurrence data needs in the following way:

- Finished drinking water occurrence data that are nationally representative are available.
  - Data sources may include UCMRs (*i.e.,* UCMR 1, UCMR 2 and UCMR 3), the Unregulated Contaminant Monitoring Program (Round 1 and Round 2) and NIRS.
- Finished drinking water occurrence data that are not nationally representative are available. These data may include:
  - Finished water assessments by federal agencies (*e.g.,* EPA, the U.S. Department of Agriculture and USGS). These may include assessments that are geographically distributed across the nation but are not intended to be statistically representative of the nation (*e.g.,* the Disinfection By-Product Rule Information Collection Request).
  - State-level finished water monitoring data.
  - Research performed by institutions and universities (*e.g.,* scientific literature), including targeted or local monitoring studies.
  - Various reports from the Centers for Disease Control and the scientific literature for microbes.
- Finished drinking water occurrence data are not available.
  - The best available data sources may include environmental release data (such as TRI data or pesticide application data) or ambient water data.

EPA has also indicated with a footnote in the occurrence data column, highlighting which contaminants are proposed for monitoring under the UCMR 4 from 2018–2020. Therefore, although some of the contaminants that may be monitored under UCMR 4 are shown in this table as currently having data gaps for occurrence (*e.g.,* they only have drinking water data that is not nationally representative or release data), EPA has proposed to fill those occurrence data needs for future RD evaluations.

C. Analytical Methods

To conduct nationally representative drinking water occurrence studies that could support a regulatory determination, EPA needs to have an analytical method that is suitable for the drinking water matrix and is robust enough to be used by many laboratories to conduct national studies and/or compliance monitoring. For the purpose of CCL 4, EPA assessed the status of the development of analytical methods for drinking water and determined estimated reporting levels for each contaminant. EPA also assessed method sensitivity with respect to the HRL for the chemical contaminants. Method sensitivity is measured by using method specific reporting levels, lowest concentration minimum reporting levels, and promulgated minimum reporting level. While there are many methods for monitoring the CCL 4 pathogens available from scientific papers and consensus organizations, not all of them may be appropriate for use in drinking water or for a national monitoring effort. Of the CCL 4 pathogens, only enterovirus and caliciviruses have an EPA-approved method for drinking water. The status of drinking water analytical methods for the CCL chemical contaminants, as of May 2016, is presented in Exhibit 2. EPA categorized the analytical method needs in the following way:

- An EPA drinking water method, with estimated reporting levels that are adequate for analysis relative to the current HRL or health assessment is available.
- An EPA drinking water method is available but the minimum reporting level (MRL) does not allow for quantitation of the contaminant at a concentration below the current HRL. These methods are denoted in Exhibit 2 by ''(MRL>HRL)''.
- An EPA drinking water method is currently being developed.
- An EPA drinking water method is not available.

Although not shown in Exhibit 2, EPA also considers other government and consensus methods (*e.g.,* Standard Methods and ASTM, International) when considering analytical methods that may be used or modified for UCMR monitoring.

EXHIBIT 2—REGULATORY DETERMINATION DATA/INFORMATION NEEDS FOR CCL 4 CONTAMINANTS

CASRN	Common name	What is the best available occurrence data?	Is a health assessment available?	Is an EPA analytical method available?
(A) Contaminants with Nationally Representative Finished Water Occurrence Data and Peer Reviewed Health Assessments				
630–20–6	1,1,1,2-Tetrachloroethane	National	Yes [a]	Yes.
96–18–4	1,2,3-Trichloropropane	National	Yes	Yes (MRL > HRL).
123–91–1	1,4-Dioxane	National	Yes	Yes.
16655–82–6	3-Hydroxycarbofuran	National	Yes [b]	Yes.
34256–82–1	Acetochlor	National	Yes	Yes.
187022–11–3	Acetochlor ethanesulfonic acid (ESA)	National	Yes [b]	Yes.

EXHIBIT 2—REGULATORY DETERMINATION DATA/INFORMATION NEEDS FOR CCL 4 CONTAMINANTS—Continued

CASRN	Common name	What is the best available occurrence data?	Is a health assessment available?	Is an EPA analytical method available?
194992–44–4	Acetochlor oxanilic acid (OA)	National	Yes [b]	Yes.
142363–53–9	Alachlor ethanesulfonic acid (ESA)	National	Yes	Yes.
171262–17–2	Alachlor oxanilic acid (OA)	National	Yes [b]	Yes (MRL > HRL).
14866–68–3	Chlorate	National	Yes	Yes.
7440–48–4	Cobalt	National	Yes [a]	Yes.
NA	Enterovirus	National	Yes	Yes.
7439–96–5	Manganese	National [c]	In Development	Yes.
74–83–9	Methyl bromide (Bromomethane)	National	Yes [a]	Yes.
51218–45–2	Metolachlor	National	Yes	Yes.
171118–09–5	Metolachlor ethanesulfonic acid (ESA)	National	Yes	Yes.
152019–73–3	Metolachlor oxanilic acid (OA)	National	Yes	Yes.
7439–98–7	Molybdenum	National	In Development	Yes.
98–95–3	Nitrobenzene	National	Yes	Yes.
55–18–5	N-Nitrosodiethylamine (NDEA)	National	Yes	Yes (MRL > HRL).
62–75–9	N-nitrosodimethylamine (NDMA)	National	Yes [a]	Yes (MRL > HRL).
621–64–7	N-Nitroso-di-n-propylamine (NDPA)	National	Yes	Yes (MRL > HRL).
930–55–2	N-nitrosopyrrolidine (NPYR)	National	Yes [a]	Yes.
1763–23–1	Perfluorooctane sulfonic acid (PFOS)	National	Yes	Yes.
335–67–1	Perfluorooctanoic acid (PFOA)	National	Yes	Yes.
121–82–4	RDX	National	In Development	Yes.
7440–62–2	Vanadium	National	Yes [a]	Yes.
(B) Contaminants With Non-Nationally Representative Finished Water Occurrence Data and Peer Reviewed Health Assessments				
71–36–3	1-Butanol	Non-National [c]	In Development	Yes.
30560–19–1	Acephate	Non-National	Yes	Yes.
107–02–8	Acrolein	Non-National	Yes [a]	No.
NA	Adenovirus	Non-National	Yes	No.
319–84–6	alpha-Hexachlorocyclohexane	Non-National [c]	Yes	Yes (MRL > HRL).
741–58–2	Bensulide	Non-National	Yes	Yes.
100–44–7	Benzyl chloride	Non-National	Yes [a]	No.
NA	Caliciviruses	Non-National	Yes	Yes.
133–06–2	Captan	Non-National	Yes	No.
NA	Cyanotoxins	Non-National [d]	Yes for microcystins and cylindrospermopsin, no for other cyanotoxins.	Yes.
141–66–2	Dicrotophos	Non-National	Yes	Yes.
330–54–1	Diuron	Non-National	Yes	Yes.
13194–48–4	Ethoprop	Non-National [c]	Yes	Yes.
107–21–1	Ethylene glycol	Non-National	Yes	No.
96–45–7	Ethylene thiourea	Non-National	Yes	No.
50–00–0	Formaldehyde	Non-National	Yes	Yes.
NA	*Legionella pneumophila*	Non-National	Yes	In Development.
10265–92–6	Methamidophos	Non-National	Yes	Yes.
NA	*Mycobacterium avium*	Non-National	Yes	In Development.
86–30–6	N-Nitrosodiphenylamine (NDPhA)	Non-National	Yes [a]	No.
301–12–2	Oxydemeton-methyl	Non-National	Yes	Yes.
42874–03–3	Oxyfluorfen	Non-National [c]	Yes	Yes.
52645–53–1	Permethrin	Non-National [c]	Yes	Yes.
41198–08–7	Profenofos	Non-National [c]	Yes	Yes.
107534–96–3	Tebuconazole	Non-National [c]	Yes	Yes.
78–48–8	Tribufos	Non-National [c]	Yes	Yes.
50471–44–8	Vinclozolin	Non-National	Yes	Yes.
137–30–4	Ziram	Non-National	Yes	No.
(C) Contaminants With Nationally Representative Finished Water Occurrence Data Lacking Peer Reviewed Health Assessments				
75–34–3	1,1-Dichloroethane	National	No [a]	Yes.
106–99–0	1,3-Butadiene	National	No	Yes (MRL > HRL).
74–87–3	Chloromethane (Methyl chloride)	National	No	Yes.
474–86–2	Equilin	National	No	Yes.
50–28–2	Estradiol (17-beta estradiol)	National	No	Yes.
50–27–1	Estriol	National	No	Yes.
53–16–7	Estrone	National	No	Yes.
57–63–6	Ethinyl Estradiol (17-alpha ethynyl estradiol).	National	No	Yes.
7440–56–4	Germanium	National [c]	No	Yes.
74–97–5	Halon 1011 (bromochloromethane)	National	No	Yes.
75–45–6	HCFC–22	National	No	Yes.
1634–04–4	Methyl tert-butyl ether (MTBE)	National	No	Yes.
103–65–1	n-Propylbenzene	National	No [a]	Yes.

EXHIBIT 2—REGULATORY DETERMINATION DATA/INFORMATION NEEDS FOR CCL 4 CONTAMINANTS—Continued

CASRN	Common name	What is the best available occurrence data?	Is a health assessment available?	Is an EPA analytical method available?
135–98–8	sec-Butylbenzene	National	No[a]	Yes.
13494–80–9	Tellurium	National	No	No.
(D) Contaminants With Non-Nationally Representative Finished Water Occurrence Data Lacking Peer Reviewed Health Assessments				
57–91–0	17alpha-estradiol	Non-National	No	In Development.
75–07–0	Acetaldehyde	Non-National	No	Yes.
62–53–3	Aniline	Non-National	No[a]	No.
25013–16–5	Butylated hydroxyanisole	Non-National[c]	No	Yes.
517–09–9	Equilenin	Non-National	No	In Development.
114–07–8	Erythromycin	Non-National	No	In Development.
110–54–3	Hexane	Non-National	No[a]	No.
72–33–3	Mestranol	Non-National	No	No.
NA	*Naegleria fowleri*	Non-National	No	No.
25154–52–3	Nonylphenol	Non-National	No	No.
68–22–4	Norethindrone (19-Norethisterone)	Non-National	No	In Development.
(E) Contaminants With Peer Reviewed Health Assessments Lacking Finished Water Occurrence Data				
107–18–6	2-Propen-1-ol	Release[c]	Yes[a]	Yes.
110429–62–4	Clethodim	Release	Yes	No.
55290–64–7	Dimethipin	Release[c]	Yes	Yes.
NA	*Escherichia coli (O157)*	No Data	Yes	No.
NA	*Helicobacter pylori*[e]	No Data	Yes	No.
NA	Hepatitis A virus	No Data	Yes	No.
302–01–2	Hydrazine	Release	Yes[a]	No.
67–56–1	Methanol	Release	Yes	No.
55–63–0	Nitroglycerin	Release	Yes[a]	No.
872–50–4	N-Methyl-2-pyrrolidone	Release	Yes	No.
75–56–9	Oxirane, methyl-	Release	Yes	No.
91–22–5	Quinoline	Release[c]	Yes	Yes (MRL > HRL).
112410–23–8	Tebufenozide	Release	Yes	Yes.
59669–26–0	Thiodicarb	Release	Yes	No.
23564–05–8	Thiophanate-methyl	Release	Yes	No.
76–87–9	Triphenyltin hydroxide (TPTH)	Release	Yes	No.
(F) Contaminants Lacking Finished Water Occurrence Data and Current, Peer Reviewed Health Assessments				
109–86–4	2-Methoxyethanol	Release[c]	No[a]	Yes.
101–77–9	4,4′-Methylenedianiline	Release	No	No.
60–35–5	Acetamide	Release	No	No.
NA	*Campylobacter jejuni*	No Data	No	No.
80–15–9	Cumene hydroperoxide	Release	No	No.
75–21–8	Ethylene oxide	Release	No	No.
95–53–4	o-Toluidine	Release[c]	No[a]	Yes.
NA	*Salmonella enteric*	No Data	No	No.
NA	*Shigella sonnei*	No Data	No	No.
26471–62–5	Toluene diisocyanate	Release	No	No.
121–44–8	Triethylamine	Release	No	No.
51–79–6	Urethane	Release	No	No.

Key to Exhibit:
National = Finished drinking water occurrence data that are nationally representative are available.
Non-National = Finished drinking water occurrence data that are not nationally representative are available.
In Development = Revised health assessment or analytical method is currently being developed.
[a] Provisional Peer Reviewed Toxicity Value (PPRTV) in the form of chronic, oral RfD subchronic, oral RfD, cancer weight evidence, or cancer slope factor available.
[b] The parent health assessment was used for the metabolite. There is no independent health assessment available for the metabolite.
[c] Proposed for UCMR 4.
[d] Evaluations of occurrence data availability for cyanotoxins in this table are based on anatoxin-a, cylindrospermopsin, and microcystin-LR. Cyanotoxins proposed for UCMR 4 monitoring include total microcystins (MC), MC-LA, MC-LF, MC-LR, MC-LY, MC-RR, MC-YR, nodularin, anatoxin-a and cylindrospermopsin.

VI. Next Steps and Future Contaminant Candidate Lists

The CCL process is critical to shaping the future direction of the drinking water program. The agency will continue to gather information and evaluate contaminants on the CCL 4 to make regulatory determinations for at least five contaminants. The agency will also continue to refine the CCL process and gather more data to identify contaminants for CCL 5. EPA will continue to work to prioritize contaminants on the CCL 4, both for RD and for additional research and data collection.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OECA–2013–0334; FRL–9953–08–OEI]

NSPS for Secondary Brass and Bronze Production, Primary Copper Smelters, Primary Zinc Smelters, Primary Lead Smelters, Primary Aluminum Reduction Plants, and Ferroalloy Production Facilities (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), ''NSPS for Secondary Brass and Bronze Production (40 CFR part 60, subpart M), Primary Copper Smelters (40 CFR part 60, subpart P), Primary Zinc Smelters (40 CFR part 60, subpart Q), Primary Lead Smelters (40 CFR part 60, subpart R), Primary Aluminum Reduction Plants (40 CFR part 60, subpart S), and Ferroalloy Production Facilities (40 CFR part 60, subpart Z) (Renewal)'' (EPA ICR No. 1604.11, OMB Control No. 2060–0110), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through November 30, 2016. Public comments were previously requested via the **Federal Register** (81 FR 26546) on May 3, 2016 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 19, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OECA–2013–0334, to: (1) EPA online using *www.regulations.gov* (our preferred method), by email to *docket.oeca@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460, and (2) OMB via email to *oira_submission@omb.eop.gov.* Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564–2970; fax number: (202) 564–0050; email address: *yellin.patrick@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: *http://www.epa.gov/dockets.*

Abstract: Owners and operators of secondary brass and bronze production, primary copper smelters, primary zinc smelters, primary lead smelters, primary aluminum reduction plants, and ferroalloy production facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 60, subpart A), as well as for the applicable standards in 40 CFR part 60, subparts M, P, Q, R, S, and Z, respectively. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/Affected Entities: Secondary brass and bronze production, primary copper smelters, primary zinc smelters, primary lead smelters, primary aluminum reduction plants, and ferroalloy production facilities.

Respondent's Obligation to Respond: Mandatory (40 CFR part 60 Subparts M, P, Q, R, S, and Z).

Estimated Number of Respondents: 18 (total).

Frequency of Response: Initially, monthly, semiannually and annually.

Total Estimated Burden: 3,880 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total Estimated Cost: $527,000 (per year), which includes $127,000 in either annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is an overall decrease in the respondent labor hours and costs compared to the estimated burden currently identified in the OMB Inventory of Approved Burdens. This decrease is not due to any program changes, but is a result of corrections. First, the previous ICR assumed all five secondary brass and bronze production sources subject to Subpart M would comply with the opacity standard using the Reference Method 9 performance test instead of continuous opacity monitoring (COM), and that the sources are not using any other continuous monitoring systems (CMS). However, the ICR included burden estimates for monitoring emissions and system performance associated with CMS and COM. Correcting this error consequently reduced the total labor hours for Subpart M.

Second, the previous ICR incorrectly estimated that all four primary aluminum reduction plants subject to Subpart S would need to submit performance test results every month. This estimate is incorrect because only two out of four sources are required to perform monthly performance tests, and the other two sources are allowed to perform an annual performance test. Therefore, the requirement to submit performance test results was reduced to once per year for two sources, which consequently reduced the total labor hours for Subpart S.

There is, however, a small adjustment increase in the total labor hours for Subparts P, Q, R, and Z due to a change in assumption; this ICR assumes all existing sources will need to re-familiarize with the regulation each year, even when the burden for Subpart R is now zero due to Doe Run no longer being a primary lead smelter.

Courtney Kerwin,

Director, Regulatory Support Division.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OECA–2013–0345; FRL–9953–00–OEI]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Metal Can Manufacturing Surface Coating (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), ''NESHAP for Metal Can Manufacturing Surface Coating (40 CFR part 63, subpart KKKK) (Renewal)'' (EPA ICR No. 2079.06, OMB Control No. 2060–0541), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through November 30, 2016. Public comments were previously requested via the **Federal Register** (81 FR 26546) on May 3, 2016 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 19, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OECA–2013–0345, to: (1) EPA online using *www.regulations.gov* (our preferred method), or by email to *docket.oeca@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to *oira_submission@omb.eop.gov.* Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564–2970; fax number: (202) 564–0050; email address: *yellin.patrick@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: *http://www.epa.gov/dockets.*

Abstract: The affected entities are subject to the General Provisions of the NESHAP for Metal Can Manufacturing Surface Coating (40 CFR part 63, subpart A), and any changes, or additions, to the Provisions are specified at 40 CFR part 63, subpart KKKK. Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities: Metal can manufacturing facilities that use 1,500 gallons or more of surface coatings.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart KKKK).

Estimated number of respondents: 5 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 1,940 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $206,000 (per year), which includes $6,000 in annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is a small adjustment increase of 2 respondent labor hours due to rounding of all total calculated values to three significant digits. The increase is not due to any program change.

Courtney Kerwin,

Director, Regulatory Support Division.

BILLING CODE 6560–50–P

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Privacy Act of 1974; Publication of Notices of Systems of Records and Proposed New Systems of Records

AGENCY: Equal Employment Opportunity Commission.

ACTION: Notice; publication of notices of systems of records, and proposed new systems of records.

SUMMARY: This notice proposes one new system of records, changes to a number of existing systems of records, and removes obsolete systems of records. This notice republishes all of EEOC's notices for its systems of records subject to the Privacy Act in one issue of the **Federal Register** so that an accurate and complete text of the notices is available for use by individuals and by agency Privacy Act officers.

DATES: The changes to the existing systems of records are effective on November 17, 2016. The proposed new system of records will become effective, without further notice, on January 17, 2017 unless comments dictate otherwise.

ADDRESSES: Comments on this notice may be submitted to the EEOC in three ways; please use only one.

- Comments and attachments may be submitted online at *http://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions on the Web site for submitting comments. Comments received here will be posted publicly on the same portal without change, including any personal information you provide. However, the EEOC reserves the right to refrain from posting comments: That contain obscene, indecent, or profane language; that contain threats or defamatory statements; that contain hate speech directed at race, color, sex, sexual orientation, national origin, ethnicity, age, religion, or disability; or that promote or endorse services or products.
- Hard copy comments may be submitted to Bernadette Wilson, Acting Executive Officer, Executive Secretariat, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

• The Executive Secretariat also will accept documents totaling six or fewer pages by facsimile (''fax'') machine. This limitation is necessary to assure access to the equipment. The telephone number of the fax receiver is *(202) 663–4114.* (This is not a toll-free number.) Receipt of fax transmittals will not be acknowledged, except that the sender may request confirmation of receipt by calling the Executive Secretariat staff at *(202) 663–4070* (voice) or *(202) 663–4074* (TTY). (These are not toll-free telephone numbers.)

Subject to the conditions noted above, the EEOC will post online at *http://www.regulations.gov* all comments submitted in hard copy or by fax with the Executive Secretariat. The EEOC Headquarters' library also will make available hard copies of all comments, by advance appointment only, between the hours of 9 a.m. and 5 p.m. Eastern Time. To schedule an appointment to inspect the comments at the EEOC's library, contact the library staff at *(202) 663–4630* (voice) or *(202) 663–4641* (TTY). (These are not toll-free numbers.)

Copies of this notice are available in the following alternate formats: Large print, braille, electronic file on computer disk, and audio-tape. Copies may be obtained from the Publications Center by calling 1–800–699–3362.

FOR FURTHER INFORMATION CONTACT: Thomas J. Schlageter, Assistant Legal Counsel, (202) 663–4668 (voice), Kathleen Oram, Senior Attorney (202) 663–4681 (voice), or Savannah Marion, (202) 663–4909 or (202) 663–7026 (TDD).

SUPPLEMENTARY INFORMATION: The Equal Employment Opportunity Commission last published its Privacy Act systems notices in 2002. The Commission proposes one new system of records to cover Freedom of Information Act and Privacy Act records. EEOC previously covered these records in its general correspondence system of records. The Commission is deleting EEOC–6 Employee Assistance Program records and EEOC–14 Employee Parking records because it no longer collects and keeps those records and is replacing EEOC–6 with the new Freedom of Information Act and Privacy Act Records system. The Employee Assistance Program records are now maintained by the Department of Health and Human Services, and Employee Parking records are maintained by a private building management company. In addition, the Commission is amending a number of its systems to recognize more widespread electronic storage, and remove requirements that persons submit social security numbers when requesting records. The Commission is adding a statement of general routine uses to include two new routine uses permitting disclosure of records from all of its systems of records for suspected or confirmed breach notification and response. The Commission is removing three obsolete routine uses from its Claims Collection Records notice and one routine use from its Internal Harassment Inquires Records notice. EEOC is adding a new routine use to its two Discrimination Case Files systems of records, a new routine use to its Internal Harassment Inquiries system of records, and one new routine use to its Office of Inspector General system of records. Finally, the Commission has amended several system notices to reflect current office names and has amended Appendix A to reflect current addresses of Commission offices. To ensure that users will have a copy of the current text of each of its system notices, the Commission is publishing the complete text of all of its systems notices.

A brief description of the major changes follows:

Universal Routine Uses: EEOC proposes to add two routine uses applicable to all systems of records. One would permit EEOC to disclose records reasonably necessary to respond to a suspected or confirmed breach of the system of records where EEOC determines there may be a risk of harm to individuals, EEOC, or the Federal government. The second proposed routine use would allow EEOC to disclose records to other Federal agencies to assist in their efforts to respond to a suspected or confirmed breach.

EEOC–1 Age and Equal Pay Act Discrimination Case Files and EEOC–3 Title VII, Americans with Disabilities Act, and Genetic Information Nondiscrimination Act Discrimination Case Files: A routine use that permits disclosure to other federal agencies in accordance with Memoranda of Understanding or similar agreements between EEOC and other agencies that provide for coordination and cooperation in EEOC's employment discrimination enforcement efforts is proposed. The retention and disposal sections are updated.

EEOC–3 Title VII, Americans with Disabilities Act, and Genetic Information Nondiscrimination Act Discrimination Case Files: The system was updated to add Genetic Information Nondiscrimination Act (GINA) files. A routine use that permits disclosure to other federal agencies in accordance with Memoranda of Understanding or similar agreements between EEOC and other agencies that provide for coordination and cooperation in EEOC's employment discrimination enforcement efforts is proposed.

EEOC 6 Freedom of Information Act and Privacy Act Records: This new system of records replaces the obsolete Employee Assistance Program Records system and covers all Freedom of Information Act (FOIA) and Privacy Act requests, administrative appeals, responses, and related records. These records were previously included in EEOC–5 Correspondence and Communications. Nine routine uses are proposed for the system.

EEOC–9 Claims Collection Records: Three obsolete routine uses are removed, as is an obsolete reference to consumer reporting agencies.

EEOC–14 Reserved: We have removed the Employee Parking Records system because those records are no longer collected by EEOC, but are collected by the private building management company at EEOC's headquarters building.

EEOC–15 Internal Harassment Inquiries: We have removed routine use (h) as unnecessary since disclosures could be made under the ''need to know'' exception. We propose to add a new routine use (h) to permit disclosures to the alleged harasser in the event of a disciplinary proceeding.

EEOC–16 Office of Inspector General Investigative Files: We propose a new routine use permitting disclosures during peer reviews.

EEOC–17 Defensive Litigation Files: The system is updated to reflect that internal defensive litigation files are maintained in the Office of General Counsel and external defensive litigation files are maintained in the Office of Legal Counsel.

EEOC–18 Reasonable Accommodation Records: We added notification procedures, record access procedures, contesting records procedures, and record source categories.

The proposed universal routine uses, the routine uses in the one new system of records noted above and the proposed new routine uses in two existing systems meet the compatibility criteria since the information involved is collected for the purpose of the applicable routine uses. We anticipate that any disclosure pursuant to these routine uses will not result in any unwarranted adverse effects on personal privacy.

A complete list of all EEOC systems of records is published below. The complete text of the notices follows.

For the Commission.

Jenny R. Yang,

Chair.

EEOC Systems of Records

Universal Routine Uses.

EEOC–1 Age Discrimination in Employment Act, Equal Pay Act, and Section 304 of the Government Employee Rights Act Discrimination Case Files.

EEOC–2 Attorney Referral List.

EEOC–3 Title VII, Americans with Disabilities Act, and Genetic Information Nondiscrimination Act

EEOC–4 Biographical Files.

EEOC–5 Correspondence and Communications.

EEOC–6 Freedom of Information Act and Privacy Act Records

EEOC–7 Employee Pay and Leave Records.

EEOC–8 Employee Travel and Reimbursement Records.

EEOC–9 Claims Collection Records.

EEOC–10 Grievance Records.

EEOC–11 Adverse Actions Against Nonpreference Eligibles in the Excepted Service Records

EEOC–12 Telephone Call Detail Records.

EEOC–13 Employee Identification Cards.

EEOC–14 Reserved

EEOC–15 Internal Harassment Investigation Files.

EEOC–16 Office of Inspector General Investigative Files.

EEOC–17 Defensive Litigation Files.

EEOC–18 Reasonable Accommodation Records.

EEOC–19 Revolving Fund Registrations.

EEOC–20 RESOLVE Program Records.

EEOC–21 Emergency Management Records.

EEOC–22 EEOC Personnel Security Records.

EEOC/GOVT–1 Equal Employment Opportunity in the Federal Government Complaint and Appeal Records.

Universal Routine Uses: The following routine uses of the records apply to and are incorporated by reference into each system of records published below:

a. To appropriate agencies, entities, and persons when: (1) EEOC suspects or has confirmed that there has been a breach of the system of records; (2) EEOC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the agency (including its information systems, programs, and operations), or the Federal government; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with EEOC's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

b. To another Federal agency or Federal entity when information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the agency (including its information systems, programs, and operations), or the Federal government.

EEOC–1

SYSTEM NAME:

Age Discrimination in Employment Act, Equal Pay Act, and Section 304 of the Government Employee Rights Act Discrimination Case Files.

SYSTEM LOCATION:

Field Office where the charge or complaint of discrimination was filed (see Appendix A). Records of complaints filed under section 321 of the Government Employees Rights Act of 1991 are located in the Office of Federal Operations 131 M Street NE., Washington, DC 20507, after a hearing has been requested.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons other than federal employees and applicants who file charges or complaints with EEOC alleging that an employer, employment agency or labor organization has violated the Age Discrimination in Employment Act of 1967 or the Equal Pay Act of 1963, or who file complaints under section 304 of the Government Employees Rights Act of 1991.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains the records compiled during the investigation of age and equal pay discrimination cases and during the investigation and hearing of complaints filed under section 304 of the Government Employees Rights Act of 1991. These records include:

a. Documents submitted by charging party or complainant such as charge of discrimination, personal interview statement, and correspondence.

b. Documents submitted by employer such as statement of position, correspondence, statements of witnesses, documentary evidence such as personnel files, records of earnings, employee benefit plans, seniority list, job titles and descriptions, applicant data, organizational charts, collective bargaining agreements, and petitions to revoke or modify subpoenas.

c. Records gathered and generated by EEOC in the course of its investigation and, in complaints filed under section 304 of the Government Employees Rights Act of 1991, during the hearing, such as letters of referral to state fair employment practices agencies, correspondence with state fair employment practices agencies, witness statements, investigator's notes, investigative plan, report of initial and exit interview, investigator's analyses of evidence and charge, subpoenas, decisions and letters of determination, conciliation agreements, correspondence and any additional evidence gathered during the course of the investigation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 29 U.S.C. 209, 211, 623, 626; 42 U.S.C. 2000e–16c; 44 U.S.C. 3101; 2 U.S.C. 1220.

PURPOSE:

This system is maintained for the purpose of enforcing the prohibitions against employment discrimination contained in the Age Discrimination in Employment Act, the Equal Pay Act and section 304 of the Government Employees Rights Act of 1991.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To disclose pertinent information to a federal, state, or local agency or third party as may be appropriate or necessary to perform the Commission's functions under the Age Discrimination in Employment Act, Equal Pay Act, or section 304 of the Government Employee Rights Act of 1991.

b. To disclose information contained in these records to state and local agencies administering state or local fair employment practices laws.

c. To disclose non-confidential and non-privileged information from closed ADEA/EPA case files (a file is closed when the Commission has terminated its investigation and has decided not to sue) to the employer where a lawsuit has been filed against the employer involving that information, to other employees of the same employer who have been notified by the Commission of their right under 29 U.S.C. 216 to file a lawsuit on their own behalf, and their representatives.

d. To provide information to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of a party to the charge.

e. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where the EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

f. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

g. To disclose information to officials of state or local bar associations or disciplinary boards or committees when they are investigating complaints against attorneys in connection with their representation of a party before EEOC.

h. To disclose to a Federal agency in the executive, legislative, or judicial branch of government, in response to its request for information in connection with the hiring of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, or the lawful statutory, administrative, or investigative purpose of the agency to the extent that the information is relevant and necessary to the requesting agency's decision.

i. To disclose information to other federal agencies in accordance with Memoranda of Understanding or similar agreements between EEOC and other agencies that provide for coordination, cooperation, and confidentiality of documents in EEOC's employment discrimination enforcement efforts.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders and electronically.

RETRIEVABILITY:

These records are retrievable by charging party name, employer name, and charge number.

SAFEGUARDS:

Paper records are maintained in a secured area to which only authorized personnel have access. Access to and use of these records is limited to those persons whose official duties require such access. The premises are locked when authorized personnel are not on duty. Access to electronic records is limited, through use of usernames and passwords, to those whose official duties require access.

RETENTION AND DISPOSAL:

All private sector charge files not designated for permanent retention will be retained for three years following the fiscal year in which they were closed. (For example, if a charge was closed on March 31, 2014, in FY 2014, the three-year retention period would begin on October 1, 2014, which is the first day of FY 2015.) These non-permanent files will be retained for one year in the EEOC field office where the charge of discrimination was filed. Afterwards, the non-permanent files will be transferred to the Federal Records Center (FRC). The FRC will destroy the files after the three-year retention period is met. Permanent files will be retained in the field office for three years and then transferred to FRC. FRC will transfer the files to the National Archives and Records Administration (NARA) for permanent retention when eligible.

Closed non-permanent private sector charge files that are the subject of Freedom of Information Act (FOIA) requests are retained for six years after the FOIA response is provided. The files will be transferred to FRC one year after completion of all actions taken under FOIA/Privacy Act. Alternatively, the files may be included as part of the permanent files retained by the EEOC field office.

Closed private sector charge files that are the subject of a Section 83 request are retained for six years after the Section 83 response is provided. The files will be transferred to FRC one year after completion of all actions taken under FOIA. Alternatively, the files may be included as part of the permanent files retained by the EEOC field office.

SYSTEM MANAGER(S) AND ADDRESS:

Director of the office in the field where the charge was filed (see Appendix A). Director of the Office of Field Programs, 131 M Street NE., Washington, DC 20507. Director of the Office of Federal Operations, 131 M Street NE., Washington, DC 20507 (only for complaints filed under section 321 of the Government Employees Right Act of 1991).

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

This system is exempt under 5 U.S.C. 552a(k)(2) from subsections (c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I) and (f) of the Act.

EEOC–2

SYSTEM NAME:

Attorney Referral List.

SYSTEM LOCATION:

All District Offices (see Appendix A).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Attorneys who represent plaintiffs in employment discrimination litigation.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains attorneys' names, business addresses and telephone numbers, the nature and amount of their civil rights litigation experience; their state and federal bar admissions; whether the attorneys have the capacity and desire to handle class actions; whether the attorneys charge consultation fees (and how much); whether the attorneys will waive the consultation fee; the types of fee arrangements the attorneys will accept; and whether the attorney speaks a foreign language fluently.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2000e–4(g); 44 U.S.C. 3101.

PURPOSE:

This system is maintained for the purpose of providing charging parties, upon their request, with information about local attorneys who represent plaintiffs in employment discrimination litigation.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To refer charging parties to attorneys who handle litigation of employment discrimination lawsuits.

b. To provide information to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Stored on prepared forms, on index cards and electronically.

RETRIEVABILITY:

Indexed alphabetically by names of the attorneys.

SAFEGUARDS:

Access to this system of records is restricted to EEOC personnel who have a legitimate use for the information. This system is stored in filing cabinets. Access to electronic records is limited, through use of access codes and entry logs, to those whose official duties require access.

RETENTION AND DISPOSAL:

Files are reviewed and updated annually.

SYSTEM MANAGERS AND ADDRESS:

Regional Attorney at each District Office (see Appendix A).

NOTIFICATION PROCEDURE:

Inquiries concerning this system of records should be addressed to the appropriate system manager. It is necessary to furnish the following information: (1) Full name of the individual whose records are requested; (2) mailing address to which the reply should be sent.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

The individual on whom the record is maintained.

EEOC–3

SYSTEM NAME:

Title VII, Americans with Disabilities Act, and Genetic Information Nondiscrimination Act Discrimination Case Files.

SYSTEM LOCATION:

Field Office where the charge of discrimination was filed (see Appendix A).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons, other than federal employees and applicants, who file charges alleging that an employer, employment agency, labor organization or joint labor-management apprenticeship committee has violated Title VII of the Civil Rights Act of 1964, the Americans with Disabilities Act of 1990, Title II of the Genetic Information Nondiscrimination Act of 2008 (GINA), or any combination of the three.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains records compiled during the investigation of race, color, religion, sex, national origin, disability, and genetic information discrimination cases. These records include:

a. Documents submitted by charging party, such as a charge of discrimination, a personal interview statement, medical records, and correspondence.

b. Documents submitted by employer such as position statement, correspondence, statements of witnesses, documentary evidence such as personnel files, records of earnings, EEO data, employee benefit plans, seniority lists, job titles and descriptions, applicant data, organizational charts, collective bargaining agreements, and petition to revoke or modify subpoenas.

c. Records gathered and generated by EEOC in the course of its investigation such as letters to state or local fair employment practice agencies, correspondence with state fair employment practice agencies, witness statements, investigator's notes, investigative plan, investigator's analysis of the evidence and charge, report of initial and exit interviews, copy of deferral to state, subpoenas, decisions and letters of determination, analysis of deferral agency action, conciliation agreements, correspondence, and any additional evidence gathered during the course of the investigation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 42 U.S.C. 2000e–5, –8 and –9; 42 U.S.C. 12117; 44 U.S.C. 3101, 42 U.S.C. 2000ff–10.

PURPOSE:

This system is maintained for the purpose of enforcing the prohibitions against employment discrimination contained in Title VII of the Civil Rights Act of 1964, the Americans with Disabilities Act of 1990, and Title II of the Genetic Information Nondiscrimination Act of 2008

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To disclose pertinent information to a federal, state, or local agency or third party as may be appropriate or necessary to perform the Commission's functions under Title VII of the Civil Rights Act of 1964, the Americans with Disabilities Act of 1990, or Title II of the Genetic Information Nondiscrimination Act of 2008.

b. To disclose information contained in these records to state and local agencies administering state or local fair employment practices laws.

c. To disclose non-confidential or non-privileged information contained in these records to the following persons after a notice of right to sue has been issued:

1. Aggrieved persons and their attorneys in case files involving Commissioner Charges provided that such persons have been notified of their status as aggrieved persons;

2. Persons or organizations filing on behalf of an aggrieved person provided that the aggrieved person has given written authorization to the person who filed on his or her behalf to act as the aggrieved person's agent for this purpose, and their attorneys;

3. Employers and their attorneys, provided that the charging party or aggrieved person has filed suit under Title VII, the Americans with Disabilities Act, Title II of the Genetic Information Nondiscrimination Act of 2008, or any combination of the three.

d. To provide information to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of a party to the charge.

e. To disclose pertinent information to the appropriate federal, state, or local agencies responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

f. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

g. To disclose information to officials of disciplinary boards or committees under the control of a state or local government when they are investigating complaints against attorneys in connection with their representation of a party before EEOC.

h. To disclose to a Federal agency in the executive, legislative, or judicial branch of government, in response to its request for information in connection with the hiring of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, or the lawful statutory, administrative, or investigative purpose of the agency to the extent that the information is relevant and necessary to the requesting agency's decision.

i. To disclose information to other federal agencies in accordance with Memoranda of Understanding or similar agreements between EEOC and other agencies that provide for coordination, cooperation, and confidentiality of documents in EEOC's employment discrimination enforcement efforts.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM

STORAGE:

These records are maintained in file folders and electronically.

RETRIEVABILITY:

These records are retrievable by charging party name, employer name, and charge number.

SAFEGUARDS:

Paper records are maintained in a secured area to which only authorized personnel have access. Access to and use of these records is limited to those persons whose official duties require such access. The premises are locked when authorized personnel are not on duty. Access to electronic records is limited, through use of usernames and passwords, to those whose official duties require access.

RETENTION AND DISPOSAL:

All private sector charge files not designated for permanent retention will be retained for three years following the fiscal year in which they were closed. (For example, if a charge was closed on March 31, 2014, in FY 2014, the three-year retention period would begin on October 1, 2014, which is the first day of FY 2015.) These non-permanent files will be retained for one year in the EEOC field office where the charge of discrimination was filed. Afterwards, the non-permanent files will be transferred to the Federal Records Center (FRC). The FRC will destroy the files after the three-year retention period is met. Permanent files will be retained in the field office for three years and then transferred to FRC. FRC will transfer the files to the National Archives and Records Administration (NARA) for permanent retention when eligible.

Closed non-permanent private sector charge files that are the subject of Freedom of Information Act (FOIA) requests are retained for six years after the FOIA response is provided. The files will be transferred to FRC one year after completion of all actions taken under FOIA/Privacy Act. Alternatively, the files may be included as part of the permanent files retained by the EEOC field office.

Closed private sector charge files that are the subject of a Section 83 request are retained for six years after the Section 83 response is provided. The files will be transferred to FRC one year after completion of all actions taken under FOIA/Privacy Act. Alternatively, the files may be included as part of the permanent files retained by the EEOC field office.

SYSTEM MANAGER(S) AND ADDRESS:

Director of the office in the field where the charge was filed (see Appendix A). Director of the Office of Field Programs, 131 M Street NE., Washington, DC 20507.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

This system is exempt under 5 U.S.C. 552a(k)(2) from subsections (c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I), and (f) of the Act.

EEOC–4

SYSTEM NAME:

Biographical Files.

SYSTEM LOCATION:

Office of Communications and Legislative Affairs, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former Commissioners, General Counsels and Commission officials.

CATEGORIES OF RECORDS IN THE SYSTEM:

Includes for each the name, date and place of birth, education, employment history, and other biographical information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101, 42 U.S.C. 2000e–4.

PURPOSE:

This system is maintained for the purpose of providing information about EEOC officials to members of the Congress and the public.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used

a. To answer public and congressional inquiries regarding EEOC Commissioners, General Counsels and Commission officials.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Stored electronically.

RETRIEVABILITY:

Indexed by last name of the Commissioner, General Counsel or Commission official.

SAFEGUARDS:

Files are kept in the Office of Communications and Legislative Affairs, which is locked evenings, weekends, and holidays.

RETENTION AND DISPOSAL:

Maintained permanently.

SYSTEM MANAGER AND ADDRESS:

Director, Office of Communications and Legislative Affairs, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

NOTIFICATION PROCEDURES:

Inquiries concerning this system of records should be addressed to the system manager. All inquiries should furnish the full name of the individual and the mailing address to which the reply should be mailed.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORDS PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

The individual to whom the record pertains.

EEOC–5

SYSTEM NAME:

Correspondence and Communications.

SYSTEM LOCATION:

All locations listed in appendix A and all headquarters offices, 131 M Street NE., Washington, DC 20507.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Charging parties, members of the general public, members of Congress and current and former federal employees who seek information or assistance from EEOC.

CATEGORIES OF RECORDS IN THE SYSTEM:

a. Inquiries from members of Congress, the White House and members of the general public, including current and former federal employees.

b. EEOC responses to the above inquiries.

c. Computer tracking system indicating the dates inquiries are received, to whom and when they are assigned for response and the dates they are answered.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101; 42 U.S.C. 2000e–4.

PURPOSE:

This system is maintained for the purpose of responding to inquiries from members of Congress and the public seeking information or assistance.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To provide information to a congressional office from the record of an individual in response to an inquiry from the congressional office at the request of the individual.

b. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file cabinets and electronically.

RETRIEVABILITY:

Computer entries are retrievable by name of author of a letter, by subject, by key word, by reference number, by name of person to whom assigned, and by dates assigned, due, and answered.

SAFEGUARDS:

These records are kept in a secured area to which only authorized personnel have access. Access to and use of these records is limited to those persons whose official duties require such access. The premises are locked when authorized personnel are not on duty. Access to electronic records is limited, through use of usernames and passwords, to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are maintained for three years from the date of the last communication and then destroyed. Tracking system information is maintained in the computer for four years.

SYSTEM MANAGER AND ADDRESS:

Director of each Commission office in the field and Headquarters office. (See Appendix A.)

NOTIFICATION PROCEDURE:

Inquiries concerning this system of records should be addressed to the system manager. All inquiries should furnish the full name of the individual and the mailing address to which the reply should be mailed.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORDS PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Members of Congress, their staffs, the White House, charging parties, members of the general public, current and former federal employees.

EEOC–6

SYSTEM NAME:

Freedom of Information Act and Privacy Act Records.

SYSTEM LOCATION:

Field Office where Freedom of Information Act or Privacy Act request was submitted (see Appendix A); Office of Legal Counsel, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who submit Freedom of Information Act (FOIA) and Privacy Act requests and administrative appeals to the Equal Employment Opportunity Commission (EEOC); and persons whose requests and/or records have been submitted to EEOC by other agencies.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system consists of records created or compiled in response to FOIA or Privacy Act requests and administrative appeals, including the original requests and administrative appeals, responses to such requests and administrative appeals, all related memoranda, correspondence, notes and other related or supporting documentation, and, in some instances, copies of requested records and records under administrative appeal.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 44 U.S.C. 3101; 5 U.S.C 552; and 5 U.S.C. 552a.

PURPOSE(S):

This system is maintained for the purpose of processing requests and administrative appeals under the FOIA, and access and amendment requests and administrative appeals under the Privacy Act; for the purpose of participating in litigation regarding agency action on such requests and appeals; and for the purpose of assisting EEOC in carrying out any other responsibilities under the FOIA and the Privacy Act.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To provide information to a federal, state, local, or foreign agency or entity for the purpose of consulting with that agency or entity to enable the EEOC to make a determination as to the propriety of access to, or correction of, information, or for the purpose of verifying the identity of an individual or the accuracy of information submitted by an individual who has requested access to or amendment of information.

b. To provide information to a federal agency or entity that furnished the record or information for the purpose of permitting that agency or entity to make a decision as to access to, or correction of, the record or information.

c. To provide information to a submitter or subject of a record or information in order to obtain assistance to EEOC in making a determination as to access or amendment.

d. To provide information to the National Archives and Records Administration, Office of Government Information Services (OGIS), to the extent necessary to fulfill its responsibilities under 5 U.S.C. 552(h) to review federal agency policies, procedures, and compliance with the FOIA, and to facilitate OGIS's offering of mediation services to resolve disputes between persons making FOIA requests and federal agencies.

e. To provide information to contractors, experts, consultants, students, and others performing or working on a contract, service, or other assignment for the federal government, when necessary to accomplish an agency function related to this system of records.

f. To provide information to a congressional office from the record of the individual in response to an inquiry from that congressional office made at the request of that individual.

g. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

h. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, when the EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

i. To disclose in response to a request for discovery or for appearance of a witness, information that is relevant to the subject matter involved in the pending judicial or administrative proceeding.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records in this system are stored on paper and/or in electronic form.

RETRIEVABILITY:

Records are retrieved by the name of the requester or appellant; the number assigned to the request or appeal; and, in some instances, the name of the attorney representing the requester or appellant or the name of the EEOC personnel assigned to handle such requests and appeals.

SAFEGUARDS:

Information in this system is safeguarded in accordance with applicable laws, rules, and policies, including EEOC's automated systems security and access policies. Records and electronic equipment are maintained in buildings with restricted access. The required use of password protection identification features and other system protection methods also restrict access. Access is limited to those EEOC officers and employees who have an official need for access to perform their duties.

RETENTION AND DISPOSAL:

Records are retained and disposed of in accordance with the National Archives and Records Administration's General Records Schedule 14.

SYSTEM MANAGER(S) AND ADDRESS:

Director of the field office where the Freedom of Information Act or Privacy Act request was submitted (see Appendix A) or the Legal Counsel, 131 M Street NE., Washington, DC 20507.

NOTIFICATION PROCEDURE:

Inquiries concerning this system of records should be addressed to the system manager. All inquiries should furnish the full name of the individual and the mailing address or email address to which the reply should be mailed.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORDS PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Individuals who submit initial requests and administrative appeals pursuant to the FOIA and the Privacy Act; the agency records searched in the process of responding to such requests and appeals; EEOC personnel assigned to handle such requests and appeals; and other agencies or entities that have referred to EEOC requests concerning EEOC records.

EEOC–7

SYSTEM NAME:

Employee Pay and Leave Records.

SYSTEM LOCATION:

All locations listed in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former employees of EEOC.

CATEGORIES OF RECORDS IN THE SYSTEM:

Time and attendance records; leave records (includes employee name, branch or office, pay period ending, leave and overtime used during the pay period); requests for leave (earned or advance) or leave of absence; requests for an authorization of overtime; annual attendance record (indicates name, social security number, service computation date, hours and dates worked and taken as leave, pay plan, salary and occupation code, grade, leave earned and used); thrift savings plan participation, deductions for Medicare, FICA, taxes, life, health, and long term care insurance, union contributions, charitable contributions, savings allotments and bond issuance and bond balance.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 44 U.S.C. 3101.

PURPOSE:

The records in this system are maintained in accordance with the requirements set forth by statutes, regulations and guidance from the Office of Personnel Management, the General Services Administration, and the Thrift Savings Board. They are maintained for the purpose of providing salaries and other benefits to EEOC employees.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To provide information to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

b. To provide a copy of an employee's Department of the Treasury Form W–2, Wage and Tax Statement, to the state, city or other local jurisdiction which is authorized to tax the employee's compensation. The record will be provided in accordance with a withholding agreement between the state, city, or other jurisdiction and the Department of Treasury pursuant to 5 U.S.C. 5516, 5517 or 5520, or in response to a written request from an appropriate official of the taxing jurisdiction. The request must include a copy of the applicable statute or ordinance authorizing the taxation of compensation and should indicate whether the authority of the jurisdiction to tax the employee is based on place of residence, place of employment, or both.

c. To disclose copies of executed city tax withholding certificates to a city pursuant to a withholding agreement between the city and the Department of the Treasury (5 U.S.C. 5520) in response to a written request from an appropriate city official.

d. To disclose the social security number only, in the absence of a withholding agreement, to a taxing jurisdiction that has furnished this agency with evidence of its independent authority to compel disclosure of the social security number, in accordance with section 7 of the Privacy Act, 5 U.S.C. 552a note.

e. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

f. To disclose to an agency in the executive, legislative, or judicial branch or the District of Columbia's Government information in connection with the hiring of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, the letting of a contract, the issuance of a license, grant, or other benefits by the requesting agency, or the lawful statutory, administrative, or investigative purpose of the agency to the extent that the information is relevant and necessary to the requesting agency's decision.

g. To disclose to an authorized appeal grievance examiner, formal complaints examiner, administrative judge, equal employment opportunity investigator, arbitrator, or other duly authorized official engaged in investigation or settlement of a grievance, complaint, or appeal filed by an employee.

h. To disclose to the Office of Personnel Management in accordance with the agency's responsibility for evaluation and oversight of Federal personnel management.

i. To disclose to officers and employees of the Department of the Interior in connection with

administrative services provided to this agency under agreement with DOI.

j. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

k. To disclose information to the Office of Child Support Enforcement, Administration for Children and Families, Department of Health and Human Services Federal Parent Locator system (FPLS) and Federal Tax Offset system for use in locating individuals and identifying their income sources to establish paternity, establish and modify orders of support and for enforcement action.

l. To disclose information to the Office of Child Support Enforcement for release to the Social Security Administration for verifying social security numbers in connection with the operation of the FPLS by the Office of Child Support Enforcement.

m. To disclose information to the Office of Child Support Enforcement for release to the Department of Treasury for purposes of administering the Earned Income Tax Credit Program (Section 32, Internal Revenue Code of 1986) and verifying a claim with respect to employment in a tax return.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures may be made from this system to consumer reporting agencies as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Stored electronically and in file folders.

RETRIEVABILITY:

Indexed by an assigned employee code.

SAFEGUARDS:

Access to these records is limited to employees whose official duties require such access.

RETENTION AND DISPOSAL:

The records are destroyed after three years.

SYSTEM MANAGER AND ADDRESS:

Director of each Commission Office (See Appendix A).

NOTIFICATION PROCEDURE:

Inquiries concerning this system of records should be addressed to the system manager. It is necessary to furnish the following information: (1) Name and (2) mailing address to which the response is to be sent.

RECORD SOURCE CATEGORIES:

Official personnel folder, data submitted by employees and data submitted by the offices where the individuals are or were employed.

EEOC–8

SYSTEM NAME:

Employee Travel and Reimbursement Records.

SYSTEM LOCATION:

All locations listed in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Includes travel orders, travel vouchers, records of travel advances, amounts owed the agency by employees for travel and other purposes, amounts payable to the employee for travel and other purposes, payments made to the employees for travel and other reimbursable transactions, and a record of the difference between the cost of official travel as estimated in the travel order and the amount actually expended by the employee.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

31 U.S.C. 3512, 44 U.S.C. 3101.

PURPOSE:

These records are maintained in accordance with the General Service Administration's regulations for the purpose of allowing EEOC employees to travel for official business and reimbursing travel expenses.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To disclose pertinent information to the appropriate Federal, State, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

b. To disclose to an agency in the executive, legislative, or judicial branch or the District of Columbia's Government, information in connection with the hiring of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, the letting of a contract, the issuance of a license, grant, or other benefits by the requesting agency, or the lawful statutory, administrative, or investigative purpose of the agency to the extent that the information is relevant and necessary to the requesting agency's decision.

c. To disclose to an authorized appeal grievance examiner, formal complaints examiner, administrative judge, equal employment opportunity investigator, arbitrator, or other duly authorized official engaged in investigation or settlement of a grievance, complaint, or appeal filed by an employee.

d. To disclose to the Office of Personnel Management in accordance with the agency's responsibility for evaluation and oversight of Federal personnel management.

e. To disclose to officers and employees of the Department of the Interior in connection with administrative services provided to this agency under agreement with DOI.

f. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

g. To provide information to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures may be made from this system to consumer reporting agencies as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Stored on prepared forms and electronically.

RETRIEVABILITY:

Indexed alphabetically by name and/or chronologically by event and name. Access to and use of these records is limited to those persons whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure. Files are stored electronically and in standard cabinets, safes, and secured rooms. Access to electronic records is limited,

through use of user names and passwords, to those whose official duties require access.

RETENTION AND DISPOSAL:

These records are destroyed in accordance with GSA General Records Schedule 2.

SYSTEM MANAGER AND ADDRESS:

Director, Finance and Systems Services Division, Office of the Chief Financial Officer, EEOC, 131 M Street NE., Washington, DC 20507.

NOTIFICATION PROCEDURE:

Employees of the Commission wishing to know whether information about them is maintained in this system of records should address inquiries to the Director of the Office where employed (see Appendix A). The individual should provide his or her full name, date of birth, and mailing address.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Bills, receipts, and claims presented by employees and original data generated by the Commission.

EEOC–9

SYSTEM NAME:

Claims Collection Records.

SYSTEM LOCATION:

These records are located in the Finance and Systems Services Division, Office of Chief Financial Officer, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any individual who is indebted to the United States as a result of his or her interaction or financial activities with the Commission or another federal agency including, but not limited to, any current or former Commission employee.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains:

Debtor Files. These files contain information and evidence on the identity and location of the individual who is subject to a claim, the origin and amount of the indebtedness, decisions and determinations regarding a claim, actions taken to collect a claim, and the results of those actions. Depending on the status of a claim, a case file may include such records as documents evidencing indebtedness, written demands for payment, required notices, financial statements, medical disability statements, agency investigative reports, credit reports, written agreements for payment, intra-agency and inter-agency memoranda of consultation and opinion on the collection action, documentation resulting from a hearing, requests for waiver, requests for reconsideration, written determinations and decisions, certifications of indebtedness by this or another agency, counterclaims, judgments, and documents evidencing payment or compromise of the debt.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 5514, 5522, 5584, 5705, 5724(f); 15 U.S.C. 1692; 26 U.S.C. 6331; 31 U.S.C. 3701, 3702, 3711, 3716, 3717, 3718, 3719; 44 U.S.C. 3101; 4 CFR parts 91–93, 101–105.

PURPOSE:

This system is maintained for the purpose of collecting debts owed the United States by individuals as a result of their interaction with the Commission or another federal agency. The debts are collected in accordance with the Commission's regulatory debt collection procedures, which include salary offset, administrative offset, Federal income tax refund offset, and wage garnishment.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To disclose information to appropriate officials and employees of the Department of Justice for the purposes of litigation and forced collection on administratively uncollected debts.

b. To disclose information to appropriate officials of the Department of the Treasury and the Office of Management and Budget to provide reports on debt collection activities.

c. To disclose information to another federal agency for the purpose of collecting a debt owed to the Commission by an individual through EEOC's debt collection procedures undertaken by the other agency upon proper certification or evidence of the debt owed from the Commission.

d. To disclose information to another federal agency for the purpose of collecting a debt owed to that agency by an individual through EEOC's debt collection procedures undertaken by the Commission upon proper certification or evidence of the debt owed from the other agency.

e. To disclose a debtor's name and identification number to the Secretary of the Treasury or his or her designee for the purpose of obtaining the debtor's mailing address from the IRS.

f. To provide information to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

g. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

h. To disclose to an agency in the executive, legislative, or judicial branch or the District of Columbia's government in response to its request, or at the initiation of the agency maintaining the records, information in connection with the hiring of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, the letting of a contract, the issuance of a license, grant, or other benefit by the requesting agency, or the lawful statutory, administrative, or investigative purpose of the agency to the extent that the information is relevant and necessary to the requesting agency's decision.

i. To disclose to officers and employees of the Department of the Interior Business Center, in connection with administrative services provided to this agency under agreement with DOI.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders and electronically.

RETRIEVABILITY:

These records are indexed by the name of the individual.

SAFEGUARDS:

Records are maintained and stored in file cabinets in a secured area and electronically to which only authorized personnel have access. Access to and use of these records is limited to those persons whose official duties require such access.

RETENTION AND DISPOSAL:

Individual case files are usually retained for two years after the claim is collected. Case records on individuals whose delinquent debts are reported to consumer reporting agencies are

retained indefinitely. Other case files may be maintained for a period up to ten years. IRS Mailing Address Index on any individual is not maintained beyond six years.

SYSTEM MANAGER AND ADDRESS:

Director, Finance and Systems Services Division, Office of Chief Financial Officer Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

NOTIFICATION PROCEDURES:

Under the Debt Collection Act, individuals are notified if claims collection records are maintained on them in accordance with statutory procedures for debt collection. Individuals may also contact the System Manager in order to obtain notification of claims collection records on themselves.

Individuals must provide their full names under which records may be maintained, and a mailing address to which a reply should be sent.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information in this system of records is provided by or from:

a. The individual on whom the record is maintained;

b. Other Federal agencies;

c. Personnel, payroll, travel records, contract records, or other records;

d. Administrative hearings;

e. Court records.

EEOC–10

SYSTEM NAME:

Grievance Records.

SYSTEM LOCATION:

These records are located in the Office of the Chief Human Capital Officer, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507, and in other headquarter offices and offices in the field where the grievances were filed (see Appendix A).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current or former EEOC employees who have submitted grievances to the EEOC, or pursuant to a negotiated procedure.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains all documents related to the grievance, including statements of witnesses, reports of interviews and hearings, examiners' findings and recommendations, a copy of the original and final decision, and related correspondence and exhibits. This system includes files and records of internal grievance and arbitration systems that EEOC has or may establish through negotiations with recognized labor organizations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 44 U.S.C. 3101; 5 U.S.C. 7121.

PURPOSE:

These records result from EEOC employees' grievances, filed under the Commission's administrative grievance procedures or the formal grievance procedures contained in section 7121 of the Civil Service Reform Act.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To disclose information to any source from which additional information is requested in the course of processing a grievance, to the extent necessary to identify the individual, inform the source of the purpose(s) of the request, and identify the type of information requested.

b. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

c. To disclose to an agency in the executive, legislative, or judicial branch or the District of Columbia's government, information in connection with the hiring of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, the letting of a contract, the issuance of a license, grant, or other benefits by the requesting agency, or the lawful statutory, administrative, or investigative purpose of the agency to the extent that the information is relevant and necessary to the requesting agency's decision.

d. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

e. To provide information to a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

f. To disclose to an authorized appeal grievance examiner, formal complaints examiner, administrative judge, equal employment opportunity investigator, arbitrator, or other duly authorized official engaged in investigation or settlement of a grievance, complaint, or appeal filed by an employee.

g. To disclose in response to a request for discovery or for appearance of a witness, information that is relevant to the subject matter involved in a pending judicial or administrative proceeding.

h. To provide information to officials of labor organizations recognized under the Civil Service Reform Act when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting work conditions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders and electronically.

RETRIEVABILITY:

These records are retrieved by grievance numbers and the names of the individuals on whom they are maintained.

SAFEGUARDS:

These records are maintained in lockable metal filing cabinets to which only authorized personnel have access. Access to electronic records is limited, through use of usernames and passwords, to those whose official duties require access.

RETENTION AND DISPOSAL:

These records are shredded or burned 3 years after closing the case.

SYSTEM MANAGER AND ADDRESS:

If the grievance is pending at or was never raised beyond the Step 1 or Step 2 level, the system manager is the office director, administrative officer, or district resource manager. (See Appendix A.) For grievances that were raised beyond Step 2, the system manager is the Chief Human Capital Officer, EEOC, 131 M Street NE., Washington, DC 20507.

NOTIFICATION PROCEDURES:

It is required that individuals submitting grievances be provided a copy of the record under the grievance process. They may, however, contact the agency personnel or designated office where the action was processed regarding the existence of such records

regarding them. They must furnish the following information for their records to be located and identified: (a) Name; (b) approximate date of closing of the case and kind of action taken; (c) organizational component involved.

RECORDS ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information in this system of records is provided:

a. By the individual on whom the record is maintained;

b. By testimony of witnesses;

c. By agency officials;

d. From related correspondence from organizations or persons.

EEOC–11

SYSTEM NAME:

Records of Adverse Actions Against Nonpreference Eligibles in the Excepted Service.

SYSTEM LOCATION:

These records are located in Office of Chief Human Capital Officer, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507 or in the headquarters and offices in the field in which the actions have been taken.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current or former nonpreference-eligible, excepted service Equal Employment Opportunity Commission (EEOC) employees against whom an adverse action has been proposed or taken and who have not completed two years of current and continuous service in the same or similar positions. [This system covers only those adverse action files not covered by OPM/GOVT–3.]

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains records and documents on the processing of adverse actions for employees who are nonpreference eligible in the excepted service and who do not have two years of continuous service in their positions. The records include copies of the notice of proposed action, materials relied on by the agency to support the reasons in the notice, replies by the employee, statements of witnesses, reports, and agency decisions.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101.

PURPOSE:

These records result from the proposal, processing, and documentation of adverse actions taken by the Commission against nonpreference-eligible, excepted service EEOC employees.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in records may be used:

a. To provide information to officials of labor organizations recognized under 5 U.S.C. Chapter 71 when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting work conditions.

b. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, when the EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

c. To disclose information to any source from which additional information is requested for processing any of the covered actions or in regard to any appeal or administrative review procedure, to the extent necessary to identify the individual, inform the source of the purpose(s) of the request, and identify the type of information requested.

d. To disclose information to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, or the classifying of jobs, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

e. To provide information to a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

f. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

g. To disclose, in response to a request for discovery or for appearance of a witness, information that is relevant to the subject matter involved in a pending judicial, or administrative proceeding.

h. To disclose to an authorized appeal grievance examiner, formal complaints examiner, administrative judge, equal employment opportunity investigator, arbitrator, or other duly authorized official engaged in the investigation or settlement of a grievance, complaint, or appeal filed by an employee.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, SAFEGUARDING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders and electronically.

RETRIEVABILITY:

These records are retrieved by the names of the individuals on whom they are maintained.

SAFEGUARDS:

These records are maintained in locked metal filing cabinets to which only authorized personnel have access. Access to electronic records is limited, through use of usernames and passwords, to those whose official duties require access.

RETENTION AND DISPOSAL:

Records documenting an adverse action are disposed of 4 years after the closing of the case.

SYSTEM MANAGER AND ADDRESS:

Chief Human Capital Officer, and Directors of offices in the field (see Appendix A).

NOTIFICATION PROCEDURES:

Individuals receiving notice of a proposed action are provided access to all documents supporting the notice. They may also contact the personnel office where the action was processed regarding the existence of such records on them. They must furnish the following information for their records to be located and identified:

a. Name

b. Approximate date of closing of case and kind of action taken

c. Organizational component involved.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information in this system of records is provided:

a. By the individual on whom the record is maintained

b. By witnesses

c. By agency officials.

EEOC–12

SYSTEM NAME:

Telephone Call Detail Records.

SYSTEM LOCATION:

Telecommunications Manager, Customer Services Management

Division, Office of Information Technology, EEOC, 131 MM Street NE., Washington DC 20507, and each office in the field listed in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals (generally EEOC employees) who made telephone calls from EEOC telephones, individuals who received telephone calls from, or charged to, EEOC telephones., and individuals who are assigned U.S. government phone cards by EEOC.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records relating to the use of EEOC telephones and government phone cards to make calls; records indicating the assignment of telephone numbers to employees; records relating to the location of telephones.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101.

PURPOSE:

These records are maintained for the purpose of keeping an account of telephone calls made from EEOC telephones and ensuring that phone calls and card charges are made for official business only.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information from these records may be used:

a. To provide information to a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

b. To disclose to representatives of the General Services Administration or the National Archives and Records Administration who are conducting records management inspections under the authority of 44 U.S.C. 2904 and 2906.

c. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

d. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

e. To disclose to an agency in the executive, legislative, or judicial branch or the District of Columbia's government in response to its request, or at the initiation of the EEOC, information in connection with the hiring of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, the letting of a contract, the issuance of a license, grant or other benefits by the requesting agency, or the lawful statutory, administrative, or investigative purpose of the agency to the extent that the information is relevant and necessary to the requesting agency's decision.

f. To disclose to a telecommunications company providing telecommunications support to permit servicing the account.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders and electronically.

RETRIEVABILITY:

Records are retrieved by employee name or identification number and by name of recipient of telephone call or telephone number.

SAFEGUARDS:

Records are maintained and stored in file cabinets in a secured area to which only authorized personnel have access. Access to electronic records is limited, through use of usernames and passwords, to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are disposed of as provided in the National Archives and Records Administration's General Records Schedule 12.

SYSTEM MANAGER AND ADDRESS:

Telecommunications Manager, Customer Services Management Division, Office of Information Technology, EEOC, 131M Street NE., Washington DC, 20507 and the Directors of the field offices listed in Appendix A.

NOTIFICATION PROCEDURES:

Inquiries concerning this system of records should be addressed to the system manager. It is necessary to provide the following information: (1) Name; (2) telephone number (office number if Commission employee); (3) mailing address to which response is to be sent.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Telephone assignment records; call detail listings; results of administrative inquiries relating to assignment of responsibilities for placement of specific local and long distance calls. on government phone card bills

EEOC–13

SYSTEM NAME:

Employee Identification Cards.

SYSTEM LOCATION:

Operations Services Division, Office of the Chief Human Capital Officer, EEOC, 131 M Street NE., Washington DC 20507, and each of the field offices in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current EEOC employees, and other individuals who require regular, ongoing access to EEOC facilities or information technology systems including, but not limited to, federal employees, contractors, interns, volunteers, and individuals formerly in any of these positions. This system does not apply to occasional or short-term visitors.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records maintained on individuals issued identification cards, including Personal Identification Verification (PIV) cards, by EEOC include the following information: Full name; signature; social security number; date of birth; photograph; fingerprints; hair color; eye color; height; weight; office of assignment; telephone number; copy of background investigation form; card issue and expiration dates; personal identification number; results of background investigation; PIV request form; PIV registrar approval signature; PIV card serial number; and a list of all persons who possess current identification cards. In addition, for office locations permitting access by proximity cards, numbered proximity cards and a list of all persons with their assigned proximity card numbers, all doors controlled by the proximity cards, and all persons permitted access to each door.

AUTHORITY FOR MAINTENANCE OF SYSTEM:

44 U.S.C. 3101; 41 CFR 101–20.3. 5 U.S.C. 301; Federal Information Security Act (Pub. L. 104–106, 5113); Electronic Government Act (Pub. L. 104–347, 203); Homeland Security Presidential Directive (HSPD) 12, Policy for Common Identification Standard for Federal Employees and Contractors, August 27, 2004; and Office of Personnel Management Memorandum,

Final Credentialing Standards for Issuing Personal Identity Verification Cards under HSPD–12, July 31, 2008.

PURPOSE:

These records are maintained for the purpose of ensuring that EEOC offices and information systems are secure and that only authorized individuals have access to those offices and systems.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information from these records may be used:

a. To provide information to a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

b. To disclose to other government agencies and to the public whether an individual is a current employee of the EEOC.

c. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

d. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

e. To disclose information to agency contractors who have been engaged to assist the agency in the performance of a contract or other activity related to this system of records and who need to have access to the records in order to perform their activity.

f. To notify another federal agency when, or verify whether, a PIV card is no longer valid.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in paper files and in electronic media.

RETRIEVABILITY:

Records are retrieved by name, social security number, other ID number, PIV card serial number, photograph, or fingerprint.

SAFEGUARDS:

Records are maintained and stored in file cabinets in a secured area to which only authorized personnel have access. Access to electronic records is limited, through use of usernames and passwords, to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are destroyed not later than five years after the separation or transfer of the employee. In accordance with HSPD–12, PIV cards are deactivated within 18 hours of cardholder separation, loss of card, or expiration. The information on PIV cards is maintained in accordance with General Records Schedule 11, Item 4. PIV cards are destroyed by cross-cut shredding no later than 90 days after deactivation.

SYSTEM MANAGER AND ADDRESS:

Director, Operations Services Division, Office of the Chief Human Capital Officer, EEOC, 131 M Street NE., Washington DC 20507, and the Directors of the field offices listed in Appendix A.

NOTIFICATION PROCEDURES:

Inquiries concerning this system of records should be addressed to the system manager. It is necessary to provide the following information: (1) Name; (2) date of birth; and (3) mailing address to which the response is to be sent.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information contained in this system is obtained from the employee or contractor; other federal agencies; contract employer; or former employer.

EEOC–14

Reserved

EEOC–15

SYSTEM NAME:

Internal Harassment Inquiries.

SYSTEM LOCATION:

Office of the Chief Human Capital Officer, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current or former EEOC employees, contractors, applicants, interns, and volunteers who have submitted complaints or reports of harassment under EEOC Order 560.005, Prevention and Elimination of Harassment in the Workplace, and current and former EEOC employees, contractors, applicants, interns, and volunteers who have been accused of harassment under that Order.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains all documents related to a complaint or report of harassment, including statements of witnesses, reports of interviews, investigator's and Coordinator's findings and recommendations, final decisions and corrective action taken, and related correspondence and exhibits.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

29 U.S.C. 633a; 29 U.S.C. 791; 42 U.S.C. 2000e–16; 44 U.S.C. 3101; Exec. Order No. 11478, 34 FR 12985; Exec. Order No. 13087, 63 FR 30097.

PURPOSE:

These records are maintained for the purpose of conducting internal investigations into allegations of harassment brought by current or former EEOC employees, contractors, applicants, interns, and volunteers and taking appropriate action in accordance with EEOC Order 560.005.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To disclose information as necessary to any source from which additional information is requested in the course of processing a complaint or report of harassment made pursuant to EEOC Order 560.005.

b. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, when the EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

c. To disclose information to another federal agency, to a court, or to a party in ligation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

d. To provide information to a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

e. To disclose to an authorized appeal grievance examiner, formal complaints examiner, administrative judge, equal employment opportunity investigator, arbitrator, or other duly authorized official engaged in investigation or settlement of a grievance, complaint, or appeal filed by an employee.

f. To disclose to the individual who filed the complaint or report of harassment and to the alleged harasser

the outcome of any inquiry that may have been conducted and of disciplinary and corrective steps taken.

g. To provide to officials of labor organizations recognized under the Civil Service Reform Act information to which they are statutorily entitled when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting work conditions.

h. To provide to the alleged harasser information in the event of a disciplinary hearing.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders and electronically.

RETRIEVABILITY:

These records are cross-indexed by the name of the individual who files a complaint or report of harassment, the name of the alleged victim of harassment, if any, and the name of the alleged harasser. The records may be retrieved by any of the above three indexes.

SAFEGUARDS:

The records are maintained in locked metal filing cabinets to which only authorized personnel have access. Access to electronic records is limited, through use of logins and passwords, to those whose official duties require access.

RETENTION AND DISPOSAL:

These records are maintained for one year after the complaint or report of harassment is closed and then transferred to the Federal Records Center where they are destroyed after three years.

SYSTEM MANAGER(S) AND ADDRESS:

Harassment Coordinator, Office of Chief Human Capital Officer, EEOC, 131 M Street NE., Washington, DC 20507.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

This system is exempt under 5 U.S.C. 552a(k)(2) from subsections (c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I) and (f) of the Act.

EEOC–16

SYSTEM NAME:

Office of Inspector General Investigative Files.

SYSTEM LOCATION:

Office of Inspector General (OIG), Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who are subjects of investigations by the Office of Inspector General relating to the programs and operations of the Equal Employment Opportunity Commission. Subject individuals include, but are not limited to, current and former employees; current and former agents or employees of contractors and subcontractors in their personal capacity, where applicable; and other individuals whose actions affect the EEOC, its programs or operations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence relating to the investigation; internal staff memoranda; copies of subpoenas issued during the investigation, affidavits, statements from witnesses, transcripts of testimony taken during the investigation, and accompanying exhibits; documents, notes, investigative notes, staff working papers, draft materials, and other documents and records relating to the investigation; opening reports, progress reports, and closing reports; video and audio recordings; and other investigatory information or data relating to the alleged or suspected criminal, civil, or administrative violations or similar wrongdoing by subject individuals.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Inspector General Act of 1978, as amended, 5 U.S.C. App. 3.

PURPOSES:

Pursuant to the Inspector General Act of 1978, as amended, this system of records is maintained for the purpose of: (1) Documenting the conduct and outcome of investigations by the OIG and other investigative agencies regarding EEOC programs and operations; (2) reporting the results of investigations to other Federal agencies, other public authorities or professional organizations which have the authority to bring criminal prosecutions, or civil or administrative actions, or to impose other disciplinary sanctions; (3) maintaining a record of the activities which were the subject of investigations; (4) reporting investigative findings to other components of EEOC for their use in operating and evaluating their programs or operations, and in the imposition of civil or administrative sanctions; (5) coordinating relationships with other Federal agencies, state and local governmental agencies and nongovernmental entities in matters relating to the statutory responsibilities of the OIG; and (6) acting as a repository and source for information necessary to fulfill the reporting requirements of the Inspector General Act, 5 U.S.C. App. 3.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

a. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation or order, where the EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

b. To disclose information to any source, private or governmental, to the extent necessary to secure from such source information relevant to and in furtherance of a legitimate OIG investigation, audit, evaluation, or other inquiry.

c. To disclose information to agencies, offices or establishments of the executive, legislative, or judicial branches of the Federal or state governments:

(1) Where such agency, office, or establishment has an interest in an individual for employment purposes, including a security clearance or determination as to access to classified information, and needs to evaluate the individual's qualifications, suitability, or loyalty to the United States Government, or access to classified information or restricted areas, or

(2) Where such agency, office, or establishment conducts an investigation of the individual for purposes of granting a security clearance, or for making a determination of qualifications, suitability or loyalty to the United States Government, or access to classified information or restricted areas, or

(3) Where the records or information in those records is relevant and necessary to a decision with regard to the hiring or retention of an employee or disciplinary or other administrative action concerning an employee.

d. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

e. To disclose information to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the written request of that individual.

f. To private contractors who have been retained by OIG to perform any functions or analyses that facilitate or are relevant to an OIG investigation, audit, inspection, or inquiry.

g. To disclose information to authorized officials of the Council of Inspectors General for Integrity and Efficiency (CIGIE), the Department of Justice, and the Federal Bureau of Investigation for the purpose of conducting qualitative assessment reviews of the Office of Inspector General's investigative operations.

h. To disclose information to authorized officials of the CIGIE for their preparation of reports to the President and Congress on the activities of the Inspectors General.

i. To disclose to an agency, organization or individual for the purpose of performing audit or oversight operations as authorized by law, including peer reviews, but only such information as is necessary and relevant to such audit or oversight operation.''

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information in this system is stored manually in file folders and electronically.

RETRIEVABILITY:

The records are retrieved by the name of the subject of the investigation or by a unique control number assigned to each investigation.

SAFEGUARDS:

Information is stored in locked file cabinets in a secured space. Access to electronic records is limited through the use of logins and passwords to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are held for five (5) years and then retired to the Federal Records Center.

SYSTEM MANAGER AND ADDRESS:

Inspector General, Equal Employment Opportunity Commission, P.O. Box 18858, Washington, DC 20036–8858.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Specific: Pursuant to 5 U.S.C. 552a(k)(2) the Office of Inspector General Investigative Files are exempt from subsections (c)(3), (d)(1), (d)(2) and (e)(1) of the Privacy Act.

General: Pursuant to 5 U.S.C. 552a(j)(2), investigatory materials compiled for criminal law enforcement in the Office of Inspector General Investigative Files are exempt from subsections (c)(3), (d)(1), (d)(2), (e)(1), (e)(2), and (e)(3) of the Privacy Act.

EEOC–17

SYSTEM NAME:

Defensive Litigation Files.

SYSTEM LOCATION:

External Defensive Litigation Files are located in the Office of Legal Counsel, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507. Internal Defensive Litigation Files are located in the Office of General Counsel, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have filed civil or administrative litigation against EEOC and individuals who have given sworn testimony, affidavits, or declarations under penalty of perjury in such actions. External cases are brought by members of the public; internal cases are brought by applicants, current, and former EEOC employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains all documents related to external and internal litigation brought against the Commission. These records include:

a. Documents submitted or filed by plaintiffs, grievants, and EEO complainants to prosecute civil or administrative litigation against the EEOC, such as complaints, grievances, unfair labor practice claims, motions, and briefs.

b. Documents submitted by the EEOC to defend the action against it such as an answer to a civil complaint or a motion to dismiss or for summary judgment, and a reply to an administrative EEO complaint, grievance, or unfair labor practice.

c. Administrative determinations at issue in the litigation such as final agency EEO decisions, final grievance decisions, final decisions on personnel actions, final agency administrative dispositions of tort claims, and agency determinations under the Freedom of Information Act.

d. Discovery and investigatory materials such as witness statements, affidavits, declarations under penalty of perjury, correspondence, records, exhibits, and other documentary evidence.

e. Litigation materials, such as attorney work product, attorney notes, hearing transcripts, legal memoranda, and related correspondence and exhibits.

f. Final judgments, orders, decisions, decrees, and settlement agreements.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101.

PURPOSE:

These records are maintained for the purpose of defending EEOC in litigation brought against it by current and former employees (internal files), charging parties, respondents and members of the public (external files).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To disclose pertinent information as may be appropriate or necessary for the Commission to defend itself in a civil action or administrative proceeding, or to seek enforcement of a settlement, order, or final decision involving the same or a similar matter.

b. To provide information to a congressional office in response to an inquiry from the congressional office made at the request of a party to the administrative or civil proceeding to which the record pertains.

c. To disclose pertinent information to an appropriate federal court, agency, or administrative body responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where the EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation, or in order to seek enforcement or clarification of an order or decision for or against the EEOC to which the record pertains.

d. To disclose information to another federal agency or to a court when the government is a party to the judicial or administrative proceeding.

e. To disclose, in response to an order, information that is relevant to a pending judicial or administrative proceeding.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

External defensive litigation files are maintained in a locked filing system in the Office of Legal Counsel. Internal defensive litigation files are maintained in a locked filing system in the Office of General Counsel. Information identifying existing external and internal defensive litigation files is maintained electronically.

RETRIEVABILITY:

External Defensive Litigation records are cross-indexed by name of the plaintiff, and Office of Legal Counsel reference number. Internal Defensive Litigation records are maintained by

name of plaintiff, complainant, grievant, or aggrieved individual, and by Office of General Counsel reference number. The records may be retrieved by either index.

SAFEGUARDS:

External Defensive Litigation paper records maintained at EEOC headquarters are kept in locked cabinets in the Office of Legal Counsel. Internal Defensive Litigation paper records maintained at EEOC headquarters are kept in locked cabinets in the Office of General Counsel. Access to and use of these records is limited to those persons whose official duties require such access. The premises are locked evenings, weekends, and holidays. Paper records which have been retired are maintained at the Federal Records Center. Access to electronic External and Internal Defensive Litigation records is limited through use of passwords to those whose official duties require access, input, and retrieval of information.

RETENTION AND DISPOSAL:

Two years after the date of closure of the underlying civil or administrative action (*e.g.,* final order, decision on appeal), records pertaining to that action are retired to the Federal Records Center. Thereafter, non-permanent files are destroyed six years after the date of closure of the underlying action.

SYSTEM MANAGER(S) AND ADDRESS:

The System Manager for External Defensive Litigation files is the Assistant Legal Counsel, Advice & Litigation Division, Office of Legal Counsel, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507. The System Manager for Internal Defensive Litigation files is the Assistant General Counsel for Internal Litigation Services, Office of General Counsel, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

NOTIFICATION PROCEDURES:

Any person wanting to know whether this system of records contains information about him or her should contact the System Manager. Such person should provide his or her full name and mailing address to which a response is to be sent, and forum, filing date, and docket number of the action involved, if available.

RECORD ACCESS PROCEDURES:

The records described herein are compiled in reasonable anticipation of a civil action or proceeding. Pursuant to section (d)(5) of the Privacy Act of 1974, as amended, 5 U.S.C. 552a(d)(5), an individual is precluded from access to such records.

CONTESTING RECORDS PROCEDURES:

Same as the Notification Procedures above.

RECORD SOURCE CATEGORIES:

Plaintiffs, grievants, complainants, aggrieved individuals, current and former EEOC employees.

EEOC–18

SYSTEM NAME:

Reasonable Accommodation Records

SYSTEM LOCATION:

Office of the Chief Human Capital Officer, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former EEOC employees and applicants who have requested reasonable accommodations under the Rehabilitation Act of 1973.

CATEGORIES OF RECORDS IN THE SYSTEM:

Requests for reasonable accommodations; medical records; notes or records made during consideration of requests; decisions on requests; records made to implement or track decisions on requests.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Rehabilitation Act of 1973, 29 U.S.C. 791; E.O. 13164.

PURPOSE:

This system is maintained for the purpose of considering, deciding, and implementing requests for reasonable accommodation made by EEOC employees and applicants.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

a. To disclose information to medical personnel to meet a bona fide medical emergency.

b. To disclose information to another Federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a Federal agency when the Government is a party to the judicial or administrative proceeding.

c. To disclose information to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

d. To disclose to an authorized appeal grievance examiner, formal complaints examiner, administrative judge, equal employment opportunity investigator, arbitrator, or other duly authorized official engaged in investigation or settlement of a grievance, complaint, or appeal filed by an employee.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in locked file cabinets and electronically.

RETRIEVABILITY:

Indexed by name of employee or applicant and office location.

SAFEGUARDS:

Files are maintained in locked cabinets. Access is restricted to EEOC personnel whose official duties require such access. Access to computerized records is limited, through use of logins and passwords, to those whose official duties require access.

RETENTION AND DISPOSAL:

These records will be maintained in the Office of the Human Capital Officer for the longer of an employee's tenure with EEOC or 5 years. Thereafter, they will be destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Disability Program Manager, Office of the Chief Human Capital Officer, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

NOTIFICATION PROCEDURES:

Any person wanting to know whether this system of records contains information about him or her should contact the System Manager. Such person should provide his or her full name, position title and office location at the time the accommodation was requested, and mailing address to which a response is to be sent.

RECORD ACCESS PROCEDURES:

Same as the Notification Procedures above.

CONTESTING RECORDS PROCEDURES:

Same as the Notification Procedures above.

RECORD SOURCE CATEGORIES:

Information contained in this system is obtained from the current or former employee, the Office of the Chief Human Capital Officer, and management officials.

EEOC–19

SYSTEM NAME:

Revolving Fund Registrations.

SYSTEM LOCATION:

Revolving Fund Division, Office of Field Programs, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who register for or attend EEOC Revolving Fund programs, courses and conferences and who purchase publications and products.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains the names, job titles, company, organization or agency names, business addresses and phone numbers, email addresses, any reasonable accommodation requested, and attendance or purchase dates. Some of the records may contain payment information, the industry of the company, and the size of the establishment.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2000e–4(k).

PURPOSE(S):

These records are maintained for the purpose of administering Revolving Fund programs and publicizing future programs.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To send mailings to registrants and attendees advertising future Revolving Fund programs.

b. To provide information to a congressional office from the record of the individual in response to an inquiry from that congressional office made at the request of that individual.

c. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained electronically.

RETRIEVABILITY:

These records are indexed by the names of the registrants or attendees, by company, organization, or agency name.

SAFEGUARDS:

Access to and use of these records is limited, through use of access codes and entry logs, to those whose official duties require access.

RETENTION AND DISPOSAL:

These records are kept indefinitely.

SYSTEM MANAGER AND ADDRESS:

Director, Revolving Fund Division, Office of Field Programs, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

NOTIFICATION PROCEDURE:

Inquiries concerning this system of records should be addressed to the system manager. All inquiries should furnish the full name of the individual and the mailing address to which the reply should be mailed.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORDS PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information contained in this system is obtained from the registrant or attendee.

EEOC–20

SYSTEM NAME:

RESOLVE Program Records.

SYSTEM LOCATION:

RESOLVE Program, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former EEOC employees who request alternative dispute resolution during the counseling or investigative process of their EEO complaints against EEOC, as well as EEOC employees who contact the RESOLVE program for alternative dispute resolution of disputes occurring in their EEOC employment.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains the records generated in the course of receiving and attempting to resolve disputes brought to the RESOLVE program, including, as appropriate, intake interview notes, mediation scheduling notices, the mediator's outcome form, and settlement agreements.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 571–574; 44 U.S.C. 3101; 29 CFR part 1614.

PURPOSE(S):

These records are maintained for the purpose of administering EEOC's RESOLVE Program, which provides a forum for the informal resolution of a variety of workplace disputes as an alternative to the formal procedures that employees traditionally use to resolve disputes.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, when the EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

b. To provide information to a congressional office from the record of the individual in response to an inquiry from that congressional office made at the request of that individual.

c. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders and electronically.

RETRIEVABILITY:

These records are indexed by the names of the employee.

SAFEGUARDS:

The records are maintained in locked metal filing cabinets to which only authorized personnel have access. Access to and use of electronic records is limited, through use of logins and passwords, to those whose official duties require access.

RETENTION AND DISPOSAL:

These records are maintained for one year after the complaint or dispute matter brought to RESOLVE is closed and then transferred to the Federal Records Center where they are destroyed after three years.

SYSTEM MANAGER AND ADDRESS:

Chief Mediation Officer, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

NOTIFICATION PROCEDURE:

Inquiries concerning this system of records should be addressed to the

system manager. All inquiries should furnish the full name of the individual and the mailing address to which the reply should be mailed.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORDS PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information contained in this system is obtained from the current or former employee, the Office of Equal Opportunity, the Office of the Chief Human Capital Officer, management officials, union officials, and the mediator.

EEOC–21

SYSTEM NAME:

Emergency Management Records.

SYSTEM LOCATION:

Headquarters, District, Field, Area, and Local Offices may maintain emergency contact files. The Office of the Chief Financial Officer maintains emergency management and continuity of operations (COOP) files. The Office of the Chief Human Capital Officer maintains the orders of succession, which are part of the COOP files.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

EEOC employees, contractors, and other governmental and non-governmental persons essential to carrying out emergency activities.

CATEGORIES OF RECORDS IN THE SYSTEM:

The records, composed of emergency notification rosters and files, emergency contact information, and COOP files, may contain the following personal information: Name; office, cellular and home telephone numbers; home address; email address; primary contact name, relationship, address, cellular, work and home telephone numbers; alternate contact's name, relationship, address, cellular, work and home telephone numbers. Each office may collect a different set of information. System records may include special needs information such as medical, mobility, and transportation requirements for individuals. Additional information may include official titles and emergency assignments.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 44 U.S.C. 3101; Executive Order 12565, Assignment of Emergency Preparedness Responsibilities, (Nov. 18, 1989); Presidential Decision Directive 67, Ensuring Constitutional Government and Continuity of Government Operations.

PURPOSE:

To maintain current information on EEOC employees and other persons covered by this system to allow persons with emergency management responsibilities to notify or contact them about conditions that require their urgent assistance or attention during an emergency.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

b. To disclose information to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

c. To disclose information to an expert, consultant or contractor in the performance of a federal government duty involving EEOC emergency management.

d. To disclose information about an individual during an emergency in order to locate or contact that individual.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in paper files and in electronic media.

RETRIEVABILITY:

Records are retrieved by name, organization, or location.

SAFEGUARDS:

Records are maintained and stored in file cabinets in a secured area to which only authorized personnel have access. Access to electronic records is limited through use of logins and passwords for those whose official duties require access.

RETENTION AND DISPOSAL:

Records are destroyed one year after termination of the employment relationship or contract termination.

SYSTEM MANAGER(S) AND ADDRESS:

Headquarters, District, Field, Area, and Local Office Directors. Addresses listed in Appendix A.

NOTIFICATION PROCEDURES:

Inquiries concerning this system of records should be made to the system manager. It is necessary to provide the name of the individual and the mailing address to which the response should be sent.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information in this system is obtained from the individuals themselves, their supervisors or office.

EEOC–22

SYSTEM NAME:

EEOC Personnel Security Files.

SYSTEM LOCATION:

Office of the Chief Human Capital Officer, Operations Services Division, Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

EEOC employees, applicants, former employees, interns, volunteers, and contractors.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, former names, birth date, birth place, social security number, home address, telephone numbers, employment history, residential history, education and degrees earned, names of associates and references and their contact information, citizenship, names of relatives, citizenship of relatives, names of relatives who work for the federal government, criminal history, drug use, financial information, fingerprints, summary report of investigation, results of suitability decisions, requests for appeal, witness statements, investigator's notes, tax return information, credit reports, security violations (including circumstances of violation and agency action taken).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 3101; 5 CFR parts 731, 732, and 736; Executive Orders 10450, 10865, 12333, 12356, and 13467; Homeland Security Presidential Directive 12 (HSPD 12), Policy for a Common Identification Standard for Federal Employees and Contractors,

August 27, 2004; and Office of Personnel Management Memorandum, Final Credentialing Standards for Issuing Personal Identity Verification Cards under HSPD–12, July 31, 2008.

PURPOSE:

The records in this system are used to document and support decisions regarding the suitability, eligibility, and fitness for service of applicants for EEOC employment and contract positions, including criminal background screening for interns, or volunteers, to the extent their duties require access to federal facilities, information, systems, or applications. The records may be used to document security violations and supervisory actions taken.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

a. To provide information to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

b. Except as noted on Standard Forms 85, 85P, and 86, to disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where EEOC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

c. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

d. To disclose information to any source or potential source from which information is requested in the course of an investigation concerning the retention of an employee or other personnel action (other than hiring), to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation, and to identify the type of information requested.

e. To disclose information to employees of contractors who have been engaged by EEOC to perform an activity related to suitability, eligibility, and fitness for service of EEOC applicants and employees.

POLICIES AND PRACTICE FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in paper files and in electronic media.

RETRIEVABILITY:

Background investigation files are retrieved by name, social security number, or fingerprint.

SAFEGUARDS:

Records are maintained and stored in file cabinets in a secured area to which only authorized personnel have access. Access to electronic records is limited through use of logins and passwords to those whose official duties require access.

RETENTION AND DISPOSAL:

These records are destroyed upon notification of death or not later than five years after separation or transfer of employee to another agency or department.

SYSTEM MANAGER AND ADDRESS:

Director, Operations Services Division, Office of the Chief Human Capital Officer, EEOC, 131 M Street NE., Washington, DC 20507.

NOTIFICATION PROCEDURE:

Inquiries concerning this system of records should be addressed to the system manager. It is necessary to provide the following information: (1) Name; (2) date of birth; and (3) mailing address to which response is to be sent.

RECORDS ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information is obtained from a variety of sources, including the employee, contractor or applicant via use of the SF–85, SF–85P, or SF–86 and personal interviews; employers' and former employers' records; FBI criminal history records and other databases; financial institutions and credit reports; interviews of witnesses, such as neighbors, friends, co-workers, business associates, teachers, landlords, or family members; tax records; and other public records. Security violation information is obtained from a variety of sources, such as guard reports, security inspections, witnesses, supervisor's reports, audit reports.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE PRIVACY ACT:

This system of records is exempt in accordance with 5 U.S.C. 552a(k)(5) from subsection (c)(3) and (d)(1) of the Privacy Act, but only to the extent that the information identifies witnesses promised confidentiality as a condition of providing information during the course of the background investigation.

EEOC/GOVT–1

SYSTEM NAME:

Equal Employment Opportunity (EEO) in the Federal Government Complaint and Appeal Records.

SYSTEM LOCATION:

Equal employment opportunity complaint files are maintained in an Office of Equal Employment Opportunity or other designated office of the agency or department where the complaint was filed. EEO hearing records are maintained in the EEOC office in the field that handles the hearing request (See Appendix A). EEO Appeal files (including appeals from final negotiated grievance decisions involving allegations of discrimination) and petitions for review of decisions of the Merit Systems Protection Board are maintained in the Office of Federal Operations, Equal Employment Opportunity Commission, 131 M St. NE., Washington, DC 20507. Applicants for federal employment and current and former federal employees who contact an EEO counselor, file complaints of discrimination or reprisal with their agency, file requests for hearings, or file appeals of EEO complaints, petitions for review of decisions of the Merit Systems Protection Board, or appeals of final decisions in negotiated grievance actions involving allegations of discrimination.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system of records contains information or documents compiled during the pre-complaint counseling, investigation, hearing, and appeal of complaints filed under section 717 of Title VII, section 15 of the Age Discrimination in Employment Act, section 501 of the Rehabilitation Act, and the Equal Pay Act and all appeals.

AUTHORITY FOR MAINTENANCE OF SYSTEM:

42 U.S.C. 2000e–16(b) and (c); 29 U.S.C. 204(f) and 206(d); 29 U.S.C. 633(a); 29 U.S.C. 791; Reorg. Plan No. 1 of 1978, 43 FR 19607 (May 9, 1978); Exec. Order No. 12106, 44 FR 1053 (Jan. 3, 1979).

PURPOSE:

These records are maintained for the purpose of counseling, investigating, and adjudicating complaints of employment discrimination brought by applicants and current and former federal employees against federal employers.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

a. To disclose pertinent information to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

b. To disclose information to another federal agency, to a court, or to a party in litigation before a court or in an administrative proceeding being conducted by a federal agency when the government is a party to the judicial or administrative proceeding.

c. To provide information to a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

d. To disclose to an authorized appeal grievance examiner, formal complaints examiner, administrative judge, equal employment opportunity investigator, arbitrator, or other duly authorized official engaged in investigation or settlement of a grievance, complaint, or appeal filed by an employee.

e. To disclose, in response to a request for discovery or for appearance of a witness, information that is relevant to the subject matter involved in a pending judicial or administrative proceeding.

f. To disclose information to officials of state or local bar associations or disciplinary boards or committees when they are investigating complaints against attorneys in connection with their representation of a party before EEOC.

g. To disclose to a Federal agency in the executive, legislative, or judicial branch of government, in response to its request for information in connection with the hiring of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, or the lawful statutory, administrative, or investigative purpose of the agency to the extent that the information is relevant and necessary to the requesting agency's decision.

h. To disclose information to employees of contractors engaged by an agency to carry out the agency's responsibilities under 29 CFR part 1614.

i. To disclose information to potential witnesses as appropriate and necessary to perform the agency's functions under 29 CFR part 1614.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders and electronically.

RETRIEVABILITY:

These records are indexed by the names of the individuals on whom they are maintained.

SAFEGUARDS:

Access to and use of these records are limited to those persons whose official duties require such access.

RETENTION AND DISPOSAL:

These records are maintained for one year after resolution of the case and then transferred to the Federal Records Center where they are destroyed after three years.

SYSTEM MANAGER(S) AND ADDRESS:

Within the agency or department where the complaint of discrimination was filed, the system manager is the Director of the Office of Equal Employment Opportunity or other official designated as responsible for the administration and enforcement of equal employment opportunity laws and regulations within the agency or department.

Where an individual has requested a hearing, the system manager of hearing records is the Director of the Office of Field Programs, 131 M Street NE., Washington, DC 20507.

Where an EEO complaint or final negotiated grievance decision has been appealed to EEOC or an individual has petitioned EEOC for review of a decision of the Merit Systems Protection Board, the system manager of the appeal or petition file is the Director, Office of Federal Operations, 131 M Street NE., Washington, DC

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to subsection (k)(2) of the Privacy Act, 5 U.S.C. 552a(k)(2), this system of records is exempt from subsections (c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I) and (f) of the Act.

BILLING CODE 6570–01–P

FEDERAL COMMUNICATIONS COMMISSION

[DA 16–1230]

Consumer Advisory Committee

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: The Commission announces renewal of charter, appointment of members, designation of chairperson, and next meeting date, time, and agenda of its Consumer Advisory Committee (hereinafter the Committee). The mission of the Committee is to make recommendations to the Commission regarding consumer issues within the jurisdiction of the Commission and to facilitate the participation of consumers (including underserved populations, such as Native Americans, persons living in rural areas, older persons, people with disabilities, and persons for whom English is not their primary language) in proceedings before the Commission.

DATES: January 27, 2017, 9:00 a.m. to 4:00 p.m.

ADDRESSES: Federal Communications Commission, Commission Meeting Room TW–C305, 445 12th Street SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Scott Marshall, Designated Federal Officer of the Committee at: 202–418–2809 (voice or relay) or *Scott.Marshall@fcc.gov* (email), or Beau Finley, Deputy Designated Federal Officer of the Committee at: 202–418–7835 (voice or relay) or *Robert.Finley@fcc.gov* (email).

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's document DA 16–1230, released October 31, 2016 announcing the charter renewal, appointment of members, designation of chairperson, and the Agenda, Date, and Time of the Committee's first Meeting under its renewed charter.

Mission and Functions

The mission of the Committee is to make recommendations to the Commission regarding consumer issues within the jurisdiction of the Commission and to facilitate the participation of consumers (including underserved populations, such as Native Americans, persons living in rural areas, older persons, people with disabilities, and persons for whom English is not their primary language) in proceedings before the Commission. The Committee may consider issues including, but not limited to, the following topics:

- Consumer protection and education;
- Implementation of Commission rules and consumer participation in the FCC rulemaking process; and,
- The impact of new and emerging communication technologies (including availability and affordability of broadband service and Universal Service programs).

The duties of the Committee will include providing guidance to the Commission, to gather data and information, and to perform those analyses that are necessary to respond to the questions or matters before it.

Background

In November 2000, the Committee was initially established for a period of two (2) years from the original charter date. Following expiration of the original charter, the Committee was subsequently renewed several times. On October 14, 2016, the Committee held the final meeting of its most recent term, and thereafter, the Committee's charter, and all member appointments, terminated. The charter was renewed on October 21, 2016, for another two-year term, the ninth such renewal. This renewal is necessary and in the public interest. The Committee will operate in accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. 2 (1988). Each meeting of the Committee will be open to the public. A notice of each meeting will be published in the **Federal Register** at least fifteen (15) days in advance of the meeting. Records will be maintained of each meeting and made available for public inspection.

During the Committee's ninth term, it is anticipated that the Committee will meet in Washington, DC for a minimum of three (3) one-day plenary meetings per year. In addition, as needed, working groups or subcommittees will be established to facilitate the Committee's work between meetings of the full Committee. Meetings will be fully accessible to individuals with disabilities.

Members must be willing to commit to a two (2) year term of service, and should be willing and able to attend a minimum of three (3) one-day plenary committee meetings per year in Washington, DC. Committee members are also expected to participate in deliberations of at least one (1) working group or subcommittee.

Appointment of Members and Chairperson

In anticipation of the renewal of the Committee's charter, by a Public Notice (DA 16–657) released June 14, 2016, the

Commission solicited applications for membership on the Committee for its ninth two-year term. The application deadline was July 25, 2016.

After a review of the applications received, Chairman Tom Wheeler hereby appoints twenty-nine (29) members to the Committee. Of these, seventeen (17) represent interests of general consumers, two (2) represent interests of people with disabilities, six (6) represent interest of industry, one (1) represents minority interests, two (2) represent interests of quasi-government/regulators, and one (1) represents interests of seniors. The Committee's membership is designed to be representative of the Commission's many constituencies, and the diversity of the selected members will provide a balanced point of view as required by the Federal Advisory Committee Act. In addition, Chairman Wheeler designates Eduard Bartholme representing Call For Action as Chairperson of the Committee. All appointments and reappointments are effective October 21, 2016, and shall terminate October 21, 2018, or when the Committee is terminated, whichever is earlier.

The Committee's roster by organization name and primary representative is as follows:

(1) AARP, Coralette Hannon, Senior Legislative Representative
(2) American Cable Association, Ross J. Lieberman, Senior Vice President, Governmental Affairs
(3) American Consumer Institute, Steve Pociask, President/CEO
(4) American Foundation for the Blind, Mark Richert, Director Public Policy and Senior Advisor Strategic Initiatives
(5) Americans for Tax Reform, Katie McAuliffe, Federal Affairs Manager
(6) Appalachian Regional Commission, Mark Defalco, Manager
(7) Benton Foundation, Ms. Amina Fazlullah, Director of Policy
(8) Call For Action, Eduard Bartholme, Executive Director
(9) Center for Media Justice/Media Action Grassroots Network (MAGNET), Paul Goodman, Legal Counsel, Greenlining Institute
(10) Competitive Carriers Association, Elizabeth Barket, Law and Regulatory Counsel
(11) Consumer Action, Ken McEldowney, Executive Director
(12) Consumer Federation of America, Irene E. Leech, Ph.D.
(13) Consumers Union, Jonathan Schwantes, Senior Counsel, Telecommunications Policy
(14) CTIA, Krista L. Witanowski, Assistant Vice President, Regulatory Affairs
(15) Deaf and Hard of Hearing Consumer Advocacy Network, Zainab Alkebsi, Policy Counsel, National Association of the Deaf
(16) Electronic Privacy Information Center, Claire Gartland, EPIC Consumer Protection Counsel
(17) Free Press, Dana Floberg, Research Fellow
(18) Mass. Department of Telecommunications & Cable, Joslyn Day, Director, Consumer Division
(19) National Association of Broadcasters, Larry Walke, Associate General Counsel, Legal and Regulatory Affairs
(20) National Association of State Utility Consumer Advocates, Kenneth Mallory, Esq., Assistant People's Counsel
(21) National Hispanic Media Coalition, Andy Lomeli, Policy Associate
(22) National Association of Telecommunications Officers and Advisors, Mitsuko R. Herrera, Tech Policy, Planning
(23) National Consumers League, Debra R. Berlyn, Board Member & Officer
(24) National Consumer Law Center, Olivia Wein, Lead Telecom Attorney
(25) National Cable and Telecommunications Association, Steven Morris, Vice President and Associate General Counsel
(26) National Digital Inclusion Alliance, Angela Siefer, Director
(27) New America Foundation, Open Technology Institute, Eric Null, Policy Counsel
(28) Public Knowledge, Dallas Harris, Policy Fellow
(29) USTelecom, B. Lynn Follansbee, Vice President Law & Policy

Meeting Agenda

At its January 27, 2017, meeting, the Committee will consider administrative and procedural matters relating to its functions. The Committee may receive briefings from commission staff on issues of interest to the Committee. A limited amount of time will be available on the agenda for comments from the public. If time permits, the public may ask questions of presenters via the email address *livequestions@fcc.gov* or via Twitter using the hashtag #*fcclive*. Alternatively, members of the public may send written comments to: Scott Marshall, Designated Federal Officer of the Committee at the address provided below.

The meeting is open to the public and the site is fully accessible to people using wheelchairs or other mobility aids. Sign language interpreters, open captioning, assistive listening devices, and Braille copies of the agenda and committee roster will be provided on site. Meetings of the Committee are also broadcast live with open captioning over the Internet from the FCC Live Web page at *www.fcc.gov/live/*. In addition, the public may also follow the meeting on *Twitter @fcc* or via the Commission's Facebook page at *www.facebook.com/fcc*.

Other reasonable accommodations for people with disabilities are available upon request. The request should include a detailed description of the accommodation needed and contact information. Please provide as much advance notice as possible; last minute requests will be accepted, but may not be possible to fill. To request an accommodation, send an email to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (TTY).

For further information contact the Designated Federal Officer of the Committee, Scott Marshall, at 202–418–2809 (voice or relay) or *Scott.Marshall@fcc.gov* (email), or the Deputy Designated Federal Officer of the Committee, Beau Finley, at 202–418–7835 (voice or relay) or *Robert.Finley@fcc.gov* (email).

Federal Communications Commission.

D'wana R. Terry,

Acting Deputy Chief, Consumer and Governmental Affairs Bureau.

FEDERAL COMMUNICATIONS COMMISSION

[DA 16–1272]

Disability Advisory Committee; Announcement of Next Meeting

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: This document announces the date of the next meeting of the Commission's Disability Advisory Committee (Committee or DAC). The meeting is open to the public. During this meeting, members of the Committee will receive and discuss summaries of activities and recommendations from its subcommittees.

DATES: The Committee's next meeting will take place on Tuesday, December 6, 2016, from 9:00 a.m. to approximately 3:30 p.m. (EST).

ADDRESSES: Federal Communications Commission, 445 12th Street SW.,

Washington, DC 20554, in the Commission Meeting Room.

FOR FURTHER INFORMATION CONTACT: Elaine Gardner, Consumer and Governmental Affairs Bureau: (202) 418–0581 (voice); email: *DAC@fcc.gov.*

SUPPLEMENTARY INFORMATION: The Committee was established in December 2014 to make recommendations to the Commission on a wide array of disability matters within the jurisdiction of the Commission, and to facilitate the participation of people with disabilities in proceedings before the Commission. The Committee is organized under, and operated in accordance with, the provisions of the Federal Advisory Committee Act (FACA). The Committee held its first meeting on March 17, 2015.

At its December 6, 2016 meeting, the Committee is expected to receive and consider: Reports on the activities of its Communications and Emergency Communications Subcommittees; a report and recommendation from its Technology Transitions Subcommittee regarding the accessibility of the Internet of Things; a report and recommendation from its Video Programming Subcommittee on video description services; and a report and four recommendations from its Relay & Equipment Distribution Subcommittee regarding: Videomail-to-text services for Video Relay Services consumers who are Deaf-Blind; mobile device support for USB connectivity to Braille displays; best practices for the development and testing of Augmentative-Alternative Communication (AAC) devices; and the portability of ten-digit telephone numbers and associated features from one IP-enabled relay provider to another. The Committee also anticipates presentations from Commission staff on recent activities, and a presentation on the future of television. A limited amount of time may be available on the agenda for comments and inquiries from the public. The public may comment or ask questions of presenters via the email address *livequestions@fcc.gov.*

The meeting site is fully accessible to people using wheelchairs or other mobility aids. Sign language interpreters, open captioning, and assistive listening devices will be provided on site. Other reasonable accommodations for people with disabilities are available upon request. If making a request for an accommodation, please include a description of the accommodation you will need and tell us how to contact you if we need more information. Make your request as early as possible by sending an email to *fcc504@fcc.gov* or calling the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY). Last minute requests will be accepted, but may be impossible to fill. The meeting will be webcast with open captioning, at: *www.fcc.gov/live.*

To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

Federal Communications Commission.

Karen Peltz Strauss,

Deputy Chief, Consumer and Governmental Affairs Bureau.

FEDERAL DEPOSIT INSURANCE CORPORATION

Sunshine Act Meeting

Pursuant to the provisions of the ''Government in the Sunshine Act'' (5 U.S.C. 552b), notice is hereby given that at 10:28 a.m. on Tuesday, November 15, 2016, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider matters related to the Corporation's supervision, corporate, and resolution activities.

In calling the meeting, the Board determined, on motion of Vice Chairman Thomas M. Hoenig, seconded by Director Richard Cordray (Director, Consumer Financial Protection Bureau), concurred in by Director Thomas J. Curry (Comptroller of the Currency) and Chairman Martin J. Gruenberg, that Corporation business required its consideration of the matters which were to be the subject of this meeting on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of the ''Government in the Sunshine Act'' (5 U.S.C. 552b(c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10).

Dated: November 15, 2016.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of the filing of the following agreements under the Shipping Act of 1984. Interested parties may submit comments on the agreements to the Secretary, Federal Maritime Commission, Washington, DC 20573, within twelve days of the date this notice appears in the **Federal Register**. Copies of the agreements are available through the Commission's Web site (*www.fmc.gov*) or by contacting the Office of Agreements at (202)–523–5793 or *tradeanalysis@fmc.gov.*

Agreement No.: 012367–003.

Title: MSC/Maersk Line Trans-Atlantic Space Charter Agreement.

Parties: Maersk Line A/S and MSC Mediterranean Shipping Company S.A.

Filing Party: Wayne R. Rohde, Esq.; Cozen O'Conner; 1200 19th Street NW., Washington, DC 20036.

Synopsis: The amendment makes a minor revision to Article 5.1(a) with respect to the timing of a change in the amount of space to be chartered.

Agreement No.: 012440.

Title: WWL and NYK Space Charter Agreement.

Parties: Wallenius Wilhelmsen Logistics AS and Nippon Yusen Kaisha.

Filing Party: Kristen Chung, Corporate Counsel, NYK Line (North America) Inc.; 300 Lighting Way, 5th Floor; Secaucus, NJ 07094.

Synopsis: The Agreement authorizes the parties to charter space to/from one another for the carriage of vehicles, equipment or other cargo suitable for carriage on Ro/Ro vessels in the U.S. trades.

By Order of the Federal Maritime Commission.

Dated: November 14, 2016.

Rachel E. Dickon,

Assistant Secretary.

BILLING CODE P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or

bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 12, 2016.

A. Federal Reserve Bank of St. Louis (David L. Hubbard, Senior Manager) P.O. Box 442, St. Louis, Missouri 63166–2034. Comments can also be sent electronically to *Comments.applications@stls.frb.org:*

1. *Northeast Missouri Bancshares, Inc.,* to become a bank holding company by acquiring 100 percent of The Mercantile Bank of Louisiana, all of Louisiana, Missouri.

Board of Governors of the Federal Reserve System, November 10, 2016.

Yao-Chin Chao,

Assistant Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL TRADE COMMISSION

Agency Information Collection Activities; Proposed Collection; Comment Request

AGENCY: Federal Trade Commission (FTC or Commission).

ACTION: Notice.

SUMMARY: The information collection requirements described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act (PRA). The FTC seeks public comments on its proposal to extend, for three years, the current PRA clearance for its portion of the information collection requirements contained in the Consumer Financial Protection Bureau's Regulation O (the Mortgage Assistance Relief Services Rule). The FTC shares enforcement of Regulation O with the Consumer Financial Protection Bureau (CFPB). This clearance expires on January 31, 2017.

DATES: Comments must be received on or before January 17, 2017.

ADDRESSES: Interested parties may file a comment online or on paper by following the instructions in the Request for Comments part of the Supplementary Information section below. Write ''Regulation O, PRA Comment, FTC File No. P134812'' on your comment, and file your comment online at *https://ftcpublic.commentworks.com/ftc/regulationopra* by following the instructions on the web-based form. If you prefer to file your comment on paper, mail or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW., Suite CC–5610 (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW., 5th Floor, Suite 5610 (Annex J), Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Requests for copies of the collection of information and supporting documentation should be addressed to Rebecca Unruh, Attorney, Division of Financial Practices, Bureau of Consumer Protection, Federal Trade Commission, 600 Pennsylvania Avenue NW., CC–10232, Washington, DC 20580, (202) 326–3365.

SUPPLEMENTARY INFORMATION: Title X of the Dodd-Frank Wall Street Reform and Consumer Protection Act (''Dodd-Frank Act''), Public Law 111–203, 124 Stat. 1376 (2010), transferred the Commission's rulemaking authority under the mortgage provisions in section 626 of the 2009 Omnibus Appropriations Act, as amended,[1] to the CFPB.[2] On December 16, 2011, the CFPB republished the Mortgage Assistance Relief Services (''MARS'') Rule as Regulation O (12 CFR part 1015).[3] As a result, the Commission subsequently rescinded its MARS Rule (16 CFR part 322).[4] Nonetheless, under the Dodd-Frank Act, the FTC retains its

[1] Public Law 111–8, section 626, 123 Stat. 524 (Mar. 11, 2009).

[2] Dodd-Frank Act, § 1061, 12 U.S.C. 5581 (2010).

[3] 76 FR 78130.

[4] 77 FR 22200 (April 13, 2012).

authority to bring law enforcement actions to enforce Regulation O.[5]

Regulation O contains information requirements that have been approved by OMB under the PRA, 44 U.S.C. 3501 *et seq.* The discussion below details the nature of and justification for the information collection requirements of Regulation O for which the FTC, as a co-enforcer, seeks OMB clearance renewal for its share of the estimated PRA burden.[6]

Disclosure Requirements

In commercial communications for a general audience, MARS providers are required to make the following disclosure:

(1) ''(Name of company) is not associated with the government and our service is not approved by the government or your lender''; and

(2) In some instances, that ''[e]ven if you accept this offer and use our service, your lender may not agree to change your loan.''

In addition, MARS providers must disclose to consumers, in any subsequent commercial communication directed to a specific consumer, the following information:

(1) That ''You may stop doing business with us at any time. You may accept or reject the offer of mortgage assistance we obtain from your lender [or servicer]. If you reject the offer, you do not have to pay us. If you accept the offer, you will have to pay us (insert amount or method for calculating the amount) for our services'';

(2) That ''(Name of company) is not associated with the government and our service is not approved by the government or your lender''; and

(3) In some instances, that ''[e]ven if you accept this offer and use our service, your lender may not agree to change your loan.''

Furthermore, MARS providers are required to disclose to consumers in all communications in which the provider represents that the consumer should temporarily or permanently discontinue payments, in whole or in part, the following information:

''If you stop paying your mortgage, you could lose your home and damage your credit rating.''

Finally, after a provider has obtained an offer of mortgage assistance relief from the lender or servicer and presented the consumer with a written agreement incorporating the offer, the MARS provider must disclose the following:

(1) ''This is an offer of mortgage assistance relief service from your lender [or servicer]. You may accept or reject the offer. If you accept the offer, you will have to pay us [same amount as disclosed pursuant to § 1015.4(b)(1)] for our services''; and

(2) A description of all ''material differences'' between the terms, conditions, and limitations of the consumer's current mortgage and those associated with the offer for mortgage relief, provided in a written notice from the consumer's lender or servicer.

Regulation O also requires that the disclosures be ''clear and prominent,'' as defined specific to the media used.[7]

These disclosures are necessary for the following reasons:

- *Non-affiliation with the government or lenders:* Federal and state law enforcement officials have brought numerous law enforcement actions against MARS providers who have misrepresented their affiliation with government agencies or programs, lenders, or servicers, in connection with offering MARS. These providers have used a variety of techniques to create such misimpressions, including advertising under trade names that resemble the names of legitimate government programs. Given that the government, for-profit entities, and nonprofit entities assist financially distressed consumers with their mortgages, and the frequency of deceptive affiliation claims, the requirement that MARS providers disclose their nonaffiliation with the government or with consumers' lenders or servicers is reasonably related to the goal of preventing deception.
- *Risk of Nonpayment of Mortgage:* Law enforcement experience and the FTC's rulemaking record for the former MARS Rule demonstrates that MARS providers frequently encourage consumers, often through deception, to stop paying their mortgages and instead pay providers. Consumers who rely on these deceptive statements frequently suffer grave financial harm. Requiring MARS providers who encourage consumers not to pay their mortgages to disclose the risks of following this advice is necessary to prevent deception.
- *Total amount a consumer must pay:* The total cost of MARS is perhaps most material to consumers in making well-informed decisions about whether to purchase those services. Requiring the clear and prominent disclosure of total cost information in every communication directed at a specific consumer before the consumer enters into an agreement would decrease the likelihood that MARS providers will deceive prospective customers with incomplete, inaccurate, or confusing cost information. Requiring MARS providers to disclose total cost information clearly and prominently is reasonably related to the prevention of deception.
- *Right to accept or reject offer of mortgage assistance:* To effectuate fully the advance fee ban under 12 CFR 1015.5, which prohibits providers from collecting fees until the consumer has accepted the results obtained by the provider, it also is necessary for a MARS provider to inform consumers that they may withdraw from the service and may accept or reject the result delivered by the provider. This disclosure is reasonably related to preventing unfair and deceptive acts and practices by MARS providers.
- *No guarantee:* Law enforcement experience and the FTC's rulemaking record reveals that MARS providers often misrepresent their likelihood of success in obtaining a significant loan modification for consumers. These deceptive success claims lead consumers to overestimate MARS providers' abilities to obtain substantial loan modifications or other relief. Requiring MARS providers to inform consumers that lenders might not agree to change consumers' loans, even if those consumers purchase the services that the MARS provider offers, is reasonably related to the goal of preventing deception.
- *Written Notice from Lender or Servicer:* Based on law enforcement experience and the rulemaking record, providing the consumer with a notice from the consumer's lender or servicer describing all material differences between the consumer's current mortgage loan and the offered mortgage relief is essential to consumers' ability to evaluate whether they should accept the offer. Requiring that the lender or servicer prepare the written disclosure also better ensures that the information provided is consistent with the terms of the offer, and mitigates the risk that MARS providers would mislead consumers about the offer. This disclosure is reasonably related to the goal of protecting consumers from deception.

Recordkeeping Requirements

Regulation O's recordkeeping requirements pertain to records that are customarily kept in the ordinary course of business, such as copies of contracts and consumer files containing the name

[5] Dodd-Frank Act, § 1061(b)(5), 12 U.S.C. 5581(b)(5).

[6] The OMB Control Number for the FTC's existing PRA clearance associated with Regulation O is 3084–0157.

[7] *See* 12 CFR 1015.2, 1015.5.

and address of the borrower and materially different versions of sales scripts and related promotional materials. Thus, the retention of these documents does not constitute a ''collection of information,'' as defined by OMB's regulations that implement the PRA.[8]

Burden Statement

Because the FTC and CFPB share enforcement authority for this rule, the FTC is seeking clearance for one-half of the following estimated PRA burden that the FTC attributes to the disclosure and recordkeeping requirements under Regulation O. The potential entities providing MARS services are varied, and there are no ways to formally track them. By extension, there is no clear path to track how many affected individual entities have newly entered and departed from one year to the next or from one triennial PRA clearance cycle to the next. However, based on law enforcement experience and the CFPB's recent analysis conducted after the MARS Rule was restated as Regulation O, the FTC estimates that Regulation O affects roughly 107 MARS providers.[9] This estimate informs the additional estimates detailed below.

Estimated annual hours burden: 321 (for the FTC).

The above hours estimate is based on the assumption that compliance with all MARS disclosures requires 6 hours of labor annually.[10] Multiplying this figure by 107 entities yields a total burden of 642 hours, of which 321 hours are attributed to the FTC.[11]

Estimated associated labor cost: $10,677 (for the FTC).

Commission staff assumes that a compliance officer or equivalent will prepare the required disclosures for 6 hours annually at an hourly rate of $33.26.[12] Thus, the estimated labor cost is $21,353 (107 providers × 6 hours × $33.26) of which the FTC assumes half, or $10,677.

Estimated non-labor cost: $29,425 (for the FTC).

Based on the CFPB's analysis, the FTC assumes that each of the estimated 107 MARS providers bears an additional $550 in material fees for acquiring relevant legal and technical compliance information, for a total additional burden of $58,850, of which the FTC assumes half, or $29,425.[13] Based on law enforcement experience, the FTC assumes that any disclosures will likely be made electronically and thus will not generate additional non-labor costs such as printing and distribution.

Request for Comments

Under the PRA, 44 U.S.C. 3501–3521, federal agencies must obtain approval from OMB for each collection of information they conduct or sponsor. ''Collection of information'' means agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. 44 U.S.C. 3502(3); 5 CFR 1320.3(c). As required by section 3506(c)(2)(A) of the PRA, the FTC is providing this opportunity for public comment before requesting that OMB extend the existing paperwork clearance for the regulations noted herein.

Pursuant to Section 3506(c)(2)(A) of the PRA, the FTC invites comments on:

(1) Whether the disclosure and recordkeeping requirements are necessary, including whether the information will be practically useful;

(2) the accuracy of our burden estimates, including whether the methodology and assumptions used are valid;

(3) ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) ways to minimize the burden of the collection of information. All comments should be filed as prescribed in the **ADDRESSES** section above, and must be received on or before January 17, 2017.

You can file a comment online or on paper. Write ''Regulation O, PRA Comment, FTC File No. P134812'' on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including, to the extent practicable, on the public Commission Web site, at *http://www.ftc.gov/os/publiccomments.shtm.* As a matter of discretion, the Commission tries to remove individuals' home contact information from comments before placing them on the Commission Web site.

Because your comment will be made public, you are solely responsible for making sure that your comment does not include any sensitive personal information, such as a Social Security number, date of birth, driver's license number or other state identification number or foreign country equivalent, passport number, financial account number, or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, do not include any ''[t]rade secret or any commercial or financial information which is . . . privileged or confidential,'' as discussed in section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2). In particular, do not include competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

If you want the Commission to give your comment confidential treatment, you must file it in paper form, with a request for confidential treatment, and you must follow the procedure explained in FTC Rule 4.9(c), 16 CFR 4.9(c). Your comment will be kept confidential only if the FTC General Counsel grants your request in accordance with the law and the public interest. Postal mail addressed to the Commission is subject to delay due to heightened security screening. As a result, the Commission encourages you to submit your comments online. To make sure that the Commission considers your online comment, you must file it at *https://ftcpublic.commentworks.com/ftc/regulationopra* by following the instructions on the web-based form. If this Notice appears at *http://www.regulations.gov,* you also may file a comment through that Web site.

If you file your comment on paper, write ''Regulation O, PRA Comment, FTC File No. P134812'' on your comment and on the envelope, and mail it to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW., Suite CC–5610, (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW., 5th Floor, Suite 5610,

[8] 5 CFR 1320.3(b)(2).

[9] *See* Bureau of Consumer Financial Protection, Agency Information Collection Activities: Submission for OMB Review; Supporting Statement (Jul. 23, 2015), *available at http://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=201507-3170-002;* OMB Control No: 3170–0007, clearance expires on Sept. 30, 2018.

[10] *Id.*

[11] *Id.* Both the FTC and CFPB attribute the significant drop in burden hours from prior estimates to several factors, including the lack of one-time startup costs associated with new entrants into the market (since there are not expected to be any new market entrants in the next three years), the lack of rule modification, and a reduction in the estimated number of MARS providers. The decrease in the estimated number of MARS providers is consistent with Regulation O's causing a reduction in purported providers of mortgage relief services who were not in fact providing legitimate relief services, causing overestimation.

[12] This estimate is based on the mean hourly wage for a Compliance Officer provided by the Bureau of Labor Statistics in its Table entitled ''National employment and wage data from the Occupational Employment Statistics survey by occupation, May 2015.''

[13] *See supra* note 9.

(Annex J), Washington, DC 20024. If possible, submit your paper comment to the Commission by courier or overnight service.

The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before January 17, 2017. You can find more information, including routine uses permitted by the Privacy Act, in the Commission's privacy policy, at *http://www.ftc.gov/ftc/privacy.htm*.

David C. Shonka,

Acting General Counsel.

BILLING CODE 6750–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–17–17ZQ; Docket No. CDC–2016–0107]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing efforts to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. This notice invites comment on Zika Virus Associated Neurologic Illness Case Control Study. This collection intends to identify potential risk factors for the development of severe neurologic illnesses using a case-control investigation.

DATES: Written comments must be received on or before January 17, 2017.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2016–0107 by any of the following methods:

- *Federal eRulemaking Portal: Regulations.gov*. Follow the instructions for submitting comments.
- *Mail:* Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS–D74, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. All relevant comments received will be posted without change to *Regulations.gov*, including any personal information provided. For access to the docket to read background documents or comments received, go to *Regulations.gov*.

*Please note: All public comment should be submitted through the Federal eRulemaking portal (*Regulations.gov) *or by U.S. mail to the address listed above.*

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact the Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS–D74, Atlanta, Georgia 30329; phone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

Proposed Project

Zika Virus Associated Neurologic Illness Case Control Study—New—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

There is an urgent public health need to understand the potential association between neurological illness and Zika Virus (ZIKV) infection. Currently, increased numbers of neurologic illness cases have been reported in ZIKV-affected contexts, but it is not known if this is due to ZIKV, another etiologic agent, or some combination/interaction thereof. The Puerto Rico Department of Health (PRDH) is establishing neurologic illness surveillance and defining baseline incidence toward investigating the association between neurologic illness and ZIKV infection in Puerto Rico. More broadly, the results of this investigation would be relevant to other ZIKV-affected contexts, serving toward enabling clinical and/or public health action to manage and prevent additional cases.

A case-control investigation will be conducted to identify potential risk factors for the development of neurological illness. As part of the investigation, blood specimens will be collected from cases and matched controls to evaluate for antibodies against several pathogens known to cause neurological illness (*e.g.,* influenza) or pathogens hypothesized to contribute to this illness cluster (*e.g.,* ZIKV, dengue virus, chikungunya virus, HIV, Campylobacter jejuni, Leptospira species bacteria).

This information collection request is a continuation on the work begun under the following Emergency Clearance: OMB 0920–1106 (Expiration date 9/30/16). Specifically, beginning in March 2016, CDC collaborated with the PRDH on the collection of very similar data for a Guillain-Barre syndrome case-control

investigation. After clinical reports and field observation of a broader range of health endpoints, this larger investigation is now being undertaken to expand the exploration of the association of Zika virus infection with not only Guillain-Barre syndrome but also other severe neurologic illnesses.

Under this request, case and control interviews similar to those conducted under the previously approved information collection will be conducted using the questionnaire developed by the investigation team. All cases and controls will be asked questions about activities, antecedent signs and symptoms of illness, and exposures in the two months prior to onset of neurologic illness for cases and the same time period for their matched controls. A calendar will be used to orient cases and controls to the time period of interest.

As in the previously approved information collection activities, sera, urine, and saliva will be collected from cases and controls at the time of interview using standard techniques. The sera will be tested for antibodies against suspected infectious pathogens, such as ZIKV, dengue virus, chikungunya virus, influenza virus, human immunodeficiency virus, and Leptospira species bacteria. Urine specimens will be tested by rRT–PCR to identify ZIKV, dengue virus, or chikungunya virus.

If any residual specimens are available from cases, those will also be obtained and undergo testing for infectious pathogens. It is not expected that matched controls will have any previously collected clinical specimens; however, in cases where controls had specimens collected while seeking medical care for an acute illness experienced within two months of GBS symptom onset of the matching case, these specimens will also be collected and tested for evidence of infection with the aforementioned pathogens.

Residual samples will be stored after infectious testing is complete at the U.S. CDC with an identification number for possible additional testing for GBS-associated biological markers or other infectious pathogens as clinically indicated. If a participant does not provide consent to store the specimens, all specimens for that participant will be destroyed once testing for infectious disease pathogens has been completed. As with cases, written consent will also be obtained to review controls' medical records, where applicable and available, using a standardized chart abstraction form. Diagnostic test results will be securely transmitted from CDC to PRDH, which will then transmit diagnostic test results to participants by telephone or mail, as they prefer.

Data analysis will focus on potential demographic, environmental, and/or medical risk factors for developing neurologic illness, as well as laboratory evidence for infection with the aforementioned pathogens.

The total number of estimated annualized burden hours for this project is 90. There are no other costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Public Health Personnel	Severe Neurologic Illness Chart Abstraction Questionnaire.	10	6	1	60
General Public	Severe Neurologic Illness Questionnaire for Cases and Controls.	120	1	15/60	30
Total					90

Leroy A. Richardson,

Please note: All public comment should be submitted through the Federal eRulemaking portal (*Regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the

proposed project or to obtain a copy of the information collection plan and instruments, contact the Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS–D74, Atlanta, Georgia 30329; phone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

Proposed Project

ZEN Colombia Study: Zika in Pregnant Women and Children in Colombia—New—Pregnancy and Birth Defects Task Force, National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Zika virus (ZIKV) infection is a mosquito-borne flavivirus transmitted by *Aedes* species mosquitoes; sexual transmission, mother-to-child transmission, and laboratory-acquired infections have also been reported. Evidence of human ZIKV infection was observed sporadically in Africa and Asia prior to 2007, when an outbreak of ZIKV caused an estimated 5,000 infections in the State of Yap, Federated States of Micronesia. Since then, evidence of ZIKV has been found in 65 countries and territories, mostly in Central and South America. Common symptoms of ZIKV in humans include rash, fever, arthralgia, and nonpurulent conjunctivitis. The illness is usually mild and self-limited, with symptoms lasting for several days to a week; however, based on previous outbreaks, some infections are asymptomatic. The prevalence of asymptomatic infection in the current Central and South American epidemic is unknown.

Although the clinical presentation of ZIKV infection is typically mild, ZIKV infection in pregnancy can cause microcephaly and related brain abnormalities when fetuses are exposed *in utero.* Other adverse pregnancy outcomes related to ZIKV infection remain under study, and include pregnancy loss, other major birth defects, arthrogryposis, eye abnormalities, and neurologic abnormalities.

As the spectrum of adverse health outcomes related to ZIKV infection continues to grow, large gaps remain in our understanding of ZIKV infection in pregnancy. These include the full spectrum of adverse health outcomes in pregnant women, fetuses, and infants associated with ZIKV infection; the relative contributions of sexual transmission and mosquito-borne transmission to occurrence of infections in pregnancy; variability in the risk of adverse fetal outcomes by gestational week of maternal infection or symptoms of infection. There is an urgency to fill these large gaps in our understanding given the rapidity of the epidemic's spread and the severe health outcomes associated with ZIKV to date.

Colombia's Instituto Nacional de Salud (INS) began surveillance for ZIKV in 2015, reporting the first autochthonous transmission in October 2015 in the north of the country. As of August 2016, Colombia has reported over 102,000 suspected ZIKV cases, over 18,000 of them among pregnant women. With a causal link established between ZIKV infection in pregnancy and microcephaly, there is an urgent need to understand how ZIKV transmission can be prevented; the full spectrum of adverse maternal, fetal, and infant health outcomes associated with ZIKV infection; and risk factors for occurrence of these outcomes. To answer these questions, INS and the U.S. Centers for Disease Control and Prevention (CDC) will follow 5,000 women enrolled in the first trimester of pregnancy, their male partners, and their infants, in two to four cities in Colombia where ZIKV transmission is currently ongoing.

The primary objectives of the study are to (1) Identify risk factors for ZIKV infection in pregnant women and their infants. These include behaviors such as use of mosquito-bite prevention measures or condoms, and factors associated with maternal-to-child transmission; (2) Assess the risk for adverse maternal, fetal, and infant outcomes associated with ZIKV infection and; (3) Assess modifiers of the risk for adverse outcomes among pregnant women and their infants following ZIKV infection. This includes investigating associations with gestational age at infection, presence of ZIKV symptoms, extended viremia, mode of transmission, prior infections or immunizations, and co-infections.

Pregnant women will be recruited in the first trimester of pregnancy at participating clinics in Colombia's private and public health care systems and followed through their pregnancy, delivery, and immediate postpartum period. Study visits will coincide with routine prenatal care clinic visits (monthly), and at these visits, mothers will be monitored for incident ZIKV infection by collection of blood. In addition, women will be asked to complete a questionnaire about behavioral, sexual, environmental, or other risk factors for ZIKV or adverse pregnancy outcomes and a ZIKV symptoms questionnaire. In between clinic visits (approximately two weeks after the clinic visit), a home visit will be conducted where a urine sample from the pregnant woman will be collected. Mothers will complete a ZIKV symptom questionnaire at the time of the home visit. Fetal ultrasound evaluation will occur once per trimester. If ZIKV is detected during pregnancy, monthly fetal ultrasounds will be conducted and women will provide

blood biweekly at the clinic or hospital until there are 2 consecutive negative blood tests for ZIKV. Fetal tissue will be collected for pregnancy losses to assess fetal ZIKV infection. All pregnancy outcomes and any additional testing during pregnancy or in the immediate neonatal period as part of clinical care will be abstracted from medical records.

Male partners will be recruited via their pregnant partners around the time of their pregnant partners' enrollment into the study. At enrollment, men will complete a baseline questionnaire and ZIKV symptom questionnaire and provide a blood sample. Urine samples in men will be collected at home every 2 weeks through the second trimester of pregnancy to monitor for incident ZIKV infection. Men will complete a ZIKV symptom questionnaire at the time of each specimen collection. If a man becomes symptomatic, he will be asked to provide a blood sample at the clinic for ZIKV testing. If ZIKV is detected, semen collection at home will be scheduled every two weeks until there are 2 consecutive negative tests, or the end of pregnancy. In addition, if a man's at-home urine sample is positive, he will again be asked to participate in semen collection at home every two weeks until there are 2 consecutive negative tests, or the end of pregnancy.

All newborns of mothers participating in the study will be followed from birth to 6 months of age. A blood sample will be collected at delivery or no later than 3 days after delivery. Urine samples and information on infant's symptoms will be collected every 2 weeks at home visits to monitor for ZIKV infection in infancy. Additionally, any infant health conditions or results from medical testing during this 6-month period conducted as part of routine clinical care will be abstracted from medical records.

INS and CDC will use the study results to guide their recommendations to prevent ZIKV infection; to improve counseling of patients about risks to themselves, their pregnancies, their partners, and their infants; and to help agencies prepare to provide services to affected children and families.

ESTIMATED ANNUALIZED BURDEN HOURS

Respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
Pregnant women	Pregnant women eligibility questionnaire.	6,250	1	5/60	520
	Pregnant women enrollment questionnaire.	5,000	1	20/60	1,666
	Adult symptom questionnaire	5,000	12	5/60	5,000
	Pregnant women follow-up questionnaire.	5,000	12	15/60	15,000
	Infant symptoms questionnaire	4,500	4	5/60	1,500
Male partners	Male partner eligibility questionnaire	5,000	1	5/60	417
	Male enrollment questionnaire	1,250	1	15/60	312
	Adult symptom questionnaire	1,250	12	5/60	1,250
Total					25,665

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–17–0881; Docket No. CDC–2016–0109]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing efforts to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. This notice invites comment on ''Data Calls for the Laboratory Response Network'' collected from its members concerning their capacity to respond to public health threat emergencies.

DATES: Written comments must be received on or before January 17, 2017.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2017–0109 by any of the following methods:

- *Federal eRulemaking Portal: Regulations.gov*. Follow the instructions for submitting comments.
- *Mail:* Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS–D74, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. All relevant comments received will be posted without change to *Regulations.gov*, including any personal information provided. For access to the docket to read background documents or comments received, go to *Regulations.gov*.

Please note: All public comment should be submitted through the Federal eRulemaking portal (*Regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact the Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS–D74, Atlanta, Georgia 30329; phone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of

Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

Proposed Project

Data Calls for the Laboratory Response Network, (OMB Control No. 0920–0881 exp. 4/30/2017)—Extension—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Laboratory Response Network (LRN) was established by the Department of Health and Human Services, Centers for Disease Control and Prevention (CDC) in accordance with Presidential Decision Directive 39, which outlined national anti-terrorism policies and assigned specific missions to Federal departments and agencies. The LRN's mission is to maintain an integrated national and international network of laboratories that can respond to acts of biological, chemical, or radiological terrorism and other public health emergencies. Federal, state and local public health laboratories voluntarily join the LRN.

The LRN Program Office maintains a database of information for each member laboratory that includes contact information as well as staff and equipment inventories. However, semiannually or during emergency response the LRN Program Office may conduct a Special Data Call to obtain additional information from LRN Member Laboratories in regards to biological or chemical terrorism preparedness.

LRN has used the currently approved generic information collection plan twice during the last three years. Once in 2014, LRN surveyed its members to ascertain which, if any, labs would be willing to test clinical specimens for Ebola virus.

The information gathered led to an emergency deployment of a new Ebola assay for LRN members. It is critical for the LRN to know which labs have equipment to support an agent specific assay during an emergency. In 2015, LRN surveyed members via broadcast email asking how many facilities had a specific version of an instrument. The information was used to help the LRN program office determine if new procedures should be written and made available to members to support the instrument in question.

Special Data calls may be conducted via queries that are distributed by broadcast emails or by survey tools (*i.e.* Survey Monkey).

This is a request for a three year extension to this generic clearance.

The only cost to respondents is their time to respond to the data call. Authorizing legislation comes from Section 301 of the Public Health Service Act.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Public Health Laboratorians	Special Data Call	136	1	30/60	68
Total					68

Leroy A. Richardson,

Chief, Information Collection Review Office, Office of Scientific Integrity, Office of the Associate Director for Science, Office of the Director, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier CMS–10169]

Agency Information Collection Activities: Proposed Collection; Comment Request; Correction

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Correction of notice.

SUMMARY: This document corrects the information provided for [Document Identifier: CMS–10169] titled ''Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) Competitive Bidding Program; Change of Ownership Forms.''

FOR FURTHER INFORMATION CONTACT: William N. Parham, III, (410) 786–4669.

SUPPLEMENTARY INFORMATION:

I. Background

In the October 14, 2016, issue of the **Federal Register** (81 FR 71100), we

published a Paperwork Reduction Act notice requesting a 60-day public comment period for the information collection request identified under CMS–10169, OMB control number 0938–1016, and titled ''Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) Competitive Bidding Program; Change of Ownership Forms.''

II. Explanation of Error

In the October 14, 2016, notice, the information provided in the first column under paragraph 2, on page 71101, inadvertently published information in the ''Use'' section that pertained to an older iteration of the information collection request. This notice corrects the language found in the ''Use'' section under the 2nd paragraph on page 71101 of the October 14th notice. All of the other information contained in the October 14, 2016, notice is correct. The related public comment period remains in effect and ends December 13, 2016.

III. Correction of Error

In FR Doc. 2016–24910 of October 14, 2016 (81 FR 71100), on page 71101, the language beginning with the word ''*Use:*'' in the first column, in the first full paragraph, in the 8th line, and ending in the second column, with the word ''basis'', in the second column, in the 33rd line, is corrected to read as follows:

Use: The MMA requires the Secretary to recompete contracts not less often than once every 3 years. Section 1847(a)(1)(G) of the Act, added by section 522(a) of the MACRA, now requires a bid surety bond for bidding entities beginning not earlier than January 1, 2017 and not later than January 1, 2019. The addition to the Act states that a bidding entity may not submit a bid for a CBA unless, as of the deadline for bid submission, the entity has (1) obtained a bid surety bond, in the range of $50,000 to $100,000 and (2) provided the Secretary with proof of having obtained the bid surety bond for each CBA in which the entity submits its bid(s).

Based on the passage of MACRA, we put forth proposed additions to § 414.412, ''Submission of bids under a competitive bidding program,'' to add a new paragraph (h) that would allow CMS to implement section 1847(a)(1)(G) of the Act, as amended by section 522(a) of MACRA, to state that an entity may not submit a bid for a CBA unless, as of the deadline for bid submission, the entity has obtained a bid surety bond for the CBA.

We are now seeking approval to update our burden estimates to all Forms to account for the consolidation of all rounds in Round 2019. For Round 2019 and the proposed rule, CMS will publish a slightly modified version of Form A so that suppliers will be better able to identify and understand the new requirement related to surety bonds. We have made no changes to Forms B, C, D, Change of Ownership (CHOW) Contract Supplier Notification and Purchaser Forms, and Subcontracting Disclosure Form. However, the burden has been adjusted to account for the increase in the number of respondents due to the consolidation of all CBAs into Round 2019 under this ICR. We intend to continue use of these Forms on an ongoing basis.

Dated: November 10, 2016.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier CMS–10069]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by January 17, 2017.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at *http://www.cms.hhs.gov/PaperworkReductionActof1995.*

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786–1326.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10069 Medicare/Medicaid Demonstration/Model Application

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests

or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Medicare/Medicaid Demonstration/Model Application; *Use:* The application is used for solicitation of proposals that are either congressionally mandated or Administration high priority demonstration initiatives which would be used to strengthen and modernize the Medicare and/or Medicaid programs. The standardized proposal format is not controversial and will reduce burden on applicants and reviewers. Responses are strictly voluntary. The standard format will enable CMS to select proposals that meet CMS objectives and show the best potential for success. *Form Number:* CMS–10069 (OMB control number: 0938–0880); *Frequency:* Once; *Affected Public:* Private sector—Business or other for-profits and Not-for-profit institutions; *Number of Respondents:* 75; *Total Annual Responses:* 75; *Total Annual Hours:* 6,000. (For policy questions regarding this collection contact John Amoh at 410–786–4910).

Dated: November 10, 2016.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Government-Owned Invention; Availability for Licensing

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The invention listed below is owned by an agency of the U.S. Government and is available for licensing in the U.S. to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

FOR FURTHER INFORMATION CONTACT: Licensing information may be obtained by communicating with the indicated licensing contact at the Technology Transfer and Intellectual Property Office, National Institute of Allergy and Infectious Diseases, 5601 Fishers Lane, Rockville, MD 20852; tel. 301–496–2644. A signed Confidential Disclosure Agreement will be required to receive copies of unpublished scientific data.

SUPPLEMENTARY INFORMATION: Technology description follows.

Polyvalent Influenza Virus-Like Particles (VLPs) and Use as Vaccines

Description of Technology: This virus-like particle (VLP) vaccine technology for influenza viruses, based on a mixture of VLPs expressing the hemagglutinin protein or the neuraminidase protein from influenza virus strains belonging to different virus subtypes, has demonstrated broad protection against lethal challenge in mice with various influenza virus strains and virus subtypes. Results from ferret and mouse studies demonstrate broad heterosubtypic protection against various influenza virus subtypes further supporting and strengthening the proposed application of this technology as a universal influenza virus vaccine.

This technology is available for licensing for commercial development in accordance with 35 U.S.C. 209 and 37 CFR part 404, as well as for further development and evaluation under a research collaboration.

Potential Commercial Applications:

- Vaccines

Competitive Advantages:

- Broad/universal protection against influenza viruses
- does not require reformulating vaccine each year as is currently necessary with vaccines available on the market
- can potentially provide protection against novel influenza viruses that may arise in the future, including potentially pandemic influenza viruses

Inventors: Dr. Jeffery Taubenberger of NIAID.

Publications: Schwartzman, et al. An Intranasal Virus-Like Particle Vaccine Broadly Protects Mice from Multiple Subtypes of Influenza A Virus. 2015. MBio. 6(4): e01044–15.

Intellectual Property: HHS Reference No. E–195–2014, U.S. Provisional Application No. 62/014,814; PCT/US2015/029843.

Licensing Contact: Dr. Jenish Patel, (240) 669–2894, *jenish.patel@nih.gov*.

Collaborative Research Opportunity: The National Institute of Allergy and Infectious Diseases is seeking statements of capability or interest from parties interested in collaborative research to further develop, evaluate or commercialize this invention, especially for GMP manufacture and clinical evaluation. For collaboration opportunities, please contact Dr. Jenish Patel, (240) 669–2894, *jenish.patel@nih.gov*.

Dated: November 14, 2016.

Suzanne Frisbie,

Deputy Director, Technology Transfer and Intellectual Property Office, National Institute of Allergy and Infectious Diseases.

Government-Owned Inventions; Availability for Licensing and/or Co-Development

AGENCY: National Institutes of Health. HHS.

ACTION: Notice.

SUMMARY: The invention listed below is owned by an agency of the U.S. Government and is available for licensing and/or co-development in the U.S. to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing and/or co-development.

ADDRESSES: Invention Development and Marketing Unit, Technology Transfer Center, National Cancer Institute, 9609 Medical Center Drive, Mail Stop 9702, Rockville, MD 20850–9702.

FOR FURTHER INFORMATION CONTACT: Information on licensing and co-development research collaborations, and copies of the U.S. patent applications listed below may be obtained by contacting: Attn. Invention Development and Marketing Unit, Technology Transfer Center, National Cancer Institute, 9609 Medical Center Drive, Mail Stop 9702, Rockville, MD, 20850–9702, Tel. 240–276–5515 or email *ncitechtransfer@mail.nih.gov.* A signed Confidential Disclosure Agreement may be required to receive copies of the patent applications.

SUPPLEMENTARY INFORMATION: Technology description follows.

Title of invention: Gene Signature Predictive of Hepatocellular Carcinoma Response to Transcatheter Arterial Chemoembolization (TACE).

Keywords: Diagnostic, Biomarker, Prognostic, Hepatocellular Carcinoma, Patient Stratification, TACE, HCC.

Description of Technology: Hepatocellular Carcinoma (HCC) is one of the most common cancers worldwide with largely unfavorable outcomes due to a lack of effective treatment options for patients in the later state of disease. The gold standard of care for HCC patients with intermediate to locally advanced tumors is transcatheter arterial chemoembolization (TACE), a procedure whereby the tumor is targeted both with local chemotherapy and restriction of local blood supply. TACE procedures are often not effective, however, and a need exists to identify patients that will respond to TACE.

Scientists in NCI's Laboratory of Human Carcinogenesis have identified a 14-gene signature that is predictive of response to TACE. The ''TACE Navigator Gene Signature Assay,'' based on a Nanostring Technologies platform, is useful in identifying those HCC patients, prior to treatment, who will respond to and have the greatest survival benefit following TACE. The signature can also identify patients who need additional/alternative therapeutic modalities.

This invention is owned by an agency of the U.S. Government and is available for licensing and/or co-development in the U.S., in accordance with 35 U.S.C. 209 and 37 CFR part 404, to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing and/or co-development.

Potential Commercial Applications:

- Prognostic test for HCC patient response to TACE procedure
- Companion diagnostic for TACE procedure

Value Proposition:

- First in class prognostic diagnostic for frontline therapy in highly prevalent HCC

Development Stage: Basic (Target ID).

Inventor(s): Xin Wei Wang, Ph.D. and Valerie Miller, Ph.D. (NCI).

Intellectual Property:

HHS Reference No. E–101–2016

U.S. Provisional Application 62/292,789 (HHS Reference No. E–101–2016/0–US–01) filed February 8, 2016 entitled ''Gene Signature Predictive of Hepatocellular Carcinoma Response to Transcatheter Arterial Chemoembolization (TACE)''

Related Technologies: NIH Reference No. E–024–2009 entitled ''Gene Signature for Predicting Solid Tumors Patient Response''.

Collaboration Opportunity: Researchers at the NCI seek licensing and/or co-development research collaborations for the commercialization of a companion diagnostic for HCC patients undergoing TACE procedures.

BILLING CODE 4140–01–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–R1–ES–2016–N185; FXES11120100000–167–FF01E00000]

Final Habitat Conservation Plan and Supplemental Final Environmental Impact Statement; Na Pua Makani Wind Energy Project, Oahu, Hawaii

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; notice of permit application; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), received an incidental take permit application from Na Pua Makani Power Partners, LLC, pursuant to the Endangered Species Act of 1973, as amended (ESA). The requested permit would authorize the take of one threatened and six endangered species caused by covered activities associated with a wind energy generation project on the island of Oahu, Hawaii. The permit application included the proposed Na Pua Makani Wind Energy Project Habitat Conservation Plan (HCP), which described the activities that may result in the incidental taking of listed species, and the measures the applicant will take to minimize, mitigate, and monitor for adverse impacts to the covered species. The applicant modified the proposed action in the HCP in response to public comments and the modified HCP is available for public review pursuant to this notice. The Service also announces the availability of a Supplemental Final Environmental Impact Statement (SEIS) addressing the modified proposed action in accordance with the requirements of the National Environmental Policy Act of 1969 (NEPA). If issued, the ITP would authorize incidental take of the covered species that may occur as a result of the construction and operation of the Na Pua Makani Wind Energy Project (Project) over a 21-year period. We are making the permit application package, including the modified HCP and SEIS, available for public review and comment.

DATES: To ensure consideration, written comments must be received from interested parties no later than December 19, 2016.

The Service's decision on issuance of an ITP will occur no sooner than 30 days after the publication of the U.S. Environmental Protection Agency's notice of the SEIS in the **Federal Register** and will be documented in a Record of Decision (ROD). (For information about the EPA notice, see The Environmental Protection Agency's Role in the EIS Process under **SUPPLEMENTARY INFORMATION**.)

ADDRESSES: To request further information or submit written comments, please use one of the following methods, and note that your information request or comments are in reference to the Na Pua Makani Wind Energy Project HCP.

- *U.S. Mail:* You may obtain a compact disk with electronic copies of these documents by writing to Mary Abrams, Field Supervisor; U.S. Fish and Wildlife Service; Pacific Islands Fish and Wildlife Office; 300 Ala Moana Boulevard, Room 3–122; Honolulu, HI 96850.
- *Telephone:* Call 808–792–9400 during regular business hours.

FOR FURTHER INFORMATION CONTACT: Ms. Jodi Charrier or Mr. Aaron Nadig, U.S. Fish and Wildlife Service (see **ADDRESSES**); by telephone 808–792–9400; or by email at *NaPuaMakanihcp@fws.gov.* If you use a telecommunications device for the deaf, please call the Federal Relay Service at 800–877–8339.

SUPPLEMENTARY INFORMATION: The Na Pua Makani Power Partners, LLC (applicant) a subsidiary of Champlin Hawaii Wind Holdings, LLC, is requesting an ITP for a 21-year permit term to authorize take of the threatened Newell's shearwater (*Puffinus newelli*), and the endangered Hawaiian stilt (*Himantopus mexicanus knudseni*), Hawaiian coot (*Fulica americana alai*), Hawaiian moorhen, (*Gallinula chloropus sandvicensis*), Hawaiian duck (*Anas wyvilliana*), Hawaiian goose (*Branta sandvicensis*), and Hawaiian hoary bat (*Lasiurus cinereus semotus*) that may occur as a result of the construction and operation of the project. Based on a public comment, the applicant modified its HCP to reduce the maximum number of wind turbines that could be built from ten to nine. The modified HCP also provides for an increase in the maximum size of those turbines to maintain the same generating capacity. The Service is providing an opportunity for the public to review and comment on this modified HCP. The Service has also prepared the SEIS and is providing an additional opportunity for public review and comment on the modified proposed action option (the refined Project design with fewer but larger wind turbines).

Background

The applicant proposes to construct and operate the wind energy generation project on approximately 707 acres of public and private lands near the town of Kahuku on the island of Oahu, Hawaii. The proposed project, as modified, would have a generating capacity of up to approximately 25 megawatts (MW) and would supply wind-generated electricity to the Hawaii Electric Company. The project would consist of up to nine wind turbine generators (WTG), one permanent unguyed lattice-frame meteorological tower, up to 4.9 miles of new and existing access roads, an operations and maintenance facility, electrical collection and interconnection infrastructure, an electrical substation, and a temporary laydown area. The applicant is considering a variety of WTG models, each ranging from 427 feet to 656 feet in height, and having up to 3.3 MW of generating capacity. The applicant would select the most appropriate WTG models prior to construction. The SEIS analyzes whether there would be any different impacts to the covered species and other environmental resources from the modified proposed action.

To offset anticipated take associated with construction and operation of the project over a period of 21 years, the applicant is proposing mitigation measures on Oahu that include: (1) Funding research to support effective management of Newell's shearwaters; (2) fencing and predator control to conserve the Hawaiian goose at James Campbell National Wildlife Refuge; (3) a combination of bat research and native forest restoration and management to increase Hawaiian hoary bat habitat; (4) acoustic surveys to document occupancy of the affected area by the Hawaiian hoary bat; and (5) fencing and public outreach at Hamakua Marsh to benefit conservation of the Hawaiian stilt, Hawaiian coot, Hawaiian moorhen, and Hawaiian duck.

National Environmental Policy Act Compliance

The development of the HCP and the proposed issuance of an ITP under this plan are Federal actions that trigger the need for compliance with NEPA (42 U.S.C. 4321 *et seq.*). The DEIS included three alternatives: No-action (alternative 1), proposed action (alternative 2), and a larger wind energy generation project alternative (alternative 3). The option of fewer but larger turbines was not considered in the DEIS. In response to a comment suggesting consideration of an alternative with fewer turbines, we included a modified proposed action in the FEIS as alternative 2a.

Under the no-action alternative, the proposed project would not be constructed, the proposed HCP would not be implemented, and no ITP would be issued. The proposed action alternative is construction and operation of the project, consisting of between 8 and 10 wind turbines, implementation of the HCP, and issuance of the ITP. In response to public comments on the draft EIS related to visual impacts and consideration of fewer turbines with larger generating capacities, a modified proposed action option with a reduced maximum number of turbines consisting of only nine turbines with larger generating capacities and taller dimensions was added to the final EIS. The modified proposed action option also includes implementation of the HCP and issuance of the ITP. The larger wind energy generation project alternative would include the construction and operation of a larger generation facility of up to 42 MW. This alternative would consist of up to 12 WTGs, each with a generating capacity of up to 3.3 MW, implementation of an HCP, and issuance of the ITP.

In accordance with NEPA (40 CFR 1502.14(e)), the Service has identified the proposed action (alternative 2) including the modified proposed action option (alternative 2a) as the preferred alternative. Under NEPA, the ''agency's preferred alternative'' is a preliminary indication of the Federal responsible official's preference of action, which is chosen from among the alternatives analyzed in an EIS. It is the alternative which the agency believes would fulfill its statutory mission and responsibilities, giving consideration to economic, environmental, technical and other factors (43 CFR 46.420(d)). The preferred alternative is not a final agency decision; rather, it is an indication of the agency's preference. The final agency decision is presented in the Record of Decision.

Based on input from the public, the Service has concluded that providing an additional opportunity for public review of the modified HCP and SEIS would further the purposes of the ESA and NEPA. The SEIS provides the public with an opportunity to review and comment on the effects of the Modified Proposed Action Alternative (the refined project design with fewer but larger wind turbines). Clarification on the following topics is also included in the SEIS:

- The effect of the modified proposed action option on estimates of incidental take of threatened and endangered species (see SEIS Section 4.11—Threatened and Endangered Species);
- Traffic and associated impacts along the Kahuku Agricultural Park Interior Roadway, accessing the DLNR portion of the wind farm site (see SEIS Section 4.17—Traffic); and
- Best available science regarding wind turbines and public health (see SEIS Section 4.18—Public Health and Safety).

The Environmental Protection Agency's Role in the EIS Process

The Environmental Protection Agency (EPA) is charged under section 309 of the Clean Air Act to review all Federal agencies' EISs and to comment on the adequacy and the acceptability of the environmental impacts of proposed actions described in the EISs.

EPA also serves as the repository (EIS database) for EISs prepared by Federal agencies and provides notice of their availability in the **Federal Register**. The EIS database provides information about EISs prepared by Federal agencies, as well as EPA's comments concerning the EISs. All EISs are filed with EPA, which publishes a notice of availability on Fridays in the **Federal Register**.

For more information, see *http://www.epa.gov/compliance/nepa/eisdata.html.* You may search for EPA comments on EISs, along with the EISs themselves, at *https://*

cdxnodengn.epa.gov/cdx-enepa-public/action/eis/search.

Public Involvement

The draft EIS began as a joint document between the Service and The State of Hawaii's Department of Land and Natural Resources (DLNR). Due to differences in procedural requirements, the environmental process diverged after the draft EIS was published and the project incorporated the modified proposed action alternative.

In May of 2013, the applicant began holding community meetings, small focus group meetings with stakeholders, and individual meetings with community leaders and legislators to discuss the proposed project and engage the public in the project's planning and design.

On November 5, 2013, the Service published a notice of intent (NOI) to prepare a draft EIS in the **Federal Register** (78 FR 66377). The NOI also announced a public scoping period (November 5 to December 5, 2013), during which we invited interested parties to provide written comments related to the proposal. A public scoping meeting was held in Kahuku, Hawaii, on November 13, 2013, in accordance with NEPA (40 CFR 1501.7).

Utilizing public scoping comments, we prepared a draft EIS to analyze the effects of project alternatives on the human environment. The Service published a notice of availability (NOA) of the draft EIS in the **Federal Register** on June 12, 2015 (80 FR 33535), opening a 60-day public comment period. The Service also posted the **Federal Register** NOA, Notice of Public Scoping Meeting, draft HCP, draft EIS, and a news release on their Web site at *http://www.fws.gov/pacificislands/.* A public open-house meeting was held on June 23, 2015, in Kahuku, Hawaii, to solicit additional input from the public on the draft EIS and draft HCP. A total of 90 comment letters and emails were received from the public. The official comment period ended on August 11, 2015. The NOA of the final EIS and final HCP was published in the **Federal Register** by the Service on July 12, 2016 (81 FR 45174–45176), initiating a 30-day waiting period.

The State of Hawaii's environmental impact statement preparation notice (EISPN) was distributed to interested parties for review between December 23, 2013, and January 23, 2014, and again between November 8 and December 8, 2014 (republished to reflect the addition of a second access into the project site). During the initial public scoping period for the EISPN, three public scoping meetings were held at Kahuku Community Center: On November 13, 2013, January 10, 2014, and November 19, 2014. In addition to the public meetings, a media advisory was sent out prior to each meeting. DLNR hosted a public hearing at the Kahuku Community Center on June 4, 2015. The draft EIS was published in the State of Hawaii Office of Environmental Quality Control's *The Environmental Notice* on June 8, 2015, in accordance with requirements set forth under the Hawaii Environmental Policy Act (HRS § 343–3). Public comments were accepted during the 45-day State public comment period. On April 23, 2016, DLNR published a second draft EIS with an additional 45-day State public comment period to address the modified proposed action option. The Board of Land and Natural Resources published acceptance of the final EIS in *The Environmental Notice* on August 8, 2016, which initiated a 60-day legal challenge period that ended on October 8, 2016.

Next Steps

We will evaluate the permit application, associated documents, and public comments in reaching a final decision on whether the application meets the requirements of section 10(a) of the ESA (16 U.S.C. 1531 *et seq.*). We will evaluate whether the proposed permit action would comply with section 7 of the ESA by conducting an intra-Service section 7 consultation on the proposed permit action. We will use the results of this consultation, in combination with the above findings, in our final analysis to determine whether or not to issue an incidental take permit. If the requirements are met, we will issue the permit to the applicant. We will issue a Record of Decision and issue or deny the permit no sooner than 30 days after publication of the U.S. Environmental Protection Agency's notice of availability of the SEIS.

Authority

We provide this notice in accordance with the requirements of section 10(c) of the ESA and its implementing regulations (50 CFR 17.22 and 17.32), and NEPA and its implementing regulations (40 CFR 1506.6).

Theresa Rabot,

Deputy Regional Director, Pacific Region, U.S. Fish and Wildlife Service, Portland, Oregon.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–HQ–MB–2016–N201; FF09M21200–167–FXMB1231099BPP0]

Proposed Information Collection; Approval Procedures for Nontoxic Shot and Shot Coatings

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (U.S. Fish and Wildlife Service) will ask the Office of Management and Budget (OMB) to approve the information collection (IC) described below. As required by the Paperwork Reduction Act of 1995 and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this IC. This IC is scheduled to expire on January 31, 2017. We may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: To ensure that we are able to consider your comments on this IC, we must receive them by January 17, 2017.

ADDRESSES: Send your comments on the IC to the Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS BPHC, 5275 Leesburg Pike, Falls Church, VA 22041–3803 (mail); or *tina_campbell@fws.gov* (email). Please include ''1018–0067'' in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this IC, contact Tina Campbell at *Tina_Campbell@fws.gov* (email) or 703–358–2676 (telephone).

SUPPLEMENTARY INFORMATION:

I. Abstract

The Migratory Bird Treaty Act (16 U.S.C. 703 *et seq.*) prohibits the unauthorized take of migratory birds and authorizes the Secretary of the Interior to regulate take of migratory birds in the United States. Under this authority, we control the hunting of migratory game birds through regulations in 50 CFR part 20. On January 1, 1991, we banned the use of lead shot for hunting waterfowl and coots in the United States.

The regulations at 50 CFR 20.134 outline the application and approval processes for new types of nontoxic shot. When considering approval of a candidate material as nontoxic, we must ensure that it is not hazardous in the

environment and that secondary exposure (ingestion of spent shot or its components) is not a hazard to migratory birds. To make that decision, we require each applicant to provide information about the solubility and toxicity of the candidate material. Additionally, for law enforcement purposes, a noninvasive field detection device must be available to distinguish candidate shot from lead shot. This information constitutes the bulk of an application for approval of nontoxic shot. The Director of the U.S. Fish and Wildlife Service uses the data in the application to decide whether or not to approve a material as nontoxic.

II. Data

OMB Control Number: 1018–0067.

Title: Approval Procedures for Nontoxic Shot and Shot Coatings, 50 CFR 20.134.

Service Form Number: None.

Type of Request: Extension of a previously approved collection.

Description of Respondents: Businesses that produce and/or market approved nontoxic shot types or nontoxic shot coatings.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: On occasion.

Estimated Number of Annual Responses: 1.

Estimated Completion Time per Response (Hours): 3,200.

Estimated Number of Annual Burden Hours: 3,200.

Estimated Nonhour Cost Burden: $25,000.

III. Comments

We invite comments concerning this information collection on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this IC. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: November 12, 2016.

Tina A. Campbell,

Chief, Division of Policy, Performance, and Management Programs, U.S. Fish and Wildlife Service.

BILLING CODE 4333–55–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLMTC 00900.L16100000.DP0000 #MO4500101745]

Notice of Public Meeting, Eastern Montana Resource Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act (FLPMA) and the Federal Advisory Committee Act of 1972 (FACA), the U.S. Department of the Interior, Bureau of Land Management (BLM) Eastern Montana Resource Advisory Council (RAC) will meet as indicated below.

DATES: The Eastern Montana Resource Advisory Council meeting will be held on December 15, 2016, in Miles City, Montana. When determined, the meeting location and times will be announced in a news release.

FOR FURTHER INFORMATION CONTACT: Mark Jacobsen, Public Affairs Specialist, BLM Eastern Montana/Dakotas District, 111 Garryowen Road, Miles City, Montana 59301; (406) 233–2831; *mjacobse@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–677–8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The 15-member council advises the Secretary of the Interior through the BLM on a variety of planning and management issues associated with public land management in eastern Montana. At this meeting, topics will include: An Eastern Montana/Dakotas District report, Billing Field Office and Miles City Field Office manager reports, a travel management, recreation planning, individual RAC member reports and other issues the council may raise. All meetings are open to the public and the public may present written comments to the council. Each formal RAC meeting will have time allocated for hearing public comments. Depending on the number of persons wishing to comment and time available, the time for individual oral comments may be limited. Individuals who plan to attend and need special assistance, such as sign language interpretation, tour transportation or other reasonable accommodations should contact the BLM as provided above.

Authority: 43 CFR 1784.4–2.

Cornelia Hudson,

Acting, Eastern Montana/Dakotas District Manager.

BILLING CODE 4310–DN–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–965]

Certain Table Saws Incorporating Active Injury Mitigation Technology and Components Thereof; Commission Determination Not To Review a Final Initial Determination Finding a Violation of Section 337; Schedule for Briefing on Remedy, the Public Interest, and Bonding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review a final initial determination (''ID'') issued by the presiding administrative law judge (''ALJ''), finding a violation of section 337 of the Tariff Act of 1930, as amended. The Commission has also set a schedule for briefing on remedy, the public interest, and bonding.

FOR FURTHER INFORMATION CONTACT: Robert Needham, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 708–5468. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General

information concerning the Commission may also be obtained by accessing its Internet server (*https://www.usitc.gov*). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on September 1, 2015, based on a complaint filed by SawStop, LLC, and SD3, LLC (together, ''SawStop''). 80 FR 52791–92 (Sept. 1, 2015). The amended complaint alleged violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain table saws incorporating active injury mitigation technology and components thereof by reason of infringement of certain claims of United States Patent Nos. 7,225,712 (''the '712 patent''); 7,600,455 (''the '455 patent''); 7,610,836 (''the '836 patent''); 7,895,927 (''the '927 patent''); 8,011,279 (''the '279 patent''); and 8,191,450 (''the '450 patent''). The notice of investigation named as respondents Robert Bosch Tool Corp. of Mount Prospect, Illinois, and Robert Bosch GmbH of Baden-Wuerttemberg, Germany (together, ''Bosch''). *Id.* at 52792. The Office of Unfair Import Investigations is not a party to the investigation. *Id.*

The Commission terminated the investigation with respect to the '836 and '450 patents based on SawStop's withdrawal of allegations concerning those patents. Order No. 8 (Mar. 10, 2016), *not reviewed,* Notice (Apr. 4, 2016); Order No. 13 (May 3, 2016), *not reviewed,* Notice (May 23, 2016).

On January 27, 2016, SawStop moved for a summary determination that it satisfied the economic prong of the domestic industry requirement. On February 8, 2016, Bosch indicated that it did not oppose the motion. On March 22, 2016, the ALJ granted the unopposed motion and determined that SawStop satisfied the economic prong of the domestic industry requirement. Order No. 10 (Mar. 22, 2016), *not reviewed,* Notice (Apr. 21, 2016).

On September 9, 2016, the ALJ issued his final initial determination finding a violation of section 337 with respect to the '927 and '279 patents, and no violation of section 337 with respect to the '712 and '455 patents. Specifically, he found that Bosch did not directly or contributorily infringe the '712 and '455 patents, but found that Bosch's REAXX table saw directly infringed the '927 and '279 patents and that Bosch's activation cartridges contributorily infringed the '927 and '279 patents. He also found that Bosch had failed to show that any of the patent claims were invalid, and that SawStop satisfied the domestic industry requirement with respect to all four patents. Based on these findings, the ALJ recommended that a limited exclusion order issue against Bosch, that a cease and desist order issue against Robert Bosch Tool Corp., and that the bond during the period of Presidential review be set at zero percent. He also recommended that the scope of the exclusion order and cease and desist order specifically cover the contributorily infringing activation cartridges.

On September 26, 2016, SawStop and Bosch each petitioned for review of the ID. On October 4, 2016, the parties opposed each other's petitions. Having examined the record of this investigation, including the ALJ's final ID, the petitions for review, and the responses thereto, the Commission has determined not to review the final ID.

In connection with the final disposition of this investigation, the Commission may (1) issue an order that could result in the exclusion of the subject articles from entry into the United States, and/or (2) issue a cease and desist order that could result in the respondent being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered. If a party seeks exclusion of an article from entry into the United States for purposes other than entry for consumption, the party should so indicate and provide information establishing that activities involving other types of entry either are adversely affecting it or likely to do so. For background, *see Certain Devices for Connecting Computers via Telephone Lines,* Inv. No. 337–TA–360, USITC Pub. No. 2843 (December 1994) (Commission Opinion).

If the Commission contemplates some form of remedy, it must consider the effects of that remedy upon the public interest. The factors the Commission will consider include the effect that an exclusion order and/or a cease and desist order would have on (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) U.S. production of articles that are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation. The Commission is particularly interested in briefing on the following issues:

1. The parties dispute whether SawStop would be able to satisfy the market demand for table saws with active injury mitigation technology if the Commission issues a remedy against Bosch. Please discuss whether SawStop would be able to satisfy that demand quantitatively and qualitatively. How could remedial orders be tailored to address any concerns about the ability of SawStop (or other suppliers) to satisfy demand?

2. Bosch requests that any Commission remedial order have a service and repair provision allowing Bosch to import and sell replacement parts, including its activation cartridges. Please discuss whether such a provision is appropriate.

If the Commission orders some form of remedy, the U.S. Trade Representative, as delegated by the President, has 60 days to approve or disapprove the Commission's action. *See* Presidential Memorandum of July 21, 2005, 70 FR 43251 (July 26, 2005). During this period, the subject articles would be entitled to enter the United States under bond, in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving submissions concerning the amount of the bond that should be imposed if a remedy is ordered.

Written Submissions: Parties to the investigation, interested government agencies, and any other interested parties are encouraged to file written submissions on the issues of remedy, the public interest, and bonding. Such submissions should address the recommended determination by the ALJ on remedy and bonding, which issued on September 20, 2016. SawStop is also requested to submit proposed remedial orders for the Commission's consideration. SawStop is additionally requested to state the date that the '927 and '279 patents expire, the HTSUS numbers under which the subject articles are imported, and to supply a list of known importers of the subject articles. The written submissions, exclusive of any exhibits, must not exceed 20 pages, and must be filed no later than close of business on November 22, 2016. Reply submissions must not exceed 10 pages, and must be filed no later than the close of business on December 2, 2016. No further submissions on these issues will be

permitted unless otherwise ordered by the Commission.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit 8 true paper copies to the Office of the Secretary by noon the next day pursuant to section 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the investigation number (''Inv. No. 337–TA–965'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, *http://www.usitc.gov/secretary/fed_reg_notices/rules/handbook_on_electronic_filing.pdf*). Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel,[1] solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

[1] All contract personnel will sign appropriate nondisclosure agreements.

Issued: November 10, 2016.

Lisa R. Barton,

Secretary to the Commission.

[FR Doc. 2016–27622 Filed 11–16–16; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Bureau of Alcohol, Tobacco, Firearms and Explosives

[OMB Number 1140–0105]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Request for ATF Background Investigation Information (ATF F 8620.65)

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until January 17, 2017.

FOR FURTHER INFORMATION CONTACT: If you have additional comments, particularly with respect to the estimated public burden or associated response time, have suggestions, need a copy of the proposed information collection instrument with instructions, or desire any additional information, please contact Renee Reid, Chief, Personnel Security Branch, either by mail at Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), Washington, DC 20226, or by email at *Renee.Reid@atf.gov.*

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of this information collection:

1. *Type of Information Collection (check justification or form 83–I):* Extension, without change, of a currently approved collection.

2. *The Title of the Form/Collection:* Request for ATF Background Investigation Information.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:*

Form number (if applicable): ATF F 8620.65

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:*

Primary: State, Local, or Tribal Government.

Other (if applicable): Federal Government.

Abstract: This form is necessary to maintain a record of another agency's official request for an individual's background investigation record. The documented request will assist the ATF in ensuring that unauthorized disclosures of information do no occur.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 300 respondents will utilize the form, and it will take each respondent approximately 5 minutes to complete the form.

6. *An estimate of the total public burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is 25 hours.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., Room 3E–405B, Washington, DC 20530.

Dated: November 14, 2016.

Jerri Murray,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–FY–P

DEPARTMENT OF JUSTICE

Notice of Proposed Administrative Settlement Order on Consent and Bona Fide Prospective Purchaser Agreement

The United States Department of Justice, on behalf of the Environmental Protection Agency (''United States''), proposes to enter into an Administrative Settlement Order on Consent and Bona Fide Prospective Purchaser Agreement (''BFPP Agreement'') with Star Forge, LLC (''Purchaser'') regarding real property located at 8531 East Marginal Way South in Seattle, Washington (the ''Property''). The Property is located in and part of the ''Lower Duwamish Waterway Superfund Site'' (the ''LDW Site''). Under the BFPP Agreement, Purchaser agrees to perform a removal action in accordance with the Comprehensive Environmental Response, Compensation, and Liability Act (''CERCLA''), 42 U.S.C. 9601–9675, at the Property. Additionally, Purchaser agrees to pay $500,000 to an escrow account to be established by Purchaser and dedicated to the ongoing cleanup of the LDW Site.

The proposed BFPP Agreement helps to ensure the timely performance of all response actions EPA has selected for the Property by specifying that the Purchaser cooperate with the United States to satisfy remaining obligations under an existing Administrative Order between EPA, the current owner of the Property (Jorgensen Forge Corporation, in bankruptcy), and an adjoining landowner. The BFPP Agreement also requires Purchaser to institute and abide by appropriate institutional controls at the Property and requires Purchaser to exercise due care in its future operations to ensure that those operations will not exacerbate or contribute to existing contamination.

In exchange, EPA provides the Buyer with a covenant not to sue for response costs, and potential response costs, incurred in connection with existing contamination at the Facility. The BFPP expressly reserves EPA's rights against the Purchaser for any activities that result in new releases of hazardous substances or aggravation of existing contamination at or from the Property. The proposed settlement, including the $500,000 payment, represents fair consideration for the covenant provided to the Purchaser, given the Purchaser's limited potential liability for existing contamination.

The publication of this notice opens a period for public comment on the proposed Administrative Settlement and Bona Fide Prospective Purchaser Agreement. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *In the Matter of Lower Duwamish Waterway Superfund Site, ADMINISTRATIVE SETTLEMENT ORDER ON CONSENT AND BONA FIDE PROSPECTIVE PURCHASER AGREEMENT,* DJ Reference Number 90–11–3–07227/9. All comments must be submitted no later than seven (7) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the proposed Settlement Agreement and Bona Fide Prospective Purchaser Agreement may be examined and downloaded at this Justice Department Web site: *http://www.justice.gov/enrd/consent_decrees.html.* We will provide a paper copy of the Consent Decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $ 5.25 (25 cents per page reproduction cost, excluding attachments) payable to the United States Treasury.

Susan M. Akers,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–16–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree and Proposed First Amendment to Another Consent Decree Under the Clean Air Act

On November 10, 2016, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Northern District of Illinois in the lawsuit entitled *United States* v. *CITGO Petroleum Corp., et al.,* Civil Action No. 16 C 10484. In a related filing, on that same date, the Department of Justice lodged a proposed First Amendment to Consent Decree with the United States District Court for the Southern District of Texas in the lawsuit entitled *United States, et al.* v. *CITGO Petroleum Corp., et al.,* Civil Action No. 4:04–cv–3883.

Under the proposed Consent Decree lodged with the Northern District of Illinois (''Lemont Refinery Consent Decree''), CITGO will install low nitrogen oxide burners on three heaters at one of its refineries in Lemont, Illinois (''Lemont Refinery''); comply with a stringent limit for particulate matter emissions from the Lemont Refinery's fluid catalytic cracking unit; develop and implement operation and maintenance plans to improve operations and prevent violations at the Lemont Refinery's sulfur recovery plant; implement a flare minimization and flare efficiency program; implement an enhanced leak detection and repair program; and use carbon canisters to control benzene emissions from purged process fluids and samples. CITGO also will implement a $650,000 fence line monitoring supplemental environmental project and a $350,000 ''green lighting'' supplemental environmental project at the local school district. As a mitigation project, CITGO will control a benzene waste stream that it is not otherwise required to control at a cost of approximately $1.14 million. CITGO will pay a civil penalty of $1,955,000.

Under the proposed First Amendment to Consent Decree lodged with the Southern District of Texas (''First Amendment''), a consent decree that the Southern District of Texas entered in 2005 (''2005 Consent Decree'') that covered six refineries that CITGO then owned will be amended to terminate all provisions therein related to the Lemont Refinery. CITGO demonstrated to EPA that it had complied with the vast majority of the 2005 Consent Decree provisions related to the Lemont Refinery and CITGO agreed to have the remaining few, outstanding provisions transferred to the new, stand-alone Lemont Refinery Consent Decree filed in the Northern District of Illinois. Under the First Amendment, CITGO will also pay a stipulated penalty of $323,500, split equally between the United States and Illinois, for alleged violations of the 2005 Consent Decree at the Lemont Refinery.

The publication of this notice opens a period for public comment on the Lemont Refinery Consent Decree and

the First Amendment to the 2005 Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States* v. *CITGO Petroleum Corp. et al.,* D.J. Ref. No. 90–5–2–1–07277/4. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the Lemont Refinery Consent Decree and the First Amendment may be examined and downloaded at this Justice Department Web site: *https://www.justice.gov/enrd/consent-decrees.* We will provide a paper copy of the Lemont Refinery Consent Decree and/or the First Amendment to the 2005 Consent Decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

For the Lemont Refinery Consent Decree, please enclose a check or money order for $68.00 (25 cents per page reproduction cost) payable to the United States Treasury. For the First Amendment to the 2005 Consent Decree, please enclose a check or money order for $2.00 (25 cents per page reproduction cost) payable to the United States Treasury. For both, one check or money order in the amount of $70.00 can be enclosed.

Robert D. Brook,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

[Application No. D–11863]

Notice of Proposed Exemption Involving UBS Assets Management (Americas) Inc.; UBS Realty Investors LLC; UBS Hedge Fund Solutions LLC; UBS O'Connor LLC; and Certain Future Affiliates in UBS's Asset Management and Wealth Management Americas Divisions (Collectively, the Applicants or the UBS QPAMs) Located in Chicago, Illinois; Hartford, Connecticut; New York, New York; and Chicago, Illinois, Respectively

AGENCY: Employee Benefits Security Administration, U.S. Department of Labor.

ACTION: Notice of Proposed Temporary Exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed temporary individual exemption from certain prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974, as amended (ERISA), and the Internal Revenue Code of 1986, as amended (the Code). The proposed temporary exemption, if granted, would affect the ability of certain entities with specified relationships to UBS AG (UBS) to continue to rely upon the relief provided by Prohibited Transaction Class Exemption 84–14.

DATES: This proposed temporary exemption will be effective for the period beginning on the Conviction Date, and ending on the earlier of: The date that is twelve months following the Conviction Date; or the effective date of a final agency action made by the Department in connection with Exemption Application No. D–11907, an application for long-term exemptive relief for the covered transactions described herein.

Written comments and requests for a public hearing on the proposed exemption should be submitted to the Department within five days from the date of publication of this **Federal Register** Notice. Given the short comment period, the Department will consider comments received after such date, in connection with its consideration of more permanent relief.

ADDRESSES: Comments should state the nature of the person's interest in the proposed exemption and the manner in which the person would be adversely affected by the exemption, if granted. A request for a hearing can be requested by any interested person who may be adversely affected by an exemption. A request for a hearing must state: (1) The name, address, telephone number, and email address of the person making the request; (2) the nature of the person's interest in the exemption and the manner in which the person would be adversely affected by the exemption; and (3) a statement of the issues to be addressed and a general description of the evidence to be presented at the hearing. The Department will grant a request for a hearing made in accordance with the requirements above where a hearing is necessary to fully explore material factual issues identified by the person requesting the hearing. A notice of such hearing shall be published by the Department in the **Federal Register**. The Department may decline to hold a hearing where: (1) The request for the hearing does not meet the requirements above; (2) the only issues identified for exploration at the hearing are matters of law; or (3) the factual issues identified can be fully explored through the submission of evidence in written (including electronic) form.

All written comments and requests for a public hearing concerning the proposed exemption should be directed to the following addresses: Office of Exemption Determinations, Employee Benefits Security Administration, Suite 400, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, Attention: Application No. D–11863. Interested persons may also submit comments and/or hearing requests to EBSA via email to *moffitt.betty@dol.gov,* by FAX to (202) 219–0204, or online through *http://www.regulations.gov.* Any such comments or requests should be sent by the end of the scheduled comment period. The application for exemption and the comments received will be available for public inspection in the Public Disclosure Room of the Employee Benefits Security Administration, U.S. Department of Labor, Room N–1515, 200 Constitution Avenue NW., Washington, DC 20210.

Warning: All comments and hearing requests received will be included in the public record without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be confidential or other information whose disclosure is restricted by statute. If you submit a comment, EBSA recommends that you include your name and other contact information in the body of your

comment, but DO NOT submit information that you consider to be confidential, or otherwise protected (such as Social Security number or an unlisted phone number) or confidential business information that you do not want publicly disclosed. However, if EBSA cannot read your comment due to technical difficulties and cannot contact you for clarification, EBSA might not be able to consider your comment. Additionally, the *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EBSA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email directly to EBSA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public record and made available on the Internet.

FOR FURTHER INFORMATION CONTACT: Mr. Brian Mica of the Department, telephone (202) 693–8402. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The Department is publishing this proposed temporary exemption in order to protect ERISA-covered plans and IRAs from certain costs and/or investment losses for up to one year, that may arise to the extent entities with a corporate relationship to UBS lose their ability to rely on PTE 84–14 as of the Conviction Date, as described below. Elsewhere in the **Federal Register**, the Department is also proposing a five-year proposed exemption, Exemption Application No. D–11907 that would provide the same relief that is described herein, but for a longer effective period. The five-year proposed exemption is subject to enhanced conditions and a longer comment period. Comments received in response to this proposed temporary exemption will be considered in connection with the Department's determination whether or not to grant such five-year exemption.

This proposed temporary exemption would provide relief from certain of the restrictions set forth in sections 406 and 407 of ERISA. If granted, no relief from a violation of any other law would be provided by this proposed temporary exemption.

Furthermore, the Department cautions that the relief in this proposed temporary exemption would terminate immediately if, among other things, an entity within the UBS corporate structure is convicted of a crime described in Section I(g) of PTE 84–14 (other than the Convictions described below) during the effective period of the proposed temporary exemption, if granted. While such an entity could apply for a new exemption in that circumstance, the Department would not be obligated to grant the exemption. The terms of this proposed temporary exemption have been specifically designed to permit plans to terminate their relationships in an orderly and cost effective fashion in the event of an additional conviction or a determination that it is otherwise prudent for a plan to terminate its relationship with an entity covered by the proposed temporary exemption.

The proposed temporary exemption has been requested by the Applicants pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637, 66644, October 27, 2011). Effective December 31, 1978, section 102 of the Reorganization Plan No. 4 of 1978, 5 U.S.C. App. 1 (1996), transferred the authority of the Secretary of the Treasury to issue administrative exemptions under section 4975(c)(2) of the Code to the Secretary of Labor. Accordingly, this notice of proposed exemption is being issued solely by the Department.

Summary of Facts and Representations [1]

The Applicants

1. UBS AG (UBS) is a Swiss-based global financial services company organized under the laws of Switzerland. UBS has banking divisions and subsidiaries throughout the world, with its United States headquarters located in New York, New York and Stamford, Connecticut. UBS and its affiliates employ approximately 20,000 people in the United States.

2. The operational structure of UBS and its affiliates (collectively, the UBS Group) consists of a Corporate Center function and five business divisions: Wealth Management; Wealth Management Americas; Retail & Corporate; Asset Management; and the Investment Bank.

3. *LIBOR NPA.* On December 18, 2012, UBS and the United States Department of Justice (DOJ) entered into a Non-Prosecution Agreement (the LIBOR NPA) related to UBS's misconduct and involving its submission of Yen London Interbank Offer Rate (Yen LIBOR) rates and other benchmark rates between 2001 and 2010. In exchange for UBS promising, among other things, not to commit any crime in violation of U.S. laws for a period of two years from the date of the LIBOR NPA, DOJ agreed that it would not prosecute UBS for any crimes related to the submission of Yen LIBOR rates and other benchmark rates. For its part, UBS agreed to, among other things: (i) Pay a monetary penalty of $500,000,000; and (ii) take steps to further strengthen its internal controls, as required by certain other U.S. and non-U.S. regulatory agencies that had addressed the misconduct described in the LIBOR NPA. Such requirements include those imposed by the United States Commodity Futures Trading Commission's (CFTC) order dated December 19, 2012 (the CFTC Order) which requires UBS to comply with significant auditing and monitoring conditions that set standards for submissions related to interest rate benchmarks such as LIBOR, qualifications of submitters and supervisors, documentation, training, and firewalls. Under the CFTC Order, UBS must maintain monitoring systems or electronic exception reporting systems that identify possible improper or unsubstantiated submissions. The CFTC Order requires UBS to conduct internal audits of reasonable and random samples of its submissions every six months. Additionally, UBS must retain an independent, third-party auditor to conduct a yearly audit of the submission process for five years and a copy of the report must be provided to the CFTC. Furthermore, the Japanese Financial Service Authority's (JFSA) Business Improvement Order dated December 16, 2011 requires UBS Securities Japan to (i) develop a plan to ensure compliance with its legal and regulatory obligations and to establish a control framework that is designed to prevent recurrences of the fraudulent submissions for benchmark interest rates; and (ii) provide periodic written reports to the JFSA regarding UBS Securities Japan's implementation of the measures required by the order.

4. *2013 Conviction.* Although UBS, the parent entity, was not criminally charged in connection with the submission of benchmark rates when it entered into the LIBOR NPA, UBS Securities Japan Co. Ltd. (UBS Securities Japan), a wholly-owned subsidiary of UBS incorporated under the laws of Japan, pled guilty on December 19, 2012, to one count of wire fraud in violation of Title 18, United Sates Code, sections 1343 and 2. UBS Securities Japan's guilty plea arose out of its fraudulent submission of Yen

[1] The Summary of Facts and Representations is based on the Applicants' representations, unless indicated otherwise.

LIBOR rates between 2006 and 2009,[2] and its participation in a scheme to defraud counterparties to interest rate derivatives trades executed on its behalf, by secretly manipulating certain benchmark interest rates, namely Yen LIBOR and the Euroyen Tokyo InterBank Offered Rate (EuroYen TIBOR), to which the profitability of those trades was tied. On September 18, 2013 (the 2013 Conviction Date), UBS Securities Japan was sentenced by the United States District Court for the District of Connecticut (the 2013 Conviction).[3]

5. *FX Misconduct and Breach of LIBOR NPA.* At approximately the same time, the DOJ was conducting an investigation of several multi-national banks, including UBS, in connection with the reported manipulation of the foreign exchange (FX) markets. The DOJ determined, among other things, that UBS had engaged in deceptive currency trading and sales practices in conducting certain FX market transactions, as well as collusive conduct in certain FX markets. The DOJ did not file separate charges in connection with the FX-related misconduct, but instead determined that the LIBOR NPA had been breached. The DOJ terminated the LIBOR NPA and filed a one-count criminal information (the Information), Case Number 3:15–cr–00076–RNC, in the U.S. District Court for the District of Connecticut. The Information charged that, on or about June 29, 2009, in furtherance of a scheme to defraud counterparties to interest rate derivatives transactions UBS transmitted or caused the transmission of electronic communications in interstate and foreign commerce, in violation of Title 18, United States Code, Sections 1343 and 2.

6. *2016 Conviction.* UBS entered into a Plea Agreement with the DOJ dated May 20, 2015 (the Plea Agreement), pleading guilty to the charges in the Information, and agreeing to pay a $203,000,000 criminal penalty.[4] In addition, UBS agreed not to commit another federal crime during a three year probation period; to continue to implement a compliance program designed to prevent and detect, or otherwise remedy, conduct that led to the LIBOR NPA; and to provide annual reports to the probation officer and the DOJ on its progress in implementing the program. UBS also agreed to continue to strengthen its compliance program and internal controls as required by: The U.S. Commodity Futures Trading Commission (CFTC); the United Kingdom's Financial Conduct Authority (UK FCA); the Swiss Financial Market Supervisory Authority (FINMA); and any other regulatory enforcement agency, in connection with resolutions involving conduct in FX markets or conduct related to benchmark rates. UBS must provide information regarding its compliance programs to the probation officer, upon request. A judgment of conviction (the 2016 Conviction) against UBS in Case Number 3:15–cr–00076–RNC is scheduled to be entered in the U.S. District Court for the District of Connecticut on or about November 29, 2016.

PTE 84–14

7. The Department notes that the rules set forth in section 406 of the Employee Retirement Income Security Act of 1974, as amended (ERISA) and section 4975(c) of the Internal Revenue Code of 1986, as amended (the Code) proscribe certain ''prohibited transactions'' between plans and related parties with respect to those plans, known as ''parties in interest.'' [5] Under section 3(14) of ERISA, parties in interest with respect to a plan include, among others, the plan fiduciary, a sponsoring employer of the plan, a union whose members are covered by the plan, service providers with respect to the plan, and certain of their affiliates. The prohibited transaction provisions under section 406(a) of ERISA prohibit, in relevant part, sales, leases, loans or the provision of services between a party in interest and a plan (or an entity whose assets are deemed to constitute the assets of a plan), as well as the use of plan assets by or for the benefit of, or a transfer of plan assets to, a party in interest.[6] Under the authority of section 408(a) of ERISA and section 4975(c)(2) of the Code, the Department has the authority to grant exemptions from such ''prohibited transactions'' in accordance with the procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637, 66644, October 27, 2011).

8. Prohibited Transaction Exemption 84–14 (PTE 84–14) [7] exempts certain prohibited transactions between a party in interest and an ''investment fund'' (as defined in Section VI (b) of PTE 84–14) [8] in which a plan has an interest, if the investment manager satisfies the definition of ''qualified professional asset manager'' (QPAM) and satisfies additional conditions for the exemption. In this regard, PTE 84–14 was developed and granted based on the essential premise that broad relief could be afforded for all types of transactions in which a plan engages only if the commitments and the investments of plan assets and the negotiations leading thereto are the sole responsibility of an independent, discretionary, manager.[9]

9. However, Section I(g) of PTE 84–14 prevents an entity that may otherwise meet the definition of QPAM from utilizing the exemptive relief provided by PTE 84–14, for itself and its client plans, if that entity or an ''affiliate'' [10] thereof or any owner, direct or indirect, of a 5 percent or more interest in the QPAM has, within 10 years immediately preceding the transaction, been either convicted or released from imprisonment, whichever is later, as a result of certain specified criminal activity described in that section. The Department notes that Section I(g) was included in PTE 84–14, in part, based on the expectation that a QPAM, and those who may be in a position to influence its policies, maintain a high standard of integrity.[11] Accordingly, as a result of the Convictions, QPAMs with

[2] Section 1343 generally imposes criminal liability for fraud, including fines and/or imprisonment, when a person utilizes wire, radio, or television communication in interstate or foreign commerce. Section 2 generally imposes criminal liability on a person as a principal if that person aids, counsels, commands, induces, or willfully causes another person to engage in criminal activity.

[3] *United States of America* v. *UBS Securities Japan Limited,* Case Number 3:12–cr–00268–RNC.

[4] *United States of America* vs. *UBS,* Case Number 3:15–cr–00076–RNC.

[5] For purposes of the Summary of Facts and Representations, references to specific provisions of Title I of ERISA, unless otherwise specified, refer also to the corresponding provisions of the Code.

[6] The prohibited transaction provisions also include certain fiduciary prohibited transactions under section 406(b) of ERISA. These include transactions involving fiduciary self-dealing; fiduciary conflicts of interest, and kickbacks to fiduciaries.

[7] 49 FR 9494 (March 13, 1984), as corrected at 50 FR 41430 (October 10, 1985), as amended at 70 FR 49305 (August 23, 2005), and as amended at 75 FR 38837 (July 6, 2010).

[8] An ''investment fund'' includes single customer and pooled separate accounts maintained by an insurance company, individual trusts and common, collective or group trusts maintained by a bank, and any other account or fund to the extent that the disposition of its assets (whether or not in the custody of the QPAM) is subject to the discretionary authority of the QPAM.

[9] See 75 FR 38837, 38839 (July 6, 2010).

[10] Section VI(d) of PTE 84–14 defines the term ''affiliate'' for purposes of Section I(g) as ''(1) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the person, (2) Any director of, relative of, or partner in, any such person, (3) Any corporation, partnership, trust or unincorporated enterprise of which such person is an officer, director, or a 5 percent or more partner or owner, and (4) Any employee or officer of the person who- (A) Is a highly compensated employee (as defined in Section 4975(e)(2)(H) of the Code) or officer (earning 10 percent or more of the yearly wages of such person), or (B) Has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets.''

[11] See 47 FR 56945, 56947 (December 21, 1982).

certain corporate relationships to UBS and UBS Securities Japan, as well as their client plans that are subject to Part 4 of Title I of ERISA (ERISA-covered plans) or section 4975 of the Code (IRAs), will no longer be able to rely on PTE 84–14 without an individual exemption issued by the Department.

The UBS QPAMs

10. UBS Asset Management (Americas) Inc., UBS Realty Investors LLC, UBS Hedge Fund Solutions LLC, and UBS O'Connor LLC are affiliates of UBS, AG (UBS) [12] within UBS's Asset Management division, and may rely on PTE 84–14. Such entities, along with future entities in UBS's Assets Management and Wealth Management Americas divisions that qualify as ''qualified professional asset managers'' (as defined in Part VI(a) of PTE 84–14) and rely on the relief provided by PTE 84–14 and with respect to which UBS AG is an ''affiliate'' (as defined in Part VI(d) of PTE 84–14) are hereinafter referred to as the ''UBS QPAMs''. The Applicants represent that currently, the Asset Management division is the only division that has entities functioning as QPAMs and that UBS itself does not provide investment management services to client plans that are subject to Part 4 of Title I of ERISA (ERISA plans) or section 4975 of the Code (IRAs), or otherwise exercise discretionary control over ERISA assets.

11. The Applicants represent further that the UBS QPAMs provide investment management services to 36 ERISA plan and IRA clients through separately-managed accounts and pooled funds. These ERISA plan clients are all large plans and several have more than 500,000 participants and beneficiaries. Collectively, the UBS QPAMs currently manage approximately $22.1 billion of ERISA Plan and IRA assets (excluding ERISA Plan and IRA assets invested in pooled funds that are not plan asset funds). Several types of investment strategies are used by the UBS QPAMs to invest ERISA plan and IRA assets. These strategies include investments of approximately $3.3 billion in alternative investments/hedge funds, $835 million in equity investments, $8.6 billion in fixed income, $2.2 billion in multi-asset investments, $5.8 billion in derivative investments and $1.4 billion in real estate investments.

UBS's FX Misconduct

12. The DOJ determined that, prior to and after UBS signed the LIBOR NPA on December 18, 2012, certain employees of UBS engaged in fraudulent and deceptive currency trading and sales practices in conducting certain FX market transactions via telephone, email and/or electronic chat, to the detriment of UBS's customers.[13] These employees also engaged in collusion with other participants in certain FX markets (such conduct, as further detailed below, is hereinafter referred to as the ''FX Misconduct'').

13. According to the Factual Basis for Breach, the FX Misconduct included the addition of undisclosed markups to certain FX transactions. In that regard, sales staff misrepresented to customers on certain transactions that markups were not being added, when in fact they were.

14. The Factual Basis for Breach explains that for certain limit orders, UBS personnel would use a price level different from the one specified by the customers, without the customers' knowledge, to ''track'' certain limit orders. This practice was done to obtain an undisclosed markup on the trade for UBS if the market hit both the customer's limit price and UBS's altered tracking price. Additionally, the practice also subjected customers to the potential that their limit orders would be delayed or not filled when the market hit the customer's limit price but not UBS's altered tracking price.

15. The Factual Basis for Breach also details how certain customers obtaining quotes and placing trades over the phone would, on occasion, request an ''open-line'' so they could hear the conversation regarding price quotes between the UBS trader and salesperson. Certain of these customers had an expectation the price they heard from the trader did not include a sales markup for their transaction currency. While on certain ''open-line'' conversations, UBS traders and salespeople used hand signals to fraudulently conceal markups from these customers.

16. The Factual Basis for Breach describes how, from about October 2011 to at least January 2013, a UBS FX trader conspired with other financial services firms acting as dealers in the FX spot market, by agreeing to restrain competition in the purchase and sale of the Euro/U.S. dollar currency pair. To achieve this, among other things, the conspirators: (i) Coordinated the trading of the Euro/U.S. dollar currency pair in connection with the European Central Bank and the World Markets/Reuters benchmark currency ''fixes;'' and (ii) refrained from certain trading behavior by withholding offers and bids when one conspirator held an open risk position. They did this so that the price of the currency traded would not move in a direction adverse to the conspirator with an open risk position.

17. The Factual Basis for Breach explains that in determining that UBS was in breach of the LIBOR NPA, the DOJ considered UBS's FX Misconduct described above in light of UBS's obligation under the LIBOR NPA to commit no further crimes. The DOJ also took into account UBS's three recent prior criminal resolutions [14] and multiple civil and regulatory resolutions. In addition, the DOJ also considered that the compliance programs and remedial efforts put in place by UBS following the LIBOR NPA failed to detect the collusive and deceptive conduct in the FX markets until an article was published pointing to potential misconduct in the FX markets.

UBS's LIBOR Misconduct

18. The Statement of Facts (SOF) in Exhibit 3 of the Plea Agreement describes the circumstances of UBS's scheme to defraud counterparties to interest rate derivatives transactions, by secretly manipulating benchmark interest rates to which the profitability of those transactions was tied. According to the SOF, LIBOR is a benchmark interest rate used in financial markets worldwide, namely on exchanges and in over-the-counter markets, to settle trades for futures, options, swaps, and other derivative financial instruments. In addition, LIBOR is often used as a reference rate for mortgages, credit cards, student loans, and other consumer lending products. LIBOR and the other benchmark interest rates play a fundamentally important role in

[12] UBS Asset Management (Americas) Inc. and UBS Realty Investors LLC are wholly owned by UBS Americas, Inc., a wholly-owned subsidiary of UBS AG. UBS Hedge Fund Solutions LLC (formerly UBS Alternative and Quantitative Investments, LLC) and UBS O'Connor LLC are wholly owned by UBS Americas Holding LLC, a wholly subsidiary of UBS AG.

[13] The circumstances of UBS's violation of the terms of the LIBOR NPA are described in Exhibit 1 to the Plea Agreement, entitled ''The Factual Basis for Breach of the Non-Prosecution Agreement'' (the Factual Basis for Breach).

[14] In addition to the 2012 LIBOR NPA described above, in February 2009, UBS entered into a deferred prosecution agreement with the DOJ's Tax Division for conspiring to defraud the United States of tax revenue through secret Swiss bank accounts for United States tax payers. In connection therewith, UBS agreed to pay $780 million. In May of 2011, UBS entered into a non-prosecution agreement with the DOJ's Antitrust Division to resolve allegations of bid-rigging in the municipal bond derivatives market, and agreed to pay $160 million.

financial markets throughout the world due their widespread use.

19. Each business day the LIBOR average benchmark interest rates are calculated and published by Thomson Reuters, acting as agent for the British Bankers' Association (BBA), for ten currencies (including the United States Dollar, the British Pound Sterling, and the Japanese Yen) and for various maturities (ranging from overnight to twelve months). The calculation for a given currency is based upon rate submissions from a panel of banks for that currency (the Contributor Panel). In general terms, LIBOR is the rate at which the Contributor Panel member could borrow funds. According to the BBA, the Contributor Bank Panel must submit the rate considered by the bank's cash management staff, and not the bank's personnel responsible for derivative trading, as the rate the bank could borrow unsecured inter-bank funds in the London money market, without reference to rates contributed by other Contributor Panel banks. Additionally, a Contributor Panel bank may not contribute a rate based on the pricing of any derivative financial instrument. Once each Contributor Panel bank has submitted its rate, the contributed rates are ranked and averaged, discarding the highest and lowest 25%, to formulate the LIBOR ''Fix'' for that particular currency and maturity. Since 2005, UBS has been a member of the Contributor Panels for the Dollar LIBOR, Yen LIBOR, Euro LIBOR, Swiss Franc LIBOR, and Pound Sterling LIBOR.

20. UBS has also been a member of the Contributor Panel for the Euro Interbank Offered Rate (Euribor) since 2005. The European Banking Federation (EBF) oversees the Euribor reference rate which is the rate expected to be offered by one prime bank to another for Euro interbank term deposits within the Euro zone. The Euribor Contributor Panel bank rate submissions are ranked, and the highest and lowest 15% of all the submissions are excluded from the calculation. The Euribor fix is then formulated using the average of the remaining rate submissions.

21. In addition, UBS was also a member of the Contributor Panel for the Euroyen TIBOR from at least 2005 until 2012. The Japanese Bankers Association (JBA) oversees the TIBOR reference rate. Yen deposits maintained in accounts outside of Japan are referred to as ''Euroyen'' and the prevailing lending market rates between prime banks in the Japan Offshore Market is Euroyen TIBOR. Euroyen TIBOR is calculated by averaging the rate submissions of Contributor Panel members after discarding the two highest and lowest rate submissions. The Euroyen TIBOR rates and the Contributor Panel members' rate submissions are made available worldwide.

22. The SOF also describes the wide-ranging and systematic efforts, practiced nearly on a daily basis, by several UBS employees to manipulate YEN LIBOR in order to benefit UBS's trading positions through internal manipulation within UBS, by using cash brokers to influence other Contributor Panel banks' Yen LIBOR submissions, and by colluding directly with employees at other Contributor Panel banks to influence those banks' Yen LIBOR submissions.

23. The SOF provides that, at various times from at least 2001 through June 2010, certain UBS derivatives traders manipulated submissions for various interest rate benchmarks, and colluded with employees at other banks and cash brokers to influence certain benchmark rates to benefit their trading positions. The SOF explains that the UBS derivatives traders directly and indirectly exercised improper influence over UBS's submissions for LIBOR, Euroyen TIBOR and Euribor. In this regard, those UBS derivatives traders requested, and sometimes directed, that certain UBS benchmark interest submitters submit a particular benchmark interest rate contribution or a higher, lower, or unchanged rate for LIBOR, Euroyen TIBOR, and Euribor that would be beneficial to the traders. These UBS traders' requests for favorable benchmark rates submissions were regularly accommodated by the UBS submitters.[15]

24. The SOF also details how cash brokers [16] were used by certain UBS Yen derivatives traders to distribute misinformation to other Contributor Panel banks regarding Yen LIBOR in order to manipulate Yen LIBOR submissions to the benefit of UBS. The SOF details further how the UBS traders, submitters, supervisors and certain UBS managers, continued to encourage, allow, or participate in the conduct even though they were aware that manipulation of LIBOR submissions was inappropriate and they attempted to conceal the manipulation and obstruct the LIBOR investigation.

25. UBS acknowledges that the SOF is true and correct and that the wrongful acts taken by the participating employees in furtherance of the misconduct set forth above were within the scope of their employment at UBS. Furthermore, UBS acknowledges that the participating employees intended, at least in part, to benefit UBS through the actions described above.

Prior and Anticipated Convictions and Failure To Comply With Section I(g) of PTE 84–14

26. The 2013 Conviction caused the UBS QPAMs to violate Section I(g) of PTE 84–14. On September 13, 2013, the Department granted PTE 2013–09, which allows the UBS QPAMs to rely on the relief provided in PTE 84–14, notwithstanding the 2013 Conviction of UBS Securities Japan.[17] Under PTE 2013–09, the UBS QPAMs must comply with a number of conditions, including the condition in Section I(h) which provides that, ''Notwithstanding the [2013 Conviction], UBS complies with each condition of PTE 84–14, as amended.'' [18] As a result of this requirement, if UBS or one of its affiliates is convicted of another crime (besides the 2013 Conviction) described in Section I(g) of PTE 84–14, then the relief provided by PTE 2013–09 would be unavailable.

27. The 2016 Conviction will cause the UBS QPAMs to violate Section I(g) of PTE 84–14, once a judgment of conviction is entered by the District Court. As a consequence, the UBS QPAMs will not be able to rely upon the exemptive relief provided by PTE 84–14 for a period of ten years as of the 2016 Conviction Date. Furthermore, the 2016 Conviction will also cause Section I(h) of PTE 2013–09 to be violated, as of the 2016 Conviction Date. UBS QPAMs will become ineligible for the relief provided by PTE 84–14 as a result of both the 2013 Conviction and 2016 Conviction. Therefore, the Applicants request a single, new exemption that provides relief for the UBS QPAMs to rely on PTE 84–14 notwithstanding the 2013 Conviction and the 2016 Conviction, effective as of the 2016 Conviction Date.

28. The Department is proposing a temporary exemption herein to allow the UBS QPAMs to rely on PTE 84–14 notwithstanding the Convictions, subject to a comprehensive suite of protective conditions designed to protect the rights of the participants and beneficiaries of the ERISA-covered plans and IRAs that are managed by

[15] According to the SOF, UBS personnel on occasion also engaged in the internal manipulation of UBS's interest rate submissions in connection with the Swiss Franc LIBOR, the British Pound Sterling LIBOR, the Euribor, and the U.S. Dollar LIBOR.

[16] Bids and offers for cash are tracked in the market by cash brokers. These cash brokers also act as intermediaries by assisting derivatives and money market traders in arranging transactions between financial institutions.

[17] 78 FR 56740 (September 13, 2013).

[18] Section I(h) of PTE 2013–09, at 78 FR 56741 (September 18, 2013).

UBS QPAMs. This proposed temporary exemption would be effective for twelve months beginning on the 2016 Conviction Date and ending on the earlier of twelve months after such effective date or until the effective date of a final agency action made by the Department in connection with Exemption Application No. D–11907. In this regard, elsewhere in the **Federal Register**, the Department is proposing Exemption Application No. D–11907, a five-year proposed exemption subject to enhanced protective conditions that would provide the same exemptive relief that is described herein, but for a longer effective period.

This proposed temporary exemption will allow the Department sufficient time to contemplate whether or not to grant the five-year exemption without risking the sudden loss of exemptive relief for the UBS QPAMs upon entry of a judgment of conviction in Case Number 3:15–00076–RNC.

29. Finally, excluding the Convictions and the FX Misconduct, UBS represents that it currently does not have a reasonable basis to believe there are any pending criminal investigations involving the Applicants or any of their affiliated companies that would cause a reasonable plan or IRA customer not to hire or retain the institution as a QPAM. Furthermore, this proposed temporary exemption will not apply to any other conviction(s) of UBS or its affiliates for crimes described in Section I(g) of PTE 84–14. The Department notes that, in such event, the Applicants and their ERISA-covered plan and IRA clients should be prepared to rely on exemptive relief other than PTE 84–14 for any prohibited transactions entered into after the date of such conviction(s), withdraw from any arrangements that solely rely on PTE 84–14 for exemptive relief; or avoid engaging in any such prohibited transactions in the first place.

Remedial Measures Taken by UBS To Address the LIBOR Conduct and FX Misconduct

30. The Applicants represent that UBS took extensive remedial actions and implemented internal control procedures before, during, and after the LIBOR investigations and FX Misconduct, in order to reform its compliance structure and strengthen its corporate culture. UBS represents that it undertook the following structural reforms and compliance enhancements:

Corporate Culture. UBS represents that it has significantly revised and strengthened its Code of Business Conduct and Ethics from approximately 2008 through 2011, and instituted a ''Principles of Behavior'' program from approximately late 2013 through the present. In 2013, UBS adopted a firm-wide definition of ''conduct risk,'' and defined the roles and responsibilities of UBS's business divisions with respect to such conduct risk. In 2013 UBS also enhanced employee supervision policies.

Annual Risk Assessments. Beginning in approximately 2008, UBS instituted annual business and operational risk assessments for each UBS sub-division and for particular risks across the firm, such as fraud risk and market risk.

Coordination of High-Risk Matters and Compliance Reorganization. During 2011 through 2013, UBS established the cross-functional Investigation Sounding Board (ISB) chaired by UBS's Global Head of Litigation and Investigations, which oversees and coordinates all investigations of high risk issues. In 2013, UBS integrated its compliance function and operational risk control functions to avoid gaps in risk coverage.

Transactional and Employee Monitoring. In 2013, UBS adopted and began to implement an automated system to monitor transactions covering all asset classes. UBS enhanced the monitoring of all email and group messaging, and implemented a system to monitor audio communications including land lines and cell phones. UBS implemented a trader surveillance system, and developed and implemented a tool to monitor and assess employee behavioral indicators. UBS also expanded cross border monitoring, and improved the processes associated with the UBS Group's whistleblowing policy.

Compensation Reformation. From approximately 2008 through 2011, UBS reformed its compensation and incentives structure, including longer deferred compensation periods, greater claw-back and forfeiture provisions. UBS enhanced processes to ensure that disciplinary sanctions and compliance related violations (such as failure to complete training) are considered when determining employee compensation and in an individual's performance review.

Corporate Reforms. In October 2012, UBS announced a transformation of the Investment Bank—where the LIBOR and FX Misconduct occurred—by reducing the size and complexity of the Investment Bank to ensure it can operate within strict risk and financial resource limitations.

Benchmark Interest Rate Submissions. From 2011 through 2013, UBS created a dedicated, independent benchmark submissions team and index group segregated from the for-profit activities of the bank. UBS also imposed appropriate communications firewalls between those functions of the bank, and implemented strict controls and procedures for determining benchmark submissions. UBS enhanced supervisory oversight of benchmark and indices submissions, and implemented appropriate monitoring systems to identify unsubstantiated submissions.

Risk Management and Control. In 2013, UBS adopted or strengthened firm-wide policies that set forth and established: Standards for market conduct; a ''zero tolerance'' approach to fraud; standard approaches for fraud risk management and issue escalation across the firm; a firm-wide approach to identifying, managing, and escalating actual and potential conflicts of interest; and key principles to ensure that UBS complies with all applicable competition laws.

Front Office Processes. UBS invested approximately $100 million to address the FX business conduct and control deficiencies identified during the FX investigation, including initiating continuous transaction monitoring and detailed time stamping of orders and implementing controls, principles and systems similar to those required by the regulated markets for its FX business. UBS states that it has: Standardized the FX fixing order process; updated chatroom standards and controls; prohibited the use of mobile phones on trading floors; implemented new requirements for client and market conduct, behavior, and communications; established enhanced supervisory procedures; and required all Investment Bank personnel to take market conduct training.

31. Furthermore, the Applicants represent that UBS took disciplinary action against forty-four individuals in connection with the LIBOR misconduct, and against sixteen individuals in connection with the FX Misconduct. The individuals involved in the disciplinary actions included traders, benchmark submitters, compliance personnel, salespeople and managers. The disciplinary actions encompassed the termination or separation of thirty employees and also included financial consequences, such as forfeiture of deferred compensation, loss of bonuses and bonus reductions.

Statutory Findings—In the Interest of Affected ERISA Plans and IRAs

32. The Applicants represent that the requested exemption is in the interest of affected plans and their participants and beneficiaries because it will enable ERISA plan and IRA clients to have the opportunity to enter into transactions

that are beneficial to the plan and may otherwise be prohibited or more costly. The Applicants maintain that if the exemption request is denied, the UBS QPAMs will be unable to cause ERISA-covered plan clients to engage in many routine and standard transactions that occur across many asset classes. According to the Applicants, these transactions encompass the following asset classes:

Real Estate. UBS QPAMs manage approximately $1.4 billion of real estate assets in a separate account as an ERISA section 3(38) investment manager for a large multiemployer pension plan with many participating employers (and therefore, numerous parties in interest). The investments constitute equity and debt investments in operating real properties, including apartments, office buildings, retail centers, and industrial buildings. The Applicants represent that they rely on PTE 84–14 for the acquisitions of properties in the separate account, as well as mortgage loans entered into in connection with the purchases of the properties; leases of space in commercial properties and residential leases in apartment properties; property management agreements and agreements with vendors providing services at the properties (*e.g.* janitorial services); and sales to potential buyers of the properties.

Alternative Investments. The UBS QPAMs manage three hedge funds of funds that hold assets deemed to constitute ''plan assets'' under ERISA, with approximately $825 million under management. The Applicants state that they rely on PTE 84–14 to enter into and manage the credit facilities totaling approximately $56 million entered into by the funds.

Derivatives. The UBS QPAMs manage approximately $8.3 billion of assets for ERISA plan separate account clients and plan assets funds whose investment guidelines permit or require investment in derivatives contracts documented through International Swaps and Derivatives Association, Inc. (ISDA) agreements or cleared swap agreements. According to the Applicants, approximately 12 ERISA plan separate account clients and 23 plan asset funds are counterparties to ISDA umbrella agreements and cleared swaps account agreements, and the UBS QPAMs currently manage approximately 350 separate trading lines on behalf of those clients and funds. According to the Applicants, PTE 84–14 is primarily relied upon for these transactions, and the counterparties to these agreements almost always require representations to such effect to be included in the agreements.

Fixed Income. The Applicants state that, as a result of regulatory proposals by the Financial Regulatory Authority (FINRA) and the Federal Reserve of New York Treasury Markers Practice Group, Master Securities Forward Transaction Agreements (MSFTAs) are beginning to be required to be in place in order to enter into several broad categories of agency mortgage-backed securities transactions. According to the Applicants, similar to ISDAs, the counterparties to MSFTAs universally require UBS QPAMs to represent that they can rely on PTE 84–14, making it impossible for the UBS QPAMs to execute such transactions on behalf of their ERISA plan and IRA clients. The UBS QPAMs manage approximately $5.3 billion of assets for ERISA separate account clients and plan asset funds whose investment guidelines permit these types of transactions, of which approximately $25 million has been invested in these types of fixed income transactions.

Equity Investments. The Applicants state that, although direct investments in equities typically do not require reliance on PTE 84–14, certain related transactions do, such as futures contracts. Moreover, according to the Applicants, even when another exemption is available for equity investments, ERISA plan and IRA clients may not want to retain an investment manager that cannot rely on PTE 84–14 for the reasons discussed above.

OCIO Services. The Applicants explain that in addition to providing investment management services, the UBS QPAMs also provide outsourced chief investment officer (OCIO) services to a number of ERISA plan clients, one of which, to the Applicants knowledge, is the largest ERISA plan to enter into an OCIO arrangement. According to the Applicants, OCIO services generally provide that UBS has the authority to manage a plan's entire investment portfolio, including selecting and negotiating contracts with other investment managers, allocating assets, developing investment policies, assisting with regulatory reporting, and advising plan fiduciaries. The Applicants represent that PTE 84–14 is the only exemption the UBS QPAMs can rely on for the large OCIO ERISA plan client because no other exemptions are available for transactions involving futures, derivatives, and other investments that are not widely-traded.

33. The Applicants represent that, if the exemption request is denied, and ERISA plan and IRA clients leave the UBS QPAMs, these clients would typically incur transition costs associated with identifying appropriate replacement investment managers and liquidating and re-investing the assets currently managed by the UBS QPAMs. The Applicants estimate that the aggregate transition costs for liquidating and re-investing of each asset class for UBS's ERISA plan and IRA clients would be approximately $280 million.[19] These cost estimates are described below:

Real Estate. The Applicants estimate transition costs of 1,152 basis points for the $1.4 billion of ERISA plan and IRA real estate assets under UBS QPAMs' management. These costs include the losses incurred from selling properties for 90 cents on the dollar, closing costs of 1.5 percent of the sale price and mortgage prepayment fees of one percent of the outstanding mortgages. This would result in a total estimated cost of $160 million for the real estate assets, all of which would be absorbed by one ERISA plan client.

Alternative Investments. UBS states that, combined with early redemption penalties,[20] the cost of liquidating the alternative investments managed by UBS QPAMs on behalf of ERISA-covered plans and IRAs would be 212 basis points of the NAV for a total cost of about $69 million (of which approximately $58 million would be to one ERISA plan client).

Fixed Income. According to the Applicants, the approximate transition costs for liquidating domestic and international fixed income investments is estimated by the Applicants to be $48 million. The Applicants explain that they estimated the costs of liquidating domestic and international bonds using Barclays Capital's ''liquidity cost score'' methodology (LCS), which reflects the percentage of a bond's price that is estimated to be incurred in transaction costs in a standard institutional transaction. The Applicants note that

[19] The Applicants state that the estimates that UBS developed do not assume a ''fire sale'' of any assets; rather, they assume that assets would be liquidated quickly as reasonably possible consistent with the UBS QPAMs' fiduciary obligations to their ERISA plan clients.

[20] The Department notes that, if this temporary exemption is granted, compliance with the condition in Section I(j) of the exemption would require the UBS QPAMs to clearly demonstrate that any ''early redemption penalties'' are ''specifically designed to prevent generally recognized abusive investment practices or specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors. . . .'' In addition, under Section I(j), the UBS QPAMs would have to hold their plan customers harmless for any losses attributable to, inter alia, any prohibited transactions or violations of the duty of prudence and loyalty.

the LCS is primarily driven by the liquidity of the market, but is also impacted by other factors, including the time to maturity for the bond. Using LCS, the Applicants state that liquidating and re-investing fixed income products, emerging market debt securities, and fixed income funds would result in transition costs, respectively, of 94, 91, and 97 basis points.[21]

Equities. The Applicants state that UBS' investment professionals conducted trading simulations to determine the impact of selling the aggregate block of each class of equity securities currently held by the UBS QPAMs on behalf of their clients. According to the Applicants, the trading simulations yielded transition cost assumptions of 32 basis points for U.S. large-cap equities; 79 basis points for U.S. small-cap equities; 19 basis points for global equities; 40 basis points for emerging market equities; and 17 basis points for equity funds. The Applicants represent that the total estimated costs for liquidating equities held by UBS QPAMs' ERISA plan and IRA clients would be approximately $2.5 million.

Derivatives. Lastly, the Applicants estimate the transition costs for derivative investments such as swaps, forwards, futures, and options would be approximately $2.3 million. The Applicants also used the LCS methodology to arrive at a transition cost assumption of 10 basis points for credit default swaps; 6 basis points for interest rate swaps; 35 basis points for total return swaps; and 4 basis points for fixed income futures. Transition costs for equities futures were assumed to be 6 basis points given the liquidity of the indices underlying those transactions. Finally, the Applicants note that, because of the liquidity associated with currency forwards and the relatively small amount of the UBS QPAMs' investments in equity and fixed income options, UBS assumed that the costs of liquidating and re-investing those assets would be negligible.

OCIO Relationship. In the absence of granted relief, the Applicants estimate that it would take this large OCIO ERISA plan client 18 to 24 months to find providers to replicate all the OCIO services provided by the UBS QPAMs. UBS represents that this estimate is consistent with the following projections for the steps this plan client would need to take to secure and fully implement replacement OCIO services: (i) 6–9 months to issue a Request for Proposals, receive and evaluate proposals, and select a new service provider(s); (ii) 3–6 months to negotiate a contract and complete other necessary transition tasks (*e.g.,* establishing custodial accounts) with the new service provider(s); and (iii) 9–12 months for the new service provider(s) to implement its own investment program, which would include evaluating the client's existing investments and performing due diligence on existing sub-managers. The Applicants note that the estimate is also consistent with the amount of time it took UBS to establish the current OCIO relationship with this client.

The Applicants represents in addition to these transition costs, the ERISA plan client would pay substantially more in fees than it is currently paying if it had to obtain all these services from a variety of different providers.

Statutory Findings—Protective of the Rights of Participants of Affected Plans and IRAs

34. The Applicants have proposed certain conditions it believes are protective of ERISA-covered plans and IRAs with respect to the transactions described herein. The Department has determined to revise and supplement the proposed conditions so that it can make its required finding that the requested temporary exemption is protective of the rights of participants and beneficiaries of affected plans and IRAs.

35. Several of these conditions underscore the Department's understanding, based on the Applicants' representations, that the affected UBS QPAMs were not involved in the FX Misconduct or the misconduct that is the subject of the Convictions. For example, the temporary exemption, if granted as proposed, mandates that the UBS QPAMs (including their officers, directors, agents other than UBS, and employees of such UBS QPAMs) did not know of, have reason to know of, or participate in: (1) The FX Misconduct; or (2) the criminal conduct that is the subject of the Convictions. For purposes of this requirement, ''participate in'' includes an individual's knowing or tacit approval of the FX Misconduct and the misconduct that is the subject of the Convictions. Under this the proposed temporary exemption, the term ''Convictions'' includes the 2013 Conviction and the 2016 Conviction. The term ''2013 Conviction'' means the judgment of conviction against UBS Securities Japan Co. Ltd. in Case Number 3:12–cr–00268–RNC in the U.S. District Court for the District of Connecticut for one count of wire fraud in violation of Title 18, United Sates Code, sections 1343 and 2 in connection with submission of YEN London Interbank Offered Rates and other benchmark interest rates. The term ''2016 Conviction'' means the anticipated judgment of conviction against UBS AG in Case Number 3:15–cr–00076–RNC in the U.S. District Court for the District of Connecticut for one count of wire fraud in violation of Title 18, United States Code, Sections 1343 and 2 in connection with UBS's submission of Yen London Interbank Offered Rates and other benchmark interest rates between 2001 and 2010. Furthermore, for all purposes under the proposed temporary exemption, ''conduct'' of any person or entity that is the ''subject of [a] Conviction'' encompasses any conduct of UBS and/or their personnel, that is described in the Plea Agreement, (including Exhibits 1 and 3 attached thereto), the plea agreement entered into between UBS Securities Japan and the Department of Justice Criminal Division, on December 19, 2012, in connection with Case Number 3:12–cr–00268–RNC the December 19, 2012 (and attachments thereto), and other official regulatory or judicial factual findings that are a part of this record. The proposed temporary exemption defines the FX Misconduct as the conduct engaged in by UBS personnel described in Exhibit 1 of the Plea Agreement entered into between UBS AG and the Department of Justice Criminal Division, on May 20, 2015 in connection with Case Number 3:15–cr–00076–RNC filed in the U.S. District Court for the District of Connecticut.

36. Further, the UBS QPAMs (including their officers, directors, agents other than UBS, and employees of such UBS QPAMs) may not have received direct compensation, or knowingly have received indirect compensation, in connection with: (1) The FX Misconduct; or (2) the criminal conduct that is the subject of the Convictions.

37. The Department expects the UBS QPAMs to rigorously ensure that the individuals associated with the misconduct will not be employed or knowingly engaged by such QPAMs. In this regard, the proposed temporary exemption mandates that the UBS QPAMs will not employ or knowingly engage any of the individuals that participated in: (1) The FX Misconduct or (2) the criminal conduct that is the subject of the Convictions. For purposes of this condition, ''participated in'' includes an individual's knowing or tacit approval of the behavior that is the subject of the FX Misconduct or the

[21] The Applicants assume that the costs of liquidating and re-investing cash equivalent and currency holdings would be negligible, given the liquidity associated with those assets.

Convictions. Further, a UBS QPAM will not use its authority or influence to direct an ''investment fund'' (as defined in Section VI(b) of PTE 84–14) that is subject to ERISA or the Code and managed by such UBS QPAM to enter into any transaction with UBS or UBS Securities Japan, nor otherwise engage UBS or UBS Securities Japan to provide additional services to such investment fund, for a direct or indirect fee borne by such investment fund, regardless of whether such transaction or services may otherwise be within the scope of relief provided by an administrative or statutory exemption.

38. The UBS QPAMs must comply with each condition of PTE 84–14, as amended, with the sole exceptions of the violations of Section I(g) of PTE 84–14 that are attributable to the Convictions. Further, any failure of the UBS QPAMs to satisfy Section I(g) of PTE 84–14 must result solely from the Convictions.

39. No relief will be provided by this proposed temporary exemption to the extent a UBS QPAM exercised its authority over the assets of any plan subject to Part 4 of Title I of ERISA (an ERISA-covered plan) or section 4975 of the Code (an IRA) in a manner that it knew or should have known would: Further the FX Misconduct or the criminal conduct that is the subject of the Convictions; or cause the UBS QPAM, its affiliates or related parties to directly or indirectly profit from the FX Misconduct or the criminal conduct that is the subject of the Convictions. The conduct that is the subject of the Convictions includes that which is described in the Plea Agreement (including Exhibits 1 and 3 attached thereto) and the plea agreement entered into between UBS Securities Japan and the Department of Justice Criminal Division, on December 19, 2012, in connection with Case Number 3:12–cr–00268–RNC (and attachments thereto). The FX Misconduct engaged in by UBS personnel includes that which is described in Exhibit 1 of the Plea Agreement (Factual Basis for Breach) entered into between UBS AG and the Department of Justice Criminal Division, on May 20, 2015 in connection with Case Number 3:15–cr–00076–RNC filed in the US District Court for the District of Connecticut. Further, no relief will be provided to the extent UBS, or UBS Securities Japan, provides any discretionary asset management services to ERISA-covered plans or IRAs or otherwise act as a fiduciary with respect to ERISA-covered plan or IRA assets.

40. *Policies.* The Department believes that robust policies and training are warranted where, as here, extensive criminal misconduct has occurred within a corporate organization that includes one or more QPAMs managing plan investments in reliance on PTE 84–14. Therefore, this proposed temporary exemption requires that each UBS QPAM must immediately develop, implement, maintain, and follow written policies and procedures (the Policies) requiring and reasonably designed to ensure that: The asset management decisions of the UBS QPAM are conducted independently of the management and business activities of UBS, including the Investment Bank division and UBS Securities Japan; the UBS QPAM fully complies with ERISA's fiduciary duties and ERISA and the Code's prohibited transaction provisions and does not knowingly participate in any violations of these duties and provisions with respect to ERISA-covered plans and IRAs; the UBS QPAM does not knowingly participate in any other person's violation of ERISA or the Code with respect to ERISA-covered plans and IRAs; any filings or statements made by the UBS QPAM to regulators, including but not limited to, the Department of Labor, the Department of the Treasury, the Department of Justice, and the Pension Benefit Guaranty Corporation, on behalf of ERISA-covered plans or IRAs are materially accurate and complete, to the best of such QPAM's knowledge at that time; the UBS QPAM does not make material misrepresentations or omit material information in its communications with such regulators with respect to ERISA-covered plans or IRAs, or make material misrepresentations or omit material information in its communications with ERISA-covered plan and IRA clients; and the UBS QPAM complies with the terms of this proposed temporary exemption. Any violation of, or failure to comply with, the Policies must be corrected promptly upon discovery, and any such violation or compliance failure not promptly corrected must be reported, upon discovering the failure to promptly correct, in writing, to appropriate corporate officers, the head of Compliance and the General Counsel of the relevant UBS QPAM (or their functional equivalent), the independent auditor responsible for reviewing compliance with the Policies, and an appropriate fiduciary of any affected ERISA-covered plan or IRA that is independent of UBS.[22] A UBS QPAM will not be treated as having failed to develop, implement, maintain, or follow the Policies, provided that it corrects any instance of noncompliance promptly when discovered or when it reasonably should have known of the noncompliance (whichever is earlier), and provided that it reports such instance of noncompliance as explained above.

41. *Training.* The Department has also imposed a condition that requires each UBS QPAM to immediately develop and implement a program of training (the Training), for all relevant UBS QPAM asset/portfolio management, trading, legal, compliance, and internal audit personnel. The Training must be set forth in the Policies and at a minimum, cover the Policies, ERISA and Code compliance (including applicable fiduciary duties and the prohibited transaction provisions) and ethical conduct, the consequences for not complying with the conditions of this proposed temporary exemption (including the loss of the exemptive relief provided herein), and prompt reporting of wrongdoing. Furthermore, the Training must be conducted by an independent professional who has been prudently selected and who has appropriate technical training and proficiency with ERISA and the Code.

42. *Independent Transparent Audit.* The Department views a rigorous, transparent audit that is conducted by an independent party as essential to ensuring that the conditions for exemptive relief described herein are followed by the UBS QPAMs. Therefore, Section I(i) of this proposed temporary exemption requires that each UBS QPAM submits to an audit conducted by an independent auditor, who has been prudently selected and who has appropriate technical training and proficiency with ERISA and the Code, to evaluate the adequacy of, and the UBS QPAM's compliance with, the Policies and Training described herein. The audit requirement must be incorporated in the Policies. The audit must cover the twelve month period which begins on the date of the 2016 Conviction, and must be completed no later than six (6) months after the end of the twelve (12) month period. For time periods prior to the Conviction Date and covered under PTE 2013–09, the audit requirements in Section (g) of PTE 2013–09 will remain in effect.

43. The audit condition requires that, to the extent necessary for the auditor, in its sole opinion, to complete its audit and comply with the conditions for relief described herein, and as permitted by law, each UBS QPAM and, if applicable, UBS, will grant the auditor

[22] With respect to any ERISA-covered plan or IRA sponsored by an ''affiliate'' (as defined in Part VI(d) of PTE 84–14) of UBS or beneficially owned by an employee of UBS or its affiliates, such fiduciary does not need to be independent of UBS.

unconditional access to its business, including, but not limited to: Its computer systems; business records; transactional data; workplace locations; training materials; and personnel.

44. The auditor's engagement must specifically require the auditor to determine whether each UBS QPAM has complied with the Policies and Training conditions described herein, and must further require the auditor to test each UBS QPAM's operational compliance with the Policies and Training.

45. On or before the end of the relevant period described in Section I(i)(1) for completing the audit, the auditor must issue a written report (the Audit Report) to UBS and the UBS QPAM to which the audit applies that describes the procedures performed by the auditor during the course of its examination. The Audit Report must include the auditor's specific determinations regarding: The adequacy of the UBS QPAM's Policies and Training; the UBS QPAM's compliance with the Policies and Training; the need, if any, to strengthen such Policies and Training; and any instance of the respective UBS QPAM's noncompliance with the written Policies and Training. Any determination by the auditor regarding the adequacy of the Policies and Training and the auditor's recommendations (if any) with respect to strengthening the Policies and Training of the respective UBS QPAM must be promptly addressed by such UBS QPAM, and any action taken by such UBS QPAM to address such recommendations must be included in an addendum to the Audit Report. Any determination by the auditor that the respective UBS QPAM has implemented, maintained, and followed sufficient Policies and Training must not be based solely or in substantial part on an absence of evidence indicating noncompliance. In this last regard, any finding that the UBS QPAM has complied with the requirements under this subsection must be based on evidence that demonstrates the UBS QPAM has actually implemented, maintained, and followed the Policies and Training required by this proposed temporary exemption.

46. Furthermore, the auditor must notify the respective UBS QPAM of any instance of noncompliance identified by the auditor within five (5) business days after such noncompliance is identified by the auditor, regardless of whether the audit has been completed as of that date. This proposed temporary exemption requires that certain senior personnel of UBS review the Audit Report, make certain certifications, and take various corrective actions. In this regard, the General Counsel, or one of the three most senior executive officers of the UBS QPAM to which the Audit Report applies, must certify in writing, under penalty of perjury, that the officer has reviewed the Audit Report and this proposed temporary exemption; addressed, corrected, or remedied any inadequacy identified in the Audit Report; and determined that the Policies and Training in effect at the time of signing are adequate to ensure compliance with the conditions of this proposed temporary exemption and with the applicable provisions of ERISA and the Code.

47. The Risk Committee, the Audit Committee, and the Corporate Culture and Responsibility Committee of UBS's Board of Directors are provided a copy of each Audit Report; and a senior executive officer of UBS's Compliance and Operational Risk Control function must review the Audit Report for each UBS QPAM and must certify in writing, under penalty of perjury, that such officer has reviewed each Audit Report. In order to create a more transparent record in the event that the proposed temporary relief is granted, each UBS QPAM must provide its certified Audit Report to the Department no later than 45 days following its completion. The Audit Report will be part of the public record regarding this proposed temporary exemption. Furthermore, each UBS QPAM must make its Audit Report unconditionally available for examination by any duly authorized employee or representative of the Department, other relevant regulators, and any fiduciary of an ERISA-covered plan or IRA, the assets of which are managed by such UBS QPAM.

48. Additionally, each UBS QPAM and the auditor must submit to the Department any engagement agreement entered into pursuant to the engagement of the auditor under this proposed temporary exemption; and any engagement agreement entered into with any other entity retained in connection with such QPAM's compliance with the Training or Policies conditions of this proposed temporary exemption no later than six (6) months after the date of the Conviction Date (and one month after the execution of any agreement thereafter). Finally, if the temporary exemption is granted, the auditor must provide the Department, upon request, all of the workpapers created and utilized in the course of the audit, including, but not limited to: The audit plan; audit testing; identification of any instance of noncompliance by the relevant UBS QPAM; and an explanation of any corrective or remedial action taken by the applicable UBS QPAM.

In order to enhance oversight of the compliance with the temporary exemption UBS must notify the Department at least 30 days prior to any substitution of an auditor, and UBS must demonstrate to the Department's satisfaction that any new auditor is independent of UBS, experienced in the matters that are the subject of the proposed temporary exemption and capable of making the determinations required of this proposed temporary exemption.

49. *Contractual Obligations.* This proposed temporary exemption requires UBS QPAMs to enter into certain contractual obligations in connection with the provision of services to their clients. It is the Department's view that the condition in Section I(j) is essential to the Department's ability to make its findings that the proposed temporary exemption is protective of the rights of the participants and beneficiaries of ERISA-covered plan and IRA clients. In this regard, effective as of the Conviction Date, with respect to any arrangement, agreement, or contract between a UBS QPAM and an ERISA-covered plan or IRA for which a UBS QPAM provides asset management or other discretionary fiduciary services, each UBS QPAM agrees: To comply with ERISA and the Code, as applicable with respect to such ERISA-covered plan or IRA; to refrain from engaging in prohibited transactions that are not otherwise exempt (and to promptly correct any inadvertent prohibited transactions); to comply with the standards of prudence and loyalty set forth in section 404, as applicable; and to indemnify and hold harmless the ERISA-covered plan and IRA for any damages resulting from a UBS QPAM's violation of applicable laws, a UBS QPAM's breach of contract, or any claim brought in connection with the failure of such UBS QPAM to qualify for the exemptive relief provided by PTE 84–14 as a result of a violation of Section I(g) of PTE 84–14 other than the Convictions. Furthermore, UBS QPAMs must agree not to require (or otherwise cause) the ERISA-covered plan or IRA to waive, limit, or qualify the liability of the UBS QPAM for violating ERISA or the Code or engaging in prohibited transactions; not to require the ERISA-covered plan or IRA (or sponsor of such ERISA-covered plan or beneficial owner of such IRA) to indemnify the UBS QPAM for violating ERISA or engaging in prohibited transactions, except for violations or prohibited transactions caused by an error, misrepresentation, or misconduct of a plan fiduciary or

other party hired by the plan fiduciary who is independent of UBS; not to restrict the ability of such ERISA-covered plan or IRA to terminate or withdraw from its arrangement with the UBS QPAM (including any investment in a separately managed account or pooled fund subject to ERISA and managed by such QPAM), with the exception of reasonable restrictions, appropriately disclosed in advance, that are specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors as a result of an actual lack of liquidity of the underlying assets, provided that such restrictions are applied consistently and in like manner to all such investors; not to impose any fees, penalties, or charges for such termination or withdrawal with the exception of reasonable fees, appropriately disclosed in advance, that are specifically designed to prevent generally recognized abusive investment practices or specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors, provided that such fees are applied consistently and in like manner to all such investors; and not to include exculpatory provisions disclaiming or otherwise limiting liability of the UBS QPAMs for a violation of such agreement's terms, except for liability caused by an error, misrepresentation, or misconduct of a plan fiduciary or other party hired by the plan fiduciary who is independent of UBS.

50. Within four (4) months of the effective date of this proposed temporary exemption, each UBS QPAM will provide a notice of its obligations under Section I(j) to each ERISA-covered plan and IRA client for which the UBS QPAM provides asset management or other discretionary fiduciary services.

51. Certain conditions of the proposed temporary exemption are directed UBS and UBS Securities Japan. In this regard, UBS must impose internal procedures, controls, and protocols on UBS Securities Japan to: (1) Reduce the likelihood of any recurrence of conduct that that is the subject of the 2013 Conviction, and (2) comply in all material respects with the Business Improvement Order, dated December 16, 2011, issued by the Japanese Financial Services Authority. Additionally, UBS must comply in all material respects with the audit and monitoring procedures imposed on UBS by the United States Commodity Futures Trading Commission Order, dated December 19, 2012.

52. Each UBS QPAM must maintain records necessary to demonstrate that the conditions of this proposed temporary exemption have been met, for six (6) years following the date of any transaction for which such UBS QPAM relies upon the relief in the proposed temporary exemption.

53. The proposed temporary exemption requires that, during the effective period of this temporary exemption UBS: (1) Immediately discloses to the Department any Deferred Prosecution Agreement (a DPA) or Non-Prosecution Agreement (an NPA) that UBS or an affiliate enters into with the U.S. Department of Justice, to the extent such DPA or NPA involves conduct described in Section I(g) of PTE 84–14 or section 411 of ERISA; and (2) immediately provides the Department any information requested by the Department, as permitted by law, regarding the agreement and/or the conduct and allegations that led to the agreements.

Statutory Findings—Administratively Feasible

54. The Applicants represents that the proposed temporary exemption is administratively feasible because it does not require any monitoring by the Department but relies on an independent auditor to determine that the exemption conditions are being complied with. Furthermore, the requested temporary exemption does not require the Department's oversight because, as a condition of this proposed temporary exemption, neither UBS nor UBS Securities Japan will provide any fiduciary or QPAM services to ERISA covered plans and IRAs.

Notice to Interrested Persons

Written comments and/or requests for a public hearing on the proposed temporary exemption should be submitted to the Department within five (5) days from the date of publication of this Federal Register Notice. Given the short comment period, the Department will consider comments received after such date, in connection with its consideration of more permanent relief.

Warning: Do not include any personally identifiable information (such as name, address, or other contact information) or confidential business information that you do not want publicly disclosed. All comments may be posted on the Internet and can be retrieved by most Internet search engines.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which, among other things, require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries, and protective of the rights of participants and beneficiaries of the plan;

(3) The proposed temporary exemption will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The proposed temporary exemption will be subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction which is the subject of the exemption.

Proposed Temporary Exemption

The Department is considering granting a temporary exemption under the authority of section 408(a) of the Employee Retirement Income Security Act of 1974, as amended (ERISA or the Act), and section 4975(c)(2) of the Internal Revenue Code of 1986, as amended (the Code), and in accordance with the procedures set forth in 29 CFR

part 2570, subpart B (76 FR 66637, 66644, October 27, 2011).[23]

Section I: Covered Transactions

If the proposed temporary exemption is granted, certain entities with specified relationships to UBS, AG (hereinafter, the UBS QPAMs as further defined in Section II(b)) shall not be precluded from relying on the exemptive relief provided by Prohibited Transaction Exemption 84–14 (PTE 84–14),[24] notwithstanding the ''2013 Conviction'' against UBS Securities Japan Co., Ltd. entered on September 18, 2013 and the ''2016 Conviction'' against UBS AG scheduled to be entered on November 29, 2016 (collectively the Convictions, as further defined in Section II(a)),[25] for a period of up to twelve months beginning on the Conviction Date (as defined in Section II(d)), provided that the following conditions are satisfied:

(a) The UBS QPAMs (including their officers, directors, agents other than UBS, and employees of such UBS QPAMs) did not know of, have reason to know of, or participate in: (1) The FX Misconduct; or (2) the criminal conduct that is the subject of the Convictions (for the purposes of this Section I(a), ''participate in'' includes the knowing or tacit approval of the FX Misconduct or the misconduct that is the subject of the Convictions);

(b) The UBS QPAMs (including their officers, directors, agents other than UBS, and employees of such UBS QPAMs) did not receive direct compensation, or knowingly receive indirect compensation, in connection with: (1) The FX Misconduct; or (2) the criminal conduct that is the subject of the Convictions;

(c) The UBS QPAMs will not employ or knowingly engage any of the individuals that participated in: (1) The FX Misconduct or (2) the criminal conduct that is the subject of the Convictions (for purposes of this Section I(c), ''participated in'' includes the knowing or tacit approval of the FX Misconduct or the misconduct that is the subject of the Convictions);

(d) A UBS QPAM will not use its authority or influence to direct an ''investment fund'' (as defined in Section VI(b) of PTE 84–14) that is subject to ERISA or the Code and managed by such UBS QPAM, to enter into any transaction with UBS or UBS Securities Japan or engage UBS or UBS Securities Japan to provide any service to such investment fund, for a direct or indirect fee borne by such investment fund, regardless of whether such transaction or service may otherwise be within the scope of relief provided by an administrative or statutory exemption;

(e) Any failure of the UBS QPAMs to satisfy Section I(g) of PTE 84–14 arose solely from the Convictions;

(f) A UBS QPAM did not exercise authority over the assets of any plan subject to Part 4 of Title I of ERISA (an ERISA-covered plan) or section 4975 of the Code (an IRA) in a manner that it knew or should have known would: Further the FX Misconduct or the criminal conduct that is the subject of the Convictions; or cause the UBS QPAM, its affiliates or related parties to directly or indirectly profit from the FX Misconduct or the criminal conduct that is the subject of the Convictions;

(g) UBS and UBS Securities Japan will not provide discretionary asset management services to ERISA-covered plans or IRAs, nor will otherwise act as a fiduciary with respect to ERISA-covered plan or IRA assets;

(h)(1) Each UBS QPAM must immediately develop, implement, maintain, and follow written policies and procedures (the Policies) requiring and reasonably designed to ensure that:

(i) The asset management decisions of the UBS QPAM are conducted independently of UBS's corporate management and business activities, including the corporate management and business activities of the Investment Bank division and UBS Securities Japan;

(ii) The UBS QPAM fully complies with ERISA's fiduciary duties and with ERISA and the Code's prohibited transaction provisions, and does not knowingly participate in any violation of these duties and provisions with respect to ERISA-covered plans and IRAs;

(iii) The UBS QPAM does not knowingly participate in any other person's violation of ERISA or the Code with respect to ERISA-covered plans and IRAs;

(iv) Any filings or statements made by the UBS QPAM to regulators, including but not limited to, the Department of Labor, the Department of the Treasury, the Department of Justice, and the Pension Benefit Guaranty Corporation, on behalf of ERISA-covered plans or IRAs are materially accurate and complete, to the best of such QPAM's knowledge at that time;

(v) The UBS QPAM does not make material misrepresentations or omit material information in its communications with such regulators with respect to ERISA-covered plans or IRAs, or make material misrepresentations or omit material information in its communications with ERISA-covered plan and IRA clients;

(vi) The UBS QPAM complies with the terms of this temporary exemption; and

(vii) Any violation of, or failure to comply with, an item in subparagraph (ii) through (vi), is corrected promptly upon discovery, and any such violation or compliance failure not promptly corrected is reported, upon the discovery of such failure to promptly correct, in writing, to appropriate corporate officers, the head of compliance and the General Counsel (or their functional equivalent) of the relevant UBS QPAM, the independent auditor responsible for reviewing compliance with the Policies, and an appropriate fiduciary of any affected ERISA-covered plan or IRA that is independent of UBS; however, with respect to any ERISA-covered plan or IRA sponsored by an ''affiliate'' (as defined in Section VI(d) of PTE 84–14) of UBS or beneficially owned by an employee of UBS or its affiliates, such fiduciary does not need to be independent of UBS. A UBS QPAM will not be treated as having failed to develop, implement, maintain, or follow the Policies, provided that it corrects any instance of noncompliance promptly when discovered or when it reasonably should have known of the noncompliance (whichever is earlier), and provided that it adheres to the reporting requirements set forth in this subparagraph (vii);

(2) Each UBS QPAM must immediately develop and implement a program of training (the Training), conducted at least annually, for all relevant UBS QPAM asset/portfolio management, trading, legal, compliance, and internal audit personnel. The Training must:

(i) Be set forth in the Policies and at a minimum, cover the Policies, ERISA and Code compliance (including applicable fiduciary duties and the prohibited transaction provisions), ethical conduct, the consequences for not complying with the conditions of this temporary exemption (including any loss of exemptive relief provided

[23] For purposes of this proposed temporary exemption, references to section 406 of Title I of the Act, unless otherwise specified, should be read to refer as well to the corresponding provisions of section 4975 of the Code.

[24] 49 FR 9494 (March 13, 1984), as corrected at 50 FR 41430 (October 10, 1985), as amended at 70 FR 49305 (August 23, 2005), and as amended at 75 FR 38837 (July 6, 2010).

[25] Section I(g) of PTE 84–14 generally provides that ''[n]either the QPAM nor any affiliate thereof . . . nor any owner . . . of a 5 percent or more interest in the QPAM is a person who within the 10 years immediately preceding the transaction has been either convicted or released from imprisonment, whichever is later, as a result of'' certain criminal activity therein described.

herein), and prompt reporting of wrongdoing; and

(ii) Be conducted by an independent professional who has been prudently selected and who has appropriate technical training and proficiency with ERISA and the Code;

(i)(1) Each UBS QPAM submits to an audit conducted by an independent auditor, who has been prudently selected and who has appropriate technical training and proficiency with ERISA and the Code, to evaluate the adequacy of, and the UBS QPAM's compliance with, the Policies and Training described herein. The audit requirement must be incorporated in the Policies. The audit must cover the twelve month period that begins on the Conviction Date, and must be completed no later than six (6) months after the twelve month period. For time periods prior to the Conviction Date and covered under PTE 2013–09, the audit requirements in Section (g) of PTE 2013–09 will remain in effect;

(2) To the extent necessary for the auditor, in its sole opinion, to complete its audit and comply with the conditions for relief described herein, and as permitted by law, each UBS QPAM and, if applicable, UBS, will grant the auditor unconditional access to its business, including, but not limited to: Its computer systems; business records; transactional data; workplace locations; training materials; and personnel;

(3) The auditor's engagement must specifically require the auditor to determine whether each UBS QPAM has developed, implemented, maintained, and followed the Policies in accordance with the conditions of this temporary exemption and has developed and implemented the Training, as required herein;

(4) The auditor's engagement must specifically require the auditor to test each UBS QPAM's operational compliance with the Policies and Training. In this regard, the auditor must test a sample of each QPAM's transactions involving ERISA-covered plans and IRAs sufficient in size and nature to afford the auditor a reasonable basis to determine the operational compliance with the Policies and Training;

(5) On or before the end of the relevant period described in Section I(i)(1) for completing the audit, the auditor must issue a written report (the Audit Report) to UBS and the UBS QPAM to which the audit applies that describes the procedures performed by the auditor during the course of its examination. The Audit Report must include the auditor's specific determinations regarding: The adequacy of the UBS QPAM's Policies and Training; the UBS QPAM's compliance with the Policies and Training; the need, if any, to strengthen such Policies and Training; and any instance of the respective UBS QPAM's noncompliance with the written Policies and Training described in Section I(h) above. Any determination by the auditor regarding the adequacy of the Policies and Training and the auditor's recommendations (if any) with respect to strengthening the Policies and Training of the respective UBS QPAM must be promptly addressed by such UBS QPAM, and any action taken by such UBS QPAM to address such recommendations must be included in an addendum to the Audit Report (which addendum is completed prior to the certification described in Section I(i)(7) below). Any determination by the auditor that the respective UBS QPAM has implemented, maintained, and followed sufficient Policies and Training must not be based solely or in substantial part on an absence of evidence indicating noncompliance. In this last regard, any finding that the UBS QPAM has complied with the requirements under this subsection must be based on evidence that demonstrates the UBS QPAM has actually implemented, maintained, and followed the Policies and Training required by this temporary exemption;

(6) The auditor must notify the respective UBS QPAM of any instance of noncompliance identified by the auditor within five (5) business days after such noncompliance is identified by the auditor, regardless of whether the audit has been completed as of that date;

(7) With respect to each Audit Report, the General Counsel, or one of the three most senior executive officers of the UBS QPAM to which the Audit Report applies, must certify in writing, under penalty of perjury, that the officer has reviewed the Audit Report and this temporary exemption; addressed, corrected, or remedied any inadequacy identified in the Audit Report; and determined that the Policies and Training in effect at the time of signing are adequate to ensure compliance with the conditions of this proposed temporary exemption and with the applicable provisions of ERISA and the Code;

(8) The Risk Committee, the Audit Committee, and the Corporate Culture and Responsibility Committee of UBS's Board of Directors are provided a copy of each Audit Report; and a senior executive officer of UBS's Compliance and Operational Risk Control function must review the Audit Report for each UBS QPAM and must certify in writing, under penalty of perjury, that such officer has reviewed each Audit Report;

(9) Each UBS QPAM must provide its certified Audit Report, by regular mail to: The Department's Office of Exemption Determinations (OED), 200 Constitution Avenue NW., Suite 400, Washington, DC 20210, or by private carrier to: 122 C Street NW., Suite 400, Washington, DC 20001–2109, no later than 45 days following its completion. The Audit Report will be part of the public record regarding this temporary exemption. Furthermore, each UBS QPAM must make its Audit Report unconditionally available for examination by any duly authorized employee or representative of the Department, other relevant regulators, and any fiduciary of an ERISA-covered plan or IRA, the assets of which are managed by such UBS QPAM;

(10) Each UBS QPAM and the auditor must submit to OED: (A) Any engagement agreement entered into pursuant to the engagement of the auditor under this proposed temporary exemption; and (B) any engagement agreement entered into with any other entity retained in connection with such QPAM's compliance with the Training or Policies conditions of this temporary exemption no later than six (6) months after the Conviction Date (and one month after the execution of any agreement thereafter);

(11) The auditor must provide OED, upon request, all of the workpapers created and utilized in the course of the audit, including, but not limited to: The audit plan; audit testing; identification of any instance of noncompliance by the relevant UBS QPAM; and an explanation of any corrective or remedial action taken by the applicable UBS QPAM; and

(12) UBS must notify the Department at least 30 days prior to any substitution of an auditor, except that no such replacement will meet the requirements of this paragraph unless and until UBS demonstrates to the Department's satisfaction that such new auditor is independent of UBS, experienced in the matters that are the subject of the temporary exemption and capable of making the determinations required of this temporary exemption;

(j) Effective as of the Conviction Date, with respect to any arrangement, agreement, or contract between a UBS QPAM and an ERISA-covered plan or IRA for which such UBS QPAM provides asset management or other discretionary fiduciary services, each UBS QPAM agrees:

(1) To comply with ERISA and the Code, as applicable with respect to such ERISA-covered plan or IRA; to refrain from engaging in prohibited transactions that are not otherwise exempt (and to promptly correct any inadvertent prohibited transactions); and to comply with the standards of prudence and loyalty set forth in section 404 of ERISA, as applicable;

(2) Not to require (or otherwise cause) the ERISA-covered plan or IRA to waive, limit, or qualify the liability of the UBS QPAM for violating ERISA or the Code or engaging in prohibited transactions;

(3) Not to require the ERISA-covered plan or IRA (or sponsor of such ERISA-covered plan or beneficial owner of such IRA) to indemnify the UBS QPAM for violating ERISA or engaging in prohibited transactions, except for violations or prohibited transactions caused by an error, misrepresentation, or misconduct of a plan fiduciary or other party hired by the plan fiduciary who is independent of UBS;

(4) Not to restrict the ability of such ERISA-covered plan or IRA to terminate or withdraw from its arrangement with the UBS QPAM (including any investment in a separately managed account or pooled fund subject to ERISA and managed by such QPAM), with the exception of reasonable restrictions, appropriately disclosed in advance, that are specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors as a result of an actual lack of liquidity of the underlying assets, provided that such restrictions are applied consistently and in like manner to all such investors;

(5) Not to impose any fees, penalties, or charges for such termination or withdrawal with the exception of reasonable fees, appropriately disclosed in advance, that are specifically designed to prevent generally recognized abusive investment practices or specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors, provided that such fees are applied consistently and in like manner to all such investors;

(6) Not to include exculpatory provisions disclaiming or otherwise limiting liability of the UBS QPAM for a violation of such agreement's terms, except for liability caused by an error, misrepresentation, or misconduct of a plan fiduciary or other party hired by the plan fiduciary who is independent of UBS and its affiliates; and

(7) To indemnify and hold harmless the ERISA-covered plan or IRA for any damages resulting from a violation of applicable laws, a breach of contract, or any claim arising out of the failure of such UBS QPAM to qualify for the exemptive relief provided by PTE 84–14 as a result of a violation of Section I(g) of PTE 84–14 other than the Convictions;

(8) Within four (4) months of the effective date of this temporary exemption each UBS QPAM will: Provide a notice of its obligations under this Section I(j) to each ERISA-covered plan and IRA for which a UBS QPAM provides asset management or other discretionary fiduciary services;

(k) The UBS QPAMs comply with each condition of PTE 84–14, as amended, with the sole exceptions of the violations of Section I(g) of PTE 84–14 that are attributable to the Convictions;

(l) UBS imposes its internal procedures, controls, and protocols on UBS Securities Japan to: (1) Reduce the likelihood of any recurrence of conduct that that is the subject of the 2013 Conviction, and (2) comply in all material respects with the Business Improvement Order, dated December 16, 2011, issued by the Japanese Financial Services Authority;

(m) UBS complies in all material respects with the audit and monitoring procedures imposed on UBS by the United States Commodity Futures Trading Commission Order, dated December 19, 2012;

(n) Each UBS QPAM will maintain records necessary to demonstrate that the conditions of this temporary exemption have been met, for six (6) years following the date of any transaction for which such UBS QPAM relies upon the relief in the temporary exemption;

(o) During the effective period of this temporary exemption UBS: (1) Immediately discloses to the Department any Deferred Prosecution Agreement (a DPA) or Non-Prosecution Agreement (an NPA) that UBS or any of its affiliates enters into with the U.S. Department of Justice, to the extent such DPA or NPA involves conduct described in Section I(g) of PTE 84–14 or section 411 of ERISA; and (2) immediately provides the Department any information requested by the Department, as permitted by law, regarding the agreement and/or the conduct and allegations that led to the agreement; and

(p) A UBS QPAM will not fail to meet the terms of this proposed temporary exemption solely because a different UBS QPAM fails to satisfy a condition for relief under this proposed temporary exemption described in Sections I(c), (d), (h), (i), (j), (k), and (n).

Section II: Definitions

(a) The term ''Convictions'' means the 2013 Conviction and the 2016 Conviction. The term ''2013 Conviction'' means the judgment of conviction against UBS Securities Japan Co. Ltd. in Case Number 3:12–cr–00268–RNC in the U.S. District Court for the District of Connecticut for one count of wire fraud in violation of Title 18, United Sates Code, sections 1343 and 2 in connection with submission of YEN London Interbank Offered Rates and other benchmark interest rates. The term ''2016 Conviction'' means the anticipated judgment of conviction against UBS AG in Case Number 3:15–cr–00076–RNC in the U.S. District Court for the District of Connecticut for one count of wire fraud in violation of Title 18, United States Code, Sections 1343 and 2 in connection with UBS's submission of Yen London Interbank Offered Rates and other benchmark interest rates between 2001 and 2010. For all purposes under this proposed temporary exemption, ''conduct'' of any person or entity that is the ''subject of [a] Conviction'' encompasses any conduct of UBS and/or their personnel, that is described in the Plea Agreement, (including Exhibits 1 and 3 attached thereto), and other official regulatory or judicial factual findings that are a part of this record

(b) The term ''UBS QPAM'' means UBS Asset Management (Americas) Inc., UBS Realty Investors LLC, UBS Hedge Fund Solutions LLC, UBS O'Connor LLC, and any future entity within the Asset Management or the Wealth Management Americas divisions of UBS AG that qualifies as a ''qualified professional asset manager'' (as defined in Section VI(a) [26] of PTE 84–14) and that relies on the relief provided by PTE 84–14 and with respect to which UBS AG is an ''affiliate'' (as defined in Part VI(d) of PTE 84–14). The term ''UBS QPAM'' excludes the parent entity, UBS AG and UBS Securities Japan.

(c) The term ''UBS'' means UBS AG.

(d) The term ''Conviction Date'' means the date that a judgment of

[26] In general terms, a QPAM is an independent fiduciary that is a bank, savings and loan association, insurance company, or investment adviser that meets certain equity or net worth requirements and other licensure requirements and that has acknowledged in a written management agreement that it is a fiduciary with respect to each plan that has retained the QPAM.

conviction against UBS is entered in the 2016 Conviction.

(e) The term ''FX Misconduct'' means the conduct engaged in by UBS personnel described in Exhibit 1 of the Plea Agreement (Factual Basis for Breach) entered into between UBS AG and the Department of Justice Criminal Division, on May 20, 2015 in connection with Case Number 3:15–cr–00076–RNC filed in the U.S. District Court for the District of Connecticut.

(f) The term ''UBS Securities Japan'' means UBS Securities Japan Co. Ltd, a wholly-owned subsidiary of UBS incorporated under the laws of Japan.

(g) The term ''Plea Agreement'' means the Plea Agreement (including Exhibits 1 and 3 attached thereto) entered into between UBS AG and the Department of Justice Criminal Division, on May 20, 2015 in connection with Case Number 3:15–cr–00076–RNC filed in the U.S. District Court for the District of Connecticut.

Signed at Washington, DC, this 10th day of November 2016.

Lyssa Hall,

Director of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor.

[FR Doc. 2016–27564 Filed 11–16–16; 8:45 am]

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Employment and Training Administration

Job Corps: Environmental Assessment (EA) for the Rehabilitation or Replacement of Buildings at the Gulfport Job Corps Center, Gulfport, Mississippi

AGENCY: Employment and Training Administration (ETA), Labor.

ACTION: Notice of availability for comment of an environmental assessment

SUMMARY: Building 1 (Administration/Education Building) and Building 2 (Gymnasium)and Building 5 (Cafeteria) at the Gulfport JCC, originally built as the 33rd Avenue High School, were completed in 1954 and are considered eligible for the National Register of Historic Places (NRHP). These buildings (Buildings 1, 2, and 5) sustained extensive damage during Hurricane Katrina and have not been rehabilitated. The Gulfport JCC has been operating at reduced student capacity in the remaining three buildings and eight modular buildings. DOL proposes to redevelop the Gulfport Job Corps Center (JCC) so that it can provide training for the 280-student capacity for which it was originally designed.

DATES: Submittal of public comments must be received no later than December 19, 2016.

ADDRESSES: Comments can be submitted by email to Marsha Fitzhugh at *fitzhugh.marsha@dol.gov,* or mailed to: Ann Guissinger, Gulf South Research Corporation, 8081 Innovation Park Dr., Baton Rouge, LA 70820.

FOR FURTHER INFORMATION CONTACT: Marsha Fitzhugh, Division of Facilities and Asset Management, 200 Constitution Avenue NW., Room N–4463, Washington, DC 20210, 202–693–3099.

SUPPLEMENTARY INFORMATION: The Preferred Alternative would retain the historic appearance of the Building 1 (Administration/Education Building) and Building 2 (Gymnasium) façades while providing modern facilities behind the façades. Building 5 (Cafeteria) would be demolished and replaced by a new, modern cafeteria, and a new building would be constructed for vocational training for shop-related trades and for storage and maintenance.

Pursuant to the Council on Environmental Quality Regulations (40 CFR part 1500–08) implementing procedural provisions of the National Environmental Policy Act (NEPA), the Department of Labor, ETA, in accordance with 29 CFR 11.11(d) is announcing the availability of an Environmental Assessment (EA) that has been prepared for the Restoration or Replacement of Buildings at the Gulfport Job Corps Center located at 3300 20th Street, Gulfport, MS 39501.

Availability of the Environmental Assessment

This EA will be available at the Gulfport Public Library, 1708 25th Avenue, Gulfport, MS 39501 and at *http://www.jobcorps.gov/home.aspx.*

Signed in Washington, DC.

Portia Wu,

Assistant Secretary for Employment and Training.

[FR Doc. 2016–27696 Filed 11–16–16; 8:45 am]

BILLING CODE 4510–FT–P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Evaluation of Strategies Used in TechHire and Strengthening Working Families Initiative Grant Programs

AGENCY: Office of the Assistant Secretary for Policy, Chief Evaluation Office, Department of Labor.

ACTION: Notice.

SUMMARY: The Department of Labor (DOL), as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents is properly assessed.

Currently, the Department of Labor is soliciting comments concerning the collection of data about the Evaluation of Strategies Used in TechHire and Strengthening Working Families Initiative Grant Programs. A copy of the proposed Information Collection Request (ICR) can be obtained by contacting the office listed below in the addressee section of this notice.

DATES: Written comments must be submitted to the office listed in the addressee section below on or before January 17, 2017.

ADDRESSES: You may submit comments by either one of the following methods: *Email: ChiefEvaluationOffice@dol.gov; Mail or Courier:* Christina Yancey, Chief Evaluation Office, OASP, U.S. Department of Labor, Room S–2312, 200 Constitution Avenue NW., Washington, DC 20210. *Instructions:* Please submit one copy of your comments by only one method. All submissions received must include the agency name and OMB Control Number identified above for this information collection. Because we continue to experience delays in receiving mail in the Washington, DC area, commenters are strongly encouraged to transmit their comments electronically via email or to submit them by mail early. Comments, including any personal information

provided, become a matter of public record. They will also be summarized and/or included in the request for OMB approval of the information collection request.

FOR FURTHER INFORMATION CONTACT: Christina Yancey by email at *ChiefEvaluationOffice@dol.gov.*

SUPPLEMENTARY INFORMATION:

I. *Background:* The Chief Evaluation Office (CEO), in collaboration with the Employment and Training Administration (ETA), of the U.S. Department of Labor (DOL) seeks to build evidence about effective approaches to prepare Americans with skills and connect them to well-paying, middle- and high-skilled, and high growth jobs in H-lB industries (such as IT, healthcare, advanced manufacturing, financial services, and broadband). There is a particular interest in special populations and individuals who have traditionally faced barriers to training and employment opportunities and in learning about approaches to serving these populations and addressing barriers they may face, such as youth and young adults, parents with childcare needs, individuals with disabilities, individuals with limited English proficiency, and individuals with criminal records. The evaluation will advance the evidence on innovative approaches being used to meet these goals in the TechHire Partnership (TechHire) and Strengthening Working Families Initiative (SWFI) grant programs. The evaluation will include two components, an implementation study and an impact study.

The goal of the impact study is to provide rigorous evidence on the effectiveness of strategies used in the TechHire and SWFI grant programs. The impact study will consist of both a randomized controlled trial (RCT) and a quasi-experimental design (QED) evaluation. Six grantees will be selected to participate in an RCT. Eligible program applicants will be randomly assigned to either a program group that is offered the program or a control group that is not. The RCT will collect baseline data on key demographics and other characteristics through a random assignment intake form, employment and earnings outcomes through unemployment insurance (UI), wage record data from the National Directory of New Hires (NDNH), or, as needed, UI records from state agencies, and follow up surveys of study participants at about 6 and 18 to 24 months after random assignment. The follow up surveys will provide additional outcome measures such as employment stability and quality, completion of training, and involvement with the criminal justice system.

The QED will include all 53 TechHire and SWFI grantees and use the pooled RCT control group as the comparison group using propensity score matching. The QED will collect data from an existing MIS and UI wage record data from NDNH and/or state agencies. It will also use data from the implementation study (described below) in an effort to analyze how variation in program impacts correlates with implementation factors.

A key goal of the implementation study is to provide systematic information on all of the grantees and link the findings to impacts. For all 53 grantees, the implementation study will review grantee applications, conduct web-based surveys with grantees and partners, conduct semi-structured telephone interviews with grantees and partners, and collect data on individual participants through an existing grantee quarterly reports MIS. Additionally, for the 6 grantees in the RCT, the implementation study will include two rounds of field visits involving a mix of observations, interviews, and case file reviews. This will provide critical context for understanding the impact findings from the RCT.

This **Federal Register** Notice provides the opportunity to comment on proposed data collection instruments that will be used in the evaluation:

* *Random assignment intake form.* The random assignment process will begin with a short baseline form that collects electronically key demographic and other individual characteristics and contact information for follow-up.

* *6 Month Participant Follow-up Survey.* The survey will be administered 6 months after random assignment to the treated and control groups. To better understand the contrast between the treated and control groups 6 months after random assignment, this relatively brief survey will collect information on service receipt, employment, and job placement.

* *18 Month Participant Follow-up Survey.* The survey will be administered 18 months after random assignment to the treated and control groups. The purpose of the survey is to collect information on outcomes not available in existing data. These include current and past employment situation, hours worked, wages, shift work, employer benefits, job search activities, job satisfaction, promotion, education and training participation, criminal justice involvement, and child care.

* *Grantee Survey.* The survey will be administered to all 53 TechHire and SWFI grantees in 2018. The purpose of the survey is to collect uniform information on implementation status and a variety of program characteristics to support implementation analysis of the grant programs. These data will allow us to examine whether there is a correlation between program characteristics and impacts.

* *Partner Survey.* The survey will be administered to all partners of all 53 TechHire and SWFI grantees. The survey will explore the strength of relationships between the partners in the TechHire and SWFI grant programs. The survey will collect information on select elements of partner interactions (frequency of communication, level of collaboration, and service referrals).

* *Protocol for In-depth Telephone Interview with Grantees.* Within 6 months after the grantee survey, the evaluation team will conduct in-depth telephone interviews with each grantee. The protocol will be used to learn about challenges, successes, and barriers to implementation that are difficult to obtain using a survey.

* *Protocol for In-depth Telephone Interview with Partners.* Within 6 months after the partner survey, the evaluation team will conduct in-depth telephone interviews with one partner for each grantee. The protocol will be used to learn about the degree of engagement and successful strategies that are difficult to obtain using a survey.

* *Site Visit Protocols.* During two rounds of implementation site visits to the 6 grantees in the RCT, the evaluation team will conduct in-depth interviews with program staff and partners. The site visit protocols will be tailored to each grantee and collect information on implementation status, changes in implementation during random assignment, and degree of coordination.

II. Desired Focus of Comments: Currently, the Department of Labor is soliciting comments concerning the above data collection for the Evaluation of Strategies Used in the TechHire and SWFI programs. DOL is particularly interested in comments that do the following:

* Evaluate whether the proposed collection of information is necessary for the proper performance functions of the agency, including whether the information will have practical utility;

* evaluate the accuracy of the agency's burden estimate of the proposed information collection, including the validity of the methodology and assumptions;

* enhance the quality, utility, and clarity of the information to be collected; and

* minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology—for example, permitting electronic submissions of responses.

III. Current Actions: At this time, the Department of Labor is requesting clearance for the implementation site visit protocols, the focus group protocols, and a survey.

Type of Review: New information collection request.

OMB Control Number: 1290–0NEW.

Affected Public: TechHire and SWFI program applicants, grantees, and partners.

ESTIMATED TOTAL BURDEN HOURS

Respondents	Estimated total respondents	Number of responses per respondent	Average burden time per response (hours)	Estimated total burden (hours)
Impact Study				
Baseline Intake Form	4,800	1	.50	2,400
Participant Survey at 6-months	*3,840	1	.50	1,920
Participant Survey at 18–24 months	*3,840	1	.75	2,880
Implementation Study				
Web-based survey of grantees	53	1	.50	26.50
Web-based survey of partners	[a]530	1	.50	265
Semi-structured telephone interviews with grantees	53	1	.75	39.75
Semi-structured telephone interviews with partners	53	1	.75	39.75
Implementation site visits				
Program staff	120	1	.50	60.0
Partners	96	1	.50	48.0
Total	[b]5,705	.....	.....	7,679

* Assumes a sample of 4,800 with an 80 percent response rate.
[a] Assumes 10 partners per grantee.
[b] So as not to double-count participants who complete the baseline intake form and then also complete the follow-up participant surveys, this total only counts the 4,800 from the baseline intake form. However, all hours are calculated for the total burden.

Comments submitted in response to this request will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: November 3, 2016.

Sharon Block,

Principal Deputy Assistant Secretary for Policy, U.S. Department of Labor.

[FR Doc. 2016–27681 Filed 11–16–16; 8:45 am]

BILLING CODE 4510–HX–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2016–0009]

Advisory Committee on Construction Safety and Health (ACCSH); Notice of Renewal of Charter

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice of renewal of the ACCSH Charter.

SUMMARY: The Secretary of Labor has renewed the Charter of the Advisory Committee on Construction Safety and Health (ACCSH) for two years. The current ACCSH Charter will expire on November 17, 2016.

FOR FURTHER INFORMATION CONTACT: Mr. Damon S. Bonneau, Office of Construction Services, Directorate of Construction, Occupational Safety and Health Administration, Room N–3468, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693–2020 (TTY (877) 889–5627); email: *bonneau.damon@dol.gov.*

SUPPLEMENTARY INFORMATION: ACCSH is a continuing advisory committee established under Section 107 of the Contract Work Hours and Safety Standards Act (Construction Safety Act (CSA)) (40 U.S.C. 3704(d)(4)), to advise the Secretary and the Assistant Secretary of Labor for Occupational Safety and Health in the formulation of construction safety and health standards as well as on policy matters arising under the CSA and the Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*).

In accordance with the Federal Advisory Committee Act (FACA), as amended (5 U.S.C. App. 2 § 14(b)(2)), and its implementing regulations (41 CFR 102–3 *et seq.*), the ACCSH Charter must be renewed every two years. The current ACCSH Charter will expire on November 17, 2016. The new Charter includes minor updates to better describe the management of the Committee's records.

Authority and Signature

David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice under the authority granted by 29 U.S.C. 656; 40 U.S.C. 3704; 5 U.S.C. App. 2; 29 CFR parts 1911 and 1912; 41 CFR 102–3; and Secretary of Labor's Order No. 1–2012 (77 FR 3912, Jan. 25, 2012).

Signed at Washington, DC, on November 8, 2016.

David Michaels,

Assistant Secretary of Labor for Occupational Safety and Health.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: (16–081)]

NASA Advisory Council; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, as amended, the National Aeronautics and Space Administration (NASA) announces a meeting of the NASA Advisory Council.

DATES: Wednesday, November 30, 2016, 10:30 a.m.–6:30 p.m., Local Time.

ADDRESSES: The NASA AERO Institute, 38256 Sierra Highway, Palmdale, CA 93550

FOR FURTHER INFORMATION CONTACT: Ms. Marla King, NAC Administrative Officer, NASA Headquarters, Washington, DC 20546, (202) 358–1148.

SUPPLEMENTARY INFORMATION: This meeting will be open to the public up to the capacity of the meeting room. This meeting is also available telephonically and by WebEx. You must use a touch-tone phone to participate in this meeting. Any interested person may dial the toll-free number 1–888–831–6084 or toll number 1–312–470–7172, Passcode: 4690949 followed by the # sign. If dialing in, please ''mute'' your phone. To join via WebEx, the link is *https://nasa.webex.com/* the meeting number is 998 278 065 and the password is NACNOV16! (case sensitive). The agenda for the meeting will include reports from the following:

—Aeronautics Committee
—Human Exploration and Operations Committee
—Institutional Committee
—Science Committee
—Technology, Innovation and Engineering Committee
—Ad Hoc Task Force on STEM Education

Attendees will be required to sign a register. It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the key participants.

Carol J. Hamilton,

Acting Advisory Committee Management Officer, National Aeronautics and Space Administration.

NATIONAL SCIENCE FOUNDATION

Proposal Review Panel for Computing and Communication Foundations; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name: Proposal Panel Review for Computing and Communication Foundations—Science and Technology Centers Integrative Partnerships (#1192) Site Visit.

Date/Time:

December 5, 2016; 6:30 p.m.–8:30 p.m.

December 6, 2016; 8:00 a.m.–8:00 p.m.

December 7, 2016; 8:30a.m.–3:00 p.m.

Place: Purdue University, West Lafayette, IN.

Type of Meeting: Part-Open.

Contact Person: John Cozzens, National Science Foundation, 4201 Wilson Boulevard, Room 1115, Arlington, VA 22230. Telephone: (703) 292–8910.

Purpose of Meeting: To assess the progress of the STC Award: 0939370, ''Emerging Frontiers of Science of Information'', and to provide advise and recommendations concerning further NSF support for the Center.

Agenda: CSol Site Visit.

Monday, December 5, 2016

6:30 p.m. to 8:30 p.m.: CLOSED—Site Team and NSF Staff meets to discuss Site Visit materials, review process and charge.

Tuesday, December 6, 2016

8:00 a.m. to 1:00 p.m.: OPEN—Presentations by Awardee Institution, faculty staff and students, to Site Team and NSF Staff. Discussions and question and answer sessions.

1:00 p.m.–8:00 p.m.: CLOSED—Draft report on education and research activities.

Wednesday, December 7, 2016

8:30 a.m.–12:00 p.m.: OPEN—Response presentations by Site Team and NSF Staff Awardee Institution faculty staff. Discussions and question and answer sessions.

12:00 p.m. to 3:00 p.m.: CLOSED—Complete written site visit report with preliminary recommendations.

Reason for Closing: The closed portions of the site review will include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the award. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: November 14, 2016.

NATIONAL SCIENCE FOUNDATION

Proposal Review; Notice of Meetings

In accordance with the Federal Advisory Committee Act (Pub., L. 92–463, as amended), the National Science Foundation (NSF) announces its intent to hold proposal review meetings throughout the year. The purpose of these meetings is to provide advice and recommendations concerning proposals submitted to the NSF for financial support. The agenda for each of these meetings is to review and evaluate proposals as part of the selection process for awards. The review and evaluation may also include assessment of the progress of awarded proposals. The majority of these meetings will take place at NSF, 4201 Wilson Blvd., Arlington, Virginia 22230.

These meetings will be closed to the public. The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act. NSF will continue to review the agenda and merits of each meeting for overall compliance of the Federal Advisory Committee Act.

These closed proposal review meetings will not be announced on an individual basis in the **Federal Register**. NSF intends to publish a notice similar to this on a quarterly basis. For an advance listing of the closed proposal review meetings that include the names of the proposal review panel and the time, date, place, and any information on changes, corrections, or cancellations, please visit the NSF Web site: *http://www.nsf.gov/events/.* This information may also be requested by telephoning, 703–292–8687.

Dated: November 14, 2016.

Crystal Robinson,

Committee Management Officer.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–275 and 50–323; NRC–2016–0237]

Diablo Canyon Power Plant, Units 1 and 2

AGENCY: Nuclear Regulatory Commission.

ACTION: Request for action; receipt.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is giving notice that, by petition dated July 14, 2016, and submitted by Mr. Lochbaum (the petitioner) on behalf of the Union of Concerned Scientists, the petitioner has requested that the NRC take action with regard to Diablo Canyon Power Plant, Units 1 and 2 (DCPP). The petitioner's requests are included in the **SUPPLEMENTARY INFORMATION** section of this document.

ADDRESSES: Please refer to Docket ID NRC–2016–0237 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0237. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''ADAMS Public Documents'' and then select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced (if that document is available in ADAMS) is provided the first time that a document is referenced.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Margaret M. Watford, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington DC 20555–0001; telephone: 301–415–1233, email: *Margaret.Watford@nrc.gov.*

SUPPLEMENTARY INFORMATION: On July 14, 2016, the petitioner requested that the NRC take action with regard to DCPP (ADAMS Accession No. ML16196A294). The petitioner requested the NRC to issue a Demand for Information pursuant to section 2.204 of title 10 of the *Code of Federal Regulations* (10 CFR), to Pacific Gas and Electric Company (PG&E, the licensee for DCPP) requiring the company to provide the NRC with a written explanation as to why its license amendment request dated June 17, 2015 (ADAMS Package Accession No. ML15176A539), failed to provide complete and accurate information needed by the NRC staff to complete its review and the measures it will implement so as to comply with 10 CFR 50.9, ''Completeness and accuracy of information,'' in future submittals to the NRC.

As a basis for this request, the petitioner states that the NRC's numerous requests for additional information during the license amendment process constitute prima facie evidence that PG&E violated 10 CFR 50.9 due to the incomplete and inaccurate information in the original license amendment request.

The request is being treated pursuant to 10 CFR 2.206 of the Commission's regulations and has been referred to the Director of the Office of Nuclear Reactor Regulation. The petitioner submitted supplemental information (ADAMS Accession No. ML16215A109) and addressed the Petition Review Board via teleconference on August 2, 2016, to discuss the petition; the transcript of that meeting is an additional supplement to the petition (ADAMS Accession No. ML16232A570). The results of that discussion were considered in the Board's determination regarding the petitioner's request for enforcement action and in establishing the schedule for the review of the petition. The Director determined that the petitioner's request for enforcement action at DCPP met the criteria for review under the 10 CFR 2.206 process. The NRC will take appropriate action on this petition within a reasonable time.

Dated at Rockville, Maryland, this 9th day of November, 2016.

For the Nuclear Regulatory Commission.

William M. Dean,

Director, Office of Nuclear Reactor Regulation.

[FR Doc. 2016–27656 Filed 11–16–16; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–482; NRC–2016–0234]

Wolf Creek Generating Station; Consideration of Approval of Transfer of License

AGENCY: Nuclear Regulatory Commission.

ACTION: Application for indirect transfer of license; opportunity to comment, request a hearing, and petition for leave to intervene.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) received and is considering approval of an indirect license transfer application filed by Wolf Creek Nuclear Operating Company (WCNOC) on July 22, 2016. The WCNOC is the licensed operator of Wolf Creek Generating Station (WCGS). Kansas City Power and Light Company (KCP&L) and Kansas Gas and Electric Company (KG&E) are two of the three non-operating owner licensees, each holding 47 percent undivided interest in WCGS and 47 percent of the stock of WCNOC. The KCP&L is a subsidiary of Great Plains Energy Incorporated (Great Plains) and KG&E is a subsidiary of Westar Energy Incorporated (Westar). The indirect license transfer will result from the proposed merger of Great Plains and Westar, with Westar as wholly-owned subsidiary of Great Plains.

DATES: Comments must be filed by December 19, 2016. A request for a hearing must be filed by December 7, 2016.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0234. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Email comments to: Hearingdocket@nrc.gov.* If you do not receive an automatic email reply confirming receipt, then contact us at 301–415–1677.
- *Fax comments to:* Secretary, U.S. Nuclear Regulatory Commission at 301–415–1101.
- *Mail comments to:* Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Rulemakings and Adjudications Staff.
- *Hand deliver comments to:* 11555 Rockville Pike, Rockville, Maryland 20852, between 7:30 a.m. and 4:15 p.m. (Eastern Time) Federal workdays; telephone: 301–415–1677.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Balwant K. Singal, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–3016, email: *Balwant.Singal@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0234 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0234.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The application for indirect transfer of the license dated July 22, 2016, is available in ADAMS under Accession No. ML16208A250.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2016–0234 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at *http://www.regulations.gov* as well as entering the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Introduction

The NRC is considering the issuance of an order under § 50.80 of title 10 of the *Code of Federal Regulations* (10 CFR), approving the indirect transfer of control of WCGS, Facility Operating License No. NPF–42, currently held by WCNOC. The WCNOC is the licensed operator of WCGS. The KCP&L and KG&E are two of the three non-operating owner licensees, each holding 47 percent undivided interest in WCGS and 47 percent of the stock of WCNOC. Kansas Electric Power Cooperative, Incorporated (KEPCo) holds rest of the 6 percent undivided interest in WCGS and 6 percent of the stock of WCNOC. The KCP&L is a subsidiary of Great Plains Energy Incorporated (Great Plains) and KG&E is a subsidiary of Westar Energy Incorporated (Westar). The indirect license transfer will result from the proposed merger of Great Plains and Westar, with Westar as wholly-owned subsidiary of Great Plains. The current and intended ownership structure of the facility is depicted in the simplified organization chart provided in Figures 1 and 2 of the letter dated July 22, 2016. The KCP&L and KG&E will each continue to hold their respective 47.0 percent interests in WCNOC and WCGS. The KCP&L and KG&E will continue to operate as separate electric utilities responsible for their pro rata shares of the costs of operating WCGS and entitled to their pro rata shares of the capacity, energy and other energy products produced by WCGS. Great Plains will indirectly own a combined interest in WCGS of 94.0 percent. The WCNOC will continue to be the operator of WCGS. The remaining 6.0 percent ownership interest of KEPCo is not affected by the Merger.

No physical changes to the WCGS or operational changes are being proposed in the application.

The NRC's regulations at 10 CFR 50.80 state that no license, or any right thereunder, shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission gives its consent in writing. The Commission will approve an application for the indirect transfer of a license, if the Commission determines that the proposed merger will not affect the qualifications of the licensee to hold the license, and that the transfer is otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission.

III. Opportunity To Comment

Within 30 days from the date of publication of this notice, persons may submit written comments regarding the license transfer application, as provided for in 10 CFR 2.1305. The Commission will consider and, if appropriate, respond to these comments, but such comments will not otherwise constitute part of the decisional record. Comments should be submitted as described in the **ADDRESSES** section of this document.

IV. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 20 days after the date of publication of this notice, any person (petitioner) whose interest may be affected by this action may file a request for a hearing and a petition to intervene (petition) with respect to the action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309, which is available at the NRC's PDR, located at One White Flint North, Room O1–F21, 11555 Rockville Pike (first floor), Rockville, Maryland 20852. The NRC's regulations are accessible electronically from the NRC Library on the NRC's Web site at *http://www.nrc.gov/reading-rm/doc-collections/cfr/.* If a petition is filed within 20 days, the Commission or a presiding officer designated by the Commission or by the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel, will rule on the petition, and the Secretary or the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.309, a petition shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following general requirements: (1) The name, address, and telephone number of the petitioner; (2) the nature of the petitioner's right under the Act to be made a party to the proceeding; (3) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (4) the possible effect of any decision or order which may be entered in the proceeding on the petitioner's interest. The petition must also set forth the specific contentions which the petitioner seeks to have litigated at the proceeding.

Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion to support its position on the issue. The petition must include sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the proceeding. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to satisfy these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing with respect to resolution of that person's admitted contentions consistent with the NRC's regulations, policies, and procedures.

Petitions for leave to intervene must be filed no later than 20 days from the date of publication of this notice. Requests for hearing, petitions for leave to intervene, and motions for leave to file new or amended contentions that are filed after the 20-day deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

A State, local governmental body, Federally-recognized Indian Tribe, or agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h)(1).

The petition should state the nature and extent of the petitioner's interest in the proceeding. The petition should be submitted to the Commission by December 7, 2016. The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document, and should meet the requirements for petitions set forth in this section, except that under 10 CFR 2.309(h)(2) a State, local governmental body, or Federally-recognized Indian Tribe, or agency thereof does not need to address the standing requirements in 10 CFR 2.309(d) if the facility is located within its boundaries. A State, local governmental body, Federally-recognized Indian Tribe, or agency thereof may also have the opportunity to participate under 10 CFR 2.315(c).

If a hearing is granted, any person who does not wish, or is not qualified, to become a party to the proceeding may, in the discretion of the presiding officer, be permitted to make a limited appearance pursuant to the provisions of 10 CFR 2.315(a). A person making a limited appearance may make an oral or written statement of position on the issues, but may not otherwise participate in the proceeding. A limited appearance may be made at any session of the hearing or at any prehearing conference, subject to the limits and conditions as may be imposed by the presiding officer. Details regarding the opportunity to make a limited appearance will be provided by the presiding officer if such sessions are scheduled.

V. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including a request for hearing, a petition for leave to intervene, any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene (hereinafter ''petition''), and documents filed by interested governmental entities participating under 10 CFR 2.315(c), must be filed in accordance with the NRC's E-Filing rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562, August 3, 2012). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *hearing.docket@nrc.gov,* or by telephone at 301–415–1677, to request (1) a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign documents and access the E-Submittal server for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals/getting-started.html.* System requirements for accessing the E-Submittal server are available on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals/adjudicatory-sub.html.* Participants may attempt to use other software not listed on the Web site, but should note that the NRC's E-Filing system does not support unlisted software, and the NRC Electronic Filing Help Desk will not be able to offer assistance in using unlisted software.

Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit a petition. Submissions should be in Portable Document Format (PDF). Additional guidance on PDF submissions is available on the NRC's public Web site at *http://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the documents are submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email notice confirming receipt of the document. The E-Filing system also distributes an email notice that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the documents on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before a hearing petition to intervene is filed so that they can obtain access to the document via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 7 p.m., Eastern

Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, 11555 Rockville Pike, Rockville, Maryland, 20852, Attention: Rulemaking and Adjudications Staff. Participants filing a document in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket which is available to the public at *http://ehd1.nrc.gov/ehd/,* unless excluded pursuant to an order of the Commission, or the presiding officer. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or home phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. However, in some instances, a petition will require including information on local residence in order to demonstrate a proximity assertion of interest in the proceeding. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

The Commission will issue a notice or order granting or denying a hearing request or intervention petition, designating the issues for any hearing that will be held and designating the Presiding Officer. A notice granting a hearing will be published in the **Federal Register** and served on the parties to the hearing.

For further details with respect to this application, see the application dated July 22, 2016.

Dated at Rockville, Maryland, this 8th day of November 2016.

For the Nuclear Regulatory Commission.

Balwant K. Singal,

Senior Project Manager, Plant Licensing Branch IV–1, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

PEACE CORPS

Information Collection Request Submission for OMB Review

AGENCY: Peace Corps.

ACTION: 60-day notice and request for comments.

SUMMARY: The Peace Corps will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval. The purpose of this notice is to allow 60 days for public comment in the **Federal Register** preceding submission to OMB. We are conducting this process in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

DATES: Submit comments on or before January 17, 2017.

ADDRESSES: Comments should be addressed to Denora Miller, FOIA/Privacy Act Officer. Denora Miller can be contacted by telephone at 202–692–1236 or email at *pcfr@peacecorps.gov.* Email comments must be made in text and not in attachments.

FOR FURTHER INFORMATION CONTACT: Denora Miller at Peace Corps address above.

SUPPLEMENTARY INFORMATION:

Title: Individual Specific Medical Evaluation Forms (15).

OMB Control Number: 0420–0550.

Type of Request: Revision/New.

Affected Public: Individuals/Physicians.

Respondents Obligation to Reply: Voluntary.

Respondents: Potential and current volunteers.

Burden to the Public:

• Asthma Evaluation Form	
(a) Estimated number of Applicants/physicians.	700/700.
(b) Frequency of response	one time.
(c) Estimated average burden per response.	75 minutes/30 minutes.
(d) Estimated total reporting burden.	875 hours/350 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: When an Applicant reports on the Health History Form any history of asthma, he or she will be provided an Asthma Evaluation Form for the treating physician to complete The Asthma Evaluation Form asks for the physician to document the Applicant's condition of asthma, including any asthma symptoms, triggers, treatments, or limitations or restrictions due to the condition. This form will be used as the basis for an individualized determination as to whether the Applicant will, with reasonable accommodation, be able to perform the essential functions of a Peace Corps Volunteer and complete a tour of service without unreasonable disruption due to health problems. This form will also be used to determine the type of accommodation that may be needed, such as placement of the Applicant within reasonable proximity to a hospital in case treatment is needed for a severe asthma attack.

• Diabetes Diagnosis Form	
(a) Estimated number of Applicants/physicians.	55/55.
(b) Frequency of response	one time.
(c) Estimated average burden per response.	75 minutes/30 minutes.
(d) Estimated total reporting burden.	69 hours/28 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: When an Applicant reports the condition of diabetes Type 1 on the Health History Form, the Applicant will be provided a Diabetes Diagnosis Form for the treating physician to complete. In certain cases, the Applicant may also be asked to have the treating physician complete a Diabetes Diagnosis Form if the Applicant reports the condition of diabetes Type 2 on the Health History Form. The Diabetes Diagnosis Form asks the physician to document the diabetes diagnosis, etiology, possible complications, and treatment. This form will be used as the basis for an individualized determination as to whether the Applicant will, with reasonable accommodation, be able to perform the essential functions of a Peace Corps Volunteer assignment and complete a tour of service without unreasonable disruption due to health problems. This form will also be used to determine the type of accommodation that may be needed, such as placement

of an Applicant who requires the use of insulin in order to ensure that adequate insulin storage facilities are available at the Applicant's site.

• Transfer of Care—Request for Information Form

(a) Estimated number of Applicants/physicians.	1270/1270.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response.	75 minutes/30 minutes.
(d) Estimated total reporting burden.	1588 hours/635 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: When an Applicant reports on the Health History Form a medical condition of significant severity (other than one covered by another form), he or she may be provided the Transfer of Care—Request for Information Form for the treating physician to complete. The Transfer of Care—Request for Information Form may also be provided to an Applicant whose responses on the Health History Form indicate that the Applicant may have an unstable medical condition that requires ongoing treatment. The Transfer of Care—Request for Information Form asks the physician to document the diagnosis, current treatment, physical limitations and the likelihood of significant progression of the condition over the next three years. This form will be used as the basis for an individualized determination as to whether the Applicant will, with reasonable accommodation, be able to perform the essential functions of a Peace Corps Volunteer assignment and complete a tour of service without unreasonable disruption due to health problems. This form will also be used to determine the type of accommodation (*e.g.,* avoidance of high altitudes or proximity to a hospital) that may be needed to manage the Applicant's medical condition.

• Mental Health Current Evaluation and Treatment Summary Form

(a) Estimated number of Applicants/professional.	1221/1221.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response.	105 minutes/60 minutes.
(d) Estimated total reporting burden.	2137 hours/1221 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: The Mental Health Current Evaluation Form will be used when an Applicant reports on the Health History Form a history of certain serious mental health conditions, such as bipolar disorder, schizophrenia, mental health hospitalization, attempted suicide or cutting, or treatments or medications related to these conditions. In these cases, an Applicant will be provided a Mental Health Current Evaluation and Treatment Summary Form for a licensed mental health counselor, psychiatrist or psychologist to complete. The Mental Health Current Evaluation and Treatment Summary Form asks the counselor, psychiatrist or psychologist to document the dates and frequency of therapy sessions, clinical diagnoses, symptoms, course of treatment, psychotropic medications, mental health history, level of functioning, prognosis, risk of exacerbation or recurrence while overseas, recommendations for follow up and any concerns that would prevent the Applicant from completing 27 months of service without unreasonable disruption. A current mental health evaluation might be needed if information on the condition is outdated or previous reports on the condition do not provide enough information to adequately assess the current status of the condition. This form will be used as the basis for an individualized determination as to whether the Applicant will, with reasonable accommodation, be able to perform the essential functions of a Peace Corps Volunteer and complete a tour of service without unreasonable disruption due to health problems. This form will also be used to determine the type of accommodation that may be needed, such as placement of the Applicant in a country with appropriate mental health support.

• Functional Abilities Evaluation Form

(a) Estimated number of Applicants/professional.	300/300.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response.	90 minutes/45 minutes.
(d) Estimated total reporting burden.	390 hours/225 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: When an Applicant reports on the Health History Form a functional ability limitation he or she will be provided this form to determine the type of accommodation and/or placement program support (*e.g.,* proximity to program site, support support devices) that may be needed to manage the Applicant's medical condition. This form will be used as the basis for an individualized determination as to whether the Applicant will, with reasonable accommodation, be able to perform the essential functions of a Peace Corps Volunteer assignment and complete a tour of service without unreasonable disruption due to health problems.

• Eating Disorder Treatment Summary Form

(a) Estimated number of Applicants/physicians.	282/282.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response.	105 minutes/60 minutes.
(d) Estimated total reporting burden.	494 hours/282 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: The Eating Disorder Treatment Summary will be used when an Applicant reports a past or current eating disorder diagnosis in the Health History Form. In these cases the Applicant is provided an Eating Disorder Treatment Summary Form for a mental health specialist, preferably with eating disorder training, to complete. The Eating Disorder Treatment Summary Form asks the mental health specialist to document the dates and frequency of therapy sessions, clinical diagnoses, presenting problems and precipitating factors, symptoms, Applicant's weight over the past three years, relevant family history, course of treatment, psychotropic medications, mental health history inclusive of eating disorder behaviors, level of functioning, prognosis, risk of recurrence in a stressful overseas environment, recommendations for follow up, and any concerns that would prevent the Applicant from completing 27 months of service without unreasonable disruption due to the diagnosis. This form will be used as the basis for an individualized determination as to whether the Applicant will, with reasonable accommodation, be able to perform the essential functions of a Peace Corps Volunteer assignment and complete a tour of service without unreasonable disruption due to health problems. This form will also be used to determine the type of accommodation that may be needed, such as placement of the Applicant in a country with appropriate mental health support.

• Substance-Related and Addictive Disorders Current Evaluation Form

(a) Estimated number of Applicants/specialist.	373/373.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response165 minutes/60.	minutes.
(d) Estimated total reporting burden1026 hours/373 hours.	.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: The Alcohol/Substance Abuse Current

Evaluation Form is used when an Applicant reports in the Health History Form a history of substance abuse (*i.e.,* alcohol or drug related problems such as blackouts, daily or heavy drinking patterns or the misuse of illegal or prescription drugs) and that this substance abuse affects the Applicant's daily living or that the Applicant has ongoing symptoms of substance abuse. In these cases, the Applicant is provided an Substance-Related and Addictive Disorders Current Evaluation Form for a substance abuse specialist to complete. The Substance-Related and Addictive Disorders Current Evaluation Form asks the substance abuse specialist to document the history of alcohol/substance abuse, dates and frequency of any therapy sessions, which alcohol/substance abuse assessment tools were administered, mental health diagnoses, psychotropic medications, self harm behavior, current clinical assessment of alcohol/substance use, clinical observations, risk of recurrence in a stressful overseas environment, recommendations for follow up, and any concerns that would prevent the Applicant from completing a tour of service without unreasonable disruption due to the diagnosis. This form will be used as the basis for an individualized determination as to whether the Applicant will, with reasonable accommodation, be able to perform the essential functions of a Peace Corps Volunteer and complete a tour of service without unreasonable disruption due to health problems. This form will also be used to determine the type of accommodation that may be needed, such as placement of the Applicant in a country with appropriate sobriety support or counseling support.

• Mammogram Waiver Form

(a) Estimated number of Applicants.	148.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response.	105 minutes.
(d) Estimated total reporting burden.	259 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: The Mammogram Form is used for all Applicants who have female breasts and will be 50 years of age or older during service who wish to waive routine mammogram screening during service. If an Applicant waives routine mammogram screening during service, the Applicant's physician is asked to complete this form in order to make a general assessment of the Applicant's statistical breast cancer risk and discussed the results with the Applicant including the potential adverse health consequence of foregoing screening mammography.

• Cervical Cancer Screening Form

(a) Estimated number of Applicants.	3600/3600.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response.	40 minutes/30 minutes.
(d) Estimated total reporting burden.	2400 hours/1800 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: The Cervical Cancer Screening Form is used with all Applicants with a cervix. Prior to medical clearance, female Applicants are required to submit a current cervical cancer screening examination and Pap cytology report based the American Society for Colploscopy and Cervical Pathology (ASCCP) screening time-line for their age and Pap history. This form assists the Peace Corps in determining whether an Applicant with mildly abnormal Pap history will need to be placed in a country with appropriate support.

• Colon Cancer Screening Form

(a) Estimated number of Applicants.	575.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response.	60 minutes—165 minutes.
(d) Estimated total reporting burden.	575 hours—1581 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: The Colon Cancer Screening Form is used with all Applicants who are 50 years of age or older to provide the Peace Corps with the results of the Applicant's latest colon cancer screening. Any testing deemed appropriate by the American Cancer Society is accepted. The Peace Corps uses the information in the Colon Cancer Screening Form to determine if the Applicant currently has colon cancer. Additional instructions are included pertaining to abnormal test results.

• ECG Form

(a) Estimated number of Applicants/physicians.	575/575.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response.	25 minutes/15 minutes.
(d) Estimated total reporting burden.	240 hours/144 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: The ECG/EKG Form is used with all Applicants who are 50 years of age or older to provide the Peace Corps with the results of an electrocardiogram. The Peace Corps uses the information in the electrocardiogram to assess whether the Applicant has any cardiac abnormalities that might affect the Applicant's service. Additional instructions are included pertaining to abnormal test results. The electrocardiogram is performed as part of the Applicant's physical examination.

• Reactive Tuberculin Test Evaluation Form

(a) Estimated number of Applicants/physicians.	392/392.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response.	75–105 minutes/30 minutes.
(d) Estimated total reporting burden.	490–686 hours/196 hours.
(e) Estimated annual cost to respondents Indeterminate.	

General Description of Collection: The Reactive Tuberculin Test Evaluation Form is used when an Applicant reports a history of treatment for active tuberculosis or a history of a positive tuberculosis (TB) test on their Health History Form or if a positive TB test result is noted as a component of the Applicant's physical examination findings. In these cases, the Applicant is provided a Reactive Tuberculin Test Evaluation Form for the treating physician to complete. The treating physician is asked to document the type and date of a current TB test, TB test history, diagnostic tests if indicated, treatment history, risk assessment for developing active TB, current TB symptoms, and recommendations for further evaluation and treatment. In the case of a positive result on the TB test, a chest x-ray may be required, along with treatment for latent TB.

• Insulin Dependent Supplemental Documentation Form

(a) Estimated number of Applicants/physicians.	14/14.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response.	70 minutes/60 minutes.
(d) Estimated total reporting burden.	16 hours/14 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: The Insulin Dependent Supplemental Documentation Form is used with Applicants who have reported on the Health History Form that they have insulin dependent diabetes. In these cases, the Applicant is provided an Insulin Dependent Supplemental Documentation Form for the treating physician to complete. The Insulin Dependent Supplemental Documentation Form asks the treating physician to document that he or she has discussed with the Applicant medication (insulin) management,

including whether an insulin pump is required, as well as the care and maintenance of all required diabetes related monitors and equipment. This form assists the Peace Corps in determining whether the Applicant will be in need of insulin storage while in service and, if so, will assist the Peace Corps in determining an appropriate placement for the Applicant.

• Prescription for Eyeglasses Form	
(a) Estimated number of Applicants/physicians.	3,293/3,293.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response.	60 minutes/15 minutes.
(d) Estimated total reporting burden.	3,293 hours/824 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: The Prescription for Eyeglasses is used with Applicants who have reported on the Health History Form that they use corrective lenses or otherwise have uncorrected vision that is worse than 20/40. In these cases, Applicants are provided a Prescription for Eyeglasses Form for their prescriber to indicate eyeglasses frame measurements, lens instructions, type of lens, gross vision and any special instructions. This form is used in order to enable the Peace Corps to obtain replacement eyeglasses for a Volunteer during service.

• Required Peace Corps Immunizations Form	
(a) Estimated number of Applicants/physicians.	5,600.
(b) Frequency of response ...	one time.
(c) Estimated average burden per response.	60 minutes.
(d) Estimated total reporting burden.	5,600 hours.
(e) Estimated annual cost to respondents.	Indeterminate.

General Description of Collection: The Required Peace Corps Immunizations Form is used to informed Applicants of the specific vaccines and/or documented proof of immunity required for medical clearance for the specific country of service. The form advises the Applicant that all other Center for Disease Control (CDC) recommended vaccinations will be administered after arrival in-country. This form assists the Peace Corps with establishing a baseline of the Applicants immunization history and prepare for any additional vaccines recommended for country of service.

Request for Comment: Peace Corps invites comments on whether the proposed collections of information are necessary for proper performance of the functions of the Peace Corps, including whether the information will have practical use; the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the information to be collected; and, ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

This notice is issued in Washington, DC, on November 8, 2016.

Monique Harris,

FOIA/Privacy Act Specialist, Management.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79291; File No. SR–NYSEArca–2016–144]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the NYSE Arca Options Fee Schedule Effective November 3, 2016

November 10, 2016.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on November 3, 2016, NYSE Arca, Inc. (the ''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend the NYSE Arca Options Fee Schedule (''Fee Schedule''). The Exchange proposes to implement the fee change effective November 3, 2016. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to amend the Fee Schedule effective November 3, 2016. Specifically, the Exchange proposes to (i) modify the qualification for Tier 6 of Customer and Professional Customer Monthly Posting Credit Tiers and Qualifications in Penny Pilot Issues (the ''Posting Tiers''); and (ii) modify one aspect of the Customer and Professional Customer Incentive Program.

Currently, to qualify for Tier 6 of the Posting Tiers, OTP Holders and OTP Firms (''OTPs'') must execute at least 0.50% of Total Industry Customer equity and ETF option ADV (''TCADV'') from Customer and Professional Customer posted orders in all issues (''the options component''), plus executed ADV of 0.70% of U.S. equity market share posted and executed on NYSE Arca Equity Market (''the equity component''). OTPs that achieve Tier 6 are eligible to receive a $0.48 credit applied to posted electronic Customer and Professional Customer executions in Penny Pilot Issues.

In addition, the Customer and Professional Customer Incentive Program (''the Incentive Program''), which provides OTPs six alternatives to earn additional posting credits ranging from $0.01 to $0.05, currently affords OTPs the ability to earn an additional $0.03 credit on Customer and Professional Customer Posting Credits by meeting the same 0.70% minimum qualification of the equity component as set forth in Tier 6.

The Exchange is proposing to modify Tier 6 of the Posting Tiers by reducing the options component from 0.50% TCADV to 0.35% TCADV, while increasing the threshold of the equity component from 0.70% to 0.80% of U.S.

equity market share posted and executed on NYSE Arca Equity Market.

In addition, to maintain parity with the Incentive Program that likewise offers a credit when an OTP meets the same 0.70% minimum qualification of the equity component as set forth in current Tier 6, the Exchange similarly proposes to increase this qualification basis. Specifically, the Exchange proposes to increase the equity threshold alternative from 0.70% to 0.80% of U.S. equity market share posted and executed on NYSE Arca Equity Market qualification in order for OTPs to qualify to earn an additional $0.03 credit.

The Exchange believes that the proposal to modify Tier 6 of the Posting Tiers by reducing the option component, while increasing the equity component would encourage greater participation on both the options and equity exchanges. The Exchange likewise believes that the proposed change to the Incentive Program would operate to maintain parity with the similar, alternative incentives offered by the Exchange and would also encourage participation in the NYSE Arca Equity Market.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Sections 6(b)(4) and (5) of the Act,[5] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Exchange believes that the proposed to modifications to the qualifications for Tier 6 of the Posting Tiers, and the similar adjustment to the Incentive Program, are reasonable, equitable, and not unfairly discriminatory because the changes are designed to attract additional Customer and Professional Customer electronic equity and ETF option volume to the Exchange, which would benefit all participants by offering greater price discovery, increased transparency, and an increased opportunity to trade on the Exchange. The Exchange believes that adjusting the methods for achieving the credits available on the Exchange (*i.e.,* by reducing the qualification basis for the options component, while increasing the qualification basis for the equity component) is reasonable, equitable and not unfairly discriminatory because it would encourage more OTPs to direct both options and equity volume to the Exchange in an effort to qualify for the credits.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[6] the Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, the Exchange believes that the proposed changes would continue to encourage competition, including by attracting additional liquidity to the Exchange, which would continue to make the Exchange a more competitive venue for, among other things, order execution and price discovery. The Exchange does not believe that the proposed change would impair the ability of any market participants or competing order execution venues to maintain their competitive standing in the financial markets.

The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues. In such an environment, the Exchange must continually review, and consider adjusting, its fees and credits to remain competitive with other exchanges. Because competitors are free to modify their own fees and credits in response, and because market participants may readily adjust their order routing practices, the degree to which fee changes in this market may impose any burden on competition is extremely limited. For the reasons described above, the Exchange believes that the proposed rule change reflects this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)[7] of the Act and subparagraph (f)(2) of Rule 19b–4[8] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[9] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–NYSEArca–2016–144 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2016–144. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public

[4] 15 U.S.C. 78f(b).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79290; File Nos. SR–BX–2016–046; SR–NASDAQ–2016–111]

Self-Regulatory Organizations; NASDAQ BX, Inc.; The Nasdaq Stock Market LLC; Order Approving Proposed Rule Changes, as Modified by Amendments No. 1, Relating to Post-Only Orders and Orders With Midpoint Pegging

November 10, 2016.

I. Introduction

On September 13, 2016, NASDAQ BX, Inc. (''BX'') and The Nasdaq Stock Market LLC (''Nasdaq'') (individually, an ''Exchange,'' and together, the ''Exchanges'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] proposed rule changes relating to Post-Only Orders and Orders with Midpoint Pegging. The proposed rule changes were published for comment in the **Federal Register** on September 28, 2016.[3] On October 5, 2016, Nasdaq filed Amendment No. 1 to its proposed rule change (''Nasdaq Amendment No. 1'') and on November 3, 2016, BX filed Amendment No. 1 to its proposed rule change (''BX Amendment No. 1'').[4] The Commission received one comment letter on Nasdaq's proposed rule change[5] and a response letter from Nasdaq.[6] The Commission is approving the Exchanges' proposals, as modified by their corresponding Amendment No. 1.

II. Description of the Proposed Rule Changes

The Exchanges are proposing to amend the behavior of Post-Only Orders when they interact with resting Non-Displayed Orders, and the behavior of Orders with Midpoint Pegging in a crossed market. The Exchanges' proposals are substantively identical in many respects. Therefore, the description below describes the proposals jointly but notes material differences where applicable.[7]

Currently, BX and Nasdaq Rules 4702(b)(4)(A) provide that, if the adjusted price[8] of a Post-Only Order would lock or cross an Order on the respective Exchange's Book, the Post-Only Order would be repriced, ranked, and displayed at one minimum price increment below the current best-priced Order to sell on the respective Exchange's Book (for bids) or above the current best-priced Order to buy on the respective Exchange's Book (for offers). Under the proposals,[9] if the adjusted price of the Post-Only Order would lock or cross a non-displayed price on the respective Exchange's Book, the Post-Only order would be posted in the same manner as a Price to Comply Order.[10] However, the Post Only Order would execute:

- On Nasdaq if (i) it is priced below $1.00 and the value of price improvement associated with executing against an Order on the Nasdaq Book (as measured against the original limit price of the Order) equals or exceeds the sum of fees changed for such execution and the value of any rebate that would be provided if the Order posted to the Nasdaq Book and subsequently provided liquidity, or (ii) it is priced at $1.00 or more and the value of price improvement associated with executing against an Order on the Nasdaq Book (as measured against the original limit price of the Order) equals or exceeds $0.01 per share; [11] and
- on BX, if (i) it is priced at $1.00 or more,[12] or (ii) it is priced below $1.00 and the value of price improvement associated with executing against an Order on the Exchange Book (as measured against the original limit price of the Order) equals or exceeds the sum of fees charged for such execution and the value of any rebate that would be provided if the Order posted to the Exchange Book and subsequently provided liquidity.[13]

Currently, BX and Nasdaq Rules 4702(b)(4)(A) also provide that, if the Post-Only Order would not lock or cross a Protected Quotation but would lock or cross an Order on the respective Exchange's Book, the Post Only Order

[10] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release Nos. 78909 (September 22, 2016), 81 FR 66708 (''BX Notice'') and 78908 (September 22, 2016), 81 FR 66702 (''Nasdaq Notice'').

[4] In their respective Amendment No. 1, BX and Nasdaq modified the discussion of their respective proposal to reflect that, pursuant to proposed BX and Nasdaq Rules 4702(b)(4)(A), if the adjusted price of a Post-Only Order would lock or cross a non-displayed price on the respective Exchange's Book, the Post-Only Order would be posted in the same manner as a Price to Comply Order. BX Amendment No. 1 is available at: *https://www.sec.gov/comments/sr-bx-2016-046/bx2016046-1.pdf* and Nasdaq Amendment No. 1 is available at: *https://www.sec.gov/comments/sr-nasdaq-2016-111/nasdaq2016111-1.pdf*. Because these amendments are technical in nature and do not materially alter the substance of the proposed rule changes, they are not subject to notice and comment.

[5] *See* Letter from Joseph Saluzzi and Sal Arnuk, Partners, Themis Trading LLC, to Brent J. Fields, Secretary, Commission, dated October 10, 2016 (''Themis Letter'').

[6] *See* Letter from Jeffrey S. Davis, Vice President and Deputy General Counsel, The NASDAQ Stock Market LLC, to Brent J. Fields, Secretary, Commission, dated November 8, 2016 (''Response Letter'').

[7] For more details regarding the Exchanges' proposals, *see* Nasdaq Notice and BX Notice, *supra* note 3.

[8] According to BX and Nasdaq Rules 4702(b)(4)(A), if a Post-Only Order would lock or cross a Protected Quotation, the price of the Order would first be adjusted. If the Order is Attributable, its adjusted price would be one minimum price increment lower than the current Best Offer (for bids) or higher than the current Best Bid (for offers). If the Order is not Attributable, its adjusted price would be equal to the current Best Offer (for bids) or the current Best Bid (for offers). However, the Order would not post or execute until the Order, as adjusted, is evaluated with respect to Orders on the respective Exchange's Book.

[9] The Exchanges are also proposing conforming changes throughout BX and Nasdaq Rules 4702(b)(4)(A) to reflect this change.

[10] According to BX and Nasdaq Rules 4702(b)(1)(A), if the entered limit price of a Price to Comply Order would lock or cross a Protected Quotation and the Price to Comply Order could not execute against an Order on the respective Exchange's Book at a price equal to or better than the price of the Protected Quotation, the Price to Comply Order will be displayed on the respective Exchange's Book at a price one minimum price increment lower than the current Best Offer (for a Price to Comply Order to buy) or higher than the current Best Bid (for a Price to Comply Order to sell), but will also be ranked on the respective Exchange's Book with a non-displayed price equal to the current Best Offer (for a Price to Comply Order to buy) or the current Best Bid (for a Price to Comply Order to sell).

[11] This behavior related to the execution of the Post-Only Order is not changed by Nasdaq's proposal.

[12] On BX, unlike on Nasdaq, executions in securities priced at or above $1 result in rebates for the accessor of liquidity and as such it is always in the best interest of the incoming Post-Only Order to execute in securities at or above $1.

[13] This behavior related to the execution of the Post-Only Order is not changed by BX's proposal.

would be repriced, ranked, and displayed at one minimum price increment below the current best-priced Order to sell on the respective Exchange's Book (for bids) or above the current best-priced Order to buy on the respective Exchange's Book (for offers). Under the proposals,[14] if the Post-Only Order would not lock or cross a Protected Quotation but would lock or cross a Non-Displayed Order on the respective Exchange's Book, the Post-Only Order would be posted, ranked, and displayed at its limit price.[15] However, the Post Only Order would execute:

- On Nasdaq if (i) it is priced below $1.00 and the value of price improvement associated with executing against an Order on the Nasdaq Book equals or exceeds the sum of fees charged for such execution and the value of any rebate that would be provided if the Order posted to the Nasdaq Book and subsequently provided liquidity, or (ii) it is priced at $1.00 or more and the value of price improvement associated with executing against an Order on the Nasdaq Book equals or exceeds $0.01 per share; [16] and
- on BX, if (i) it is priced at $1.00 or more,[17] or (ii) it is priced below $1.00 and the value of price improvement associated with executing against an Order on the Exchange Book equals or exceeds the sum of fees charged for such execution and the value of any rebate that would be provided if the Order posted to the Exchange Book and subsequently provided liquidity.[18]

Currently, Nasdaq Rule 4702(b)(5)(A) provides that, if the NBBO is crossed, a Midpoint Peg Post-Only Order [19] would nevertheless be priced at the midpoint between the NBBO. Currently, BX and Nasdaq Rules 4703(d) provide that, in the case of an Order with Midpoint Pegging,[20] if the Inside Bid and Inside Offer are crossed, the Order would nevertheless be priced at the midpoint between the Inside Bid and the Inside Offer. Moreover, even if the Inside Bid and Inside Offer are crossed, an Order with Midpoint Pegging that crossed an Order on the respective Exchange's Book would execute. Under the proposed amendments to Nasdaq Rule 4702(b)(5)(A), if the NBBO is crossed, any existing Midpoint Peg Post-Only Order would be cancelled and any new Midpoint Peg Post-Only Order would be rejected. Similarly, under the proposed amendments to BX and Nasdaq Rules 4703(d), if the Inside Bid and Inside Offer are crossed, any existing Order with Midpoint Pegging would be rejected and any new Order with Midpoint Pegging would be cancelled.

III. Summary of Comments and Response to Comments

The Commission received a comment letter opposing Nasdaq's proposal and a response letter from Nasdaq.[21]

Regarding Nasdaq's proposal, the commenter specifically questions whether allowing Post-Only Orders to lock Non-Displayed Orders would help or enhance price discovery.[22] The commenter also questions whether allowing this locking behavior would undermine investors' reliance on the public market of bids, offers, and trades to reflect the true price of an asset.[23] Moreover, the commenter questions the impact of this proposal on the ban against locked and crossed markets.[24] Finally, the commenter questions whether allowing a non-displayed locked market would maintain fair and orderly efficient markets, facilitate capital formation, and protect and serve the interests of investors.[25]

In response to these comments, Nasdaq states that its proposal to modify the processing of Post-Only Orders under a narrow set of conditions would ensure that the market operates as efficiently as possible, reduce information leakage, and improve execution quality.[26] In addition, according to Nasdaq, posting Post-Only Orders at their limit price would result in tighter bid-ask spreads relative to the current re-pricing practice, and tighter spreads would reflect enhanced price discovery.[27] Moreover, according to Nasdaq, many economists believe that a locked market is ''the truest reflection of the price of an asset.'' [28] Therefore, Nasdaq believes that allowing buyers and sellers to reflect their true demand and supply prices, rather than re-pricing to an artificial price, would enhance investors' experience on Nasdaq.[29] Nasdaq notes that the proposal does not permit a locked market as defined by Rule 610 of Regulation NMS, as Rule 610 defines a locked market as the display of bids and offers at the same price, while Nasdaq's proposal would involve only the display of a bid or an offer, but not both.[30] Finally, Nasdaq states its belief that the proposal is consistent with maintaining fair and orderly markets, efficient capital formation, and the protection of investors.[31] According to Nasdaq, the proposal would lead to tighter spreads, better execution prices, and lower information leakage for investors who currently quote and trade on Nasdaq.[32] Nasdaq states that it anticipates that, as a result of the proposal, current members would quote and trade more actively and new members would commence quoting and trading, which would further enhance the quality of the Nasdaq market.[33]

IV. Commission Findings

After careful review, the Commission finds that the proposed rule changes, as modified by Amendments No. 1, are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[34] In particular, the Commission finds that the proposed rule changes, as modified by Amendments No. 1, are consistent with Section 6(b)(5) of the Act,[35] which requires, among other things, that the rules of a national securities exchange be designed to prevent fraudulent and manipulative acts and practices, to

[14] The Exchanges are also proposing conforming changes throughout BX and Nasdaq Rules 4702(b)(4)(A) to reflect this change.

[15] One effect of this proposal is that, when a Post-Only Order encounters a Non-Displayed Order that is a Midpoint Peg Order and posts at its limit price, the Post-Only Order would establish a new NBBO and the Midpoint Peg Order would either be cancelled or re-adjusted based on the change to the NBBO.

[16] This behavior related to the execution of the Post-Only Order is not changed by Nasdaq's proposal.

[17] On BX, unlike on Nasdaq, executions in securities priced at or above $1 result in rebates for the accessor of liquidity and as such it is always in the best interest of the incoming Post-Only Order to execute in securities at or above $1.

[18] This behavior related to the execution of the Post-Only Order is not changed by BX's proposal.

[19] According to Nasdaq Rule 4702(b)(5)(A), a Midpoint Peg Post-Only Order is an Order Type with a Non-Display Order Attribute that is priced at the midpoint between the NBBO and that would execute upon entry only in circumstances where economically beneficial to the party entering the Order.

[20] According to BX and Nasdaq Rules 4703(d), Midpoint Pegging means Pegging with reference to the midpoint between the Inside Bid and the Inside Offer. The price to which an Order is pegged is referred to as the Inside Quotation, Inside Bid, or Inside Offer, as appropriate.

[22] *See* Themis Letter at 3.

[23] *See id.*

[24] *See id.* at 4.

[25] *See id.* This commenter also urges the Commission to eliminate all post-only order types. *See id.* at 1. The Commission notes that the comment urging the elimination of all post-only orders types is beyond the scope of the proposals.

[26] *See* Response Letter at 1–2.

[27] *See id.* at 2.

[28] *See id.* at 3.

[29] *See id.*

[30] *See id.*

[31] *See id.*

[32] *See id.*

[33] *See id.*

[34] In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[35] 15 U.S.C. 78f(b)(5).

promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Commission notes that the Exchanges believe that the proposals related to the interaction between Post-Only Orders and Non-Displayed Orders would help to reduce the information leakage that can occur when a Post-Only Order re-prices to avoid locking or crossing the price of a Non-Displayed Order resting on the respective Exchange's book.[36] Specifically, under the proposals, if a Post-Only Order would not lock or cross a Protected Quotation but would lock or cross a Non-Displayed Order on the respective Exchange's Book, the Post-Only Order would be posted, ranked, and displayed at its limit price, rather than be re-priced. In addition, if the adjusted price of a Post-Only Order would lock or cross a non-displayed price on the respective Exchange's Book, the Post-Only Order would be posted in the same manner as a Price to Comply Order (*i.e.,* displayed at a price one minimum price increment lower than the current Best Offer (for a buy order) or higher than the current Best Bid (for a sell order); ranked with a non-displayed price equal to the current Best Offer (for a buy order) or the current Best Bid (for a sell order)).

The Commission notes that the Exchanges' proposals to discontinue pricing and executing Midpoint Peg Post-Only Orders (Nasdaq only) and Orders with Midpoint Pegging when the NBBO is crossed would reflect that the midpoint of a crossed market is not a clear and accurate indication of a valid price and would avoid mispriced executions. The Commission also notes that this proposed behavior is similar to the rules of other exchanges.[37]

Based on the foregoing and the Exchanges' representations, the Commission believes that the proposed rule changes, as modified by Amendments No. 1, are consistent with the Act.

[36] The Commission notes that, in conjunction with these proposals, the Exchanges are adopting the Trade Now instruction, which is an Order Attribute that would allow a resting Order that becomes locked by an incoming Displayed Order to execute against the available size of the contra-side locking Order as a liquidity taker. *See* Securities Exchange Act Release Nos. 79281 (November 10, 2016) (SR–BX–2016–059) and 79282 (November 10, 2016) (SR–NASDAQ–2016–156).

[37] *See, e.g.,* BatsBZX Rule 11.9(c)(9).

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[38] that the proposed rule changes (SR–BX–2016–046 and SR–NASDAQ–2016–111), as modified by their respective Amendment No. 1, be, and they hereby are, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[39]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79286; File No. SR–NYSE–2016–73]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Adopting a Decommission Extension Fee for Receipt of the NYSE Order Imbalances Market Data Product

November 10, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 28, 2016, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt a Decommission Extension Fee for receipt of the NYSE Order Imbalances market data product. The proposed change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[38] 15 U.S.C. 78s(b)(2).

[39] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to adopt a Decommission Extension Fee for receipt of the NYSE Order Imbalances market data product,[3] as set forth on the NYSE Proprietary Market Data Fee Schedule (''Fee Schedule''). Recipients of NYSE Order Imbalances would continue to be subject to the already existing subscription fees currently set forth in the Fee Schedule. The proposed Decommission Extension Fee would apply only to those subscribers who decide to continue to receive the NYSE Order Imbalances feed in its legacy format for up to two months after which the feed will be distributed exclusively in the new format explained below.

NYSE Order Imbalances is an NYSE-only market data feed of real-time order imbalances that accumulate prior to the opening of trading on the Exchange and prior to the close of trading on the Exchange. The Exchange distributes information about these imbalances in real-time at specified intervals prior to the opening and closing auction each day.[4]

As part of the Exchange's efforts to regularly upgrade systems to support more modern data distribution formats and protocols as technology evolves,

[4] *See* Rules 15 (Pre-Opening Indications and Opening Order Imbalance Information) and 123C (The Closing Procedures).

beginning October 31, 2016, NYSE Order Imbalances will be transmitted in a new format, Exchange Data Protocol (XDP). Beginning October 31, 2016, the Exchange will transmit NYSE Order Imbalances in both the legacy format and in XDP format without any additional fee being charged for providing this data feed in both formats. The dual dissemination will remain in place until February 28, 2017, the planned decommission date of the legacy format. Beginning March 1, 2017, recipients of NYSE Order Imbalances who wish to continue to receive NYSE Order Imbalances in the legacy format will be subject to the proposed Decommission Extension Fee of $5,000 per month.[5] During the extension period, recipients of NYSE Order Imbalances would continue to be subject to the subscription fees currently noted in the Fee Schedule. The extension period for receiving this data feed in the legacy format will expire on April 28, 2017, on which date distribution of NYSE Order Imbalances in the legacy format will be permanently discontinued.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,[6] in general, and Sections 6(b)(4) and 6(b)(5) of the Act,[7] in particular, in that it provides an equitable allocation of reasonable fees among users and recipients of the data and is not designed to permit unfair discrimination among customers, issuers, and brokers.

The Exchange believes that adopting an extension fee for subscribers of NYSE Order Imbalances who wish to receive this data feed in the legacy format for a period of time beyond the built-in overlap period is reasonable, equitable and not unfairly discriminatory because the proposed fee would apply equally to all data recipients that currently subscribe to NYSE Order Imbalances. The Exchange believes that it is reasonable to require data recipients to pay an additional fee for taking the data feed in the legacy format beyond the period of time specifically allotted by the Exchange for data feed customers to adapt to the new XDP format at no extra cost. To that end, the extension fee is designed to encourage data recipients to migrate to the XDP format in order to continue to receive NYSE Order Imbalances in XDP as the legacy format would no longer be available after that date. The Exchange does not intend to support the legacy format at all after April 28, 2017.

The Exchange notes that NYSE Order Imbalances is entirely optional. The Exchange is not required to make NYSE Order Imbalances available or to offer any specific pricing alternatives to any customers, nor is any firm required to purchase NYSE Order Imbalances, nor is the Exchange required to offer any feed (NYSE Order Imbalances, or otherwise) in a particular format, and it is a benefit to the markets generally that NYSE update its distribution technology to make it more efficient (and at the same time eliminate less efficient forms of dissemination). Firms that do purchase NYSE Order Imbalances do so for the primary goals of using them to increase revenues, reduce expenses, and in some instances compete directly with the Exchange (including for order flow); those firms are able to determine for themselves whether NYSE Order Imbalances or any other similar products are attractively priced or not.[8]

The decision of the United States Court of Appeals for the District of Columbia Circuit in *NetCoalition* v. *SEC,* 615 F.3d 525 (D.C. Cir. 2010), upheld reliance by the Securities and Exchange Commission (''Commission'') upon the existence of competitive market mechanisms to set reasonable and equitably allocated fees for proprietary market data:

> In fact, the legislative history indicates that the Congress intended that the market system 'evolve through the interplay of competitive forces as unnecessary regulatory restrictions are removed' and that the SEC wield its regulatory power 'in those situations where competition may not be sufficient,' such as in the creation of a 'consolidated transactional reporting system.'

Id. at 535 (quoting H.R. Rep. No. 94–229 at 92 (1975), *as reprinted in* 1975 U.S.C.C.A.N. 323). The court agreed with the Commission's conclusion that ''Congress intended that 'competitive forces should dictate the services and practices that constitute the U.S. national market system for trading equity securities.' '' [9]

As explained below in the Exchange's Statement on Burden on Competition, the Exchange believes that there is substantial evidence of competition in the marketplace for proprietary market data and that the Commission can rely upon such evidence in concluding that the fees established in this filing are the product of competition and therefore satisfy the relevant statutory standards. In addition, the existence of alternatives to the legacy format, such as converting to XDP as soon as possible, further ensures that the Exchange cannot set unreasonable fees, or fees that are unreasonably discriminatory, when vendors and subscribers can select such alternatives.

As the *NetCoalition* decision noted, the Commission is not required to undertake a cost-of-service or ratemaking approach. The Exchange believes that, even if it were possible as a matter of economic theory, cost-based pricing for proprietary market data would be so complicated that it could not be done practically or offer any significant benefits.[10] For these reasons, the Exchange believes that the proposed fees are reasonable, equitable, and not unfairly discriminatory.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. An

[5] The concept of a Decommission Extension Fee is not novel. The Exchange recently adopted a Decommission Extension Fee for receipt of the NYSE BBO and NYSE Trades market data products when the Exchange migrated those products to the XDP format. *See* Securities Exchange Act Release No. 77388 (March 17, 2016), 81 FR 15363 (March 22, 2016) (SR–NYSE–2016–21).

[6] 15 U.S.C. 78f(b).

[7] 15 U.S.C. 78f(b)(4), (5).

[8] *See, e.g.,* Proposing Release on Regulation of NMS Stock Alternative Trading Systems, Securities Exchange Act Release No. 76474 (Nov. 18, 2015) (File No. S7–23–15). *See also,* ''Brokers Warned Not to Steer Clients' Stock Trades Into Slow Lane,'' Bloomberg Business, December 14, 2015 (Sigma X dark pool to use direct exchange feeds as the primary source of price data).

[9] *NetCoalition,* 615 F.3d at 535.

[10] The Exchange believes that cost-based pricing would be impractical because it would create enormous administrative burdens for all parties and the Commission to cost-regulate a large number of participants and standardize and analyze extraordinary amounts of information, accounts, and reports. In addition, and as described below, it is impossible to regulate market data prices in isolation from prices charged by markets for other services that are joint products. Cost-based rate regulation would also lead to litigation and may distort incentives, including those to minimize costs and to innovate, leading to further waste. Under cost-based pricing, the Commission would be burdened with determining a fair rate of return, and the industry could experience frequent rate increases based on escalating expense levels. Even in industries historically subject to utility regulation, cost-based ratemaking has been discredited. As such, the Exchange believes that cost-based ratemaking would be inappropriate for proprietary market data and inconsistent with Congress's direction that the Commission use its authority to foster the development of the national market system, and that market forces will continue to provide appropriate pricing discipline. *See* Appendix C to NYSE's comments to the Commission's 2000 Concept Release on the Regulation of Market Information Fees and Revenues, which can be found on the Commission's Web site at *http://www.sec.gov/rules/concept/s72899/buck1.htm.* Finally, the prices set herein are prices for continuing to support distribution formats the Exchange has elected to retire in favor of new and more efficient distribution formats, making cost-based analyses even less relevant.

exchange's ability to price its proprietary market data feed products is constrained by actual competition for the sale of proprietary market data products, the joint product nature of exchange platforms, and the existence of alternatives to the Exchange's proprietary data (and in this instance, the ability of any firm to switch to the new distribution format in a time frame that eliminates the need to pay these fees entirely).

The Existence of Actual Competition

The market for proprietary data products is currently competitive and inherently contestable because there is fierce competition for the inputs necessary for the creation of proprietary data and strict pricing discipline for the proprietary products themselves. Numerous exchanges compete with one another for listings and order flow and sales of market data itself, providing ample opportunities for entrepreneurs who wish to compete in any or all of those areas, including producing and distributing their own market data. Proprietary data products are produced and distributed by each individual exchange, as well as other entities, in a vigorously competitive market. Indeed, the U.S. Department of Justice (''DOJ'') (the primary antitrust regulator) has expressly acknowledged the aggressive actual competition among exchanges, including for the sale of proprietary market data. In 2011, the DOJ stated that exchanges ''compete head to head to offer real-time equity data products. These data products include the best bid and offer of every exchange and information on each equity trade, including the last sale.'' [11]

Moreover, competitive markets for listings, order flow, executions, and transaction reports provide pricing discipline for the inputs of proprietary data products and therefore constrain markets from overpricing proprietary market data. Broker-dealers send their order flow and transaction reports to multiple venues, rather than providing them all to a single venue, which in turn reinforces this competitive constraint. As a 2010 Commission Concept Release noted, the ''current market structure can be described as dispersed and complex'' with ''trading volume . . . dispersed among many highly automated trading centers that compete for order flow in the same stocks'' and ''trading centers offer[ing] a wide range of services that are designed to attract different types of market participants with varying trading needs.'' [12] More recently, SEC Chair Mary Jo White has noted that competition for order flow in exchange-listed equities is ''intense'' and divided among many trading venues, including exchanges, more than 40 alternative trading systems, and more than 250 broker-dealers.[13]

If an exchange succeeds in competing for quotations, order flow, and trade executions, then it earns trading revenues and increases the value of its proprietary market data products because they will contain greater quote and trade information. Conversely, if an exchange is less successful in attracting quotes, order flow, and trade executions, then its market data products may be less desirable to customers in light of the diminished content and data products offered by competing venues may become more attractive. Thus, competition for quotations, order flow, and trade executions puts significant pressure on an exchange to maintain both execution and data fees at reasonable levels.

In addition, in the case of products that are also redistributed through market data vendors, such as Bloomberg and Thompson Reuters, the vendors themselves provide additional price discipline for proprietary data products because they control the primary means of access to certain end users. These vendors impose price discipline based upon their business models. For example, vendors that assess a surcharge on data they sell are able to refuse to offer proprietary products that their end users do not or will not purchase in sufficient numbers. Vendors will not elect to make available NYSE Order Imbalances in the legacy format unless their customers request it, and customers will not elect to pay the proposed fees unless NYSE Order Imbalances can provide value in the legacy formats by sufficiently increasing revenues or reducing costs in the customer's business in a manner that will offset the fees. The Exchange has provided customers with adequate notice that it intends to discontinue dissemination of the data feed in the legacy format. Therefore, the proposed Decommission Extension Fee would only be applicable to those customers who have a need or desire to continue to take the data feed in the legacy format beyond the period provided for migration to the XDP format. Customers who timely migrate to the XDP format to receive the data feed would not need to receive the data feed in the legacy format and therefore would not be subject to the Decommission Extension Fee at all. All of these factors operate as constraints on pricing proprietary data products.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [14] and paragraph (f) of Rule 19b–4 [15] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79293; File No. SR–NYSEArca–2016–107]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Amendment No. 2 to, and Order Granting Accelerated Approval of, a Proposed Rule Change, as Modified by Amendment No. 2 Thereto, Relating To Listing and Trading of Shares of Cumberland Municipal Bond ETF under NYSE Arca Equities Rule 8.600

DATE: November 10, 2016.

I. Introduction

On July 26, 2016, NYSE Arca, Inc. filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the Cumberland Municipal Bond ETF (''Fund'') under NYSE Arca Equities Rule 8.600. The proposed rule change was published for comment in the **Federal Register** on August 15, 2016.[3] On September 15, 2016, the Exchange filed Amendment No. 1 to the proposed rule change.[4] On September 27, 2016, pursuant to Section 19(b)(2) of the Act,[5] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[6] On November 8, 2016, the Exchange filed Amendment No. 2 to the proposed rule change.[7]

The Commission has not received any comments on the proposed rule change. The Commission is publishing this notice to solicit comments on Amendment No. 2 from interested persons and is approving the proposed rule change, as modified by Amendment No. 2 thereto, on an accelerated basis.

II. The Exchange's Description of the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to list and trade shares (''Shares'') of the following under NYSE Arca Equities Rule 8.600, which governs the listing and trading of Managed Fund Shares:[8] Cumberland Municipal Bond ETF (the ''Fund''),[9] a

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 78523 (Aug. 9, 2016), 81 FR 54155 (''Notice'').

[4] In Amendment No. 1, which amended and replaced the proposed rule change in its entirety, the Exchange: (1) Described additional diversification requirements that would apply to the Fund's holdings in municipal bonds; (2) clarified the Fund's holdings in non-exchange-traded investment company securities; and (3) corrected certain references to the regular trading session of the Exchange. Amendment No. 1 to the proposed rule change is available at: *https://www.sec.gov/comments/sr-nysearca-2016-107/nysearca2016107-1.pdf.*

[5] 15 U.S.C. 78s(b)(2).

[6] *See* Securities Exchange Act Release No. 78949, 81 FR 68078 (Oct. 3, 2016). The Commission designated November 13, 2016, as the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change.

[7] In Amendment No. 2, which amended and replaced the proposed rule change, as modified by Amendment No. 1 thereto, in its entirety, the Exchange: (1) Described additional diversification criteria that would apply to the Fund's holdings in municipal bonds; and (2) clarified the Fund's holdings in non-exchange-traded or other investment company securities. Amendment No. 2 to the proposed rule change is available at: *https://www.sec.gov/comments/sr-nysearca-2016-107/nysearca2016107.shtml.*

[8] A Managed Fund Share is a security that represents an interest in an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1) (''1940 Act'') organized as an open-end investment company or similar entity that invests in a portfolio of securities selected by its investment adviser consistent with its investment objectives and policies. In contrast, an open-end investment company that issues Investment Company Units, listed and traded on the Exchange under NYSE Arca Equities Rule 5.2(j)(3), seeks to provide investment results that correspond generally to the price and yield performance of a specific foreign or domestic stock index, fixed income securities index or combination thereof.

[9] The Securities and Exchange Commission (''Commission'') has approved listing and trading on the Exchange of a number of actively managed funds under Rule 8.600. *See, e.g.*, Securities Exchange Act Release Nos. 69591 (May 16, 2013), 78 FR 30372 (May 22, 2013) (SR–NYSEArca–2013–33) (order approving Exchange listing and trading of International Bear ETF); 69061 (March 7, 2013), 78 FR 15990 (March 13, 2013) (SR–NYSEArca–2013–01) (order approving Exchange listing and trading of Newfleet Multi-Sector Income ETF). The Commission has approved for Exchange listing and trading shares of two actively managed funds of the PIMCO ETF Trust that principally hold municipal bonds. *See* Securities Exchange Act Release No. 60981 (November 10, 2009), 74 FR 59594 (November 18, 2009) (SR–NYSEArca–2009–79) (order approving listing and trading of shares of the PIMCO Short-Term Municipal Bond Strategy Fund and PIMCO Intermediate Municipal Bond Strategy Fund). The Commission also has approved listing and trading on the Exchange of shares of the SPDR

Continued

series of the ETFis Series Trust I (''Trust'').[10]

The investment adviser to the Fund will be Virtus ETF Advisers LLC (the ''Adviser''). The Fund's sub-adviser will be Cumberland Advisors Inc. (''Sub-Adviser''). Virtus ETF Solutions LLC will serve as the Fund's operational administrator. ETF Distributors LLC will serve as the distributor (the ''Distributor'') of Fund Shares on an agency basis. The Bank of New York Mellon (the ''Administrator'') will serve as the administrator, custodian, transfer agent and fund accounting agent for the Fund.

Commentary .06 to Rule 8.600 provides that, if the investment adviser to the investment company issuing Managed Fund Shares is affiliated with a broker-dealer, such investment adviser shall erect a ''fire wall'' between the investment adviser and the broker-dealer with respect to access to information concerning the composition and/or changes to such investment company portfolio.[11] In addition, Commentary .06 further requires that personnel who make decisions on the open-end fund's portfolio composition must be subject to procedures designed to prevent the use and dissemination of material nonpublic information regarding the open-end fund's portfolio. The Adviser and Sub-Adviser are not registered as broker-dealers. The Adviser (but not the Sub-Adviser) is affiliated with one or more broker-dealers and the Adviser has implemented and will maintain a fire wall with respect to each such broker-dealer affiliate regarding access to information concerning the composition and/or changes to the portfolio. In the event (a) the Adviser or Sub-Adviser become registered broker-dealers or newly affiliated with a broker-dealer, or (b) any new adviser or sub-adviser is a registered broker-dealer or becomes affiliated with a broker-dealer, it will implement a fire wall with respect to its relevant personnel or its broker-dealer affiliate regarding access to information concerning the composition and/or changes to the portfolio, and will be subject to procedures designed to prevent the use and dissemination of material non-public information regarding such portfolio.

Description of the Fund

Principal Investments

According to the Registration Statement, the Fund will seek to provide a competitive level of current income exempt from federal income tax, while preserving capital. The Fund, under normal market conditions,[12] will invest at least eighty percent (80%) of the Fund's net assets in debt securities whose interest is, in the opinion of bond counsel for the issuer at the time of issuance, exempt from U.S. federal income tax (''Municipal Bonds''). The Sub-Adviser will invest the Fund's assets using a barbell strategy, which means that the Sub-Adviser will overweight the Fund's investments in Municipal Bonds with maturities on the short and long ends of the fixed income yield curve, while underweighting exposure to Municipal Bonds with intermediate maturities.

According to the Registration Statement, Municipal Bonds in which the Fund may invest include one or more of the following:

- General obligation bonds, which are typically backed by the full faith, credit, and taxing power of the issuer;
- revenue bonds, which are typically secured by revenues generated by the issuer;
- discount bonds, which may be originally issued at a discount to par value or sold at market price below par value;
- premium bonds, which are sold at a premium to par value;
- zero coupon bonds, which are issued at an original issue discount, with the full value, including accrued interest, paid at maturity; and
- private activity bonds, which are typically issued by or on behalf of local or state government for the purpose of financing the project of a private user.

The Fund will have no target duration for its investment portfolio, and the Sub-Adviser may target a shorter or longer average portfolio duration based on the Sub-Adviser's forecast of interest rates and view of fixed-income markets generally.[13] The Sub-Adviser will generally apply a heavier weight toward Municipal Bonds with shorter maturities during periods of high interest rates and longer maturities during periods of lower interest rates. At least 80% of the weight of the Fund's assets will be in Municipal Bonds with a modified duration of 15 years or less.

With respect to credit quality, under normal market conditions, at least 90% of the Fund's assets invested in Municipal Bonds will be in Municipal Bonds rated ''A'' or better by at least one major credit rating agency or, if unrated, deemed to be of comparable quality in the Adviser's opinion. From time to time, the Fund may concentrate in particular sectors; however, the Fund's investments will be diversified among a minimum of ten distinct Municipal Bond sectors.[14] In addition, the Fund will limit its investments in Municipal Bonds in any single sector to 25% of the Fund's assets. The Fund may sell investments for a variety of reasons, such as to adjust the portfolio's average maturity, duration, or overall credit quality, or to shift assets into and out of higher-yielding or lower-yielding securities or certain sectors.

Under normal market conditions, each Municipal Bond held by the Fund

---

Nuveen S&P High Yield Municipal Bond Fund under Commentary .02 of NYSE Arca Equities Rule 5.2(j)(3). *See* Securities Exchange Act Release No.63881 (February 9, 2011), 76 FR 9065 (February 16, 2011) (SR–NYSEArca–2010–120).

[10] The Trust is registered under the 1940 Act. On May 20, 2015, the Trust filed with the Commission an amendment to its registration statement on Form N–1A under the Securities Act of 1933 (15 U.S.C. 77a) (''Securities Act''), and under the 1940 Act relating to the Fund (File Nos. 333–187668 and 811–22819) (''Registration Statement''). The description of the operation of the Trust and the Fund herein is based, in part, on the Registration Statement. In addition, the Commission has issued an order granting certain exemptive relief to the Trust under the 1940 Act. *See* Investment Company Act Release No. 30607 (July 23, 2013) (File No. 812–14080) (''Exemptive Order''). This Amendment No. 2 to SR–NYSEArca–2016–107 replaces SR–NYSEArca–2016–107 as originally filed and Amendment No. 1 thereto and supersedes such filings in their entirety.

[11] An investment adviser to an open-end fund is required to be registered under the Investment Advisers Act of 1940 (the ''Advisers Act''). As a result, the Adviser and Sub-Adviser and their related personnel are subject to the provisions of Rule 204A–1 under the Advisers Act relating to codes of ethics. This Rule requires investment advisers to adopt a code of ethics that reflects the fiduciary nature of the relationship to clients as well as compliance with other applicable securities laws. Accordingly, procedures designed to prevent the communication and misuse of non-public information by an investment adviser must be consistent with Rule 204A–1 under the Advisers Act. In addition, Rule 206(4)–7 under the Advisers Act makes it unlawful for an investment adviser to provide investment advice to clients unless such investment adviser has (i) adopted and implemented written policies and procedures reasonably designed to prevent violation, by the investment adviser and its supervised persons, of the Advisers Act and the Commission rules adopted thereunder; (ii) implemented, at a minimum, an annual review regarding the adequacy of the policies and procedures established pursuant to subparagraph (i) above and the effectiveness of their implementation; and (iii) designated an individual (who is a supervised person) responsible for administering the policies and procedures adopted under subparagraph (i) above.

[12] The term ''normal market conditions'' is defined in NYSE Arca Equities Rule 8.600(c)(5).

[13] Duration measures the interest rate sensitivity of a debt security by assessing and weighting the present value of the security's payment pattern. Generally, the longer the maturity, the greater the duration and, therefore, the greater effect interest rate changes have on the price of the security.

[14] The Fund's investments in Municipal Bonds will include investments in state and local (*e.g.,* county, city, town) Municipal Bonds relating to such sectors as the following: Dedicated tax; public power; tax increment; toll road; port revenue; airport revenue; water revenue; sewer revenue; higher education (colleges and universities); wastewater revenue; school districts; sales tax revenue; and pre-refunded bonds.

must be a constituent of a deal where the deal's original offering amount was at least $100 million. The Fund will hold a minimum of 75 different Municipal Bonds. No Municipal Bond held by the Fund will exceed 4% of the weight of the Fund's portfolio and no single Municipal Bond issuer will account for more than 10% of the weight of the Fund's portfolio. The Fund will hold Municipal Bonds of a minimum of 40 non-affiliated issuers diversified among issuers in at least 20 different states, with no more than 30% of the Fund's assets comprised of Municipal Bonds that provide exposure to any single state.[15]

According to the Registration Statement, under normal market conditions, at least 80% of the Fund's income will be exempt from federal income taxes. However, a significant portion of the Fund's income could be derived from securities subject to the alternative minimum tax.

Other Investments

While the Fund, under normal market conditions, will invest at least eighty percent (80%) of its assets in Municipal Bonds, as described above, the Fund may invest its remaining assets in other assets and financial instruments, as described below.

The Fund may invest in equity securities, both directly and indirectly through investment in shares of exchange-traded funds (''ETFs''),[16] money market funds, and other types of securities and instruments described below. The equity portion of the Fund's portfolio may include common stocks traded on securities exchanges or in the over-the-counter (''OTC'') market. In addition to common stocks, the equity portion of the Fund's portfolio may also include exchange-traded and OTC preferred stocks, and exchange-traded and OTC warrants.[17]

The Fund may purchase taxable municipal bonds when the Sub-Adviser believes they offer opportunities for the Fund, or variable rate demand notes (VRDNs) that pay interest monthly or quarterly based on a floating rate that is reset daily or weekly based on an index of short-term municipal rates.

The Fund may invest in exchange-traded and OTC securities convertible into common stock. Such securities are the following: Convertible bonds and convertible preferred stocks.[18]

The Fund may invest directly and indirectly in cash equivalents, namely, money market instruments that are the following: U.S. Government obligations or corporate debt obligations (including those subject to repurchase agreements); banker's acceptances [19] and certificates of deposit [20] of domestic branches of banks, commercial paper,[21] and master notes.[22]

In order to maintain sufficient liquidity, to implement investment strategies or for temporary defensive purposes, the Fund may invest a significant portion of its assets in shares of one or more money market funds. Generally, money market mutual funds are registered investment companies that seek to earn income consistent with the preservation of capital and maintenance of liquidity by investing primarily in high quality money market instruments.

The Fund may invest in compliance with Section 12(d)(1)(E), (F) and (G) of the 1940 Act and the rules thereunder.[23]

The Fund may write U.S. exchange-traded call and put options on securities, ETFs or security indexes to seek income or may purchase or write U.S. exchange-traded put or call options for hedging purposes.

The Fund may purchase securities on a when-issued basis or for settlement at a future date (forward commitment) if the Fund holds sufficient liquid assets to meet the purchase price.

Additionally, the Trust, on behalf of the Fund, has claimed an exclusion from the definition of the term ''commodity pool operator'' pursuant to Rule 4.5 under the Commodity Exchange Act, as amended (the ''CEA''). Therefore, the Fund is not subject to regulation or registration as a commodity pool operator under the CEA.

Investment Restrictions

The Fund may, from time to time, take temporary defensive positions that are inconsistent with its principal investment strategies in an attempt to respond to adverse market, economic, political or other conditions. In such circumstances, the Fund may also hold up to 100% of its portfolio in cash and cash equivalent positions.

The Fund may hold up to an aggregate amount of 15% of its net assets in illiquid assets (calculated at the time of investment), consistent with Commission guidance. The Fund will monitor its portfolio liquidity on an ongoing basis to determine whether, in light of current circumstances, an adequate level of liquidity is being maintained, and will consider taking appropriate steps in order to maintain adequate liquidity if, through a change in values, net assets, or other circumstances, more than 15% of the Fund's net assets are held in illiquid assets. Illiquid assets include securities subject to contractual or other restrictions on resale and other instruments that lack readily available markets as determined in accordance with Commission staff guidance.[24]

[15] For purposes of this restriction, each state and each separate political subdivision, agency, authority, or instrumentality of such state, each multi-state agency or authority, and each guarantor, if any, will be treated as separate issuers of Municipal Bonds.

[16] The ETFs in which the Fund may invest will be registered under the 1940 Act and include Investment Company Units (as described in NYSE Arca Equities Rule 5.2(j)(3)); Portfolio Depositary Receipts (as described in NYSE Arca Equities Rule 8.100); and Managed Fund Shares (as described in NYSE Arca Equities Rule 8.600). Such ETFs all will be listed and traded in the U.S. on registered exchanges.

[17] With respect to its exchange-traded equity securities investments, the Fund will normally invest in equity securities that are listed and traded on a U.S. exchange or in markets that are members of the Intermarket Surveillance Group (''ISG'') or parties to a comprehensive surveillance sharing agreement with the Exchange. In any case, not more than 10% of the net assets of the Fund in the aggregate invested in equity securities (except for money market funds) will consist of equity securities whose principal market is not a member of ISG or a market with which the Exchange does not have a comprehensive surveillance sharing agreement. *See* note 34, *infra*.

[18] The criteria in note 16 above also will apply to exchange-traded convertible preferred stocks and exchange-traded stocks into which convertible bonds may be converted.

[19] Banker's acceptances are time drafts drawn on and ''accepted'' by a bank. When a bank ''accepts'' such a time draft, it assumes liability for its payment. When the Fund acquires a banker's acceptance, the bank that ''accepted'' the time draft is liable for payment of interest and principal when due. The banker's acceptance carries the full faith and credit of such bank.

[20] A certificate of deposit is an unsecured, interest bearing debt obligation of a bank.

[21] Commercial paper is an unsecured, short-term debt obligation of a bank, corporation, or other borrower. Commercial paper maturity generally ranges from two to 270 days and is usually sold on a discounted basis rather than as an interest-bearing instrument. The Fund will invest directly in commercial paper only if it is rated in one of the top two rating categories by Moody's, S&P or Fitch or, if not rated, is of equivalent quality in the Adviser's opinion. Commercial paper may include master notes of the same quality. Master notes are unsecured obligations which are redeemable upon demand of the holder and which permit the investment of fluctuating amounts at varying rates of interest.

[22] Master notes may be acquired by the Fund through the master note program of the Fund's custodian bank.

[23] 15 U.S.C. 80a–12(d)(1)(E), (F) and (G).

[24] The Commission has stated that long-standing Commission guidelines have required open-end funds to hold no more than 15% of their net assets in illiquid securities and other illiquid assets. *See* Investment Company Act Release No. 28193 (March 11, 2008), 73 FR 14618 (March 18, 2008), footnote 34. *See also,* Investment Company Act Release No. 5847 (October 21, 1969), 35 FR 19989 (December 31, 1970) (Statement Regarding ''Restricted Securities''); Investment Company Act Release No. 18612 (March 12, 1992), 57 FR 9828 (March 20, 1992) (Revisions of Guidelines to Form N–1A). A

Continued

The Fund will seek to qualify for treatment as a regulated investment company under the Internal Revenue Code of 1986.[25]

The Fund's investments will be consistent with its investment objective and will not be used to provide multiple returns of a benchmark or to produce leveraged returns.

Creation and Redemption of Shares

According to the Registration Statement, the Trust will issue and sell Shares of the Fund only in ''Creation Units'' on a continuous basis through the Distributor, at their net asset value (''NAV'') next determined after receipt, on any business day, for an order received in proper form. All orders to create Creation Units must be placed for one or more Creation Unit size aggregations of Shares (50,000 Shares per Creation Unit). The Creation Unit size is subject to change. Cash creations will be the default mechanism for creation of Shares.

However, the Fund will retain the ability to utilize an in-kind mechanism for creation of Shares, upon approval of the Distributor. In such case, the consideration for purchase of a Creation Unit of the Fund generally will consist of an in-kind deposit of ''Deposit Securities'' for each Creation Unit constituting a substantial replication, or a representation, of the securities included in the Fund's portfolio and a ''Cash Component'' computed as described below. Together, the Deposit Securities and the Cash Component constitute the ''Fund Deposit'', which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund. The Cash Component is an amount equal to the difference between the NAV of the Shares (per Creation Unit) and the market value of the Deposit Securities. If the Cash Component is a positive number (*i.e.,* the NAV per Creation Unit exceeds the market value of the Deposit Securities), the Cash Component will be such positive amount. If the Cash Component is a negative number (*i.e.,* the NAV per Creation Unit is less than the market value of the Deposit Securities), the Cash Component will be such negative amount, and the creator will be entitled to receive cash from the Fund in an amount equal to the Cash Component. The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the market value of the Deposit Securities.

The Administrator, through the National Securities Clearing Corporation (''NSCC''), will make available on each business day, immediately prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the list of the names and the required number of Shares of each Deposit Security to be included in the current Fund Deposit (based on information at the end of the previous business day) for the Fund. Such Fund Deposit will be applicable, subject to any adjustments as described below, in order to effect creations of Creation Units of the Fund until such time as the next-announced composition of the Deposit Securities is made available.

The identity and number of Shares of the Deposit Securities required for the Fund Deposit for the Fund will change as rebalancing adjustments and corporate action events occur from time to time. In addition, the Trust reserves the right to permit or require the substitution of an amount of cash—*i.e.,* a ''cash in lieu'' amount—to be added to the Cash Component to replace any Deposit Security that may not be available in sufficient quantity for delivery, that may not be eligible for transfer or that may not be eligible for trading by an ''Authorized Participant'' (as described below) or the investor for which it is acting.

In addition to the list of names and numbers of securities constituting the current Deposit Securities of the Fund Deposit, the Administrator, through NSCC, also will make available on each business day the estimated Cash Component, effective through and including the previous business day, per outstanding Creation Unit of the Fund.

Procedures for Creation of Creation Units

To be eligible to place orders to create a Creation Unit of the Fund, an entity must be (i) a ''Participating Party'', *i.e.,* a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of NSCC (the ''Clearing Process'') or a clearing agency that is registered with the Commission, or (ii) a Depositary Trust Company (''DTC'') Participant and, in each case, must have executed an agreement with the Trust, the Distributor and the Administrator with respect to creations and redemptions of Creation Units (''Participant Agreement''). A Participating Party and DTC Participant are collectively referred to as an ''Authorized Participant''.

All orders to create Creation Units must be received by the Distributor no later than the close of the Core Trading Session on the Exchange (ordinarily 4:00 p.m., Eastern Time), in each case on the date such order is placed in order for the creation of Creation Units to be effected based on the NAV of Shares of the Fund as next determined on such date after receipt of the order in proper form.

Redemption of Creation Units

Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Distributor and the Fund through the Administrator and only on a business day. Cash redemptions will be the default mechanism for redemptions of Shares.

However, the Fund will retain the ability to utilize an in-kind mechanism for redemption of Shares, upon approval of the Distributor. In such case, the redemption proceeds for a Creation Unit generally consist of Deposit Securities, as announced by the Administrator on the business day of the request for redemption received in proper form, plus cash in an amount equal to the difference between the NAV of the Shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Deposit Securities (the ''Cash Redemption Amount''), less a redemption transaction fee. In the event that the Deposit Securities have a value greater than the NAV of the Shares, a compensating cash payment equal to the differential is required to be made by or through an Authorized Participant by the redeeming shareholder.

With respect to the Fund, the Administrator, through NSCC, will make available immediately prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time) on each business day, the Deposit Securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form on that day. Deposit Securities received on redemption may not be identical to Deposit Securities which are applicable to creations of Creation Units.

If it is not possible to effect deliveries of the Deposit Securities, the Trust may in its discretion exercise its option to redeem such shares in cash, and the redeeming beneficial owner will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in

---

fund's portfolio security is illiquid if it cannot be disposed of in the ordinary course of business within seven days at approximately the value ascribed to it by the fund. *See* Investment Company Act Release No. 14983 (March 12, 1986), 51 FR 9773 (March 21, 1986) (adopting amendments to Rule 2a–7 under the 1940 Act); Investment Company Act Release No. 17452 (April 23, 1990), 55 FR 17933 (April 30, 1990) (adopting Rule 144A under the 1933 Act).

[25] 26 U.S.C. 851.

cash which the Fund may, in its sole discretion, permit.[26] In either case, the investor will receive a cash payment equal to the NAV of its Shares based on the NAV of Shares of the Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee and additional charge for requested cash redemptions, to offset the Trust's brokerage and other transaction costs associated with the disposition of Deposit Securities).

The right of redemption may be suspended or the date of payment postponed with respect to the Fund (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the Shares of the Fund or determination of the Shares' NAV is not reasonably practicable; or (4) in such other circumstance as is permitted by the Commission.

Net Asset Value

The NAV per Share for the Fund will be computed by dividing the value of the net assets of the Fund (*i.e.,* the value of its total assets less total liabilities) by the total number of Shares outstanding, rounded to the nearest cent. Expenses and fees, including the management fee, will be accrued daily and taken into account for purposes of determining NAV. The NAV of the Fund will be determined as of the close of the Core Trading Session on the Exchange (ordinarily 4:00 p.m., Eastern Time) on each day that the Exchange is open. Any assets or liabilities denominated in currencies other than the U.S. dollar will be converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

The pricing and valuation of portfolio securities will be determined in good faith in accordance with procedures approved by, and under the direction of, the Trust's Board of Trustees (''Board''). In determining the value of the Fund's assets, equity securities will be generally valued at market using quotations from the primary market in which they are traded. Debt securities (other than short-term investments) will be valued on the basis of broker quotes or valuations provided by a pricing service, which in determining value will utilize information regarding recent sales, market transactions in comparable securities, quotations from dealers, and various relationships between securities. Other assets, such as accrued interest, accrued dividends and cash also will be included in determining the NAV. The Fund normally will use third party pricing services to obtain portfolio security prices.

Municipal Bonds, money market instruments, convertible bonds, taxable municipal bonds, and VRDNs will generally be valued at bid prices received from independent pricing services as of the announced closing time for trading in fixed-income instruments in the respective market.

Exchange-traded equity securities, including common stocks, ETFs, preferred stocks, convertible preferred stocks and warrants, will be valued at market value, which will generally be determined using the last reported official closing or last trading price on the exchange or market on which the security is primarily traded at the time of valuation or, if no sale has occurred, at the last quoted bid price on the primary market or exchange on which they are traded. If market prices are unavailable or the Fund believes that they are unreliable, or when the value of a security has been materially affected by events occurring after the relevant market closes, the Fund will price those securities at fair value as determined in good faith using methods approved by the Trust's Board.

Equity securities traded in the OTC market, including common stocks, preferred stocks, and warrants, will be valued at the last reported sale price on the valuation date. OTC traded convertible preferred stocks will be valued based on price quotations obtained from a broker-dealer who makes markets in such securities or other equivalent indications of value provided by a third-party pricing service. Securities of money market funds will be valued at NAV.

Option contracts will be valued at their most recent sale price on the applicable exchange. If no such sales are reported, these contracts will be valued at their most recent bid price.

To the extent the assets of the Fund are invested in other open-end investment companies that are registered under the 1940 Act, the Fund's NAV will be calculated based upon the NAVs reported by such registered open-end investment companies.

Securities and assets for which market quotations are not readily available or which cannot be accurately valued using the Fund's normal pricing procedures will be valued by the Trust's Fair Value Pricing Committee at fair value as determined in good faith under policies approved by the Board. Fair value pricing may be used, for example, in situations where (i) portfolio securities, such as securities with small capitalizations, are so thinly traded that there have been no transactions for that security over an extended period of time; (ii) an event occurs after the close of the exchange on which a portfolio security is principally traded that is likely to change the value of the portfolio security prior to the Fund's NAV calculation; (iii) the exchange on which the portfolio security is principally traded closes early; or (iv) trading of the particular portfolio security is halted during the day and does not resume prior to the Fund's NAV calculation. The Board will monitor and evaluate the Fund's use of fair value pricing, and periodically reviews the results of any fair valuation under the Trust's policies.

Availability of Information

The Fund's Web site (*www.cumberetfs.com*), which will be publicly available prior to the public offering of Shares, will include a form of the prospectus for the Fund that may be downloaded. The Fund's Web site will include additional quantitative information updated on a daily basis, including, for the Fund, (1) daily trading volume, the prior business day's reported closing price, NAV and mid-point of the bid/ask spread at the time of calculation of such NAV (the ''Bid/Ask Price''),[27] and a calculation of the premium and discount of the Bid/Ask Price against the NAV, and (2) data in chart format displaying the frequency distribution of discounts and premiums of the daily Bid/Ask Price against the NAV, within appropriate ranges, for each of the four previous calendar quarters. On each business day, before commencement of trading in Shares in the Core Trading Session on the Exchange (ordinarily 9:30 a.m., Eastern Time), the Fund's Web site will disclose the Disclosed Portfolio that will form the basis for the Fund's calculation of NAV at the end of the business day.[28]

[26] The Adviser represents that, to the extent the Trust effects the creation or redemption of Shares in cash, such transactions will be effected in the same manner for all Authorized Participants.

[27] The Bid/Ask Price of the Fund's Shares will be determined using the mid-point of the highest bid and the lowest offer on the Exchange as of the time of calculation of the Fund's NAV. The records relating to Bid/Ask Prices will be retained by the Fund and its service providers.

[28] Under accounting procedures followed by the Fund, trades made on the prior business day (''T'') will be booked and reflected in NAV on the current business day (''T+1''). Accordingly, the Fund will be able to disclose at the beginning of the business

Continued

The Fund will disclose on the Fund's Web site the following information regarding each portfolio holding, as applicable to the type of holding: Ticker symbol, CUSIP number or other identifier, if any; a description of the holding (including the type of holding); the identity of the security, index or other asset or instrument underlying the holding, if any; for options, the option strike price; quantity held (as measured by, for example, par value, notional value or number of shares, contracts or units); maturity date, if any; coupon rate, if any; effective date, if any; market value of the holding; and the percentage weighting of the holding in the Fund's portfolio. The Web site information will be publicly available at no charge.

In addition, a basket composition file, which includes the security names and share quantities, if applicable, required to be delivered in exchange for the Fund's Shares, together with estimates and actual cash components, will be publicly disseminated daily prior to the opening of the Exchange via the NSCC. The basket represents one Creation Unit of the Fund. The NAV of Shares of the Fund will normally be determined as of the close of the Core Trading Session on the Exchange (ordinarily 4:00 p.m., Eastern Time) on each business day. Authorized Participants may refer to the basket composition file for information regarding securities and financial instruments that may comprise the Fund's basket on a given day.

The approximate value of the Fund's investments on a per-Share basis, the Indicative Intra-Day Value (''IIV''), will be disseminated every 15 seconds during the Exchange Core Trading Session (ordinarily 9:30 a.m. to 4:00 p.m., Eastern Time). The IIV should not be viewed as a ''real-time'' update of NAV because the IIV will be calculated by an independent third party and may not be calculated in the exact same manner as NAV, which will be computed daily.

The IIV for the Fund will be calculated by dividing the ''Estimated Fund Value'' as of the time of the calculation by the total number of outstanding Shares. ''Estimated Fund Value'' is the sum of the estimated amount of cash held in the Fund's portfolio, the estimated amount of accrued interest owing to the Fund and the estimated value of the securities held in the Fund's portfolio, minus the estimated amount of the Fund's liabilities. The IIV will be calculated based on the same portfolio holdings disclosed on the Fund's Web site. In determining the estimated value for each of the component securities, the IIV will use last sale, market prices or other methods that would be considered appropriate for pricing securities held by registered investment companies.

Investors can also obtain the Trust's Statement of Additional Information (''SAI''), the Fund's shareholder reports, and its Form N–CSR and Form N–SAR, filed twice a year. The Trust's SAI and Shareholder Reports will be available free upon request from the Trust, and those documents and the Form N–CSR and Form N–SAR may be viewed on-screen or downloaded from the Commission's Web site at *www.sec.gov*. Information regarding market price and trading volume of the Shares will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services. Information regarding the previous day's closing price and trading volume information for the Shares will be published daily in the financial section of newspapers.

Quotation and last sale information for the Shares and the underlying U.S. exchange-traded equity securities will be available via the Consolidated Tape Association (''CTA'') high-speed line, and from the national securities exchange on which they are listed. Price information regarding non-U.S. exchange-traded equity securities held by the Fund will be available from the exchanges trading such assets.

Quotation information from brokers and dealers or pricing services will be available for Municipal Bonds, taxable municipal bonds, convertible bonds, OTC traded convertible preferred stocks, corporate debt obligations, VRDNs, and cash equivalents. Price information for money market funds will be available from the applicable investment company's Web site and from market data vendors. Intra-day and closing price information for OTC equity securities will be available from major market data vendors. Pricing information regarding each asset class in which the Fund will invest will generally be available through nationally recognized data service providers through subscription agreements. Quotation and last sale information for exchange-traded options will be available via the Options Price Reporting Authority and from the applicable U.S. options exchange. In addition, the IIV, (which is the Portfolio Indicative Value, as defined in NYSE Arca Equities Rule 8.600(c)(3)), will be widely disseminated at least every 15 seconds during the Core Trading Session by one or more major market data vendors.[29] The dissemination of the IIV, together with the Disclosed Portfolio, will allow investors to determine the value of the underlying portfolio of the Fund on a daily basis and will provide a close estimate of that value throughout the trading day.

Trading Halts

With respect to trading halts, the Exchange may consider all relevant factors in exercising its discretion to halt or suspend trading in the Shares of the Fund.[30] Trading in Shares of the Fund will be halted if the circuit breaker parameters in NYSE Arca Equities Rule 7.12 have been reached. Trading also may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable. These may include: (1) The extent to which trading is not occurring in the securities and/or the financial instruments comprising the Disclosed Portfolio of the Fund; or (2) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present. Trading in the Shares will be subject to NYSE Arca Equities Rule 8.600(d)(2)(D), which sets forth circumstances under which Shares of the Fund may be halted.

Trading Rules

The Exchange deems the Shares to be equity securities, thus rendering trading in the Shares subject to the Exchange's existing rules governing the trading of equity securities. Shares will trade on the NYSE Arca Marketplace from 4 a.m. to 8 p.m., Eastern Time in accordance with NYSE Arca Equities Rule 7.34 (Opening, Core, and Late Trading Sessions). The Exchange has appropriate rules to facilitate transactions in the Shares during all trading sessions. As provided in NYSE Arca Equities Rule 7.6, Commentary .03, the minimum price variation (''MPV'') for quoting and entry of orders in equity securities traded on the NYSE Arca Marketplace is $0.01, with the exception of securities that are priced less than $1.00 for which the MPV for order entry is $0.0001.

The Shares will conform to the initial and continued listing criteria under NYSE Arca Equities Rule 8.600. Consistent with NYSE Arca Equities Rule 8.600(d)(2)(B)(ii), the Adviser will implement and maintain, or be subject to, procedures designed to prevent the

day the portfolio that will form the basis for the NAV calculation at the end of the business day.

[29] Currently, it is the Exchange's understanding that several major market data vendors display and/or make widely available IIVs taken from CTA or other data feeds.

[30] *See* NYSE Arca Equities Rule 7.12, Commentary .04.

use and dissemination of material non-public information regarding the actual components of the Fund's portfolio. The Exchange represents that, for initial and/or continued listing, the Fund will be in compliance with Rule 10A–3 [31] under the Act, as provided by NYSE Arca Equities Rule 5.3. A minimum of 100,000 Shares will be outstanding at the commencement of trading on the Exchange. The Exchange will obtain a representation from the issuer of the Shares that the NAV per Share will be calculated daily and that the NAV and the Disclosed Portfolio [32] as defined in NYSE Arca Equities Rule 8.600(c)(2) will be made available to all market participants at the same time. The Fund's investments will be consistent with the Fund's investment objective and will not be used to enhance leverage.

Surveillance

The Exchange represents that trading in the Shares will be subject to the existing trading surveillances, administered by the Financial Industry Regulatory Authority (''FINRA'') on behalf of the Exchange, or by regulatory staff of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws. The Exchange represents that these procedures are adequate to properly monitor Exchange trading of the Shares in all trading sessions and to deter and detect violations of Exchange rules and federal securities laws applicable to trading on the Exchange.[33]

The surveillances referred to above generally focus on detecting securities trading outside their normal patterns, which could be indicative of manipulative or other violative activity. When such situations are detected, surveillance analysis follows and investigations are opened, where appropriate, to review the behavior of all relevant parties for all relevant trading violations.[34]

FINRA, on behalf of the Exchange, or regulatory staff of the Exchange, will communicate as needed regarding trading in the Shares, options and certain exchange-traded equity securities with other markets and other entities that are members of the ISG, and FINRA, on behalf of the Exchange, or regulatory staff of the Exchange, may obtain trading information regarding trading in the Shares, options and certain exchange-traded equity securities from such markets and other entities. In addition, the Exchange may obtain information regarding trading in the Shares, options and certain exchange-traded equity securities from markets and other entities that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement. In addition, FINRA, on behalf of the Exchange, is able to access, as needed, trade information for certain fixed income securities held by the Fund reported to FINRA's Trade Reporting and Compliance Engine (''TRACE''). FINRA also can access data obtained from the Municipal Securities Rulemaking Board (''MSRB'') relating to municipal bond trading activity for surveillance purposes in connection with trading in the Shares.

In addition, the Exchange also has a general policy prohibiting the distribution of material, non-public information by its employees.

All statements and representations made in this filing regarding (a) the description of the portfolio, (b) limitations on portfolio holdings or reference assets, or (c) the applicability of Exchange rules and surveillance procedures shall constitute continued listing requirements for listing the Shares of the Fund on the Exchange.

The issuer has represented to the Exchange that it will advise the Exchange of any failure by the Fund to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will monitor for compliance with the continued listing requirements. If the Fund is not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under NYSE Arca Equities Rule 5.5(m).

Information Bulletin

Prior to the commencement of trading, the Exchange will inform its Equity Trading Permit Holders in an Information Bulletin (''Bulletin'') of the special characteristics and risks associated with trading the Shares. Specifically, the Bulletin will discuss the following: (1) The procedures for purchases and redemptions of Shares in Creation Unit aggregations (and that Shares are not individually redeemable); (2) NYSE Arca Equities Rule 9.2(a), which imposes a duty of due diligence on its Equity Trading Permit Holders to learn the essential facts relating to every customer prior to trading the Shares; (3) the risks involved in trading the Shares during the Opening and Late Trading Sessions when an updated IIV will not be calculated or publicly disseminated; (4) how information regarding the IIV and the Disclosed Portfolio is disseminated; (5) the requirement that Equity Trading Permit Holders deliver a prospectus to investors purchasing newly issued Shares prior to or concurrently with the confirmation of a transaction; and (6) trading information.

In addition, the Bulletin will reference that the Fund is subject to various fees and expenses described in the Registration Statement. The Bulletin will discuss any exemptive, no-action, and interpretive relief granted by the Commission from any rules under the Act. The Bulletin will also disclose that the NAV for the Shares will be calculated after 4:00 p.m., Eastern Time each trading day.

2. Statutory Basis

The basis under the Act for this proposed rule change is the requirement under Section 6(b)(5) [35] that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

The Exchange believes that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices in that the Shares will be listed and traded on the Exchange pursuant to the initial and continued listing criteria in NYSE Arca Equities Rule 8.600. The Exchange has in place surveillance procedures that are adequate to properly monitor trading in the Shares in all trading sessions and to deter and detect violations of Exchange rules and applicable federal securities laws. FINRA, on behalf of the Exchange, or regulatory staff of the Exchange, will communicate as needed regarding trading in the Shares, options and certain exchange-traded equity securities with other markets and other entities that are members of the ISG, and FINRA, on behalf of the Exchange, or regulatory staff of the Exchange, may obtain trading information regarding trading in the Shares, options and certain exchange-traded equity securities from such markets and other entities. In addition, the Exchange may obtain information regarding trading in

[31] 17 CFR 240.10A–3.

[32] The term ''Disclosed Portfolio'' is defined in NYSE Arca Equities Rule 8.600(c)(2).

[33] FINRA surveils trading on the Exchange pursuant to a regulatory services agreement. The Exchange is responsible for FINRA's performance under this regulatory services agreement.

[34] For a list of the current members of ISG, *see www.isgportal.org.* The Exchange notes that not all components of the Disclosed Portfolio may trade on markets that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement.

[35] 15 U.S.C. 78f(b)(5).

the Shares, options and certain exchange-traded equity securities from markets and other entities that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement. In addition, FINRA, on behalf of the Exchange, is able to access, as needed, trade information for certain fixed income securities held by the Fund reported to TRACE. FINRA also can access data obtained from the MSRB relating to municipal bond trading activity for surveillance purposes in connection with trading in the Shares. The Fund may not purchase or hold illiquid assets if, in the aggregate, more than 15% of its net assets would be invested in illiquid assets. The Adviser and Sub-Adviser are not registered as broker-dealers but the Adviser is affiliated with one or more broker-dealers and has implemented and will maintain a fire wall with respect to each such broker-dealer affiliate regarding access to information concerning the composition and/or changes to the portfolio. The Fund's investments in Municipal Bonds will be well-diversified in that, under normal market conditions, the Fund will hold a minimum of 75 different Municipal Bonds; no Municipal Bond held by the Fund will exceed 4% of the weight of the Fund's portfolio; no single Municipal Bond issuer will account for more than 10% of the weight of the Fund's portfolio; and the Fund will hold Municipal Bonds of a minimum of 40 non-affiliated issuers, diversified among issuers in at least 20 different states, with no more than 30% of the Fund's assets comprised of Municipal Bonds that provide exposure to any single state. In addition, each Municipal Bond held by the Fund must be a constituent of a deal where the deal's original offering amount was at least $100 million. The Fund's investments will be diversified among a minimum of ten distinct Municipal Bond sectors and the Fund will limit its investments in Municipal Bonds in any single sector to 25% of the Fund's assets.

The proposed rule change is designed to promote just and equitable principles of trade and to protect investors and the public interest in that the Exchange will obtain a representation from the issuer of the Shares that the NAV per Share will be calculated daily and that the NAV and the Disclosed Portfolio will be made available to all market participants at the same time. In addition, a large amount of information is publicly available regarding the Fund and the Shares, thereby promoting market transparency. Quotation and last sale information for the Shares and the underlying U.S. exchange-traded equity securities will be available via the CTA high-speed line, and from the national securities exchange on which they are listed. The Fund will disclose on the Fund's Web site the following information regarding each portfolio holding, as applicable to the type of holding: Ticker symbol, CUSIP number or other identifier, if any; a description of the holding (including the type of holding); the identity of the security, index or other asset or instrument underlying the holding, if any; for options, the option strike price; quantity held (as measured by, for example, par value, notional value or number of shares, contracts or units); maturity date, if any; coupon rate, if any; effective date, if any; market value of the holding; and the percentage weighting of the holding in the Fund's portfolio. Moreover, prior to the commencement of trading, the Exchange will inform its Equity Trading Permit Holders in an Information Bulletin of the special characteristics and risks associated with trading the Shares. Trading in Shares of the Fund will be halted if the circuit breaker parameters in NYSE Arca Equities Rule 7.12 have been reached or because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable. Trading in the Shares will be subject to NYSE Arca Equities Rule 8.600(d)(2)(D), which sets forth circumstances under which Shares of the Fund may be halted. In addition, as noted above, investors will have ready access to information regarding the Fund's holdings, the IIV, the Disclosed Portfolio, and quotation and last sale information for the Shares.

The proposed rule change is designed to perfect the mechanism of a free and open market and, in general, to protect investors and the public interest in that it will facilitate the listing and trading of an additional type of actively-managed exchange-traded product that principally holds municipal bonds and that will enhance competition among market participants, to the benefit of investors and the marketplace. As noted above, the Exchange has in place surveillance procedures relating to trading in the Shares and may obtain information via ISG from other exchanges that are members of ISG or with which the Exchange has entered into a comprehensive surveillance sharing agreement. In addition, as noted above, investors will have ready access to information regarding the Fund's holdings, the IIV, the Disclosed Portfolio, and quotation and last sale information for the Shares.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Act. The Exchange notes that the proposed rule change will facilitate the listing and trading of an additional type of actively-managed exchange-traded product that principally holds municipal bonds and that will enhance competition among market participants, to the benefit of investors and the marketplace.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Discussion and Commission Findings

After careful review, the Commission finds that the Exchange's proposal to list and trade the Shares is consistent with the Act and the rules and regulations thereunder applicable to a national securities exchange.[36] In particular, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act,[37] which requires, among other things, that the Exchange's rules be designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Commission also finds that the proposal to list and trade the Shares on the Exchange is consistent with Section 11A(a)(1)(C)(iii) of the Act,[38] which sets forth Congress' finding that it is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities. Quotation and last-sale information for the Shares and the underlying U.S. exchange-traded equity securities will be available via the CTA high-speed line, and from the

[36] In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[37] 15 U.S.C. 78f(b)(5).

[38] 15 U.S.C. 78k–1(a)(1)(C)(iii).

national securities exchange on which they are listed.

The approximate value of the Fund's investments on a per-Share basis, the IIV (which is the Portfolio Indicative Value, as defined in NYSE Arca Equities Rule 8.600(c)(3)), will be disseminated every 15 seconds during the Exchange Core Trading Session (ordinarily 9:30 a.m. to 4:00 p.m., Eastern Time) by one or more major market data vendors.[39] On each business day, before commencement of trading in Shares in the Core Trading Session on the Exchange (ordinarily 9:30 a.m., Eastern Time), the Fund's Web site will disclose the Disclosed Portfolio that will form the basis for the Fund's calculation of NAV at the end of the business day.[40] In addition, a basket composition file, which includes the security names and share quantities, if applicable, required to be delivered in exchange for the Fund's Shares, together with estimates and actual cash components, will be publicly disseminated daily prior to the opening of the Exchange via the NSCC. The basket represents one Creation Unit of the Fund. The NAV of Shares of the Fund will normally be determined as of the close of the Core Trading Session on the Exchange (ordinarily 4:00 p.m., Eastern Time) on each business day. Authorized Participants may refer to the basket composition file for information regarding securities and financial instruments that may comprise the Fund's basket on a given day.

Information regarding market price and trading volume of the Shares will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services. Information regarding the previous day's closing price and trading volume information for the Shares will be published daily in the financial section of newspapers. In addition, price information regarding non-U.S. exchange-traded equity securities held by the Fund will be available from the exchanges trading such assets. Quotation information from brokers and dealers or pricing services will be available for Municipal Bonds, taxable municipal bonds, convertible bonds, OTC traded convertible preferred stocks, corporate debt obligations, VRDNs, and cash equivalents. Price information for money market funds will be available from the applicable investment company's Web site and from market data vendors. Intra-day and closing price information for OTC equity securities will be available from major market data vendors. Pricing information regarding each asset class in which the Fund will invest will generally be available through nationally recognized data service providers through subscription agreements. Quotation and last-sale information for exchange-traded options will be available via the Options Price Reporting Authority and from the applicable U.S. options exchange. The Fund's Web site will include a form of the prospectus for the Fund and additional data relating to NAV and other applicable quantitative information.

The Commission further believes that the proposal to list and trade the Shares is reasonably designed to promote fair disclosure of information that may be necessary to price the Shares appropriately and to prevent trading when a reasonable degree of transparency cannot be assured. The Exchange will obtain a representation from the issuer of the Shares that the NAV per Share will be calculated daily and that the NAV and the Disclosed Portfolio will be made available to all market participants at the same time. Trading in Shares of the Fund will be halted if the circuit breaker parameters in NYSE Arca Equities Rule 7.12 have been reached or because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable,[41] and trading in the Shares will be subject to NYSE Arca Equities Rule 8.600(d)(2)(D), which sets forth additional circumstances under which Shares of the Fund may be halted.

The Exchange represents that it has a general policy prohibiting the distribution of material, non-public information by its employees. In addition, Commentary .06 to NYSE Arca Equities Rule 8.600 further requires that personnel who make decisions on the open-end fund's portfolio composition must be subject to procedures designed to prevent the use and dissemination of material, non-public information regarding the open-end fund's portfolio. The Exchange represents that the Adviser and Sub-Adviser are not registered as broker-dealers; however, the Adviser (but not the Sub-Adviser) is affiliated with one or more broker-dealers, and the Adviser has implemented and will maintain a fire wall with respect to each such broker-dealer affiliate regarding access to information concerning the composition of, or changes to, the portfolio.[42]

Prior to the commencement of trading, the Exchange will inform its Equity Trading Permit Holders in a Bulletin of the special characteristics and risks associated with trading the Shares. The Exchange represents that trading in the Shares will be subject to the existing trading surveillances, administered by the FINRA on behalf of the Exchange, or by regulatory staff of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws.[43] The Commission believes that the Exchange's initial and continued listing requirements, combined with the Fund's investment criteria that would apply to Municipal Bonds in the portfolio, are designed to mitigate the potential for price manipulation of the Shares.

The Exchange represents that it deems the Shares to be equity securities, thus rendering the trading of the Shares subject to the Exchange's existing rules governing the trading of equity securities.

In support of this proposal, the Exchange has made the following additional representations:

[39] The Exchange represents that several major market data vendors display and/or make widely available IIVs taken from CTA or other data feeds. According to the Exchange, the IIV for the Fund will be calculated by dividing the ''Estimated Fund Value'' as of the time of the calculation by the total number of outstanding Shares. ''Estimated Fund Value'' is the sum of the estimated amount of cash held in the Fund's portfolio, the estimated amount of accrued interest owing to the Fund, and the estimated value of the securities held in the Fund's portfolio, minus the estimated amount of the Fund's liabilities. The IIV will be calculated based on the same portfolio holdings disclosed on the Fund's Web site. In determining the estimated value for each of the component securities, the IIV will use last sale, market prices, or other methods that would be considered appropriate for pricing securities held by registered investment companies.

[40] The Fund will disclose on the Fund's Web site the following information regarding each portfolio holding, as applicable to the type of holding: Ticker symbol, CUSIP number or other identifier, if any; a description of the holding (including the type of holding); the identity of the security, index, or other asset or instrument underlying the holding, if any; for options, the option strike price; quantity held (as measured by, for example, par value, notional value or number of shares, contracts or units); maturity date, if any; coupon rate, if any; effective date, if any; market value of the holding; and the percentage weighting of the holding in the Fund's portfolio. The Web site information will be publicly available at no charge.

[41] These reasons may include: (1) The extent to which trading is not occurring in the securities or financial instruments comprising the Disclosed Portfolio of the Fund; or (2) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present. With respect to trading halts, the Exchange may consider all relevant factors in exercising its discretion to halt or suspend trading in the Shares of the Fund.

[42] *See supra* note 11.

[43] The Exchange states that FINRA surveils trading on the Exchange pursuant to a regulatory services agreement and that the Exchange is responsible for FINRA's performance under this regulatory services agreement. *See supra* note 33.

(1) The Shares will conform to the initial and continued listing criteria under NYSE Arca Equities Rule 8.600.

(2) The Exchange has appropriate rules to facilitate transactions in the Shares during all trading sessions.

(3) Trading in the Shares will be subject to the existing trading surveillances, administered by FINRA on behalf of the Exchange, or by regulatory staff of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws. The Exchange represents that these procedures are adequate to properly monitor Exchange trading of the Shares in all trading sessions and to deter and detect violations of Exchange rules and federal securities laws applicable to trading on the Exchange. These surveillances focus on detecting securities trading outside their normal patterns, which could be indicative of manipulative or other violative activity. When such situations are detected, surveillance analysis follows and investigations are opened, where appropriate, to review the behavior of all relevant parties for all relevant trading violations.

(4) FINRA, on behalf of the Exchange, or regulatory staff of the Exchange, will communicate as needed regarding trading in the Shares, options, and certain exchange-traded equity securities with other markets and other entities that are members of the ISG, and FINRA, on behalf of the Exchange, or regulatory staff of the Exchange, may obtain trading information regarding trading in the Shares, options, and certain exchange-traded equity securities from such markets and other entities. In addition, the Exchange may obtain information regarding trading in the Shares, options, and certain exchange-traded equity securities from markets and other entities that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement. In addition, FINRA, on behalf of the Exchange, is able to access, as needed, trade information for certain fixed income securities held by the Fund reported to FINRA's Trade Reporting and Compliance Engine. FINRA also can access data obtained from the Municipal Securities Rulemaking Board relating to municipal bond trading activity for surveillance purposes in connection with trading in the Shares.

(5) Prior to the commencement of trading, the Exchange will inform its Equity Trading Permit Holders in a Bulletin of the special characteristics and risks associated with trading the Shares. Specifically, the Bulletin will discuss the following: (a) The procedures for purchases and redemptions of Shares in Creation Unit aggregations (and that Shares are not individually redeemable); (b) NYSE Arca Equities Rule 9.2(a), which imposes a duty of due diligence on its Equity Trading Permit Holders to learn the essential facts relating to every customer prior to trading the Shares; (c) the risks involved in trading the Shares during the Opening and Late Trading Sessions when an updated IIV will not be calculated or publicly disseminated; (d) how information regarding the IIV and the Disclosed Portfolio is disseminated; (e) the requirement that Equity Trading Permit Holders deliver a prospectus to investors purchasing newly issued Shares prior to or concurrently with the confirmation of a transaction; and (f) trading information. The Bulletin will also discuss any exemptive, no-action, and interpretive relief granted by the Commission from any rules under the Act.

(6) For initial and continued listing, the Fund must be in compliance with Rule 10A–3 under the Act.[44]

(7) At least 80% of the weight of the Fund's assets will be in Municipal Bonds with a modified duration of 15 years or less. With respect to credit quality, under normal market conditions, at least 90% of the Fund's assets invested in Municipal Bonds will be in Municipal Bonds rated ''A'' or better by at least one major credit rating agency or, if unrated, deemed to be of comparable quality in the Adviser's opinion.

(8) The Fund's Municipal Bond investments will be diversified among a minimum of ten distinct Municipal Bond sectors.[45] In addition, the Fund will limit its investments in Municipal Bonds in any single sector to 25% of the Fund's assets.

(9) Under normal market conditions, each Municipal Bond held by the Fund must be a constituent of a deal where the deal's original offering amount was at least $100 million. The Fund will hold a minimum of 75 different Municipal Bonds. No Municipal Bond held by the Fund will exceed 4% of the weight of the Fund's portfolio and no single Municipal Bond issuer will account for more than 10% of the weight of the Fund's portfolio. The Fund will hold Municipal Bonds of a minimum of 40 non-affiliated issuers diversified among issuers in at least 20 different states, with no more than 30% of the Fund's assets comprised of Municipal Bonds that provide exposure to any single state.[46]

(10) The ETFs in which the Fund may invest will be registered under the 1940 Act and will be listed and traded in the U.S. on registered exchanges. With respect to its exchange-traded equity securities investments (including exchange-traded convertible preferred stocks and exchange-traded stocks into which convertible bonds may be converted), the Fund will normally invest in equity securities that are listed and traded on a U.S. exchange or in markets that are members of the ISG or parties to a comprehensive surveillance sharing agreement with the Exchange. In any case, not more than 10% of the net assets of the Fund in the aggregate invested in equity securities (except for money market funds) will consist of equity securities whose principal market is not a member of ISG or a market with which the Exchange does not have a comprehensive surveillance sharing agreement.

(11) The Fund may hold up to an aggregate amount of 15% of its net assets in illiquid assets (calculated at the time of investment), consistent with Commission guidance. The Fund will monitor its portfolio liquidity on an ongoing basis to determine whether, in light of current circumstances, an adequate level of liquidity is being maintained, and will consider taking appropriate steps in order to maintain adequate liquidity if, through a change in values, net assets, or other circumstances, more than 15% of the Fund's net assets are held in illiquid assets. Illiquid assets include securities subject to contractual or other restrictions on resale and other instruments that lack readily available markets as determined in accordance with Commission staff guidance.

(12) The Fund's investments will be consistent with its investment objective and will not be used to provide multiple returns of a benchmark or to produce leveraged returns.

The Exchange also represents that all statements and representations made in this filing regarding (a) the description of the portfolio, (b) limitations on portfolio holdings or reference assets, or (c) the applicability of Exchange rules

[44] *See* 17 CFR 240.10A–3.

[45] The Fund's investments in Municipal Bonds will include investments in state and local (*e.g.,* county, city, town) Municipal Bonds relating to such sectors as the following: Dedicated tax; public power; tax increment; toll road; port revenue; airport revenue; water revenue; sewer revenue; higher education (colleges and universities); wastewater revenue; school districts; sales tax revenue; and pre-refunded bonds.

[46] For purposes of this restriction, each state and each separate political subdivision, agency, authority, or instrumentality of such state, each multi-state agency or authority, and each guarantor, if any, will be treated as separate issuers of Municipal Bonds.

and surveillance procedures shall constitute continued listing requirements for listing the Shares of the Fund on the Exchange.

The issuer has represented to the Exchange that it will advise the Exchange of any failure by the Fund to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will monitor for compliance with the continued listing requirements.[47] If the Fund is not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under NYSE Arca Equities Rule 5.5(m).

This approval order is based on all of the Exchange's representations, including those set forth above and in the Notice, and the Exchange's description of the Fund. The Commission notes that the Fund and the Shares must comply with the requirements of NYSE Arca Equities Rule 8.600 to be listed and traded on the Exchange.

For the foregoing reasons, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act[48] and the rules and regulations thereunder applicable to a national securities exchange.

IV. Solicitation of Comments on Amendment No. 2 to the Proposed Rule Change

Interested persons are invited to submit written data, views, and arguments concerning whether Amendment No. 2 to the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2016–107 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2016–107. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2016–107 and should be submitted on or before December 8, 2016.

V. Accelerated Approval of Proposed Rule Change as Modified by Amendment No. 2 Thereto

The Commission finds good cause to approve the proposed rule change, as modified by Amendment No. 2 thereto, prior to the thirtieth day after the date of publication of notice of the filing of Amendment No. 2 in the **Federal Register**. Amendment No. 2 supplements the proposed rule change by, among other things, incorporating additional diversification criteria to the Fund's investments in Municipal Bonds. Specifically, the Exchange represents that the Fund would adhere to certain investment restrictions, including but not limited to, the following:

(1) The Fund's Municipal Bond investments will be diversified among a minimum of ten distinct Municipal Bond sectors.

(2) The Fund will limit its investments in Municipal Bonds in any single sector to 25% of the Fund's assets.

(3) Each Municipal Bond held by the Fund must be a constituent of a deal where the deal's original offering amount was at least $100 million.

(4) The Fund will hold a minimum of 75 different Municipal Bonds.

(5) No Municipal Bond held by the Fund will exceed 4% of the weight of the Fund's portfolio, and no single Municipal Bond issuer will account for more than 10% of the weight of the Fund's portfolio.

(6) The Fund will hold Municipal Bonds of a minimum of 40 non-affiliated issuers diversified among issuers in at least 20 different states, with no more than 30% of the Fund's assets comprised of Municipal Bonds that provide exposure to any single state.

The Commission believes that the addition of these investment restrictions helps to ensure that the proposed listing and trading of the Shares is consistent with the portion of Section 6(b)(5) of the Act,[49] which requires that the rules of a national securities exchange must be designed to, among other things, prevent fraudulent and manipulative acts and practices and, in general, to protect investors and the public interest. Accordingly, the Commission finds good cause, pursuant to Section 19(b)(2) of the Act,[50] to approve the proposed rule change, as modified by Amendment No. 2 thereto, on an accelerated basis.

VI. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[51] that the proposed rule change (SR–NYSEArca–2016–107), as modified by Amendment No. 2 thereto, be, and it hereby is, approved on an accelerated basis.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[52]

Brent J. Fields,

Secretary.

[FR Doc. 2016–27603 Filed 11–16–16; 8:45 am]

BILLING CODE 8011–01–P

[47] The Commission notes that certain other proposals for the listing and trading of Managed Fund Shares include a representation that the exchange will ''surveil'' for compliance with the continued listing requirements. *See, e.g.,* Securities Exchange Act Release No. 78005 (Jun. 7, 2016), 81 FR 38247 (Jun. 13, 2016) (SR–BATS–2015–100). In the context of this representation, it is the Commission's view that ''monitor'' and ''surveil'' both mean ongoing oversight of a fund's compliance with the continued listing requirements. Therefore, the Commission does not view ''monitor'' as a more or less stringent obligation than ''surveil'' with respect to the continued listing requirements.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79279; File No. SR–CBOE–2016–074]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fees Schedule

November 10, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 27, 2016, Chicago Board Options Exchange, Incorporated (''CBOE'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The text of the proposed rule change is available on the Exchange's Web site (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fees Schedule. Specifically, the Exchange proposes to amend its Fees Schedule with respect to waiving transaction fees incurred as a result of transactions that compress or reduce certain Clearing Trading Permit Holder (''TPH'') open positions.

By way of background, SEC Rule 15c3–1, Net Capital Requirements for Brokers or Dealers (''Net Capital Rules''), requires that every registered broker-dealer maintain certain specified minimum levels of capital. The primary purpose of these rules is to regulate the ability of broker-dealers to meet their financial obligations to customers and other creditors. All of the broker-dealers that are clearing members of the Options Clearing Corporation (''OCC'') are subject to the Net Capital Rules. However, a subset of OCC's clearing members are subsidiaries of U.S. bank holding companies and these broker-dealers, through their affiliation with their parent U.S. bank holding companies, must also comply with bank regulatory capital requirements pursuant to rule-making required under the Dodd-Frank Wall Street Reform and Consumer Protection Act (''Dodd-Frank''). Recent rule-making enacted under Dodd-Frank now requires U.S. bank holding companies to hold substantially more bank regulatory capital than would otherwise be required under the Net Capital Rules. Additionally, due to the large contract size of S&P 500 Index (''SPX'') options, open interest in certain SPX series can result in extremely large bank regulatory capital requirements, even though the positions incur minimal requirements under the Net Capital Rules. As such, transactions that would result in the closing of this open interest have a beneficial impact on the bank regulatory capital requirements of the Clearing TPH's parent company with a minimal impact on regulatory capital required under the capital rules. The Exchange notes that most of these open positions are in out-of-the-money options and certain spread positions that are essentially riskless strategies because they have little or no market exposure. Particularly, the Exchange notes that given the nature of these options, there is minimal chance for large losses to occur, yet these positions are still subject to large bank regulatory capital requirements. Exchange transaction fees, however, if not waived, could discourage market participants from closing these positions out even though those market participants may also prefer to close them rather than carry them to expiration.[3] Accordingly, in order to encourage the compression of certain out-of-the-money and riskless option positions, the Exchange previously adopted a rebate of all transactions fees for transactions that close these positions, provided they meet certain criteria, as described more fully below.[4]

The rebate of transaction fees[5] is currently limited to those transactions that the Exchange believes would have the greatest impact on bank regulatory capital requirements but are also constrained to those positions that have little economic risk associated with them. Specifically, to be eligible for a rebate, a transaction must be: (i) For a complex order with at least five (5) different series in S&P 500 Index (SPX) options, SPX Weeklys (SPXW) options or p.m.-settled SPX options (SPXPM), (ii) a closing-only transaction or, if the transaction involves a Firm order (origin code ''F''), an opening transaction executed to facilitate a compression of option positions for a market-maker or joint-back office (''JBO'') account; (iii) for a position with a required capital charge equal to the minimum capital charge under OCC rules RBH Calculator or a position comprised of option series with a delta of ten (10) or less and (iv) entered between the first business day following a quarterly expiration through the last business day of that quarter.[6] To receive a rebate, a rebate request with supporting documentation must also be submitted to the Exchange within 3 business days of the transactions. The Exchange proposes to amend the last criteria (*i.e.,* the time period for which a Trading Permit Holder can enter these transactions and be eligible for the rebate). Specifically, the Exchange proposes to provide that in addition to meeting the first three criteria described above, the transaction would be eligible for a rebate if entered on any of the final three (3) trading days of any calendar month. The proposed rule change allows TPHs to mitigate their regulatory capital requirements on a monthly basis, instead of quarterly.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] For example, an out-of-the-money SPX option market-maker transaction may be worth only a few pennies per contract, but would cost approximately $0.33 per contract ($0.20 transaction fee plus $0.13 SPX Index License Surcharge) to close out.

[4] *See* Securities Exchange Act Release No. 76842 (January 6, 2016) 81 FR 1455 (January 12, 2016) (SR–CBOE–2015–117).

[5] Rebate of transaction fees would include the transaction fee assessed along with any other surcharges assessed per contract (*e.g.,* the Index License Surcharge).

[6] For example, the third quarter of 2016 standard-Friday expiration occurred on September 16, 2016. For that quarter, qualifying transactions needed to be entered no earlier than September 19, 2016 and no later than September 30, 2016.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[7] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[8] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitation transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with Section 6(b)(4) of the Act,[9] which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Trading Permit Holders and other persons using its facilities.

The Exchange believes providing a rebate of fees for transactions that compress certain out-of-the-money and riskless options positions is reasonable, equitable and not unfairly discriminatory because these positions would result in extremely large bank regulatory capital requirements for Clearing TPHs even though there is minimal chance for large losses to occur. Additionally, these positions have little or no economic benefit to the TPHs that hold the positions, who would likely prefer to close them but for the associated transaction fees. The fee rebate therefore allows TPHs to close out of these positions that are needlessly burdensome on themselves and Clearing TPHs.

The Exchange believes the proposed rule change is reasonable, equitable and not unfairly discriminatory because TPHs can now mitigate their regulatory capital requirements on a monthly basis, instead of quarterly. The proposed change would encourage the closing of positions at the end of each month that needlessly result in burdensome capital requirements that, once closed, would alleviate the capital requirement constraints on TPHs and improve overall market liquidity by freeing capital currently tied up in certain out-of-the-money and riskless positions. The Exchange also notes that the proposed amended requirement would apply to all TPHs seeking a rebate for these transactions.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition that are not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the Act because it applies to all market participants in the same manner with positions that meet the eligible criteria. The proposed change would encourage the closing of positions, on a monthly basis, that needlessly result in burdensome capital requirements that, once closed, would alleviate the capital requirement constraints on TPHs and improve overall market liquidity by freeing capital currently tied up in certain out-of-the-money and riskless positions. The Exchange does not believe that the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed rule change applies only to CBOE. To the extent that the proposed change makes CBOE a more attractive marketplace for market participants at other exchanges, such market participants are welcome to become CBOE market participants.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[10] and paragraph (f) of Rule 19b-4[11] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–CBOE–2016–074 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–CBOE–2016–074. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE–2016–074, and should be submitted on or before December 8, 2016.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79289; File No. SR–FINRA–2016–041]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Implementation Date for Alternative Trading Systems To Report Sequence Numbers Under Rule 4554

November 10, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 8. 2016, Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by FINRA. FINRA has designated the proposed rule change as constituting a ''non-controversial'' rule change under paragraph (f)(6) of Rule 19b–4 under the Act,[3] which renders the proposal effective upon receipt of this filing by the Commission.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

FINRA is proposing to delay implementation of Rule 4554(b)(8). The proposed rule change would not make any other changes to FINRA rules.

The proposed rule change does not make any changes to the text of FINRA rules.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In May 2016, the SEC approved Rule 4554 to further enhance FINRA's ability to reconstruct an ATS's order book and better perform its order-based surveillance, which includes surveillance for layering, quote spoofing, and mid-point pricing manipulation. To accomplish this, Rule 4554 requires ATSs to report order information for each order they receive in an NMS stock beyond that set forth in the OATS rules, such as order re-pricing events (*e.g.,* changes to an order that is pegged to the National Best Bid or Offer (''NBBO'')) and order display and reserve size information.[4] Rule 4554 sets forth four categories of reporting requirements: (1) Data to be reported by all ATSs at the time of order receipt; (2) data to be reported by all ATSs at the time of order execution; (3) data to be reported by ATSs that display subscriber orders; and (4) data specific to ATSs that are registered as ADF Trading Centers.

Rule 4554(b) requires that all ATSs report eight categories of information at the time of order receipt, including the sequence number assigned to the order event by the ATS's matching engine.[5] When FINRA announced the SEC's approval of Rule 4554, it established an implementation date of November 7, 2016; however, FINRA noted that it anticipated submitting a proposed rule change to the SEC that would require ATSs to provide a sequence number for all OATS event types.[6] FINRA noted that it ''is deferring the implementation of this requirement to report a sequence number for new orders.'' [7] In this proposed rule change, FINRA is proposing that the requirement that ATSs report a sequence number when reporting new orders not be implemented on November 7, 2016.

FINRA anticipates filing a proposed rule change with the SEC in the near future to extend the requirement to report a sequence number beyond order receipt because, without a sequence number on all order events, FINRA is unable to properly sequence events when a single ATS MPID reports order events in the same symbol with identical timestamps. However, because a proposed rule change has not yet been filed, FINRA is filing this proposed rule change to delay the implementation of the requirement in Rule 4554(b)(8) that ATSs report the sequence number assigned to the order event by the ATS's matching engine at the time of order receipt. FINRA will announce the implementation date for this requirement at the time it announces the implementation date for the extension of the requirement to all OATS order events.

FINRA has filed the proposed rule change for immediate effectiveness and has requested that the SEC waive the requirement that the proposed rule change not become operative for 30 days after the date of the filing, so FINRA can implement the proposed rule change immediately.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[8] which requires, among other things, that FINRA rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. FINRA believes the proposed rule change is consistent with the Act in that it will provide ATSs with additional time to implement the requirement in Rule 4554(b)(8) and will not require ATSs to begin reporting the sequence number assigned to the order event by the ATS's matching engine at the time of order receipt until such time as sequence numbers are required for all OATS event types.

[12] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 17 CFR 240.19b–4(f)(6).

[4] *See* Securities Exchange Act Release No. 77798 (May 10, 2016), 81 FR 30395 (May 16, 2016) (SR–FINRA–2016–010). Some of these requirements do not apply to all ATSs.

[5] Rule 4554(b)(8). Rule 4554(b) also requires all ATSs, at the time of order receipt, to report: (1) Whether the ATS displays subscriber orders outside of the ATS and, if the ATS displays subscriber orders outside of the ATS, whether subscriber orders are displayed to subscribers only, or are distributed for publication in the consolidated quotation data; (2) whether the ATS is an ADF Trading Center as defined in FINRA Rule 6220; (3) whether the order can be routed away from the ATS for execution; (4) whether there are any counter-party restrictions on the order; (5) a unique identifier representing the specific order type other than market and limit orders that have no other special handling instructions; (6) the NBBO (or relevant reference price) in effect at the time of order receipt and the timestamp of when the ATS captured the effective NBBO (or relevant reference price); and (7) the market data feed the ATS used to obtain the NBBO (or relevant reference price).

[6] *See Regulatory Notice* 16–28, at n.3 (August 2016).

[7] *Id.*

[8] 15 U.S.C. 78*o*–3(b)(6).

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed delay in implementation of Rule 4554(b)(8) will reduce the burden on members by allowing additional time to implement the requirement to report the sequence number assigned to the order event by the ATS's matching engine at the time of order receipt.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [9] and subparagraph (f)(6) of Rule 19b–4 thereunder.[10]

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii)[11] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. FINRA has requested that the Commission waive the 30-day operative delay so that the proposed rule change will become operative on filing. FINRA stated that it anticipates extending the requirement to report a sequence number beyond order receipt because, without a sequence number on all order events, FINRA is unable to properly sequence events when a single ATS MPID reports order events in the same symbol with identical timestamps. However, because a proposed rule change has not been filed, FINRA is delaying the implementation of the requirement in Rule 4554(b)(8). For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission designates the proposed rule change to be operative upon filing.[12]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–FINRA–2016–041 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–FINRA–2016–041. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of FINRA. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–FINRA–2016–041, and should be submitted on or before December 8, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79281; File No. SR–BX–2016–059]

Self-Regulatory Organizations; NASDAQ BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 4702 and Rule 4703 To Add a ''Trade Now'' Instruction to Certain Order Types

November 10, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 8, 2016, NASDAQ BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 4702 (Order Types) and Rule 4703 (Order Attributes) to add a ''Trade Now'' instruction to certain order types.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaqbx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

BX proposes to amend Rules [sic] 4702 (Order Types) and Rule 4703 (Order Attributes) to add a ''Trade Now'' instruction to certain order types. BX will offer this functionality through its OUCH, RASH, FLITE, and FIX protocols. This instruction will provide resting orders with a greater ability to receive an execution when that resting order is locked, *e.g.,* the price of a resting non-display buy order equals the price of a resting displayed sell order on the BX book. The Trade Now instruction will allow participants to enter an instruction to have a locked resting buy (sell) order execute against the locking sell (buy) order. Depending on the protocol used by the participant to access the BX system, the participant may either specify that the order execute against locking interest automatically, or the participant may be required to send a Trade Now instruction to the Exchange once the order has become locked. As discussed in greater detail below, BX is offering the Trade Now instruction for all orders that may be sent to the BX book and that are not subject to other BX rules regarding the display and execution of those orders.

When a Trade Now instruction is applied to a resting buy (sell) order, the order will execute against the available size of the locking sell (buy) order at the locked price. The following example illustrates this scenario:

- Participant A enters a Non-Display buy order for 200 shares at $0.95, and specifies the Trade Now instruction;
- Participant B enters a Post Only sell order for 100 shares at $0.95; [3]
- The Post Only order is posted at $0.95 and locks the Non-Display order;
- The buy order will execute for 100 shares at $0.95 as the remover of liquidity.

If a buy (sell) order with the Trade Now instruction is only partially executed, the unexecuted portion of that order remains on the BX book and maintains its priority. When a Trade Now instruction is entered through the OUCH or FLITE protocol for a resting buy (sell) order and there is no locking order on the opposite side of the market, the Trade Now instruction will be ignored and the buy (sell) order will remain on the BX book, retaining its priority.

As noted above, BX is proposing to offer the Trade Now instruction for all orders that may be sent to the BX book and that are not subject to other BX rules regarding the display and execution of those orders. Accordingly, the Trade Now instruction shall not be available for Retail Price Improving Orders (Rule 4702(b)(5)) or Retail Orders (Rule 4702(b)(6)). A Retail Price Improving Order is held on the Exchange Book in order to provide liquidity at a price at least $0.001 better than the NBBO, and may execute only against a Retail Order, and only if its price is at least $0.001 better than the NBBO. A Retail Order will attempt to execute against Retail Price Improving Orders and any other orders on the Exchange Book with a price that is (i) equal to or better than the price of the Retail Order and (ii) at least $0.001 better than the NBBO. Given that Retail Price Improving Orders and Retail Orders are already subject to rules governing the handling and execution of such orders, there is not a need to implement the Trade Now instruction for these order types.

Depending on the interface being used by the participant, the Trade Now attribute may either allow the order to execute against locking interest automatically (''Reactive Trade Now''), or the participant may be required to send a Trade Now instruction to the Exchange once the order has become locked (''Non-Reactive Trade Now''). All orders that are entered through the RASH and FIX protocols with a Trade Now order attribute will be Reactive Trade Now, and those orders shall execute against locking interest automatically.

The Reactive Trade Now instruction will be available on an order-by-order basis, and will also be available as an optional port level setting. If the Reactive Trade Now setting is enabled on a specific port, all orders entered via the specific port will, by default, be designated with the Reactive Trade Now instruction. If the Reactive Trade Now setting is enabled on a specific port, participants will have the ability to designate on an order-by-order basis that a particular order entered via the specific port will not be designated with the Reactive Trade Now instruction, thereby overriding the port level setting for the order. If the Reactive Trade Now instruction is specified for an order for which the Trade Now instruction does not apply, *e.g.,* a Retail Price Improving Order or a Retail Order, the system will not invoke the Trade Now instruction for that order.

In contrast, orders entered through the OUCH and FLITE protocols will use the Non-Reactive Trade Now functionality, and participants must send the Trade Now instruction after the order becomes locked. If a participant enters a Non-Reactive Trade Now instruction when there is no locking interest, the instruction will be ignored by the system and the order will remain on the BX Book with the same priority.

The Non-Reactive Trade Now instruction will be available to participants on order-by-order basis. If the Non-Reactive Trade Now instruction is entered for an order for which the Trade Now instruction does not apply, the system will not invoke the Trade Now instruction for that order.

BX is offering two different variations of the Trade Now instruction to reflect the differences in behavior among participants who use the different BX protocols. For example, BX typically assumes a more active role in managing the order flow submitted by users of the RASH and FIX protocols. Allowing these participants to use the Reactive Trade Now instruction at the time of order entry will allow for the automatic execution of orders, and reflects the order flow management practices of these participants. In contrast, users of the OUCH and FLITE protocols generally assume a more active role in managing their order flow. Offering the Non-Reactive Trade Now instruction for these protocols, and its requirement that the instruction must be sent after the order becomes locked, reflects the order flow management practices of these participants.

BX notes that a similar functionality currently exists on NYSE Arca, Inc. (''NYSE Arca''), which NYSE Arca refers to as a ''Non-Display Remove Modifier.'' As set forth in NYSE Arca Rule 7.31, a Limit Non-Displayed Order may be

[3] The Exchange recently submitted a proposal to amend BX Rules 4702 and 4703 to change the way in which Post Only Orders interact with resting Non-Display orders and preventing the execution of midpoint pegged orders during a crossed market. *See* Securities Exchange Act 78909 (September 22, 2016), 81 FR 66708 (September 28, 2016) (SR–BX–2016–046).

designated with a Non-Display Remove Modifier. If so designated, a Limit Non-Displayed Order to buy (sell) will trade as the liquidity-taking order with an incoming Adding Liquidity Only Order (''ALO Order'') to sell (buy) that has a working price equal to the working price of the Limit Non-Displayed Order.[4] NYSE Arca also provides this functionality for other orders, such as Mid-Point Passive Liquidity Orders (''MPL Orders'') designated Day and MPL–ALO Orders [5] and Arca Only Orders.[6]

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by offering participants an additional functionality that will facilitate the execution of locked orders, thereby increasing the efficient functioning of the BX market. The Trade Now functionality is an optional feature that is being offered at no additional charge, and is designed to reflect both the objectives of the BX market, and the order flow management practices of various market participants. For these reasons, the Trade Now functionality will only be made available for orders that are entered in the BX book and that are not subject to other BX rules regarding the display and execution of those orders, *i.e.,* Retail Price Improving Orders and Retail Orders. Depending on the protocol, the Trade Now functionality will be offered as either the Reactive Trade Now or Non-Reactive Trade Now functionality.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. This is an optional functionality that is being offered at no charge, and which may be used equally by similarly-situated participants. Although the functionality of the Trade Now instruction will differ depending upon the protocol that is being used to access BX, BX believes that the difference in functionality reflects the different ways in which participants enter and manage their order flow.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6) thereunder.[9]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act [10] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii) [11] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that the Trade Now functionality is complementary to its recent proposal to change the way in which Post Only Orders interact with resting Non-Display orders.[12] The Exchange believes that releasing both complementary functionalities at the same time will be easier for market participants to manage and implement. The Exchange further believes that the Trade Now functionality will facilitate the execution of locked orders, thereby increasing the efficient functioning of the BX market, and that waiver of the operative delay will allow this functionality to be made available at an earlier date. Finally, the Exchange notes that NYSE Arca currently utilizes a similar functionality in the form of its Non-Display Remove Modifier. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission hereby waives the operative delay and designates the proposed rule change operative upon filing.[13]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BX–2016–059 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BX–2016–059. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule

[4] *See* NYSE Arca Rule 7.31(d)(2)(B).

[5] *See* NYSE Arca Rule 7.31(d)(3)(G).

[6] *See* NYSE Arca Rule 7.31(e)(1)(C). To the extent that the Trade-Now functionality will be made available for Price to Comply Orders, Price to Display Orders, Non-Displayed Orders, Post-Only Orders, and Market Maker Peg Orders, BX notes that the Trade-Now functionality will apply to different order types than the NYSE Arca Non-Display Remove Modifier functionality.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79288; File No. SR–NASDAQ–2016–152]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Transaction Fees at Chapter XV, Section 2 Entitled ''NASDAQ Options Market—Fees and Rebates''

November 10, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 1, 2016, The NASDAQ Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the transaction fees at Chapter XV, Section 2 entitled ''NASDAQ Options Market—Fees and Rebates,'' which governs pricing for Nasdaq Participants using the NASDAQ Options Market (''NOM''), Nasdaq's facility for executing and routing standardized equity and index options. The Exchange proposes to expand certain existing rebates related to the Market Access and Routing Subsidy or ''MARS,'' for NOM Participants that are eligible for MARS.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

NOM recently filed a proposal to its MARS subsidy program,[3] which pays a subsidy to NOM Participants that provide certain order routing functionalities to other NOM Participants and/or use such functionalities themselves.[4] Generally, under MARS, the Exchange pays participating NOM Participants to subsidize their costs of providing routing services to route orders to NOM. At this time, the Exchange proposes to amend two rebates at Chapter XV, Section 2(1) which pay NOM Participants an additional rebate provided the NOM Participant adds or removes liquidity on NOM as specified in more detail below. The Exchange believes that these incentives would continue to attract greater liquidity to NOM, to the benefit of all market participants.

Amendment to Note ''d''

Today, note ''d'' in Chapter XV, Section 2(1) provides that NOM Participants that qualify for MARS Payment Tiers 1, 2 or 3 will receive an additional $0.03 per contract Penny Pilot[5] Options Customer and/or Professional Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in that month, in addition to qualifying Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity Tiers 1–8. NOM Participants that qualify for a note ''c'' incentive[6] will receive the greater of the

[14] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] MARS is described in Chapter XV, Section 2(6). A NOM Participant must have System Eligibility to qualify for MARS. In order to be eligible the NOM Participant's routing system must qualify under the conditions specified in Chapter XV, Section 2(6), which were amended by SR–NASDAQ–2016–149. MARS Payments are made to NOM Participants that have System Eligibility and have routed the requisite number of Eligible Contracts daily in a month (''Average Daily Volume''), which were executed on NOM. For the purpose of qualifying for the MARS Payment, Eligible Contracts may include Firm, Non-NOM Market Maker, Broker-Dealer, or Joint Back Office or ''JBO'' equity option orders that add liquidity and are electronically delivered and executed. Eligible Contracts do not include Mini Option orders. The specified MARS Payment will be paid on all executed Eligible Contracts that add liquidity, which are routed to NOM through a participating NOM Participant's System and meet the requisite Eligible Contracts ADV. No payment will be made with respect to orders that are routed to NOM, but not executed.

[4] *See* SR–NASDAQ–2016–149 (not yet published).

[5] The Penny Pilot was established in March 2008 and was last extended in 2016. *See* Securities Exchange Act Release Nos. 57579 (March 28, 2008), 73 FR 18587 (April 4, 2008) (SR–NASDAQ–2008–026) (notice of filing and immediate effectiveness establishing Penny Pilot); and 78037 (June 10, 2016), 81 FR 39299 (June 16, 2016) (SR–NASDAQ–2016–052) (notice of filing and immediate effectiveness extending the Penny Pilot through December 31, 2016). All Penny Pilot Options listed on the Exchange can be found at *http://www.nasdaqtrader.com/MicroNews.aspx?id=OTA2016-15.*

[6] The note ''c'' incentive currently provides, ''Participants that: (1) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options of 1.15% or more of total industry customer equity and ETF option ADV contracts per day in a month will receive an additional $0.02 per contract Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in that month; or (2) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options of 1.30% or more of total industry customer equity and ETF option ADV contracts per day in a month will receive an additional $0.05 per contract Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in that month; or (3) (a) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options above 0.80% of total industry customer equity and ETF option ADV contracts per day in a

note ''c'' or note ''d'' incentive. The Exchange pays Customers [7] and Professionals [8] a Penny Pilot Options Rebate to Add Liquidity on an 8 tiered rebate schedule as described below:

*** The Customer and Professional Rebate to Add Liquidity in Penny Pilot Options will be paid as noted below. To determine the applicable percentage of total industry customer equity and ETF option average daily volume, unless otherwise stated, the Participant's Penny Pilot and Non-Penny Pilot Customer and/or Professional volume that adds liquidity will be included.

	Monthly volume	Rebate to add liquidity
Tier 1—	Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options of up to 0.10% of total industry customer equity and ETF option average daily volume (''ADV'') contracts per day in a month.	$0.20
Tier 2—	Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options above 0.10% to 0.20% of total industry customer equity and ETF option ADV contracts per day in a month.	0.25
Tier 3—	Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options above 0.20% to 0.30% of total industry customer equity and ETF option ADV contracts per day in a month.	0.42
Tier 4—	Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options above 0.30% to 0.40% of total industry customer equity and ETF option ADV contracts per day in a month.	0.43
Tier 5—	Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options above 0.40% to 0.75% of total industry customer equity and ETF option ADV contracts per day in a month.	0.45
Tier 6—	Participant has Total Volume of 100,000 or more contracts per day in a month, of which 25,000 or more contracts per day in a month must be Customer and/or Professional liquidity in Penny Pilot Options.	0.45
Tier 7—	Participant has Total Volume of 150,000 or more contracts per day in a month, of which 50,000 or more contracts per day in a month must be Customer and/or Professional liquidity in Penny Pilot Options.	0.47
Tier 8—	Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non-Penny Pilot Options above 0.75% or more of total industry customer equity and ETF option ADV contracts per day in a month, or Participant adds: (1) Customer and/or Professional liquidity in Penny Pilot Options and/or Non-Penny Pilot Options of 0.25% or more of total industry customer equity and ETF option ADV contracts per day in a month, and (2) has added liquidity in all securities through one or more of its Nasdaq Market Center MPIDs that represent 1.00% or more of Consolidated Volume in a month or qualifies for MARS (defined below).	0.48

The Exchange proposes to amend note ''d,'' to provide that NOM Participants that qualify for MARS Payment Tiers 1, 2, 3 or 4 will receive an additional $0.03 per contract in addition to any Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity Tiers they may qualify for in that month, unless the Participant qualifies for a higher note ''c'' rebate, in which case the Participants would receive the appropriate note ''c'' rebate they qualified for in that month. The Exchange recently amended its MARS Payment Tiers to add a new tier 4 rebate.[9] The MARS Payment tiers, which are effective, are as follows:

MARS Payment

NOM Participants that have System Eligibility and have executed the requisite number of Eligible Contracts in a month will be paid the following rebates:

Tiers	Average daily volume (''ADV'')	MARS Payment (penny)	MARS Payment (non-penny)
1	2,500	*$0.07	*$0.15
2	5,000	*0.09	*0.20
3	10,000	*0.11	*0.30
4	20,000	*0.15	*0.50

The Exchange proposes to amend note ''d'' in Chapter XV, Section 2(1) to allow all tiers in the MARS Payment to qualify a NOM Participant for the additional $0.03 per contract incentive provided the NOM Participant qualifies for one of

month, (b) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Non-Penny Pilot Options above 0.15% of total industry customer equity and ETF option ADV contracts per day in a month, and (c) execute greater than 0.04% of Consolidated Volume (''CV'') via Market-on-Close/Limit-on-Close (''MOC/LOC'') volume within the NASDAQ Stock Market Closing Cross within a month will receive an additional $0.05 per contract Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in a month. Consolidated Volume shall mean the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of an equity member's trading activity, expressed as a percentage of or ratio to Consolidated Volume, the date of the annual reconstitution of the Russell Investments Indexes shall be excluded from both total Consolidated Volume and the member's trading activity.''

[7] The term ''Customer'' or (''C'') applies to any transaction that is identified by a Participant for clearing in the Customer range at The Options Clearing Corporation which is not for the account of broker or dealer or for the account of a ''Professional.'' *See* Chapter XV.

[8] The term ''Professional'' or (''P'') means any person or entity that (i) is not a broker or dealer in securities, and (ii) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s) pursuant to Chapter I, Section 1(a)(48). All Professional orders shall be appropriately marked by Participants.

[9] SR–NASDAQ–2016–149 also bifurcated the MARS Payments to pay different rebates, per tier, for Penny and Non-Penny Pilot Options.

the Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity tiers. The Exchange believes that this proposal will continue to attract Penny Pilot and Non-Penny Pilot Options liquidity to NOM. All market participants benefit from the increased order interaction when more order flow is available on NOM.

Amendment to Note ''4''

Today, note ''4'' in Chapter XV, Section 2(1) provides that NOM Participants that qualify for MARS Payment Tiers 1, 2 or 3 will be assessed a Customer or Professional Penny Pilot Options Fee for Removing Liquidity of $0.48 per contract, excluding SPY.[10] Today, Customers and Professionals are assessed a $0.50 per contract Fee for Removing Liquidity in Penny Pilot Options. This incentive permits NOM Participants removing Customer and Professional Penny Pilot Options to lower their fee.

The Exchange proposes to amend note ''4,'' to provide that NOM Participants that qualify for MARS Payment Tiers 1, 2, 3 or 4 will be assessed a Customer or Professional Penny Pilot Options Fee for Removing Liquidity of $0.48 per contract, excluding SPY. As described above, the Exchange recently amended its MARS Payment Tiers to add a new tier 4 rebate.[11] The Exchange proposes to amend note ''4'' to permit all MARS Payment tiers to qualify a NOM Participant for this incentive. The Exchange believes this amendment will incentive NOM Participants to remove more liquidity in Penny Pilot Options.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[13] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among Participants and issuers and other persons using any facility or system which the Exchange operates or controls, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [14]

Likewise, in *NetCoalition* v. *Securities and Exchange Commission* [15] (''NetCoalition'') the D.C. Circuit upheld the Commission's use of a market-based approach in evaluating the fairness of market data fees against a challenge claiming that Congress mandated a cost-based approach.[16] As the court emphasized, the Commission ''intended in Regulation NMS that 'market forces, rather than regulatory requirements' play a role in determining the market data . . . to be made available to investors and at what cost.'' [17]

Further, ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers' . . . .'' [18] Although the court and the SEC were discussing the cash equities markets, the Exchange believes that these views apply with equal force to the options markets.

Amendment to Note ''d''

The Exchange's proposal to amend note ''d'' in Chapter XV, Section 2(1) to permit any MARS Payment tier to qualify a NOM Participant for an additional $0.03 per contract Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in that month, in addition to qualifying for Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity Tiers 1–8 [19] is reasonable for the reasons which follow. The amendment will encourage NOM Participants to qualify for both a MARS Payment tier and a Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity, thereby executing a greater amount of order flow on NOM to the benefit of all market participants who may interact with the order flow.

The Exchange's proposal to amend note ''d'' in Chapter XV, Section 2(1) to permit any MARS Payment tier to qualify a NOM Participant for an additional $0.03 per contract Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in that month, in addition to qualifying for Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity Tiers 1–8 [20] is equitable and not unfairly discriminatory for the reasons which follow. All NOM Participants are eligible to qualify for a MARS Payment, provided they have System Eligibility and all NOM Participants may be eligible for a Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity provided they execute qualifying volume. All NOM Participants would therefore be eligible to qualify for the note ''d'' incentive if they meet the requirements.

Amendment to Note''4''

The Exchange's proposal to amend note ''4'' in Chapter XV, Section 2(1) to permit NOM Participants to qualify for any MARS Payment tier and be assessed a Customer or Professional Penny Pilot Options, Fee for Removing Liquidity of $0.48 per contract, excluding SPY,[21] is reasonable because it will encourage NOM Participants to continue to remove Customer and Professional Penny Pilot Options liquidity to lower their fee.

The Exchange's proposal to amend note ''4'' in Chapter XV, Section 2(1) to permit NOM Participants to qualify for any MARS Payment tier and be assessed a Customer or Professional Penny Pilot Options, Fee for Removing Liquidity of $0.48 per contract, excluding SPY, is equitable and not unfairly discriminatory because all NOM Participants are eligible to qualify for a MARS Payment, provided they have System Eligibility. All NOM Participants would therefore be eligible to qualify for the note ''4'' incentive if they meet the requirements.

[10] A Customer or Professional that removes liquidity in SPY Options will be assessed a fee of $0.48 per contract.

[20] *Id.*

[21] A Customer or Professional that removes liquidity in SPY Options will be assessed a fee of $0.48 per contract.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In terms of inter-market competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited. In sum, if the changes proposed herein are unattractive to market participants, it is likely that the Exchange will lose market share as a result. Accordingly, the Exchange does not believe that the proposed changes will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

Amendment to Note ''d''

The Exchange's proposal to amend note ''d'' in Chapter XV, Section 2(1) to permit any MARS Payment tier to qualify a NOM Participant for an additional $0.03 per contract Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in that month, in addition to qualifying for Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity Tiers 1–8 [22] does not impose an undue burden on intra-market competition. All NOM Participants are eligible to qualify for a MARS Payment, provided they have System Eligibility and all NOM Participants may receive a Penny Pilot Options Customer and/or Professional Rebate to Add Liquidity provided they execute qualifying volume. All NOM Participants would therefore be eligible to qualify for the note ''d'' incentive if they meet the requirements.

Amendment to Note ''4''

The Exchange's proposal to amend note ''4'' in Chapter XV, Section 2(1) to permit NOM Participants to qualify for any MARS Payment tier and be assessed a Customer or Professional Penny Pilot Options, Fee for Removing Liquidity of $0.48 per contract, excluding SPY, does not impose an undue burden on intra-market competition because all NOM Participants are eligible to qualify for a MARS Payment, provided they have System Eligibility. All NOM Participants would therefore be eligible to qualify for the note ''4'' incentive if they meet the requirements.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[23]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2016–152 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2016–152. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*).

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR–NASDAQ–2016–152 and should be submitted on or before December 8, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[24]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79283; File No. SR–NYSEMKT–2016–99]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing of Proposed Rule Change Amending Rule 104—Equities To Delete Subsection (g)(i)(A)(III) Prohibiting Designated Market Makers From Establishing a New High (Low) Price on the Exchange in a Security the DMM Has a Long (Short) Position During the Last Ten Minutes Prior to the Close of Trading

November 10, 2016.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on October 27, 2016, NYSE MKT LLC (''Exchange'' or ''NYSE MKT'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 104—Equities to delete subsection (g)(i)(A)(III) prohibiting Designated Market Makers (''DMM'') from establishing a new high (low) price on the Exchange in a security the DMM has a long (short) position during the last ten minutes prior to the close of trading. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 104—Equities (''Rule 104'') to delete subsection (g)(i)(A)(III), which prohibits DMMs with a long (short) position in a security from making a purchase (sale) in such security during the last ten minutes prior to the close of trading that results in a new high (low) price on the Exchange in that security for that day.

Background

Rule 104 sets forth the obligations of Exchange DMMs. Under Rule 104(a), DMMs registered in one or more securities traded on the Exchange are required to engage in a course of dealings for their own account to assist in the maintenance of a fair and orderly market insofar as reasonably practicable. Rule 104(a) also enumerates the specific responsibilities and duties of a DMM, including: (1) Maintenance of a continuous two–sided quote, which mandates that each DMM maintain a bid or an offer at the National Best Bid (''NBB'') and National Best Offer (''NBO,'' together the ''NBBO'') for a certain percentage of the trading day,[4] and (2) the facilitation of, among other things, openings, re-openings, and the close of trading for the DMM's assigned securities, all of which may include supplying liquidity as needed.[5] Rule 104(f) imposes an affirmative obligation on DMMs to maintain, insofar as reasonably practicable, a fair and orderly market on the Exchange in assigned securities, including maintaining price continuity with reasonable depth and trading for the DMM's own account when lack of price continuity, lack of depth, or disparity between supply and demand exists or is reasonably to be anticipated.

Rule 104(g) governs transactions by DMMs. NYSE Rule 104(g) provides that transactions on the Exchange by a DMM for the DMM's account must be effected in a reasonable and orderly manner in relation to the condition of the general market and the market in the particular stock. Rule 104(g) describes certain permitted transactions, including neutral transactions and Non-Conditional Transactions, as defined therein. Rule 104(g)(i)(A)(III) provides that, except as otherwise permitted by Rule 104, during the last ten minutes prior to the close of trading, a DMM with a long or short position in a security is prohibited from making a purchase or sale in such security that results in a new high or low price, respectively, on the Exchange for the day at the time of the DMM's transaction (''Prohibited Transactions''). Finally, Rule 104(h) addresses DMM transactions in securities that establish or increase the DMM's position. Rule 104(h)(ii) permits certain ''Conditional Transactions'' [6] without restriction as to price if they are followed by appropriate re-entry on the opposite side of the market commensurate with the size of the DMM's transaction.[7] This requirement assures that if a DMM establishes or increases a long position by buying from the Exchange best offer, which would likely be the new high price, or establishes or increases a short position by selling to the Exchange best bid, which would likely be the new low price, such transaction would be followed by the DMM quoting on the opposite side of the last transaction in order to dampen the impact of that transaction on the market.

Proposed Rule Change

The Exchange proposes to delete subsection (g)(i)(A)(III) of Rule 104.[8] As discussed below, in today's electronic

[1] 15 U.S.C.78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* Rule 104(a)(1).

[5] *See id.* at (2)–(3). Rule 104(e) further provides that DMM units must provide contra-side liquidity as needed for the execution of odd-lot quantities eligible to be executed as part of the opening, reopening, and closing transactions but that remain unpaired after the DMM has paired all other eligible round lot sized interest.

[6] Rule 104(h)(i) defines a Conditional Transaction as a DMM transaction in a security that establishes or increases a position and reaches across the market to trade as the contra-side to the Exchange published bid or offer. A DMM reaches across the market when the DMM buys from the Exchange offer or sells to the Exchange bid.

[7] The Exchange's re-entry obligations for Conditional Transactions are set forth in Rule 104(h)(iii). However, Rule 104(h)(iv) permits certain other Conditional Transactions without restriction as to price, and Rule 104(i) provides that re-entry obligations following such Conditional Transactions would be the same as the re-entry obligations for Non-Conditional Transactions pursuant to Rule 104(g).

[8] The principles embodied in Rule 104 are based on New York Stock Exchange LLC (''NYSE'') Rule 104. On October 1, 2008, the Commission approved the Exchange's rule proposal to establish new membership, member firm conduct, and equity trading rules that were based on the existing NYSE rules to reflect that equities trading on the Exchange would be supported by the NYSE's trading system. See Securities Exchange Act Release Nos. 58705 (Oct. 1, 2008), 73 FR 58995 (Oct. 8. 2008) (SR–Amex–2008–63) (approval order) and 59022 (Nov. 26, 2008), 73 FR 73683 (Dec. 3, 2008) (SR–NYSEALTR–2008–10) (amending equity rules to conform to NYSE New Market Model Pilot rules) (''Release No. 59022''). Because the Exchange's rules are based on existing NYSE rules, the Exchange believes that pre-October 1, 2008 NYSE rule filings provide relevant guidance concerning Exchange equity rules.

marketplace where specialists have become DMMs and control of pricing decisions has moved away from market participants on the Exchange trading Floor,[9] retaining a prohibition designed to prevent specialists from setting a price in the final ten minutes of trading in a security in which the specialist had a position is no longer necessary. Eliminating the prohibition would not weaken existing safeguards against DMMs inappropriately influencing or manipulating the close because existing DMM obligations, including the obligation not to destabilize the market when buying or selling to increase a position or reaching across the market, would govern DMM trading during the final ten minutes of trading. Specifically, to the extent a Prohibited Transaction is also a Conditional Transaction, with the elimination of Prohibited Transactions, the obligation to re-enter the market following a Conditional Transaction, which is designed to ensure that DMMs do not inappropriately influence or manipulate the close, would become applicable in the last ten minutes of trading for such transactions,[10] thereby achieving the same goal without an outright prohibition.

In 2006, the Commission approved the NYSE's ''hybrid market'' under which Exchange systems assumed the function of matching and executing electronically-entered orders, but specialists remained the responsible broker-dealer for orders on the Exchange's limit order book.[11] Rule 104(g)(III), adopted at the same time, was intended to prevent NYSE specialists from setting the closing price.[12] However, specialists were permitted to effect transactions during the last ten minutes of trading that resulted in a new high or low for the day in order to match another market's better bid or offer or to bring the price of the security into parity with an underlying or related security or asset.[13] This exception was considered appropriate because in those situations an independent party and not the specialist had set the price.[14]

With the increasing automation of trading and the accompanying decentralization of pricing decisions away from specialists, in 2008, the NYSE and the Exchange proposed and the Commission approved its New Market Model, which transformed specialists into DMMs, who are no longer agents for the Exchange's limit order book and whose trading activity on the Exchange is limited to proprietary trading.[15] Nevertheless, the Exchange retained the obligations set forth in Rule 104(g) and (h), even though Regulation NMS was implemented prior to the Exchange proposing the New Market Model.

In light of these developments, Rule 104(g)(i)(A)(III) has lost its original purpose and utility. The rationale behind preventing specialists from setting the price of a security on the Exchange in the final ten minutes of trading was to prevent specialists from inappropriately influencing the price of a security at the close to advantage a specialist's proprietary position.[16] In today's fragmented marketplace, a new high or low price for a security on the Exchange in the last ten minutes of trading does not have a significant effect on the market price for such security. For example, a new high or low price on the Exchange may not be the new high or low for a security because prices may be higher or lower in away markets, where the majority of intra-day trading in NYSEMKT-listed securities takes place. Indeed, any advantage to a DMM by establishing a new high or low on the Exchange during the last ten minutes can rapidly evaporate following trades in away markets, which happen very quickly and over which the DMM has no control. In short, since DMMs do not have the ability to direct or influence trading or control intra-day prices as specialists had before the implementation of Regulation NMS, Prohibited Transactions are anachronistic.

Moreover, although Prohibited Transactions would be eliminated, DMMs would still have the obligation under Rule 104 to ensure that they do not destabilize the market when they are buying or selling to increase a position or reaching across the market during the final ten minutes of trading.

As noted, DMMs have affirmative obligations under Rule 104(a) to engage in a course of dealings for their own account to assist in the maintenance of a fair and orderly market insofar as reasonably practicable. Specifically, Rule 104(f)(ii) sets forth the DMM's obligation to act as reasonably necessary to ensure appropriate depth and maintain reasonable price variations between transactions (also known as price continuity) and prevent unexpected variations in trading. Further, under Rule 123D(a), openings and reopenings must be fair and orderly, reflecting the DMM's professional assessment of market conditions at the time, and appropriate consideration of the balance of supply and demand as reflected by orders represented in the market. The Exchange supplies DMMs with suggested Depth Guidelines for each security in which a DMM is registered, and DMMs are expected to quote and trade with reference to the Depth Guidelines.[17]

Further, the DMM's affirmative obligation includes obligations to re-enter the market when reaching across to execute against available interest. Under Rule 104(h), DMMs that engage in Conditional Transactions must follow up with appropriate re-entry on the opposite side of the market commensurate with the size of the DMM's transaction.[18] The Exchange issues guidelines, called price participation points (''PPP''), that identify the price at or before which a DMM is expected to re-enter the market after effecting a conditional transaction.[19] Currently, a Conditional Transaction that is also a Prohibited Transaction would not be permitted in the last ten minutes of trading. With the proposed deletion of Rule 104(g)(i)(A)(III), what is currently defined as a Prohibited Transaction would be permitted, however, such transactions would be subject to re-entry obligations associated with Conditional Transactions. As such, in lieu of Rule 104(g)(i)(A)(III), in the last ten minutes of trading, DMMs would instead be subject to affirmative obligations specified under Rule 104(h).

Finally, DMM pricing decisions at the close would remain subject to specific DMM obligations with respect to the quality of the markets in securities to which they are assigned. In general, as noted above, transactions on the

[9] *See, e.g.,* Securities Exchange Act Release No. 56209 (August 6, 2007), 72 FR 45290, 45291 (August 13, 2007) (SR–NYSE–2007–65) (noting in connection with the NYSE trading Floor that changes in the marketplace have included, among other things, ''the decentralization of control of pricing decisions away from the specialist and Floor broker'').

[10] Currently, Conditional Transactions by DMMs during the last ten minutes of trading that establish a new high or low price on the Exchange are prohibited under Rule 104 (g)(i)(A)(III).

[11] *See* Securities Exchange Act Release No. 53539 (March 22, 2006), 71 FR 16353 (March 31, 2006) (SR–NYSE–2004–05).

[19] *See* NYSE Rule 104(h)(iii)(A).

Exchange by a DMM for the DMM's account must be effected in a reasonable and orderly manner in relation to the condition of the general market and the market in the particular stock, and DMMs must refrain from causing or exacerbating excessive price movements.

DMM trading activity on the Exchange is actively surveiled for compliance with each of these obligations. The Exchange currently employs a suite of surveillances for trading by DMMs and other market participants in and around the close of trading. The Exchange believes that the existing DMM obligations and the Exchange's regulatory program for reviewing DMM trading provides an appropriate framework in today's market structure for ensuring that DMMs are not establishing a price to benefit their own account.

For all of the foregoing reasons, the Exchange believes that retaining Prohibited Transactions is no longer necessary.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[20] in general, and furthers the objectives of Section 6(b)(5) of the Act,[21] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and protect investors and the public interest.

In particular, the Exchange believes that eliminating Rule 104(g)(III) would remove impediments to and perfect the mechanism of a free and open market and a national market system by permitting DMMs to enter trades in the last ten minutes of trading that establish a new high or low in a security even though the DMM has a position in that security. As proprietary traders without the ability to direct or influence trading or control the quote, restricting DMM trading in the final ten minutes of trading is no longer necessary.

The Exchange believes that eliminating Prohibited Transactions would not be inconsistent with the public interest and the protection of investors because DMM trading decisions going into the closing trade would continue to be evaluated from the perspective of their obligations to the marketplace, including the obligation to arrange a fair and orderly close, as set forth in Exchange rules. Further, the Exchange believes that eliminating Rule 104(g)(i)(A)(III) would not be inconsistent with the public interest and the protection of investors because existing safeguards would remain in place to ensure that DMMs do not inappropriately influence or manipulate the close, thereby establishing substantially the same result without an outright prohibition. As noted above, DMM trading would remain subject to Exchange rules, including the obligation to maintain a fair and orderly market under Rule 104. More specifically, in lieu of the obligations associated with Rule 104(g)(i)(A)(III), in the last ten minutes of trading the DMMs would be subject to the reentry obligations associated with Conditional Transactions. Accordingly, during that period, DMMs would have an obligation to reenter the market if their trading both reaches across the market and increases or establishes a position.

For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues but rather to eliminate redundant approvals of manual trades on its trading Floor.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEMKT–2016–99 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEMKT–2016–99. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions.

You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEMKT–2016–99 and should be submitted on or before December 8, 2016.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79285; File No. SR–FINRA–2016–030]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Order Approving Proposed Rule Change To Amend Rule 12504 of the Code of Arbitration Procedure for Customer Disputes and Rule 13504 of the Code of Arbitration Procedure for Industry Disputes Relating to Motions To Dismiss in Arbitration

November 10, 2016.

I. Introduction

On August 3, 2016, Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend Rules 12504 of the Code of Arbitration Procedure for Customer Disputes (''Customer Code'') and Rule 13504 of the Code of Arbitration Procedure for Industry Disputes (''Industry Code'' and, together with the Customer Code, ''Codes'').[3] The proposed rule change would allow arbitrators to act upon a motion to dismiss a party or claim prior to the conclusion of a party's case in chief if the arbitrators determine that the non-moving party previously brought a claim regarding the same dispute against the same party, and the dispute was fully and finally adjudicated on the merits and memorialized in an order, judgment, award, or decision.

The proposed rule change was published for comment in the **Federal Register** on August 17, 2016.[4] The public comment period closed on September 7, 2016. The Commission received four (4) comment letters on the proposed amendments.[5] On September 19, 2016, FINRA extended the time period in which the Commission must approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change to November 15, 2016.[6] On October 31, 2016, FINRA responded to the comment letters received in response to the Notice.[7] This order approves the proposed rule change.

II. Description of the Proposed Rule Change[8]

Background

In 2009, FINRA amended the Codes to adopt FINRA Rules 12504 and 13504 (Motions to Dismiss), and to amend FINRA Rules 12206 and 13206 (Time Limits), to establish procedures limiting motions to dismiss in arbitration.[9] A motion to dismiss is a request made to the arbitrators to remove a party or some or all claims raised by a party filing a claim. If the arbitrators grant a motion to dismiss before a hearing is held (a prehearing motion), the party bringing the claim loses the opportunity to have his or her arbitration case heard in whole or in part by the arbitrators. The procedures set forth in the Codes significantly limit the use of motions to dismiss because FINRA believed that respondents were filing prehearing motions routinely and repetitively in an effort to delay scheduled hearing sessions on the merits, increase investors' costs, and intimidate less sophisticated investors.

Among other requirements, the Codes require parties to file prehearing motions to dismiss in writing, separately from the answer, and only after they file the answer.[10] The full panel of arbitrators must decide a motion to dismiss,[11] and the panel must hold a hearing on the motion unless the parties waive the hearing.[12] If a panel grants a motion to dismiss, the decision must be unanimous, and must be accompanied by a written explanation.[13]

Under the Codes, arbitrators cannot act upon a motion prior to the conclusion of the non-moving party's case in chief unless the arbitrators determine that: (1) The non-moving party previously released the claim in dispute by a signed settlement or written release,[14] (2) the moving party was not associated with the account, security, or conduct at issue,[15] or (3) a claim is not eligible for arbitration because it does not meet the six-year time limit for submitting a claim.[16]

Furthermore, the Codes impose sanctions against parties for engaging in abusive practices. For instance, if the arbitrators deny a motion to dismiss prior to the conclusion of the non-moving party's case in chief, the arbitrators must assess forum fees associated with hearing the motion against the moving party.[17] Moreover, if they find the motion to be frivolous, they must award reasonable costs and attorneys' fees to a party that opposed the motion.[18] In addition, the arbitrators may issue sanctions under the Codes if they determine that a party filed a motion under the rule in bad faith.[19]

Proposed Rule Change

FINRA is proposing to amend the Codes to add an additional ground for

[19] *See* FINRA Rules 12504(a)(11) and 13504(a)(11); *see also* FINRA Rules 12212 and 13212 (Sanctions) relating to available sanctions.

arbitrators to act on motions to dismiss prior to the conclusion of the claimant's case in chief in both customer and industry cases. Currently, FINRA's Director of Arbitration (''Director'') can deny use of the forum for customer and industry claims if it is clear that a party is bringing exactly the same claims against the same parties that were already heard at the forum.[20] FINRA states, however, that if there are questions about whether the matter concerns a different claim, the Director is likely to deny the motion and allow the arbitration to proceed so that the arbitrators can decide the merits of the parties' assertions. FINRA believes that adding the additional ground for arbitrators to act on motions to dismiss is appropriate because parties should not be subject to the legal fees associated with arbitrating claims that have been fully adjudicated in a prior proceeding. FINRA also believes that the proposed rule change would deter parties' use of repeated filings as a means of leverage during settlement negotiations.

Specifically, FINRA is proposing to amend FINRA Rules 12504(a)(6) and 13504(a)(6) to add new paragraph (C) which would specify that arbitrators can also act upon a motion to dismiss a party or claim if they determine that the non-moving party previously brought a claim regarding the same dispute [21] against the same party that was fully and finally adjudicated on the merits and memorialized in an order, judgment, award, or decision. For example, FINRA states that the proposed rule change would allow the arbitrators to grant a motion to dismiss relating to a particular controversy if they believe the matter was adjudicated fully even in instances where a claimant adds a new cause of action, or adds additional facts.

III. Summary of Comments and FINRA's Response

As noted above, the Commission received four (4) comment letters on the proposed rule change,[22] and a response letter from FINRA.[23] As discussed in more detail below, two commenters supported the proposal,[24] one generally supported the proposal but recommended modifications,[25] and one opposed the proposal.[26]

Of the two commenters who supported the proposal, one commenter stated that the proposed amendments ''would be a fair, equitable and reasonable approach and should be approved by the SEC on an expedited basis.'' [27] The other commenter stated that the proposal would ''appropriately enhance the arbitration process by eliminating claims that have already been heard and decided on the merits in another forum'' and would consequently ''promote both the integrity and fairness of arbitration proceedings.'' [28]

Scope of the Proposal

A third commenter generally supported the proposal, stating that ''a current ground for dismissal under the present rule, that 'the non-moving party previously released the claim(s) in dispute by a signed settlement agreement and/or written release,' and the proposed additional language are in line with the same reasoning: that a final, enforceable resolution has already been reached.'' [29] This commenter suggested, however, that FINRA should continue to discourage motions to dismiss prior to the conclusion of a party's case in chief. Accordingly, the commenter recommended that FINRA should: (1) Clarify that the proposal should be narrowly construed such that it applies to ''adjudications on the merits where the non-moving parties have had a full and fair opportunity to argue their claims;'' (2) narrowly define the term ''same party'' to mean ''the specific party named in the previous arbitration;'' [30] and (3) stress ''the importance of continuing to permit the non-moving party to have a full opportunity to oppose such motion to dismiss, and to present evidence and testimony to the arbitrators on the merits of the motion prior to their decision.'' [31]

In its response, FINRA stated that it drafted the proposed amendments narrowly, in continued adherence ''to the principle that motions to dismiss a claim prior to the conclusion of a party's case in chief are discouraged in arbitration.'' FINRA stated that it would not reject a claim initiated against a related, but previously unnamed party, and that it would be a moving party's responsibility to demonstrate to the arbitrators that such a party is the ''same party'' for purposes of the proposed rule change. FINRA also expressed its intention to train its arbitrators on the rule change, emphasizing that the moving party must demonstrate that the non-moving party brought the same dispute against the same party and that the non-moving party had a full opportunity to present its claims in the earlier proceeding.[32]

Summary Judgment

One supportive commenter noted that the Codes do not permit a claimant to file a motion for summary judgment, and suggested that this ''disparity'' be corrected ''so that the playing field in the securities arbitration arena is level and equal for all of the participants in the forum.'' [33]

In its response, FINRA stated that it limited the grounds on which motions to dismiss could be filed based on the belief that some respondents were filing prehearing motions ''routinely and repetitively in an effort to delay scheduled hearing sessions on the merits, increase investors' costs, and intimidate less sophisticated investors.'' FINRA asserted that the rules were ''designed to deter the inappropriate use of dispositive motions, not to provide respondents with a new vehicle to seek early dismissal of a claimant's claims.'' Accordingly, FINRA declined to amend the Codes to permit parties to bring motions for summary judgment, as it believes that such an amendment would conflict with its goal of limiting dispositive motions that curtail the opportunity for parties to fully present their cases.[34]

Demonstrated Need for the Proposal

One commenter opposed the proposed rule change, stating that FINRA has not demonstrated a need to broaden the scope of the rule, and that ''FINRA has not provided any statistical evidence as to the frequency of repeat claims being brought under circumstances that the Proposed Rule Change would remedy.'' [35] In addition, the commenter asserted that courts already provide remedies for the alleged

[20] *See* FINRA Rules 12203 and 13303 (Denial of the Forum), which provide that the Director may decline to permit the use of the FINRA arbitration forum if the Director determines that, given the purposes of FINRA and the intent of the Codes, the subject matter of the dispute is inappropriate. FINRA states that the Director rarely invokes this authority.

[21] FINRA Rules 12100 and 13100 provide that ''dispute'' means a dispute, claim or controversy, and that it may consist of one or more claims.

problem of repeat filing of claims by enjoining or staying the arbitration proceedings and FINRA has failed to demonstrate that the court remedy is less effective and fair to all parties.[36]

In its response, FINRA asserted that it had demonstrated a need for the proposed rule change. According to FINRA, statistics suggest that the proposed rule change would impact a small number of cases.[37] However, FINRA believes that the proposed rule change would reduce both parties' costs where these motions are granted at an earlier stage in the proceeding, and that the rule change would nevertheless allow the non-moving party to present evidence and testimony to the arbitrators concerning the merits of the motion prior to the decision on the motion—thus limiting the risk that arbitrators might act on incomplete or insufficient information. FINRA therefore believes that the benefit of the cost savings to the impacted parties outweighs the commenter's concern regarding the demonstrated need for the proposal.

With regard to the same commenter's suggestion that parties use the courts to address the issue of repeat filings, FINRA stated that parties ''would be better served by having issues relating to the earlier adjudication of a dispute resolved in the forum where the claimant chose to initiate the arbitration proceeding.'' According to FINRA, ''[t]he moving party should not have to seek a remedy in a separate court proceeding, and the non-moving party should not be subject to additional litigation costs outside of the arbitration forum.'' FINRA stated that ''this is especially important for *pro se* investors,'' who might be unable to argue the law in court without counsel. Accordingly, FINRA believes that ''forcing [*pro se* investors] into a court proceeding might preclude them from pursuing their claims.'' [38]

IV. Discussion and Commission Findings

The Commission has carefully considered the proposal, the comments received, and FINRA's response to the comments. Based on its review of the record, the Commission finds that the proposed rule change is consistent with the requirements of the Exchange Act and the rules and regulations thereunder applicable to a national securities association.[39] In particular, the Commission finds that the proposed rule change is consistent with Section 15A(b)(6) of the Exchange Act,[40] which requires, among other things, that FINRA's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

As discussed above, the proposal would amend Rules 12504(a)(6) and 13504(a)(6) to add new paragraph (C), allowing arbitrators to also act upon a motion to dismiss a party or claim if they determine that the non-moving party previously brought a claim regarding the same dispute against the same party that was fully and finally adjudicated on the merits and memorialized in an order, judgment, award, or decision. The proposed rule change would allow the arbitrators to grant a motion to dismiss relating to a particular controversy if they believe the matter was adjudicated fully even in instances where a claimant adds a new cause of action, or adds additional facts.

The Commission has considered the four (4) comment letters received on the proposed rule change,[41] along with FINRA's response to the comments.[42] The Commission acknowledges commenters' beliefs that the proposed rule change ''would be a fair, equitable and reasonable approach,'' [43] that it would promote the ''integrity and fairness of arbitration proceedings'' by ''eliminating claims that have already been heard and decided on the merits in another forum,'' [44] and that the proposal was in line with the reasoning of the current rule—''that a final, enforceable resolution has already been reached.'' [45] However, the Commission also recognizes commenters' concerns and opposition to the proposal.[46]

Scope of the Proposal

The Commission agrees with a commenter's concern that the proposed rule change should be applied narrowly, where a claim has previously been adjudicated on the merits against the same party, and the non-moving party has had a full and fair opportunity to argue their claims in opposition to the motion to dismiss.[47] However, the Commission believes that FINRA has drafted the proposed rule change narrowly, so as to discourage the filing of motions to dismiss except in these limited circumstances. The Commission also recognizes FINRA's stated effort to help ensure that claims initiated against related, but previously unnamed parties will not be rejected, as well as its stated effort to train arbitrators on the rule change. The Commission believes that FINRA's response should address the commenter's concerns.[48]

Summary Judgment

The Commission also recognizes a commenter's suggestion that the FINRA Codes should permit parties to file motions for summary judgment.[49] The Commission preliminarily believes that such an amendment would conflict with FINRA's goal of limiting dispositive motions that curtail the opportunity for parties to fully present their cases.[50] The Commission therefore supports FINRA's decision not to expand the scope of the rule change to permit motions for summary judgment.

Demonstrated Need for the Proposal

The Commission further recognizes a commenter's assertion that FINRA has not demonstrated a need for the rule change.[51] However, although few cases might be impacted by the rule change, according to FINRA, the Commission agrees with FINRA's belief that, if implemented properly, the rule change can benefit those parties by reducing their arbitration costs while still allowing the non-moving party to present evidence and testimony concerning the merits of the motion.[52]

With regard to the same commenter's suggestion that parties use the courts to address the issue of repeat filings,[53] the Commission generally supports FINRA's view that the parties should not be required to file a separate court proceeding to seek dismissal of repeat filings, and that such matters would be better resolved in the original arbitration forum.[54]

To note, the Commission additionally recognizes that the FINRA Dispute Resolution Task Force (''Task Force'') reviewed the topic of motions to dismiss and recommended that FINRA amend the motions to dismiss rule in customer cases to include one additional category

[36] *See id.*

[37] *See* SR–FINRA–2016–030 at page 9. FINRA staff provided the Task Force with statistics for 2013 and 2014.

[38] *See* FINRA Letter.

[39] In approving the proposed rule change, the Commission has also considered its impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[40] 15 U.S.C. 78o–3(b)(6).

[41] *See supra* note 5.

[42] *See supra* note 7.

[43] *See* Caruso Letter.

[44] *See* FSI Letter.

[45] *See* PIABA Letter.

for which motions to dismiss may be made before the conclusion of the case in chief—situations where the dispute was previously concluded through adjudication or arbitration and memorialized in an order, judgment, award, or decision.[55] This amendment is consistent with the Task Force's recommendation.

Taking into consideration the comments and FINRA's responses, the Commission believes that the proposal is consistent with the Exchange Act. The Commission believes that the proposal will help protect investors and the public interest by, among other things, providing an additional ground for arbitrators to act on motions to dismiss prior to the conclusion of the claimant's case in chief in both customer and industry cases, while preserving the ability of a non-moving party to present evidence and testimony to the arbitrators concerning the merits of the motion. In addition, the Commission believes that the reasoning for the proposed new ground for dismissal is consistent with the reasoning for an existing ground for dismissal—that ''the non-moving party previously released the claim(s) in dispute by a signed settlement agreement and/or written release.'' [56] Furthermore, the Commission believes that FINRA's responses, as discussed in more detail above, appropriately addressed commenters' concerns and adequately explained FINRA's reasons for declining to modify its proposal. Accordingly, the Commission believes that the approach proposed by FINRA is appropriate and designed to protect investors and the public interest, consistent with Section 15A(b)(6) of the Exchange Act and the rules and regulations thereunder.

[55] In July 2014, FINRA formed the Task Force to ''suggest strategies to enhance the transparency, impartiality, and efficiency of FINRA's securities dispute resolution forum for all participants.'' *See* FINRA News Release, *FINRA Announces Arbitration Task Force,* dated July 17, 2014, available at *http://www.finra.org/newsroom/2014/finra-announces-arbitration-task-force; see also* Notice, 81 FR at 54889.

The Task Force ultimately found that FINRA Rules 12504 and 13504 appeared to be working as intended to prevent the filing of frivolous motions to dismiss, but recommended that, in instances where arbitrations involve claims previously adjudicated by a court or arbitrated by an arbitration panel, respondents should be able to seek early dismissal. *See* FINRA Dispute Resolution Task Force, *Final Report and Recommendations of the FINRA Dispute Resolution Task Force,* dated December 16, 2015, available at *http://www.finra.org/sites/default/files/Final-DR-task-force-report.pdf; see also* Notice, 81 FR at 54889.

[56] *See* FINRA Rule 12504(a)(6)(A); FINRA Rule 13504(a)(6)(A).

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Exchange Act,[57] that the proposed rule change (SR–FINRA–2016–030) be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[58]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79287; File No. SR–NYSEMKT–2016–100]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing and Immediate Effectiveness of Proposed Change Adopting a Decommission Extension Fee for Receipt of the NYSE MKT Order Imbalances Market Data Product

November 10, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 28, 2016, NYSE MKT LLC (''NYSE MKT'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt a Decommission Extension Fee for receipt of the NYSE MKT Order Imbalances market data product. The proposed change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to adopt a Decommission Extension Fee for receipt of the NYSE MKT Order Imbalances market data product,[3] as set forth on the NYSE MKT Proprietary Market Data Fee Schedule (''Fee Schedule''). Recipients of NYSE MKT Order Imbalances would continue to be subject to the already existing subscription fees currently set forth in the Fee Schedule. The proposed Decommission Extension Fee would apply only to those subscribers who decide to continue to receive the NYSE MKT Order Imbalances feed in its legacy format for up to two months after which the feed will be distributed exclusively in the new format explained below.

NYSE MKT Order Imbalances is an NYSE MKT-only market data feed of real-time order imbalances that accumulate prior to the opening of trading on the Exchange and prior to the close of trading on the Exchange. The Exchange distributes information about these imbalances in real-time at specified intervals prior to the opening and closing auction each day.[4]

As part of the Exchange's efforts to regularly upgrade systems to support more modern data distribution formats and protocols as technology evolves, beginning October 31, 2016, NYSE MKT Order Imbalances will be transmitted in a new format, Exchange Data Protocol

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release Nos. 59743 (April 9, 2009), 74 FR 17699 (April 16, 2009) (SR–NYSEAmex–2009–11—Notice of Filing and Immediate Effectiveness of Proposed Rule Change Making Available an NYSE Amex Order Imbalance Information Datafeed); and 60385 (July 24, 2009), 74 FR 38249 (July 31, 2009) (SR–NYSEAmex–2009–26—Order Approving Proposed Rule Change to Charge a $500 Monthly Fee to Recipients of the NYSE Amex Order Imbalance Information Datafeed). *See also* Securities Exchange Act Release Nos. 72020 (September 9, 2014), 79 FR 55040 (September 15, 2014) (SR–NYSEMKT–2014–72) (establishing fees for non-display use of NYSE MKT Order Imbalances); and 76911 (January 14, 2016), 81 FR 3496 (January 21, 2016) (SR–NYSEMKT–2016–05) (amending fees for NYSE MKT Order Imbalances).

[4] *See* Rules 15—Equities (Pre-Opening Indications and Opening Order Imbalance Information) and 123C—Equities (The Closing Procedures).

(XDP). Beginning October 31, 2016, the Exchange will transmit NYSE MKT Order Imbalances in both the legacy format and in XDP format without any additional fee being charged for providing this data feed in both formats. The dual dissemination will remain in place until February 28, 2017, the planned decommission date of the legacy format. Beginning March 1, 2017, recipients of NYSE MKT Order Imbalances who wish to continue to receive NYSE MKT Order Imbalances in the legacy format will be subject to the proposed Decommission Extension Fee of $5,000 per month.[5] During the extension period, recipients of NYSE MKT Order Imbalances would continue to be subject to the subscription fees currently noted in the Fee Schedule. The extension period for receiving this data feed in the legacy format will expire on April 28, 2017, on which date distribution of NYSE MKT Order Imbalances in the legacy format will be permanently discontinued.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,[6] in general, and Sections 6(b)(4) and 6(b)(5) of the Act,[7] in particular, in that it provides an equitable allocation of reasonable fees among users and recipients of the data and is not designed to permit unfair discrimination among customers, issuers, and brokers.

The Exchange believes that adopting an extension fee for subscribers of NYSE MKT Order Imbalances who wish to receive this data feed in the legacy format for a period of time beyond the built-in overlap period is reasonable, equitable and not unfairly discriminatory because the proposed fee would apply equally to all data recipients that currently subscribe to NYSE MKT Order Imbalances. The Exchange believes that it is reasonable to require data recipients to pay an additional fee for taking the data feed in the legacy format beyond the period of time specifically allotted by the Exchange for data feed customers to adapt to the new XDP format at no extra cost. To that end, the extension fee is designed to encourage data recipients to migrate to the XDP format in order to continue to receive NYSE MKT Order Imbalances in XDP as the legacy format would no longer be available after that date. The Exchange does not intend to support the legacy format at all after April 28, 2017.

The Exchange notes that NYSE MKT Order Imbalances is entirely optional. The Exchange is not required to make NYSE MKT Order Imbalances available or to offer any specific pricing alternatives to any customers, nor is any firm required to purchase NYSE MKT Order Imbalances, nor is the Exchange required to offer any feed (NYSE MKT Order Imbalances, or otherwise) in a particular format, and it is a benefit to the markets generally that NYSE MKT update its distribution technology to make it more efficient (and at the same time eliminate less efficient forms of dissemination). Firms that do purchase NYSE MKT Order Imbalances do so for the primary goals of using them to increase revenues, reduce expenses, and in some instances compete directly with the Exchange (including for order flow); those firms are able to determine for themselves whether NYSE MKT Order Imbalances or any other similar products are attractively priced or not.[8]

The decision of the United States Court of Appeals for the District of Columbia Circuit in *NetCoalition* v. *SEC,* 615 F.3d 525 (D.C. Cir. 2010), upheld reliance by the Securities and Exchange Commission (''Commission'') upon the existence of competitive market mechanisms to set reasonable and equitably allocated fees for proprietary market data:

> In fact, the legislative history indicates that the Congress intended that the market system 'evolve through the interplay of competitive forces as unnecessary regulatory restrictions are removed' and that the SEC wield its regulatory power 'in those situations where competition may not be sufficient,' such as in the creation of a 'consolidated transactional reporting system.'

Id. at 535 (quoting H.R. Rep. No. 94–229 at 92 (1975), *as reprinted in* 1975 U.S.C.C.A.N. 323). The court agreed with the Commission's conclusion that ''Congress intended that 'competitive forces should dictate the services and practices that constitute the U.S. national market system for trading equity securities.' '' [9]

As explained below in the Exchange's Statement on Burden on Competition, the Exchange believes that there is substantial evidence of competition in the marketplace for proprietary market data and that the Commission can rely upon such evidence in concluding that the fees established in this filing are the product of competition and therefore satisfy the relevant statutory standards. In addition, the existence of alternatives to the legacy format, such as converting to XDP as soon as possible, further ensures that the Exchange cannot set unreasonable fees, or fees that are unreasonably discriminatory, when vendors and subscribers can select such alternatives.

As the *NetCoalition* decision noted, the Commission is not required to undertake a cost-of-service or ratemaking approach. The Exchange believes that, even if it were possible as a matter of economic theory, cost-based pricing for proprietary market data would be so complicated that it could not be done practically or offer any significant benefits.[10]

For these reasons, the Exchange believes that the proposed fees are reasonable, equitable, and not unfairly discriminatory.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance

[5] The concept of a Decommission Extension Fee is not novel. The Exchange recently adopted a Decommission Extension Fee for receipt of the NYSE MKT BBO and NYSE MKT Trades market data products when the Exchange migrated those products to the XDP format. *See* Securities Exchange Act Release No. 77389 (March 17, 2016), 81 FR 15363 (March 22, 2016) (SR–NYSEMKT–2016–37).

[6] 15 U.S.C. 78f(b).

[7] 15 U.S.C. 78f(b)(4), (5).

[8] *See, e.g.,* Proposing Release on Regulation of NMS Stock Alternative Trading Systems, Securities Exchange Act Release No. 76474 (Nov. 18, 2015) (File No. S7–23–15). *See also,* ''Brokers Warned Not to Steer Clients' Stock Trades Into Slow Lane,'' Bloomberg Business, December 14, 2015 (Sigma X dark pool to use direct exchange feeds as the primary source of price data).

[9] *NetCoalition,* 615 F.3d at 535.

[10] The Exchange believes that cost-based pricing would be impractical because it would create enormous administrative burdens for all parties and the Commission to cost-regulate a large number of participants and standardize and analyze extraordinary amounts of information, accounts, and reports. In addition, and as described below, it is impossible to regulate market data prices in isolation from prices charged by markets for other services that are joint products. Cost-based rate regulation would also lead to litigation and may distort incentives, including those to minimize costs and to innovate, leading to further waste. Under cost-based pricing, the Commission would be burdened with determining a fair rate of return, and the industry could experience frequent rate increases based on escalating expense levels. Even in industries historically subject to utility regulation, cost-based ratemaking has been discredited. As such, the Exchange believes that cost-based ratemaking would be inappropriate for proprietary market data and inconsistent with Congress's direction that the Commission use its authority to foster the development of the national market system, and that market forces will continue to provide appropriate pricing discipline. *See* Appendix C to NYSE's comments to the Commission's 2000 Concept Release on the Regulation of Market Information Fees and Revenues, which can be found on the Commission's Web site at *http://www.sec.gov/rules/concept/s72899/buck1.htm.* Finally, the prices set herein are prices for continuing to support distribution formats the Exchange has elected to retire in favor of new and more efficient distribution formats, making cost-based analyses even less relevant.

of the purposes of the Act. An exchange's ability to price its proprietary market data feed products is constrained by actual competition for the sale of proprietary market data products, the joint product nature of exchange platforms, and the existence of alternatives to the Exchange's proprietary data (and in this instance, the ability of any firm to switch to the new distribution format in a time frame that eliminates the need to pay these fees entirely).

The Existence of Actual Competition

The market for proprietary data products is currently competitive and inherently contestable because there is fierce competition for the inputs necessary for the creation of proprietary data and strict pricing discipline for the proprietary products themselves. Numerous exchanges compete with one another for listings and order flow and sales of market data itself, providing ample opportunities for entrepreneurs who wish to compete in any or all of those areas, including producing and distributing their own market data. Proprietary data products are produced and distributed by each individual exchange, as well as other entities, in a vigorously competitive market. Indeed, the U.S. Department of Justice (''DOJ'') (the primary antitrust regulator) has expressly acknowledged the aggressive actual competition among exchanges, including for the sale of proprietary market data. In 2011, the DOJ stated that exchanges ''compete head to head to offer real-time equity data products. These data products include the best bid and offer of every exchange and information on each equity trade, including the last sale.'' [11]

Moreover, competitive markets for listings, order flow, executions, and transaction reports provide pricing discipline for the inputs of proprietary data products and therefore constrain markets from overpricing proprietary market data. Broker-dealers send their order flow and transaction reports to multiple venues, rather than providing them all to a single venue, which in turn reinforces this competitive constraint. As a 2010 Commission Concept Release noted, the ''current market structure can be described as dispersed and complex'' with ''trading volume . . . dispersed among many highly automated trading centers that compete for order flow in the same stocks'' and ''trading centers offer[ing] a wide range of services that are designed to attract different types of market participants with varying trading needs.'' [12] More recently, SEC Chair Mary Jo White has noted that competition for order flow in exchange-listed equities is ''intense'' and divided among many trading venues, including exchanges, more than 40 alternative trading systems, and more than 250 broker-dealers.[13]

If an exchange succeeds in competing for quotations, order flow, and trade executions, then it earns trading revenues and increases the value of its proprietary market data products because they will contain greater quote and trade information. Conversely, if an exchange is less successful in attracting quotes, order flow, and trade executions, then its market data products may be less desirable to customers in light of the diminished content and data products offered by competing venues may become more attractive. Thus, competition for quotations, order flow, and trade executions puts significant pressure on an exchange to maintain both execution and data fees at reasonable levels.

In addition, in the case of products that are also redistributed through market data vendors, such as Bloomberg and Thompson Reuters, the vendors themselves provide additional price discipline for proprietary data products because they control the primary means of access to certain end users. These vendors impose price discipline based upon their business models. For example, vendors that assess a surcharge on data they sell are able to refuse to offer proprietary products that their end users do not or will not purchase in sufficient numbers. Vendors will not elect to make available NYSE MKT Order Imbalances in the legacy format unless their customers request it, and customers will not elect to pay the proposed fees unless NYSE MKT Order Imbalances can provide value in the legacy formats by sufficiently increasing revenues or reducing costs in the customer's business in a manner that will offset the fees. The Exchange has provided customers with adequate notice that it intends to discontinue dissemination of the data feed in the legacy format. Therefore, the proposed Decommission Extension Fee would only be applicable to those customers who have a need or desire to continue to take the data feed in the legacy format beyond the period provided for migration to the XDP format. Customers who timely migrate to the XDP format to receive the data feed would not need to receive the data feed in the legacy format and therefore would not be subject to the Decommission Extension Fee at all. All of these factors operate as constraints on pricing proprietary data products.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [14] and paragraph (f) of Rule 19b–4 [15] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79282; File No. SR–NASDAQ–2016–156]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 4702 and Rule 4703 To Add a ''Trade Now'' Instruction to Certain Order Types

November 10, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 8, 2016, The NASDAQ Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 4702 (Order Types) and Rule 4703 (Order Attributes) to add a ''Trade Now'' instruction to certain order types.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaq.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Nasdaq proposes to amend Rules [sic] 4702 (Order Types) and Rule 4703 (Order Attributes) to add a ''Trade Now'' instruction to certain order types. Nasdaq will offer this functionality through its OUCH, RASH, FLITE, and FIX protocols. This instruction will provide resting orders with a greater ability to receive an execution when that resting order is locked, *e.g.,* the price of a resting non-display buy order equals the price of a resting displayed sell order on the Nasdaq book. The Trade Now instruction will allow participants to enter an instruction to have a locked resting buy (sell) order execute against the locking sell (buy) order. Depending on the protocol used by the participant to access the Nasdaq system, the participant may either specify that the order execute against locking interest automatically, or the participant may be required to send a Trade Now instruction to the Exchange once the order has become locked. As discussed in greater detail below, Nasdaq is offering the Trade Now instruction for all orders that may be sent to the continuous Nasdaq book, and will not offer the instruction for orders that do not execute on the continuous book.

When a Trade Now instruction is applied to a resting buy (sell) order, the order will execute against the available size of the locking sell (buy) order at the locked price. The following example illustrates this scenario:

• Participant A enters a Non-Display buy order for 200 shares at $10, and specifies the Trade Now instruction;

• Participant B enters a Post Only sell order for 100 shares at $10; [3]

• The Post Only order is posted at $10 and locks the Non-Display order;

• The buy order will execute for 100 shares at $10 as the remover of liquidity.

If a buy (sell) order with the Trade Now instruction is only partially executed, the unexecuted portion of that order remains on the Nasdaq book and maintains its priority. When a Trade Now instruction is entered through the OUCH or FLITE protocol for a resting buy (sell) order and there is no locking

[3] The Exchange recently submitted a proposal to amend Nasdaq Rules 4702 and 4703 to change the way in which Post Only Orders interact with resting Non-Display orders and preventing the execution of midpoint pegged orders during a crossed market. *See* Securities Exchange Act Release No. 78908 (September 22, 2016), 81 FR 66702 (September 28, 2016) (SR–NASDAQ–2016–111).

order on the opposite side of the market, the Trade Now instruction will be ignored and the buy (sell) order will remain on the Nasdaq book, retaining its priority.

As noted above, Nasdaq is proposing to offer the Trade Now instruction for all orders that may be sent to the continuous Nasdaq book (as opposed to the opening and closing book), and will not offer the instruction for orders that do not execute on the continuous book. Accordingly, the Trade Now instruction shall not be available for Supplemental Orders (Rule 4702(b)(6)), Market On Open Orders (Rule 4702(b)(8)), Limit On Open Orders (Rule 4702(b)(9)), Opening Imbalance Only Orders (Rule 4702(b)(10)), Market On Close Orders (Rule 4702(b)(11)), Limit on Close Orders (Rule 4702(b)(12)), and Imbalance Only Orders (Rule 4702(b)(13)). These order types are subject to other Nasdaq rules regarding the display and execution of those orders, and the use of the Trade Now instruction would be inconsistent with those other Nasdaq rules.[4] Accordingly, Nasdaq is not offering the Trade Now instruction for those order types.

Depending on the interface being used by the participant, the Trade Now attribute may either allow the order to execute against locking interest automatically (''Reactive Trade Now''), or the participant may be required to send a Trade Now instruction to the Exchange once the order has become locked (''Non-Reactive Trade Now''). All orders that are entered through the RASH and FIX protocols with a Trade Now order attribute will be Reactive Trade Now, and those orders shall execute against locking interest automatically.

The Reactive Trade Now instruction will be available on an order-by-order basis, and will also be available as an optional port level setting. If the Reactive Trade Now setting is enabled on a specific port, all orders entered via the specific port will, by default, be designated with the Reactive Trade Now instruction. If the Reactive Trade Now setting is enabled on a specific port, participants will have the ability to designate on an order-by-order basis that a particular order entered via the specific port will not be designated with the Reactive Trade Now instruction, thereby overriding the port level setting for the order. If the Reactive Trade Now instruction is specified for an order for which the Trade Now instruction does not apply, *e.g.,* a Supplemental Order or a Market On Open Order, the system will not invoke the Trade Now instruction for that order.

In contrast, orders entered through the OUCH and FLITE protocols will use the Non-Reactive Trade Now functionality, and participants must send the Trade Now instruction after the order becomes locked. If a participant enters a Non-Reactive Trade Now instruction when there is no locking interest, the instruction will be ignored by the system and the order will remain on the Nasdaq Book with the same priority.

The Non-Reactive Trade Now instruction will be available to participants on order-by-order basis. If the Non-Reactive Trade Now instruction is entered for an order for which the Trade Now instruction does not apply, the system will not invoke the Trade Now instruction for that order.

Nasdaq is offering two different variations of the Trade Now instruction to reflect the differences in behavior among participants who use the different Nasdaq protocols. For example, Nasdaq typically assumes a more active role in managing the order flow submitted by users of the RASH and FIX protocols. Allowing these participants to use the Reactive Trade Now instruction at the time of order entry will allow for the automatic execution of orders, and reflects the order flow management practices of these participants. In contrast, users of the OUCH and FLITE protocols generally assume a more active role in managing their order flow. Offering the Non-Reactive Trade Now instruction for these protocols, and its requirement that the instruction must be sent after the order becomes locked, reflects the order flow management practices of these participants.

Nasdaq notes that a similar functionality currently exists on NYSE Arca, Inc. (''NYSE Arca''), which NYSE Arca refers to as a ''Non-Display Remove Modifier.'' As set forth in NYSE Arca Rule 7.31, a Limit Non-Displayed Order may be designated with a Non-Display Remove Modifier. If so designated, a Limit Non-Displayed Order to buy (sell) will trade as the liquidity-taking order with an incoming Adding Liquidity Only Order (''ALO Order'') to sell (buy) that has a working price equal to the working price of the Limit Non-Displayed Order.[5] NYSE Arca also provides this functionality for other orders, such as Mid-Point Passive Liquidity Orders (''MPL Orders'') designated Day and MPL–ALO Orders[6] and Arca Only Orders.[7]

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[8] in general, and furthers the objectives of Section 6(b)(5) of the Act,[9] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by offering participants an additional functionality that will facilitate the execution of locked orders, thereby increasing the efficient functioning of the Nasdaq market. The Trade Now functionality is an optional feature that is being offered at no additional charge, and is designed to reflect both the objectives of the Nasdaq market, and the order flow management practices of various market participants. For these reasons, the Trade Now functionality will only be made available for orders that are entered in the continuous Nasdaq book, and, depending on the protocol, will be offered as either the Reactive Trade Now or Non-Reactive Trade Now functionality.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. This is an optional functionality that is being

[4] For example, a Supplemental Order is an order type with a Non-Display Order attribute that is held on the Nasdaq Book in order to provide liquidity at the NBBO through a special execution process described in Rule 4757(a)(1)(D). Rule 4757(a)(1)(D) provides that a Supplemental Order will be matched against an order only at the National Best Bid or Offer, and only if the size of the order is less than or equal to the aggregate size of Supplemental Order interest available at the price of the order. In addition, a Supplemental Order will not execute if the NBBO is locked or crossed. *See* Rule 4757(a)(1)(D). To the extent that a Supplemental Order will only be matched at the National Best Bid or Offer, and the Trade-Now instruction allows a locked resting order to execute at a price that is potentially better than the NBBO, the function of the Trade-Now instruction is inconsistent with the function of the Supplemental Order. Similarly, the purpose of the various Cross mechanisms is to establish a price that maximizes the number of applicable quotes and orders that may be executed. *See, e.g.,* Rule 4752(d)(2). Allowing an order to automatically execute against locking interest without regard to the price of other same-side interest is inconsistent with a process that establishes a price at which the maximum number of shares may be paired.

[5] *See* NYSE Arca Rule 7.31(d)(2)(B).

[6] *See* NYSE Arca Rule 7.31(d)(3)(G).

[7] *See* NYSE Arca Rule 7.31(e)(1)(C). To the extent that the Trade-Now functionality will be made available for Price to Comply Orders, Price to Display Orders, Non-Displayed Orders, Post-Only Orders, Midpoint Peg Post-Only Orders, and Market Maker Peg Orders, Nasdaq notes that the Trade-Now functionality will apply to different order types than the NYSE Arca Non-Display Remove Modifier functionality.

[8] 15 U.S.C. 78f(b).

[9] 15 U.S.C. 78f(b)(5).

offered at no charge, and which may be used equally by similarly-situated participants. Although the functionality of the Trade Now instruction will differ depending upon the protocol that is being used to access Nasdaq, Nasdaq believes that the difference in functionality reflects the different ways in which participants enter and manage their order flow.

As noted above, Nasdaq will offer the Trade Now functionality through the OUCH, RASH, FLITE, and FIX protocols. Nasdaq will not offer the Trade Now functionality through the QIX protocol.[10] Nasdaq notes that, although the QIX protocol can support the removing of liquidity, QIX is designed to provide two-sided quote messages to the trading system, unlike the OUCH, RASH, FLITE and FIX protocols, which are designed to facilitate order submission. Nasdaq also notes that QIX is an infrequently-used protocol,[11] and that this protocol cannot support the expansion of fields that adopting the Trade Now instruction would require. Nasdaq therefore believes that its decision to offer the Trade Now instruction through the OUCH, RASH, FLITE, and FIX protocols will not impose any burden on competition that is not necessary or appropriate.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6) thereunder.[12]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act[13] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii)[14] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that the Trade Now functionality is complementary to its recent proposal to change the way in which Post Only Orders interact with resting Non-Display orders.[15] The Exchange believes that releasing both complementary functionalities at the same time will be easier for market participants to manage and implement. The Exchange further believes that the Trade Now functionality will facilitate the execution of locked orders, thereby increasing the efficient functioning of the Nasdaq market, and that waiver of the operative delay will allow this functionality to be made available at an earlier date. Finally, the Exchange notes that NYSE Arca currently utilizes a similar functionality in the form of its Non-Display Remove Modifier. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission hereby waives the operative delay and designates the proposed rule change operative upon filing.[16]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–NASDAQ–2016–156 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2016–156. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2016–156, and should be submitted on or before December 8, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79284; File No. SR–NYSE–2016–71]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing of Proposed Rule Change Amending Rule 104 To Delete Subsection (g)(i)(A)(III) Prohibiting Designated Market Makers From Establishing a New High (Low) Price on the Exchange in a Security the DMM Has a Long (Short) Position During the Last Ten Minutes Prior to the Close of Trading

November 10, 2016.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on October 27, 2016, New York Stock Exchange LLC (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 104 to delete subsection (g)(i)(A)(III) prohibiting Designated Market Makers (''DMM'') from establishing a new high (low) price on the Exchange in a security the DMM has a long (short) position during the last ten minutes prior to the close of trading. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 104 to delete subsection (g)(i)(A)(III), which prohibits DMMs with a long (short) position in a security from making a purchase (sale) in such security during the last ten minutes prior to the close of trading that results in a new high (low) price on the Exchange in that security for that day.

Background

Rule 104 sets forth the obligations of Exchange DMMs. Under Rule 104(a), DMMs registered in one or more securities traded on the Exchange are required to engage in a course of dealings for their own account to assist in the maintenance of a fair and orderly market insofar as reasonably practicable. Rule 104(a) also enumerates the specific responsibilities and duties of a DMM, including: (1) Maintenance of a continuous two-sided quote, which mandates that each DMM maintain a bid or an offer at the National Best Bid (''NBB'') and National Best Offer (''NBO,'' together the ''NBBO'') for a certain percentage of the trading day,[4] and (2) the facilitation of, among other things, openings, re-openings, and the close of trading for the DMM's assigned securities, all of which may include supplying liquidity as needed.[5] Rule 104(f) imposes an affirmative obligation on DMMs to maintain, insofar as reasonably practicable, a fair and orderly market on the Exchange in assigned securities, including maintaining price continuity with reasonable depth and trading for the DMM's own account when lack of price continuity, lack of depth, or disparity between supply and demand exists or is reasonably to be anticipated.

Rule 104(g) governs transactions by DMMs. NYSE Rule 104(g) provides that transactions on the Exchange by a DMM for the DMM's account must be effected in a reasonable and orderly manner in relation to the condition of the general market and the market in the particular stock. Rule 104(g) describes certain permitted transactions, including neutral transactions and Non-Conditional Transactions, as defined therein. Rule 104(g)(i)(A)(III) provides that, except as otherwise permitted by Rule 104, during the last ten minutes prior to the close of trading, a DMM with a long or short position in a security is prohibited from making a purchase or sale in such security that results in a new high or low price, respectively, on the Exchange for the day at the time of the DMM's transaction (''Prohibited Transactions''). Finally, Rule 104(h) addresses DMM transactions in securities that establish or increase the DMM's position. Rule 104(h)(ii) permits certain ''Conditional Transactions'' [6] without restriction as to price if they are followed by appropriate re-entry on the opposite side of the market commensurate with the size of the DMM's transaction.[7] This requirement assures that if a DMM establishes or increases a long position by buying from the Exchange best offer, which would likely be the new high price, or establishes or increases a short position by selling to the Exchange best bid, which would likely be the new low price, such transaction would be followed by the DMM quoting on the opposite side of the last transaction in order to dampen the impact of that transaction on the market.

Proposed Rule Change

The Exchange proposes to delete subsection (g)(i)(A)(III) of Rule 104. As discussed below, in today's electronic marketplace where specialists have become DMMs and control of pricing decisions has moved away from market participants on the Exchange trading Floor,[8] retaining a prohibition designed to prevent specialists from setting a price in the final ten minutes of trading in a security in which the specialist had a position is no longer necessary. Eliminating the prohibition would not

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* Rule 104(a)(1).

[5] *See id.* at (2)–(3). Rule 104(e) further provides that DMM units must provide contra-side liquidity as needed for the execution of odd-lot quantities eligible to be executed as part of the opening, reopening, and closing transactions but that remain unpaired after the DMM has paired all other eligible round lot sized interest.

[6] Rule 104(h)(i) defines a Conditional Transaction as a DMM transaction in a security that establishes or increases a position and reaches across the market to trade as the contra-side to the Exchange published bid or offer. A DMM reaches across the market when the DMM buys from the NYSE offer or sells to the NYSE bid.

[7] The Exchange's re-entry obligations for Conditional Transactions are set forth in Rule 104(h)(iii). However, Rule 104(h)(iv) permits certain other Conditional Transactions without restriction as to price, and Rule 104(i) provides that re-entry obligations following such Conditional Transactions would be the same as the re-entry obligations for Non-Conditional Transactions pursuant to Rule 104(g).

[8] *See, e.g.,* Securities Exchange Act Release No. 56209 (August 6, 2007), 72 FR 45290, 45291 (August 13, 2007) (SR–NYSE–2007–65) (noting that changes in the marketplace have included, among other things, ''the decentralization of control of pricing decisions away from the specialist and Floor broker'').

weaken existing safeguards against DMMs inappropriately influencing or manipulating the close because existing DMM obligations, including the obligation not to destabilize the market when buying or selling to increase a position or reaching across the market, would govern DMM trading during the final ten minutes of trading. Specifically, to the extent a Prohibited Transaction is also a Conditional Transaction, with the elimination of Prohibited Transactions, the obligation to re-enter the market following a Conditional Transaction, which is designed to ensure that DMMs do not inappropriately influence or manipulate the close, would become applicable in the last ten minutes of trading for such transactions,[9] thereby achieving the same goal without an outright prohibition.

In 2006, the Commission approved the Exchange's ''hybrid market'' under which Exchange systems assumed the function of matching and executing electronically-entered orders, but specialists remained the responsible broker-dealer for orders on the Exchange's limit order book.[10] Rule 104(g)(III), adopted at the same time, was intended to prevent Exchange specialists from setting the closing price.[11] However, specialists were permitted to effect transactions during the last ten minutes of trading that resulted in a new high or low for the day in order to match another market's better bid or offer or to bring the price of the security into parity with an underlying or related security or asset.[12] This exception was considered appropriate because in those situations an independent party and not the specialist had set the price.[13]

With the increasing automation of trading and the accompanying decentralization of pricing decisions away from specialists, in 2008, the Exchange proposed and the Commission approved its New Market Model, which transformed specialists into DMMs, who are no longer agents for the Exchange's limit order book and whose trading activity on the Exchange is limited to proprietary trading.[14] Nevertheless, the Exchange retained the obligations set forth in Rule 104(g) and (h), even though Regulation NMS was implemented prior to the Exchange proposing the New Market Model.

In light of these developments, Rule 104(g)(i)(A)(III) has lost its original purpose and utility. The rationale behind preventing specialists from setting the price of a security on the Exchange in the final ten minutes of trading was to prevent specialists from inappropriately influencing the price of a security at the close to advantage a specialist's proprietary position.[15] In today's fragmented marketplace, a new high or low price for a security on the Exchange in the last ten minutes of trading does not have a significant effect on the market price for such security. For example, a new high or low price on the Exchange may not be the new high or low for a security because prices may be higher or lower in away markets, where the majority of intra-day trading in NYSE-listed securities takes place. Indeed, any advantage to a DMM by establishing a new high or low on the Exchange during the last ten minutes can rapidly evaporate following trades in away markets, which happen very quickly and over which the DMM has no control. In short, since DMMs do not have the ability to direct or influence trading or control intra-day prices as specialists had before the implementation of Regulation NMS, Prohibited Transactions are anachronistic.

Moreover, although Prohibited Transactions would be eliminated, DMMs would still have the obligation under Rule 104 to ensure that they do not destabilize the market when they are buying or selling to increase a position or reaching across the market during the final ten minutes of trading.

As noted, DMMs have affirmative obligations under Rule 104(a) to engage in a course of dealings for their own account to assist in the maintenance of a fair and orderly market insofar as reasonably practicable. Specifically, Rule 104(f)(ii) sets forth the DMM's obligation to act as reasonably necessary to ensure appropriate depth and maintain reasonable price variations between transactions (also known as price continuity) and prevent unexpected variations in trading. Further, under Rule 123D(a), openings and reopenings must be fair and orderly, reflecting the DMM's professional assessment of market conditions at the time, and appropriate consideration of the balance of supply and demand as reflected by orders represented in the market. The Exchange supplies DMMs with suggested Depth Guidelines for each security in which a DMM is registered, and DMMs are expected to quote and trade with reference to the Depth Guidelines.[16]

Further, the DMM's affirmative obligation includes obligations to re-enter the market when reaching across to execute against available interest. Under Rule 104(h), DMMs that engage in Conditional Transactions must follow up with appropriate re-entry on the opposite side of the market commensurate with the size of the DMM's transaction.[17] The Exchange issues guidelines, called price participation points (''PPP''), that identify the price at or before which a DMM is expected to re-enter the market after effecting a conditional transaction.[18] Currently, a Conditional Transaction that is also a Prohibited Transaction would not be permitted in the last ten minutes of trading. With the proposed deletion of Rule 104(g)(i)(A)(III), what is currently defined as a Prohibited Transaction would be permitted, however, such transactions would be subject to re-entry obligations associated with Conditional Transactions. As such, in lieu of Rule 104(g)(i)(A)(III), in the last ten minutes of trading, DMMs would instead be subject to affirmative obligations specified under Rule 104(h).

Finally, DMM pricing decisions at the close would remain subject to specific DMM obligations with respect to the quality of the markets in securities to which they are assigned. In general, as noted above, transactions on the Exchange by a DMM for the DMM's account must be effected in a reasonable and orderly manner in relation to the condition of the general market and the market in the particular stock, and DMMs must refrain from causing or exacerbating excessive price movements.

DMM trading activity on the Exchange is actively surveiled for compliance with each of these obligations. The Exchange currently employs a suite of surveillances for trading by DMMs and other market participants in and around the close of trading. The Exchange believes that the existing DMM obligations and the Exchange's regulatory program for

[9] Currently, Conditional Transactions by DMMs during the last ten minutes of trading that establish a new high or low price on the Exchange are prohibited under Rule 104(g)(i)(A)(III).

reviewing DMM trading provides an appropriate framework in today's market structure for ensuring that DMMs are not establishing a price to benefit their own account.

For all of the foregoing reasons, the Exchange believes that retaining Prohibited Transactions is no longer necessary.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[19] in general, and furthers the objectives of Section 6(b)(5) of the Act,[20] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and protect investors and the public interest.

In particular, the Exchange believes that eliminating Rule 104(g)(III) would remove impediments to and perfect the mechanism of a free and open market and a national market system by permitting DMMs to enter trades in the last ten minutes of trading that establish a new high or low in a security even though the DMM has a position in that security. As proprietary traders without the ability to direct or influence trading or control the quote, restricting DMM trading in the final ten minutes of trading is no longer necessary.

The Exchange believes that eliminating Prohibited Transactions would not be inconsistent with the public interest and the protection of investors because DMM trading decisions going into the closing trade would continue to be evaluated from the perspective of their obligations to the marketplace, including the obligation to arrange a fair and orderly close, as set forth in Exchange rules. Further, the Exchange believes that eliminating Rule 104(g)(i)(A)(III) would not be inconsistent with the public interest and the protection of investors because existing safeguards would remain in place to ensure that DMMs do not inappropriately influence or manipulate the close, thereby establishing substantially the same result without an outright prohibition. As noted above, DMM trading would remain subject to Exchange rules, including the obligation to maintain a fair and orderly market under Rule 104. More specifically, in lieu of the obligations associated with Rule 104(g)(i)(A)(III), in the last ten minutes of trading the DMMs would be subject to the reentry obligations associated with Conditional Transactions. Accordingly, during that period, DMMs would have an obligation to reenter the market if their trading both reaches across the market and increases or establishes a position.

For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues but rather to eliminate redundant approvals of manual trades on its trading Floor.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2016–71 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2016–71. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions.

You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2016–71 and should be submitted on or before December 8, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

Brent J. Fields,

Secretary.

SOCIAL SECURITY ADMINISTRATION

[Docket No: SSA–2016–0059]

Agency Information Collection Activities: Proposed Request and Comment Request

The Social Security Administration (SSA) publishes a list of information collection packages requiring clearance by the Office of Management and Budget (OMB) in compliance with Public Law 104–13, the Paperwork Reduction Act of 1995, effective October 1, 1995. This notice includes revisions

of OMB-approved information collections.

SSA is soliciting comments on the accuracy of the agency's burden estimate; the need for the information; its practical utility; ways to enhance its quality, utility, and clarity; and ways to minimize burden on respondents, including the use of automated collection techniques or other forms of information technology. Mail, email, or fax your comments and recommendations on the information collection(s) to the OMB Desk Officer and SSA Reports Clearance Officer at the following addresses or fax numbers.

(OMB)

Office of Management and Budget, Attn: Desk Officer for SSA, Fax: 202–395–6974, Email address: *OIRA_Submission@omb.eop.gov*

(SSA)

Social Security Administration, OLCA, Attn: Reports Clearance Director, 3100 West High Rise, 6401 Security Blvd., Baltimore, MD 21235, Fax: 410–966–2830, Email address: *OR.Reports.Clearance@ssa.gov*

Or you may submit your comments online through *www.regulations.gov,* referencing Docket ID Number [SSA–2016–0059].

I. The information collection below is pending at SSA. SSA will submit it to OMB within 60 days from the date of this notice. To be sure we consider your comments, we must receive them no later than January 17, 2017. Individuals can obtain copies of the collection instrument by writing to the above email address.

Petition to Obtain Approval of a Fee for Representing a Claimant Before the Social Security Administration—20 CFR 404.1720, 404.1725, 416.1520, and 416.1525—0960–0104. A Social Security claimant's representative, whether an attorney or a non-attorney, uses Form SSA–1560–U4 to petition SSA for authorization to charge and collect a fee. A claimant may also use the form to agree or disagree with the requested fee amount or other information the representative provides on the form. The SSA official responsible for setting the fee uses the information from the form to determine a reasonable fee amount representatives may charge for their services. The respondents are attorneys and non-attorneys who represent Social Security claimants.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
SSA–1560–U4	44,365	1	30	22,183

II. SSA submitted the information collections below to OMB for clearance. Your comments regarding the information collections would be most useful if OMB and SSA receive them 30 days from the date of this publication. To be sure we consider your comments, we must receive them no later than December 19, 2016. Individuals can obtain copies of the OMB clearance packages by writing to *OR.Reports.Clearance@ssa.gov.*

1. Request for Corrections of Earnings Record—20 CFR 404.820 and 20 CFR 422.125—0960–0029. Individuals alleging inaccurate earnings records in SSA's files use paper Form SSA–7008, or a personal interview during which SSA employees key their answers into our electronic Earnings Modernization Item Correction system, to provide the information SSA needs to check earnings posted, and, as necessary, initiate development to resolve any inaccuracies. The respondents are individuals who request correction of earnings posted to their Social Security earnings record.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
Paper form	37,500	1	10	6,250
In person or telephone interview	337,500	1	10	56,250
Totals	375,000	.....	.....	62,500

2. *Supplemental Security Income (SSI)—Quality Review Case Analysis—0960–0133.* To assess the SSI program and ensure the accuracy of its payments, SSA conducts legally mandated periodic SSI case analysis quality reviews. SSA uses Form SSA–8508 to conduct these reviews, collecting information on operating efficiency, the quality of underlying policies, and the effect of incorrect payments. SSA also uses the data to determine SSI program payment accuracy rate, which is a performance measure for the agency's service delivery goals. Respondents are recipients of SSI payments selected for quality reviews.

Type of Request: Revision of an OMB approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
SSA–8508–BK (paper interview)	225	1	60	225
SSA–8508–BK (electronic)	4,275	1	60	4,275

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
Totals	4,500			4,500

3. Application for Supplemental Security Income—20 CFR 416.305–416.335, Subpart C—0960–0444. SSA uses Form SSA–8001–BK to determine an applicant's eligibility for SSI, and SSI payment amounts. SSA employees also collect this information during interviews with members of the public who wish to file for SSI. SSA uses the information for two purposes: (1) To formally deny SSI for non-medical reasons when information the applicant provides results in ineligibility; or (2) to establish a disability claim, but defer the complete development of non-medical issues until SSA approves the disability. The respondents are applicants for SSI.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
MSSICS/Signature Proxy	937,207	1	20	312,402
Non-MSSICS (Paper)	1,033	1	20	344
Totals	938,240			312,746

4. Employer Reports of Special Wage Payments—20 CFR 404.428–404.429—0960–0565. SSA collects information on the SSA–131 to prevent earnings-related overpayments, and to avoid erroneous withholding of benefits. SSA field offices and program service centers also use Form SSA–131 for awards and post-entitlement events requiring special wage payment verification from employers. While we need this information to ensure the correct payment of benefits, we do not require employers to respond. The respondents are large and small businesses that make special wage payments to retirees.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
Paper Version: SSA–131 (without #6)	105,000	1	20	35,000
Paper Version: SSA–131 (#6 only)	1,050	1	2	35
Electronic Version: Business Services Online Special Wage Payments	26	1	5	2
Totals	106,076			35,037

5. Social Security Benefits Application—20 CFR 404.310–404.311; 404.315–404.322; 404.330–404.333; 404.601–404.603; and 404.1501–404.1512—0960–0618. Title II of the Social Security Act provides retirement, survivors, and disability benefits to members of the public who meet the required eligibility criteria and file the appropriate application. This collection comprises the various application methods for each type of benefits. SSA uses the information we gather through the multiple information collection tools in this information collection request to determine applicants' eligibility for specific Social Security benefits, as well as the amount of the benefits. Individuals filing for disability benefits can, and in some instances SSA may require them to, file applications under both Title II, Social Security disability benefits, and Title XVI, SSI payments. We refer to disability applications filed under both titles as ''concurrent applications.'' This collection comprises the various application methods for each type of benefits. These methods include the following modalities: Paper forms (Forms SSA–1, SSA–2, and SSA–16); Modernized Claims System (MCS) screens for in-person interview applications; and Internet-based iClaim and iAppointment applications. SSA uses the information we collect through these modalities to determine: (1) The applicants' eligibility for the above-mentioned Social Security benefits, and (2) the amount of the benefits. The respondents are applicants for retirement, survivors, and disability benefits under Title II of the Social Security Act.

Type of Request: Revision of an OMB-approved information collection.

BILLING CODE 4191–02–P

DEPARTMENT OF STATE

[Public Notice: 9794]

U.S. Advisory Commission on Public Diplomacy; Notice of Meeting

The U.S. Advisory Commission on Public Diplomacy will hold a public meeting from 10:00a.m. until 11:30a.m., Thursday, December 8, 2016 in the Russell Senate Office Building, Room 385 in Washington, DC 20515.

The meeting will be a discussion on the use of public diplomacy tools to combat violent extremism and will feature a panel of experts.

This meeting is open to the public, Members and staff of Congress, the State Department, Defense Department, the media, and other governmental and non-governmental organizations. To attend and make any requests for reasonable accommodation, email *pdcommission@state.gov* by 5pm on Tuesday, December 6, 2016. Please arrive for the meeting by 9:45am to allow for a prompt meeting start.

The United States Advisory Commission on Public Diplomacy appraises U.S. Government activities intended to understand, inform, and influence foreign publics. The Advisory Commission may conduct studies, inquiries, and meetings, as it deems necessary. It may assemble and disseminate information and issue reports and other publications, subject to the approval of the Chairperson, in consultation with the Executive Director. The Advisory Commission may undertake foreign travel in pursuit of its studies and coordinate, sponsor, or oversee projects, studies, events, or other activities that it deems desirable and necessary in fulfilling its functions.

The Commission consists of seven members appointed by the President, by and with the advice and consent of the Senate. The members of the Commission shall represent the public interest and shall be selected from a cross section of educational, communications, cultural, scientific, technical, public service, labor, business, and professional backgrounds. Not more than four members shall be from any one political party. The President designates a member to chair the Commission.

The current members of the Commission are: Mr. Sim Farar of California, Chairman; Mr. William Hybl of Colorado, Vice Chairman; Ambassador Lyndon Olson of Texas, Vice Chairman; Ambassador Penne Korth-Peacock of Texas; Anne Terman Wedner of Illinois; and Ms. Georgette Mosbacher of New York. One seat on the Commission is currently vacant.

The following individuals have been nominated to the Commission but await Senate confirmation as of this writing: Douglas Wilson of Delaware and Markos Kounalakis of California.

To request further information about the meeting or the U.S. Advisory Commission on Public Diplomacy, you may contact its Senior Advisor, Chris Hensman, at *HensmanCD@state.gov.*

Dated: November 1, 2016.

Martha Estell,

Senior Advisor, Department of State.

Culturally Significant Objects Imported for Exhibition Determinations: ''Bouchardon: Royal Artist of the Enlightenment'' Exhibition

Notice is hereby given of the following determinations: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985; 22 U.S.C. 2459), E.O. 12047 of March 27, 1978, the Foreign Affairs Reform and Restructuring Act of 1998 (112 Stat. 2681, *et seq.*; 22 U.S.C. 6501 note, *et seq.*), Delegation of Authority No. 234 of October 1, 1999, Delegation of Authority No. 236–3 of August 28, 2000 (and, as appropriate, Delegation of Authority No. 257 of April 15, 2003), I hereby determine that the objects to be included in the exhibition ''Bouchardon: Royal Artist of the Enlightenment,'' imported from abroad for temporary exhibition within the United States, are of cultural significance. The objects are imported pursuant to loan agreements with the foreign owners or custodians. I also determine that the exhibition or display of the exhibit objects at the J. Paul Getty Museum at the Getty Center, Los Angeles, California, from on or about January 10, 2017, until on or about April 2, 2017, and at possible additional exhibitions or venues yet to be determined, is in the national interest. I have ordered that Public Notice of these Determinations be published in the **Federal Register**.

For further information, including a list of the imported objects, contact the Office of Public Diplomacy and Public Affairs in the Office of the Legal Adviser, U.S. Department of State (telephone: 202–632–6471; email: *section2459@state.gov*). The mailing address is U.S. Department of State, L/PD, SA–5, Suite 5H03, Washington, DC 20522–0505.

Dated: November 7, 2016.

Evan Ryan,

Assistant Secretary, Bureau of Educational and Cultural Affairs, Department of State.

BILLING CODE 4710–05–P

TENNESSEE VALLEY AUTHORITY

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Tennessee Valley Authority.

ACTION: 30-Day Notice of submission of information collection approval and request for comments.

SUMMARY: This is a renewal request for approval of Employment Application (OMB No. 3316–0063). The information collection described below will be submitted to the Office of Management and Budget (OMB) at *oira_submission@omb.eop.gov,* for review, as required by the Paperwork Reduction Act of 1995. The Tennessee Valley Authority is soliciting public comments on this proposed collection.

ADDRESSES: Requests for information, including copies of the information collection proposed and supporting documentation, should be directed to the Senior Privacy Program Manager: Christopher A. Marsalis, Tennessee Valley Authority, 400 W. Summit Hill Dr. (WT 5D), Knoxville, Tennessee 37902–1401; telephone (865) 632–2467 or by email at *camarsalis@tva.gov;* or to Joy L. Lloyd, Tennessee Valley Authority, 400 W. Summit Hill Dr. (WT 5A), Knoxville, Tennessee 37902–1401; telephone (865) 632–8370 or by email at *jllloyd@tva.gov;* or to the Agency Clearance Officer: Philip D. Propes, Tennessee Valley Authority, 1101 Market Street (MP 2C), Chattanooga, Tennessee 37402–2801; telephone (423) 751–8593 or email at *pdpropes@tva.gov.*

DATES: Comments should be sent to the Agency Clearance Officer and the OMB Office of Information & Regulatory Affairs, Attention: Desk Officer for Tennessee Valley Authority, Washington, DC 20503, or email: *oira_submission@omb.eop.gov,* no later than December 19, 2016.

SUPPLEMENTARY INFORMATION:

Type of Request: Reauthorization.

Title of Information Collection: Employment Application.

Frequency of Use: On Occasion.

Type of Affected Public: Individuals.

Small Businesses or Organizations Affected: No.

Federal Budget Functional Category Code: 999.

Estimated Number of Annual Responses: 50,102.

Estimated Total Annual Burden Hours: 45,913.

Estimated Average Burden Hours per Response: .92.

Need For and Use of Information: Applications for employment are needed to collect information on qualifications, suitability for employment, and eligibility for veteran's preference. The information is used to make comparative appraisals and to assist in selections. The affected public consists of individuals who apply for TVA employment.

Philip D. Propes,

Director, Enterprise Information Security and Policy.

Federal Aviation Administration

[Summary Notice No. PE–2016–110]

Petition for Exemption; Summary of Petition Received; Northrop Grumman Corporation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petition for exemption received.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of Title 14, Code of Federal Regulations (14 CFR). The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of the FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number involved and must be received on or before December 7, 2016.

ADDRESSES: You may send comments identified by docket number FAA–2016–9132 using any of the following methods:

- *Government-wide rulemaking Web site:* Go to *http://www.regulations.gov* and follow the instructions for sending your comments digitally.
- *Mail:* Send comments to the Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590.
- *Fax:* Fax comments to the Docket Management Facility at 202–493–2251.
- *Hand Delivery:* Bring comments to the Docket Management Facility in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Privacy: We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. Using the search function of our docket Web site, anyone can find and read the comments received into any of our dockets, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). You may review the DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

Docket: To read background documents or comments received, go to *http://www.regulations.gov* at any time or to the Docket Management Facility in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Alphonso Pendergrass, ARM–207, Federal Aviation Administration, 800 Independence Avenue SW., Washington DC, 20591, email *Alphonso.Pendergrass@faa.gov,* phone (202) 267–4713.

This notice is published pursuant to 14 CFR 11.85.

Issued in Washington, DC, on November 8, 2016.

Lirio Liu,

Director, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA–2016–9132.

Petitioner: Northrop Grumman Corporation.

Section of 14 CFR Affected: §§ 43.1(b),(1), and Appendix B to part 43(a),(1),(2) and (3).

Description of Relief Sought: The petitioner is seeking relief to allow Northrop Grumman Corporation exemption from the requirements of using the FAA, Major Repair and Alteration Form 337, when recording Major Repairs and Minor Alliterations to aircraft designated as experimental but previously issued a different type of airworthiness certificate for that aircraft.

Petition for Exemption

Docket No.: FAA–2016–8912.
Petitioner: Page, Andrew K.
Section of 14 CFR Affected: 121.436(a)(3).
Description of Relief Sought: Mr. Andrew K. Page seeks an exemption from 121.436(a)(3) to allow use of his pilot in command (PIC) experience with foreign air carriers to fulfill the 1,000 hours as second in command under part 121 operations requirement. If not granted the full exemption, Mr. Page seeks a condition that would allow him to operate as a PIC under part 121 only outside of U.S. airspace.

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew the exemptions from the vision requirement in the Federal Motor Carrier Safety Regulations for 79 individuals. FMCSA has statutory authority to exempt individuals from the vision requirement if the exemptions granted will not compromise safety. The Agency has concluded that granting these exemption renewals will provide a level of safety that is equivalent to or greater than the level of safety maintained without the exemptions for these commercial motor vehicle (CMV) drivers.

DATES: Each group of renewed exemptions are effective from the dates stated in the discussions below. Comments must be received on or before December 19, 2016.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) numbers: [Docket No. FMCSA–1999–6480; FMCSA–2000–7006; FMCSA–2000–7165; FMCSA–

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.
- *Fax:* 1–202–493–2251.

Instructions: Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received without change to *http://www.regulations.gov,* including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* at any time or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Federal Docket Management System (FDMS) is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: Anyone may search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or of the person signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's Privacy Act Statement for the Federal Docket Management System (FDMS) published in the **Federal Register** on January 17, 2008 (73 FR 3316).

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, Medical Programs Division, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m. Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may renew an exemption from the vision requirements in 49 CFR 391.41(b)(10), which applies to drivers of CMVs in interstate commerce, for a two-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The procedures for requesting an exemption (including renewals) are set out in 49 CFR part 381.

Exemption Decision

This notice addresses 79 individuals who have requested renewal of their exemptions in accordance with FMCSA procedures. FMCSA has evaluated these 79 applications for renewal on their merits and decided to extend each exemption for a renewable two-year period. Each individual is identified according to the renewal date.

The exemptions are extended subject to the following conditions: (1) That each individual has a physical examination every year (a) by an ophthalmologist or optometrist who attests that the vision in the better eye continues to meet the requirements in 49 CFR 391.41(b)(10), and (b) by a medical examiner who attests that the individual is otherwise physically qualified under 49 CFR 391.41; (2) that each individual provides a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (3) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file and retains a copy of the certification on his/her person while driving for presentation to a duly authorized Federal, State, or local enforcement official. Each exemption will be valid for two years unless rescinded earlier by FMCSA. The exemption will be rescinded if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315.

Basis for Renewing Exemptions

Under 49 U.S.C. 31315(b)(1), an exemption may be granted for no longer than two years from its approval date and may be renewed upon application for additional two year periods. The following group(s) of drivers will receive renewed exemptions effective in the month of September and are discussed below.

As of September 9, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 41 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (64 FR 68195; 65 FR 20251; 67 FR 38311; 67 FR 46016; 67 FR 57267; 67 FR 76439; 68 FR 10298; 69 FR 17263; 69 FR 26921; 69 FR 31447; 69 FR 51346; 70 FR 44946; 71 FR 14566; 71 FR 16410; 71 FR 27033; 71 FR 30227; 71 FR 32184; 71 FR 41311; 71 FR 50970; 72 FR 67340; 73 FR 1395; 73 FR 15567; 73 FR 15568; 73 FR 27014; 73 FR 27015; 73 FR 27017; 73 FR 28186; 73 FR 35197; 73 FR 35199; 73 FR 36955; 73 FR 38499; 73 FR 42403; 73 FR 48270; 73 FR 48273; 73 FR 48275; 74 FR 43217; 74 FR 57551; 75 FR 19674; 75 FR 25917; 75 FR 25919; 75 FR 27623; 75 FR 27624; 75 FR 34212; 75 FR 36779; 75 FR 38602; 75 FR 39729; 75 FR 44051; 75 FR 47888; 75 FR 50799; 76 FR 49528; 76 FR 61143; 76 FR 66123; 76 FR 67248; 76 FR 73769; 76 FR 79761; 77 FR 3547; 77 FR 23797; 77 FR 27847; 77 FR 36338; 77 FR 38384; 77 FR 38386; 77 FR 40945; 77 FR 40946; 77 FR 41879; 77 FR 46153; 77 FR 48590; 77 FR 52391; 78 FR 24798; 78 FR 46407; 78 FR 62935; 78 FR 63302; 78 FR 67454; 78 FR 67460; 78 FR 76395; 78 FR 76705; 78 FR 77780; 78 FR 77782; 79 FR 4803; 79 FR 10606; 79 FR 14331; 79 FR 14571; 79 FR 22003; 79 FR 23797; 79 FR 79 27681; 79 FR 28588; 79 FR 29495; 79 FR 35212; 79 FR 35218; 79 FR 35220; 79 FR 37842; 79 FR 38649; 79 FR 38659; 79 FR 41735; 79 FR 41737; 79 FR 45868; 79 FR 46153; 79 FR 47175; 79 FR 53514; 79 FR 56102):

The drivers were included in one of the following dockets: Docket Nos. FMCSA–1999–6480; FMCSA–2002–12294; FMCSA–2002–13411; FMCSA–2004–17195; FMCSA–2006–24015; FMCSA–2006–24783; FMCSA–2007–0017; FMCSA–2008–0021; FMCSA–2008–0106; FMCSA–2008–0174; FMCSA–2009–0206; FMCSA–2010–0082; FMCSA–2010–0114; FMCSA–2011–0142; FMCSA–2011–0276; FMCSA–2011–0299; FMCSA–2012–0104; FMCSA–2012–0161; FMCSA–2013–0027; FMCSA–2013–0166; FMCSA–2013–0168; FMCSA–2013–0170; FMCSA–2014–0002; FMCSA–2014–0003; FMCSA–2014–0005; FMCSA–2014–0006; FMCSA–2014–0007; FMCSA–2014–0008. Their exemptions are effective as of September 9, 2016 and will expire on September 9, 2018.

As of September 21, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 17 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (65 FR 20245; 65 FR 33406; 65 FR 57230; 65 FR 57234; 67 FR 46016; 67 FR 57266; 67 FR 57267; 69 FR 51346; 69 FR 52741; 71 FR 32185; 71 FR 41311; 71 FR 50970; 71 FR 53489; 73 FR 42403; 73 FR 48270; 73 FR 51336; 75 FR 34210; 75 FR 47888; 75 FR 50799; 75 FR 52062; 77 FR 40945; 77 FR 52389; 79 FR 46300):

Jack D. Clodfelter (NC), Tommy J. Cross, Jr. (TN), Daniel K. Davis, III (MA), Richard L. Derick (NH), Joseph A. Dunlap (OH), James F. Gereau (WI), Esteban G. Gonzalez (TX), Reginald I. Hall (TX), George R. House (MO), Alfred C. Jewell, Jr. (WY), John C. Lewis (SC), Lewis V. McNeice (TX), Kevin J. O'Donnell (IL), Gregory M. Preves (GA), Daniel Salinas (OR), Lee R. Sidwell (OH), Jeffrey D. Wilson (CO).

The drivers were included in one of the following dockets: Docket No. FMCSA–2000–7006; FMCSA–2000–7165; FMCSA–2002–12294; FMCSA–2006–24783; FMCSA–2010–0114. Their exemptions are effective as of September 21, 2016 and will expire on September 21, 2018.

As of September 23, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 5 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (73 FR 46973; 73 FR 54888; 75 FR 52063; 77 FR 52388; 79 FR 52388):

Terrence L. Benning (WI), Larry D. Curry (GA), Kelly M. Greene (FL), Garry R. Lomen (WA), Thomas P. Shank (NY).

The drivers were included on the following docket: Docket No. FMCSA–2008–0231. Their exemptions are effective as of September 23, 2016 and will expire on September 23, 2018.

As of September 26, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 6 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (77 FR 46793; 77 FR 59245):

Bryan Brockus (ID), Michael T. Dekorte (MI), Erric L. Gomersall (WI), Larry Johnsonbaugh, Jr. (PA), John Middleton (OH), John C. Steedley (GA).

The drivers were included on the following docket: Docket No. FMCSA–2012–0214. Their exemptions are effective as of September 26, 2016 and will expire on September 26, 2018.

As of September 30, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 10 individuals have satisfied the conditions for obtaining a renewed exemption from the vision requirements (63 FR 66227; 64 FR 16520; 71 FR 14567; 71 FR 30228; 73 FR 28187; 73 FR 35195; 73 FR 35196; 73 FR 35197; 73 FR 35198; 73 FR 35199; 73 FR 35200; 73 FR 35201; 73 FR 38497; 38498; 73 FR 38499; 73 FR 48273; 73 FR 48275; 74 FR 37299; 74 FR 48344; 75 FR 25919; 75 FR 39729; 75 FR 44051; 77 FR 40946; 77 FR 46153; 79 FR 46153):

Ronald A. Bolyard (WV), David A. Coburn, Sr. (VT), Ronald Holshouser (MO), Kelly R. Knopf, Sr. (SC), Edward J. Kosior (NY), Frazier A. Luckerson (GA), Ross A. Miceli II (PA), Donald L. Minney (OH), Philip L. Neff (PA), Loran J. Weiler (IA).

The drivers were included on the following docket: Docket No. FMCSA–2014–0010. Their exemptions are effective as of September 30, 2016 and will expire on September 30, 2018.

Each of the 79 applicants listed in the groups above has requested renewal of the exemption and has submitted evidence showing that the vision in the better eye continues to meet the requirement specified at 49 CFR 391.41(b)(10) and that the vision impairment is stable. In addition, a review of each record of safety while driving with the respective vision deficiencies over the past two years indicates each applicant continues to meet the vision exemption requirements.

These factors provide an adequate basis for predicting each driver's ability to continue to drive safely in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each renewal applicant for a period of two years is likely to achieve a level of safety equal to that existing without the exemption.

Request for Comments

FMCSA will review comments received at any time concerning a particular driver's safety record and determine if the continuation of the exemption is consistent with the requirements at 49 U.S.C. 31136(e) and 31315. However, FMCSA requests that interested parties with specific data concerning the safety records of these drivers submit comments by December 19, 2016.

FMCSA believes that the requirements for a renewal of an exemption under 49 U.S.C. 31136(e) and 31315 can be satisfied by initially granting the renewal and then requesting and evaluating, if needed, subsequent comments submitted by interested parties. As indicated above, the Agency previously published notices of final disposition announcing its decision to exempt these 79 individuals from the vision requirement in 49 CFR 391.41(b)(10). The final decision to grant an exemption to each of these individuals was made on the merits of each case and made only after careful consideration of the comments received to its notices of applications. The notices of applications stated in detail the qualifications, experience, and medical condition of each applicant for an exemption from the vision requirements. That information is available by consulting the above cited **Federal Register** publications.

Interested parties or organizations possessing information that would otherwise show that any, or all, of these drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315, FMCSA will take immediate steps to revoke the exemption of a driver.

Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov* and in the search box insert the docket numbers FMCSA–1999–6480; FMCSA–2000–7006; FMCSA–2000–7165; FMCSA–2002–12294; FMCSA–2002–13411; FMCSA–2004–17195; FMCSA–2006–24015; FMCSA–2006–24783; FMCSA–2007–0017; FMCSA–2008–0021; FMCSA–2008–0106; FMCSA–2008–0174; FMCSA–2008–0231; FMCSA–2009–0206; FMCSA–2010–0082; FMCSA–2010–0114; FMCSA–2011–0142; FMCSA–2011–0276; FMCSA–2011–0299; FMCSA–2012–0104; FMCSA–2012–0161; FMCSA–2012–0214; FMCSA–2013–0027; FMCSA–2013–0166; FMCSA–2013–0168; FMCSA–2013–0170; FMCSA–2014–0002; FMCSA–2014–0003; FMCSA–2014–0005; FMCSA–2014–0006; FMCSA–2014–0007; FMCSA–2014–0008; FMCSA–2014–0010 and click the search button. When the new screen appears, click on the blue ''Comment Now!'' button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and material received during the comment period. FMCSA may issue a final rule at any time after the close of the comment period.

Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble, go to *http://www.regulations.gov* and in the search box insert the docket number FMCSA–1999–6480; FMCSA–2000–7006; FMCSA–2000–7165; FMCSA–2002–12294; FMCSA–2002–13411; FMCSA–2004–17195; FMCSA–2006–24015; FMCSA–2006–24783; FMCSA–2007–0017; FMCSA–2008–0021; FMCSA–2008–0106; FMCSA–2008–0174; FMCSA–2008–0231; FMCSA–2009–0206; FMCSA–2010–0082; FMCSA–2010–0114; FMCSA–2011–0142; FMCSA–2011–0276; FMCSA–2011–0299; FMCSA–2012–0104; FMCSA–2012–0161; FMCSA–2012–0214; FMCSA–2013–0027; FMCSA–2013–0166; FMCSA–2013–0168; FMCSA–2013–0170; FMCSA–2014–0002; FMCSA–2014–0003; FMCSA–2014–0005; FMCSA–2014–0006; FMCSA–2014–0007; FMCSA–2014–0008; FMCSA–2014–0010 and click ''Search.'' Next, click ''Open Docket Folder'' and you will find all documents and comments related to this notice.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2016–0008]

Qualification of Drivers; Exemption Applications; Epilepsy and Seizure Disorders

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of applications for exemption; request for comments.

SUMMARY: FMCSA announces receipt of applications from nine individuals for an exemption from the prohibition in the Federal Motor Carrier Safety Regulations (FMCSRs) against persons with a clinical diagnosis of epilepsy or any other condition that is likely to cause a loss of consciousness or any loss of ability to control a commercial motor vehicle (CMV) to drive in interstate commerce. If granted, the exemptions would enable these individuals who have had one or more seizures and are taking anti-seizure medication to operate CMVs in interstate commerce.

DATES: Comments must be received on or before December 19, 2016.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket No. FMCSA–2016–0008 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.
- *Fax:* 1–202–493–2251.

Instructions: Each submission must include the Agency name and the docket number(s) for this notice. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below for further information.

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* at any time or Room W12–140 on the ground level of the West Building, 1200 New Jersey

Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays. The FDMS is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments online.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov* as described in the system records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, (202) 366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–224, Washington, DC 20590–0001. Office hours are 8:30 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the FMCSRs for a two-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The statute also allows the Agency to renew exemptions at the end of the two-year period.

The nine individuals listed in this notice have requested an exemption from the epilepsy prohibition in 49 CFR 391.41(b)(8). Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the exemption will achieve the required level of safety mandated by statute.

The physical qualification standard for drivers regarding epilepsy found in 49 CFR 391.41(b)(8) states that a person is physically qualified to drive a CMV if that person:

> Has no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause the loss of consciousness or any loss of ability to control a CMV.

In addition to the regulations, FMCSA has published advisory criteria [1] to assist Medical Examiners in determining whether drivers with certain medical conditions are qualified to operate a CMV in interstate commerce. [49 CFR part 391, Appendix A to part 391—Medical Advisory Criteria, section *H. Epilepsy: § 391.41(b)(8),* paragraphs 3, 4, and 5.]

The advisory criteria state the following:

If an individual has had a sudden episode of a non-epileptic seizure or loss of consciousness of unknown cause that did not require anti-seizure medication, the decision whether that person's condition is likely to cause the loss of consciousness or loss of ability to control a CMV should be made on an individual basis by the Medical Examiner in consultation with the treating physician. Prior to considering certification, it is suggested there be a six-month waiting period from the time of the episode. Following the waiting period, it is suggested that the individual undergo a complete neurological examination. If the results of the examination are negative and anti-seizure medication is not required, the driver may be qualified.

In those individual cases where a driver had a seizure or an episode of loss of consciousness that resulted from a known medical condition (*e.g.,* drug reaction, high temperature, acute infectious disease, dehydration, or acute metabolic disturbance), certification should be deferred until the driver has recovered fully from that condition, has no existing residual complications, and is not taking anti-seizure medication.

Drivers who have a history of epilepsy/seizures, off anti-seizure medication and seizure-free for 10 years, may be qualified to operate a CMV in interstate commerce. Interstate drivers who have had a single unprovoked seizure may be qualified to drive a CMV in interstate commerce if seizure-free and off anti-seizure medication for five years or more.

As a result of Medical Examiners misinterpreting advisory criteria as regulation, numerous drivers have been prohibited from operating a CMV in interstate commerce based on the fact that they have had one or more seizures and are taking anti-seizure medication, rather than an individual analysis of their circumstances by a qualified Medical Examiner based on the physical qualification standards and medical best practices.

On January 15, 2013, in a Notice of Final Disposition entitled, ''Qualification of Drivers; Exemption Applications; Epilepsy and Seizure Disorders,'' (78 FR 3069), FMCSA announced its decision to grant requests from 22 individuals for exemptions from the regulatory requirement that interstate CMV drivers have ''no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause loss of consciousness or any loss of ability to control a CMV.'' Since the January 15, 2013 notice, the Agency has published additional notices granting requests from individuals for exemptions from the regulatory requirement regarding epilepsy found in 49 CFR 391.41(b)(8).

To be considered for an exemption from the epilepsy prohibition in 49 CFR 391.41(b)(8), applicants must meet the criteria in the 2007 recommendations of the Agency's Medical Expert Panel (MEP) (78 FR 3069).

II. Qualifications of Applicants

Mark W. Beery

Mr. Beery is a 64 year-old class A CDL holder in Pennsylvania. He has a history of a seizure disorder and his last seizure was in 2000. He takes anti-seizure medication with the dosage and frequency remaining the same since that time. His physician states that he is supportive of Mr. Beery receiving an exemption.

Douglas Eugene Cantwell

Mr. Cantwell is a 54 year-old class B CDL holder in Tennessee. He has a history of epilepsy and his last seizure was in 1986. He takes anti-seizure medication with the dosage and frequency remaining the same since that time. His physician states that he is supportive of Mr. Cantwell receiving an exemption.

Mark Allen McDaniel

Mr. McDaniel is a 44 year-old driver in Illinois. He has a history of a seizure disorder and his last seizure was in 1996. He takes anti-seizure medication with the dosage and frequency remaining the same since that time. His physician states that he is supportive of Mr. McDaniel receiving an exemption.

Ronnie Dean Moody

Mr. Moody is a 57 year-old class A CDL holder in North Carolina. He has a history of a seizure disorder and his last seizure was in 2006. He takes anti-seizure medication with the dosage and frequency remaining the same since that time. His physician states that he is

supportive of Mr. Moody receiving an exemption.

Tye Moore

Mr. Moore is a 50 year-old driver in Indiana. He has a history of a seizure disorder and his last seizure was in 1984. He takes anti-seizure medication with the dosage and frequency remaining the same since that time. His physician states that he is supportive of Mr. Moore receiving an exemption.

Jack D. Porcellini

Mr. Porcellini is a 26 year-old driver in Pennsylvania. He has a history of a seizure disorder and his last seizure was in 2003. He discontinued anti-seizure medication in 2008. His physician states that he is supportive of Mr. Porcellini receiving an exemption.

Jeffrey C. Rathman

Mr. Rathman is a 47 year-old driver in Colorado. He has a history of a seizure disorder and his last seizure was in 1999. He takes anti-seizure medication with the dosage and frequency remaining the same since that time. His physician states that he is supportive of Mr. Rathman receiving an exemption.

Douglas Joseph Simms Jr.

Mr. Simms is a 48 year-old class B CDL holder in North Carolina. He has a history of a single seizure in 1990. He takes anti-seizure medication with the dosage and frequency remaining the same since that time. His physician states that he is supportive of Mr. Simms receiving an exemption.

Tara Van Horne

Ms. Van Horne is a 38 year-old driver in Pennsylvania. She has a history of a seizure disorder and her last seizure was in 1998. She takes anti-seizure medication with the dosage and frequency remaining the same since that time. Her physician states that he is supportive of Ms. Van Horne receiving an exemption.

III. Request for Comments

In accordance with 49 U.S.C. 31136(e) and 31315, FMCSA requests public comment from all interested persons on the exemption petitions described in this notice. We will consider all comments received before the close of business on the closing date indicated in the dates section of the notice.

IV. Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov* and in the search box insert the docket number ''FMCSA–2016–0008'' and click the search button. When the new screen appears, click on the blue ''Comment Now!'' button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and materials received during the comment period. FMCSA may issue a final determination any time after the close of the comment period.

V. Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble, go to *http://www.regulations.gov* and in the search box insert the docket number FMCSA–2016–0008 and click ''Search.'' Next, click ''Open Docket Folder'' and you will find all documents and comments related to this notice.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2009–0294; FMCSA–2011–0326; FMCSA–2011–0327; FMCSA–2011–0367; FMCSA–2013–0192]

Qualification of Drivers; Exemption Applications; Diabetes

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of final disposition.

SUMMARY: FMCSA announces its decision to renew exemptions of 36 individuals from its prohibition in the Federal Motor Carrier Safety Regulations (FMCSRs) against persons with insulin-treated diabetes mellitus (ITDM) from operating commercial motor vehicles (CMVs) in interstate commerce. The exemptions enable these individuals with ITDM to continue to operate CMVs in interstate commerce.

DATES: Each group of renewed exemptions were effective on the dates stated in the discussions below and will expire on the dates stated in the discussions below.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–224, Washington, DC 20590–0001. Office hours are from 8 a.m. to 5:30 p.m., e.t., Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Electronic Access

You may see all the comments online through the Federal Document Management System (FDMS) at: *http://www.regulations.gov.*

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* and/or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

II. Background

On January 11, 2016, FMCSA published a notice announcing its decision to renew exemptions for 36 individuals from the insulin-treated diabetes mellitus prohibition in 49 CFR 391.41(b)(3) to operate a CMV in interstate commerce and requested comments from the public (80 FR 74196). The public comment period ended on February 10, 2016 and no comments were received.

As stated in the previous notice, FMCSA has evaluated the eligibility of these applicants and determined that renewing these exemptions would

achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(3).

The physical qualification standard for drivers regarding diabetes found in 49 CFR 391.41(b)(3) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control.

III. Discussion of Comments

FMCSA received no comments in this preceding.

IV. Conclusion

Based upon its evaluation of the 36 renewal exemption applications and that no comments were received, FMCSA confirms its decision to exempt the following drivers from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce in 49 CFR 391.64(3):

As of February 6, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 6 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (76 FR 79756; 77 FR 5873; 81 FR 1281):

Howard A. Betz (OH)
Kevin J. Coppens (ME)
Frank H. Ford, Jr. (PA)
Daniel R. Harris (TX)
Joseph L. Owings (AL)
Jerry H. Small (NC)

The drivers were included in Docket No. FMCSA–2011–0326. Their exemptions are effective as of February 6, 2016, and will expire on February 6, 2018.

As of February 10, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 6 individuals, have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (76 FR 78720; 77 FR 7232; 81 FR 1281):

Steve R. Fortunat (NJ)
Kenneth J. Hill (OH)
Cecil T. Keith (GA)
Frank E. Ray (KS)
Stanley L. Rybarcyzk (IL)
Gene A. Willias (WV)

The drivers were included in Docket No. FMCSA–2011–0327. Their exemptions are effective as of February 10, 2016, and will expire on February 10, 2018.

As of February 12, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following individual, Guy B. Mayes (WA) has satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (78 FR 78479; 79 FR 13086; 81 FR 1281).

The driver was included in Docket No. FMCSA–2013–0192. The exemption is effective as of February 12, 2016, and will expire on February 12, 2018.

As of February 22, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 11 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (77 FR 533; 77 FR 10607; 81 FR 1281):

Garry L. Camden (IN)
Loren A. Cox (NY)
Darryl F. Gilbertson (WI)
Alfred Gutierrez II (OK)
Matthew D. Hulse (KS)
Neil E. Karvonen (WA)
Damon A. Kruger (CO)
Earl T. Morton, Jr. (VA)
Richard A. Norstebon (ND)
Donald J. Olbinski (IL)
Kevin E. Risley (IN)

The drivers were included in Docket No. FMCSA–2011–0367. Their exemptions are effective as of February 22, 2016, and will expire on February 22, 2018.

As of February 24, 2016, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 11 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (78 FR 68092; 79 FR 8182; 81 FR 1281):

Daniel C. Druffel (WA)
Gregory J. Godley (WA)
Troy A. Gortmaker (SD)
Charles M. Griswold (MA)
Justin R. Henneinke (CA)
William R. Huntley (MI)
Joseph I. Kulp (PA)
Kevin R. Mooney (WA)
Daniel D. Neale (CA)
Richard L. Sulzberger (IL)
Dirk Vanstralen (CA)

The drivers were included in Docket No. FMCSA–2009–0294. Their exemptions are effective as of February 24, 2016, and will expire on February 24, 2018.

As of February 27, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following individual, Charles R. Clayton (NJ) has satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (78 FR 78479; 79 FR 13086; 81 FR 1281).

The driver was included in Docket No. FMCSA–2013–0192. The exemption is effective as of February 27, 2016, and will expire on February 27, 2018.

In accordance with 49 U.S.C. 31315, each exemption will be valid for two years from the effective date unless revoked earlier by FMCSA. The exemption will be revoked if the following occurs: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained prior to being granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136 and 31315.

Issued on: November 8, 2016.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2016–0211]

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of denials.

SUMMARY: FMCSA announces its denial of 84 applications from individuals who requested an exemption from the Federal vision standard applicable to interstate truck and bus drivers and the reasons for the denials. FMCSA has statutory authority to exempt individuals from the vision requirement if the exemptions granted will not compromise safety. The Agency has concluded that granting these exemptions does not provide a level of safety that will be equivalent to, or greater than, the level of safety maintained without the exemptions for these commercial motor vehicle (CMV) drivers.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, (202) 366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–113, Washington, DC 20590–0001. Office hours are 8:30 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from

the Federal vision standard for a renewable 2-year period if it finds ''such an exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such an exemption.'' The procedures for requesting an exemption are set forth in 49 CFR part 381.

Accordingly, FMCSA evaluated 84 individual exemption requests on their merit and made a determination that these applicants do not satisfy the criteria eligibility or meet the terms and conditions of the Federal exemption program. Each applicant has, prior to this notice, received a letter of final disposition on the exemption request. Those decision letters fully outlined the basis for the denial and constitute final Agency action. The list published in this notice summarizes the Agency's recent denials as required under 49 U.S.C. 31315(b)(4) by periodically publishing names and reasons for denial.

The following 3 applicants did not have sufficient driving experience over the past 3 years under normal highway operating conditions:

Joseph L. Duey III (PA)
Randy C. Kephart (MN)
Cody C. Mendenhall (IL)

The following 19 applicants had no experience operating a CMV:

Joseph W. Adkisson (CA)
Muhammad S. Chaudry (NY)
Connie M. Dessaso (VA)
Kira A. Gordon (NC)
Donald J. Jannuzzi (OR)
Justin E. Johnson (MN)
Trevor M. Kayser (IA)
Brandon P. Krippner (MN)
Angel E. Lee (VA)
James D. Longworth (TN)
Donald O. McGee (MO)
Daniel C. McLain (VA)
Steve A. Nicks (WI)
William T. Oates (OR)
George A. Rodriguez (NC)
Chad A. Sager (VA)
Roger T. Scharlack (CT)
Phillip J. Shipp (TX)
Susan B. Williams (VA)

The following 15 applicants did not have 3 years of experience driving a CMV on public highways with their vision deficiencies:

Dionel Arroyo (NJ)
Herald J. Cox (IN)
William H. Darden (MS)
Matthew A. Edmonds)OH)
Roberto Flores (IL)
Jerry L. Foreman (IN)
Jerimiah C. Garon (SD)
Jason S. Gessele (ND)
Morris L. Hickman (VA)
Robert V. Lang, Jr. (MI)
Michael K. Leonhardt (NM)
Hollisa I. Richardson (IL)
Sylvester L. Richardson (IL)
Lanny R. Rumbo (OK)
Sean D. Shuemake (PA)

The following 7 applicants did not have 3 years of recent experience driving a CMV with the vision deficiency:

Phillip E. Bukovsky (OH)
Erick S. Cardenas (CA)
William J. Cuadra (FL)
Albert B. Lott (SC)
Jose O. Quinto (UT)
Joe L. Richey (TX)
Gary M. Stokes (AL)

The following 5 applicants did not have sufficient driving experience during the past 3 years under normal highway operating conditions:

Tanner H. Brooks (MS)
Mervin Duplessis, Jr. (LA)
Thomas Gonzalez (PA)
Anatolio Gracia (CA)
Samuel L. Kirkpatrick (OH)

The following 14 applicants were denied for multiple reasons:

Douglas Berry (PA)
Daniel M. Cervantes (NE)
Kevin J. Embrey (IN)
Trina L. Garcia (CA)
Eugene K. Lockwood (OH)
Caleb D. Moses (IA)
Glenn P. Nickerson (ME)
Eric E. Olson (VT)
Timothy Parramore (NC)
Jeffrey W. Pike, Jr. (MN)
Rodger S. Simmons (LA)
Steven T. Stasiak (NY)
Zachary M. Tarryk (CT)
Octavia E. Williams (MO)

The following applicant, Kelly L. Ewing (PA), held 2 commercial driver's licenses simultaneously.

The following 7 applicants met the current federal vision standards. Exemptions are not required for applicants who meet the current regulations for vision:

Michael E. Baker (VT)
William C. Christiansen (NH)
Mihail Crudu (FL)
Franklin T. Harrell, Jr. (GA)
Suzanne Morgan (FL)
Rene J. Patenuade (VT)
Leif H. Stensrud (NV)

The following applicant, Edward A. Iverson (ND), drove interstate while restricted to intrastate driving.

The following 8 applicants will not be driving interstate, in interstate commerce, or are not required to carry a DOT medical card:

Laurance D. Coppa (FL)
Tyler L. Gentry (OH)
Billy W. Hysmith (FL)
Randy W. Lindsey (GA)
Mark L. McHenry (PA)
Lucio Nieves (FL)
Jeremy D. Pruemer (IL)
Robert D. Schatz (PA)

Finally, the following 4 applicants perform transportation for the Federal government, State, or any political subdivision of the state.

Andrew R. Clere (OH)
Robert J. Drumm (NM)
Veronica Gray (NJ)
John P. Steffens (CO)

Issued on: November 4, 2015.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

[FTA Docket No. FTA–2016–0043]

Agency Information Collection Activity Under OMB Review

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Requirements (ICRs) abstracted below have been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describe the nature of the information collection and their expected burdens. The **Federal Register** notice with a 60-day comment period soliciting comments on the following collections of information was published on August 16, 2016 (81 FR 54658).

DATES: Comments must be submitted on or before December 19, 2016.

ADDRESSES: All written comments must refer to the docket number that appears at the top of this document and be submitted to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725—17th Street NW., Washington, DC 20503, Attention: FTA Desk Officer. Alternatively, comments may be sent via email to the Office of Information and Regulatory Affairs (OIRA), Office of Management and Budget, at the following address: *oira_submissions@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Tia Swain, Office of Administration, Management Planning Division, 1200 New Jersey Avenue SE., Mail Stop

TAD–10, Washington, DC 20590, (202) 366–0354 or *tia.swain@dot.gov.*

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA), Public Law 104–13, Section 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501–3520), and its implementing regulations, 5 CFR part 1320, require Federal agencies to issue two notices seeking public comment on information collection activities before OMB may approve paperwork packages. 44 U.S.C. 3506, 3507; 5 CFR 1320.5, 1320.8(d)(1), 1320.12. On August 16, 2016, FTA published a 60-day notice (81 FR 54658) in the **Federal Register** soliciting comments on the ICR that the agency was seeking OMB approval. FTA received no comments after issuing this 60-day notice. Accordingly, DOT announces that these information collection activities have been re-evaluated and certified under 5 CFR 1320.5(a) and forwarded to OMB for review and approval pursuant to 5 CFR 1320.12(c).

Before OMB decides whether to approve these proposed collections of information, it must provide 30 days for public comment. 44 U.S.C. 3507(b); 5 CFR 1320.12(d). Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30 day notice is published. 44 U.S.C. 3507(b)–(c); 5 CFR 1320.12(d); *see also* 60 FR 44978, 44983, Aug. 29, 1995. OMB believes that the 30 day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); *see also* 60 FR 44983, Aug. 29, 1995.

The summaries below describe the nature of the information collection requirements (ICRs) and the expected burden. The requirements are being submitted for clearance by OMB as required by the PRA.

Title: 49 U.S.C. 5307 Urbanized Area Formula Program.

OMB Control Number: 2132–0502.

Type of Request: Revision of a currently approved information collection.

Abstract: 49 U.S.C. 5307 The Urbanized Area Formula Funding program (49 U.S.C. 5307) makes Federal resources available to urbanized areas and to Governors for transit capital and operating assistance and for transportation related planning in urbanized areas. An urbanized area is a Census-designated area with a population of 50,000 or more as determined by the U.S. Department of Commerce, Bureau of the Census. Funding is made available to designated recipients, which must be public bodies with the legal authority to receive and dispense Federal funds. Governors, responsible local officials and publicly owned operators of transit services are required to designate a recipient to apply for, receive, and dispense funds for urbanized areas pursuant to 49 U.S.C. 5307(a)(2). The Governor or Governor's designee is the designated recipient for urbanized areas between 50,000 and 200,000. Eligible activities include planning, engineering, design and evaluation of transit projects and other technical transportation-related studies; capital investments in bus and bus-related activities such as replacement of buses, overhaul of buses, rebuilding of buses, crime prevention and security equipment and construction of maintenance and passenger facilities; and capital investments in new and existing fixed guideway systems including rolling stock, overhaul and rebuilding of vehicles, track, signals, communications, and computer hardware and software. All preventive maintenance and some Americans with Disabilities Act complementary paratransit service costs are considered capital costs. For urbanized areas with populations less than 200,000, operating assistance is an eligible expense. For urbanized areas with 200,000 in population and over, funds are apportioned and flow directly to a designated recipient selected locally to apply for and receive Federal funds. For urbanized areas under 200,000 in population, the funds are apportioned to the Governor of each state for distribution. With the passing of Fixing America's Surface Transportation Act, the 100 Bus Rule was been expanded to include demand response service, excluding ADA complementary paratransit service. An exception to the 100 Bus Rule has been added as well. If a public transportation system executes a written agreement with one or more other public transportation systems within the urbanized area to allocate funds by a method other than by measuring vehicle revenue hours, each public transportation system that is part of the written agreement may follow the terms of the written agreement instead of the measured vehicle revenue hours. Under Grant Recipient Requirements, a provision has been added that directs recipients to maintain equipment and facilities in accordance with their transit asset management plan. Recipients are no longer required to expend 1% of their funding for associated transit improvements. However, recipients are still required to submit an annual report listing projects that were carried out in the preceding fiscal year. The Passenger Ferry Grant Program is also available to urbanized areas under the authority provided through 49 U.S.C. 5307 (Section 5307). This program provides discretionary opportunity to capital projects. Capital projects include, but are not limited to, the purchase, replacement, or rehabilitation of ferries and terminals and related equipment. Funds may not be used to fund operating expenses, planning, or preventive maintenance.

Annual Estimated Total Burden Hours: 117,000 hours.

Comments Are Invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this notice in the **Federal Register**.

William Hyre,

Deputy Associate Administrator for Administration.

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

Limitation on Claims Against Proposed Public Transportation Projects

AGENCY: Federal Transit Administration (FTA), DOT.

ACTION: Notice.

SUMMARY: This notice announces final environmental actions taken by the Federal Transit Administration (FTA) for projects in the City of Alexandria, VA and the City of Jersey City, NJ. The purpose of this notice is to announce publicly the environmental decisions by FTA on the subject projects and to activate the limitation on any claims

that may challenge these final environmental actions.

DATES: By this notice, FTA is advising the public of final agency actions subject to Section 139(l) of Title 23, United States Code (U.S.C.). A claim seeking judicial review of FTA actions announced herein for the listed public transportation projects will be barred unless the claim is filed on or before April 17, 2017.

FOR FURTHER INFORMATION CONTACT: Nancy-Ellen Zusman, Assistant Chief Counsel, Office of Chief Counsel, (312) 353–2577 or Meghan Kelley, Environmental Protection Specialist, Office of Environmental Programs, (202) 366–6098. FTA is located at 1200 New Jersey Avenue SE., Washington, DC 20590. Office hours are from 9:00 a.m. to 5:00 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: Notice is hereby given that FTA has taken final agency actions by issuing certain approvals for the public transportation projects listed below. The actions on the projects, as well as the laws under which such actions were taken, are described in the documentation issued in connection with the projects to comply with the National Environmental Policy Act (NEPA) and in other documents in the FTA administrative record for the projects. Interested parties may contact either the project sponsor or the relevant FTA Regional Office for more information. Contact information for FTA's Regional Offices may be found at *https://www.fta.dot.gov.*

This notice applies to all FTA decisions on the listed projects as of the issuance date of this notice and all laws under which such actions were taken, including, but not limited to, NEPA [42 U.S.C. 4321–4375], Section 4(f) of the Department of Transportation Act of 1966 [49 U.S.C. 303], Section 106 of the National Historic Preservation Act [16 U.S.C. 470f], and the Clean Air Act [42 U.S.C. 7401–7671q]. This notice does not, however, alter or extend the limitation period for challenges of project decisions subject to previous notices published in the **Federal Register**. The projects and actions that are the subject of this notice are:

1. *Project name and location:* Long Slip Fill and Rail Enhancement Project, City of Jersey City, NJ. *Project sponsor:* New Jersey Transit Corporation (NJ TRANSIT). *Project description:* The proposed project would fill the Long Slip Canal in Hoboken Yard and construct six new elevated tracks, passenger platforms, and a passenger station and crew facility structure on top of the filled canal. The project would also include a walkway extension to existing Hoboken Terminal facilities and new track extensions to existing track. *Final agency actions:* Section 4(f) *de minimis* impact determination; Section 106 finding of no adverse effect; project-level air quality conformity; and a Finding of No Significant Impact, dated October 20, 2016. *Supporting Documentation:* Supplemental Environmental Assessment, dated June 2016.

2. *Project name and location:* Potomac Yard Metrorail Station Project, City of Alexandria, VA. *Project sponsor:* City of Alexandria. *Project description:* The proposed project would include a new Washington Metropolitan Area Transit Authority Metrorail station, associated track improvements, and pedestrian bridges at Potomac Yard within the City of Alexandria. The station would be located along the existing Metrorail Blue and Yellow Lines between the Ronald Regan Washington National Airport Metrorail Station and the Braddock Road Metrorail Station. *Final agency actions:* Section 4(f) determination; a Section 106 Memorandum of Agreement, dated October 24, 2016; project-level air quality conformity; and a Record of Decision, dated October 31, 2016. *Supporting documentation:* Final Environmental Impact Statement, dated June 1, 2016.

Lucy Garliauskas,

Associate Administrator Planning and Environment.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA), Public Law 104–13, Section 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501–3520), and its implementing regulations, 5 CFR part 1320, require Federal agencies to issue two notices seeking public comment on information collection activities before OMB may approve paperwork packages. 44 U.S.C. 3506, 3507; 5 CFR 1320.5, 1320.8(d)(1), 1320.12. On August 16, 2016, FTA published a 60-day notice (81 FR 54660) in the **Federal Register** soliciting comments on the ICR that the agency was seeking OMB approval. FTA received no comments after issuing this 60-day notice. Accordingly, DOT announces that these information collection activities have been re-evaluated and certified under 5 CFR 1320.5(a) and forwarded to OMB for review and approval pursuant to 5 CFR 1320.12(c).

Before OMB decides whether to approve these proposed collections of information, it must provide 30 days for public comment. 44 U.S.C. 3507(b); 5 CFR 1320.12(d). Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30 day notice is published. 44 U.S.C. 3507 (b)–(c); 5 CFR 1320.12(d); *see also* 60 FR 44978, 44983, Aug. 29, 1995. OMB believes that the 30 day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to

OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); *see also* 60 FR 44983, Aug. 29, 1995.

The summaries below describe the nature of the information collection requirements (ICRs) and the expected burden. The requirements are being submitted for clearance by OMB as required by the PRA.

Title: Transit Investments in Greenhouse Gas and Energy Reduction (TIGGER) Program.

OMB Control Number: 2132–0566.

Type of Request: Revision of a currently approved information collection.

Abstract: The American Recovery and Reinvestment Act of 2009 (ARRA) established the Transit Investments in Greenhouse Gas and Energy Reduction (TIGGER) Program with $100 million in new discretionary grant program funding to support public transit agencies in making capital investments that would assist in the reduction of energy consumption or greenhouse gas emissions within their public transportation systems. In two subsequent years, The Transportation, Housing and Urban Development, Related Agencies Appropriations Act, The Department of Defense and Full-Year Continuing Appropriations Act appropriated an additional $75 million and $49.9 million, respectively, for FY 2010 and FY 2011. The TIGGER Program has awarded 87 competitively selected projects, implementing a wide variety of technologies to meet program goals. The awarded projects were geographically diverse, covering 35 states and 67 different transit agencies in both urban and rural settings. Since there has been no new funding since 2011, the information that's currently being collected for this program is submitted as part of the Project Management reporting requirements for TIGGER. The collection of Project Management information provides documentation that the recipients of TIGGER funds are meeting program objectives and are complying with FTA Circular 5010.1D, ''Grant Management Requirements'' and other federal requirements. FTA has published a **Federal Register** notice for the Announcement of Project Selections for each NOFA in consecutive FY, 2009, 2010, and 2011, identifying program recipients.

Annual Estimated Total Burden Hours: 3,072 hours.

Comments Are Invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this notice in the **Federal Register**.

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Forms 8821 and 8821–A

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this

opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 8821, Tax Information Authorization and Form 8821–A, IRS Disclosure Authorization for Victims of Identity Theft.

DATES: Written comments should be received on or before January 17, 2017 to be assured of consideration.

ADDRESSES: Direct all written comments to Tuawana Pinkston, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Kerry Dennis at Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224, or through the Internet at *Kerry.Dennis@irs.gov*.

SUPPLEMENTARY INFORMATION:

Title: Tax Information Authorization and IRS Disclosure Authorization for Victims of Identity Theft.

OMB Number: 1545–1165.

Form Number: 8821 and 8821–A.

Abstract: Form 8821 is used to appoint someone to receive or inspect certain tax information. The information on the form is used to identify appointees and to ensure that confidential tax information is not divulged to unauthorized persons. Form 8821–A is an authorization signed by a taxpayer for the IRS to disclose returns and return information to local law enforcement in the event of a possible identity theft.

Current Actions: There are no changes being made to the forms at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households, business or other for-profit organizations, not for profit institutions, and farms.

Estimated Number of Respondents: 183,333.

Estimated Time per Respondent: 48 minutes.

Estimated Total Annual Burden Hours: 147,800.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: November 8, 2016.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Regulation Project

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning, Requirements to Ensure Collection of Section 2056A Estate Tax.

DATES: Written comments should be received on or before January 17, 2017 to be assured of consideration.

ADDRESSES: Direct all written comments to Tuawana Pinkston, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the regulations should be directed to Kerry Dennis at Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224, or through the Internet at *Kerry.Dennis@irs.gov*.

SUPPLEMENTARY INFORMATION:

Title: Requirements to Ensure Collection of Section 2056A Estate Tax.

OMB Number: 1545–1443.

Regulation Project Number: TD 8686.

Abstract: This regulation provides guidance relating to the additional requirements necessary to ensure the collection of the estate tax imposed under Internal Revenue Code section 2056A(b) with respect to taxable events involving qualified domestic trusts (QDOT'S). In order to ensure collection of the tax, the regulation provides various security options that may be selected by the trust and the requirements associated with each option. In addition, under certain circumstances the trust is required to file an annual statement with the IRS disclosing the assets held by the trust.

Current Actions: There is no change to this existing regulation.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households.

Estimated Number of Respondents: 4,390.

Estimated Time per Respondent: 1 hour, 23 minutes.

Estimated Total Annual Burden Hours: 6,070.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate

of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Regulation Project

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Arbitrage Restrictions on Tax-Exempt Bonds.

DATES: Written comments should be received on or before January 17, 2017 to be assured of consideration.

ADDRESSES: Direct all written comments to Tuawana Pinkston, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of regulations should be directed to Sara Covington at Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224, or through the Internet, at *Sara.L.Covington@irs.gov.*

SUPPLEMENTARY INFORMATION:

Title: Arbitrage Restrictions and Issue Price Definition for Tax-Exempt Bonds.

OMB Number: 1545–1347.

Regulation: TD 8476, TD 8718, TD 9777 and REG–138526–14 (NPRM).

Abstract: Section 148 of the Internal Revenue Code requires issuers of tax-exempt bonds to rebate certain arbitrage profits earned on nonpurpose investments acquired with the bond proceeds.

Under section 148(f), interest on a state or local bond is not tax exempt unless the issuer of the bond rebates to the United States arbitrage profits earned from investing proceeds of the bond in higher yielding nonpurpose investments. Form 8038–T is used to pay the arbitrage rebate to the United States and to pay penalty in lieu of rebates. Burden for the form is being reported under 1545–1219.

Issuers are also required to keep records of certain interest rate hedges so that the hedges are taken into account in determining arbitrage profits. Under

TD 8718, the scope of interest rate hedging transactions covered by the arbitrage regulations was broadened by requiring that hedges entered into prior to the sale date of the bonds are covered as well.

The collection of information in the proposed regulation (REG–138526–14) is in § 1.148–1(f)(2)(ii) which contains a requirement that the issuer obtain certifications and supporting documentation regarding the underwriter's sales of the issuer's bonds.

Current Actions: There is no change to the final regulations (TD 8476, TD 8718, TD 9777), and proposed Regulation 138526–14 to the information collection request.

Type of Review: Extension of a currently approved collection.

Affected Public: State, local or tribal governments.

Estimated Number of Respondents: 15,646

Estimated Number of Responses: 24,010.

Estimated Time per Respondent: 4 hours.

Estimated Total Annual Burden Hours: 94,326.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. DATES: Written comments should be received on or before January 17, 2017 to be assured of consideration.

ADDRESSES: Direct all written comments to Tuawana Pinkston, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the regulations should be directed to Allan Hopkins, at Internal Revenue Service, Room 6129, 1111 Constitution Avenue NW., Washington, DC 20224, or through the Internet at *Allan.M.Hopkins@irs.gov.*

SUPPLEMENTARY INFORMATION:

Title: Consolidated Groups and Controlled Groups-Intercompany Transactions and Related Rules, and Consolidated Groups-Intercompany Transactions and Related Rules.

OMB Number: 1545–1433.

Regulation Project Number: CO–11–91 (TD 8597), CO–24–95 (TD 8660.

Abstract: The regulations require common parents that make elections under regulation section 1.1502–13 to provide certain information. The information will be used to identify and assure that the amount, location, timing and attributes of intercompany transactions and corresponding items are properly maintained.

Current Actions: There is no change to this existing regulation.

Type of Review: Extension of currently approved collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 2,200.

Estimated Time per Respondent: 30 minutes.

Estimated Total Annual Reporting Burden Hours: 1,050.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: November 9, 2016.

Allan Hopkins,

Tax analyst.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Regulation Project

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning requirements for investments to qualify under section 936(d)(4) as investments in qualified Caribbean Basin countries.

DATES: Written comments should be received on or before January 17, 2017 to be assured of consideration.

ADDRESSES: Direct all written comments to Tuawana Pinkston, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the regulations should be directed to Allan Hopkins, at Internal Revenue Service, Room 6129, 1111 Constitution Avenue NW., Washington, DC 20224, or through the Internet at *Allan.M.Hopkins@irs.gov*.

SUPPLEMENTARY INFORMATION:

Title: Requirements for Investments To Qualify Under Section 936(d)(4) as Investments in Qualified Caribbean Basin Countries.

OMB Number: 1545–1138.

Regulation Project Number: TD 8350.

Abstract: The collection of information is required by the Internal

Revenue Service to verify that an investment qualifies under IRC section 936(d)(4). The recordkeepers will be possession corporations, certain financial institutions located in Puerto Rico, and borrowers of funds covered by this regulation.

Current Actions: There is no change to this existing regulation.

Type of Review: Extension of currently approved collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 50.

Estimated Time per Respondent: 30 minutes.

Estimated Total Annual Reporting Burden Hours: 1,500.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: November 9, 2016.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form 4952

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 4952, Investment Interest Expense Deduction.

DATES: Written comments should be received on or before January 17, 2017 to be assured of consideration.

ADDRESSES: Direct all written comments to Tuawana Pinkston, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of notice should be directed to Allan Hopkins at Internal Revenue Service, Room 6129, 1111 Constitution Avenue NW., Washington, DC 20224, or through the Internet, at *Allan.M.Hopkins@irs.gov*.

SUPPLEMENTARY INFORMATION: *Title:* Investment Interest Expense Deduction.

OMB Number: 1545–0191.

Notice Number: Form 4952.

Abstract: Individuals, estates, and trusts use Form 4952 to figure the amount of investment interest expense (interest paid on loans allocable to investment property) they can deduct and the amount they can carry forward to future years.

Current Actions: There are no changes being made to this collection at this time.

Type of Review: Extension of currently approved collection.

Affected Public: Individuals or households and business or other for-profit organizations.

Estimated Number of Respondents: 137,064.

Estimated Average Time per Respondent: 1 hour, 30 minutes.

Estimated Total Annual Burden Hours: 205,596.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. BILLING CODE 4830–01–P

FEDERAL REGISTER

Vol. 81 Thursday,
No. 222 November 17, 2016

Part II

Environmental Protection Agency

40 CFR Parts 9 and 721
Significant New Use Rules on Certain Chemical Substances; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 9 and 721

[EPA–HQ–OPPT–2016–0207; FRL–9953–41]

RIN 2070–AB27

Significant New Use Rules on Certain Chemical Substances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is promulgating significant new use rules (SNURs) under the Toxic Substances Control Act (TSCA) for 57 chemical substances which were the subject of premanufacture notices (PMNs). The applicable review periods for the PMNs submitted for these 57 chemical substances all ended prior to June 22, 2016 (*i.e.,* the date on which President Obama signed into law the Frank R. Lautenberg Chemical Safety for the 21st Century Act which amends TSCA). Thirty-four of these chemical substances are subject to TSCA section 5(e) consent orders issued by EPA. This action requires persons who intend to manufacture (defined by statute to include import) or process any of these 57 chemical substances for an activity that is designated as a significant new use by this rule to notify EPA at least 90 days before commencing that activity. The required notification initiates EPA's evaluation of the intended use within the applicable review period. Manufacture and processing for the significant new use is unable to commence until EPA has conducted a review of the notice, made an appropriate determination on the notice, and take such actions as are required with that determination.

DATES: This rule is effective on January 17, 2017. For purposes of judicial review, this rule shall be promulgated at 1 p.m. (e.s.t.) on December 1, 2016.

Written adverse or critical comments, or notice of intent to submit adverse or critical comments, on one or more of these SNURs must be received on or before December 19, 2016 (see Unit VI. of the **SUPPLEMENTARY INFORMATION**). If EPA receives written adverse or critical comments, or notice of intent to submit adverse or critical comments, on one or more of these SNURs December 19, 2016, EPA will withdraw the relevant sections of this direct final rule before its effective date.

For additional information on related reporting requirement dates, see Units I.A., VI., and VII. of the **SUPPLEMENTARY INFORMATION**.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2016–0207, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT:

For technical information contact: Kenneth Moss, Chemical Control Division (7405M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (202) 564–9232; email address: *moss.kenneth@epa.gov.*

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you manufacture, process, or use the chemical substances contained in this rule. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Manufacturers or processors of one or more subject chemical substances (NAICS codes 325 and 324110), *e.g.,* chemical manufacturing and petroleum refineries.

This action may also affect certain entities through pre-existing import certification and export notification rules under TSCA. Chemical importers are subject to the TSCA section 13 (15 U.S.C. 2612) import certification requirements promulgated at 19 CFR 12.118 through 12.127 and 19 CFR 127.28. Chemical importers must certify that the shipment of the chemical substance complies with all applicable rules and orders under TSCA. Importers of chemicals subject to these SNURs must certify their compliance with the SNUR requirements. The EPA policy in support of import certification appears at 40 CFR part 707, subpart B. In addition, any persons who export or intend to export a chemical substance that is the subject of this rule on or after December 19, 2016 are subject to the export notification provisions of TSCA section 12(b) (15 U.S.C. 2611(b)) (see § 721.20), and must comply with the export notification requirements in 40 CFR part 707, subpart D.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *http://www.epa.gov/dockets/comments.html.*

II. Background

A. What action is the Agency taking?

EPA is promulgating these SNURs using direct final procedures. These SNURs will require persons to notify EPA at least 90 days before commencing the manufacture or processing of a chemical substance for any activity designated by these SNURs as a significant new use. Receipt of such notices allows EPA to assess risks that may be presented by the intended uses and, if appropriate, to regulate the proposed use before it occurs. Additional rationale and background to these rules are more fully set out in the preamble to EPA's first direct final SNUR published in the **Federal Register** issue of April 24, 1990 (55 FR 17376).

Consult that preamble for further information on the objectives, rationale, and procedures for SNURs and on the basis for significant new use designations, including provisions for developing test data.

B. What is the Agency's authority for taking this action?

Section 5(a)(2) of TSCA (15 U.S.C. 2604(a)(2)) authorizes EPA to determine that a use of a chemical substance is a ''significant new use.'' EPA must make this determination by rule after considering all relevant factors, including the four bulleted TSCA section 5(a)(2) factors listed in Unit III. Once EPA determines that a use of a chemical substance is a significant new use, TSCA section 5(a)(1)(B) requires persons to submit a significant new use notice (SNUN) to EPA at least 90 days before they manufacture or process the chemical substance for that use (15 U.S.C. 2604(a)(1)(B)(i)). TSCA furthermore prohibits such manufacturing or processing from commencing until EPA has conducted a review of the notice, made an appropriate determination on the notice, and taken such actions as are required in association with that determination (15 U.S.C. 2604(a)(1)(B)(ii)). As described in Unit V., the general SNUR provisions are found at 40 CFR part 721, subpart A.

C. Applicability of General Provisions

General provisions for SNURs appear in 40 CFR part 721, subpart A. These provisions describe persons subject to the rule, recordkeeping requirements, exemptions to reporting requirements, and applicability of the rule to uses occurring before the effective date of the rule. Provisions relating to user fees appear at 40 CFR part 700. According to § 721.1(c), persons subject to these SNURs must comply with the same SNUN requirements and EPA regulatory procedures as submitters of PMNs under TSCA section 5(a)(1)(A). In particular, these requirements include the information submission requirements of TSCA section 5(b) and 5(d)(1), the exemptions authorized by TSCA sections 5(h)(1), (h)(2), (h)(3), and (h)(5), and the regulations at 40 CFR part 720. Once EPA receives a SNUN, EPA must either determine that the significant new use is not likely to present an unreasonable risk of injury or take such regulatory action as is associated with an alternative determination before the manufacture or processing for the significant new use can commence. If EPA determines that the significant new use is not likely to present an unreasonable risk, EPA is required under TSCA section 5(g) to make public, and submit for publication in the **Federal Register**, a statement of EPA's findings.

III. Significant New Use Determination

Section 5(a)(2) of TSCA states that EPA's determination that a use of a chemical substance is a significant new use must be made after consideration of all relevant factors, including:

- The projected volume of manufacturing and processing of a chemical substance.
- The extent to which a use changes the type or form of exposure of human beings or the environment to a chemical substance.
- The extent to which a use increases the magnitude and duration of exposure of human beings or the environment to a chemical substance.
- The reasonably anticipated manner and methods of manufacturing, processing, distribution in commerce, and disposal of a chemical substance.

In addition to these factors enumerated in TSCA section 5(a)(2), the statute authorized EPA to consider any other relevant factors.

To determine what would constitute a significant new use for the 57 chemical substances that are the subject of these SNURs, EPA considered relevant information about the toxicity of the chemical substances, likely human exposures and environmental releases associated with possible uses, and the four bulleted TSCA section 5(a)(2) factors listed in this unit.

IV. Substances Subject to This Rule

EPA is establishing significant new use and recordkeeping requirements for 57 chemical substances in 40 CFR part 721, subpart E. In this unit, EPA provides the following information for each chemical substance:

- PMN number.
- Chemical name (generic name, if the specific name is claimed as CBI).
- Chemical Abstracts Service (CAS) Registry number (if assigned for non-confidential chemical identities).
- Basis for the TSCA section 5(e) consent order or, for non-section 5(e) SNURs, the basis for the SNUR (*i.e.,* SNURs without TSCA section 5(e) consent orders).
- Tests recommended by EPA to provide sufficient information to evaluate the chemical substance (see Unit VIII. for more information).
- CFR citation assigned in the regulatory text section of this rule.

The regulatory text section of this rule specifies the activities designated as significant new uses. Certain new uses, including production volume limits (*i.e.,* limits on manufacture volume) and other uses designated in this rule, may be claimed as CBI. Unit IX. discusses a procedure companies may use to ascertain whether a proposed use constitutes a significant new use.

This rule includes 34 PMN substances that are subject to ''risk-based'' consent orders under TSCA section 5(e)(1)(A)(ii)(I) where EPA determined that activities associated with the PMN substances may present unreasonable risk to human health or the environment. Those consent orders require protective measures to limit exposures or otherwise mitigate the potential unreasonable risk. The so-called ''TSCA section 5(e) SNURs'' on these PMN substances are promulgated pursuant to § 721.160, and are based on and consistent with the provisions in the underlying consent orders. The TSCA section 5(e) SNURs designate as a ''significant new use'' the absence of the protective measures required in the corresponding consent orders.

Where EPA determined that the PMN substance may present an unreasonable risk of injury to human health via inhalation exposure, the underlying TSCA section 5(e) consent order usually requires, among other things, that potentially exposed employees wear specified respirators unless actual measurements of the workplace air show that air-borne concentrations of the PMN substance are below a New Chemical Exposure Limit (NCEL) that is established by EPA to provide adequate protection to human health. In addition to the actual NCEL concentration, the comprehensive NCELs provisions in TSCA section 5(e) consent orders, which are modeled after Occupational Safety and Health Administration (OSHA) Permissible Exposure Limits (PELs) provisions, include requirements addressing performance criteria for sampling and analytical methods, periodic monitoring, respiratory protection, and recordkeeping. However, no comparable NCEL provisions currently exist in 40 CFR part 721, subpart B, for SNURs. Therefore, for these cases, the individual SNURs in 40 CFR part 721, subpart E, will state that persons subject to the SNUR who wish to pursue NCELs as an alternative to the § 721.63 respirator requirements may request to do so under § 721.30. EPA expects that persons whose § 721.30 requests to use the NCELs approach for SNURs are approved by EPA will be required to comply with NCELs provisions that are comparable to those contained in the corresponding TSCA section 5(e) consent order for the same chemical substance.

This rule also includes SNURs on 23 PMN substances that are not subject to consent orders under TSCA section 5(e). These cases completed Agency review prior to June 22, 2016. Under TSCA, prior to the enactment of the Frank R. Lautenberg Chemical Safety for the 21st Century Act on June 22, 2016, EPA did not find that the use scenario described in the PMN triggered the determinations set forth under TSCA section 5(e). However, EPA does believe that certain changes from the use scenario described in the PMN could result in increased exposures, thereby constituting a ''significant new use.'' These so-called ''non-TSCA section 5(e) SNURs'' are consistent with the determination made at the time and are promulgated pursuant to § 721.170. EPA has determined that every activity designated as a ''significant new use'' in all non-TSCA section 5(e) SNURs issued under § 721.170 satisfies the two requirements stipulated in § 721.170(c)(2), *i.e.,* these significant new use activities, ''(i) are different from those described in the premanufacture notice for the substance, including any amendments, deletions, and additions of activities to the premanufacture notice, and (ii) may be accompanied by changes in exposure or release levels that are significant in relation to the health or environmental concerns identified'' for the PMN substance.

PMN Number P–11–482

Chemical name: Bimodal mixture consisting of multi-walled carbon nanotubes and other classes of carbon nanotubes (generic).

CAS number: Claimed confidential.

Effective date of TSCA section 5(e) consent order: September 30, 2015.

The PMN states that the generic use of the PMN substance will be as a specialty additive. Based on test data on analogous respirable, poorly soluble particulates and nanocarbon materials, EPA identified concerns for pulmonary toxicity and oncogenicity. Based on test data for other nanocarbon materials EPA identified concerns for environmental toxicity. The Order was issued under TSCA sections 5(e)(1)(A)(i) and 5(e)(1)(A)(ii)(I), based on a finding that the substance may present an unreasonable risk of injury to human health and the environment. To protect against these risks, the consent order requires:

1. Use of personal protective equipment involving impervious gloves and protective clothing (where there is a potential for dermal exposures) and a National Institute for Occupational Safety and Health (NIOSH)-certified air purifying, tight-fitting full-face respirator equipped with N–100, P–100, or R–100 cartridges, or power air purifying particulate respirator with an Assigned Protection Factor (APF) of at least 50 (where there is a potential for inhalation exposures).

2. Submission of a dustiness test within six months of notice of commencement of manufacture (NOC).

3. Submission of certain physical-chemical properties data within the time limits specified in the consent order.

4. Processing and use of the PMN substance only for the use specified in the consent order, including no application method that generates a vapor, mist or aerosol unless the application method occurs in an enclosed process.

5. No use of the PMN substance resulting in releases to surface waters and disposal of the PMN substance only by landfill or incineration.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Recommended testing: EPA has determined that the development of data on certain physical-chemical properties, as well as certain human health and environmental toxicity testing would help characterize possible effects of the substance. The submitter has agreed to provide a dustiness test (European Standard EU 15051) by six months from commencement of manufacture. In addition, the submitter has agreed to provide certain physical-chemical property testing as required in the consent order after the commencement of manufacture. Although the order does not require a 90-day inhalation toxicity test (OPPTS Test Guideline 870.3465 or Organisation for Economic Co-operation and Development (OECD) Test Guideline 413) in rats with a post-exposure observation period of up to 9 months (including BALF analysis, a determination of cardiovascular toxicity (clinically-based blood/plasma protein analyses), and histopathology of the heart), a two-year inhalation bioassay (OPPTS Test Guideline 870.4200), a daphnid chronic toxicity test (OPPTS Test Guideline 850.1300), a fish early-life stage toxicity test (OPPTS Test Guideline 850.1400), or an algal toxicity test (OCSPP Test Guideline 850.4500), the Order's restrictions on manufacture, processing, distribution in commerce, and disposal will remain in effect until the Order is modified or revoked by EPA based on submission of this or other relevant information.

CFR citation: 40 CFR 721.10927.

PMN Number P–12–292

Chemical name: Coke (coal), secondary pitch.

Definition: A carbon-containing residue from the coking of air blown pitch coke oil and/or pitch distillate. Composed primarily of isotropic carbon, it contains small amounts of sulfur and ash constituents.

CAS number: 94113–91–4.

Effective date of TSCA section 5(e) consent order: July 1. 2015.

Basis for TSCA section 5(e) consent order: The PMN states that the generic (non-confidential) use of the substance will be in the carbon graphite industry. Based on SAR analysis of test data on analogous respirable, poorly soluble particulates, subcategory carbon black, EPA identified concerns for lung effects and cancer to workers exposed to the PMN substance by the inhalation route. The Order was issued under TSCA sections 5(e)(1)(A)(i) and 5(e)(1)(A)(ii)(I) based on a finding that the substance may present an unreasonable risk of injury to human health. To protect against these risks, the consent order requires:

1. Use of personal protective equipment including a NIOSH-certified respirator with an APF of at least 50 or compliance with a NCEL of 0.0025 mg/m^3 as an 8-hour time-weighted average, when there is a potential for inhalation exposures.

2. Hazard communication. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the Material Safety Data Sheet (MSDS).

3. No domestic manufacture of the PMN substance.

4. Use of the PMN substances only for the confidential uses specified in the consent order.

5. Submission of certain toxicity testing on the PMN substance prior to exceeding the confidential production volume limit as specified in the consent order of the PMN substance.

The SNUR designates as a ''significant new use'' the absence of these protective measures.

Recommended testing: EPA has determined that the development of data on certain physical-chemical properties, as well as certain human health toxicity testing would help characterize possible effects of the substance. The submitter has agreed to provide the physical/chemical properties data and a 90-day inhalation toxicity test (OPPTS Test Guideline 870.3465) in rats with a post-exposure observation period of 60 days (including BALF analysis) before exceeding the

production volume limits in the consent order. Although the order does not require a two-year inhalation bioassay (OPPTS Test Guideline 870.4200), the Order's restrictions on manufacture, processing, distribution in commerce, and disposal will remain in effect until the Order is modified or revoked by EPA based on submission of this or other relevant information

CFR citation: 40 CFR 721.10928.

PMN Numbers P–13–718, P–13–719, P–13–720, P–13–721, P–14–655, P–14–656, P–14–657, and P–14–658

Chemical name: Single-walled carbon nanotubes (generic).

CAS number: Claimed confidential.

Effective date of TSCA section 5(e) consent order: July 1. 2015.

Basis for TSCA section 5(e) consent order: The PMNs state that the use of the PMN substances will be as: a semi-conductor, conductive, or resistive element in electronic circuitry and devices; an electro-mechanical switch in electronic circuitry and devices; a film laminate to improve structural, electrical or electro-chemical properties of composite materials; a film laminate to improve conductivity in batteries, capacitors and fuels cells; with composite materials to improve their mechanical properties and electrical conductivities; catalyst support for use in fuel cells; in a nanoporous network in gas diffusion layers; for separation of chemicals; an additive to improve corrosion resistance of metals; an additive in lubricants and greases to improve wear resistance; an additive for transparency and conductivity in electronic devices; an additive for fibers in structural and electrical applications; an additive for fibers in fabrics and as a chemical intermediate. Based on test data on analogous respirable, poorly soluble particulates and other carbon nanotubes, EPA identified concerns for pulmonary toxicity and oncogenicity. Based on test data for other carbon nanotubes, EPA identified concerns for environmental toxicity. The Order was issued under TSCA sections 5(e)(1)(A)(i) and 5(e)(1)(A)(ii)(I), based on a finding that the substances may present an unreasonable risk of injury to human health and the environment. To protect against these risks, the consent order requires:

1. Use of personal protective equipment involving impervious gloves and protective clothing (where there is a potential for dermal exposures) and a National Institute for Occupational Safety and Health (NIOSH)-certified air purifying, tight-fitting full-face respirator equipped with N–100, P–100, or R–100 cartridges, or power air purifying particulate respirator with an Assigned Protection Factor (APF) of at least 50 (where there is a potential for inhalation exposures).

2. Submission of certain physical-chemical data for the PMN substances within the time triggers specified in the consent order.

3. Submission of certain human health testing prior to exceeding the confidential production volume limit specified in the consent order.

4. Establishment of a medical surveillance program as specified in the consent order.

5. Processing and use of the PMN substances only for the uses specified in the consent order, including no application method that generates a vapor, mist or aerosol unless the application method occurs in an enclosed process.

6. No use of the PMN substances resulting in releases to surface waters and disposal of the PMN substances only by landfill or incineration.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Recommended testing: EPA has determined that the development of data on certain physical-chemical properties, as well as certain human health and environmental toxicity testing would help characterize possible effects of the substance. The submitter has agreed to provide the physical/chemical properties data within the specified time limits. In addition, the submitter has agreed not to exceed the confidential production limit without performing a 90-day inhalation toxicity test (OPPTS Test Guideline 870.3465 or OECD Test Guideline 413) in rats with a post-exposure observation period of up to 9 months (including BALF analysis, a determination of cardiovascular toxicity (clinically-based blood/plasma protein analyses), and histopathology of the heart). Although the order does not require a two-year inhalation bioassay (OPPTS Test Guideline 870.4200), a daphnid chronic toxicity test (OPPTS Test Guideline 850.1300), a fish early-life stage toxicity test (OPPTS Test Guideline 850.1400), or an algal toxicity test (OCSPP Test Guideline 850.4500), the Order's restrictions on manufacture, processing, distribution in commerce, and disposal will remain in effect until the Order is modified or revoked by EPA based on submission of this or other relevant information.

CFR citation: 40 CFR 721.10929.

PMN Numbers P–14–150, P–14–151, P–14–152, P–14–165, and P–14–166

Chemical name: Fatty acid amides (generic).

CAS number: Claimed confidential.

Basis for Action: The PMNs states that these substances will be used as chemical intermediates, additives for flotation products, and adhesion promoters for use in asphalt applications. Based on SAR analysis of test data on analogous amides and aliphatic amines, EPA expects toxicity to aquatic organisms may occur at concentrations that exceed 1 ppb of PMNs P–14–150 and P–14–165, 2 ppb of PMN P–16–166, and 4 ppb of PMNs P–14–151 and P–14–152 in surface waters. For the uses described in the PMNs, releases of the substances are not expected to result in surface water concentrations that exceed their respective concern concentration levels. Therefore, EPA has not determined that the proposed manufacturing, processing, or use of the substances may present an unreasonable risk. EPA has determined, however, that any use of the substances, excluding the uses described in the PMNs, resulting in releases to surface waters exceeding 1 ppb (P–15–150 and P–14–165), 2 ppb (P–16–166), or 4 ppb (P–15–151 and P–15–152) may result in significant adverse environmental effects. Based on this information, the PMN substances meet the concern criteria at § 721.170(b)(4)(ii).

Recommended testing: EPA has determined that the results of a fish acute toxicity test, freshwater and marine (OPPTS Test Guideline 850.1075); an aquatic invertebrate acute toxicity test (OPPTS Test Guideline 850.1010); and an algal toxicity test (OCSPP Test Guideline 850.4500) would help characterize the environmental effects of the PMN substances P–14–150, P–14–151, and P–14–152. Further, EPA has determined results of a fish early-life stage toxicity test (OPPTS Test Guideline 850.1400); a daphnid chronic toxicity test (OPPTS Test Guideline 850.1300); an algal toxicity test (OCSPP Test Guideline 850.4500); log Kow and water solubility measurements, as well as either the fish acute toxicity mitigated by humic acid test (OPPTS Test Guideline 850.1085) or the whole sediment acute toxicity invertebrates, freshwater test (OPPTS Test Guideline 850.1735) would help characterize the environmental effects of the PMN substances P–14–165 and P–14–166. EPA also recommends that the guidance document on aquatic toxicity testing of difficult substances and mixtures (OECD Test Guideline 23) be followed to

facilitate solubility in the test media, because of the low water solubility of the PMNs. EPA recommends conducting the water solubility and log Kow measurements testing first as the results may mitigate the need for further toxicity testing or change the testing recommendations.

CFR citation: 40 CFR 721.10930.

PMN Number P–14–413

Chemical name: Kaolin, reaction products with polysiloxane (generic).

CAS number: Claimed confidential.

Effective date of TSCA section 5(e) consent order: October 22, 2015.

Basis for TSCA section 5(e) consent order: The PMN states that the generic (non-confidential) use of the substance will be as an insulator. Based on SAR analysis of test data on analogous respirable, poorly soluble particulates, EPA identified concerns for lung effects to workers exposed to the PMN substance by the inhalation route. The Order was issued under TSCA sections 5(e)(1)(A)(i) and 5(e)(1)(A)(ii)(I) based on a finding that the substance may present an unreasonable risk of injury to human health. To protect against these risks, the consent order requires:

1. Use of personal protective equipment including a NIOSH-certified respirator with an APF of at least 1,000 or compliance with a NCEL of 0.1 mg/m^3 as an 8-hour time-weighted average, when there is a potential for inhalation exposures.

2. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the MSDS.

3. Submission of a 90-day inhalation study on the PMN substance prior to exceeding the confidential production volume limit as specified in the consent order of the PMN substance.

The SNUR designates as a ''significant new use'' the absence of these protective measures.

Recommended testing: The submitter has agreed to provide a 90-day inhalation toxicity test (OPPTS Test Guideline 870.3465) in rats with a post-exposure observation period of 60 days (including BALF analysis) before exceeding the production volume limit in the consent order. Although the order does not require a two-year inhalation bioassay (OPPTS Test Guideline 870.4200), the Order's restrictions on manufacture, processing, distribution in commerce, and disposal will remain in effect until the Order is modified or revoked by EPA based on submission of this or other relevant information.

CFR citation: 40 CFR 721.10931.

PMN Numbers P–14–428, P–14–429, P–14–430, and P–14–431

Chemical name: Fatty acid amides (generic).

CAS number: Claimed confidential.

Basis for Action: The consolidated PMN states that the substances will be used as adhesion promoters and emulsifier intermediates for use in asphalt applications. Based on SAR analysis of test data on analogous aliphatic amines, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 1 ppb of P–14–428 and P–14–430, and 2 ppb of P–14–429 and P–14–431 in surface waters. For the uses described in the PMNs, releases of the substances are not expected to result in surface water concentrations that exceed their respective concentration values. Therefore, EPA has not determined that the proposed manufacturing, processing, or use of the substances may present an unreasonable risk. EPA has determined, however, that any use of the substances, excluding the uses described in the PMNs, resulting in releases to surface waters exceeding 1 ppb of P–14–428 and P–14–430, and 2 ppb of P–14–429 and P–14–431, may cause significant adverse environmental effects. Based on this information, the PMN substances meet the concern criteria at § 721.170(b)(4)(ii).

Recommended testing: EPA has determined that the results of a fish early-life stage toxicity test (OPPTS Test Guideline 850.1400); a daphnid chronic toxicity test (OPPTS Test Guideline 850.1300); and an algal toxicity test (OCSPP Test Guideline 850.4500) would help characterize the environmental effects of the PMN substances.

CFR citation: 40 CFR 721.10932.

PMN Numbers P–14–523, P–14–524, P–14–525, P–14–526, and P–14–527

Chemical name: Copolymers of perfluorinated and alkyl methacrylates (generic).

CAS number: Claimed confidential.

Effective date of TSCA section 5(e) consent order: August 24, 2015.

Basis for TSCA section 5(e) consent order: The PMNs state that the generic (non-confidential) use of the substances will be as additives for textile finishing. Based on physical-chemical properties data, as well as test data on analogous perfluorinated chemicals and potential perfluorinated degradation products, EPA identified concerns for irritation to skin, eyes, lungs, mucous membranes, lung toxicity, liver toxicity, blood toxicity, male reproductive toxicity, immunosupression, and oncogenicity. EPA has concerns that these degradation products will persist in the environment, could bioaccumulate or biomagnify, and could be toxic (PBT) to people, wild mammals, and birds. The Order was issued under TSCA sections 5(e)(1)(A)(i), 5(e)(1)(A)(ii)(I), and 5(e)(1)(A)(ii)(II) based on a finding that the substances may present an unreasonable risk of injury to the environment and human health, the substances may be produced in substantial quantities and may reasonably be anticipated to enter the environment in substantial quantities, and there may be significant (or substantial) human exposure to the substances and their potential degradation products. To protect against these exposures and risks, the consent order requires:

1. Use of personal protective equipment including a NIOSH-certified respirator when there is a potential for inhalation exposures.

2. Risk notification. If as a result of the test data required, the company becomes aware that the PMN substances may present a risk of injury to human health or the environment, the company must incorporate this new information, and any information on methods for protecting against such risk into an MSDS, within 90 days.

3. Manufacture of the PMN substances: (a) According to the chemical composition section of the consent order, including analyzing and reporting certain starting raw material impurities to EPA; and (b) within the maximum established limits of certain fluorinated impurities of the PMN substance as stated in the consent order.

4. Submission of certain toxicity, physical-chemical property, and environmental fate testing on the PMN substance prior to exceeding the confidential production volume limits as specified in the consent order.

5. Use of the PMN substances only for water and oil repellent use on military protective clothing.

6. No distribution of the PMN substances for consumer use.

7. No manufacture of the PMN substances in the United States.

8. No water releases of the PMN substances exceeding 17 ppb.

Recommended testing: EPA has determined that the results of certain toxicity and environmental fate testing would help characterize the PMN substance. The submitter has agreed to complete the testing identified in the testing section of the consent order by the confidential limits specified. In addition, EPA has determined that the results of a 90-day inhalation toxicity test in rats (OPPTS Test Guideline 870.3465/OECD Test Guideline 413)

with a 60-day holding period, and an avian reproduction test (OECD Test Guideline 206) in mallard ducks would help characterize potential human health and environmental effects of the PMN substances. The Order does not require this testing at any specified time or production volume. However, the Order's restrictions on manufacture, processing, distribution in commerce, use, and disposal of the PMN substances will remain in effect until the Order is modified or revoked by EPA based on submission of that or other relevant information.

CFR citation: 40 CFR 721.10933.

PMN Number P–14–580

Chemical name: Alkenoic acid, polymer with alkyl alkenoate, alkylalkylalkenoate, alkenoic acid and tridecafluoro alkylalkenoate, compds. with alkylaminoalcanol (generic).

CAS number: Claimed confidential.

Effective date of TSCA section 5(e) consent order: October 21, 2015.

Basis for TSCA section 5(e) consent order: The PMN states that the generic (non-confidential) use of the substance will be as a coating additive. Based on physical chemical properties data, as well as test data on analogous perfluorinated chemicals and potential perfluorinated degradation products, EPA identified concerns for irritation to skin, eyes, lungs, mucous membranes, lung toxicity, liver toxicity, blood toxicity, male reproductive toxicity, immunosupression, and oncogenicity. EPA has concerns that these degradation products will persist in the environment, could bioaccumulate or biomagnify, and could be toxic (PBT) to people, wild mammals, and birds. The Order was issued under TSCA sections 5(e)(1)(A)(i), 5(e)(1)(A)(ii)(I), and 5(e)(1)(A)(ii)(II) based on a finding that the substance may present an unreasonable risk of injury to the environment and human health, the substance may be produced in substantial quantities and may reasonably be anticipated to enter the environment in substantial quantities, and there may be significant (or substantial) human exposure to the substance and its potential degradation products. To protect against these exposures and risks, the consent order requires:

1. Use of a NIOSH-certified respirator when there is a potential for inhalation exposures.

2. Use of impervious gloves where there is a potential for dermal exposures.

3. Risk notification. If as a result of the test data required, the company becomes aware that the PMN substances may present a risk of injury to human health or the environment, the company must incorporate this new information, and any information on methods for protecting against such risk into an MSDS, within 90 days.

4. Manufacture of the PMN substance: (a) According to the chemical composition section of the consent order, including analyzing and reporting certain starting raw material impurities to EPA; and (b) within the maximum established limits of certain fluorinated impurities of the PMN substance as stated in the consent order.

5. Submission of certain toxicity, physical-chemical property, and environmental fate testing on the PMN substance prior to exceeding the confidential production volume limits as specified in the consent order.

6. Use of the PMN substance only for the confidential uses specified in the consent order.

Recommended testing: EPA has determined that the results of certain toxicity and environmental fate testing would help characterize the PMN substance. The submitter has agreed to complete the testing identified in the testing section of the consent order by the confidential limits specified. In addition, EPA has determined that the results of a hydrolysis as a function of pH and temperature (OPPTS Test Guideline 835.2130); an indirect photolysis screening test (OPPTS Test Guideline 835.5270); a modified semi-continuous activated sludge (SCAS) test (OPPTS Test Guideline 835.5045 or OECD Test Guideline 302A) with analysis of degradation products; a simulation test-aerobic sewage treatment (activated sludge units) OECD Test Guideline OECD 303A); a phototransformation of chemicals in soils surfaces (Draft OECD Test Guideline Jan. 2002); an acute inhalation toxicity test (OPPTS Test Guideline 870.1300); and a fish short-term reproduction test (OPPTS Test Guideline 890.1350) would help characterize potential human health and environmental effects of the PMN substances. The Order does not require this testing at any specified time or production volume. However, the Order's restrictions on manufacture, processing, distribution in commerce, use, and disposal of the PMN substances will remain in effect until the Order is modified or revoked by EPA based on submission of that or other relevant information.

CFR citation: 40 CFR 721.10934.

PMN Number P–14–643

Chemical name: Titanium oxide compound (generic).

CAS number: Claimed confidential.

Effective date of TSCA section 5(e) consent order: July 15, 2015.

Basis for TSCA section 5(e) consent order: The PMN states that the generic (non-confidential) use of the substance will be as a physical characteristics modifier for composite articles. Based on SAR analysis of test data on analogous respirable, poorly soluble particulates, EPA identified concerns for lung effects to workers exposed to the PMN substance by the inhalation route. The Order was issued under TSCA sections 5(e)(1)(A)(i) and 5(e)(1)(A)(ii)(I) based on a finding that the substance may present an unreasonable risk of injury to human health. To protect against these risks, the consent order requires:

1. Use of personal protective equipment including a NIOSH-certified respirator with an APF of at least 10 or compliance with a NCEL of 2.4 mg/m^3 as an 8-hour time-weighted average, when there is a potential for inhalation exposures.

2. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the MSDS.

3. Submission of a 90-day inhalation study on the PMN substance prior to exceeding the production volume limit specified in the consent order of the PMN substance.

The SNUR designates as a ''significant new use'' the absence of these protective measures.

Recommended testing: The submitter has agreed to provide a 90-day inhalation toxicity test (OPPTS Test Guideline 870.3465) in rats with a post-exposure observation period of 60 days (including BALF analysis) before exceeding the production volume limit in the consent order. Although the order does not require a two-year inhalation bioassay (OPPTS Test Guideline 870.4200), the Order's restrictions on manufacture, processing, distribution in commerce, and disposal will remain in effect until the Order is modified or revoked by EPA based on submission of this or other relevant information.

CFR citation: 40 CFR 721.10935.

PMN Numbers P–14–688, P–14–689, P–14–690, and P–14–691

Chemical name: Fatty acid amide hydrochlorides (generic).

CAS number: Claimed confidential.

Basis for Action: The PMNs state that the substances will be used as surfactants for use in asphalt emulsions. Based on SAR analysis of test data on analogous aliphatic amines, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed

1 ppb for P–14–688, P–14–689, P–14–690, and 2 ppb for P–14–691 in surface waters. For the uses described in the PMNs, releases of the substances are not expected to result in surface water concentrations that exceed their respective concern concentration levels. Therefore, EPA has not determined that the proposed manufacturing, processing, or use of the substances may present an unreasonable risk. EPA has determined, however, that any use of the substances, excluding the uses described in the PMNs, resulting in releases to surface waters exceeding 1 ppb for P–14–688, P–14–689, P–14–690, and 2 ppb for P–14–691, may result in significant adverse environmental effects. Based on this information, the PMN substances meet the concern criteria at § 721.170(b)(4)(ii).

Recommended testing: EPA has determined that the results of a fish early-life stage toxicity test (OPPTS Test Guideline 850.1400); a daphnid chronic toxicity test (OPPTS Test Guideline 850.1300); and an algal toxicity test (OCSPP Test Guideline 850.4500) would help characterize the environmental effects of the PMN substances. EPA recommends that testing be conducted on P–14–688.

CFR citation: 40 CFR 721.10936.

PMN Numbers P–14–712, P–14–713, P–14–714, and P–14–715

Chemical names: Plastics, wastes, pyrolyzed, bulk pyrolysate (generic) (P–14–712); Plastics, wastes, pyrolyzed, light distillate (generic) (P–14–713); Plastics, wastes, pyrolyzed, middle distillate (generic) (P–14–714); and Plastics, wastes, pyrolyzed, heavy distillate (generic) (P–14–715).

CAS numbers: Claimed confidential.

Effective date of TSCA section 5(e) consent order: July 27, 2015.

Basis for TSCA section 5(e) consent order: The PMNs state that the generic (non-confidential) use of P–14–712 is a petroleum blend stock, of P–14–713 and P–14–714 is a fuel blend stock, and of P–14–715 is a component of grease or wax products. Based on the presence of benzene and naphthalene, EPA identified concerns for oncogenicity, immunotoxicity, liver toxicity, and blood toxicity. There is also a concern that polychlorinated dibenzo-p-dioxins and dibenzofurans could be present in the PMN substances. The Order was issued under TSCA sections 5(e)(1)(A)(i) and 5(e)(1)(A)(ii)(I), based on a finding that the substances may present an unreasonable risk of injury to human health and the environment. To protect against these risks, the consent order requires:

1. Use of a NIOSH-certified respirator with an APF of at least 10 (where there is a potential for inhalation exposures) or, as an alternative, maintaining workplace airborne concentrations of the chemical substances identified in the consent order at a level below the specified Exposure Limit (EL) of 0.1 ppm and 10 ppm respectively for an 8-hour time weighted average.

2. Use of the PMN substances only for the uses specified in the consent order.

3. Manufacture P–14–712 only as described in the PMN.

4. Provide personal protective equipment to workers to prevent dermal exposure, where there is a potential for dermal exposures.

5. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the MSDS.

6. Record and report on a quarterly basis polychlorinated dibenzo-p-dioxin and dibenzofuran levels for P–14–712.

Recommended testing: EPA has determined that quarterly testing of polychlorinated dibenzo-p-dioxin and dibenzofuran levels for P–14–712 will characterize potential health effects of the PMN substances.

CFR citations: 40 CFR 721.10937 (P–14–712); 40 CFR 721.10938 (P–14–713); 40 CFR 721.10939 (P–14–714); and 40 CFR 721.10940 (P–14–715).

PMN Number P–15–28

Chemical name: Carbon silicon oxide.

CAS number: 39345–87–4.

Effective date of TSCA section 5(e) consent order: September 22, 2015.

Basis for TSCA section 5(e) consent order: The PMN states that the generic (non-confidential) use of P–15–28 is a colorant for industrial, architecture, plastics, inks and automotive applications. Based on the presence on data on structurally analogous poorly soluble particulates, EPA identified concerns for lung overload. The Order was issued under TSCA sections 5(e)(1)(A)(i), 5(e)(1)(A)(ii)(I), and 5(e)(1)(A)(ii)(II), based on a finding that the substance may present an unreasonable risk of injury to human health, and that the substance will be produced in substantial quantities and may reasonably be anticipated to enter the environment in substantial quantities, and there may be significant (or substantial) human exposure to the substance. To protect against these risks, the consent order requires:

1. Use of personal protective equipment including a NIOSH-certified respirator with an APF of at least 10 or compliance with a NCEL of 6 mg/m^3 as an 8-hour time-weighted average, when there is a potential for inhalation exposures.

2. Hazard communication. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the MSDS.

3. Manufacture of the PMN substance only as described in the Consent Order.

4. Submission of certain toxicity testing on the PMN substance within two years of submission of the NOC, as specified in the consent order of the PMN substance.

Recommended testing: EPA has determined that the results of a 90-day inhalation toxicity study, with a 60-day holding period (OPPTS Test Guideline 870.3465), would help characterize human health and environmental effects of the PMN substance. The submitter has agreed to conduct this test within two years of submission of the Notice of Commencement of Manufacture (NOC). EPA has also determined that the results of a Chronic Toxicity test (OPPTS Test Guideline 870.4100) via the inhalation route would further help characterize human health effects of the PMN substance, The Order does not require this testing at any specified time or production volume. However, the Order's restrictions on manufacture, processing, distribution in commerce, use, and disposal of the PMN substance will remain in effect until the Order is modified or revoked by EPA based on submission of that or other relevant information.

CFR citation: 40 CFR 721.10941.

PMN Number P–15–54

Chemical name: Carbon nanotubes (generic).

CAS number: Claimed confidential.

Effective date of TSCA section 5(e) consent order: August 31, 2015.

Basis for TSCA section 5(e) consent order: The PMN states that the generic (non-confidential) use of the PMN substance will be as a chemical intermediate. Based on test data on analogous respirable, poorly soluble particulates and carbon nanotubes, EPA identified concerns for pulmonary toxicity and oncogenicity. Based on test data for other nanocarbon materials EPA identified concerns for environmental toxicity. The Order was issued under TSCA sections 5(e)(1)(A)(i) and 5(e)(1)(A)(ii)(I), based on a finding that the substance may present an unreasonable risk of injury to human health and the environment. To protect against these risks, the consent order requires:

1. Use of personal protective equipment involving impervious gloves and protective clothing (where there is

a potential for dermal exposures) and a National Institute for Occupational Safety and Health (NIOSH)-certified air purifying, tight-fitting full-face respirator equipped with N–100, P–100, or R–100 cartridges, or power air purifying particulate respirator with an Assigned Protection Factor (APF) of at least 50 (where there is a potential for inhalation exposures).

2. Submission of certain physical chemical properties according to the time limits described in the order.

3. Submission of a 90-day inhalation study within one year of notice of commencement.

4. Use of the PMN substance only as a chemical intermediate.

5. No use of the PMN substance resulting in releases to surface waters and disposal of the PMN substance only by landfill or incineration.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Recommended testing: EPA has determined that the development of data on certain physical-chemical properties, as well as certain human health and environmental toxicity testing would help characterize possible effects of the substance. The submitter has agreed to provide the results of certain physical-chemical property testing annually for at least three years after the commencement of manufacture. The submitter has also agreed to provide the results of a 90-day inhalation toxicity study already being conducted. Although the order does not require a daphnid chronic toxicity test (OPPTS Test Guideline 850.1300), a fish early-life stage toxicity test (OPPTS Test Guideline 850.1400), or an algal toxicity test (OCSPP Test Guideline 850.4500), the Order's restrictions on manufacture, processing, distribution in commerce, and disposal will remain in effect until the Order is modified or revoked by EPA based on submission of this or other relevant information.

CFR citation: 40 CFR 721.10942.

PMN Number P–15–149

Chemical name: Sulfonated alkylbenzene salts (generic).

CAS number: Claimed confidential.

Effective date of TSCA section 5(e) consent order: September 15, 2015.

Basis for TSCA section 5(e) consent order: The PMN states that the generic (non-confidential) use of the substance will be for enhanced oil recovery. Based on test data on analogous surfactants, EPA identified concerns for surfactant effects on the lung and irritation to eyes and mucous membranes. Further, based on structural activity relationship (SAR) analysis of test data on analogous anionic surfactants, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 2 ppb of the PMN substance in surface waters. The Order was issued under TSCA sections 5(e)(1)(A)(i) and 5(e)(1)(A)(ii)(I) based on a finding that the substance may present an unreasonable risk of injury to human health and the environment. To protect against these risks, the consent order requires:

1. Hazard communication. Establishment and use of a hazard communication program, including environmental and human health precautionary statements on each label and in the MSDS.

2. Submission of certain toxicity testing on the PMN substance prior to exceeding the confidential production volume limit as specified in the consent order of the PMN substance.

3. Use of the PMN substance only for the confidential use specified in the consent order.

4. Comply with the release to water provisions specified in the consent order.

The SNUR designates as a ''significant new use'' the absence of these protective measures.

Recommended testing: EPA has determined that the results of a fish acute toxicity test, freshwater and marine (OPPTS Test Guideline 850.1075); an acute invertebrate toxicity test, freshwater daphnids (OPPTS Test Guideline 850.1010); and an algal toxicity test (OCSPP Test Guideline 850.4500) would help characterize the environmental effects of the PMN substance. The submitter has agreed to complete this testing by the confidential production volume identified in the consent order. In addition, EPA has determined that the results of a fish early-life stage toxicity test (OPPTS Test Guideline 850.1400); a daphnid chronic toxicity test (OPPTS Test Guideline 850.1300); acute inhalation toxicity test (OPPTS Test Guideline 870.1300); acute eye irritation test (OPPTS Test Guideline 870.2400); and acute dermal irritation test (OPPTS Test Guideline OPPTS 870.2500) would help characterize the potential environmental and human health effects of the PMN substance. The Order does not require these tests at any specified time or production volume. However, the Order's restrictions on manufacture, processing, distribution in commerce, use, and disposal of the PMN substance will remain in effect until the Order is modified or revoked by EPA based on submission of that or other relevant information.

CFR citation: 40 CFR 721.10943.

PMN Number P–15–267

Chemical name: Substituted quinoline derivative (generic).

CAS number: Claimed confidential.

Basis for Action: The PMN states that the generic (non-confidential) use of the substance will be as a pesticide additive. Based on test data on the PMN substance, EPA identified concerns for chronic toxicity including blood, kidney, and spleen toxicity. As described in the PMN, occupational exposures are expected to be minimal due to the use of adequate personal protective equipment. Therefore, EPA has not determined that the proposed manufacturing, processing, or use of the substance may present an unreasonable risk. EPA has determined, however, that use of the substance without use of impervious dermal protection where there is potential for dermal exposures, use of a NIOSH-certified respirator with an APF of at least 10, where there is a potential for inhalation exposures, and use other than as a pesticide additive may result in serious health effects. Based on this information, the PMN substance meets the concern criteria at § 721.170(b)(3)(i).

Recommended testing: EPA has determined that the results of a 90-day inhalation toxicity test (OPPTS Test Guideline 870.3465) would help characterize the human health effects of the PMN substance.

CFR citation: 40 CFR 721.10944.

PMN Number P–15–470

Chemical name: Algal oil amide (generic).

CAS number: Claimed confidential.

Basis for Action: The PMN states that the generic (non-confidential) use of the substance will be as a chemical intermediate. Based on SAR analysis of test data on analogous aliphatic amines, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 2 ppb of the PMN substance in surface waters for greater than 20 days per year. This 20-day criterion is derived from partial life cycle tests (daphnid chronic and fish early life stage tests) that typically range from 21 to 28 days in duration. EPA predicts toxicity to aquatic organisms may occur if releases of the substance to surface water, from uses other than as described in the PMN, exceed releases from the use described in the PMN. For the use described in the PMN, environmental releases did not exceed 2 ppb for more than 20 days per year. Therefore, EPA has not determined that the proposed manufacturing, processing, or use of the substance may present an unreasonable risk. EPA has determined, however, that

any use of the substance other than as listed in the PMN may result in significant adverse environmental effects. Based on this information, the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).

Recommended testing: EPA has determined that the results of a fish acute toxicity test, freshwater and marine (OPPTS Test Guideline 850.1075); an acute invertebrate toxicity test, freshwater daphnids (OPPTS Test Guideline 850.1010); and an algal toxicity test (OCSPP Test Guideline 850.4500) would help characterize the environmental effects of the PMN substance.

CFR citation: 40 CFR 721.10945.

PMN Number P–15–485

Chemical name: Bismuth compound (generic).

CAS number: Claimed confidential.

Effective date of TSCA section 5(e) consent order: December 21, 2015.

Basis for TSCA section 5(e) consent order: The PMN states that the generic (non-confidential) use of the substance will be as an additive for industrial coatings. Based on SAR analysis of test data on analogous respirable, poorly soluble particulates, EPA identified concerns for lung toxicity. The Order was issued under TSCA sections 5(e)(1)(A)(i) and 5(e)(1)(A)(ii)(I) based on a finding that the substance may present an unreasonable risk of injury to human health. To protect against these risks, the consent order requires:

1. Use of personal protective equipment including a NIOSH-certified respirator with an APF of at least 10 or compliance with a NCEL of 2.4 mg/m^3 as an 8-hour time-weighted average, when there is a potential for inhalation exposures.

2. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the MSDS.

3. Submission of certain toxicity testing on the PMN substance prior to exceeding the production volume limit as specified in the consent order.

The SNUR designates as a ''significant new use'' the absence of these protective measures.

Recommended testing: EPA has determined that the results of a 90-day inhalation toxicity test (OPPTS Test Guideline 870.3465) with special attention to histopathology (inflammation and cell proliferation) of the lung tissues and various parameters of the bronchoalveolar lavage fluid (BALF) (*e.g.,* maker enzyme activities, total protein content, total cell count, cell differential, and cell viability) would help to characterize the health effects of the PMN substance. The submitter has agreed to complete this testing by the aggregate production volume identified in the consent order. In addition, EPA has determined that the results of a 2-year inhalation bioassay (OCSPP Test Guideline 870.4200) would help characterize the potential human health effects of the PMN substance. The Order does not require this test at any specified time or production volume. However, the Order's restrictions on manufacture, processing, distribution in commerce, use, and disposal of the PMN substance will remain in effect until the Order is modified or revoked by EPA based on submission of that or other relevant information.

CFR citation: 40 CFR 721.10946.

PMN Numbers P–15–612, P–15–613, P–15–614, P–15–615, P–15–616, P–15–617, and P–15–618

Chemical names: Sulfur thulium ytterbium yttrium oxide (P–15–612); Gadolinium sulfur ytterbium yttrium oxide, erbium- and thulium-doped (P–15–613); Neodymium sulfur yttrium oxide (P–15–614); Erbium gadolinium neodymium sulfur ytterbium yttrium oxide (P–15–615); Erbium gadolinium sulfur ytterbium yttrium oxide (P–15–616); Erbium gadolinium ytterbium oxide (P–15–617); and Erbium gadolinium sulfur ytterbium oxide (P–15–618).

CAS numbers: 180189–40–6 (P–15–612); 1651187–84–6 (P–15–613); 1651158–45–5 (P–15–614); 1651152–96–3 (P–15–615); 1622295–07–1 (P–15–616); 1651152–05–4 (P–15–617); and 934388–91–7 (P–15–618).

Effective date of TSCA section 5(e) consent order: December 21, 2015.

Basis for TSCA section 5(e) consent order: The PMNs state that the use of the substances will be as additives for brand protection and anti-counterfeiting inks and polymers. Based on SAR analysis of test data on analogous respirable, poorly soluble particulates, EPA identified concerns for lung toxicity. The Order was issued under TSCA sections 5(e)(1)(A)(i) and 5(e)(1)(A)(ii)(I) based on a finding that the substance may present an unreasonable risk of injury to human health. To protect against these risks, the consent order requires:

1. Use of personal protective equipment including a NIOSH-certified respirator with an APF of at least 10 or compliance with a NCEL of 0.07 mg/m^3 as an 8-hour time-weighted average, when there is a potential for inhalation exposures.

2. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the MSDS.

3. Submission of certain toxicity testing on the PMN substances prior to exceeding the production volume limit as specified in the consent order.

The SNUR designates as a ''significant new use'' the absence of these protective measures.

Recommended testing: EPA has determined that the results of a 90-day inhalation toxicity test (OPPTS Test Guideline 870.3465) with special attention to histopathology (inflammation and cell proliferation) of the lung tissues and various parameters of the bronchoalveolar lavage fluid (BALF) (*e.g.,* maker enzyme activities, total protein content, total cell count, cell differential, and cell viability) would help to characterize the health effects of the PMN substances. The submitter has agreed to complete this testing by the aggregate production volume identified in the consent order. In addition, EPA has determined that the results of a 2-year inhalation bioassay (OCSPP Test Guideline 870.4200) would help characterize the potential human health effects of the PMN substances. The Order does not require this test at any specified time or production volume. However, the Order's restrictions on manufacture, processing, distribution in commerce, use, and disposal of the PMN substances will remain in effect until the Order is modified or revoked by EPA based on submission of that or other relevant information.

CFR citations: 40 CFR 721.10947 (P–15–612); 40 CFR 721.10948 (P–15–613); 40 CFR 721.10949 (P–15–614); 40 CFR 721.10950 (P–15–615); 40 CFR 721.10951 (P–15–616); 40 CFR 721.10952 (P–15–617); and 40 CFR 721.10953 (P–15–618).

PMN Number P–15–655

Chemical names: 2-Ethylhexanoic acid, compound with alkyamino cyclohexane (generic) (P–15–0655, chemical A); and 2-Ethylhexanoic acid, compound with cyclohexylamine (generic) (P–15–0655, chemical B).

CAS numbers: Claimed confidential.

Basis for Action: The PMN states that the generic (non-confidential) use of the substances will be as an epoxy curing agent. Based on SAR analysis of test data on analogous aliphatic amines, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 34 ppb of the PMN substances in surface waters. As described in the PMN, releases of the substances are not expected to result in surface water concentrations that exceed 34 ppb. Therefore, EPA has not

determined that the proposed manufacturing, processing, or use of the substance may present an unreasonable risk. EPA has determined, however, that any use of the substances that results in releases to surface water concentrations exceeding 34 ppb may cause significant adverse environmental effects. Based on this information, the PMN substances meet the concern criteria at § 721.170(b)(4)(ii).

Recommended testing: EPA has determined that the results of a fish acute toxicity test, freshwater and marine (OPPTS Test Guideline 850.1075); an acute invertebrate toxicity test, freshwater daphnids (OPPTS Test Guideline 850.1010); and an algal toxicity test (OCSPP Test Guideline 850.4500) would help characterize the environmental effects of the PMN substances.

CFR citation: 40 CFR 721.10954.

PMN Number P–15–680

Chemical name: Propenoic acid, alkyl ester, polymer with 1,3-cyclohexanedialkylamine, reaction products with oxirane(alkoxyalkyl) (generic).

CAS number: Claimed confidential.

Basis for Action: The PMN states that the generic (non-confidential) use of the substance will be as an ingredient in liquid paint coating. Based on data on the PMN substance as well as SAR analysis of test data on analogous aliphatic amines, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 1 ppb of the PMN substance in surface waters. As described in the PMN, releases of the substance are not expected to result in surface water concentrations that exceed 1 ppb. Therefore, EPA has not determined that the proposed manufacturing, processing, or use of the substance may present an unreasonable risk. EPA has determined, however, that any use of the substance that results in releases to surface water concentrations exceeding 1 ppb may result in significant adverse environmental effects. Based on this information, the PMN substance meets the concern criteria at § 721.170(b)(4)(i) and (b)(4)(ii).

Recommended testing: EPA has determined that the results of an activated sludge sorption isotherm test (OPPTS Test Guideline 835.1110); a fish early-life stage toxicity test (OPPTS Test Guideline 850.1400); and a daphnid chronic toxicity test (OPPTS Test Guideline 850.1300) would help characterize the environmental effects of the PMN substance.

CFR citation: 40 CFR 721.10955.

PMN Number P–15–691

Chemical name: Acrylic acid, polymer with polyalkylene polyamine (generic).

CAS number: Claimed confidential.

Basis for Action: The PMN states that the use of the substance will be as a chemical intermediate. Based on data on the PMN substance and SAR analysis of test data on analogous polycationic polymers, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 5 ppb of the PMN substance in surface waters for greater than 20 days per year. This 20-day criterion is derived from partial life cycle tests (daphnid chronic and fish early life stage tests) that typically range from 21 to 28 days in duration. EPA predicts toxicity to aquatic organisms may occur if releases of the substance to surface water, from uses other than as described in the PMN, exceed releases from the use described in the PMN. For the use described in the PMN, environmental releases did not exceed 5 ppb for more than 20 days per year. Therefore, EPA has not determined that the proposed manufacturing, processing, or use of the substance may present an unreasonable risk. EPA has determined, however, that any use of the substance other than as listed in the PMN may result in significant adverse environmental effects. Based on this information, the PMN substance meets the concern criteria at § 721.170(b)(4)(i) and (b)(4)(ii).

Recommended testing: EPA has determined that the results of a Zahn-Wellens/EMPA Test (OPPTS Test Guideline 835.3200); a fish early-life stage toxicity test (OPPTS Test Guideline 850.1400); a fish acute-toxicity test (OPPTS Test Guideline 850.1085) mitigated by humic acid test; and a daphnid chronic toxicity test (OPPTS Test Guideline 850.1300); would help characterize the environmental effects of the PMN substance. EPA recommends that the fate testing be performed first as the results may mitigate the need for further toxicity testing or change the testing recommendations.

CFR citation: 40 CFR 721.10956.

PMN Number P–16–30

Chemical name: 1,2-Cyclohexanedicarboxylic acid, 1-(2-phenylhydrazide).

CAS number: 1807977–72–5.

Basis for Action: The PMN states that the substance will be used as a curing agent in anaerobic adhesive and sealant formulations. Based on test data on analogous hydrazines, EPA identified concerns for blood toxicity, neurotoxicity, oncogenicity, and mutagenicity. Hydrazides are expected to be positive in the chromosome aberration test and positive for lung sensitization. Based on the presence of a free acid, irritation to moist tissue (eyes, lungs, and mucous membranes) is expected. As described in the PMN, occupational exposures are expected to be minimal due to the use of adequate personal protective equipment. Therefore, EPA has not determined that the proposed manufacturing, processing, or use of the substance may present an unreasonable risk. EPA has determined, however, that use of the substance without use of impervious gloves and impervious clothing where there is a potential for dermal exposures, may result in serious health effects. Based on this information, the PMN substance meets the concern criteria at § 721.170(b)(1)(i)(C) and (b)(3)(ii).

Recommended testing: EPA has determined that the results of a 90-day dermal toxicity test (OPPTS Test Guideline 870.3250) and a carcinogenicity test (OPPTS Test Guideline 870.4200) by the expected route of exposure in two species of rodents, would help characterize the human health effects of the PMN substance.

CFR citation: 40 CFR 721.10957.

PMN Number P–16–52

Chemical name: 2,5-Furandione, dihydro-, polymer with 1,1'-iminobis[2-propanol], benzoate (ester), N-benzoyl derivs.

CAS number: 592479–38–4.

Basis for Action: The PMN states that the generic (non-confidential) use of the substance will be as printing ink. Based on SAR analysis of test data on analogous esters and amides, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 5 ppb of the PMN substance in surface waters. As described in the PMN, releases of the substance are not expected to result in surface water concentrations that exceed 5 ppb. Therefore, EPA has not determined that the proposed manufacturing, processing, or use of the substance may present an unreasonable risk. EPA has determined, however, that any use of the substance resulting in surface water concentrations exceeding 5 ppb may cause significant adverse environmental effects. Based on this information, the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).

Recommended testing: EPA has determined that the results of a fish acute toxicity test, freshwater and marine (OPPTS Test Guideline

850.1075); an acute invertebrate toxicity test, freshwater daphnids (OPPTS Test Guideline 850.1010); and an algal toxicity test (OCSPP Test Guideline 850.4500) would help characterize the environmental effects of the PMN substance.

CFR citation: 40 CFR 721.10958.

PMN Numbers P–16–56 and P–16–57

Chemical name: Dialkyl fattyalkylamino propanamide alkylamine acetates (generic).

CAS number: Claimed confidential.

Basis for Action: The PMNs state that the generic (non-confidential) use of the substances is in oil production. Based on SAR analysis of test data on analogous aliphatic amines, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 1 ppb of the PMN substances in surface waters. As described in the PMNs, releases of the substances are not expected to result in surface water concentrations that exceed 1 ppb. Therefore, EPA has not determined that the proposed manufacturing, processing, or use of the substances may present an unreasonable risk. EPA has determined, however, that any use of the substances that results in releases to surface water concentrations exceeding 1 ppb may cause significant adverse environmental effects. Based on this information, the PMN substances meets the concern criteria at § 721.170(b)(4)(i).

Recommended testing: EPA has determined that the results of a fish early-life stage toxicity test (OPPTS Test Guideline 850.1400); a mysid chronic toxicity test (OPPTS Test Guideline 850.1350); and an algal toxicity test (OCSPP Test Guideline 850.4500) would help characterize the environmental effects of the PMN substances.

CFR citation: 40 CFR 721.10959.

PMN Number P–16–58

Chemical name: Dialkylaminopropylaminopropanoate ester (generic).

CAS number: Claimed confidential.

Basis for Action: The PMN states that the substance will be used as a chemical intermediate. Based on SAR analysis of test data on analogous aliphatic amines, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 14 ppb of the PMN substance in surface waters. As described in the PMN, releases of the substance are not expected to result in surface water concentrations that exceed 14 ppb. Therefore, EPA has not determined that the proposed manufacturing, processing, or use of the substance may present an unreasonable risk. EPA has determined, however, that any use of the substance resulting in surface water concentrations exceeding 14 ppb may cause significant adverse environmental effects. Based on this information, the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).

Recommended testing: EPA has determined that the results of a fish acute toxicity test, freshwater and marine (OPPTS Test Guideline 850.1075); an acute invertebrate toxicity test, freshwater daphnids (OPPTS Test Guideline 850.1010); and an algal toxicity test (OCSPP Test Guideline 850.4500) would help characterize the environmental effects of the PMN substance.

CFR citation: 40 CFR 721.10960.

V. Rationale and Objectives of the Rule

A. Rationale

During review of the PMNs submitted for the chemical substances that are subject to these SNURs, EPA concluded that for 34 of the 57 chemical substances, regulation was warranted under TSCA section 5(e), pending the development of information sufficient to make reasoned evaluations of the health or environmental effects of the chemical substances. The basis for such findings is outlined in Unit IV. Based on these findings, TSCA section 5(e) consent orders requiring the use of appropriate exposure controls were negotiated with the PMN submitters. The SNUR provisions for these chemical substances are consistent with the provisions of the TSCA section 5(e) consent orders. These SNURs are promulgated pursuant to § 721.160 (see Unit VI.).

In the other 23 cases, where the uses are not regulated under a TSCA section 5(e) consent order, EPA determined that one or more of the criteria of concern established at § 721.170 were met, as discussed in Unit IV.

B. Objectives

EPA is issuing these SNURs for specific chemical substances which have undergone premanufacture review because the Agency wants to achieve the following objectives with regard to the significant new uses designated in this rule:

- EPA will receive notice of any person's intent to manufacture or process a listed chemical substance for the described significant new use before that activity begins.
- EPA will have an opportunity to review and evaluate data submitted in a SNUN before the notice submitter begins manufacturing or processing a listed chemical substance for the described significant new use.
- EPA will be able to either determine that the prospective manufacture or processing is not likely to present an unreasonable risk, or to take necessary regulatory action associated with any other determination, before the described significant new use of the chemical substance occurs.
- EPA will ensure that all manufacturers and processors of the same chemical substance that is subject to a TSCA section 5(e) consent order are subject to similar requirements.

Issuance of a SNUR for a chemical substance does not signify that the chemical substance is listed on the TSCA Chemical Substance Inventory (TSCA Inventory). Guidance on how to determine if a chemical substance is on the TSCA Inventory is available on the Internet at *http://www.epa.gov/opptintr/existingchemicals/pubs/tscainventory/index.html.*

VI. Direct Final Procedures

EPA is issuing these SNURs as a direct final rule, as described in § 721.160(c)(3) and § 721.170(d)(4). In accordance with § 721.160(c)(3)(ii) and § 721.170(d)(4)(i)(B), the effective date of this rule is January 17, 2017 without further notice, unless EPA receives written adverse or critical comments, or notice of intent to submit adverse or critical comments before December 19, 2016.

If EPA receives written adverse or critical comments, or notice of intent to submit adverse or critical comments, on one or more of these SNURs before December 19, 2016, EPA will withdraw the relevant sections of this direct final rule before its effective date. EPA will then issue a proposed SNUR for the chemical substance(s) on which adverse or critical comments were received, providing a 30-day period for public comment.

This rule establishes SNURs for a number of chemical substances. Any person who submits adverse or critical comments, or notice of intent to submit adverse or critical comments, must identify the chemical substance and the new use to which it applies. EPA will not withdraw a SNUR for a chemical substance not identified in the comment.

VII. Applicability of Rule to Uses Occurring Before Effective Date of the Final Rule

To establish a significant new use, EPA must determine that the use is not ongoing. The chemical substances subject to this rule have undergone premanufacture review. In cases where EPA has not received a notice of commencement (NOC) and the chemical

substance has not been added to the TSCA Inventory, no person may commence such activities without first submitting a PMN. Therefore, for chemical substances for which an NOC has not been submitted EPA concludes that the designated significant new uses are not ongoing.

When chemical substances identified in this rule are added to the TSCA Inventory, EPA recognizes that, before the rule is effective, other persons might engage in a use that has been identified as a significant new use. However, TSCA section 5(e) consent orders have been issued for 34 of the 57 chemical substances, and the PMN submitters are prohibited by the TSCA section 5(e) consent orders from undertaking activities which would be designated as significant new uses. The identities of 46 of the 57 chemical substances subject to this rule have been claimed as confidential and EPA has received no post-PMN *bona fide* submissions (per §§ 720.25 and 721.11). Based on this, the Agency believes that it is highly unlikely that any of the significant new uses described in the regulatory text of this rule are ongoing.

Therefore, EPA designates November 9, 2016 (the date of public release/web posting of this rule) as the cutoff date for determining whether the new use is ongoing. This designation varies slightly from EPA's past practice of designating the date of **Federal Register** publication as the date for making this determination. The objective of EPA's approach has been to ensure that a person could not defeat a SNUR by initiating a significant new use before the effective date of the direct final rule. In developing this rule, EPA has recognized that, given EPA's practice of now posting rules on its Web site a week or more in advance of **Federal Register** publication, this objective could be thwarted even before that publication. Thus, EPA has slightly modified its approach in this rulemaking and plans to follow this modified approach in future significant new use rulemakings.

Persons who begin commercial manufacture or processing of the chemical substances for a significant new use identified as of that date would have to cease any such activity upon the effective date of the final rule. To resume their activities, these persons would have to first comply with all applicable SNUR notification requirements and wait until the notice review period, including any extensions, expires. If such a person met the conditions of advance compliance under § 721.45(h), the person would be considered exempt from the requirements of the SNUR. Consult the **Federal Register** document of April 24, 1990 for a more detailed discussion of the cutoff date for ongoing uses.

VIII. Development and Submission of Information

EPA recognizes that TSCA section 5 does not require developing any particular new information (*e.g.,* generating test data) before submission of a SNUN. There is an exception: development of test data is required where the chemical substance subject to the SNUR is also subject to a rule, order or consent agreement under TSCA section 4 (see TSCA section 5(b)(1)).

In the absence of a TSCA section 4 test rule covering the chemical substance, persons are required only to submit information in their possession or control and to describe any other information known to or reasonably ascertainable by them (see 40 CFR 720.50). However, upon review of PMNs and SNUNs, the Agency has the authority to require appropriate testing. In cases where EPA issued a TSCA section 5(e) consent order that requires or recommends certain testing, Unit IV. lists those tests. Unit IV. also lists recommended testing for non-5(e) SNURs. Descriptions of tests are provided for informational purposes. EPA strongly encourages persons, before performing any testing, to consult with the Agency pertaining to protocol selection. To access the OCSPP test guidelines referenced in this document electronically, please go to *http://www.epa.gov/ocspp* and select ''Test Methods and Guidelines.'' The Organisation for Economic Co-operation and Development (OECD) test guidelines are available from the OECD Bookshop at *http://www.oecdbookshop.org* or SourceOECD at *http://www.sourceoecd.org.* ASTM International standards are available at *http://www.astm.org/Standard/index.shtml.*

In the TSCA section 5(e) consent orders for several of the chemical substances regulated under this rule, EPA has established production volume limits in view of the lack of data on the potential health and environmental risks that may be posed by the significant new uses or increased exposure to the chemical substances. These limits cannot be exceeded unless the PMN submitter first submits the results of toxicity tests that would permit a reasoned evaluation of the potential risks posed by these chemical substances. Under recent TSCA section 5(e) consent orders, each PMN submitter is required to submit each study at least 14 weeks (earlier TSCA section 5(e) consent orders required submissions at least 12 weeks) before reaching the specified production limit. Listings of the tests specified in the TSCA section 5(e) consent orders are included in Unit IV. The SNURs contain the same production volume limits as the TSCA section 5(e) consent orders. Exceeding these production limits is defined as a significant new use. Persons who intend to exceed the production limit must notify the Agency by submitting a SNUN at least 90 days in advance of commencement of non-exempt commercial manufacture or processing.

The recommended tests specified in Unit IV. may not be the only means of addressing the potential risks of the chemical substance. However, submitting a SNUN without any test data may increase the likelihood that EPA will take action under TSCA section 5(e), particularly if satisfactory test results have not been obtained from a prior PMN or SNUN submitter. EPA recommends that potential SNUN submitters contact EPA early enough so that they will be able to conduct the appropriate tests.

SNUN submitters should be aware that EPA will be better able to evaluate SNUNs which provide detailed information on the following:

- Human exposure and environmental release that may result from the significant new use of the chemical substances.
- Potential benefits of the chemical substances.
- Information on risks posed by the chemical substances compared to risks posed by potential substitutes.

IX. Procedural Determinations

By this rule, EPA is establishing certain significant new uses which have been claimed as CBI subject to Agency confidentiality regulations at 40 CFR part 2 and 40 CFR part 720, subpart E. Absent a final determination or other disposition of the confidentiality claim under 40 CFR part 2 procedures, EPA is required to keep this information confidential. EPA promulgated a procedure to deal with the situation where a specific significant new use is CBI, at 40 CFR 721.1725(b)(1).

Under these procedures a manufacturer or processor may request EPA to determine whether a proposed use would be a significant new use under the rule. The manufacturer or processor must show that it has a *bona fide* intent to manufacture or process the chemical substance and must identify the specific use for which it intends to manufacture or process the chemical substance. If EPA concludes that the person has shown a *bona fide* intent to

manufacture or process the chemical substance, EPA will tell the person whether the use identified in the *bona fide* submission would be a significant new use under the rule. Since most of the chemical identities of the chemical substances subject to these SNURs are also CBI, manufacturers and processors can combine the *bona fide* submission under the procedure in § 721.1725(b)(1) with that under § 721.11 into a single step.

If EPA determines that the use identified in the *bona fide* submission would not be a significant new use, *i.e.,* the use does not meet the criteria specified in the rule for a significant new use, that person can manufacture or process the chemical substance so long as the significant new use trigger is not met. In the case of a production volume trigger, this means that the aggregate annual production volume does not exceed that identified in the *bona fide* submission to EPA. Because of confidentiality concerns, EPA does not typically disclose the actual production volume that constitutes the use trigger. Thus, if the person later intends to exceed that volume, a new *bona fide* submission would be necessary to determine whether that higher volume would be a significant new use.

X. SNUN Submissions

According to § 721.1(c), persons submitting a SNUN must comply with the same notification requirements and EPA regulatory procedures as persons submitting a PMN, including submission of test data on health and environmental effects as described in 40 CFR 720.50. SNUNs must be submitted on EPA Form No. 7710–25, generated using e-PMN software, and submitted to the Agency in accordance with the procedures set forth in 40 CFR 720.40 and § 721.25. E–PMN software is available electronically at *http://www.epa.gov/opptintr/newchems.*

XI. Economic Analysis

EPA has evaluated the potential costs of establishing SNUN requirements for potential manufacturers and processors of the chemical substances subject to this rule. EPA's complete economic analysis is available in the docket under docket ID number EPA–HQ–OPPT–2016–0207.

XII. Scientific Standards, Evidence, and Available Information

EPA has used scientific information, technical procedures, measures, methods, protocols, methodologies, and models consistent with the risk assessment documents included in the public docket. These information sources supply information relevant to whether a particular use would be a significant new use, based on relevant factors including those listed under TSCA section 5(a)(2).

The clarity and completeness of the data, assumptions, methods, quality assurance, and analyses employed in EPA's decision are documented, as applicable and to the extent necessary for purposes of this significant new use rule, in Unit II and in the documents noted above. EPA recognizes, based on the available information, that there is variability and uncertainty in whether any particular significant new use would actually present an unreasonable risk. For precisely this reason, it is appropriate to secure a future notice and review process for these uses, at such time as they are known more definitely. The extent to which the various information, procedures, measures, methods, protocols, methodologies or models used in EPA's decision have been subject to independent verification or peer review is adequate to justify their use, collectively, in the record for a significant new use rule.

XIII. Statutory and Executive Order Reviews

A. Executive Order 12866

This action establishes SNURs for several new chemical substances that were the subject of PMNs, or TSCA section 5(e) consent orders. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled ''Regulatory Planning and Review'' (58 FR 51735, October 4, 1993).

B. Paperwork Reduction Act (PRA)

According to PRA (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to a collection of information that requires OMB approval under PRA, unless it has been approved by OMB and displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register**, are listed in 40 CFR part 9, and included on the related collection instrument or form, if applicable. EPA is amending the table in 40 CFR part 9 to list the OMB approval number for the information collection requirements contained in this action. This listing of the OMB control numbers and their subsequent codification in the CFR satisfies the display requirements of PRA and OMB's implementing regulations at 5 CFR part 1320. This Information Collection Request (ICR) was previously subject to public notice and comment prior to OMB approval, and given the technical nature of the table, EPA finds that further notice and comment to amend it is unnecessary. As a result, EPA finds that there is ''good cause'' under section 553(b)(3)(B) of the Administrative Procedure Act (5 U.S.C. 553(b)(3)(B)) to amend this table without further notice and comment.

The information collection requirements related to this action have already been approved by OMB pursuant to PRA under OMB control number 2070–0012 (EPA ICR No. 574). This action does not impose any burden requiring additional OMB approval. If an entity were to submit a SNUN to the Agency, the annual burden is estimated to average between 30 and 170 hours per response. This burden estimate includes the time needed to review instructions, search existing data sources, gather and maintain the data needed, and complete, review, and submit the required SNUN.

Send any comments about the accuracy of the burden estimate, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques, to the Director, Collection Strategies Division, Office of Environmental Information (2822T), Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001. Please remember to include the OMB control number in any correspondence, but do not submit any completed forms to this address.

C. Regulatory Flexibility Act (RFA)

On February 18, 2012, EPA certified pursuant to RFA section 605(b) (5 U.S.C. 601 *et seq.*), that promulgation of a SNUR does not have a significant economic impact on a substantial number of small entities where the following are true:

1. A significant number of SNUNs would not be submitted by small entities in response to the SNUR.

2. The SNUR submitted by any small entity would not cost significantly more than $8,300.

A copy of that certification is available in the docket for this action.

This action is within the scope of the February 18, 2012 certification. Based on the Economic Analysis discussed in Unit XI. and EPA's experience promulgating SNURs (discussed in the certification), EPA believes that the following are true:

- A significant number of SNUNs would not be submitted by small entities in response to the SNUR.
- Submission of the SNUN would not cost any small entity significantly more than $8,300.

Therefore, the promulgation of the SNUR would not have a significant economic impact on a substantial number of small entities.

D. Unfunded Mandates Reform Act (UMRA)

Based on EPA's experience with proposing and finalizing SNURs, State, local, and Tribal governments have not been impacted by these rulemakings, and EPA does not have any reasons to believe that any State, local, or Tribal government will be impacted by this action. As such, EPA has determined that this action does not impose any enforceable duty, contain any unfunded mandate, or otherwise have any effect on small governments subject to the requirements of UMRA sections 202, 203, 204, or 205 (2 U.S.C. 1501 *et seq.*).

E. Executive Order 13132

This action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999).

F. Executive Order 13175

This action does not have Tribal implications because it is not expected to have substantial direct effects on Indian Tribes. This action does not significantly nor uniquely affect the communities of Indian Tribal governments, nor does it involve or impose any requirements that affect Indian Tribes. Accordingly, the requirements of Executive Order 13175, entitled ''Consultation and Coordination with Indian Tribal Governments'' (65 FR 67249, November 9, 2000), do not apply to this action.

G. Executive Order 13045

This action is not subject to Executive Order 13045, entitled ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), because this is not an economically significant regulatory action as defined by Executive Order 12866, and this action does not address environmental health or safety risks disproportionately affecting children.

H. Executive Order 13211

This action is not subject to Executive Order 13211, entitled ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001), because this action is not expected to affect energy supply, distribution, or use and because this action is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

In addition, since this action does not involve any technical standards, NTTAA section 12(d) (15 U.S.C. 272 note), does not apply to this action.

J. Executive Order 12898

This action does not entail special considerations of environmental justice related issues as delineated by Executive Order 12898, entitled ''Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations'' (59 FR 7629, February 16, 1994).

XIV. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects

40 CFR Part 9

Environmental protection, Reporting and recordkeeping requirements.

40 CFR Part 721

Environmental protection, Chemicals, Hazardous substances, Reporting and recordkeeping requirements.

Dated: November 3, 2016.

Maria J. Doa,

Director, Chemical Control Division, Office of Pollution Prevention and Toxics.

Therefore, 40 CFR parts 9 and 721 are amended as follows:

PART 9—[AMENDED]

■ 1. The authority citation for part 9 continues to read as follows:

Authority: 7 U.S.C. 135 *et seq.,* 136–136y; 15 U.S.C. 2001, 2003, 2005, 2006, 2601–2671; 21 U.S.C. 331j, 346a, 348; 31 U.S.C. 9701; 33 U.S.C. 1251 *et seq.,* 1311, 1313d, 1314, 1318, 1321, 1326, 1330, 1342, 1344, 1345(d) and (e), 1361; E.O. 11735, 38 FR 21243, 3 CFR, 1971–1975 Comp. p. 973; 42 U.S.C. 241, 242b, 243, 246, 300f, 300g, 300g–1, 300g–2, 300g–3, 300g–4, 300g–5, 300g–6, 300j–1, 300j–2, 300j–3, 300j–4, 300j–9, 1857 *et seq.,* 6901–6992k, 7401–7671q, 7542, 9601–9657, 11023, 11048.

■ 2. In § 9.1, add the following sections in numerical order under the undesignated center heading ''Significant New Uses of Chemical Substances'' to read as follows:

§ 9.1 OMB approvals under the Paperwork Reduction Act.

PART 721—[AMENDED]

■ 3. The authority citation for part 721 continues to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

■ 4. Add § 721.10927 to subpart E to read as follows:

§ 721.10927 Bimodal mixture consisting of multi-walled carbon nanotubes and other classes of carbon nanotubes (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a bimodal mixture

consisting of multi-walled carbon nanotubes and other classes of carbon nanotubes (PMN P–11–482) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(2)(ii), (a)(3), (a)(4), (a)(6) (particulate), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible. A National Institute for Occupational Safety and Health (NIOSH)-certified air purifying, tight-fitting full-face respirator equipped with N–100, P–100, or R–100 cartridges, or power air purifying particulate respirator with an Assigned Protection Factor (APF) of at least 50 meets the requirements of § 721.63(a)(4).

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) and (q). A significant new use is any use involving an application method that generates a vapor, mist or aerosol.

(iii) *Disposal.* Requirements as specified in § 721.85(a)(1), (a)(2), (b)(1), (b)(2), (c)(1), and (c)(2).

(iv) *Release to water.* Requirements as specified in § 721.90(a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (e), (i), (j), and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(ii) of this section.

■ 5. Add § 721.10928 to subpart E to read as follows:

§ 721.10928 Coke (coal), secondary pitch; a carbon-containing residue from the coking of air blown pitch coke oil and/or pitch distillate; composed primarily of isotropic carbon, it contains small amounts of sulfur and ash constituents.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as coke (coal), secondary pitch. Definition: A carbon-containing residue from the coking of air blown pitch coke oil and/or pitch distillate. Composed primarily of isotropic carbon, it contains small amounts of sulfur and ash constituents (PMN P–12–292; CAS No. 94113–91–4) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4), (a)(6)(particulate), (b)(concentration set at 0.1 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible. A National Institute for Occupational Safety and Health (NIOSH)-certified air purifying, tight-fitting full-face respirator equipped with N–100, P–100, or R–100 cartridges, or power air purifying particulate respirator with an Assigned Protection Factor (APF) of at least 50 meets the requirements of § 721.63(a)(4).

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) consent order for this substance. The NCEL is 0.0025 mg/m^3 as an 8-hour time weighted average. Persons who wish to pursue NCELs as an alternative to § 721.63 respirator requirements may request to so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) consent order.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e)(concentration set at 0.1 percent), (f), (g)(1)(vii), (g)(2)(ii), (g)(2)(iv), (g)(1)(This substance may cause lung effects), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f), (k), and (q).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (d), and (f) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 6. Add § 721.10929 to subpart E to read as follows:

§ 721.10929 Single-walled carbon nanotubes (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as single walled carbon nanotubes (PMNs P–13–718, P–13–719, P–13–720, P–13–721, P–14–655, P–14–656, P–14–657, and P–14–658) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this rule do not apply to the PMN substance when it is embedded or incorporated into a polymer matrix that itself has been reacted (cured), embedded in a permanent solid polymer form that is not intended to undergo further processing, except mechanical processing, or incorporated into an article as defined at 40 CFR 720.3(c).

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(2)(ii), (a)(3), (a)(4), (a)(6)(particulate), (b), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible. A National Institute for Occupational Safety and Health (NIOSH)-certified air purifying, tight-fitting full-face respirator equipped with N–100, P–100, or R–100 cartridges, or power air purifying particulate respirator with an Assigned Protection Factor (APF) of at least 50 meets the requirements of § 721.63(a)(4).

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k)(A significant new use is use other than as: A semi-conductor, conductive, or resistive element in electronic circuitry and devices; an electro-mechanical switch in electronic circuitry and devices; a film laminate to improve structural,

electrical or electro-chemical properties of composite materials; a film laminate to improve conductivity in batteries, capacitors and fuels cells; with composite materials to improve their mechanical properties and electrical conductivities; catalyst support for use in fuel cells; in a nanoporous network in gas diffusion layers; for separation of chemicals; an additive to improve corrosion resistance of metals; an additive in lubricants and greases to improve wear resistance; an additive for transparency and conductivity in electronic devices; an additive for fibers in structural and electrical applications; an additive for fibers in fabrics and as a chemical intermediate) and (q). A significant new use is any use involving an application method that generates a vapor, mist or aerosol unless such application method occurs in an enclosed process. An enclosed process is defined as an operation that is designed and operated so that there is no release associated with normal or routine production processes into the environment of any substance present in the operation. An operation with inadvertent or emergency pressure relief releases remains an enclosed process so long as measures are taken to prevent worker exposure to and environmental contamination from the releases.

(iii) *Disposal.* Requirements as specified in § 721.85(a)(1), (a)(2), (b)(1), (b)(2), (c)(1), and (c)(2).

(iv) *Release to water.* Requirements as specified in § 721.90(a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (e), (i), (j), and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(ii) of this section.

■ 7. Add § 721.10930 to subpart E to read as follows:

§ 721.10930 Fatty acid amides (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as fatty acid amides (PMNs P–14–150, P–14–151, P–14–152, P–14–165, and P–14–166) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80. A significant new use of the substances is any use other than as chemical intermediates, additives for flotation products, or adhesion promoters for use in asphalt applications where the surface water concentrations described under paragraph (a)(3)(i) of this section are exceeded.

(ii) [Reserved]

(3) The significant new uses for any use other than as chemical intermediates, additives for flotation products, or adhesion promoters for use in asphalt applications are:

(i) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where (N=1 for PMNs P–15–150 and P–14–165), (N=2 for PMN P–14–166), and (N=4 for PMNs P–14–151 and P–14–152).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), (i), and (k) are applicable to manufacturers and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 8. Add § 721.10931 to subpart E to read as follows:

§ 721.10931 Kaolin, reaction products with polysiloxane (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as kaolin, reaction products with polysiloxane (PMN P–14–413) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4), (a)(6) (particulate), (b) (concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible. A NIOSH-certified powered air purifying full facepiece respirator with an Assigned Protection Factor (APF) of at least 1,000 equipped with an appropriate gas/vapor (acid gas, organic vapor, or substance specific) cartridge in combination with HEPA filters or a NIOSH-certified continuous flow supplied air respirator equipped with a full facepiece meet the requirements of § 721.63(a)(4).

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) consent order for this substance. The NCEL is 0.1 mg/m^3 as an 8-hour time weighted average. Persons who wish to pursue NCELs as an alternative to § 721.63 respirator requirements may request to do so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) consent order.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a), through (e) (concentration set at 1.0 percent), (f), (g)(1)(ii), (g)(2)(ii), (g)(2)(iii), (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(q).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (d), and (f), through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 9. Add § 721.10932 to subpart E to read as follows:

§ 721.10932 Fatty acid amides (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as fatty acid amides (PMNs P–14–428, P–14–429, P–14–430, and P–14–431) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as

specified in § 721.80. A significant new use of the substances is any use other than as emulsifier intermediates or adhesion promoters for use in asphalt applications where the surface water concentrations described under paragraph (a)(3)(i) of this section are exceeded.

(ii) [Reserved]

(3) The significant new uses for any use other than as emulsifier intermediates or adhesion promoters for use in asphalt applications are:

(i) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where (N=1 for PMNs P–14–428 and P–14–429) and (N=2 for PMNs P–14–429 and P–14–431).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), (i), and (k) are applicable to manufacturers and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 10. Add § 721.10933 to subpart E to read as follows:

§ 721.10933 Copolymers of perfluorinated and alkyl methacrylates (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as copolymers of perfluorinated and alkyl methacrylates (PMNs P–14–523, P–14–524, P–14–525, P–14–526, and P–14–527) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4), (a)(6) (particulate, gas/vapor or a combination gas/vapor and particulate)), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f), (k) (analysis and reporting and limitations of maximum impurity levels of certain impurities), (o) and (q). It is a significant new use to use the PMN substance other than for water and oil repellent use on military protective clothing.

(iii) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=17.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (e), and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(ii) of this section.

■ 11. Add § 721.10934 to subpart E to read as follows:

§ 721.10934 Alkenoic acid, polymer with alkyl alkenoate, alkylalkylalkenoate, alkenoic acid and tridecafluoro alkylalkenoate, compds. with alkylaminoalcanol (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as alkenoic acid, polymer with alkyl alkenoate, alkylalkylalkenoate, alkenoic acid and tridecafluoro alkylalkenoate, compds. with alkylaminoalcanol (PMN P–14–580) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4), (a)(6) (particulate, gas/vapor or a combination gas/vapor and particulate), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (analysis and reporting and limitations of maximum impurity levels of certain impurities; and use other described in the consent order) and (q).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (e), and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraphs (a)(2)(ii) of this section.

■ 12. Add § 721.10935 to subpart E to read as follows:

§ 721.10935 Titanium oxide compound (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as titanium oxide compound (PMN P–14–643) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4) (respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6) (particulate), (b) (concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) consent order for this substance. The NCEL is 2.4 mg/m^3 as an 8-hour time weighted average. Persons who wish to pursue NCELs as an alternative to § 721.63 respirator requirements may request to do so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) consent order.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a), through (e) (concentration set at 1.0 percent), (f), (g)(1)(ii), (g)(2)(ii), (g)(2)(iii), and (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(p) (4,300,000 kilograms).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (d), and (f), through (i) are applicable to manufacturers and processors of this.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 13. Add § 721.10936 to subpart E to read as follows:

§ 721.10936 Fatty acid amide hydrochlorides (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as fatty acid amide hydrochlorides (PMNs P–14–688, P–14–689, P–14–690, and P–14–691) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80. A significant new use of the substances is any use other than as surfactants for use in asphalt applications where the surface water concentrations described under paragraph (a)(3)(i) of this section are exceeded.

(ii) [Reserved]

(3) The significant new uses for any use other than as surfactants for use in asphalt applications are:

(i) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) (N=1 for PMNs P–14–688, P–14–689, and P–14–690) and (N=2 for PMN P–14–691).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), (i), and (k) are applicable to manufacturers and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 14. Add § 721.10937 to subpart E to read as follows:

§ 721.10937 Plastics, wastes, pyrolyzed, bulk pyrolysate (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as plastics, wastes, pyrolyzed, bulk pyrolysate (PMN P–14–712) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(3), (a)(4) (respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6)(v), (a)(6)(vi), (a)(6)(particulate or a combination gas/vapor and particulate), (b)(concentration set at 0.1 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the exposure limit (EL) provision listed in the TSCA section 5(e) consent order for this substance. The EL is both 0.1 ppm for benzene and 10 ppm for naphthalene as an 8-hour time weighted average.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e)(concentration set at 1.0 percent), (f), (g)(1)(i), (g)(1)(ii), (g)(1)(iii), (g)(1)(iv), (g)(1)(v), (g)(1)(vi), (g)(1)(vii), (g)(1)(viii), (g)(1)(ix), (g)(2)(i), (g)(2)(ii), (g)(2)(iii), (g)(2)(v), (g)(3)(i), (g)(3)(i), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k). It is a significant new use to manufacture this substance other than as described in the PMN. It is a significant new use to manufacture this substance without testing the substance for polychlorinated dibenzo-p-dioxin and dibenzofuran impurities using EPA Method 8290A at each facility of manufacture, conducting the testing every quarter that the PMN substance is manufactured, submitting the results of any testing conducted, or providing test results more than 45 days after receiving them.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 15. Add § 721.10938 to subpart E to read as follows:

§ 721.10938 Plastics, wastes, pyrolyzed, light distillate (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as plastics, wastes, pyrolyzed, light distillate (PMN P–14–713) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(3), (a)(4)(respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6)(v), (a)(6)(vi), (a)(6)(particulate or a combination gas/vapor and particulate), (b)(concentration set at 0.1 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the exposure limit (EL) provision listed in the TSCA section 5(e) consent order for this substance. The EL is both 0.1 ppm for benzene and 10 ppm for naphthalene as an 8-hour time weighted average.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0 percent), (f), (g)(1)(i), (g)(1)(ii), (g)(1)(iii), (g)(1)(iv), (g)(1)(v), (g)(1)(vi), (g)(1)(vii), (g)(1)(viii), (g)(1)(ix), (g)(2)(i), (g)(2)(ii), (g)(2)(iii), (g)(2)(v), (g)(3)(i), (g)(3)(i), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (k).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 16. Add § 721.10939 to subpart E to read as follows:

§ 721.10939 Plastics, wastes, pyrolyzed, middle distillate (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as plastics, wastes, pyrolyzed, middle distillate (PMN P–14–714) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(3), (a)(4)(respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6)(v), (a)(6)(vi), (a)(6)(particulate or a combination gas/vapor and particulate), (b)(concentration set at 0.1 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the exposure limit (EL) provision listed in the TSCA section 5(e) consent order for this substance. The EL is both 0.1 ppm for benzene and 10 ppm for naphthalene as an 8-hour time weighted average.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0 percent), (f), (g)(1)(i), (g)(1)(ii), (g)(1)(iii), (g)(1)(iv), (g)(1)(v), (g)(1)(vi), (g)(1)(vii), (g)(1)(viii), (g)(1)(ix), (g)(2)(i), (g)(2)(ii), (g)(2)(iii), (g)(2)(v), (g)(3)(i), (g)(3)(i), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 17. Add § 721.10940 to subpart E to read as follows:

§ 721.10940 Plastics, wastes, pyrolyzed, heavy distillate (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as plastics, wastes, pyrolyzed, heavy distillate (PMN P–14–715) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(3), (a)(4)(respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6)(v), (a)(6)(vi), (a)(6) (particulate or a combination gas/vapor and particulate), (b)(concentration set at 0.1 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the exposure limit (EL) provision listed in the TSCA section 5(e) consent order for this substance. The EL is both 0.1 ppm for benzene and 10 ppm for naphthalene as an 8-hour time weighted average.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0 percent), (f), (g)(1)(i), through (g)(1)(ix), (g)(2)(i), through (g)(2)(iii), (g)(2)(v), (g)(3)(i), (g)(3)(ii), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 18. Add § 721.10941 to subpart E to read as follows:

§ 721.10941 Carbon silicon oxide.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as carbon silicon oxide (PMN P–15–28; CAS No. 39345–87–4) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(3), (a)(4)(respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6)(v), (a)(6)(vi), (a)(6) (particulate or a combination gas/vapor and particulate), (b)(concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) consent order for this substance. The NCEL is 6 mg/m^3 as an 8-hour time weighted average. Persons who wish to pursue NCELs as an alternative to § 721.63

respirator requirements may request to do so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) consent order.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0 percent), (f), (g)(1)(i), (g)(1)(ii), (g)(2)(i), (g)(2)(ii), (g)(2)(iv), (g)(2)(v), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* It is a significant new use to manufacture the PMN substance other than specified in the TSCA section 5(e) consent order. Requirements as specified in § 721.80(p) (within 24 months of submission of a Notice of Commencement of Manufacture).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 19. Add § 721.10942 to subpart E to read as follows:

§ 721.10942 Carbon nanotubes (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as carbon nanotubes (PMN P–15–54) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(2)(ii), (a)(3), (a)(4), (a)(6) (particulate), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible. A National Institute for Occupational Safety and Health (NIOSH)-certified respirator with an Assigned Protection Factor (APF) of at least 50 with an N–100, P–100, or R–100 cartridge meets the requirements of § 721.63(a)(4).

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k)(chemical intermediate) and (p)(one year).

(iii) *Disposal.* Requirements as specified in § 721.85(a)(1), (a)(2), (b)(1), (b)(2), (c)(1), and (c)(2).

(iv) *Release to water.* Requirements as specified in § 721.90(a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (e), (i), (j), and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 20. Add § 721.10943 to subpart E to read as follows:

§ 721.10943 Sulfonated alkylbenzene salts (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as sulfonated alkylbenzene salts (PMN P–15–149) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e)(concentration set at 1.0 percent), (f), (g)(1)(i), (g)(1)(ii), (g)(1)(serious eye damage), (g)(2)(i), (g)(2)(ii), (g)(2)(iii), (g)(2)(v), (g)(3)(i), (g)(3)(ii), (g)(4)(i) and (g)(5).

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) and (q).

(iii) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) (N=2).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), (f), (g), (h), (i), and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(ii) of this section.

■ 21. Add § 721.10944 to subpart E to read as follows:

§ 721.10944 Substituted quinoline derivative (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as substituted quinoline derivative (PMN P–15–267) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(3), (a)(4) (respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6) (particulate), (b)(concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(j).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), through (e), and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(ii) of this section.

■ 22. Add § 721.10945 to subpart E to read as follows:

§ 721.10945 Algal oil amide (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as algal oil amide (PMN P–15–470) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(j).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(i) of this section.

■ 23. Add § 721.10946 to subpart E to read as follows:

§ 721.10946 Bismuth compound (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as bismuth compound (PMN P–15–485) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this order do not apply when the chemical substance has been completely reacted (cured).

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4) (respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6) (particulate), (b)(concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) consent order for this substance. The NCEL is 2.4 mg/m^3 as an 8-hour time weighted average. Persons who wish to pursue NCELs as an alternative to § 721.63 respirator requirements may request to do so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) consent order.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0 percent), (f), (g)(1)(ii), (g)(2)(ii), (g)(2)(iii), and (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(p) (360,000 kilograms).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (d), and (f), through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 24. Add § 721.10947 to subpart E to read as follows:

§ 721.10947 Sulfur thulium ytterbium yttrium oxide.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as sulfur thulium ytterbium yttrium oxide (PMN P–15–612; CAS No. 180189–40–6) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4) (respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6) (particulate), (b) (concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) consent order for this substance. The NCEL is 0.07 mg/m^3 as an 8-hour time weighted average. Persons who wish to pursue NCELs as an alternative to § 721.63 respirator requirements may request to do so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) consent order.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a), (b), (c), (d), (e) (concentration set at 1.0 percent), (f), (g)(1)(ii), (g)(2)(ii), (g)(2)(iii), and (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(p) (6,000 kilograms, aggregate of PMNs P–15–612, P–15–613, P–15–614, P–15–615, P–15–616, P–15–617, P–15–618, combined).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), (d), (f), (g), (h), and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 25. Add § 721.10948 to subpart E to read as follows:

§ 721.10948 Gadolinium sulfur ytterbium yttrium oxide, erbium- and thulium-doped.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as (PMN P–15–613; CAS No, 1651187–84–6) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4) (respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6) (particulate), (b) (concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) consent order for this substance. The NCEL is 0.07 mg/m^3 as an 8-hour time weighted

average. Persons who wish to pursue NCELs as an alternative to § 721.63 respirator requirements may request to do so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) consent order.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a), through (e) (concentration set at 1.0 percent), (f), (g)(1)(ii), (g)(2)(ii), (g)(2)(iii), and (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(p)(6,000 kilograms, aggregate of PMNs P–15–612, P–15–613, P–15–614, P–15–615, P–15–616, P–15–617, P–15–618, combined).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), (d), (f), (g), (h), and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 26. Add § 721.10949 to subpart E to read as follows:

§ 721.10949 Neodymium sulfur yttrium oxide.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as neodymium sulfur yttrium oxide (PMN P–15–614; CAS No. 1651158–45–5) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4)(respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6)(particulate), (b)(concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) consent order for this substance. The NCEL is 0.07 mg/m^3 as an 8-hour time weighted average. Persons who wish to pursue NCELs as an alternative to § 721.63 respirator requirements may request to do so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) consent order.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0 percent), (f), (g)(1)(ii), (g)(2)(ii), (g)(2)(iii), and (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(p)(6,000 kilograms, aggregate of PMNs P–15–612, P–15–613, P–15–614, P–15–615, P–15–616, P–15–617, P–15–618, combined).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), (d), (f), (g), (h), and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 27. Add § 721.10950 to subpart E to read as follows:

§ 721.10950 Erbium gadolinium neodymium sulfur ytterbium yttrium oxide (P–15–615).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as erbium gadolinium neodymium sulfur ytterbium yttrium oxide (PMN P–15–615; CAS No. 1651152–96–3) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4)(respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6)(particulate), (b)(concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) consent order for this substance. The NCEL is 0.07 mg/m^3 as an 8-hour time weighted average. Persons who wish to pursue NCELs as an alternative to § 721.63 respirator requirements may request to do so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) consent order.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0 percent), (f), (g)(1)(ii), (g)(2)(ii), (g)(2)(iii), and (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(p)(6,000 kilograms, aggregate of PMNs P–15–612, P–15–613, P–15–614, P–15–615, P–15–616, P–15–617, P–15–618, combined).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a) through (d), and (f), through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 28. Add § 721.10951 to subpart E to read as follows:

§ 721.10951 Erbium gadolinium sulfur ytterbium yttrium oxide.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as erbium gadolinium sulfur ytterbium yttrium oxide (P–15–616; CAS No. 1622295–07–1) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4)(respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6)(particulate),

(b)(concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) consent order for this substance. The NCEL is 0.07 mg/m^3 as an 8-hour time weighted average. Persons who wish to pursue NCELs as an alternative to § 721.63 respirator requirements may request to do so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) consent order.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0 percent), (f), (g)(1)(ii), (g)(2)(ii), (g)(2)(iii), and (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(p)(6,000 kilograms, aggregate of PMNs P–15–612, P–15–613, P–15–614, P–15–615, P–15–616, P–15–617, P–15–618, combined).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a) through (d), and (f),through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 29. Add § 721.10952 to subpart E to read as follows:

§ 721.10952 Erbium gadolinium ytterbium oxide.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as erbium gadolinium ytterbium oxide (PMN P–15–617; CAS No. 1651152–05–4) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4)(respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6)(particulate), (b)(concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) consent order for this substance. The NCEL is 0.07 mg/m^3 as an 8-hour time weighted average. Persons who wish to pursue NCELs as an alternative to § 721.63 respirator requirements may request to do so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) consent order.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0 percent), (f), (g)(1)(ii), (g)(2)(ii), (g)(2)(iii), and (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(p)(6,000 kilograms, aggregate of PMNs P–15–612, P–15–613, P–15–614, P–15–615, P–15–616, P–15–617, P–15–618, combined).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a) through (d), and (f), through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 30. Add § 721.10953 to subpart E to read as follows:

§ 721.10953 Erbium gadolinium sulfur ytterbium oxide.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as erbium gadolinium sulfur ytterbium oxide (PMN P–15–618; CAS No. 934388–91–7) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(4)(respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 10), (a)(6)(particulate), (b)(concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (a)(4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) consent order for this substance. The NCEL is 0.07 mg/m^3 as an 8-hour time weighted average. Persons who wish to pursue NCELs as an alternative to § 721.63 respirator requirements may request to do so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) consent order.

(B) [Reserved]

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0 percent), (f), (g)(1)(ii), (g)(2)(ii), (g)(2)(iii), and (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(p)(6,000 kilograms, aggregate of PMNs P–15–612, P–15–613, P–15–614, P–15–615, P–15–616, P–15–617, P–15–618, combined).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (d), (f), through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 31. Add § 721.10954 to subpart E to read as follows:

§ 721.10954 2-Ethylhexanoic acid, compound with alkyamino cyclohexane (generic); and 2-Ethylhexanoic acid, compound with cyclohexylamine (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as 2-ethylhexanoic acid, compound with alkyamino cyclohexane (PMN P–15–0655, chemical A); and 2-ethylhexanoic acid, compound with cyclohexylamine (PMN P–15–0655, chemical B) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N = 34.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 32. Add § 721.10955 to subpart E to read as follows:

§ 721.10955 Propenoic acid, alkyl ester, polymer with 1,3-cyclohexanedialkylamine, reaction products with oxirane(alkoxyalkyl) (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as propenoic acid, alkyl ester, polymer with 1,3-cyclohexanedialkylamine, reaction products with oxirane(alkoxyalkyl) (PMN P–15–680) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) where N = 1.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 33. Add § 721.10956 to subpart E to read as follows:

§ 721.10956 Acrylic acid, polymer with polyalkylene polyamine (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as acrylic acid, polymer with polyalkylene polyamine (PMN P–15–691) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(g).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 34. Add § 721.10957 to subpart E to read as follows:

§ 721.10957 1,2-Cyclohexanedicarboxylic acid, 1-(2-phenylhydrazide).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as (1,2-cyclohexanedicarboxylic acid, 1-(2-phenylhydrazide) (PMN P–16–30; CAS No. 1807977–72–5) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(2)(ii), (a)(3), (a)(6)(particulate), (b)(concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (e) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 35. Add § 721.10958 to subpart E to read as follows:

§ 721.10958 2,5-Furandione, dihydro-, polymer with 1,1′-iminobis[2-propanol], benzoate (ester), N-benzoyl derivs.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 2,5-furandione, dihydro-, polymer with 1,1′-iminobis[2-propanol], benzoate (ester), N-benzoyl derivs. (PMN P–16–52; CAS No. 592479–38–4) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N = 5.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 36. Add § 721.10959 to subpart E to read as follows:

§ 721.10959 Dialkyl fattyalkylamino propanamide alkylamine acetates (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as dialkyl fattyalkylamino propanamide alkylamine acetates (PMNs P–16–56 and P–16–57) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N = 1.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 37. Add § 721.10960 to subpart E to read as follows:

§ 721.10960 Dialkylaminopropylaminopropanoate ester (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as dialkylaminopropylaminopropanoate ester (PMN P–16–58) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N = 14.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

RIN 2060–AS82

Implementation of the 2015 National Ambient Air Quality Standards for Ozone: Nonattainment Area Classifications and State Implementation Plan Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing nonattainment area classification thresholds and implementation requirements for the strengthened 2015 ozone national ambient air quality standards (NAAQS) (2015 ozone NAAQS) that were promulgated on October 1, 2015. This proposal is largely an update to the implementing regulations previously promulgated for the 2008 ozone NAAQS, and we propose to retain without significant revision the majority of those provisions to implement the 2015 ozone NAAQS. This proposal addresses the timing of attainment dates for each nonattainment area classification and a range of nonattainment area state implementation plan (SIP) requirements for the 2015 ozone NAAQS. The proposed SIP requirements pertain to attainment demonstrations, reasonable further progress (RFP) and associated milestone demonstrations, reasonably available control technology (RACT), reasonably available control measures (RACM), major nonattainment new source review (NNSR), emission inventories, the timing of required SIP submissions, and compliance with emission control measures in the SIP. Other issues addressed in this proposed rule are the revocation of the 2008 ozone NAAQS, anti-backsliding requirements that would apply when the 2008 ozone NAAQS are revoked, and reconsideration of the ozone NAAQS interprecursor trading (IPT) provisions (in response to a petition for reconsideration).

DATES: *Comments.* Written comments must be received on or before January 17, 2017. *Public Hearing.* If anyone contacts us requesting a hearing on or before December 2, 2016, we will hold a hearing. Additional information about the hearing, if requested, will be published in a subsequent **Federal Register** document. *Information Collection Request.* Under the Paperwork Reduction Act (PRA), comments on the information collection provisions are best assured of having full effect if the Office of Management and Budget (OMB) receives a copy of your comments on or before December 19, 2016.

ADDRESSES: *Comments:* Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2016–0202, at *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the Web, Cloud or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/comments.html.*

FOR FURTHER INFORMATION CONTACT: For further general information on this proposed rule, contact Mr. Robert Lingard, Office of Air Quality Planning and Standards (OAQPS), U.S. EPA, at (919) 541–5272 or *lingard.robert@epa.gov;* or Mr. Lynn Dail, OAQPS, U.S. EPA, at (919) 541-2363 or *dail.lynn@epa.gov.* For information on the Information Collection Request (ICR), contact Mr. Butch Stackhouse, OAQPS, U.S. EPA, at (919) 541–5208 or *stackhouse.butch@epa.gov.* For information on the public hearing, contact Ms. Pamela Long, OAQPS, U.S. EPA, at (919) 541–0641 or *long.pam@epa.gov.*

B. Does this action apply to me?

Entities potentially affected directly by this proposed rule include state, local and tribal governments and air pollution control agencies (''air agencies'') responsible for attainment and maintenance of the NAAQS. Entities potentially affected indirectly by this proposed rule as regulated sources include owners and operators of sources of emissions of volatile organic compounds (VOCs) and nitrogen oxides

(NO_X) that contribute to ground-level ozone formation.

C. What should I consider as I prepare my comments for the EPA?

When submitting comments, remember to:

- Identify the rulemaking docket by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions. The proposed rule may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree, suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used to support your comment.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns wherever possible, and suggest alternatives.
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- Make sure to submit your comments by the comment period deadline identified.

D. How can I find information about a possible hearing?

To request a public hearing or information pertaining to a public hearing regarding this document, contact Ms. Pamela Long, OAQPS, U.S. EPA, at (919) 541–0641 or *long.pam@epa.gov.*

E. Where can I get a copy of this document and other related information?

In addition to being available in the docket, an electronic copy of this **Federal Register** document will be posted at *http://www.epa.gov/ozone-pollution.*

F. How is this notice of proposed rulemaking organized?

The information and proposals presented in this notice are organized as follows:

I. General Information
A. Preamble Glossary of Terms and Acronyms
B. Does this action apply to me?
C. What should I consider as I prepare my comments for the EPA?
D. How can I find information about a possible hearing?
E. Where can I get a copy of this document and other related information?
F. How is this notice of proposed rulemaking organized?

VIII. Statutory Authority

II. Summary of Proposed Rule and Background

On October 1, 2015,[1] the EPA announced that it was strengthening the primary and secondary NAAQS for ozone to a level of 0.070 parts per million (ppm).[2] Since the 2015 primary and secondary NAAQS for ozone are identical, for convenience, we refer to both as ''the 2015 ozone NAAQS'' or ''the 2015 ozone standards.'' The 2015 ozone NAAQS retains the same general form and averaging time as the 0.075 ppm NAAQS set in 2008, but is set at a more protective level.

The revisions to the ozone NAAQS trigger a process under which states recommend area designations (*i.e.,* as nonattainment, attainment, or unclassifiable) to the EPA. The EPA then evaluates air quality data and other factors prior to making its proposed and final determinations regarding area designations. To aid the states developing their recommendations, the EPA issued area designations guidance on February 25, 2016.[3] Areas designated as nonattainment for the revised ozone NAAQS will be classified at the time of designation. With this action, the EPA is proposing and seeking comment on air quality thresholds and attainment dates for each nonattainment area classification, which it will finalize upon or before promulgating final area

[1] *See* 80 FR 65292.

[2] Annual fourth highest daily maximum 8-hour average concentration, averaged over 3 years. For a detailed explanation of the calculation of the 3-year 8-hour average, *see* 40 CFR part 50, Appendix P.

[3] The EPA's guidance on the area designations for the 2015 ozone NAAQS is available at *https://www.epa.gov/ozone-designations/epa-guidance-area-designations-2015-ozone-naaqs.*

designations and classifications for the 2015 ozone NAAQS.

The Clean Air Act (CAA or Act) does not require that the EPA promulgate new or revised implementing regulations or guidance every time that a NAAQS is revised. State, local and tribal air agencies (hereinafter, referred to simply as air agencies) are required to submit SIPs as provided in the CAA and in EPA regulations. Where the nature of revisions to a NAAQS indicate that additional regulations or guidance (or revisions to existing regulations or guidance) may be helpful, the EPA endeavors to provide such regulations or guidance to facilitate the designations process and preparation of timely SIP submittals. It is important to note, however, that the existing EPA regulations in 40 CFR part 51 applicable to SIPs generally and to particular pollutants (*e.g.,* ozone and its precursors) continue to apply even without such updates. This rule is proposing revisions to existing regulations and guidance as appropriate to aid in the implementation of the 2015 ozone NAAQS.

The EPA believes that the overall framework and policy approach of the implementation provisions associated with the 2008 ozone NAAQS provide an effective and appropriate template for the general approach air agencies should follow in planning for attainment of the revised ozone standards. However, to assist with the implementation of the revised ozone standards, the EPA is proposing this additional ozone NAAQS implementation rule.

We are proposing multiple actions in this rule pertaining to nonattainment area classification thresholds and associated attainment dates, as well as submittal deadlines and specific CAA requirements for the content of nonattainment area and Ozone Transport Region (OTR) SIPs for the 2015 ozone NAAQS. As a general matter, this proposed rule follows the same basic principles and approach that the EPA applied to interpret the CAA's part D, subpart 2 ozone nonattainment area requirements in developing the classification and implementation rules for the 2008 ozone NAAQS.[4] Additionally, we are proposing and seeking comment on two alternative approaches for revoking the 2008 ozone NAAQS and, where applicable, establishing anti-backsliding requirements for areas that are designated nonattainment at the time the 2008 ozone NAAQS is revoked.

Regarding the format of this preamble, we organize our discussion of implementation requirements for the 2015 ozone NAAQS around the implementing regulations for the 2008 ozone NAAQS. As stated previously, we propose to retain without significant revision the majority of those existing regulations to implement the 2015 ozone NAAQS, as discussed in Section III of this preamble. We discuss the existing implementing regulations that we propose to retain with specific revisions for implementing the 2015 ozone NAAQS in Section IV of this preamble. For topics where we do not propose any action, we provide guidance on that topic in the preamble. Section V of this preamble addresses several requirements and policies not covered by this proposed rulemaking (with one exception), but for which the EPA is soliciting public comment (*e.g.,* dealing with emissions from wildfires and wildland prescribed fires, and international transport and background ozone).

III. Provisions of the 2008 Ozone NAAQS Implementing Regulations To Be Retained Without Significant Revision

For purposes of the 2015 ozone NAAQS, we are proposing to retain the majority of existing implementation provisions for the 2008 ozone NAAQS without significant revision. The existing classification and SIP requirement provisions for the 2008 standards are codified at subpart AA of 40 CFR part 51, and the corresponding provisions for the 2015 standards would be codified at the new subpart CC of part 51. As discussed earlier, the EPA believes that the implementing regulations for the 2008 standards generally provide an appropriate approach to follow in attainment planning for the 2015 standards, and we welcome comment on the following proposed provisions.

A. Submitting Nonattainment Area and OTR SIP Elements Due Under CAA Sections 182 and 184 for the 2015 Ozone NAAQS

1. Deadlines for Submitting Nonattainment Area and OTR SIP Elements

The EPA is proposing to retain the existing approach to calculating deadlines for submitting nonattainment SIP elements. Section 182 of the CAA requires states with ozone nonattainment areas to submit various SIP elements within specified time periods after enactment of the CAA Amendments of 1990. For the 2008 ozone NAAQS, the EPA adopted the approach that the SIP elements listed in the proposal are due based on the timeframes provided in CAA section 182 as measured from the effective date of designation, instead of the 1990 date. For reference, the final 2008 Ozone NAAQS SIP Requirements Rule (2008 ozone SRR) provides an extensive discussion of the EPA's current approach and rationale for SIP element submittal deadlines (80 FR 12265; March 6, 2015). The EPA is proposing to retain the same approach for calculating deadlines for submitting nonattainment area SIP elements under CAA section 182 for the 2015 ozone NAAQS, based on the current approach and rationale articulated in the final 2008 Ozone NAAQS SIP Requirements Rule.

Accordingly, states with areas designated nonattainment have 2 years from the effective date of nonattainment designation to submit SIP revisions addressing emission inventories (required by CAA section 182(a)(1)), RACT (CAA section 182(b)(2)) and emissions statement regulations[5] (CAA section 182(a)(3)(B)); 3 years to submit SIP revisions addressing 15 percent rate of progress (ROP) plans (CAA section 182(b)(1)) and Moderate area attainment demonstrations (CAA section 182(b)(1)); and 4 years to submit SIP revisions addressing 3 percent per year[6] RFP plans (CAA section 182(c)(2)) and attainment demonstrations (CAA section 182(c)(2)) for Serious and higher areas, where applicable. If an area is subject to vehicle inspection and maintenance (I/M) program requirements based on its classification, the SIP revision due date, codified in 40 CFR 51.372(b)(2), would be aligned with the due date for the attainment demonstration SIP for the area. The SIP revisions addressing CAA section 185 penalty fee programs in areas initially classified Severe or Extreme would be due 10 years from the effective date of designations. Finally, SIP submissions addressing nonattainment NSR would be due 3 years[7] from the effective date of designations.

We note also that the EPA's implementing regulations for revised ozone NAAQS have required OTR states

[4] *See* the Classifications Rule (77 FR 30160; May 21, 2012) and SIP Requirements Rule (80 FR 12264; March 6, 2015) for the 2008 ozone NAAQS.

[5] *See* Section IV.G of this preamble for additional information on emissions statements.

[6] 3 percent per year RFP plans are typically submitted in 3-year increments, thus, as 9 percent RFP plans that produce average reductions of 3 percent per year.

[7] *See* 70 FR 71612, 71672 and 71683 (November 29, 2005); and 80 FR 12264, 12266 and 12267, March 6, 2015.

to submit RACT SIP revisions based on the timeframe provided in CAA section 184 as measured from the effective date for designations made pursuant to those revised NAAQS. This requirement was first codified in 40 CFR 51.916 for the 1997 ozone NAAQS, and later codified for the 2008 ozone NAAQS in 40 CFR 51.1116. Under those provisions, states in the OTR are required to submit SIP revisions addressing the RACT requirements of CAA section 184 no later than 2 years after the effective date of designations for the revised ozone NAAQS. The EPA is proposing to retain these same general requirements for the 2015 ozone NAAQS (*see* Section III.L of this preamble).

2. Form and Content of Nonattainment and OTR SIP Element Submissions Required Under a Revised NAAQS

The EPA is restating the existing requirement that states must submit all nonattainment SIP elements applicable for an area's classification upon revision of the NAAQS, and is providing the following guidance on the form and content of such submissions. As discussed in the preceding section, a SIP submission is due from air agencies for every nonattainment area for each of the SIP elements listed in this proposal, including (but not limited to) emissions statement regulations, nonattainment NSR, and vehicle I/M programs, upon revision of the NAAQS, and they are due based on the timeframes provided in CAA section 182 as measured from the effective date of designation.

The EPA interprets the CAA to require an air agency to provide a SIP submission to meet each nonattainment area planning requirement for the 2015 ozone NAAQS. Many air agencies may already have regulations to address certain requirements in place due to nonattainment designations for a prior ozone NAAQS. Air agencies should review any existing regulation that was previously approved by the EPA to determine whether it is sufficient to fulfill obligations triggered by any revised ozone NAAQS. In cases where a previously-approved provision is modified for any reason, or where no provision exists, air agencies must provide the new or modified provision as a SIP submission. This would include new or modified RACT provisions for states with nonattainment areas and states in an OTR, which must be reviewed to ensure that emissions from affected stationary sources are appropriately controlled. However, where an air agency believes that an existing regulation is adequate to meet the nonattainment requirements of CAA section 182 (or OTR RACT requirements of CAA section 184) for a revised ozone NAAQS, that air agency's SIP submission may provide a written statement of the rationale for that determination in lieu of submitting new revised regulations. For example, a state may have an emissions statement regulation (per CAA section 182(a)(3)(B)) that has been previously approved by the EPA for a prior ozone NAAQS that covers all of the state's nonattainment areas and relevant classes and categories of sources for the 2015 ozone NAAQS, and is likely to be sufficient for purposes of the emissions statement requirement for the 2015 ozone NAAQS. The EPA has taken action on similar written statements. *See* 80 FR 48036, 48040 (explaining that EPA is approving Georgia's certification that the state's previously approved regulation meets the requirements of CAA section 182(a)(3)(B) for the 2008 ozone standards). Other previously-approved nonattainment SIP elements that may be sufficient for purposes of an area that has been designated nonattainment for a revised NAAQS might include (but are not necessarily limited to): Nonattainment NSR; vehicle I/M programs; and clean fuels requirement for boilers.

An air agency choosing to provide a written statement to meet the submission requirement of the CAA must provide the statement to the EPA as a SIP submission in accordance with CAA section 110 and 40 CFR 51.102, 103 and Appendix V. An air agency should identify the related applicable requirements and how each is met for the revised ozone NAAQS by the regulation previously approved for a prior ozone NAAQS. The purpose of the statement is to demonstrate compliance with the nonattainment plan requirements for the new NAAQS. These written statements must be treated in the same manner as any SIP submission and must be provided to the EPA in accordance with applicable SIP submission requirements and deadlines.

B. Applicability of Existing NAAQS Implementation Provisions in 40 CFR Part 51

The EPA is proposing to retain its existing general requirement that establishes the applicability of 40 CFR part 51 to the current and prior ozone NAAQS. The general applicability of 40 CFR part 51 to the 2008 ozone NAAQS is codified in 40 CFR 51.1101, and requires that the provisions in subparts A through X of part 51 apply to areas to the extent they are not inconsistent with the specific implementation provisions for the 2008 standards (*i.e.,* subpart AA of part 51). Subparts A through X of part 51 [8] include generally applicable requirements for preparation, adoption, and submittal of implementation plans, as well as specific implementation provisions for the 1997 8-hour ozone NAAQS (codified in subpart X). The EPA is proposing that the same requirements apply for purposes of the 2015 ozone NAAQS at 40 CFR 51.1301, except that the listing of potentially applicable subparts would include the addition of subpart AA of part 51 (*i.e.,* subparts A through AA).

C. General Classification and Nonattainment Area Planning Provisions

The EPA is proposing to retain its existing general classification and nonattainment area planning provisions, which are codified for the 2008 ozone NAAQS in 40 CFR 51.1102. These provisions require that designated areas be classified in accordance with CAA section 181 (classifications and attainment dates), as interpreted in 40 CFR 51.1103(a), and that designated areas will be subject to the applicable planning requirements of subpart 2 of part D of title I of the CAA (additional provisions for ozone nonattainment areas). The EPA is proposing to retain the same general requirements for the 2015 ozone NAAQS, without revision, and codify them at 40 CFR 51.1302 and 51.1303(a).

D. Redesignation to Nonattainment Following Initial Designations

The EPA is proposing to retain its existing requirements for areas initially designated attainment for the current ozone NAAQS and subsequently redesignated to nonattainment for the same standards, which are codified for the 2008 ozone NAAQS in 40 CFR 51.1106. These provisions generally allow an extension of any absolute, fixed date for SIP requirements under part 51—excluding attainment dates—equal to the length of time between the effective date of the initial designation for the NAAQS and the effective date of redesignation, unless otherwise provided in the implementation provisions for those standards. The maximum attainment date for a redesignated area would be based on the area's classification (*see* Section IV.A of this preamble for discussion of classification thresholds and attainment dates). The EPA is proposing to retain the same requirements for the 2015 ozone NAAQS, without revision.

[8] Excluding subpart Z (Provisions for Implementation of $PM_{2.5}$ NAAQS) and subpart BB (Data Requirements for Characterizing Air Quality for the Primary Sulfur Dioxide (SO_2) NAAQS).

E. Determining Eligibility for 1-Year Attainment Date Extensions for the 2015 Ozone NAAQS Under CAA Section 181(a)(5)

The EPA is proposing to retain its existing eligibility criteria for 1-year attainment date extensions under CAA section 181(a)(5), which are codified for the 2008 ozone NAAQS in 40 CFR 51.1107. An area that fails to attain a specific ozone NAAQS by its attainment date would be eligible for the first 1-year extension if, for the attainment year, the area's fourth highest daily maximum 8-hour average is at or below the level of the standards. The area would be eligible for the second 1-year extension if the area's fourth highest daily maximum 8-hour value, averaged over both the original attainment year and the first extension year, is at or below the level of the standards. For the second 1-year extension, the area's fourth highest daily maximum 8-hour average for each year (the attainment year and the first extension year) must be determined using the monitor which, for that year, has the fourth highest daily maximum 8-hour average of all the monitors that represent that area (*i.e.,* the area's fourth highest daily maximum 8-hour average for each year could be derived from a different monitor) (*see* 80 FR 12292; March 6, 2015). The EPA is proposing to retain the same general eligibility criteria for the 2015 ozone NAAQS, without revision.

We are also restating in this preamble that, in addition to demonstrating that an area meets these general eligibility criteria, an air agency must demonstrate that it has complied with all requirements and commitments pertaining to the area in the applicable SIP, per CAA section 181(a)(5)(A). Given the state and federal partnership in implementing the CAA, it is reasonable for the EPA to interpret CAA section 181(a)(5)(A) as permitting the agency to rely upon the certified statements of its state counterparts, and the EPA has long interpreted the provision to be satisfied by such statements.[9] In practice, in conjunction with a request for an extension, a state air agency's Executive Officer, or other senior individual with equivalent responsibilities, signs and affirms that their state is complying with their applicable federally-approved SIP.

F. Modeling and Attainment Demonstration Requirements

The EPA is proposing to retain its existing modeling and attainment demonstration requirements, which are codified for the 2008 ozone NAAQS in 40 CFR 51.1108, and to establish criteria and due dates for attainment demonstrations and implementation of control measures. Due dates for attainment demonstrations are established relative to the effective date of area designations, and all control measures in the attainment demonstration must be implemented no later than the beginning of the attainment year ozone season, notwithstanding specific RACT and/or RACM implementation deadline requirements. For reference, the final 2008 Ozone NAAQS SIP Requirements Rule provides an extensive discussion of attainment demonstration elements and related modeling protocols (80 FR 12268; March 6, 2015). The EPA's current procedures for modeling are well developed and described in the EPA's ''Draft Modeling Guidance for Demonstrating Attainment of Air Quality Goals for Ozone, $PM_{2.5}$, and Regional Haze'' (December 2014).[10] The EPA is proposing to retain the same modeling and attainment demonstration requirements for the 2015 ozone NAAQS, based on the current approach articulated in the final 2008 Ozone NAAQS SIP Requirements Rule.

G. Requirements for RFP

The EPA is proposing to retain its existing RFP requirements and to add new regulatory provisions codifying statutory requirements for RFP milestone compliance demonstrations (MCDs) (*see* Section IV.C of this preamble). The EPA is also seeking comment on requiring states to use the year of an area's designation as nonattainment as the baseline year for the emission inventory for the RFP requirement.

The RFP requirements for the 2008 ozone NAAQS are codified in 40 CFR 51.1110 and require that nonattainment SIPs provide for the annual incremental emission reductions needed to ensure attainment of the NAAQS. The provisions in 40 CFR 51.1110 are organized by the following major subjects: Submission deadline for SIP revisions; RFP requirements for affected areas; [11] creditability of emission control measures; creditability of out-of-area emissions reductions; [12] calculation of non-creditable emissions reductions; and baseline emission inventories for RFP plans. For reference, the final 2008 Ozone NAAQS SIP Requirements Rule provides an extensive discussion of the EPA's rationale and approach for how air agencies can provide for RFP in their nonattainment SIPs (80 FR 12271; March 6, 2015).

The EPA is proposing to retain the same RFP approach and requirements for the 2015 ozone NAAQS, except that they would also apply to areas with approved RFP plans for the 2008 ozone NAAQS, in addition to the 1-hour and 1997 standards. This proposed approach includes continuing to state that the baseline year for RFP should be the calendar year for the most recently available triennial emission inventory at the time ROP/RFP plans are developed (*e.g.*, 2017 for initial designations effective in 2018), but states may elect an earlier alternate year to be used to recognize investments in implementing early reductions to achieve improved air quality. We propose that states may use an alternate year (*i.e.*, other that 2017) between the year of the revised NAAQS issuance (2015) and the year in which nonattainment designation is effective. However, the EPA is inviting comment on an alternate approach of requiring that states use the year of the effective date of an area's designation as the baseline year for the emission inventory for the RFP requirements.

The EPA is proposing to codify our existing interpretation of statutory requirements for RFP MCD, which would be codified into specific provisions of the RFP requirements discussed here (*see* Section IV.C of this preamble).

H. Requirements for RACT and RACM

1. RACT

The EPA is proposing to retain its existing general RACT requirements, and to add new deadline requirements for certain RACT SIP revisions (*see* Section IV.D of this preamble). The general RACT requirements for the 2008 ozone NAAQS, which are codified in 40 CFR 51.1112(a) and (b), address the content and timing of RACT SIP

[9] *See* memorandum signed by D. Kent Berry, Acting Director, Air Quality Management Division, ''Procedures for Processing Bump Ups and Extension Requests for Marginal Ozone Nonattainment Areas.'' U.S. EPA, February 3, 1994.

[10] Modeling guidance, tools, and supporting documents for SIP attainment demonstration are available at: *http://www3.epa.gov/scram001/guidance_sip.htm.*

[11] 40 CFR 51.1110(a)(2)–(4) establish three separate sets of RFP requirements for: (1) Areas with an approved 1-hour or 1997 ozone NAAQS 15 percent VOC rate of progress (ROP) plan; (2) areas for which an approved 15 percent VOC ROP plan for the 1-hour or 1997 ozone NAAQS exists for only a portion of the area; and (3) areas without an approved 1-hour or 1997 ozone NAAQS 15 percent VOC ROP plan.

[12] Per 40 CFR 51.1110(a)(6), creditable emission reductions for fixed percentage reduction RFP must be obtained from sources within the nonattainment area.

submittals and implementation, and major source criteria for RACT applicability.[13] Underlying these general RACT requirements are well-established EPA policies and guidance, including existing control techniques guidelines (CTGs) and alternative control techniques (ACTs).[14] For reference, the final 2008 Ozone NAAQS SIP Requirements Rule provides an extensive discussion of the EPA's current rationale and approach for how air agencies can provide for RACT in their nonattainment SIPs (80 FR 12278; March 6, 2015). With the exception of new implementation deadlines for certain RACT SIP revisions (*see* Section IV.D of this preamble), the EPA is proposing to retain the same RACT requirements for the 2015 ozone NAAQS, based on the current rationale and approach articulated in the final 2008 Ozone NAAQS SIP Requirements Rule (80 FR 12278; March 6, 2015).

2. RACM

The EPA is proposing to retain its existing RACM requirements, and to clarify the requirement under CAA section 172(c)(6) that air agencies also consider the impacts of emissions from sources outside an ozone nonattainment area but within a state's boundaries, and to require such other measures for emissions reductions from these intrastate sources if needed to attain the ozone NAAQS by the applicable attainment date (*see* Section IV.E of this preamble). The general RACM requirements for the 2008 ozone NAAQS are codified in 40 CFR 51.1112(c). For reference, the final 2008 Ozone NAAQS SIP Requirements Rule describes the EPA's current rationale and approach for how air agencies can provide for RACM in their nonattainment SIPs (80 FR 12282; March 6, 2015). The EPA interprets the RACM provision to require a demonstration that an air agency has adopted all reasonable measures (including RACT) to meet RFP requirements and to demonstrate attainment as expeditiously as practicable and, thus, that no additional measures that are reasonably available will advance the attainment date or contribute to RFP for the area.[15] [16] [17] As the EPA has previously stated in the final 2008 Ozone NAAQS SIP Requirements Rule,[18] in determining the attainment date that is as expeditious as practicable, an air agency should consider impacts on the nonattainment area of intrastate transport of pollution from sources within its jurisdiction, and potential reasonable measures to reduce emissions from those sources. Further, the EPA requires that air agencies should consider all available measures, including those being implemented in other areas, but must adopt measures for an area only if those measures are economically and technologically feasible and will advance the attainment date or are necessary for RFP. The EPA is proposing to retain its existing general RACM requirements for the 2015 ozone NAAQS—including the requirement to consider measures that address intrastate transport—based on the current rationale and approach articulated in the final 2008 Ozone NAAQS SIP Requirements Rule, and the requirements of CAA section 172(c)(6).

The final 2008 Ozone NAAQS SIP Requirements Rule also recommended that if wildfire impacts are significant in an area and contribute to exceedances of the standard, then air agencies should consider RACM for wildfires (which could include the use of prescribed fires). As discussed in Section V.A of this preamble, the EPA is revising its recommendation, such that prescribed fire and related wildland management practices instead be addressed outside of the regulatory framework of nonattainment planning.

I. CAA Section 182(f) NO_X Exemption Provisions

The EPA is proposing to retain its existing CAA section 182(f) NO_X exemption provisions, which are codified for the 2008 ozone NAAQS in 40 CFR 51.1113. These provisions allow a person or an air agency to petition the Administrator for an exemption from NO_X obligations under CAA section 182(f) for any area designated nonattainment for the 2008 ozone standards and for any area in a CAA section 184 OTR. 40 CFR 51.1113(c) stipulates that NO_X exemptions granted for previous 1-hour or 1997 ozone NAAQS do not relieve an area from CAA section 182(f) NO_X obligations under the 2008 standards (*see* 80 FR 12294; March 6, 2015). The EPA is proposing to retain the same requirements for the 2015 ozone NAAQS, stipulating that NO_X exemptions granted for any prior ozone NAAQS do not relieve an area from CAA section 182(f) NO_X obligations under a specific revised ozone NAAQS. Consistent with current EPA policy, existing NO_X waivers for the 2008 ozone standards would remain valid until area designations for the 2015 NAAQS become effective, and we encourage air agencies to consult the EPA's guidance on appropriate documentation for new waiver requests.[19]

J. General Nonattainment NSR Requirements

With one significant exception, the EPA is proposing to retain its NNSR requirements contained at 40 CFR 51.165 and part 51 Appendix S, which contain provisions for the preconstruction review and issuance of permits to proposed new major stationary sources and major modifications locating in ozone nonattainment areas. The one exception pertains to a proposal to address IPT for ozone. As explained in Section IV.F of this preamble, the EPA is proposing to confirm its policy on ozone IPT, which is currently codified at 40 CFR 51.165(a)(11) and part 51 Appendix S, section IV.G.5, in response to a petition for reconsideration. A basic understanding about how the NNSR requirements would otherwise apply to the 2015 ozone NAAQS can be obtained from the preamble discussion at Section VIII.C in the final rule for the setting of

[13] The EPA has defined RACT as the lowest emission limitation that a particular source is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility (December 9, 1976, memorandum from Roger Strelow, Assistant Administrator for Air and Waste Management, to Regional Administrators, ''Guidance for Determining Acceptability of SIP Regulations in Non-Attainment Areas'' and also in 44 FR 53762; September 17, 1979). Availability and feasibility may differ across sources in the same category (June 19, 1985, memorandum from John Calcagni, Chief, Economic Analysis Branch, to G.T. Helms, ''Criteria for Determining RACT in Region IV.'').

Seitz, Director, Office of Air Quality Planning and Standards. November 30, 1999. Available at: *http://www3.epa.gov/ttn/caaa/t1/memoranda/revracm.pdf.*

[17] Memorandum of December 14, 2000, from John S. Seitz, Director, Office of Air Quality Planning and Standards, re: ''Additional Submission on RACM from States with Severe One-Hour Ozone Nonattainment Area SIPs.'' Available at: *http://www3.epa.gov/ttn/caaa/t1/memoranda/121400_racmmemfin.pdf.*

[18] *See* the final SIP Requirements Rule for the 2008 ozone NAAQS (80 FR 12264, 12270; March 6, 2015).

[19] Memorandum dated January 14, 2005, ''Guidance on Limiting Nitrogen Oxides (NO_X) Requirements Related to 8-Hour Ozone Implementation'' from Stephen D. Page, Director, Office of Air Quality Planning and Standards, to Air Directors, Regions I–X. Available at: *http://www3.epa.gov/ttn/caaa/t1/memoranda/guide8hr-oz.pdf.*

the 2015 Ozone NAAQS. *See* 80 FR 65442 (October 26, 2015).

The EPA proposes to codify NNSR requirements for the ozone NAAQS at 40 CFR 51.1314. These provisions would require that for each nonattainment area an air agency must submit an NNSR plan or plan revision for the 2015 ozone NAAQS no later than 36 months after the effective date of the area's nonattainment designation for the 2015 ozone NAAQS. As discussed in Section IV.B of this preamble, we are proposing two options for revoking the 2008 ozone NAAQS. The first approach to revoking the 2008 ozone NAAQS (option 1) would parallel the approach used in revoking the 1-hour and 1997 ozone NAAQS, and would require that a set of protective anti-backsliding requirements be promulgated for all areas that are designated nonattainment for both the 2008 NAAQS and the 2015 NAAQS. Under the second approach (option 2), the 2008 ozone NAAQS would not be revoked in any area designated nonattainment for the 2008 ozone NAAQS until that area is redesignated to attainment with an approved CAA section 175A 10-year maintenance plan; but in no case earlier than 1 year after the effective date of designation for the 2015 ozone NAAQS. If the EPA were to revoke the 2008 ozone NAAQS according to proposed option 1, the EPA is also proposing conforming changes to the existing anti-backsliding provisions at 40 CFR 51.165(a)(12) and part 51 Appendix S section VII. *See* Section IV.B of this preamble for a discussion of the conforming revisions to the anti-backsliding provisions addressing the proposed revocation of the 2008 ozone NAAQS under option 1.

K. Ambient Monitoring Requirements

The EPA is not proposing any changes to the existing ozone ambient monitoring requirements are codified in 40 CFR part 58. Monitoring rule amendments published on October 17, 2006, (71 FR 61236) established minimum ozone monitoring requirements based on population and levels of ozone in an area to better prioritize monitoring resources. The minimum monitoring requirements are contained in Table D–2 of appendix D to part 58. The Photochemical Assessment Monitoring Station (PAMS) program, required by CAA section 182(c)(1), collects enhanced ambient air measurements. The rulemaking for the final 2015 ozone NAAQS included revisions to the PAMS requirements (80 FR 65416; October 26, 2015). The revisions were intended to provide a more spatially dispersed network, reduce potential redundancy, and improve data value while providing monitoring agencies flexibility in collecting additional information needed to understand their specific ozone issues.

L. Requirements for an OTR

The EPA is proposing to retain its existing OTR requirements, and to add new deadline requirements for certain RACT SIP revisions (*see* Section IV.D of this preamble). The OTR requirements for the 2008 ozone NAAQS, which are codified in 40 CFR 51.1116, establish the general applicability of CAA sections 176A (interstate transport commissions) and 184 (control of interstate ozone air pollution), and stipulate the criteria and timing for RACT SIP submittals and RACT implementation for those portions of states located in an OTR (*see* 80 FR 12295; March 6, 2015). With the exception of additional submission and implementation deadlines for certain RACT SIP revisions (*see* Section IV.D of this preamble), the EPA is proposing to retain the same requirements for the 2015 ozone NAAQS, without revision.

M. Fee Programs for Severe and Extreme Nonattainment Areas That Fail To Attain

The EPA is proposing to retain its existing fee program SIP submission requirements, which are codified for the 2008 ozone NAAQS in 40 CFR 51.1117, and apply to each area classified Severe or Extreme for that standard. Affected areas must submit a SIP revision that meets the requirements of CAA section 185 (Enforcement for Severe and Extreme ozone nonattainment areas for failure to attain) within 10 years of the effective date of designation and classification as a Severe or Extreme area. The EPA is proposing to retain the same SIP submission requirements for the 2015 ozone NAAQS, without revision.

N. Applicability

The EPA is proposing to retain the provision that establishes applicability of the current ozone NAAQS implementation provisions, which is codified for the 2008 ozone NAAQS in 40 CFR 51.1119. The provision states that the current provisions (subpart AA of part 51) shall replace those for the previous 1997 standards (subpart X of part 51) after revocation of the 1997 NAAQS, except for anti-backsliding purposes. The EPA is proposing to retain the same requirements for the 2015 ozone NAAQS, except that the proposed new implementation provisions (to be codified in the new subpart CC of part 51) would replace those for the 2008 ozone NAAQS (subpart AA) if the 2008 standards are revoked for all purposes, except for anti-backsliding purposes. The proposed revocation of, and anti-backsliding requirements for, the 2008 ozone NAAQS are discussed in Section IV.B of this preamble.

IV. Provisions of the 2008 Ozone NAAQS Implementing Regulations To Be Retained With Specific Revisions

For purposes of the 2015 ozone NAAQS, we are proposing to promulgate some provisions that are similar to those for the 2008 ozone NAAQS, but with minor modifications to reflect application to the 2015 ozone NAAQS, as explained later. The existing classification and SIP requirement provisions for the 2008 standards, and revocation of the 1997 standards are codified at subpart AA of 40 CFR part 51, and the corresponding provisions for the 2015 standards would be codified at the new subpart CC of part 51. These proposed revisions reflect classification thresholds and attainment deadlines relevant to the 2015 ozone standards; MCD for RFP; submission and implementation deadlines for RACT SIP revisions; the consideration of intrastate pollution sources outside of a nonattainment area for attainment planning; NNSR IPT for ozone; emissions inventories and emissions statements; and revoking the 2008 standards. The EPA welcomes comment on the following proposed provisions.

A. Application of Classification and Attainment Date Provisions in CAA Section 181 to Areas Subject to Subpart 2 of Part D of Title I of the CAA

1. Background and Summary of Proposal

The EPA is proposing thresholds for classifying nonattainment areas for the 2015 ozone NAAQS, and is proposing the timing of attainment dates for each classification. We are also proposing to grant voluntary reclassification to six California areas designated as nonattainment for the 1997 ozone NAAQS that were voluntarily reclassified under that NAAQS and the subsequent 2008 ozone standards. Each area designated as nonattainment for the 2015 ozone NAAQS will be classified at the same time as the area is designated by the EPA. Accordingly, the EPA intends to finalize classification thresholds on or before the date that it issues area designations.

2. Initial Area Designations for the 2015 Ozone NAAQS

After promulgating a new or revised NAAQS, the EPA considers air agencies' recommendations for initial area designations (*i.e.,* as nonattainment, attainment, or unclassifiable). Area designations establish which areas are meeting the NAAQS (attainment) and which areas are not meeting the NAAQS (nonattainment), and the boundaries for those areas. Areas designated unclassifiable cannot be classified as meeting or not meeting the NAAQS based on available information. Based on the schedule provided in section 107(d) of the CAA, states are required to submit designation recommendations for every area in the state to the EPA by no later than October 1, 2016, which is 1 year after the promulgation date of the 2015 ozone NAAQS.[20] In the event that the EPA intends to modify an air agency's recommendation, the EPA will notify the air agency no less than 120 days prior to issuing designations.[21] The CAA requires the EPA to promulgate designations no later than 2 years after the October 1, 2015, promulgation of the revised ozone NAAQS. Such period may be extended for up to one year in the event the Administrator has insufficient information to promulgate the designations.

3. Nonattainment Area Classifications

In accordance with CAA section 181(a)(1), each area designated as nonattainment for the 2015 ozone NAAQS will be classified at the time of designation. The planning and emission reduction requirements as well as the maximum attainment date for each area are based on that area's classification.

Under Subpart 2 of part D of title I of the CAA, state planning and emissions control requirements for ozone are determined, in part, by a nonattainment area's classification. These requirements apply in addition to the general SIP planning requirements applicable to all nonattainment areas under subpart 1 of part D. Under CAA subpart 2, ozone nonattainment areas are classified based on the severity of their ozone levels (as determined based on the area's ''design value,'' (DV)).[22] Nonattainment areas with a ''lower'' classification have ozone levels that are closer to the standard than areas with a ''higher'' classification. Subpart 2 provides an increasing amount of maximum time from the date of designation to attain the standards for the progressively higher classifications: Marginal (3 years), Moderate (6 years), Serious (9 years), Severe-15 (15 years), Severe-17 (17 years) and Extreme (20 years).

Air agencies with areas in the lower classification levels have fewer mandatory air quality planning and control requirements than those in higher classifications. For instance, air agencies with a Marginal area are only required to adopt an emissions statement rule for major stationary sources, submit a base year emissions inventory, follow the general and transportation conformity requirements in CAA section 176(c), and implement a nonattainment area preconstruction permit program (NNSR). Air agencies with a Moderate area are subject to the Marginal area requirements; in addition air agencies must submit a SIP revision that provides for a 15 percent emissions reduction from the RFP baseline year within 6 years after the baseline year, and a demonstration that the area will attain as expeditiously as practicable, but not later than 6 years after designation. Air agencies with a Moderate area must also adopt (and submit for EPA approval) certain emissions control requirements, such as RACT, a basic vehicle I/M program if the area meets the applicable population thresholds, and provisions for increased offsets for new or modified sources under the state's NNSR program. The higher classifications similarly require additional emissions control programs and stricter NNSR requirements beyond those required for a Moderate area. In addition, the major source threshold for permitting, RACT and emissions reporting decreases progressively from 100 tons per year (tpy) for Marginal areas to 10 tpy for Extreme areas.

4. Proposed Classification Thresholds

a. Background. The CAA was amended in 1990 to add specific provisions that apply to ozone nonattainment areas. These include timelines for both planning and implementation, and requirements for specific programs to reduce emissions that vary based on an area's classification. The ozone standard in effect at the time of the 1990 CAA amendments was a 1-hour exceedance-based standard of 0.12 ppm.[23] Accordingly, the classification provisions in Table 1 in section 181 of subpart 2 of the CAA (also referred to herein as the ''subpart 2 classification table'') are specific to that 1-hour standard. In 1997, the EPA revised both the form and level of the ozone NAAQS to a 3-year average of annual fourth highest daily maximum 8-hour averages.[24] In a subsequent rulemaking, the EPA adapted the CAA's 1-hour classification thresholds to the new 8-hour standard [25] and used the new 8-hour threshold values to classify certain areas designated nonattainment for the 1997 8-hour NAAQS. We translated the classification thresholds in the subpart 2 classification table from 1-hour DVs to 8-hour DVs based on the percentage by which each classification threshold in the table exceeds the 1-hour ozone NAAQS. We noted that these percentages, as established by Congress in 1990, set the classification thresholds at certain percentages or fractions above the level of the standard.[26] The EPA refers to this method as the ''percent-above-the-standard'' method. This approach for translating the CAA's 1-hour threshold values to 8-hour threshold values was challenged in litigation and was upheld by the Court. *See South Coast Air Quality Management District* v. *Environmental Protection Agency,* 472 F.3d at 896–898. After analyzing various alternative options for establishing classification thresholds, the EPA retained the ''percent-above-the-standard'' approach in its final implementing regulations for the 2008 ozone NAAQS.[27]

b. Proposed classification threshold method. In this action, we are proposing to use the same ''percent-above-the-standard'' methodology as was used for establishing thresholds for classifications for the 1997 and 2008 8-hour ozone standards. The percent-above-the-standard method is a simple and straightforward method for establishing classification thresholds that is based on principles inherent in

[20] Area designations guidance for the 2015 ozone NAAQS available at: *https://www.epa.gov/ozone-designations/epa-guidance-area-designations-2015-ozone-naaqs.*

[21] While CAA section 107, which governs the process for initial area designations, specifically addresses states, the EPA intends to follow the same process for tribes to the extent practicable, pursuant to section 301(d) of the CAA regarding tribal authority and the Tribal Authority Rule (TAR) (63 FR 7254; February 12, 1998).

[22] The air quality DV for the 8-hour ozone NAAQS is the 3-year average of the annual fourth highest daily maximum 8-hour average ozone concentration for a specific monitor. When an area has multiple monitors, the area's DV is determined by the individual monitor with the highest DV.

[23] For additional discussion on the 1-hour ozone NAAQS and its associated area designations and classifications, *see* 56 FR 56695 (November 6, 1991).

[24] *See* 40 CFR Appendix I.

[25] Referred to as the Phase 1 Rule, *see* 69 FR 23956 to 23966 and part 51, subpart X at 51.903.

[26] The upper thresholds of the Marginal, Moderate, Serious and Severe classifications are precise percentages or fractions above the level of the standard, namely 15 percent (3/20ths more than the standard), 33.33 percent (one-third more than the standard), 50 percent (one-half more than the standard), and 133.3 percent (one and one-third more than the standard).

[27] *See* 77 FR 30162 to 30164 (May 21, 2012).

the subpart 2 classification table itself. The principles include the following:

- Areas are grouped by the severity of their air quality problem as characterized by the degree of nonattainment based on their DV.
- Classification would occur ''by operation of law'' without relying on the EPA exercising discretion for individual situations.[28]
- Classification thresholds are derived from the structure or logic of the CAA's nonattainment area planning and control requirements, including the subpart 2 classification table, and consistent with the overall goal of subpart 2 of attaining the standards as expeditiously as practicable. At the same time, the CAA provides mechanisms for voluntary and mandatory reclassification to a higher classification, in the event that the initial maximum attainment date for an area is determined to be insufficient to achieve the standards.

In developing its proposed Classifications Rule for the 2008 ozone standards, the EPA evaluated other options for classifying ozone nonattainment areas but did not find them to be a more reasonable interpretation of the Act's classification provisions, and did not propose or solicit comment on them in the rule.[29]

Under the proposed percent-above-the-standard method, the classification thresholds in the subpart 2 classification table would be translated into a corresponding set of 8-hour DVs that are the same percentages above the 2015 ozone NAAQS as the DV levels in the subpart 2 classification table are above the 1-hour ozone NAAQS. For example, the threshold separating the Marginal and Moderate classifications in the subpart 2 classification table (0.138 ppm) is 15 percent above the 1-hour ozone NAAQS (0.12 ppm). Thus, under this approach, the threshold separating the Marginal and Moderate classifications for the 2015 ozone NAAQS would be 0.070 ppm plus 15 percent, or 0.081 ppm. Table 1 depicts this proposed translation for classifications as it would apply for the 2015 ozone NAAQS.

TABLE 1—SUBPART 2 1-HOUR OZONE DESIGN VALUE CLASSIFICATION TABLE TRANSLATION TO 8-HOUR DESIGN VALUES FOR THE 2015 OZONE NAAQS OF 0.070 PPM

Area class		1-Hour design value (ppm)	Percent above 1-hour ozone NAAQS	8-hour ozone design value (ppm)
Marginal	From up to [a]	0.121	0.833	0.071
		0.138	15	0.081
Moderate	From up to [a]	0.138	15	0.081
		0.160	33.333	0.093
Serious	From up to [a]	0.160	33.333	0.093
		0.180	50	0.105
Severe-15	From up to [a]	0.180	50	0.105
		0.190	58.333	0.111
Severe-17	From up to [a]	.0190	58.333	0.111
		0.280	133.333	0.163
Extreme	Equal to or above	0.280	133.333	0.163

[a] But not including.

Based on our analysis of air quality information from 2013–2015, we estimate that approximately 57 ''hypothetical nonattainment areas'' had ambient ozone concentrations exceeding the 2015 ozone NAAQS. We use these 57 ''hypothetical nonattainment areas'' for purposes of the following discussion. These hypothetical areas are intended to illustrate the potential distribution of areas into the proposed classifications. The actual number of total nonattainment areas, boundaries of those areas, and the classification of each area will depend on decisions made in the separate designations process under CAA section 107(d) and we anticipate that these decisions will be based on air quality information from 2014–2016. Applying the proposed thresholds in Table 1, the 57 hypothetical nonattainment areas based on 2013–2015 air quality data would yield the distribution in each classification as shown in Table 2.

TABLE 2—NUMBER OF HYPOTHETICAL NONATTAINMENT AREAS IN EACH CLASSIFICATION UNDER THE 2015 OZONE NAAQS: PERCENT-ABOVE-THE-STANDARD METHOD

Area classification	2015 Ozone NAAQS (hypothetical areas) [a]
Marginal	47
Moderate	7
Serious	3
Severe-15	0
Severe-17	0
Extreme	0
Total	57

[a] Hypothetical nonattainment area classifications do not reflect potential voluntary reclassifications of the California areas discussed in Section IV.A.5 of the preamble.

The proposed classification method results in the vast majority of nonattainment areas being classified Marginal. It is possible that a few areas would have a later maximum statutory attainment date for their existing classification under the 2008 ozone NAAQS than they would have for their new classification under the 2015 NAAQS. For example, an area that would be classified Moderate if designated in 2017 for the more stringent 2015 ozone NAAQS (with a potential maximum statutory attainment date in 2023), may currently be classified Severe for the less-stringent 2008 ozone NAAQS (which has a later maximum statutory attainment date in 2027).[30] This issue also arose under the previously promulgated 8-hour classification threshold structure for the 2008 NAAQS. *See* Section IV.A.5 of this preamble for additional details on how the EPA intends to address previous voluntary reclassifications under the 2015 ozone NAAQS.

For areas likely to be classified Marginal with a 3-year attainment date

[28] Prior to any application of the 5 percent adjustment provision under CAA section 181(a)(4) which may occur in the 90-day period following initial designations and classifications). *See* Section IV.A.5 of this preamble for details on how the EPA proposes to interpret previous voluntary reclassification requests for the 1997 ozone NAAQS under the 2015 ozone NAAQS.

[29] Docket #EPA–HQ–OAR–2010–0885 includes a background information document prepared for the proposed rule titled, Additional Options Considered for Classification of Nonattainment Areas under the Proposed 2008 Ozone NAAQS (January 2012).

[30] As indicated elsewhere in this preamble, the CAA requires the EPA to designate areas for the 2015 standard by October 1, 2017. Thus, a 6-year attainment deadline would be in 2023.

(*e.g.,* in 2020), a number of federal and state emission reduction programs have already been adopted that are expected to provide reductions of ozone precursor emissions, both within and upwind of the ozone nonattainment areas, lowering peak ozone concentrations by the attainment date. Such programs include more stringent emission standards for on-road and nonroad vehicles and equipment (with associated fleet turnover), regional reductions in power plant emissions to address interstate transport, and future programs to reduce VOC emissions from oil and gas sources.

5. Reclassification of Nonattainment Areas That Have Voluntarily Requested Higher Classifications

The CAA provides three mechanisms for addressing nonattainment areas that may not be able to attain by the attainment date appropriate to their classification. First, CAA section 181(a)(4) provides that within 90 days of designation and classification, the Administrator may exercise discretion to reclassify an area to a higher (or lower) classification if its DV is within 5 percent of the DV range of the higher (or lower) classification.[31] Any air agency interested in taking advantage of this flexibility should submit a request to the EPA in sufficient time for the Administrator to make a determination within the 90 days provided.

The second mechanism, provided in CAA section 181(b)(2), requires that an area be reclassified to a higher classification (*i.e.,* ''bumped-up'') if the EPA determines that the area has failed to attain the standard by the applicable attainment date.

The third mechanism, provided in CAA section 181(b)(3), allows an air agency to voluntarily request that the EPA reclassify the area to a higher classification. The EPA must approve any such requests. Once an area is reclassified to a higher classification, it becomes subject to the associated additional planning and control requirements for that higher classification, and must attain the standard no later than the maximum attainment date for that classification. Six nonattainment areas in California were granted voluntary reclassifications for both the 1997 and 2008 ozone standards (77 FR 30165; May 21, 2012).

The EPA is again proposing to apply a previous voluntary reclassification for areas in California to the more stringent 2015 ozone standards unless the state of California explicitly requests otherwise in their comments to this proposed action.[32] These areas are listed in Table 3. We believe this is an appropriate mechanism to address the situation for these California areas that were voluntarily reclassified for the 1997 ozone NAAQS and previously used this mechanism for the 2008 ozone NAAQS to ensure the areas would have an attainment date for the more stringent 2015 ozone NAAQS that is no earlier than the area's attainment date for the less stringent 2008 NAAQS. The EPA is proposing this approach in order to minimize burden on the state of California and obviate the need to go through the voluntary reclassification process again.

TABLE 3—AREAS FOR WHICH THE STATE OF CALIFORNIA REQUESTED A VOLUNTARY RECLASSIFICATION UNDER THE 1997 NAAQS

Nonattainment area	Original 1997 ozone NAAQS classification (attainment date)	Voluntary reclassification for 1997 ozone NAAQS (attainment date)	Voluntary reclassification for 2008 ozone NAAQS (attainment date)	Hypothetical initial classification under 2015 ozone NAAQS [a] (attainment date)	Potential voluntary reclassification under 2015 ozone NAAQS [a] (attainment date)
Los Angeles-South Coast Air Basin.	Severe-17 (2021)	Extreme (2024)	Extreme (2032)	Serious (2026)	Extreme (2037).
San Joaquin Valley	Serious (2013)	Extreme (2024)	Extreme (2032)	Serious (2026)	Extreme (2037).
Riverside County (Coachella Valley).	Serious (2013)	Severe-15 (2019)	Severe-15 (2027)	Moderate (2023)	Severe-15 (2032).
Sacramento Metro	Serious (2013)	Severe (2019)	Severe-15 (2027)	Moderate (2023)	Severe-15 (2032).
Ventura County	Moderate (2010)	Serious (2013)	Serious (2021)	Marginal (2020)	Serious (2026).
Western Mojave	Moderate (2010)	Severe-15 (2019)	Severe-15 (2027)	Moderate (2023)	Severe-15 (2032).

[a] Based on thresholds proposed in this notice and final 2013–2015 design values.

It is important to note that an air agency may request a voluntary reclassification for an area under CAA section 181(b)(3) at any time. If the air agency wants a specific higher classification to apply to an area at the time of initial designation, the EPA encourages the air agency to make such a request prior to or contemporaneous with the designation process.

6. Attainment Dates for Nonattainment Areas in Each Classification of the 2015 ozone NAAQS

The EPA is proposing to retain its current approach in establishing attainment dates for each nonattainment area classification, which run from the effective date of designation. This approach is codified at 40 CFR 51.1103 for the 2008 ozone NAAQS, and we are proposing to retain the same approach for the 2015 ozone NAAQS without revision.

In the implementing regulations for the 1997 ozone NAAQS, the EPA interpreted these timeframes to run from the date that area designations and nonattainment classifications (by operation of law) became effective (64 FR 23954; April 30, 2004). We adopted an alternative approach in the classification regulations for the 2008 ozone standards, where the attainment dates would be December 31 of the year that is the specified number of years in the subpart 2 classification table after designation (77 FR 30166; May 21, 2012). The end of calendar year attainment date was challenged in *NRDC* v. *EPA,* 777 F.3d 456 (D.C. Cir. 2014). On December 23, 2014, the U.S. Court of Appeals for the District of Columbia Circuit issued an opinion holding that the EPA's decision to run the attainment periods to the end of the calendar year in which areas were designated was unreasonable. While

[31] Because most areas would be expected to be classified Marginal (*i.e.,* the lowest classification) and the few areas that would be classified in higher classifications are likely to be challenged to attain by the attainment date for the classification it receives at the time of designation, we do not anticipate receiving requests to reclassify an area to a lower classification.

[32] Areas for which California declines voluntary reclassification would be classified at the time of designation for the 2015 ozone NAAQS based on their DV.

recognizing that there is a ''gap'' in the statute since the CAA runs the attainment periods from the date of enactment of the CAA Amendments of 1990, the Court concluded that nothing in the statute or congressional intent authorized the EPA to establish the attainment dates for designated ozone nonattainment areas as December 31st of the relevant calendar years, but rather that Congress's decision to run the ''. . . attainment periods starting from the designation date'' for the ozone standard existing at the time of the 1990 CAA amendments ''strongly suggests that the same trigger date should apply when adapting [applicable attainment dates] to the analogous situation of a revised NAAQS.'' 777 F.3d at 466. The EPA subsequently revised its regulations for the 2008 ozone NAAQS to follow the same approach used for the 1997 ozone NAAQS, and this is codified at 40 CFR 51.1103.

Consistent with the regulatory approach for both the 1997 and 2008 ozone NAAQS, we are proposing that the maximum attainment dates for nonattainment areas in each classification under the 2015 NAAQS are as follows: Marginal—3 years from effective date of designation; Moderate—6 years from effective date of designation; Serious—9 years from effective date of designation; Severe—15 years (or 17 years) from effective date of designation; and Extreme—20 years from effective date of designation.

B. Transition From the 2008 Ozone NAAQS to the 2015 Ozone NAAQS and Anti-Backsliding Requirements

1. Background and Summary of Proposal

The EPA is proposing and seeking comment on two alternative approaches for revoking the 2008 ozone NAAQS and is also seeking comment on whether to revoke the NAAQS at the current time. The first approach to revoking the 2008 ozone NAAQS would parallel the approach used in revoking the 1-hour and 1997 ozone NAAQS. Under this first approach, the 2008 ozone NAAQS would be revoked at essentially the same time for all areas of the U.S., and a set of protective anti-backsliding requirements would be promulgated for all areas that are designated nonattainment for the 2008 and 2015 NAAQS as of one year after the effective date of designation for the 2015 ozone NAAQS. Under the second approach, the 2008 ozone NAAQS would continue to apply in any area designated nonattainment for the 2008 ozone NAAQS until that area is redesignated to attainment with an approved CAA section 175A 10-year maintenance plan; but in no case earlier than 1 year after the effective date of designation for the 2015 ozone NAAQS. The 2008 ozone NAAQS would be revoked in all other areas 1 year after the effective date of designation for the 2015 ozone NAAQS.

2. Rationale and Authority

The EPA believes that both of the proposed options to revoke the 2008 ozone NAAQS are consistent with the CAA and previous precedent in transitioning from a previous NAAQS to a new, more stringent NAAQS, and would help ensure that areas designated attainment for the revoked NAAQS continue to attain the revoked NAAQS into the future.

a. Option 1: Revoke the 2008 ozone NAAQS for all purposes in each area 1 year after the effective date of the designation for the 2015 ozone NAAQS. The EPA's first proposed option would revoke the 2008 ozone NAAQS for all purposes 1 year following the effective date of the designations for the 2015 ozone standard. The EPA interprets the CAA such that revoking the 2008 ozone NAAQS in an area would require appropriate anti-backsliding measures. Therefore, the EPA is proposing that anti-backsliding provisions would apply to an area in accordance with its designation and its classification for the 2008 (and, if applicable, 1997 and 1-hour) ozone NAAQS as of the effective date of the revocation of the 2008 ozone NAAQS (a more detailed discussion of EPA's proposed approach to anti-backsliding is provided in Section IV.B.4 of this preamble). Upon revocation of the 2008 NAAQS, the areas that had been initially designated or subsequently redesignated to attainment for the 2008 NAAQS prior to its revocation would be subject only to the general protections of CAA sections 110(l) and 193, whereas areas designated nonattainment for the 2008 NAAQS would also be subject to an extensive set of regulatory anti-backsliding provisions promulgated in accordance with the principles of CAA section 172(e). This approach is consistent with the EPA's established practice in transitioning from prior to current ozone NAAQS.

After revocation of the 2008 ozone NAAQS, the designations (and the classifications associated with those designations) for that NAAQS would no longer be in effect. However, the EPA would retain the listing of the designated nonattainment areas and their associated classifications for the revoked 2008 ozone NAAQS in 40 CFR part 81, for the sole purpose of identifying the anti-backsliding requirements that may apply to the areas at the time of revocation. Accordingly, such references to historical designations for the revoked NAAQS should not be viewed as current designations under CAA section 107(d).

The EPA believes it would be appropriate to revoke, rather than retain, the 2008 ozone NAAQS for all purposes because it would ensure that only one ozone NAAQS—in this case the more protective 2015 ozone NAAQS—would directly apply in an area, rather than having a situation in which two standards would apply concurrently. The EPA believes that the permanent retention of two standards, differing only in the ozone concentrations they allow, could result in unnecessarily complex implementation procedures [33] and is not necessary to provide for timely attainment of the more stringent NAAQS. The EPA's reason for establishing the new standards of 0.070 ppm as requisite to protect public health and welfare was its conclusion that the old standard of 0.075 ppm was not adequate. Revoking (with appropriate anti-backsliding measures) rather than retaining the 2008 ozone NAAQS would facilitate a more seamless transition to demonstrating compliance with the more health and welfare protective 2015 ozone NAAQS, and would ensure an efficient use of state and local resources in working toward attainment of that standard. Moreover, we believe that by requiring adequate anti-backsliding measures we will ensure continued momentum in air agencies' efforts toward achieving clean air.

The D.C. Circuit held that the EPA had authority to revoke the one-hour NAAQS so long as it introduced adequate anti-backsliding measures. *South Coast Air Quality Mgmt. Dist.* v. *EPA,* 472 F.3d 882, 899 (D.C. Cir. 2006). The EPA is proposing to follow the same approach here as was upheld by the D.C. Circuit by requiring adequate anti-backsliding measures, as discussed in this section of the preamble.

b. Option 2: Revoke the 2008 ozone NAAQS for all purposes in an area only when designated attainment for that NAAQS, no sooner than 1 year after the effective date of the designations for the 2015 ozone NAAQS. Under this option, the EPA would not revoke the 2008 ozone NAAQS in any area that is designated nonattainment for that NAAQS. For areas designated attainment or unclassifiable for the 2008

[33] For example, if an area's boundaries for two ozone NAAQS differ from one another the same test of conformity cannot be used for both ozone NAAQS (*see* 77 FR 30168; May 21, 2012).

NAAQS on the effective date of designations for the 2015 ozone NAAQS, the 2008 ozone NAAQS would be revoked 1 year after the effective date of the 2015 NAAQS designation for that area. For nonattainment areas that are subsequently redesignated attainment (maintenance) for the 2008 ozone NAAQS, the 2008 ozone NAAQS would be revoked upon designation, but in no case sooner than 1 year after the effective date of the designation for the 2015 ozone NAAQ for the area. This proposed approach follows the approach established in revocation of the 1997 primary annual particulate matter ($PM_{2.5}$) NAAQS (*see* 81 FR 58142, August 24, 2016). This option is also consistent with the approach established for the transition from the prior lead and sulfur dioxide (SO_2) NAAQS to the current lead and SO_2 NAAQS (*see* 73 FR 67043, November 12, 2008; and 75 FR 35581, June 22, 2010, respectively).

Under this proposed approach, areas that are designated nonattainment for the 2008 ozone NAAQS at the time initial area designations are completed for the 2015 NAAQS would be required to continue to meet all applicable implementation requirements for the 2008 NAAQS in those areas, and would continue to seek redesignation to attainment for the 2008 ozone NAAQS when the areas meet the conditions necessary for redesignation. While such an area remains designated nonattainment for the 2008 ozone NAAQS, transportation and general conformity would continue to apply and the EPA would continue to reclassify areas as provided in CAA section 181(b)(2). Further, the designations for the 2008 ozone NAAQS would no longer be in effect in areas where the NAAQS has been revoked, and the sole designations that would remain in effect would be those for the 2015 ozone NAAQS. Transportation and general conformity requirements for the 2008 ozone NAAQS would no longer apply in the areas where that NAAQS has been revoked.

The EPA notes that under proposed option 2, it is unnecessary to propose a specific set of additional anti-backsliding requirements for the 2008 ozone NAAQS, since option 2 would only revoke this NAAQS in areas initially designated or redesignated attainment for the 2008 NAAQS. Special additional anti-backsliding requirements are not necessary for areas that have attained the 2008 NAAQS. In areas that have been redesignated to attainment for the 2008 ozone NAAQS while that NAAQS is in effect, states have fulfilled all applicable attainment and maintenance plan requirements for that NAAQS, including applicable anti-backsliding requirements for the prior revoked 1997 and 1-hour ozone NAAQS. The area, therefore, is not subject to any specific additional anti-backsliding requirements for the revoked 2008 ozone NAAQS. These areas are required instead to implement their approved CAA section 175A maintenance plan for the 2008 ozone NAAQS and, if designated attainment for the 2008 ozone NAAQS implement a Prevention of Significant Deterioration (PSD) program for this NAAQS. Revisions to the approved maintenance plan for such an area can only be made subject to the CAA's provisions in sections 110(l) and 193, which prevent changes to SIPs if such changes would interfere with attainment and maintenance of the more current 2015 ozone NAAQS.

3. Effective Date of the Revocation of the 2008 Ozone NAAQS

Under either option 1 or 2 outlined earlier, the EPA is proposing to revoke the 2008 ozone NAAQS no sooner than one year after the effective date of an area's final designation for the 2015 ozone standards.[34] The proposed timeline for revocation of the standard under either option 1 or 2 outlined earlier is intended to ensure that there is no period during which conformity does not apply in areas that are nonattainment or maintenance for the 2008 ozone NAAQS and that are designated nonattainment for the 2015 ozone NAAQS, and that nonattainment areas for the 2015 ozone NAAQS do not have to perform transportation conformity analyses for both the prior and current ozone standards at the same time.[35] As an example, areas designated nonattainment for the first time for the 2015 ozone NAAQS would have a 1-year grace period before transportation conformity applies for those standards. This 1-year grace period before transportation conformity is required would apply to all areas designated nonattainment for the 2015 standards, regardless of their 2008 NAAQS designation status. Transportation conformity for the 2008 standards would, therefore, no longer apply 1 year following the effective date of the 2015 ozone NAAQS designations (*i.e.,* when the 2008 standards are revoked in eligible areas). However, transportation conformity obligations for the 2008 ozone standards would remain applicable during the grace period and would not be affected by the designation of areas for the 2015 NAAQS. Our proposed approach further supports air quality planning in allowing areas to be redesignated to attainment or reclassified to a higher classification until the 2008 ozone NAAQS is revoked.

If the 2008 ozone NAAQS are revoked in an area in a manner consistent with the EPA's first proposed option, the anti-backsliding requirements for those NAAQS would become applicable. The extent of continued implementation efforts for revoked standards derives from administration of anti-backsliding requirements (if any) for the revoked standards. After the 2008 ozone NAAQS is revoked for an area, the EPA will no longer take action to reclassify or to redesignate that area for that NAAQS. Further, the designations for the 2008 ozone NAAQS would be no longer be in effect in such areas, and the sole designations that would remain in effect would be those for the 2015 ozone NAAQS. However, under option 1, the EPA would retain the listing of the designated areas and the associated nonattainment classifications for the revoked 2008 ozone NAAQS in 40 CFR part 81, for the sole purpose of identifying the anti-backsliding requirements that may apply to the areas as of the effective date of the revocation. Such references to historical designations for the revoked standards would not be current designations under CAA section 107(d) and should not be viewed as such. If the EPA finalizes the option 2 approach to revocation of the 2008 ozone NAAQS, the EPA would continue to redesignate areas for the 2008 ozone NAAQS after the initial revocation occurs 1 year after the effective date of designations for the 2015 ozone NAAQS. For any area

[34] The 2008 Ozone NAAQS SIP Requirements Rule revoked the 1997 ozone standards upon the effective date of that final rule (April 6, 2015), which was 30 days after its publication in the **Federal Register** (80 FR 12296; March 6, 2015). The EPA deemed this approach appropriate because the final SIP requirements rule was being issued more than a year after the effective date of final area designations (July 20, 2012) for the 2008 ozone standards (77 FR 30160; May 21, 2012), an atypical sequence that is not expected to apply in this case.

[35] The EPA believes that these concerns are relevant for either proposed option 1 or option 2, and therefore proposes the same timeline for revocation for either option. Under option 2, the motivation of ensuring that areas do not have to perform transportation conformity analyses for both the prior and current ozone standards at the same time would only be relevant for 2015 ozone NAAQS nonattainment areas that are maintenance areas for the 2008 ozone NAAQS at the time of the initial revocation. Areas that remain designated nonattainment for the 2008 ozone NAAQS at the time of the initial revocation are required to continue to make transportation conformity determinations until they are redesignated to attainment for that NAAQS regardless of their designation status for the 2015 ozone NAAQS.

redesignated more than 1 year after the effective date of designations for the 2015 ozone NAAQS, the 2008 ozone NAAQS would be revoked on the effective date of the redesignation to attainment for the 2008 ozone NAAQS.

4. Anti-Backsliding Requirements

''Anti-backsliding'' provisions are designed to ensure that for existing ozone nonattainment areas that are designated nonattainment for the revised and more stringent ozone NAAQS, there is protection against degradation of air quality (*e.g.,* the areas do not ''backslide''), the areas continue to make progress toward attainment of the new, more stringent NAAQS, and there is consistency with the ozone NAAQS implementation framework outlined in subpart 2 of Part D of the CAA.
