Sixteen of the nineteen stationary units also have a method to empty portable toilets. All of the pumpout stations noted were funded with grants administered by the Maryland Department of Natural Resources and all comply with local and state sanitary permitting requirements. The State of Maryland has provided documentation indicating that the total vessel population is estimated to be between 2,705 and 4,700 boats in the proposed area. Using the higher of those estimates, approximately 3,196 are identified as recreational vessels, 1,151 are identified as commercial vessels, and 353 are classified as "Other." The estimated vessel population in all of the affected areas is based on length: The most conservative estimates provided by the State of Maryland suggest that there are no vessels less than 16 feet in length, 15 vessels between 16 feet and 25 feet in length, 3,034 vessels between 25 feet and 40 feet in length, and 1,651 vessels greater than 40 feet in length. Based on the number and size of vessels and EPA guidance for state and local officials, the estimated number of vessels requiring pumpout facilities in the Chester River during peak occupancy is 1,207.

In their application, Maryland has certified that the Chester River and its tributaries need greater environmental protection and enhancement of the waters. Maryland has classified the Chester River and the Chesapeake Bay which it drains into, as impaired for not meeting applicable state water quality standards. One hundred percent (100%) of the Chester River is considered impaired by either nutrients, sediment, bacteria or a combination thereof. The counties of Kent and Queen Anne's that surround the Chester River rank as the top two Maryland waterfront counties in terms of beach closings by percentage of beaches. All beach closings were due to elevated bacteria as evidenced by high levels of enterococci.

The Chester River is an important economic driver for the region, providing jobs and revenue through

tourism, commercial and recreational fishing for fish and shellfish, boating, and more. Many people use the Chester River for hunting, cruising, nature observation, sightseeing, waterskiing, tubing, racing, and swimming. Based on a study by the Sage Policy Group in 2012, cited in the application, the Chester River supports \$86 million in annual local economic activity, 900 jobs, and \$26.7 million in annual labor income.

Dated: March 10, 2017.

Cecil Rodrigues,

Acting Regional Administrator, Mid-Atlantic Region.
